	This is a very good example of the later variation dark brown case with flags and stand of arms in the center and foliate motifs in the corners featuring emblems of various industries. The lid moldings remain very nice showing one small 1" area of bubbling near the upper left corner. There are a few thin cracks mostly along the sides of the lid, the initials "JR" are carved into the back surface of the lid and the lower right corner of lid and base show an old brown synthetic filler repair, about 2" on the base. The interior lid shows purple baize lining with nice embossed foliate motif and just a little mild staining or discoloration. The maroon base liner also shows a little mild staining or discoloration. The maroon base liner also shows a little mild staining or discoloration. The small protrusion at the top right corner also present which is rarely the case. The barrel rest shows a few small chips along the edges but its baize covering is still mostly intact. (13B10000-116) [Roy Jinks Family Collection] (1000/1500) Est. 1,000 - 1,500 Smith & Wesson No. 1 Second Issue 2D Quality Revolver serial #95216, 22 RF, 3 3/16" ribbed octagon barrel with a moderately oxidized bore showing areas of pitting, some bright spots and good rifling. The barrel, cylinder and hammer of this "factory second" revolver		526	outside of Zurich from about 1850-1895. A very ornate rifle that was not doubt quite lovely in its day. (13D10174-12) {ANTIQUE} (1000/1500) Est. 1,000 - 1,500 Excellent Smith & Wesson 32 Safety Hammerless "Bicycle" Revolver serial #139659, 32 S&W, 2" ribbed round barrel with a bright excellent bore. The metal surfaces of this handsome Second Model revolver retain about 95% original blue which is slightly thinning to a blue-gray patina under bright direct light on the grip frame, knuckle and a couple small areas on the frame, with some slight high edge silvering and some tiny speckles of light oxidation. The trigger displays strong colors throughout with some mild muting to a smoky case-hardened patina and the unnumbered S&W factory mother-of-pearl grips rate excellent. All the correct parts are serialized to the frame and barrel-to-frame fit as well as timing and lock-up are excellent on this beautiful revolver. Included is a red factory box end labeled to another 32 Safety Hammerless in very fine condition with a few tiny tears and some light edge wear around the corrers of the lid and excellent clear end and interior labels. (23B10000-94) {C&R} [Roy Jinks Family Collection]

(23B10000-94) {C&R} [Roy Jinks Family Collection] (1000/1500)
	This is a very good example of the later variation dark brown case with flags and stand of arms in the center and foliate motifs in the corners featuring emblems of various industries. The lid moldings remain very nice showing one small 1" area of bubbling near the upper left corner. There are a few thin cracks mostly along the sides of the lid, the initials "JR" are carved into the back surface of the lid and the lower right corner of lid and base show an old brown synthetic filler repair, about 2" on the base. The interior lid shows purple baize lining with nice embossed foliate motif and just a little mild staining or discoloration. The marcon base liner also shows a little mind fading. The cartridge block is intact with a full complement of antique copper-cased cartridges, the small protrusion at the top right corner also present which is rarely the case. The barrel rest shows a few small chips along the edges but its baize covering is still mostly intact. (13B10000-116) [Roy Jinks Family Collection] (1000/1500) Est. 1,000 - 1,500 Smith & Wesson No. 1 Second Issue 2D Quality Revolver serial #95216, 22 RF, 3 3/16" ribbed octagon barrel with a moderately oxidized bore showing areas of pitting, some bright spots and good rifling. The barrel, cylinder and hammer of this "factory second" revolver have mostly toned to pewter gunnetal patina showing some areas of fine old pitting and a couple tiny dings. All markings remain completely intact and strong, both sides of the barrel showing '2D. QUAL'TY". The frame retains about 92% original silver finish that shows some slight thinning along the sides and high edges along with some scattered light handling marks and a pleasant dark tarnish. The smooth rosewood grips remain in very good condition showing strong original varish that is flaking throughout and the right panel shows a thin 1 1/2" drying crack. The right panel is appropriately stamp-numbered matching the frame, the other numbered parts are matching by assembly number and		526	outside of Zurich from about 1850-1895. A very ornate rifle that was not doubt quite lovely in its day. (13D10174-12) {ANTIQUE} (1000/1500) Est. 1,000 - 1,500 Excellent Smith & Wesson 32 Safety Hammerless "Bicycle" Revolver serial #139659, 32 S&W, 2" ribbed round barrel with a bright excellent bore. The metal surfaces of this handsome Second Model revolver retain about 95% original blue which is slightly thinning to a blue-gray patina under bright direct light on the grip frame, knuckle and a couple small areas on the frame, with some slight high edge silvering and some tiny speckles of light oxidation. The trigger displays strong colors throughout with some mild muting to a smoky case-hardened patina and the unnumbered S&W factory mother-of-pearl grips rate excellent. All the correct parts are serialized to the frame and barrel-to-frame fit as well as timing and lock-up are excellent on this beautiful revolver. Included is a red factory box end labeled to another 32 Safety Hammerless in very fine condition with a few tiny tears and some light edge wear around the corners of the lid and excellent clear end and interior labels. (23B10000-94) {C&R} [Roy Jinks Family Collection] (1000/1500)

533	Rare Extremely Limited Production Hartford Canoe Club Colt Single Action Army Revolver serial #18HCC, 45 ACP, 5 1/2" barrel with an as-new bore. The gun is finished royal blue with the bright polished sides of the hammer remaining brilliant with perhaps a couple speckles near the knurled thumbpiece. Top of the backstrap just to the rear of the hammer shows gold inlaid crossed pennants above the date of the club's founding "1879. The guns left Colts with checkered hard rubber Rampant Colt eagle head grips and now this example wears a beautiful one piece set of genuine elephant ivory grips from Nutmeg Sports in Tolland, Connecticut. The arm features a unique Hartford Canoe Club serial number, this example number 18HCC, from a total of about 30 made. The gun comes in its original blue Colt Custom Shop box with white outer sleeve, the label serial numbered to the gun. Amusingly it lists the caliber is 45 Colt, they were all made in 45 ACP, one wonders what the factory record will say. The original Colt lock, instruction papers and the blaze orange hangtag remain with the gun. Former Colt Custom Gun Shop Superintendent James Alaimo runs Nutmeg Sports and affirms that all his ivory products are prior to the embargo of 1989 and he provides a signed and notarized statement to that effect with each of his products, this is included with the gun. A very rare opportunity to own a strictly limited edition brand spanking new Hartford Canoe Club Single Action Army. (3B10173-10) {MODERN} (3000/5000) Est. 3,000 - 5,000 Colt Factory Engraved Single Action Army Revolver serial #SA16862, 45 Colt, 7 1/2" barrel with an unfired bore. This lovely D-class engraved revolver is absolutely new in its original box, unturned unfired since leaving Colt. Finished blued and color case-hardened the arm has overall open flowing scroll with a bit of fine embellishment within giving a lovely contrast. The bright-polished sides of the hammer remain brilliant and are unstained. The arm shipped with hard rubber eagle and Rampant Colt grips which ra		337	Russian Contract No. 3 Third Model Revolver by Ludwig Loewe serial #45616, 44 S&W Russian, 6 1/2" ribbed round barrel with a mostly bright about very good bore showing scattered light pitting and strong rifling throughout. The metal surfaces of this revolver are a mix of dark gray and gumetal patina showing remnants of older reapplied blue finish with scattered old pitting and some light dings along the rear edge of the cylinder. The hammer retains a healthy amount of smoky case-hardened colors and the markings remain intact and strong showing Russian language Lowe Berlin barrel address, Imperial acceptance and proof marks. The latch shows an old repair that is somewhat crude and stubby. The smooth walnut grips remain in very good condition having darkened from the years and showing some older added rudimentary texturing and a few light handling marks, otherwise retaining very nice fit overall. The grips are un-numbered and the lanyard has been ground off and the barrel and cylinder are matching the frame. Barrel-to-frame fit shows very slight play and the action seems to function well mechanically with solid timing and lock-up. A very good example of these seldom-seen Russian contract revolvers. (13A10000-91) (ANTIQUE) [Roy Jinks Family Collection] (1200/1800) Est. 1,200 - 1,800 Russian Contract Smith & Wesson No. 3 Second Model Revolver serial #392, 44 S&W Russian, 7" ribbed round barrel with a mostly bright very good plus bore showing some small areas of light oxidation and otherwise strong rifling throughout. The metal surfaces of this early second model revolver are a relatively even mix of arsenal refurbished blue and dark gray patina showing scattered old light pitting and some minor dings. The hammer has toned to pewter gummetal patina and the screw heads show light slot wear. The barrel rib retains strong Smith & Wesson address in Russian language along with a slightly faded Imperial acceptance stamp which shows a smaller eagle stamp above it. The smooth walnut grips remain in good condition having dar
	Repeating Pistols" advertisement embossed in gold inside the lid. The included factory letter verifies the configuration and shows shipment in			un-numbered and the remaining numbered parts are matching. Barrel-to-frame fit is very good and the action seems to function well
	April 1981 to Outdoor Sports Headquarters in a three gun shipment. The papers and yellow hangtag are included. An as-new investment-grade D-class factory engraved Single Action Army. 	(3000/5000)	5	538	Smith & Wesson No. 3 First Model Russian Revolver
535	Est. 3,000 - 5,000 Interesting Smith & Wesson No. 3 Second Model American Rimfire Revolver with Frontier Modification to Centerfire serial #32541, 44 CF, 6" ribbed round barrel neatly shortened during the period of use with a partially bright good bore showing scattered pitting and strong rifling. This is a very interesting 44 Henry rimfire revolver that has been converted during the period of use to centerfire by inserting a small firing pin through the recoil shield and hammering in and peening a bushing into the face to retain it. The nose of the rimfire hammer has been ground down flush with the frame. The metal surfaces retain about 65-70% original nickel finish, with the cylinder and gripstraps flaked to mottled gray gunmetal patina, and showing moderate holster wear with overall scattered dings and some remnants of fine old pitting. Many of the screws are older replacements, the left side hinge screws being fire-blued and the single line address and patent dates remain mostly intact and quite crisp, "SMITH & WESSON" has been lost due to the re-mounting of the front sight. The base of the frame also shows a very neatly engraved script "H" followed by a couple of other tiny characters that are difficult to discern. The revolver wears a set of attractive smooth antique ivory grips that show extensive age crackling throughout, a couple small chips along the bases and a lovely patina. The grips are un-numbered and just a little shy of the frame due to slight shrinkage. Barrel-to-frame fit exhibits a little minor play and the action will require some mechanical attention as half cock is functional but the hammer does not hold at full cock. The bottom of the frame shows a lanyard filler screw and some of the assembly numbers are difficult to discern but they all appear to be matching. A solid old No. 3 with a ton of character. (13C10000-72) (ANTIQUE) [Roy Jinks Family Collection] (1500/2000) Est. 1,500 - 2,000	5	;39	serial #13473, 44 S&W Russian, 4 1/2" ribbed round barrel, shortened during the period of use, with a partially bright good bore showing scattered oxidation and light pitting with otherwise strong rifling throughout. The metal surfaces of this revolver have mostly toned to a medium gray-brown patina showing some scattered fine pinprick pitting, light dings and some streaks of original bright blue in the protected areas. Some areas at the muzzle show light pitting or erosion reminiscent of contact with blood protein long ago. The hammer and triggerguard show good remnants of smoky case-hardening and what remains of the barrel patent dates and "RUSSIAN MODEL" are strong and legible. The smooth walnut grips remain in very good plus condition showing some edge wear and light handling marks retaining very nice fit overall. The right panel is stamp-numbered matching by serial number. Barrel-to-frame fit is solid, the hammer nose appears to have been slightly modified during the period of use and the action generally seems to function well mechanically with solid timing and lock-up, the bolt disengaging sometimes. An honest old first model Russian with a lot of character. (13A10000-80) {ANTIQUE} [Roy Jinks Family Collection] (1200/1800) Est. 1,200 - 1,800 Early Moore's Patent Firearms Co. No. 1 Deringer 41 RF, 2 1/2" barrel with a fair bore showing old pitting and oxidation with some good rifting. The barrel of this early Moore-marked pistol has mostly toned to a pleasant gray-brown patina showing some light handling marks and some generous original bright blue finish in the protected area around the checkered-head retainer screw. The barrel flat retains strong markings with early variation "D. MOORE PATENTED FEB.19.1861". The brass frame retains about 80% original silver finish with moderate thinning to ocher brass along the left side, some scattered light dings and handling marks with the silver taking on a lovely tarnish overall. Somewhat unusually for a Moore, the frame is only lightly embellished with a few small
				hammer and deeply checkered oval along the backstrap and butt. Barrel-to-frame fit is solid and the action seems to function well mechanically. There are no evident serial numbers on the exterior, disassembly shows a small "8" on the hammer and a few lightly struck
				numbers on the sideplate. A handsome and very early Moore marked deringer. (13B10160-25) {ANTIQUE} (1200/1800) Est. 1,200 - 1,800

