The very late production Smoot-style hard rubber grips remain in excellent condition and the action seems to function well mechanically. The rare blue paper-covered box with repeating gold H&R logo is ink stamp-numbered matching the revolver along the base and remains in very good plus condition showing some evident water staining and scuffs along the edges, otherwise remaining solid and retaining a very good pale green end label. The box also contains an original 3-In-One oil advertisement pamphlet. The Model 1905 is actually rather scare as it did not sell as well as the more prolific 1904's and 1906's. This is a fine example, almost never seen with the original box. (13A10248-11) (C&R) [The Richard Littlefield H&R Collection] (500/700)	-	1425	very minor loss due to a few scattered tiny flakes toning to gray and gunmetal along the rear edge cylinder and some areas along the frame. The hammer and trigger show fine dark smoky case-hardened colors, the cylinder bolt with nice dark gray oil-quenched case-hardening and the barrel markings remain crisp and clear. The black checkered hard rubber "M.F.A.Co." grips remain in excellent condition, barrel-to-frame fit is solid and the action seems to function well mechanically. A very fine example of these early Marlin arms for the antique collector. (13A10248-53) {ANTIQUE} (700/900) Est. 700 - 900 Excellent Reising Arms Co. Target Semi-Auto Pistol with Box serial #2449, 22 LR, 6 3/4" barrel with a bright excellent bore. This lovely pistol retains about 99% original bright blue showing some very tiny and faint freckles scattered along the barrel under bright light that are very unobtrusive. Strangely there also appears to be a very fine hairline crack forming along the hammer just ahead of the spur but this is also very unobtrusive and missed at first glance, no doubt it left the factory in this
1421	showing one small area of mild oxidation and strong rifling throughout. The metal surfaces retain about 96-97% original nickel finish with some loss due to scattered fine flaking and freckles mostly along the high edges and some other scattered mild handling marks. The hammer shows vibrant case-hardened colors and the remaining small parts retain about 97% original blue showing a little scattered mild oxidation staining. All markings remain crisp and clear. The closure strap shows a bit more wear, one of the straps on the end cap is torn through and the shoulder strap is intact showing a few scattered cracks. The interior lid shows the aforementioned maker marking, 1916 date and "B.A. VII" black artillery ink stamp. The walnut board stock proper remains in very fine condition showing a nice patina with a few small dings and some light handling		serial #141125, 32-40, 24" octagon barrel with half magazine and a very good bore showing scattered old oxidation with some light pitting and good rifling throughout. The metal surfaces on this third model rifle have mostly toned to dark brown patina with gray undertones, silvering along the high edges and overall modest pitting and spots of moderate oxidation, there are a couple of light impact marks on the right side of the barrel in front of the nose cap. The cartridge mark quite crisp. The caliber marking on the barrel is mostly lost to the years, the barrel address however remains mostly legible. A couple of the screws show light slot wear, the dust cover remains in place. The smooth walnut stock and forend remain in about very good condition with overall light dents, handling marks and areas of flaking added finish. The action appears to
1428	make for a good shooter. (13A10285-3) {C&R} (800/1200) Est. 800 - 1,200 German Lp.08 Artillery Luger Holster and Stock Rig This is a very good original rig with holster made by Friedrich Bottger of Eisleben. The holster and leather fittings remain in very good plus condition showing some flaking along the edges, mild mildew staining on the lid and some areas of crackling. The closure strap shows a bit more wear, one of the straps on the end cap is torn through and the shoulder strap is intact showing a few scattered cracks. The interior lid shows the aforementioned maker marking, 1916 date and "B.A. VII" black artillery ink stamp. The walnut board stock proper remains in very fine condition showing a nice patina with a few small dings and some light handling marks retaining a crisp "(Crown) / S" inspector stamp. (13B10145-22) (800/1200) Est. 800 - 1,200 Winchester Model 1887 Lever Action Shotgun serial #12909, 12 ga, 32" barrel with a fair bore showing old light pitting its full-length, a few areas a bit more moderate. The metal surfaces of this 1888-made shotgun retains about 95% older good quality reapplied blue showing a few small areas of old minor oxidation staining and some areas thinning and toning to mild gray-brown patina under bright light. The left edge rear of barrel shows faint remnants of the original proof		serial #141125, 32-40, 24" octagon barrel with half magazine and a very good bore showing scattered old oxidation with some light pitting and good rifling throughout. The metal surfaces on this third model rifle have mostly toned to dark brown patina with gray undertones, silvering along the high edges and overall modest pitting and spots of moderate oxidation, there are a couple of light impact marks on the right side of the barrel in front of the nose cap. The cartridge lifter is a mild ocher patina with some minor staining, the cartridge mark quite crisp. The caliber marking on the barrel is mostly lost to the years, the barrel address however remains mostly legible. A couple of the screws show light slot wear, the dust cover remains in place. The smooth walnut stock and forend remain in about very good condition with overall light dents, handling marks and areas of flaking added finish. The action appears to function well mechanically. (5A10298-25) {ANTIQUE} (800/1200)