Lot Title/Description

558 Interesting Argentine Model 1927 Three-Caliber Set, Facsimile of U.S. Government Match Armorer Set Made for General George Simler serial #33041, 45 ACP, 38 Super, 22 LR. This is an interesting three slide, three caliber set, utilizing an Argentine Model 1927 frame, and is accompanied by a 1973 dated letter from a James Wolmers, Col. USAF, Chief Gunsmith Div/MMS. According to Department of Air Force records, on July 7, 1968 General George Simler authorized them to make the following modifications to his "Colt Pistol, M1911A1, Caliber 45, serial #33041": "rebuild to match grade specifications, fit Colt 38 Super and Colt Ace 22 long rifle slide assemblies to component number 33041, with minimum tolerance to ensure proper functioning and accuracy". These were then to be fitted to a special case provided by Gen. Simler. It is interesting that all three slides are 1959-1969-era Colt slides, whether or not the general somehow had an Argentine Model 1927 frame for his Colt slide may never be known, although that is the current configuration of the arm. The pistol and all three slides retain 98 to 99% plus original and professionally refinished polished and satin blue finishes (the frame being polished and refinished to match the slides, the Ace slide neatly professionally refinished as well). The smooth grips with gold Rampant Colt medallions appear to be mesquite however may well be rosewood, they are as-new and show some nice grain figure. The barrel is indeed a Colt National Match part number 779031, with National Match bushing number 7267718, the barrel with a bright excellent bore, the bushing numbered "6236" on its right side interior. The slide has a simple flat blade front sight, very neatly silver soldered in place and a tall profile fixed rear sight. The 38 Super slide requires some effort to run onto the frame, its fit guite tight and the barrel has not been fully fitted, not coming up and forward far enough for the slide and frame to fit flush at rear, and the slide fit does not allow for proper function of the hammer, it binding in the hammer cut on the right side of frame. The Colt Ace slide does indeed fit the gun once the ejector is removed, however barrel and bushing are not match-fitted, and it also does not fit flush at rear slide-to-frame, the rear face of the slide numbered "4550, the barrel numbered "4630". All of these ride very nice presentation case with burgundy baize interior and combination lock on face (341). The lid of the case has the Department of the Air Force seal, the interior with a Department of Air Force coat of arms patch within the lid. On the interior we find a match bushing wrench, takedown tool from Stanley, satin finished Colt Super 38 Auto magazine and two-tone Ace magazine and there are boxes each of 45 ACP 1968 Match, Colt Super Cal. 38 Ball ammunition, and Olin Corporation standard velocity long rifle ammunition, there may be one or two cartridges missing, 22 LR appears full. There is an extensive dossier included, including the aforementioned letters from the Department of Air Force Chief gunsmith, a letter from a Texas attorney relating the presentation of such a set by Gen. Simler to Gen. Curtis LeMay in August 1968, on that such set Gen. Simler's name was misspelled on the nameplate on the case lid, this was to be corrected, and LeMay left the set at Randolph Air Force Base in Gen. Simler's care; this set does not have a presentation plaque on the lid. Oddly searches for the general find his name spelled with a single "M" while the Air Force correspondence uses dual letter "M" in the center of his name. The good general served two combat tours in European during World War II. On his second combat tour in July 1944, he was shot down but evaded capture and made his way back to the Allied lines in September 1944. Sadly General Simler met with a tradic early death at age 51, when along with his aide Captain Gil L. Gillespie, he was killed in the crash of a T-38 Talon iet trainer on takeoff at Randolph Air Force Base. Texas, in September of 1972. The dossier includes a detailed investigation and description of said crash. A very nice and very complete set that are likely identical to the pistol prepared for General Simler, although it is unlikely he would've owned an Argentine Model 1927 and had Air Force gunsmith's work on it. Were the 38 Super slide properly fitted it would be a very versatile and enjoyable set. (310090-63) {MODERN} (3000/5000) Est. 3,000 - 5,000 559 Colt Civilian Model 1911 Government Model Semi-Automatic Pistol serial #C 81079, 45 ACP, 5" barrel with a very good bore which shows sharp rifling but with some scattered frosting and light pitting, more prominent nearer the throat. The metal surfaces on this 1917-made commercial pistol retain perhaps 90-92% original blue, the loss toned to a smooth pewter patina, primarily on the frontstrap and high edges of slide, as well as the normal contact and wear points. The diamond checkered walnut grips rate very good with mostly sharp points with a few light compressions or diamonds worn smooth. Included is a single two-tone magazine which rates very good showing cleaned remnants of oxidation which have left behind some pitting, more moderate on the right side of the body, but the magazine appears fully functional in every respect. The gun seems to function properly mechanically with a light reassembly scratch on the left frame but good markings overall and would continue to be very enjoyable for days at the range. (3B10090-120) {C&R} (2000/3000) Est. 2,000 - 3,000

561	serial #551184, 45 ACP, 5" Springfield Armory barrel with a bright very fine bore which shows strong rifling but with light frosting in the grooves, more prominent nearer the throat. An interesting 1911, the gun features a U.S. Navy-marked slide, retaining the early rounded rear sight and thin blade front, and a frame which has numerous Marine Corps-shipped pistols in the serial numbers surrounding it, and also falls within a serial number batch of 500 which went to the U.S. Navy, Brooklyn Navy Yard. Overall the gun retains perhaps 90% later blued finish, the slide showing muzzle wear and some light flaking to plum, the Rampant Colt at rear slightly light but still present. The frame shows some light impact marks here and there as well as some tool marks from the polishing, the straps now toning to gray. The diamond checkered walnut grips rate very good, the right grip worn fairly smooth, the left a bit smooth but with more prominent diamonds. Included with the gun is a very nice two-tone lanyard loop magazine. 1918 produced, the Eagle head inspectors mark on left of frame remains, and the arm remains a likely very usable, very respectable example piece for the Colt collector wishing a "representative" Navy Model without breaking the pocketbook. (3A10090-114) (C&R] (2000/2500) Est. 2,000 - 2500
561	Rare Unmarked American Brass Barrel Smoothbore Flintlock Sporting "Rifle"
	.52 cal, 36" part round brass barrel with lightly oxidized bore and turned medials at point of transition, the rear hexadecagonal. There are simple sporting sights and the "R. Ashmore Warranted" stepped lock shows light engraving with bridled roller frizzen and is an overall gray patina. All of the furniture is brass including the pineapple finial triggerguard and simple buttplate. The full length American walnut stock rates very fine showing an old light refinishing, retaining minor dings and handling marks beneath. There is a domed silver monogram plate atop wrist which is lightly engraved, the lock functions mechanically and an antique ivory tip ramod is included which may be original equipment. A very handsome brass-barreled New England smoothbore fowler-rifle. (3B9670-315) (ANTIQUE) [David & Lore Squier Collection] (2000/3000) Est. 2,000 - 3,000
562	Smith Cogswell New York State 1812 Contract Martial Rifle .58 cal, 33" part octagon part round barrel with an oxidized bore. This is
563	1.36 car, 3.5 part octagon part round barlet with an oxidized obte. This is a flintlock rifle patterned after the Harpers Ferry Model 1803, made by Smith Cogswell of Troy New York, later converted to percussion. All of the iron surfaces are an overall soft brown patina with a bit of pewter on the lockplate. There are simple open sights and a turned medial at the point of transition, the top flat marked "SNY" while the left diagonal flat is marked "AWP", the lock marked "S Cogswell/Troy". There is a brass underrib showing evidence of once having a sling swivel, brass band at the nose of the stock as we see on 1803 rifles, with simple 1803-style brass triggerguard and buttplate with a down-folding patchbox with top catch. The American walnut buttstock rates very good to perhaps near fine showing an old light cleaning with a bit of softening of the edges. An antique ramrod is included, the breech area of the barrel shows some tool marks and the lock seems to function properly mechanically. (3B9670-510) (ANTIQUE} [David & Lore Squier Collection] (1200/1800) Est. 1,200 - 1,800
505	serial #571138, 45 ACP, 5" barrel with a very fine bore which is mostly
	bright with sharp rifling showing just light frosting and light pinprick pitting in the grooves. The metal surfaces on this 1918-manufactured pistol retain 98% plus of a good quality later satin finish blue, with the markings remaining crisp including the left side Eagle head, showing remnants of some very light pinprick pitting in a few spots beneath the finish. The checkered double diamond walnut grips rate very fine to excellent and may be older replacements. Included with the gun is a very nice "A" marked two-tone magazine with one spot of pitting on the right side of its body. The arm seems to function well mechanically. An attractive "Great War" gun that could certainly be taken to the range and enjoyed, and is a fine "example" piece for the martial or Colt collector. (3A10090-88) {C&R} (1200/1800) Est. 1,200 - 1,800

The barrel, cylinder, triggerguard and backstrap retain 99% original deep blue finish, and the screws and pins show vibrant fire blue. The revolver is nicely engraved with Standard Manufacturing's C Coverage engraving pattern, decorating approximately 75% of the metal surfaces. The checkered rosewood grips are in near excellent condition showing only a small impact mark in the checkering on the right panel. The revolver has the standard fixed sights, features a hammer-mounted cone-shaped fixed firing pin with no transfer bar safety, and appears to lock up tightly
583	set triggers and the action appears to be mechanically functional. The rifle was built for target shooting and thus no safety was incorporated with this build. Included is a brass bodied bullet seater that was fashioned specifically for this rifle in this caliber. These very sought-after actions were made in Silverthorne, Colorado by Roger Johnson for only a short period of time and are very seldom encountered. (4A10174-25) {MODERN} (2000/3000) Est. 2,000 - 3,000 Winchester Model 71 Deluxe Lever Action Rifle serial #26407, 348 W.C.F., 24" barrel with an excellent bore. The metal surfaces on this 1948-vintage rifle retain about 80% original blue with most of the loss being around the frame, lever, the checkered steel buttplate and the other bearing surfaces which are fading to mottled gray. The remaining surfaces have some light handling marks and overall there are specks of light surface rotadion and oxidation staining throughout. The checkered walnut stocks rate very good and have added varnish and some light to minor dings and other handling marks. The checkering remains mostly sharp with some lightly flattened points	587	 with no transfer bar safety, and appears lock up tightly and time correctly; the factory hangtag remains attached to the triggerguard. Included with the revolver is the factory box with cardboard sleeve, end labeled to the gun but not numbered, signed, serialized, and dated "Certificate of Manufacturing Excellence", decals, manual, polishing cream, and fabric sleeve. This revolver is dealer stock, new-in-box, and factory fired only. (14A10295-27) {MODERN} (1500/2000) Est. 1,500 - 2,000 Factory Engraved Standard Manufacturing Single Action Revolver serial #US960, 45 Colt, 5 1/2" barrel with a bright excellent bore. The frame, hammer, and loading gate show wonderful bone and charcoal casehardened color with a very light handling mark near base pin. The barrel, cylinder, triggerguard and backstrap retain 99% original deep blue finish, and the screws and pins show vibrant fire blue. The revolver is nicely engraved with Standard Manufacturing's C Coverage engraving pattern, decorating approximately 75% of the metal surfaces. The checkered rosewood grips are in near excellent condition showing only a small impact mark in the checkering on the right panel. Lot Title/Description

596	Sharps New Model 1859 Civil War Percussion Carbine	599	Sharps New Model 1863 Percussion Military Rifle
	serial #61093, .52 cal., 22" six-groove barrel with a mostly bright good		serial #C36956, .52 cal., 30" six-groove barrel with a bright fine bore
	bore showing light pitting throughout the otherwise strong rifling. The		showing a few small areas of light pitting in the strong rifling. The metal
	metal surfaces of this iron-mounted carbine are toning to a		surfaces of this nice rifle were carefully and very nicely restored. The
	lightly-oxidized brown patina, the lockplate is more gray-brown, showing		barrel and action retain about 97-98% professionally-added blue which
	scattered areas of light pitting throughout, more moderate on the		is slightly thinning to a blue-gray patina along the barrel under direct
	buttplate. The barrel address is softened and mostly intact and legible		bright light with a small area of light pitting on the underside of the barrel
	while "NEW MODEL 1859" behind the rear sight and the lockplate and		and some scattered softened pinprick pitting beneath the finish; the
	frame markings are clear and the barrel is serialized to the frame. The		action shows strong original smoky case-hardened colors beneath the
	American black walnut buttstock and forend rate about very good with a		blue. The barrel bands show some softened light pitting with the upper
	crack in the wood line of the left side nose of the forend which is		two toning to a silvery patina while the patchbox and buttplate retain all
	threatening to chip, an abrasion and a few dings on the right side of the		of what appears to be their original case-hardened finish with some
	comb and some overall handling marks typical of a Civil War shoulder		particularly vivid colors on the patchbox. All metal markings including the
	arm. There are no visible cartouches and the toeline is not relieved for a		numerous inspection marks on the small parts are crisp, the barrel is
	sling swivel. The original sights and sling bar and ring are intact, the		serialized to another rifle. The gorgeous American black walnut
	primer pushing arm is missing from the primer mechanism and the		buttstock and forend rate excellent plus retaining all of what appears to
	action is strong and crisp. A salty example of these iconic carbines that		be its original oil finish; the edges are sharp with excellent metal to wood
	appears to have "been there done that". (23A10206-43) {ANTIQUE}		fit with just a few scattered fine and unobtrusive handling marks. There
	(1200/1800)		are three crisp boxed inspection cartouches on the left side of the
	Est. 1,200 - 1,800		buttstock and a strong "AWM" inspection mark on the comb by the
597	Spencer Civil War Repeating Carbine		buttplate, the original sights are intact, all the parts of the pellet priming
	serial #19240, 56 Spencer, 22" six-groove barrel with a mostly bright		mechanism appear to be present and the action is strong and crisp. A
	very good bore with scattered patches of light pitting in the otherwise		beautifully restored New Model 1863 Military rifle that will make an
	strong rifling. The metal surfaces have aged to a lightly-oxidized		excellent addition to your Civil War collection. (23C10296-9) {ANTIQUE}
	gray-brown patina with the buttplate a bit more moderate along with a		(1800/2200)
	small area of light pitting beneath the muzzle and the frame shows		Est. 1,800 - 2,200
	evidence of an old light cleaning. The patent date on the top of the	600	Winchester Special Order Model 1892 Lever Action Rifle
		000	
	frame is softened but legible while the Spencer Repeating Rifle Co.		serial #342664, 38 WCF, 26" part octagon part round barrel with a bright
	address remains strong. The black walnut stock and forend rate about		excellent bore. The barrel and magazine tube retain perhaps 90%
	very good plus with a short hairline crack behind the lower tang, some		original dark gray-blue, toning to a plum brown on the barrel ahead of
	darker discoloration on the underside of the wrist and some scattered		the magazine tube to the rear of the sight, the nosecap toned to plum
	handling marks and signs of use. There is a softened yet clear boxed		and pewter. The receiver is primarily a pewtery patina with flaking to
	"DAP" inspection cartouche on the left side of the wrist behind the intact		plum and some generous blue in the protected areas; the loading gate
	sling bar and ring and his smaller inspection mark is on the comb ahead		with some very nice pale fire blue. The lever shows some strong colors
	of the buttplate. The cartridge guide spring appears to be missing, the		at its root but is primarily faded to a silvery and plum case-hardened
	barrel is matching the frame, the original sights and magazine tube are		patina, as has the hammer. The smooth walnut buttstock rates very
	intact and the action is strong and crisp. While not specifically listed, this		good with flaking old crazing varnish and the expected light dings and
	carbine falls within the serial number range provided by Springfield		handling marks that come from the years and field use, a nice red-russet
	Research Service of guns issued to the 12th Illinois Volunteer Cavalry in		patina in the areas which retain varnish. The forend shows more wear
	March of 1864. (23B10251-2) {ANTIQUE} (1200/1800)		nearly devoid of varnish and there is a 7" older drying crack along the
	Est. 1,200 - 1,800		left lower side of the buttstock but it is unobtrusive and tight. There is a
598	Spencer Civil War Repeating Carbine		simple Lyman ivory bead front sight, flat-top sporting rear and Lyman
	serial #28282, 56 Spencer, 22" six-groove barrel with a mostly bright		tang sight in place. The half octagon half round barrel and half length
	very good plus bore with some scattered spots of light oxidation in the		magazine are nice special order features and the arm will no doubt
	strong rifling. The metal surfaces are toning to a blend of plum-brown		shoot very well with its nice bore. (3A10258-5) {C&R} (1500/2000)
	and gray patina with overall small spots of old light oxidation, scattered		Est. 1,500 - 2,000
	softened pinprick pitting and scattered light handling marks. The	1000	Smith & Wesson Model 53-2 Double Action Revolver
	Spencer Repeating Rifle Co. on the top of the frame is soft but remains	1000	serial #4K49106, 22 Remington Jet / 22 LR, 4" pinned barrel with an
	mostly legible and the barrel is serialized to the frame. The American		excellent bore. This "Jet" remains in exquisite condition retaining about
	black walnut buttstock and forend rate perhaps good with the buttstock		99% original blue finish. The service trigger and special service hammer
	displaying a little vertical play along with a 2" crack behind the intact		with selector retain full-bodied case-hardened colors. The checkered
	sling bar and ring, an old smoothed-over chip in the right wood line, a		walnut factory target grips with silver S&W medallions feature an
	few more lengthy cracks in the forend and various dents, dings and		extractor cut on the left panel and rate excellent. This gun features a
	handling marks overall from military service. There is the remnant of an		selector on the hammer nose for centerfire or rimfire ammunition,
	inspection cartouche on the left side of the wrist, a couple of the screws		Baughman ramp front sight, black blade micro adjustable rear sight. The
	are old replacements and some show moderate slot damage, the sling		gun functions mechanically, and correctly times and locks up. It includes
	swivel is missing on the toeline, the magazine tube is intact, the brass		a factory box that is correctly end labeled and numbered to the gun,
	front sight blade is a period replacement, the slider retaining screw is		although the label has faded. Also included are six steel 22 LR factory
	missing from the original rear sight and the action appears to function		inserts, unopened cleaning kit, manual and paperwork. If you need a
	well mechanically. A salty example of these important carbines for the		great Model 53 in a desirable barrel length to start up or round out your

Lot Title/Description

1030 Colt Frontier Six Shooter Single Action Revolver with Period Holster Rig and C. Gove & Co. Buckle serial #66562, 44-40, 7 1/2" barrel with an oxidized bore showing evident rifling. The metal surfaces of this 1881-made revolver have mostly toned to a mild gunmetal patina with some areas taking on a darker gray-brown and showing some scattered remnants of old mild pitting and small dings. Some areas of pitting show evidence of an old light dressing many years ago and there are a few flakes of original bright blue in the very protected edges of the barrel. The single line Hartford address remains mostly intact and legible, the rear underside barrel shows proper small "44" caliber designation and the etched panel along the left has faded from the years with many areas still faintly legible when viewed in the right light. The frame patent markings are intact and strong along with "44 CF" on the left side triggerguard, and a couple of the small screws are replacements. The hammer shows a small stress crack forming on either side behind the firing pin and its inside protected surface still retains some vibrant case-hardened colors. The smooth walnut grip remains in very fine condition showing some remnants of a little older applied varnish, an old thin sliver missing at the left heel and the expected scattered light dings. There is no visible number on the interior inlet of the grip but its fit remains very nice. The remaining serialized parts are matching including the cylinder and the action seems to function well mechanically with crisp hammer notches and solid timing and lock-up. The included period Mexican-style holster rig has about as much character as the revolver and remains in verv good to very good plus condition showing light flaking along the edges and the expected mild crackling from the years, the belt itself with a bit more moderate crackling and some small tears. The holster shows nice floral tooling and is marked along the edge "C. GOVE & SONS / DENVER". The heavy cast brass buckle appears to be original in every respect featuring two stars and "C. GOVE & CO / (Federal Eagle) / DENVER. COL", the brass having taken on a nice mellow patina showing some mild verdigris. The belt is also affixed with a small patriotic brass eagle escutcheon that shows commensurate wear. The sporting goods store of Carlos Gove operated at 340 Blake St. in Denver starting in the early 1870s and was bought out by his employee George Schoyen in 1884. Also included with this revolver is a more modern custom-made wooden case in very fine condition and a small wooden plaque with mounted antique 45 Colt cartridge and small narrative regarding the revolver and history of the C. Gove Co. Finally included is a Colt factory letter indicating this revolver shipped in a 10-gun shipment on March 3, 1881 to J. P. Moore & Sons of New York City, a large wholesaler who would have sold it on, possibly to a smaller firm in Colorado. The letter was requested in 1988 by a Colorado antique dealer so presumably the revolver does indeed have history there. In any event this is a wonderful ensemble with tons of character that exudes a romantic Western vibe. (13C10107-1) {ANTIQUE} (4000/6000) Est. 4,000 - 6,000 1031 Very Rare Smith & Wesson Model 19-P Combat Magnum Revolver serial #AWF0930, 357 Magnum, 4" barrel with an excellent bore. In 1987 Smith & Wesson built a fixed sighted version of the Model 19 for export to Peru. Only a small quantity were shipped to Peru, the remainder sent to Smith & Wesson distributor WISCHO in Germany and proofed in Belgium. Exact number of guns produced and shipped are not known. This gun is one of the West German exports and it appears to be as new in the box. The metal surfaces retain about 99% original blue finish with minimal freckling on the backstrap. The smooth combat trigger and service hammer retain strong case-hardened colors. The checkered factory goncalo alves target grips remain in excellent condition and feature silver S&W medallions and a speed loader cut on the left panel. The main feature of this gun is the fixed sights, the front is Baughman ramp with a factory cut groove down the center filled with yellow paint to draw the eye. This gun times and locks up as good as the day it left the factory. There are Belgian definitive foreign arms proof marks on the bottom of the barrel, cylinder, and bottom of the frame. The barrel also has the WISCHO importer mark. It includes a factory box that is correctly end labeled and numbered to the gun, unopened factory cleaning kit, and a manual. This is one of those rare opportunities to buy an extremely desirable and seldom-seen gun in superb condition. (8B10090-1) {MODERN} (2500/4000) Est. 2,500 - 4,000

1032	Rare Smith & Wesson Model 66 Combat Magnum Revolver serial #9K71945, 357 Magnum, 6 1/8" pinned heavy barrel with an excellent bore. Six inch barrels on this model measure 5 7/8" in length, however in the 1970s, when this gun was manufactured (1976), there was a small quantity of Model 66s released with a rare 6 1/8" long barrel (Standard Catalogue of Smith & Wesson by Supica and Nahas). This beautiful example appears to have seen little if any use and the stainless steel surfaces rate excellent. The service trigger and hammer retain full hard chrome finish. The checkered factory goncalo alves target grips have silver S&W medallions, extractor cut on the left panel and remain in wonderful condition. This revolver features a Patridge front sight, black blade micro adjustable rear sight, recessed cylinder and functions well mechanically. It includes the original factory box that is correctly end labeled and numbered to the gun and paperwork. It is curious the factory simply list the barrel as a six inch on the end tag. This would make a unique addition to a K-frame collection. (8A10090-11) (MODERN) (1200/1800)
1033	Est. 1,200 - 1,800
	Rare Beretta M-9 Semi-Auto Pistol serial #BER049894Z, 9mm, 4 7/8" barrel with an excellent bore. This fine gun is uniquely different from the standard issue M-9 as it bears all the parts of the military pistol with a commercial serial number. They were made at the request of the U.S. Army Marksmanship Unit. U.S. Army Reserve units are required to compete with service firearms, yet they had to practice with civilian guns as they could not sign out military pistols for this purpose. The Army authorized the manufacture of 217 M-9 pistols that were sold through commercial channels to the unit members. The Army lawyers later decided that it was not a good idea to allow this as the military controls the "M-9" designation and they tried to recall the guns, however they could not as they were civilian purchases and not a product of a military contract. This is all neatly explained in a letter from Beretta military marketing director Russell Logan and expanded on by the owner of the gun after a conversation with the director. Mr. Logan could not give the serial numbers or range of these gun but confirmed this gun is one of them. The metal surfaces of this rare and interesting gun retain about 98% blue and Bruniton finishes showing scattered high edge wear, handling marks, and the barrel toning to plum. The checkered factory synthetic grips with Beretta logo rate very good to excellent showing light handling wear. This gun features von Stavenhagen sights, has "PM" (proof and magnetic particle inspection) on the barrel and right side of the slide. The left side of the slide is marked "U.S. 9MM M9 – P. BERETTA – 65490 [PB (block letters) in an oval]", and the right side shows military assembly code. The right side of the forward frame is marked "U.S. 9m M9-P. BERETTA-65490". It includes a single factory magazine with government assembly codes. It also includes an unmarked factory hardcase, a letter from Beretta Military Marketing Director and memorandum from the current owner expanding on the background of this unique pist
1034	Est. 2,000 - 4,000 Rare Beretta M-9 Semi-Auto Pistol serial #BER012145Z, 9mm, 4 7/8" barrel with an excellent bore. This fine gun is uniquely different from the standard issue M-9 as it bears all the parts of the military pistol with a commercial serial number. They were made at the request of the U.S. Army Marksmanship Unit as Army Reserve units are required to compete with service firearms, yet they had to practice with civilian firearms as they could not sign out military pistols for this purpose. The Army authorized the manufacture of 217 M-9 pistols that were sold through commercial channels to the unit members. The Army lawyers later decided that it was not a good idea to allow this as the military controls the "M-9" designation and they cancelled authorization. The metal surfaces of this rare and interesting gun retain about 99% blue and Bruniton finishes showing limited high edge wear, and handling marks. The checkered factory synthetic grips with Bretta logo rate very good to excellent showing light handling wear. This gun features von Stavenhagen sights, has "PM" (proof and magnetic particle inspection) on the right side of the slide, the left side of the slide is marked "U.S. 9MM M9 – P. BERETTA – 65490 (PB (block letters) in an oval]", and the right side shows military assembly code. The right side of the forward frame is marked "U.S. 9mm M9-P. BERETTA [PB (block letters) in an oval]". There are no markings on the barrel or locking block on this gun. It includes a single factory magazine with government assembly codes. It also includes an unmarked factory hardcase, a second civilian Beretta marked magazine and a cleaning kit. A very rare opportunity to own an official variant of the U.S. M-9 pistol. A second pistol with the same lineage precedes this gun. (8B10090-42) (MODERN} (2000/4000)