	make for a good shooter. (13A10285-3) {C&R} (800/1200) Est. 800 - 1,200 German Lp.08 Artillery Luger Holster and Stock Rig This is a very good original rig with holster made by Friedrich Bottger of Eisleben. The holster and leather fittings remain in very good plus condition showing some flaking along the edges, mild mildew staining on the lid and some areas of crackling. The closure strap shows a bit more wear, one of the straps on the end cap is torn through and the shoulder strap is intact showing a few scattered cracks. The interior lid shows the aforementioned maker marking, 1916 date and "B.A. VII" black artillery ink stamp. The walnut board stock proper remains in very fine condition showing a nice patina with a few small dings and some light handling marks retaining a crisp "(Crown) / S" inspector stamp. Strangely all of the attachment hardware has been removed. Also included is an unmarked combination tool in very fine condition and an excellent quality reproduction jag. A very respectable stock rig to accompany your artillery Luger pistol. (13B10145-22) (800/1200) Est. 800 - 1,200 Winchester Model 1887 Lever Action Shotgun serial #12909, 12 ga, 32" barrel with a fair bore showing old light pitting its full-length, a few areas a bit more moderate. There is a 1 1/3" chip at the toe of the dogs head hard rubber buttplate which provides a 14 1/4" length of pull while the stock has drops of 1 3/4" and 3" and there is an unengraved German silver monogram plate on the toeline. The barrels are sighted with a silver bead and lock up tightly and on-face, the shotgun features an automatic safety and double triggers and the action appears to function well mechanically. (23A10270-1) {C&R} (700/900) Est. 700 - 900		1469	Smith & Wesson Model 66 U.S. Border Patrol 50th Year Commemorative Revolver serial #7K51667, 357 Magnum, 4" pinned stainless steel barrel with a bright excellent bore likely not fired since leaving the factory. The stainless steel surfaces rate excellent and the smooth Goncalo Alves target grips also rate excellent with an unobtrusive handling mark on the front of the left panel. The revolver features recessed chambers and a hard-chromed service hammer and service trigger and the barrel is sighted with a red ramp front and white outline micro-adjustable rear. The right side of the barrel is marked "1924-U.S. BORDER PATROL-1974", the sideplate features the badge of the U.S. Border Patrol and "USBP-0105" is on the left side of the frame above the triggerguard. Once a part of the collection of Smith & Wesson historian Roy Jinks, the revolver includes an original blue factory box properly end-labeled but not numbered to the gun showing a tear in the left and original invoice from Betts & Majors, Inc. of Dallas TX to the address of Roy Jinks and bearing his signature. Also included is the brown stained wooden presentation case lined with blue felt and marked on the lid with "U.S. / BORDER / PATROL" superimposed over the outline of the continental U.S. The presentation case comes in its protective box and is, along with the factory blue box, stored within the outer shipping box postmarked to January 1976 and addressed to Mr. Jinks from Betts & Majors, Inc. A great commemorative revolver tha will likely continue to appreciate in value. (23A10120-17) {MODERN}
	serial #211934, 12 ga., 26" "Vulcan Steel" barrels on a No. 1 1/2 frame choked improved cylinder and full with bright about excellent bores showing a small dent in the right barrel about 3 1/2" from the muzzle which is visible in the bore. The barrels retain about 96-97% original blue with a touch of light silvering at the muzzles, the aforementioned dent, some overall scattered tiny impact and light handling marks and a few small speckles of light oxidation. The triggerguard has aged to a gray-brown patina showing remnants of original blue while the frame retains about 70% original case-hardened colors with the balance toning to a gray patina with some scattered small specks of light oxidation or perhaps light pin-prick pitting, and a few light handling marks from the field. The barrels and forend are numbered to the frame. The checkered walnut capped pistolgrip stock and forend rate about good and very good, with a 1" chip at the toe, some light finish wear on the high edges of the cheeks and some overall light handling marks from honest use. There is a 1 1/3" chip at the toe of the dogs head hard rubber buttplate which provides a 14 1/4" length of pull while the stock has drops of 1 3/4" and 3" and there is an unengraved German silver monogram plate on the toeline. The metal surfaces of this 1860-manufactured Fourth Model revolver are toning to a gray-brown patina with scattered areas of softened light pitting and olight oxidation. The brass grip frame has aged to a warm goldenrod patina showing overall light-moderate handling marks and a generous amount of tarnished original silver plating in the protected areas of the triggerguad. The smooth walnut grip rat		1469	Smith & Wesson Model 66 U.S. Border Patrol 50th Year Commemorative Revolver serial #7K51667, 357 Magnum, 4" pinned stainless steel barrel with a bright excellent bore likely not fired since leaving the factory. The stainless steel surfaces rate excellent and the smooth Goncalo Alves target grips also rate excellent with an unobtrusive handling mark on the front of the left panel. The revolver features recessed chambers and a hard-chromed service hammer and service trigger and the barrel is sighted with a red ramp front and white outline micro-adjustable rear. The right side of the barrel is marked "1924-U.S. BORDER PATROL-1974", the sideplate features the badge of the U.S. Border Patrol and "USBP-0105" is on the left side of the frame above the triggerguard. Once a part of the collection of Smith & Wesson historian Roy Jinks, the revolver includes an original blue factory box properly end-labeled but not numbered to the gun showing a tear in the left and original invoice from Betts & Majors, Inc. of Dallas TX to the address of Roy Jinks and bearing his signature. Also included is the brown stained wooden presentation case lined with blue felt and marked on the lid with "U.S. / BORDER / PATROL" superimposed over the outline of the continental U.S. The presentation case comes in its protective box and is, along with the factory blue box, stored within the outer shipping box postmarked to January 1976 and addressed to Mr. Jinks from Betts & Majors, Inc. A great commemorative revolver tha will likely continue to appreciate in value. (23A10120-17) {MODERN}
	serial #211934, 12 ga., 26" "Vulcan Steel" barrels on a No. 1 1/2 frame choked improved cylinder and full with bright about excellent bores showing a small dent in the right barrel about 3 1/2" from the muzzle which is visible in the bore. The barrels retain about 96-97% original blue with a touch of light silvering at the muzzles, the aforementioned dent, some overall scattered tiny impact and light handling marks and a few small speckles of light oxidation. The triggerguard has aged to a gray-brown patina showing remnants of original blue while the frame retains about 70% original case-hardened colors with the balance toning to a gray patina with some scattered small specks of light oxidation or perhaps light pin-prick pitting, and a few light handling marks from the field. The barrels and forend are numbered to the frame. The checkered walnut capped pistolgrip stock and forend rate about good and very good, with a 1" chip at the toe, some light finish wear on the high edges of the cheeks and some overall light handling marks from honest use. There is a 1 1/3" chip at the toe of the dogs head hard rubber buttplate which provides a 14 1/4" length of pull while the stock has drops of 1 3/4" and 3" and there is an unergraved German silver monogram plate on the toeline. The barrels are sighted with a silver bead and lock up tightly and on-face, the shotgun features an automatic safety and double triggers and the action appears to function well mechanically. The stock is equipped with a checkered horn buttplate with minor insect damage and the stock is neatly stamped "Made in Germany" on the toe line. A wonderful compact rifle from this well respected manufacturer, sold by America's famous sporting goods retailer. (25A10223-32) {C&R}	1477	 operational mark and all markings remain intact and crisp. The grooved Asian hardwood grips are stamp-numbered to the gun, the right panel rating very good with some shallow chipping in the grooves and a moderate abrasion near the bottom while the left panel rates excellent. The firing pin extension is un-numbered, the remaining numbered parts are matching and the action seems to function well mechanically. One blue-bodied aluminum base magazine in near excellent condition and stamp-numbered matching the pistol is included. A solid late war Nambu pistol. (13A10196-17) {C&R} (600/800) Est. 600 - 800 French Model 1892 Double Action Revolver by St. Etienne serial #L27554, 8mm French Ordnance, 4 5/8" barrel with a bright excellent bore. The metal surfaces of this 1922-dated revolver retain about 95% original blue showing some mild high edge wear, a little bit of fine oxidation staining and thinning under bright light. The small parts retain a healthy amount of straw color with some light freckling and moderate silvering. Some of the screw heads show light slot wear and all markings remain intact and crisp. The checkered walnut grips remain in very good plus condition showing some lightly chipped points and minor dings. The lanyard ring is intact and the action seems to function well mechanically with solid timing and lock-up. A nice late-production example of these well-made French martial revolvers. (13A10219-15) (C&R) (600/800)

Title/Description Lot

1478	Early German P.27 Semi-Auto Pistol by CZ	1481	Harpers Ferry Model 1842 Percussion "Musketoon"
	serial #23561, 32 ACP, 3 7/8" barrel with a mostly bright very good bore		.71 cal., shortened 30 1/4" barrel with an oxidized bore. The metal
	showing a few patches of light pitting and oxidation and otherwise strong		surfaces have aged to a mottled dull gray patina with small spots of light
	rifling. The metal surfaces of this handsome pistol retain about 98%		pitting and light oxidation throughout which is more moderate on the
	original early high polished blue finish showing some light high edge wear and minor handling marks, some areas of the blue taking on a		buttplate. The brass barrel bands which are likely from a Prussian rifle-musket are toning to a warm mustard patina with the underside of
			the double-strapped band showing signs of modification to the fit the
	deep plum tone under bright light. The barrel remains mostly bright showing a little gray freckling, the other small parts retain fine straw		forend. Both the lockplate and breech tang are dated 1846 and all metal
	color with some mild silvering and the firing pin retainer shows pale fire		markings are correct, with the eagle head of the barrel proof partially
	blue. All markings remain intact and crisp, the right side frame showing		obscured by pitting, and there is a later-added "SC" in sans-serifed font
	slightly off-struck "(Eagle) / WaA76" Waffenamt, the other appropriate		on the top of the breech. The shortened American black walnut stock
	parts also marked with Waffenamts or eagle firing proofs. The		rates about very good as cleaned leaving the components proud of the
	checkered dark brown Bakelite grip remains in near excellent condition		wood along with a coat of added finish which is worn on the left side of
	showing a very small chip at the right toe. The only other minor apology		the buttstock; there are a few lengthy repaired cracks along the wood
	is that the sideplate screw head is broken and the hole shows some light		line and some scattered short cracks and overall dings and handling
	tool marks. All of the serialized parts are matching, one original		marks. The nose of the forend has been amateurishly-modified to
	magazine is included and the action seems to function well		accept the upper band which is held on by friction and the original lower
	mechanically. A lovely example for the martial collector, this pistol is		band spring inlet has been nicely-filled with wood showing a chip ahead
	earlier than the lowest number (267421) reported in Still's Axis Pistols		of the lower band which is held in place by an added screw. The sling
	book. (13A10212-34) {C&R} (600/800)		swivels are missing, a couple screws show minor slot damage, a