The stock is a little shy of the steel schuetzen buttplate, the checkering remains mostly intact and the horn nosecap shows a small synthetic repair. There is a left-side cheekpiece with simple carved swirl at the rear. Hardware consists of dual ramrod thimbles with tailpipe,		surfaces retain about 95-97% original blue that is toning and flaking to brown and has light handling marks, tool marks, and a few areas of light pitting along with some areas of light wear along the high edges and bearing surfaces. The walnut stocks rate very good to near excellent and have added finish over light dings and other handling marks. The forearm features a schnabel tip with ebony inlay, the buttstock has been fitted with a solid black rubber KickEez recoil pad and the heel has been neatly filled where the original buttplate tang would have been. The buttstock also has a single groove notched below the lever, likely to record a successful hunt. The rifle is sighted with a factory 21F front sight blade and has the Lyman No.6 folding leaf rear sight. Mounted to the receiver is a Lyman No.21 adjustable "climbing Lyman" receiver sight. This is a classic 1922-vintage rifle that could still have some collector interest but would make a terrific sporting rifle today for many large game species. (4A10286-9) (MODERN) (3000/4000)
1041	Est. 4,000 - 6,000 Swiss Fullstock Percussion Schuetzen Rifle by Panchaud .42 cal, 33 1/4" octagon barrel with recessed muzzle and a bright very fine to near excellent bore showing a little bit of mild oxidation and crisp rifling throughout. The barrel of this attractive rifle is a fine plum-brown patina showing some scattered small areas of old pitting and a few minor dings with generous damascus patterns throughout. The patent breech features a nice swirling bolster and some light foliate embellishments with maker's name "PANCHAUD / LAUSANNE". The lockplate and hammer are a dark smoky gray, the center of the lockplate with prominent maker marking and embellished dragon heads front and rear, the hammer with a dolphin head. There is a full strap from the upper tang across the comb line and full-length toe plate and triggerguard extension shows two vacant holes for mounting a palm rest. The walnut stock remains in very good condition as lightly cleaned and refinished showing a number of neatly repaired lengthy cracks along the edges of the forend, scattered light dings and some drying cracks along the butt. The stock is a little shy of the steel schuetzen buttplate, the checkering remains mostly intact and the horn nosecap shows a small synthetic repair. There is a left-side cheekpiece with simple carved swirl		surfaces retain about 95-97% original blue that is toning and flaking to brown and has light handling marks, tool marks, and a few areas of light pitting along with some areas of light wear along the high edges and bearing surfaces. ramrod is present and the action features double set triggers and single-acting lock, the front firing trigger being a very thin post and it seems to function normally. Cesar Panchaud and later his son Louis were active in Lausanne from about 1832-1856. (13B10053-20)

Title/Description

1044	British Underlever Pinfire Double Rifle by Gibbs
	Description Update 11/3/21: Information added on Joseph Brazier
	Markings, see below.serial #5787, 45 pinfire, 28" barrels bright bright
	very fine bores showing some scattered mild oxidation and some fine
	pitting mostly nearer the muzzles with otherwise crisp rifling. The barrels of this rifle have mostly toned to a deep plum-brown patina showing
	scattered light handling marks and overall light to perhaps moderate old
	pitting that is now partially smoothed-over from the years. The address
	along the rib is no longer legible with only a few letters faintly visible.
	The back action lockplates and frame are mostly gray-brown with more
	minor scattered pitting and retain strong fine quality English scrollwork
	and legible maker markings along the lockplates. The water table
	actually retains some vibrant case-hardened colors and shows period
	London proof marks and marked "Joseph Brazier/Ashes". Brazier was a specialist lock maker who supplied some of the finest quality locks,
	said by some to be simply the best lockmaker in Britain, likely supplying
	every quality gunmaker in the country at one time or another from the
	early 1800s. It is supposed that the Brazier locks marked "IB" signified
	the lowest quality, "I" or "J BRAZIER" signified next best quality, and
	those marked "J BRAZIER" or "JOS. BRAZIER ASHES" or "JOSEPH
	BRAZIER ASHES" signified best quality; these locks are "Joseph
	Brazier/Ashes" -marked on their interiors, internally remaining in very lovely condition. The graceful high spur hammers feature nice dolphin
	heads. The checkered straight grip walnut buttstock and forend remain
	in very good plus condition showing some darkening around the
	hardware and the expected scattered light dings and handling marks.
	The forend shows a bit more wear, its tip insert lost to the years and the
	edge of the wedge showing a small chip. Stock fit otherwise remains
	excellent with mostly intact checkering and some attractive grain figure
	along the sides of the butt. The grooved horn buttplate shows a few tiny
	flakes and a couple insect bites otherwise rating very fine. The rifle is sighted with standing 100-yard v-notch rear sight and 200 and 300-yard
	flip-up leaves with platinum lines and the front sight is a plain bead. The
	left barrel pin hole has, for some reason, been enlarged long ago and
	the locks are equipped with sliding safeties and are otherwise crisp and
	seem to function well mechanically. Barrel lock-up remains solid
	on-face. This old Gibbs shows its exposure to the elements but actually
	appears to have seen little actual use. (13B10053-5) {ANTIQUE}
	(1200/1800)
1045	Est. 1,200 - 1,800 British Thumb Snap Bar-In-Wood Double Hammergun by Purdey
	serial #9737, 12 bore (2 3/4"), 30" sleeved barrels choked improved
	modified with bright excellent bores. This is a fine old Purdey that has
	seen long faithful service and has been re-proofed for nitro loads, 70mm
	shells at 850 bar. The barrels retain about 92% fine quality British
	blacking with areas thinning to mild gray patina under bright light along
	with a few errant freckles and the breeches and barrel rib showing hints
	of the original swirling damascus. The Purdey address along the rib was neatly refreshed post-sleeving. The lockplates, frame and triggerguard
	are a pleasant medium gray patina with a slight gray-brown undertone
	and a few tiny pinprick pits. The lockplates retain some hints of good
	case-hardened colors in the protected areas around the hammers and
	the metal surfaces are embellished in near full coverage with fine quality
	tight English filigree and floral bouquets, and the hammers with fine
	dolphin heads. The rear barrel rib and water table show large engraved
	"2". The engraving along the thumb snap and triggerguard were expertly
	refreshed by engraver Ron Collings. The checkered straight grip walnut buttstock and splinter forend with Anson push-rod release has been very
	nicely refinished and refreshed remaining in near excellent condition
	showing a few sparsely scattered tiny dings and minor handling marks.
	Stocks feature handsome flat point diamond checkering with mullered
	borders, dropper points and wonderful grain figure throughout the butt.
	The butt is checkered as well and there is an un-engraved brass
	monogram plate along the toe line. Lock-up is by dual under-bites and
	the shotgun features early pinfire-style loaded chamber indicators,
	extractor and rebounding hammers. Lock-up is solid on-face and the locks are crisp and seem to function well mechanically. Length-of-pull is
	13 3/4" with drops of about 1 3/4" and 2" and weight is a hair over 6 1/2
	pounds. This shotgun is featured in an article "A Duo In The Purdey
	Tradition" by Spence Dupree, pages 121-131 of The Double Gun &
	Single Shot Journal Volume 21, Issue 2 of Summer 2010, a copy of
	which is included. The gun is described and photographed in full detail
	and the article also provides information on the original Purdey records.
	It was originally ordered around 1876 by Sir Henry Tufton as part of a
	triple gun set. Sir Henry (1844-1926) was 1st Baron Hothfield of County
	Kent, British peer, Liberal politician and a horse breeder. This quality

1046	Winchester Model 1895 Lever Action Carbine serial #398059, .30-06, 22" nickel steel barrel with a near excellent, lightly frosted bore. The barrel retains about 85% original blue that is toning to brown and has some light wear along the sides toward the muzzle and some light specks of oxidation and handling marks throughout. The remaining metal surfaces retain about 50-60% original blue the balance being a mottled gray with some areas of oxidation staining. Some of the screws have minor slot damage and the steel carbine buttplate has some minor oxidation and has moderate pitting at the heel. The buttplate features sliding trapdoor and contains a pull-through cleaning tool. The walnut stocks rate very good and have a satin oil finish and some small dings and light handling marks. The buttstock has a few light, non-structural drying cracks toward the butt on the left side as well as a small abrasion near the comb. The wood remains slightly proud of the metal, but finish appears to have been added at some point. The carbine is equipped with a correct Lyman brass bead front sight and has the correct 50A factory carbine stepped rear sight. The saddle ring also remains intact and this carbine appears to be otherwise unmolested and functions correctly. A great example from 1916 that has seen some use but is still solid and has some collector potential. (4A10293-10) {C&R} (2500/3500) Est. 2,500 - 3,500
1047	Winchester Model 1873 Lever Action Musket serial #480837B, 44-40, 30" barrel with a mostly bright, near excellent bore that has spots light freckling throughout. The blued metal surfaces of this Third Model 1894-manufactured musket are toning and flaking to a more mottled brown with about 85-90% of the original finish remaining, most of the loss being around the muzzle, high edges, and along the bearing surfaces on the receiver. There are scattered dings and handling marks from the years along with some areas of light surface oxidation and light pitting along with two impact marks on the receiver bridge at the ejection port. The brass lifter block has mellowed to an ochre patina while the lever, hammer, and trapdoor buttplate have toned to a mottled gray patina with some remnants of smoky gray case-hardened colors in the protected areas. The factory markings are all still visible, though some have softened around their edges. The smooth walnut straight grip stock and full length forend rate very good with a period applied added finish and numerous dents, dings, small chips and other signs of use throughout. The musket is equipped with a post front sight and adjustable leaf rear sight, the sling swivels remain intact and the action appears to function well mechanically. A four-piece cleaning rod is included in the butt trap. It is estimated that only 5% of Model 1873s produced were muskets and this very good example is sure to make a great addition to any Winchester collection. (4B10249-1) {ANTIQUE} (2000/3000)
1048	Winchester Model 1873 Lever Action Rifle serial #214220B, 32-20, 24" round barrel with a very good bore that has strong rifling and some light pitting throughout. The barrel, magazine tube, loading gate and top cover on this 1886-made Third Model rifle retain about 95% original blue that is toning and flaking to a more mottled brown and have some edge and handling wear. The receiver, lever and remaining metal surfaces are mostly a rich mottled gray with some traces of original case-hardened colors still visible. The brass lifter has mellowed to a smooth ochre patina, and the factory markings all remain visible and mostly crisp. The smooth walnut stocks have later added finish over light dings, small chips, and other handling marks from years of use. The forearm rates very good plus while the buttstock rates closer to good and has several cracks running through the wrist and an oval shaped repair on the left side. The buttstock is equipped with a crescent steel buttplate. Rifle is sighted with a Beach-style combination front sight and has a sporting rear sight. Mounted to the tang is an early style, thick based graduated sight. The action appears to function correctly and overall this is an about very good example of these classic lever action Winchester rifles. (4A10249-5) {ANTIQUE} (2000/2500) Est. 2,000 - 2,500

moderate smoothing from the years while the hard rubber dog's head buttplate remains in very fine condition. Stock fit remains very nice and length-of-pull is just shy of 14" with drops of 1 7/8" and 2 7/8". The barrels lock up tight with top lever right of center and there is a faint whisker of light near the bottom between barrels and water table but this is very unobtrusive. Shotgun is equipped with extractors, medium brass bead front sight, and non-automatic safety. The safety is very stiff and will require some attention as it is not functional on the front trigger, the action otherwise seems to function mechanically. Smallbore Parkers were made in extremely limited numbers, 772 in this configuration, and this shotgun has seem some honest use but remains a very respectable example. (13D10295-1) {C&R} (8,000/10,000)pitting on the top of the frame and breechblock and with small spots of the same and speckles of light oxidation scattered throughout. The breechblock is a smoky case-hardened patina and is crisply-marked "H. FERRY / US / 1841" and an "AW" inspection mark is on the left side of the hammer. The American black walnut stock rates fine with perhaps a light coat of old added finish which has darkened in a few spots around the wrist along with a couple small nail holes in the left side of the buttstock and some scattered light dings and handing marks from the years. There are no visible cartouches on the stock. The sling swivels and original sights are intact, a correct button-head ramod with threaded end is included, the fishtail breechblock release functions well and the action is strong and crisp. A very nice example of these late