1521	U.S. Model 1884 Trapdoor Rifle by Springfield Armory serial #427351, 45-70 Govt., 32 5/8" barrel with a mostly bright very good plus bore showing a ring of light pitting a couple inches from the muzzle and otherwise strong rifling. The metal surfaces have aged to a mix of lightly-oxidized original blue and dark gray patina with a few scattered areas of light pitting, some more moderate oxidation around the thumbpiece and in the firing pin channel and a few tiny impact marks on the top of the 1873-dated breechblock. All metal markings remain clear aside from the serial number which is partially-obscured by light pitting. The American black walnut stock rates about very good to very good plus as lightly cleaned with an added finish and overall light dings and handling marks from the years and there is the remnant of a circled "P" firing proof behind the triggerguard. The sights are intact, a correct cleaning rod is stored beneath the barrel and the action is strong and crisp but will need mechanical attention as the firing pin is missing and the firing pin channel appears to have been filled-in. Included is an excellent-fitting "US" marked socket bayonet with 18" blade and retaining ring displaying a blend of original blue and gray patina with scattered spots of light pitting and fine handling marks. (23A10091-175) {ANTIQUE} [Chester Reginald Dunbar Collection] (500/700) Est: 500 - 700
1522	Lot is Withdrawn
	Lot is Withdrawn
1523	Winchester Model 1903 Semi-Auto Rifle serial #27706, 22 Automatic, 20" barrel with a very good, lightly pitted bore that has strong rifling throughout. The metal surfaces are mostly a blend of mottled brown and gray that is mixing with some light oxidation and some tool and impact marks. The walnut stocks rate about good and have been cleaned showing a few moderate cracks, repairs and filled holes. The swivel studs have been removed, the forend cap hole remains vacant. What could be the original front sight that is missing its bead remains, the rear sight is a sporting replacement. The action appears to function correctly and overall this would make a great plinker or candidate for restoration. (4A10135-10) {C&R} (500/700) Est. 500 - 700
1524	U.S. Model 1836 Percussion-Converted Pistol by Waters
	.54 cal., 8 1/2" smoothbore barrel with a lightly oxidized and pitted bore. This pistol has been converted to percussion using the cone method and features iron hardware. The metal surfaces show light cleaning and have toned to an overall even pewter showing old pitting and handling marks. The walnut stock has been lightly cleaned with later added finish and rates good to very good showing handling marks, a few are moderate, but most are light. The pistol has a swivel style ramrod and features a brass plug to replace the original pan. The lock remains crisp with the side marked "[eagle] / A.H. WATERS & Co. / MILLBURY MASS. / 1844", there is a small "S" in front of these markings, and the inspector mark "NB" is on the barrel opposite the nipple. A good example of a Model 1836. (&A10111-20) {ANTIQUE} (500/700) Est. 500 - 700
1525	Colt Model 1877 Lightning Double Action Revolver
	serial #32152, 38 Colt, 3 1/2" barrel with a partially oxidized and pitted bore. This 1882-manufactured revolver remains in fine condition with about 85% original nickel plate showing scattered oxidized pitting and flaking finish in addition to scattered fine bubbling and handling marks. The etched panel on the barrel remains strong with minor fading from oxidation staining. The hammer, trigger and base pin are mainly brown with freckling. The checkered hard rubber Rampant Colt grips show light wear to the diamond points at the butt end of each panel. Any numbers on the back of the grips are worn away and the frame is slightly proud of each panel along the triggerguard strap. This gun does not have an ejector rod housing and features a large knurled base pin head. The action functions mechanically although the trigger does not return by itself and needs professional attention. This gun has seen some honest use over the years but would be a fine addition to a collection. (8A9944-31) {ANTIQUE} [Frank Berry Collection] (500/700) Est. 500 - 700

1526	Smith & Wesson 38 Safety Hammerless Revolver with Original Box	1530	Quality Ivory-Handled Naval Dirk
	serial #244189, 38 S&W, 3 1/4" ribbed round barrel with a bright		This is a rather nice Naval Dirk with a lightly etched blade, turned
	excellent bore. The metal surfaces of this attractive fifth model revolver		antique ivory handle and gold washed ovoid guard. The blade itself is an
	retain about 98% excellent factory-quality restored blue with most of the		elongated hexagon in cross-section, measuring 6 1/2" overall with
	loss due to some scattered small areas of minor oxidation speckling		evidence of a very light cleaning, showing some remnants of its lightly
	along the barrel and gripstraps and perhaps a few small handling marks.		etched decoration, primarily now a silvery gunmetal patina with
	Some of the screw heads show light slot wear and the trigger shows		remnants of oxidation and light pitting. The ovoid guard shows foliate
	vibrant case-hardened colors. The revolver does not show a factory star		and acorn engraving around its periphery, surrounding a ropelike center,
	-		
	rework stamp and the only indication, however subtle, of refinishing is		this with strong gold gilt remaining, the grooved ferrule as well with
	the softened top edge of the S&W trade mark on the right side of the		strong gold wash. The turned antique ivory handle rates very fine
	frame. The remaining markings are crisp and the blue appears factory in		showing nice drying striations from age. The dirk includes its original
	every respect. The black checkered hard rubber grips remain in		leather sheath with brass mounts, the throat, mid-hanger and tip are
	excellent condition, the left panel is un-numbered and the right is		grooved brass showing a gilt wash, the exposed portions of leather very
	stamp-numbered matching. Barrel-to-frame fit is excellent and the action		good with only some light flaking. There are some minor dings in the

The checkered synthetic factory grips with Beretta logo rate excellent. This pistol is equipped with three dot sights, ambidextrous slide mount safety / de-cockers, and functions mechanically. The pistol includes a factory hard case with shipping sleeve that is correctly end labeled and numbered to the gun, a pair of ten-round factory magazines, manual and paperwork. This gun appears to have seen little if any use. (8A10194-45) (MODERN) (500/700) Est. 500 - 700 Savage Model 1917 Semi-Auto Pistol serial #163718, 380 ACP, 4 1/4" barrel with an excellent bore. The metal surfaces retain about 99% original satin blue finish showing limited light edge wear, a tiny stray oxidation blemish, and handling marks. The trigger retains muted case-hardened colors, and the hammer has full blue. The checkered hard rubber factory grips with Savage logo rate excellent with a few light handling marks. The pistol functions mechanically and includes a single nine-round factory magazine. An excellent example of a Model 1917. (8A10181-1) {C&R} (600/800) Est. 600 - 800 Colt Model 1903 Pocket Semi-Auto Pistol serial #33689, 32 ACP, 3 3/4" barrel with a lightly frosted bore. The metal surfaces of this fine pistol retain about 97% original blue finish showing light thinning on the backstrap, high edge wear, scattered pitting on the slide and a few handling marks. The checkered hard
	numbered to the gun, Allen wrenches, manual, and paperwork. This gun appears to have seen only light use and should be a great find for the "lefty" looking for a Free Style pistol ready to shoot. (8A10166-6) (MODERN} (500/700) Est. 500 - 700 Belgian Single Shot Gallery Pistol by Mariette 6mm Flobert, 6 1/2" smoothbore octagon barrel with a mostly bright bore showing some scattered very fine pinprick pitting. The barrel of this pistol retains about 75% original bright blue flaking to a pleasant gray-brown patina along with scattered spots of light oxidation staining and handling marks. The remaining metal surfaces are mostly a bright silvery gunmetal showing scattered freckling, small spots of light oxidation staining and handling marks. The screw heads show some light slot wear and the frame with its integral hooked triggerguard is tastefully embellished with very nice quality foliate scrollwork. The protected corners of the trigger and breechblock also retain some faint remnants of straw color. The checkered walnut grips remain in near excellent condition showing a few small dings mostly along the right panel. The pistol is sighted with a fine u-notch rear sight and silver bead front, sear engagement is somewhat weak but the action generally seems to function well. Really a rather handsome Flobert pistol for the antique arms collector. (13A9686-10) {ANTIQUE} (500/700) Est. 500 - 700 Colt Thuer Third Model Deringer serial #33281, 41 Rimfire, 2 1/2" barrel with scattered light pitting and strong rifling throughout. This fine Third Model retains perhaps 96% original nickel plate on the metal surfaces showing scattered light oxidation blemishes, the frame showing light edge wear at the standing breech and handling marks. The hammer and trigger are gray with a few wisps of color on the back of the hammer spur. The smooth rosewood factory grips are pencil numbered to the gun and rate very good as lightly cleaned and varished showing handling wear and a tiny chip on the backstrap of the left panel. The action is cris	1534	 serial #BER368012, 9mm, 5" barrel with an excellent bore. The pistol has an olive drab colored finish that was only offered during 2004, the metal surfaces retaining about 99% plus of this original finish. The checkered synthetic factory grips with Beretta logo rate excellent. This pistol is equipped with three dot sights, ambidextrous slide mount safety / de-cockers, and functions mechanically. The pistol includes a factory hard case with shipping sleeve that is correctly end labeled and numbered to the gun, a pair of ten-round factory magazines, manual and paperwork. This gun appears to have seen little if any use. (8A10194-45) (MODERN) (500/700) Est. 500 - 700 Savage Model 1917 Semi-Auto Pistol serial #163718, 380 ACP, 4 1/4" barrel with an excellent bore. The metal surfaces retain about 99% original satin blue finish showing limited light edge wear, a tiny stray oxidation blemish, and handling marks. The trigger retains muted case-hardened colors, and the hammer has full blue. The checkered hard rubber factory grips with Savage logo rate excellent with a few light handling marks. The pistol functions mechanically and includes a single nine-round factory magazine. An excellent example of a Model 1917. (8A10181-1) {C&R} (600/800) Est. 600 - 800 Colt Model 1903 Pocket Semi-Auto Pistol serial #38689, 32 ACP, 3 3/4" barrel with a lightly frosted bore. The metal surfaces of this fine pistol retain about 97% original blue finish showing light thinning on the backstrap, high edge wear, scattered pitting on the slide and a few handling marks. The checkered hard rubber factory grips with Satight banner rate excellent. This 1920-manufactured type III pistol functions mechanically and includes a single factory marked two-tone magazine. This pistol has seen light but honest use and remains in excellent condition. (8A10196-15) {C&R} (600/800)
	numbered to the gun, Allen wrenches, manual, and paperwork. This gun appears to have seen only light use and should be a great find for the "lefty" looking for a Free Style pistol ready to shoot. (8A10166-6) (MODERN} (500/700) Est. 500 - 700 Belgian Single Shot Gallery Pistol by Mariette 6mm Flobert, 6 1/2" smoothbore octagon barrel with a mostly bright bore showing some scattered very fine pinprick pitting. The barrel of this pistol retains about 75% original bright blue flaking to a pleasant gray-brown patina along with scattered spots of light oxidation staining and handling marks. The remaining metal surfaces are mostly a bright silvery gunmetal showing scattered freckling, small spots of light oxidation staining and handling marks. The screw heads show some light slot wear and the frame with its integral hooked triggerguard is tastefully embellished with very nice quality foliate scrollwork. The protected corners of the trigger and breechblock also retain some faint remnants of straw color. The checkered walnut grips remain in near excellent condition showing a few small dings mostly along the right panel. The pistol is sighted with a fine u-notch rear sight and silver bead front, sear engagement is somewhat weak but the action generally seems to function well. Really a rather handsome Flobert pistol for the antique arms collector. (13A9686-10) (ANTIQUE) (500/700) Est. 500 - 700 Colt Thuer Third Model Deringer serial #33281, 41 Rimfire, 2 1/2" barrel with scattered light pitting and strong rifling throughout. 		1		