The checkered walnut target grips with gold S&W medallions are unnumbered and rate near excellent with a few compressed points and light handling marks. The extractor is numbered to another gun and the barrel and latch are properly serialized to the frame. The original sights are intact, barrel-to-frame fit is excellent and the action appears to function well mechanically. A nice example of these collectable 8" barreled Second Model pistols. (23A10293-36) {C&R} (1200/1800) Est. 1,200 - 1,800		nosecap also show a few foliate flourishes and the barrel markings remain intact and strong. The rifle wears a set of replacement deluxe quality checkered walnut stocks that remain in very good plus condition showing a small repaired chip on the left edge where the buttstock meets the frame, some overall light handling marks and intact checkering. The stocks show lovely grain figure throughout and an original hard rubber shotgun buttplate is present though not quite perfectly fitted. There are no assembly numbers or other markings on the inside tangs or stock inlet. The magazine locking tab does not seat correctly at the muzzle and the Marble's tang peep sight is missing some small parts and is loose. The rifle is otherwise sighted with flattop sporting rear, a tall plain Lyman bead on the integral ramp dovetail at front, and the action is a little sluggish but functional. An interesting
057	The metal surfaces of this desirable pistol retain about 85% original blue with a small area of light-moderate pitting on the sideplate, some light silvering at the muzzle and scattered spots of loss toning to a gray-brown patina on both sides of the barrel. The hammer and triggerguard retain nearly all their original case-hardened finish with some particularly vivid colors on the hammer. The checkered walnut target grips with gold S&W medallions are unnumbered and rate near excellent with a few compressed points and light handling marks. The extractor is numbered to another gun and the barrel and latch are properly serialized to the frame. The original sights are intact, barrel-to-frame fit is excellent and the action appears to function well mechanically. A nice example of these collectable 8" barreled Second Model pistols. The original sights are intact, barrel-to-frame fit is excellent and the action appears to function well mechanically. A nice example of these collectable 8" barreled Second Model pistols. (23A10293-36) {C&R} (1200/1800) Est. 1,200 - 1,800 Smith & Wesson Third Model Perfected Single Shot Target Pistol serial #5020, 22 LR, 10" ribbed round barrel with a bright excellent bore. The metal surfaces retain about 90% original blue with some scattered areas of pinprick pitting, some minor silvering at the muzzle and some overall light handling marks and areas of flaking to mild brown patina. The trigger and hammer retain nearly all their original case-hardened finish and the factory checkered walnut extension grips rate excellent with a few fine handling marks on the butt and are properly numbered to the gun. The barrel is sighted with a Sheard beaded blade and original rear sight, all the correct parts are serialized to the frame, barrel-to-frame fit is very good with just a bit of minor play and the action appears to function well mechanically. The included factory letter		nosecap also show a few foliate flourishes and the barrel markings remain intact and strong. The rifle wears a set of replacement deluxe quality checkered walnut stocks that remain in very good plus condition showing a small repaired chip on the left edge where the buttstock meets the frame, some overall light handling marks and intact checkering. The stocks show lovely grain figure throughout and an original hard rubber shotgun buttplate is present though not quite perfectly fitted. There are no assembly numbers or other markings on the inside tangs or stock inlet. The magazine locking tab does not seat correctly at the muzzle and the Marble's tang peep sight is missing some small parts and is loose. The rifle is otherwise sighted with flattop sporting rear, a tall plain Lyman bead on the integral ramp dovetail at front, and the action is a little sluggish but functional. An interesting assembled deluxe short rifle. (13C10291-5) {C&R} (3000/5000)
057	The metal surfaces of this desirable pistol retain about 85% original blue with a small area of light-moderate pitting on the sideplate, some light silvering at the muzzle and scattered spots of loss toning to a gray-brown patina on both sides of the barrel. The hammer and triggerguard retain nearly all their original case-hardened finish with some particularly vivid colors on the hammer. The checkered walnut target grips with gold S&W medallions are unnumbered and rate near excellent with a few compressed points and light handling marks. The extractor is numbered to another gun and the barrel and latch are properly serialized to the frame. The original sights are intact, barrel-to-frame fit is excellent and the action appears to function well mechanically. A nice example of these collectable 8" barreled Second Model pistols. (23A10293-36) (C&R} (1200/1800) Est. 1,200 - 1,800 Smith & Wesson Third Model Perfected Single Shot Target Pistol serial #5020, 22 LR, 10" ribbed round barrel with a bright excellent bore. 	blade equipped with single unstopped fullers. According to Albaugh's		once present. The bolt body and follower have bright jeweled finish, the
	book, "Confederate Edged Weapons", on page 140 he states that the		follower spring, magazine, trigger, and front barrel stud retain much
	makers of these swords are unknown and the brass hilt has all the		original gold-plated finish, the rear stud has faded to gray with modest
			oxidation. The Monte Carlo walnut stock features a right-side
	rough casting traits of a Confederate piece. Time has given the blade a silvery gray patina with scattered patches of light and modest freckling		cheekpiece, Pattern #12 oakleaf and acorn carving and a rosewood tip
	and oxidation with a couple patches of light pitting. The blade was lightly		and white diamond inlay gripcap. The wood shows a few light dents,
	cleaned at some point, the tip is lightly rounded and there are tiny nicks		handling marks and an added light varnish. The bolt is numbered to the
	and chips along the edges. The spiral grip sand-cast hilt has a tarnished		rifle and mounted atop the receiver is a Weatherby Variable 2X-7X
	ocher patina, the letters "CS" poorly cast in both sides of the crossguard		scope with single post and circle center dot reticle in need of a good
	and the five pointed star in the pommel is also crudely cast leaving a		cleaning. A very good custom Mark V rifle. (5A9949-48) {C&R} [Dr.
	couple of the points unformed. There are numerous impact marks and		James D. Morgan Collection] (1800/2200)
	casting flaws, the tang slot poorly formed leaving modest gaps along the		Est. 1,800 - 2,200
	edges of the blade. There are two lead filled round repairs at the quillon	1118	
	on one side of the guard and remnants of two solder repairs on the front		serial #H223060, 416 Weatherby Magnum, 26" threaded barrel with
	face of the crossguard. There is no sheath present. Copied from the		Accubrake and a bright excellent bore. The metal surfaces retain 90%
	Roman Gladiators from over 2000 years ago, this is a well kept		original blue, loss due to rub wear along the top and sides of the barrel
	Confederate weapon in fine honest condition. (5C9718-9)		along with scattered light oxidation on the Accubrake. The fluted bolt
	[Deaccessioned New Britain Youth Museum] (2000/3000)		body remains bright and is numbered "060" on the underside of the bolt
	Est. 2,000 - 3,000		handle. The carved American walnut Monte Carlo stock with right side
1114	Excellent Japanese Wakizashi		cheekpiece remains in near excellent condition with a couple dents and
	This lovely short sword measures 29" overall and bears a steeply curved		marks along the top of the comb. The stock features Pattern #16 carving
	21" single edged blade with a rolling hamon of wide and narrow peaks,		and a rosewood tip and white diamond inlay gripcap. Included is a worn
	single edged spine and unstopped fuller on the reverse side of the		Styrofoam box with taped end label and worn cardboard outer sleeve,
	blade. The blade remains in excellent condition with some sparse fine		test target, two piece rings and information pamphlet. A very good plus
	staining, a few spots of tiny freckles and pitting and some minor flaking		left-handed big bore Lazermark that has seen use but remains an
	on the spine. The copper habaki has a nice darkened patina and the		attractive rifle. (5A9949-9) {MODERN} [Dr. James D. Morgan Collection]
	round pierced iron tsuba is decorated with rolling clouds and waves,		(1200/1800)
	marked with two Japanese characters along the center of the front face,		Est. 1,200 - 1,800
	one of the seppa is missing. The brass fuchi and kashira are decorated	1119	
	with bright serpents on a black stippled background. The wood handle is		serial #SB074490, 7mm Weatherby Magnum, 26" fluted barrel with a
	covered in white shagreen and wrapped in black cloth tape. The		bright excellent bore. The stainless steel barrel remains bright retaining
	wrappings remain in excellent condition with only some minor flaking		all its blackened finish within the flutes. The receiver and bottom metal
	around the mekugi. The menuki remains in place and is similar in design		retain 99% plus original matte blue with gold "W" on the bow of the
	to the fuchi and kashira. The shagreen covered wood scabbard remains		triggerguard. The matte gray gel coat Monte Carlo synthetic stock with
	in excellent condition with a couple minor chips along the edges of the		spiderweb accents remains in excellent condition and features a
	kozuka (no longer present) and the tip. A lovely Wakizashi that would		right-side cheekpiece. The fluted bolt remains bright and is numbered to
	make a splendid addition to any collection. (5C10219-23) (1800/2200)		the rifle. Included is the original factory cardboard box with worn end
			label, cable lock, sling swivels and manual. A virtually new-in-the-box

Lot Title/Description

1135 J.S.F. Botha Large Bore Percussion Halfstock Stopping Rifle 1138 British Underlever Double Rifle by R.B. Rodda & Co. .75 cal, 32 1/4" barrel with a bright near excellent bore showing a few serial #33895, 577/500 No. 2 BPE, 26 1/4" barrels with partially bright small freckles and crisp rifling. The barrel of this big game rifle shows about good bores, the right barrel with some scattered light pitting and generous plum-brown finish throughout, perhaps 60%, with areas toning oxidation with otherwise strong rifling throughout and the left barrel with to gray and showing fading but still strong damascus patterns. There are a few more noticeable rings of oxidation and also strong rifling. The some scattered small dings and areas of old oxidation staining and the barrels of this double rifle retain about 50% antique reapplied rust blue under-rib is starting to separate for about 9" at the rear. The barrel is thinning and toning to plum-brown patina and showing some scattered neatly marked "J.S.F. BOTHA. CAPE TOWN." The patent breech, upper oxidation and light pitting. The back action lockplates retain about 85% tang and lockplate retain about 97% wonderful vibrant case-hardened of the same rust blue finish while the action and triggerguard have colors showing a coating of protected lacquer and feature some light mostly toned to a pleasant gray-brown patina. The barrel markings show simple border embellishments. The tailpipe also retains some strong significant fading and the markings on the lockplates are softened but smoky colors while the buttplate and triggerguard have mostly toned to legible. The underside barrels and frame show period London proof pewter gunmetal patina. The checkered walnut stock remains in very marks, the screw heads show light slot wear and the hammer screws good plus condition retaining strong oil finish and showing some are old replacements. The checkered walnut capped pistolgrip buttstock scattered mild abrasions and light dings from the years, the checkering and wedge-fastened forend remain in about fair condition as cleaned along the wrist remaining crisp. Stock fit is excellent with nice edges and and refinished, there is a small chip behind the upper tang and there is a small number "277" stamped on the right side wrist. Stock is numerous thin cracks with a repaired break at the wrist, otherwise with equipped with German silver wedge escutcheons, nosecap and some scattered light dings and worn checkering. There are some small monogram plate on the toe line. The rifle is equipped with sling swivels, decorative pins set into the pistolgrip and the rifle is equipped with sling three leaf express v-notch rear sights retaining strong fire blue and small swivel eyes. The rifle is sighted with 100 yard standing v-notch rear sight German silver blade front. A slightly short simple replacement hickory with flip-up 200 yard leaf and platinum lines and a low-profile silver bead ramrod is present and the lock functions crisply. A very attractive big front sight. Barrel lock-up exhibits some side-to-side play and they are bore South African rifle with some wonderful case-hardened colors and off-face. The rebounding hammers are also a little loose but the locks a nice bore. (13B10053-4) {ANTIQUE} (2000/4000) otherwise seem to function well mechanically. This double rifle has a lot Est. 2,000 - 4,000 of character and seems to have been well-used in Africa or India 1136 Colt Model 1855 Root Percussion Revolver Please also see the proper bullets and reloading dies available for this serial #9927, .31 cal, 3 1/2" stepped round barrel with a mostly bright cartridge in the Online Auction. (13A10271-1) {C&R} (1000/1500) very fine bore showing some scattered areas of light pitting and Est. 1.000 - 1.500 1139 German Martini Action Schuetzen Rifle by Ernst Schmid oxidation with otherwise crisp rifling throughout. The barrel and cylinder of this "Model 6" revolver retain about 40% original bright blue flaking 8.15x46mmR, 29" Bohlerstahl fluted octagon barrel with a bright overall to a pleasant gray-brown patina along with some scattered small excellent bore. The barrel of this rifle retains about 90% original blue areas of old minor oxidation staining. The frame retains about 85% showing scattered edge wear, light handling marks and some mild original bright blue with some scattered flaking to gray-brown and a few thinning to gray-brown patina under bright light. The breech shows maker markings "ERNST SCHMID / MINDELHEIM". The action and light dings or tool marks mostly behind the rear of the base pin. The hammer retains generous strong case-hardened colors toning overall to buttplate have mostly toned to pewter gunmetal patina showing some an attractive smoky gray, the loading lever is mostly pewter gray with sparsely scattered mild speckling. The lever retains some generous some old oxidation and the sides of the trigger show strong fire blue. silvery case-hardened patina and the action is extensively embellished The New York barrel address was stamped rather light but remains with fine quality foliate scrollwork and wonderful forest scenes framed by mostly legible and the cylinder retains a very fine stagecoach holdup silver wire inlays on either side, elk on the right and chamois on the left. scene and strong "COLTS PATENT". The smooth walnut grip remains in The smooth walnut forend with somewhat rudimentary foliate carving at very fine condition retaining about 90% original varnish showing some the tip and brass wedge is no doubt an old replacement but rates scattered light dings from the years and retaining excellent fit. The excellent. The buttstock features a very high and generous left-side serialized parts are matching and the action will require some cheekpiece and features lovely carved foliate motifs on either side also mechanical attention as the hammer does not hold and the cylinder with a finely detailed portrait of a jaeger on the right and a trophy cup or does not rotate. The hammer is functional when manual pressure is perhaps a depiction of the Holy Grail on the left. The stock rates near applied to the back of the trigger so this is likely just a spring issue. A excellent showing a few neatly executed repairs near the tangs, small handsome Colt Root revolver. (13B10275-5) {ANTIQUE} (1200/1800) vacant hole along the toe line and it is just a bit shy at the toe, otherwise Est. 1,200 - 1,800 showing lovely grain figure throughout. The rifle is sighted with a wide 1137 British Double Hammergun By Burtinshaw aperture disc tang sight and there are two front sight dovetails, one serial #76506 (barrels), 12 bore (2 1/2"), 30" W. Richards barrels choked vacant and the other with a checkered blank. Equipped with double set improved modified and a tight improved modified with mostly bright near triggers, the action seems to function well mechanically. A fine Bavarian excellent bores showing a few small areas of fine pitting here and there. Martini schuetzen rifle. (13B10174-8) {C&R} (1000/1500) This venerable hammergun was reworked by W. Richards during the Est. 1,000 - 1,500 period of use and then later submitted for re-proofing, now showing 1140 German Martini Action Schuetzen Rifle by Kessler Birmingham standard nitro proofs for 65mm shells, minimum wall serial #2801, 9.5x47mmR, 29 1/4" Prime Krupp Gussstahl octagon thicknesses are about 0.029" in the right and 0.030" in the left. The barrel with a mostly bright very good bore showing some light pitting and barrels retain about 92% quality re-blacking toning to a rich plum-brown somewhat worn rifling for a few inches ahead of the chamber, a few small tool marks at the crown and otherwise strong rifling. The barrel of patina under bright light and showing some areas of mild thinning and some remnants of light pitting along the sides. The barrel rib shows this attractive rifle retains about 97% original plum-brown patina showing somewhat faded but legible markings "NEW BARRELS BY W. a few light handling marks and faint edge wear. The rear barrel shows RICHARDS LIVERPOOL & PRESTON". The locks and remaining metal fine silver inlaid maker markings "F. W. Kessler Suhl". The action has surfaces are a silvery pewter patina showing evidence of a light cleaning mostly toned to a pleasant gunmetal and mild gray-brown finish while long ago, the English scrollwork embellishments softened from the the lever and buttplate retain strong silvery case-hardened patina. The years. The lockplates show softened game scenes and faded action, lever and decorative sideplates show fine quality tasteful foliate "BURTINSHAW" maker markings. The checkered straight grip walnut scrollwork throughout and the top breech flat shows fine inlaid gold buttstock and wedge-fastened forend with horn tip insert remain in very foliate scroll and initials "FvP". The checkered walnut stock with good condition as lightly cleaned and refinished long ago showing a few generous left-side cheekpiece remains in very fine condition showing a repaired thin chips around the rears of the lockplates, scattered light few small dings along the edges against the frame, a few light dings and dings and somewhat worn checkering. Length-of-pull to the smooth mild handling marks. The stock shows some nice subtle grain figure and steel buttplate is 14 1/2" with drops of about 1 3/4" and 2" and weight is features lovely carved foliate motifs at the tip and around the 7 pounds. Lock-up is by single large under-bite and smaller rear checkering, the right side with handsome carved eagle scene. The rifle under-bite and remains tight, the barrels with a faint whisker of light is equipped with dual thimbles though no ramrod is present and the sling between breech and standing breech. Shotgun is equipped with swivels are intact. The tang sight has been refinished and shows some more modern replacement parts and no aperture disc and the front sight functional Burtinshaw grip safety, extractor and non-rebounding hammers, the locks remain crisp and seem to function well is a fine bead on post with protectors. Equipped with double set triggers, mechanically. A very good old British double, no doubt still with some the action seems to function well mechanically. The Kessler firm was service left in her using the right loads. (13A10178-9) {ANTIQUE} founded in 1869 and continued work into the late 1930s or early 1940s. (1000/1500) A very handsome German Martini rifle from this quality maker. Est. 1,000 - 1,500 (13B10174-6) {C&R} (1500/2000) Est. 1,500 - 2,000