1564	Peruvian Model 1909 Bolt Action Rifle by Mauser Oberndorf serial #26350, 7.65 Argentine, 29" barrel with a bright excellent bore. The gunmetal receiver is in very good plus condition with traces of fine piprick pitting and two small spots of light pitting, the gunmetal bolt showing hints of gray freckling and light oxidation staining. The bottom metal and barrel bands retain about 98% excellent quality arsenal reapplied blue with a very small abrasion on the upper barrel band, very light freckling on the magazine floorplate when viewed under direct light, and a light handling mark or two. The remaining metal surfaces retain about 97-98% original blue with a few small spots of pinprick pitting, light wear at the muzzle, and a few minor handling marks; the bolt stop retains about 60% fire blue. The pistolgrip walnut stock is in very good plus to near excellent condition as lightly cleaned with a few scattered light handling marks and the steel buttplate is slightly proud at the toe. The stock is marked with a conjoined "M / W" behind the triggerguard, Peruvian inspection stamps on the toe line and right side of the butt, a softened but still easily legible Mauser banner, and is serialized and matching to the stock. The Peruvian national crest remains crips above "MAUSER ORIGINAL", as do the other factory markings, and the bolt stop, rear sight, and bottom metal are numbered to the rifle; the bolt is numbered to a different rifle. The rifle retains the standard Lange Vizier rear sight and barleycorn front sight, and appears to function well mechanically. An attractive example of these Peruvian contract rifles. (14A10212-14) {C&R} (600/800) Est. 600 - 800	1567	Swedish Model 1896 Bolt Action Target Rifle by Carl Gustafs serial #226124, 6.5x55 Swedish, 29" barrel with a bright excellent bore. The metal surfaces retain about 92% arsenal blue finish with silvering on the high edges, light wear and thinning on the bottom metal, and scattered handling and wear marks on the barrel; the bolt stop and metal to the rear of the barrel bands have been largely cleaned to bright showing generous remnants of fire blue. The bare steel bolt is in very good plus condition with a few traces of gray freckling. The European hardwood stock is in very good plus condition with scattered light dings and handling marks consistent with military service, and the remnants of a flaking varnish is present on the right side of the butt, centered around 4 small holes which show where a square plate once sat. The stock is marked with two small "(crown)" profis behind the triggerguard and retains the brass disk on the right side, denoting a bore condition of "1"; the steel buttplate is bright and shows scattered minor dings from use. The factory markings remain crisp, the receiver dated "1908", all numbered parts are matching to the rifle, and the underside of the barrel is import marked by Samco. The rifle is sighted with a Söderin micrometer diopter target rear sight, the adjustments for which appear to remain functional, and a globe-style front sight with globe insert; the standard tangent rear sight has been removed. Included with the rifle is a cleaning rod showing light oxidation staining. A Model 1896 target rifle that will likely fit equally well in a collection or on the range. (14A10205-13) (C&R) (600/800) Est. 600 - 800

1570	Winchester Model 94 Lever Action Carbine serial #2254087, 30-30 Win, 20" barrel with a bright excellent bore. The metal surfaces of this 1957-made carbine retain about 97-98% original blue with some light silvering of the high edges, a touch of light wear at the muzzle and on the barrel band, and a some scattered freckling on the receiver. The smooth walnut stock and forend are in excellent condition with only a minor handling mark or two, and the checkered steel buttplate has a hint of silvering at the toe. The factory Winchester markings remain crisp. The carbine is sighted with a hooded ramped silver bead front sight and a sporting-style rear sight, and the carbine appears to function well mechanically. A fine Winchester Model 94 carbine. (14A10082-71) {C&R} (600/800) Est. 600 - 800 German Kar.98a Bolt Action Rifle by Erfurt serial #6a, 8mm Mauser, 23 1/2" barrel with a bright excellent bore with a few specks of oxidation near the muzzle. The metal surfaces have a mottled gray patina with light wear on the high edges and contact points, scattered pinprick pitting and oxidation staining, and light handling marks; scattered remnants of arsenal blue are present on the receiver and the lower barrel band retains about 85% arsenal blue with light wear and a moderate ding on the underside. The bolt body and follower are bright with scattered spots of light pitting, and the bolt shroud shows remnants of arsenal blue. The pistolgrip walnut stock is in very good condition with a small divot on the left side of the wrist, some light abrasions on the forend from band removal, and overall scattered light dings and handling marks consistent with military service; the handguard shows three pairs of plugged repairs and the buttplate is proud at the toe. This first variation stock has been modified with an added left side	1574	Hungarian Reworked K98k Bolt Action Rifle by J.P. Sauer 8mm Mauser, 24" barrel with a dark good lightly pitted bore with a bulge just behindthe muzzle and evident rifling throughout. The metal surfaces retain about 85-90% thinning arsenal reapplied blue with some light wear on the high edges and contact points, scattered oxidation staining with the greatest concentration on the solid milled upper barrel band, scattered previous pinprick pitting beneath the finish, and light handling marks. The laminated hardwood stock is in very good condition as perhaps lightly cleaned at the arsenal with two light divots on the tip of the comb, a light abrasion on the underside of the forend, and a few light handling marks. The stock is marked with a faint illegible waffenamt on the right side below the stock disc and an unknown Hungarian marking resembling a circled "(inverted Y) / B" on the left side of the stock ahead of the buttplate. The receiver ring has been scrubbed leaving only the ghost of the original "1940" date and traces of the "147" coding, the rear sight base is marked with "359" waffenamts, the bottom metal with two faded "211" waffenamts, and all numbered parts are mismatched though all parts of the bolt assembly are matching each other; the buttplate is deeply stamped "R21546". A sling swivel has been arsenal added to the underside of the lower barrel band. The rifle retains the original open sights and appears to function well mechanically. An interesting K98k showing modifications and markings also found on Hungarian rifles of the period. (14A10218-37) {C&R} (600/800) Est. 600 - 800 Japanese Type 99 Bolt Action Rifle by Toyo Kogyo serial #22626, 7.7 Arisaka, 25 1/2" barrel with a bright excellent bore. The metal surfaces of this 31ts series rifle retain about 85% arsenal blue