78	mechanically. A handsome and rather interesting First Model Transitional pistol to add to your advanced Smith & Wesson collection. (23B10000-125) {&R} [Roy Jinks Family Collection] (2000/3000) Est. 2,000 - 3,000 Scarce Smith & Wesson Model 1903 Target Hand Ejector Revolver serial #49256, 32 S&W Long, 6" barrel with a bright excellent bore. The factory replacement barrel of this First Change revolver retains 99% plus original blue while the remaining metal surfaces retain about 90% original blue with some mild flaking and toning to gray patina and some overall high edge silvering and light handling marks. The hammer and trigger retain excellent case-hardened colors and the checkered hard rubber grips are numbered to another gun and rate excellent. All the parts including the barrel are correctly numbered to the frame, the left side of the front strap bears the Smith & Wesson refurbishment star		oxidation, light pitting, and a few handling marks or dings; the triggerguard is a handsome goldenrod patina. All the correct parts are serialized to the frame including the wedge, the New York barrel address and "COLTS / PATENT" on the frame are crisp, and the pate information and matching serial number are clear on the cylinder whic retains a soft but mostly intact naval engagement scene. The walnut or ares about very good with a tiny chip on both side of the toe of the from strap and a few light handling marks. The ink number in the grips is not longer visible but the fit to the frame is excellent, there is the remnant an inspection cartouche on the bottom of the right side and "W O" is lightly-scratched on the right side but. Barrel-to-frame fit is excellent, few of the safety pins on the cylinder are intact and the action appears
78	mechanically. A handsome and rather interesting First Model Transitional pistol to add to your advanced Smith & Wesson collection. (23B10000-125) {C&R} [Roy Jinks Family Collection] (2000/3000) Est. 2,000 - 3,000 Scarce Smith & Wesson Model 1903 Target Hand Ejector Revolver serial #49256, 32 S&W Long, 6" barrel with a bright excellent bore. The factory replacement barrel of this First Change revolver retains 99% plus original blue while the remaining metal surfaces retain about 90% original blue with some mild flaking and toning to gray patina and some overall high edge silvering and light handling marks. The hammer and trigger retain excellent case-hardened colors and the checkered hard rubber grips are numbered to another gun and rate excellent. All the parts including the barrel are correctly numbered to the frame, the left side of the front strap bears the Smith & Wesson refurbishment star dated to March 1952, the factory target sights are intact and timing and		oxidation, light pitting, and a few handling marks or dings; the triggerguard is a handsome goldenrod patina. All the correct parts are serialized to the frame including the wedge, the New York barrel address and "COLTS / PATENT" on the frame are crisp, and the patei information and matching serial number are clear on the cylinder whic retains a soft but mostly intact naval engagement scene. The walnut g rates about very good with a tiny chip on both side of the toe of the fros strap and a few light handling marks. The ink number in the grips is no longer visible but the fit to the frame is excellent, there is the remnant an inspection cartouche on the bottom of the right side and "W O" is lightly-scratched on the right side butt. Barrel-to-frame fit is excellent, a few of the safety pins on the cylinder are intact and the action appears to function well mechanically. A very honest Model 1860 Colt.

1183				
	U.S. Model 1917 Double Action Revolver by Smith & Wesson	1	187	Desirable Molot Vepr Semi-Auto Carbine
	serial #115556, 45 ACP, 5 1/2" barrel with a very good plus bore			serial #15VPP5715, 7.62x39mm, 16 1/2" chrome-lined RPK-profile
	showing some very mild oxidation and very fine pinprick pitting in the			barrel with a bright excellent bore. Built by Molot-Oruzhie, the same
	grooves with otherwise strong rifling throughout. The metal surfaces of			arsenal that manufactures RPK light machineguns for the Russian
	this attractive revolver retain about 95% original blue with most of the			military and other militaries around the world, Vepr rifles are
	loss due to scattered light edge wear, handling marks and some sparse			synonymous with quality and are very collectible as they have been
	very fine flaking to gray-brown patina. The cylinder face shows some			banned from importation since 2017. The metal surfaces retain about
	very fine pinprick pitting that is unobtrusive, the lanyard ring is toning to			98% original black enamel finish with some scattered light high edge
	plum-brown patina and the hammer and trigger retain bold			wear and a few light handling marks. The factory-stippled European
	case-hardened colors throughout. All markings remain crisp and clear			walnut forend and Monte Carlo thumbhole stock with right side
	showing flaming bomb stamp on the top left side frame, "(Eagle Head) /			cheekpiece and rubber recoil pad rate about excellent with a few
	S6" near the bottom and United States Property mark on the underside			scattered light handling marks. Imported by FIME group, this heavy-duty
	barrel. The smooth walnut grips remain in excellent condition showing			carbine features a 1.5mm RPK style receiver, a heavier profile barrel
	some mild edge wear and the right panel is appropriately			and RPK windage-adjustable rear sight, side mount rail and all the
				correct parts are serialized to the receiver. The carbine is further
	pencil-numbered matching. All of the serialized parts are matching and			
	the action seems to function well mechanically with solid timing and			equipped with an ALG AKT trigger group providing an excellent trigger
	lock-up. A very handsome example for the Smith & Wesson or martial			pull and reset and one SGM Tactical 30-round polymer magazine is
	collector. (13B10194-47) {C&R} (1000/1500)			included. The action of this excellent condition Vepr appears to function
	Est. 1,000 - 1,500			well mechanically. (23A10246-3) {MODERN} (1800/2200)
1184	German P.08 Luger Pistol by Mauser			Est. 1,800 - 2,200

The metal surfaces of this revolver and the spare cylinder retain about 99% original blue with limited muzzle wear and a few random handling marks. The service trigger and special selective hammer retain bold case-hardened colors. The diamond checkered walnut factory target grips with silver S&W medallions rate excellent with a few handling marks and feature an extractor cut out. This gun features a Baughman ramp front sight, black blade adjustable rear sight, and bit cylinders correctly numbered to the gun. A beautiful example of the "Jet" for the modern revolver or		showing some light tool marks along the sides of the barrel. The bolt body is softly graying and is numbered to the receiver. The checkered walnut Monte Carlo stock rates near excellent and has some light handling marks. The stock features the classic Weatherby skip-line checkering, a rosewood forend tip and gripcap, swivel studs and a factory ventilated recoil pad. The pistolgrip cap has some light abrasions, crackling, and chipping to the lacquer finish. There are no provisions for sights, a set of Buehler bases and 1" scope rings are included. This is an excellent example overall ready for a set of quality optics. (4A10224-4) {MODERN} (1200/1800)
1203	marks, and some scattered light freckling. The grips are unmarked double diamond checkered walnut replacements that rate very good to excellent with a few handling marks and compressed diamond points. The grip screws show very light stains from oxidation, and one is a blue finished replacement. This series 70 pistol features a nickel plate serrated ramp front sight, blue finish drift adjustable rear sight, and serrated flat mainspring housing. It includes a nickel plate factory marked magazine. In their day, the electroless Combat Commanders were popular for their added strength, weight, and rust resistant finish. They remain popular today with collectors and shooters. (8A10249-78) (MODERN) (1000/1500) Est. 1,000 - 1,500 Smith & Wesson Model 53 DoubleAction Revolver serial #K444865, 22 Remington Jet / 22 LR, 6" pinned barrel with an excellent bore. This excellent four-screw revolver includes an auxiliary rimfire cylinder and retains excellent condition. The metal surfaces of this revolver and the spare cylinder retain about 99% original blue with limited muzzle wear and a few random handling marks. The service trigger and special selective hammer retain bold case-hardened colors. The diamond checkered walnut factory target grips with silver S&W medallions rate excellent with a few handling marks and feature an extractor cut out. This gun features a Baughman ramp front sight, black blade adjustable rear sight, and both cylinders correctly time and lockup. The steel 22 LR chamber inserts are not included, however, the spare cylinder handles the rimfire chores nicely and it is correctly numbered to the gun. A beautiful example of the "Jet" for the modern revolver or Smith & Wesson collector. (8A10256-32) {C&R} [John J. Singer		showing some light tool marks along the sides of the barrel. The bolt body is softly graying and is numbered to the receiver. The checkered walnut Monte Carlo stock rates near excellent and has some light handling marks. 			Magnum / PRESENTED TO / BILL JORDAN / BY SMITH & WESSON

	bright excellent bore. This interesting revolver is #3 of the first three
	prototypes built of what would become known as the Model 650 Service
	Kit Gun. The stainless steel surfaces rate excellent and the checkered
	walnut Magna grips which are numbered to another gun also rate
	excellent. The model number is not stamped on the gun, instead "3 S" is
	marked on the yoke and left side of the grip frame. The revolver features a semi-target hammer, smooth combat trigger and fixed sights and
	appears to function well mechanically. Included is the original factory
	box properly end-labeled and numbered to the gun containing the
	business card of P. Richard Metcalf, better known as Dick Metcalf, from
	when he was working for the Shooting Times as a specialist in Firearms
	Law/Special Projects. Neatly-typed on the back of the card is "Model
	650 / .22 CHIEFS SPECIAL M.R.F. / (Stainless) / #3 of first three
	prototypes built." A rare prototype Model 650 for the advanced Smith &
	Wesson collector. (23C10082-36) {MODERN} (2000/3000)
	Est. 2,000 - 3,000
229	Smith & Wesson Model 65-2 Double Action Revolver with Bill Jordan
	Connection
	serial #7D46828, 357 Magnum, 4" pinned heavy barrel with a bright
	excellent bore. The stainless steel surfaces are in near excellent
	condition with a touch of minor scuffing on the barrel and some stubborn
	residue from firing. The Pachmayr synthetic wood grain Jordan grips are
	in very good plus condition with a few minor handling marks, and feature
	Pachmayr medallions and a cast-in Bill Jordan signature on the right
	side; the grips fit slightly loose. The factory markings remain crisp on the
	revolver, and the left side of the frame is engraved with Bill Jordan's signature, about half of which is covered by the grips. The action of the
	revolver has been nicely tuned and the hammer bobbed giving a smooth
	double action pull, the single action notch remaining functional, and the
	cylinder release latch has been wedged and checkered, allowing
	smoother operation of the revolver. According to the consigner, this
	revolver was presented to Bill Jordan as a finalist for the Handgunner of
	the Year award in 1975. Included with the revolver is a hardwood
	presentation case, lined with black felt which is torn in spots, mounted
	with a brass plate reading "1975 / "TOP TEN" / O.A.H.A. / PRESENTED
	BY: CHARTER ARMS / TO: BILL JORDAN". A finely tuned S&W Model

A very nice wartime Walther pistol for the martial collector. (13A10212-36) {C&R} (800/1200)
	hint of lateral play and the action appears to function well mechanically. An attractive Second Model pistol with a desirable barrel length. (23A10293-21) {C&R} (1200/1800) Est. 1,200 - 1,800 Smith & Wesson 38 Single Action First Model "Baby Russian" Revolver serial #16796, 38 S&W, 3 1/2" barrel with some scattered light pitting. This revolver shows matching serial numbers on the frame, rear of cylinder, bottom cylinder latch, rear face of barrel assembly and on inside of right grip panel. The barrel and cylinder show perhaps 5% original blue and are mostly a pleasing smooth gray patina with some scattered patches of light pitting and oxidation staining. The frame shows about 80% bright original blue with some scattered patches of oxidation on the backstrap. The hammer shows strong original color case-hardened finish. The two-piece smooth walnut grips rate excellent with 90% plus original oil finish remaining. (1B10000-12) {ANTIQUE} [Roy Jinks Family Collection] (800/1200) Est. 800 - 1,200 Remington Model 4 Rolling Block Smoothbore Rifle serial #326740, 22 Short or Long RF, 22 1/2" octagon barrel with a bright very fine bore showing a few small areas of light pitting and oxidation just ahead of the chamber. The barrel of this October 1925 date-coded rifle retains about 90-92% original blue with most of the loss due to some scattered light oxidation and freckling, more noticeable along the left side. The barrel markings remain crisp and clear showing proper "SMOOTH BORE" marking. The action retains about 95% vibrant case-hardened colors showing some small areas of mild oxidation staining scattered about, again a bit more noticeable along the left side and the small action parts retain about 98% original blue. The smooth walnut buttstock and forend remain in very good plus condition showing mostly worn finish, a few scattered light dings and handling marks. The		 quality restored bright blue showing a few scattered light handling marks, a couple tiny freckles and some very sparsely scattered remnants of tiny pinprick pitting beneath the finish that is hardly worth the mention. All principle markings remain completely intact and strong, the magazine release shows fading case-hardened colors while the trigger colors remain vibrant. The original checkered black hard rubber grips remain in very good plus condition showing some scattered light dings and handling marks. One correct original magazine with the hold-open follower is included and the action seems to function well mechanically. A wonderfully restored example of these scarce pistols, only 3900 were made in this configuration. (13A10220-3) {C&R} (700/900) Est. 700 - 900 German P.38 Semi-Auto Pistol by Walther serial #6273j, 9mm, 5" barrel with a bright excellent bore. The metal surfaces of this ac 42 coded pistol retain about 92% original blue that is taking on a deep plum patina overall with most of the loss due to some silvering along the high edges, light handling marks and the frontstrap toning to mild gray patina. The serial number on the barrel has been double-struck and all other markings remain intact and strong showing proper "(Eagle) / 359" Waffenamts and eagle firing proofs. The grooved dark brown phenolic resin grips remain in excellent condition. All of the serialized parts are matching, one proper "(Eagle) / 359" magazine is included and the action seems to function well mechanically. A very nice wartime Walther pistol for the martial collector. (13A10212-36) {C&R} (800/1200)

1248	Scarce Dreyse Model 1907 Semi-Auto Pistol with Police Markings & Capture Papers serial #9108, 32 ACP, 3 5/8" barrel sadly showing a prominent bulge about halfway down its length. The metal surfaces retain about 90% original blue that is taking on a mild plum patina under bright light with overall high edge wear, a few very small areas of minor pinprick pitting and handling marks. The extractor shows pale straw color and the bolt head retains a healthy amount of fine fire blue. The screw heads show light slot wear and all markings remain intact and strong showing Weimar "1920" property date and the left side also with "K.P.P.F. No. 631" Frankfurt police marking. The black checkered hard rubber grips remain in very fine condition showing some mild smoothing and a few light dings. The early variation barrel bushing shows some internal damage but remains securely installed and all of the serialized parts are matching, the magazine is also matching by inventory number "631". The included brown leather belt holster is no doubt original and remains in about very good condition showing some light scuffing, staining and handling marks. The included capture paper is a more informal type-written "certificate" authorizing a Bud H. Lambert to retain the pistol, it is misspelled "Dyerse" and listed as a "Model 1920" with the inventory number as the serial number. There is also a notation in pen that appears to indicate some sort of U.S. Customs registration dated to July 1945. A nice desirable ensemble for the martial collector. (13A10218-4) {C&R} (800/1200) Est. 800 - 1,200 Canadian MKII Ross Bolt Action Rifle with U.S. Markings 2020 Drivit A 201 backet as a unsulter back. The backet as a set as the parts of the provinter and the province and the province the province the parts of and parts the province with a bright accertance and parts and parts and bandling marks. The back to negative a bright accertance and back to July 1945. A nice desirable ensemble for the martial collector. (13A10218-4) {CaR} hour backet accertance	1252	East German Reworked P.08 Luger Pistol serial #9755, 9mm, 4" East German replacement barrel with a bright near excellent bore. The metal surfaces of this Vopo pistol retain about 95% arsenal refurbished blue showing some scattered light handling marks, areas toning to plum-brown patina under bright light and the right side frame rail lightly dressed to a medium gray patina. The pistol retains most of its original Imperial markings with 1917 date on the left side frame and receiver ring and DWM monogram on the toggle. The pistol is also stamped with East German "(Eagle) / (Crown) / U" and "(Crown) / N" proofs along with Vopo sunburst stamps on the left side. The checkered walnut grips are no doubt more modern replacements and are rather thick with sharp checkering, they otherwise rate near excellent. Most of the parts have been renumbered to match during refurbishment, the front sight exhibits some side-to-side play in its dovetail and the action otherwise seems to function well mechanically. One aftermarket magazine is included. This example will probably make for a good shooter. (13A10216-83) {C&R} (700/900) Est. 700 - 900 German Tell System Buchel Single Shot Target Pistol serial #1077, 22 RF, 13 3/4" octagon barrel with a bright excellent bore. The barrel of this pistol retains about 95% original blue showing a little scattered minor freckling and toning to a pleasant plum-brown patina under bright light. The action retains about 92% strong vibrant case-hardened colors muting slightly along the backstrap and showing a few fine scratches along the left side. The action is embellished with some tasteful light bordering and is marked "TELL / SYST: BUCHEL" on
	303 British, 28" barrel with a bright near excellent bore. The barrel, bands and triggerguard of this rifle have mostly toned to a mix of pleasant plum-brown and gray patina showing scattered light handling marks, sparse pinprick pitting and remnants of old oxidation staining. The triggerguard and rear band retain some streaks of original bright blue in the protected areas. The receiver and bolt body show strong smoky case-hardening with some areas of brown speckling scattered about, the bolt body with generous vibrant colors along the interior protected areas and the extractor showing good remnants of fire blue. All markings remain crisp and clear and the receiver ring shows "LC" large chamber modification stamp. The smooth walnut stocks and handguards remain in very good plus condition showing somewhat worn finish overall with the expected overall light dings and handing marks. The right side butt retains a plethora of good markings, the Quebec roundel and "II" designation rather soft. The butt shows "serial number" 715 over 1909 date, a cancelled unit inventory number "5 / 12" and "35 / CFA / 37" and finally an intact unit marking "6 / 15" with "42B / CEF / 836", likely indicating the 42nd Battalion Canadian Expeditionary Forces (Royal Highlanders of Canada). The pistolgrip also shows US markings "(Flaming Bomb) / U.S. / 18499". The correct Canada Tool Co. rear sight is intact, the front sight hood is missing one screw on the right side, and the action seems to function well mechanically. (13A10219-5) {C&R} (800/1200) Est. 800 - 1,200	1254	the left side. The arm shows "(Crown) / B / U" proofs and "5,3mm" bore measurement. The rear sight has mostly toned to plum-brown patina showing a few flakes of fire blue and is adjustable with a small square-headed spanner (not present). The checkered walnut right hand target grips and forend remain in very good plus condition showing a small chip at the forward edge of the right panel, scattered light dings and somewhat worn original varnish. The hand rest of the right grip has been deepened slightly during the period of use and the horn grip cap is a little loose. The rear sight is a square notch and the front a generous square blade and the action is operated with a backstrap lever. The pistol is equipped with adjustable double set triggers that will require a little attention as the set trigger does not currently set though the main trigger is functional. A solid example of these interesting German target pistols. (13A10174-43) {C&R} (800/1200) Est. 800 - 1,200 Remington No. 2 Rolling Block Sporting Rifle serial #12500, 32 RF, 28" octagon barrel with a partially bright good bore showing scattered light pitting and oxidation with otherwise strong rifling throughout. The barrel of this rifle retains about 94% original blue showing edge wear, some areas thinning to plum-brown patina and freckling. There are some scattered light dings along the edges on either side, one area a bit more moderate on the left side near the muzzle. The barrel retains strong markings with E. Remington & Sons address, caliber designation and matching serial number beneat the forend. The
1250	Est. 800 - 1,200 French Model 1892 Double Action Revolver by St. Etienne serial #F80550, 8mm French Ordnance, 4 5/8" barrel with a bright near excellent bore showing a few scattered small areas of very light oxidation and otherwise crisp rifling throughout. The metal surfaces of this 1895-dated revolver retain about 92% original blue showing overall high edge and holster wear, some scattered small dings and minor freckles. The small parts retain a healthy amount of rich straw colors showing some mild silvering and minor oxidation staining scattered about and all markings remain intact and strong. The checkered walnut grips remain in very good plus condition showing some scattered light dings and handling marks. The lanyard ring is intact and the action seems to function well mechanically with solid timing and lock-up. An attractive and desirable antique example for the martial collector. (13A10216-118) (ANTIQUE) (700/900) Est. 700 - 900		Caliber designation and matching serial number beneath the forend. The action retains about 95% vibrant case-hardened colors showing some muting along the tangs and scattered gray-brown speckling. The hammer has toned to plum-brown and the other small parts retain strong original bright and fire blue finishes. Strangely there are a number of very small thin cracks in the frame just behind the hammer and through the action pin retainer plate. The smooth walnut buttstock and forend with steel schnabel remain in very fine condition retaining most of their original oil finish showing a very thin drying crack on the right side wrist where the stock meets the frame and some scattered light dings or handling marks. Stock fit remains excellent and the rifle is sighted with standard sporting rear sight and small German silver blade front sight. The action seems to function well mechanically. (13B9670-389) {ANTIQUE} [David & Lore Squier Collection] (700/900) Est. 700 - 900
1251	Webley No. 2 British Bull Dog Double Action Revolver serial #52719, .442 Webley CF, 2 1/2" barrel with a partially bright very good bore showing some scattered light oxidation and otherwise quite crisp rifling throughout. The metal surfaces of this revolver retain a generous amount of original bright blue along the sides and protected areas of the frame, the balance flaked and toning to a pleasant mix of gunmetal gray and plum-brown patina showing some scattered old oxidation staining and sparsely scattered fine pinprick pitting. All markings remain intact and strong, the topstrap with bold "THE BRITISH / BULL DOG", the barrel with P. Webley & Son address and the left side frame showing model designation and flying bullet logo. The checkered walnut grips remain in very fine to near excellent condition showing a little edge wear along the left panel and some other minor handling marks. The action seems to function well mechanically with solid timing and lock-up. An attractive and desirable little Webley bull dog revolver. (13A10216-131) {ANTIQUE} (700/900) Est. 700 - 900