	toe. This first variation stock has been modified with an added left side sling bar, is marked with softened German "(crown) / P" and "(crown) / W" proofs behind the triggerguard, on the toeline, and on the right side of the butt, and the stock is numbered "3078". The "(crown) / ERFURT / 1917" on the receiver remains largely crisp, the German proofs and model markings on the receiver having softened and faded but remain largely identifiable, the bolt assembly, bolt stop, bottom metal, follower, rear and front sights are numbered "6", and the upper barrel band is numbered "99". The rifle retains the standard open sights, the follower has been modified to remove the bolt hold-open feature, and the rifle appears to function well mechanically. A solid Kar.98a rifle possibly modified for use in the Spanish Civil War. (14A10229-25) {C&R} (600/800) Est. 600 - 800		The metal surfaces of this 31st series rifle retain about 85% arsenal blue with general light oxidation staining on the receiver and barrel, light oxidation in the front sight ears, a light brown patina on the barrel bands, and some scattered light handling marks. The Asian hardwood stock is in very good condition with light to moderate divots on the toe and forend, a chip against the side of the magazine floorplate, and scattered handling marks consistent with field use; the stock is marked with a Japanese character behind the lower tang, which has softened and is largely illegible. The receiver markings remain wonderfully crisp, the chrysanthemum is fully intact and unmolested, the nosecap is numbered to the rifle, and the bolt body, safety knob, and dust cover are numbered to a different rifle (but match each other). Rifles with intact Chrysanthemums often have mismatched bolts and dust covers, as standard practice with captured rifles was to remove the bolt to render
1572	Japanese Type 99 Bolt Action Rifle by Tokyo Juki Kogyo serial #28302, 7.7 Arisaka, 25 1/2" barrel with a bright excellent bore. The metal surfaces of this 37th series rifle retain about 90% original blue with the magazine floorplate and follower cleaned to bright, light oxidation staining on the triggerguard and lower barrel band, light wear marks on the barrel, and a few light handling marks; an abrasion is present beneath the lower band screw. The pistolgrip Asian hardwood stock is in very good plus condition with some scattered light abrasions and handling marks, and the stock splice is beginning to separate; the stock appears unmarked. The receiver is marked with a crisp, entirely unmolested Chrysanthemum, the arsenal markings, and serial number remain crisp, and the bolt assembly is numbered to the rifle. The rifle features intact aircraft sights and included is an unnumbered cleaning rod; the rifle appears to function well mechanically. An attractive Type 99 with the Chrysanthemum intact. (14A9670-550) {C&R} [David & Lore Squier Collection] (500/700) Est. 500 - 700 Japanese Type 99 Bolt Action Rifle by Toyo Kogyo serial #60001, 7.7 Arisaka, 25 1/2" barrel with a bright near excellent bore with scattered pinprick pitting. The metal surfaces of this 30th series rifle retain about #5% arsenal blue with light oxidation staining.	1576	them safe. The rifle retains the monopod, which locks in place securely, and aircraft sights, the sliding base of which is bent slightly beneath the aperture. A very nice example of the Type 99 rifle, with the standard features intact. (14A10260-3) {C&R} (600/800) Est. 600 - 800 Winchester Model 94 Lever Action Carbine serial #1252183, 32 W.S., 20" barrel with a bright excellent bore. The metal surfaces retain about 70% original blue with moderate wear on the receiver and barrel bands, light wear on the lever, barrel, and full magazine tube, scattered light oxidation staining, and a few light handling marks. The smooth walnut stock and long forend are in very good to very good plus condition with scattered light flaking of the finish on the buttstock and a few light handling marks, and the corrugated steel buttplate shows light oxidation staining. The carbine is sighted with a ramped bead front sight and a folding white diamond u-notch rear sight, and the carbine appears to function well mechanically. A hunted 1940-made Winchester carbine that should still serve well in the deer woods. (14A10216-43) {C&R} (600/800)
	series rifle retain about 85% arsenal blue with light oxidation staining and spots of old oxidation, light operational wear on the bolt, and some light handling marks; the extractor shows some previous pinprick pitting beneath the finish. The pistolgrip Asian hardwood stock is in very good condition with scattered light dings and handling marks throughout, consistent with military service, and the stock shows no legible markings. The receiver markings all remain crisp, including the intact and unmolested Chrysanthemum, the bayonet lug is numbered to the rifle, and the bolt handle and safety knob are numbered to a different rifle. The arm retains the aircraft sights and an unnumbered cleaning rod is included; the rifle appears to function well mechanically. A solid Type 99 that managed to escape defacing. (14A10229-14) {C&R} (500/700) Est. 500 - 700	1577	Winchester Model 55 Lever Action Takedown Rifle serial #4771, 32 W.S., 24" round tapered barrel with a bright excellent bore. The receiver and lever have a lightly oxidized brown patina with undertones of gunmetal gray, remnants of blue in the protected areas, and moderate wear at the rear of the receiver; the loading gate retains strong blue with specks of oxidation staining. The barrel, magazine, and forend cap retain about 70% original blue with overall light oxidation staining, scattered wear to gun metal forward of the rear sight, light wear on the forend cap, and scattered specks of old oxidation and minor handling marks. The smooth walnut stock and forend are in near excellent condition with a few light handling marks, and the checkered steel buttplate shows a few spots of light oxidation. The factory Winchester markings on the barrel, frame, and upper tang remain clear and easily legible. The forward upper tang screw appears to be a common hardware replacement, the takedown feature functions correctly, and the rifle is sighted with a Lyman brass bead front sight and a Marble's semi-buckhorn sporting-style rear sight. A 1926-manufactured rifle that should still perform well today. (14A10223-28) (C&R) (600/800) Est. 600 - 800

Lot Title/Description

1669 Browning Hi-Power T-Series Semi-Auto Pistol serial #T175593, 9mm, 4 5/8" barrel with a bright, excellent bore. The metal surfaces on this Belgian-made pistol retain about 98-99% original high polish blue finish with some scattered light handling marks and very light operational wear. The checkered walnut grips are about excellent and have a few light handling marks as well, the right panel has a few lightly flattened points. This 1967-vintage T-Series Hi-Power features fixed sights, a ring hammer and an external extractor. The pistol comes with a gold-zipper Browning rug and a single unmarked magazine. (4A10218-14) {C&R} (800/1200) Est. 800 - 1,200 Browning BDA Double Action Semi-Auto Pistol 1670 serial #395RP5103, 45 ACP, 4 1/4" barrel with an excellent bore. The slide retains about 99% original polished and matte blue finish with only a few light handling marks and is stamped "Sig-Sauer System / Made in W. Germany" on the right side of the slide and "Browning Arms Co / Morgan, Utah & Montreal P.Q." on the left. The anodized frame retains about 99% original finish with a few light marks from operation, the hammer has toned to plum. The checkered synthetic grips rate excellent, the top of the right panel is marked "BROWNING". This 1978-made pistol is equipped with Von Stavenhagen sights, a heel mag release and a decocker, the design mimics the famous Sig Sauer P220. A single ".45 AUTO" marked magazine with slight signs of operational use, the manuals, and the original correctly labeled factory box in about good condition with torn end flaps, scuffs, and frayed edges and corners, are included. An excellent example of these early collaboration pistols made by SIG for Browning. (4A10218-25) {MODERN} (700/900) Est. 700 - 900 Heckler & Koch USP 45 Compact Semi-Auto Pistol Part of a 1671 Consecutively-Numbered Trio serial #29-000267, 45 ACP, 3 3/4" barrel with a pristine bore. The metal surfaces of this new-in-box pistol retain 99% plus original Hostile Environment finish while the textured black polymer frame rates as-new. This Variant 1 pistol features a right side decocking safety, ambidextrous magazine release and white three-dot sights. Included are two factory 8-round magazines, gray factory hardcase, manual and paperwork. This high quality new-in-box pistol is consecutively numbered with the next two lots. (23A10218-10) {MODERN} (700/900) Est. 700 - 900 1672 Heckler & Koch USP 45 Compact Semi-Auto Pistol Part of a Consecutively-Numbered Trio serial #29-000268, 45 ACP, 3 3/4" barrel with a pristine bore. The metal surfaces of this new-in-box "old dealer-stock" pistol retain 99% plus original Hostile Environment finish while the textured black polymer frame rates as-new. The pistol features the V1 right side decocking safety, white three-dot sights and an ambidextrous magazine release. The pistol includes two factory 8-round magazines, gray factory hardcase, two 8-round magazines, manual and paperwork. Rarely do you find three consecutively-numbered pistols making this an excellent opportunity for the high-end H&K collector. (23A10218-12) {MODERN} (700/900) Est. 700 - 900 1673 Heckler & Koch USP 45 Compact Semi-Auto Pistol Part of a Consecutively-Numbered Trio serial #29-000269, 45 ACP, 3 3/4" barrel with a pristine bore. As new-in-box, the slide and barrel retain 99% plus original Hostile Environment finish and the textured polymer frame rates as-new. The pistol is equipped with white three-dot sights, ambidextrous magazine release and the Variant 1 right side decocking safety lever. Two 8-round factory magazines, gray factory hardcase, manual and paperwork. This is a dealer-stock example of these exceptionally-accurate pistols and is consecutively-numbered with the previous two lots. (23A10218-11) {MODERN} (700/900) Est. 700 - 900

	1674	Heckler & Koch USP 40 Expert Semi-Auto Target Pistol
		serial #22-076266, 40 S&W, 5 1/8" barrel with a bright excellent bore.
		Heckler & Koch's goal for the USP Expert was to create "one of the
		world's best target pistols" and they accordingly sought design input
		from both nationally and internationally renowned target shooters. The
		metal surfaces of this hand-fit pistol retain about 98% original matte
		black finish with some light operational wear on the barrel while the
		highly-textured glass fiber reenforced polyamide frame with accessory
		rail rates as-new. The pistol is equipped with a black blade front sight
		and adjustable LPA micrometer rear sight, target trigger with trigger
		stop, ambidextrous safety levers and magazine release and comes with
		an optional "jet funnel" to aid in rapid reloads. Included with the pistol is
		a H&K-branded padded sage green Cordura case lined with Velcro loop
		material to accept the following removable Cordura pouches: three
		magazine pouches, a utility pouch, internal holster for the pistol. Also
		included are three factory 13-round magazines, spare O-rings for the
		accurized barrel, optional shortened hammer for IPSC competition with
		instructions, fired case, cable lock and keys. A like-new example of
		these highly-accurate pistols with some nice accessories. (23A10218-6)