(14A10208-22) {C&R} (700/900) Est. 700 - 900 Winchester Special Order Model 1894 Lever Action Rifle serial #676242, 30 W.C.F., 26" part-octagon part-round barrel with a button magazine and a bright very good plus bore with some spots of light oxidation in the grooves about mid-bore but strong rifling throughout. The frame and the forend cap have worn to a gray patina toned lightly brown with remnants of blue in the protected areas, some light oxidation staining, and scattered light handling marks; the lever has a silvery casehardened patina interspersed with areas of light brown
	1906-vintage carbine is toning to an even dark gray patina showing some scattered spots of light oxidation staining and remnants of original blue along the wood line and in the protected areas. The receiver retains about 60-65% original blue which is thinning to a blue-gray patina on the top and sides and has aged to gray on the bottom with strong finish remaining around the lever, ring shadow on the left side of the frame by the sling stud, and some overall speckles of light oxidation staining and light handling marks to be expected of a utilitarian gun that was well used but not abused. The bolt with cocking indicator and lever are also toning to gray with remnants of original case-hardened colors in the protected areas of the lever. The barrel markings are slightly softened but fully legible. The smooth walnut schnabel-tipped forend rates very fine with perhaps a touch of period added finish and a few light handling marks from the field. The straight grip carbine stock rates about very good with the finish, multiple thin cracks and some oil soaking around the action and some light handling marks. The saddle ring is not	1359	handling marks, and the metal parts are all generally proud of the stock. The stock is lightly stamped "GWR" on both left and right sides of the butt. The factory markings all remain clear and easily legible. The rifle is sighted with a small brass blade front sight and a Winchester Express rear sight, the "1" marked folding leaf is bent into a v-shape, making folding difficult but not impossible. The rifle appears to function well mechanically. (14A10208-22) {C&R} (700/900) Est. 700 - 900 Winchester Special Order Model 1894 Lever Action Rifle serial #676242, 30 W.C.F., 26" part-octagon part-round barrel with a buton magazine and a bright very good plus bore with some spots of light oxidation in the grooves about mid-bore but strong rifling throughout. The frame and the forend cap have worn to a gray patina toned lightly brown with remnants of blue in the protected areas, some light oxidation staining, and scattered light handling marks; the lever has a silvery casehardened patina interspersed with areas of light brown patina. The barrel retains about 45% original blue with the round portion
	1906-vintage carbine is toning to an even dark gray patina showing some scattered spots of light oxidation staining and remnants of original blue along the wood line and in the protected areas. The receiver retains about 60-65% original blue which is thinning to a blue-gray patina on the top and sides and has aged to gray on the bottom with strong finish memaining around the lever, ring shadow on the left side of the frame by the sling stud, and some overall speckles of light oxidation staining and light handling marks to be expected of a utilitarian gun that was well used but not abused. The smooth walnut stock and forend are in very good condition with a small chip on the left side of the wrist at the corner of the upper tang, scattered light handling marks, and a later added finish showing some streaking. The two-line barrel address is softened but still legible, and the remaining factory markings are crisp. The rifle is sighted with a Marble's bead-on-blade front sight and a sporting-style flat-top v-notch rear sight. An honest 1914-made Winchester rifle in a nice configuration.
	1906-vintage carbine is toning to an even dark gray patina showing some scattered spots of light oxidation staining and remnants of original blue along the wood line and in the protected areas. The receiver retains about 60-65% original blue which is thinning to a blue-gray patina on the top and sides and has aged to gray on the bottom with strong finish remaining around the lever, ring shadow on the left side of the frame by the sling stud, and some overall speckles of light oxidation staining and light handling marks to be expected of a utilitarian gun that was well used but not abused. The bolt with cocking indicator and lever are also toning to gray with remnants of original case-hardened colors in the protected areas of the lever. The barrel markings are slightly softened but fully legible. The smooth walnut schnabel-tipped forend rates very fine with perhaps a touch of period added finish and a few light handling marks from the field. The straight grip carbine stock rates about very good with the finish worn on the right side of the buttstock along with some spots of crazed finish, multiple thin cracks and some oil soaking around the action and some light handling marks. The saddle ring is not present, a sling eye has been added to the forend and there is a vacant hole on the toeline. The rifle is equipped with a Sheard gold bead front sight and Savage No. 21 micrometer rear and the action of this desirable and honest 1899-F appears to function well mechanically. (23B10300-10) {C&R} (800/1200)	1359	handling marks, and the metal parts are all generally proud of the stock. The stock is lightly stamped "GWR" on both left and right sides of the butt. The factory markings all remain clear and easily legible. The rifle is sighted with a small brass blade front sight and a Winchester Express rear sight, the "1" marked folding leaf is bent into a v-shape, making folding difficult but not impossible. The rifle appears to function well mechanically. (14A10208-22) {C&R} (700/900) Est. 700 - 900 Winchester Special Order Model 1894 Lever Action Rifle serial #676242, 30 W.C.F., 26" part-octagon part-round barrel with a button magazine and a bright very good plus bore with some spots of light oxidation in the grooves about mid-bore but strong rifling throughout. The frame and the forend cap have worn to a gray patina toned lightly brown with remnants of blue in the protected areas, some light oxidation staining, and scattered light handling marks; the lever has a silvery casehardened patina interspersed with areas of light brown patina. The barrel retains about 45% original blue with the round portion having worn to a similar gray patina as found on the receiver, light wear on the high edges, gray freckling, and scattered pinprick pitting. The smooth walnut stock and forend are in very good condition with a small chip on the left side of the wrist at the corner of the upper tang, scattered light handling marks, and a later added finish showing some streaking. The two-line barrel address is softened but still legible, and the remaining factory markings are crisp. The rifle is sighted with a Marble's bead-on-blade front sight and a sporting-style flat-top v-notch rear sight. An honest 1914-made Winchester rifle in a nice configuration. (14A10221-10) {C&R} (800/1200)

This is an interesting model which appears to be a Wesson shotgun barrel installed on a sixth type flat-side frame. The barrel retains about 90% thinning original blue with some spots of light pitting sparsely scattered with light wear along the muzzle, point of transition and edges. The frame retains about 85% soft matte nickel toning to brown and gray patina, majority of loss along the front and underside of the forend, edges in and around the triggers along with scattered fine pinprick flaking. The crescent buttplate and triggerguard
1390	original blue with perhaps a light handling mark or two, and the bright finished frame is in near excellent condition with a few traces of pinprick pitting. The checkered pistolgrip walnut stock and forend are in excellent condition with a couple minor handling marks. The frame is decorated with some light scroll borders and touches of scroll engraving on the fences and forend iron, the sides marked "RIZZINI" and the bottom "OMNIUM". The barrel markings are crisp, the barrels are numbered to the shotgun, and the forend is numbered "71983", likely a factory mistake. The shotgun locks up tightly with the lever coming to rest right of center and features a single selective trigger, nonautomatic safety, ejectors, 3" chambers, 14 1/2" length of pull with drops of about 1 1/2" and 2 1/4", and is sighted with a lone brass bead. Included with the shotgun are two Rizzini chokes marked improved cylinder and cylinder. A quality-made Italian shotgun ready for the field. (14A10295-22) (MODERN) (800/1200) Est. 800 - 1,200 Japanese Type 99 Arisaka Bolt Action Rifle by Toyo Kogyo serial #60185, 7.7 Arisaka, 25 1/2" barrel with a bright excellent chrome-lined bore. The metal surfaces of this 30th series rifle retain	1394	March 5, 2001. The factory then sold it as a used gun purportedly removing the lanyard loop, but this one is still so equipped, and shipped it on June 14, 2001, to Lew Horton Distributor Co., Westboro, Massachusetts. Another interesting fact is that they were marked as Model 37-2, however their box and computer records at the factory listed them as Model 37-3. An interesting variation of the Airweight Chiefs Special in excellent condition and a great opportunity for the collector. The frame is decorated with some light scroll borders and touches of scroll engraving on the fences and forend iron, the sides marked "RIZZINI" and the bottom "OMNIUM". The barrel markings are crisp, the barrels are numbered to the shotgun, and the forend is numbered "71983", likely a factory mistake. The shotgun locks up tightly with the lever coming to rest right of center and features a single selective trigger, nonautomatic safety, ejectors, 3" chambers, 14 1/2" length of pull with drops of about 11/2" and 2 1/4", and is sighted with a lone brass bead. Included with the shotgun are two Rizzini chokes marked improved cylinder and cylinder. A quality-made Italian shotgun ready for the field. (14A10295-22) (MODERN) (800/1200) Est. 800 - 1,200 Japanese Type 99 Arisaka Bolt Action Rifle by Toyo Kogyo serial #60185, 7.7 Arisaka, 25 1/2" barrel with a bright excellent chrome-lined bore. The metal surfaces of this 30th series rifle retain about 85-90% arsenal blue with scattered light to moderate oxidation staining, high edge wear and some scattered pinprick pitting. The Asian hardwood stock is in very good condition with the expected light dings and handling marks scattered throughout that come with military service, and a single softened Japanese character is stamped behind the lower tang. The receiver markings remain exceptionally crisply stamped, including the Chrysanthemum which remains unmolested and entirely intact, and the bolt, safety knob, and bayonet lug are numbered to the rifle; the striker is unnumbered. The monopod and aircraft rear sight	1394	March 5, 2001. The factory then sold it as a used gun purportedly removing the lanyard loop, but this one is still so equipped, and shipped it on June 14, 2001, to Lew Horton Distributor Co., Westboro, Massachusetts. Another interesting fact is that they were marked as Model 37-2, however their box and computer records at the factory listed them as Model 37-3. An interesting variation of the Airweight Chiefs Special in excellent condition and a great opportunity for the collector. (8A10090-47) (MODERN) (700/900) Est. 700 - 900 Rare and Interesting Frank Wesson Two Trigger Shotgun 28 ga./. 54 cal. RF & CF, 24" part round part octagon with a bright excellent bore. This is an interesting model which appears to be a Wesson shotgun barrel installed on a sixth type flat-side frame. The barrel retains about 90% thinning original blue with some spots of light pitting sparsely scattered with light wear along the muzzle, point of transition and edges. The frame retains about 85% soft matte nickel toning to brown and gray patina, majority of loss along the front and underside of the forend, edges in and around the triggers along with scattered fine pinprick flaking. The crescent buttplate and triggerguard retain about 95% similar nickel with light wear along the edges. The left-side barrel limiting slide shows traces of original bright fire blue along the edge of the frame with the balance and opening trigger a soft brown patina. The hammer and firing trigger show good traces of bright colors muting to a gray case-hardened patina. The buttstock remans in good to very good condition having areas of attractive feathercrotch grain figure, light cracks and moderate chipping at the toe, 1/2" V-shaped area of lifting along the lower right edge most likely from a knot along with scattered light dents and handling marks from the years. Arm features a simple bead front sight, extra-large extractor and two position hammer
1390	original blue with perhaps a light handling mark or two, and the bright finished frame is in near excellent condition with a few traces of pinprick pitting. The checkered pistolgrip walnut stock and forend are in excellent condition with a couple minor handling marks. The frame is decorated with some light scroll borders and touches of scroll engraving on the fences and forend iron, the sides marked "RIZZINI" and the bottom "OMNIUM". The barrel markings are crisp, the barrels are numbered to the shotgun, and the forend is numbered "71983", likely a factory mistake. 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	Frank Wesson Third Type Two Trigger Sporting Rifle serial #9083, 38 RF, 24" octagon barrel with a good bore showing overall pitting and frosting still showing rifling throughout. The barrel retains perhaps 40% original blue toning to brown patina with sparsely scattered fine oxidation and light high edge wear. The frame retains about 40% flaking pale nickel toning to brown with scattered fine oxidation. The buttplate and triggerguard have a similar flaking nickel finish toning to pale brown and gray. The barrel limiting slide, hammer and triggers have toned to dark brown with specks of very fine staining. The smooth walnut buttstock rates near excellent showing an old light cleaning with some light dents and blemishes. The frame, barrel, limiting slide, triggerguard and buttstock are all numbered alike, the buttplate interestingly is numbered "9093". The rifle is sighted with a globe style front sight, adjustable elevator sporting rear sight, an elevation adjustable folding lollipop tang sight and equipped with sling swivel. A very good, honest third type Wesson rifle. (5A10221-12) {ANTIQUE} Dwidd Reco Collocating (800(1200))	1399	Smith & Wesson Model 57 Double Action Revolver serial #N728118, 41 Magnum, 4" pinned heavy barrel with an excellent bore. This fine revolver remains in excellent condition and features desirable nickel plate. The metal surfaces retain about 99% original nickel finish showing some mild clouding and light handling marks. This gun is provided with .500" target trigger and .500" target hammer that retain vibrant case-hardened colors. The checkered factory target grips with silver S&W medallions feature an extractor cut and rate about very good to excellent showing a few light dings and minor flaking of the finish. This revolver features a red ramp front sight, white outline micro adjustable rear sight and the action seems to function well mechanically.
