Lot Title/Description

Very Fine Smith & Wesson No. 1 Second Issue Revolver with Lovely Superb Smith & Wesson Commercial Model 1917 Double Action Gutta-Percha Case Presented to New York Mathematician Daniel W. Revolver with Original Box serial #181852, 45 ACP, 5 1/2" barrel with a bright excellent bore. The Fish serial #14038, 22 RF, 3 3/16" ribbed octagon barrel with a bright near metal surfaces of this wonderful revolver retain 99% original rich blue excellent bore. The barrel, ejector spud and cylinder of this handsome finish showing just a hint of faint operational wear on the cylinder and a revolver retain about 96-97% original bright blue showing some sparsely few errant tiny freckles along the backstrap. The hammer and grooved scattered small areas flaking to gray-brown patina and a couple tiny trigger retain all of their robust case-hardened colors, the lanyard ring freckles here and there. The cylinder stop shows good flaking fire blue with attractive smoky colors and all markings remain crisp and clear. while the hammer and trigger are a smoky case-hardened patina. The The checkered walnut Magna grips with silver S&W medallions remain frame is essentially as-new retaining about 99% original silver finish that in excellent condition with crisp points. Strangely the number on the is taking on a wonderful patina overall, the sideplate very finely inside of the right panel has been removed but their fit to the frame is engraved "D.W. Fish, / Rochester, / N.Y." and the right side frame "From excellent and the remaining numbered parts are all matching. The action a friend / 1860". The smooth rosewood grips remain in excellent is a little sluggish from old preservative still in the action but otherwise condition retaining about 98% original varnish, the only minor apology seems to function well mechanically. The original dark purple being two small dents at the heel of the left panel. The right panel is paper-covered box is included and remains in very fine condition appropriately stamp-numbered matching the frame and the barrel and showing some light flaking along the corners and some specks of white cylinder are matching by assembly number. Barrel-to-frame fit is paint transfer along one end. The green end label rates near excellent excellent and the action seems to function well mechanically. The showing just a couple tiny flakes, the cleaning leaflet is included inside included black gutta-percha case is equally as-nice showing molded the box and the bottom is grease-penciled matching the revolver. A image of a No. 1 revolver on the lid and crisp detailing. There are a few lovely investment-quality 1917 commercial revolver. (13B10000-97) {C&R} [Roy Jinks Family Collection] (3000/4000) scattered light handling marks and a couple of very small thin cracks forming at the forward lip of the lid and on the bottom near the right Est. 3,000 - 4,000 Remington No. 2 Rolling Block Prize Rifle with Presentation clasp but these are very unobtrusive. The purple baize lid interior shows 4 a couple spots of minor discoloration as does the red baize bottom serial #H43424, 22 Long, 26" octagon barrel with a mostly bright very good plus bore showing a few small areas of light pitting and oxidation material, there is a bit of material loss to the barrel rest and top corner of with otherwise strong rifling throughout. This is a handsome rifle with the cartridge block, again extremely minor. Also included are three original arithmetic instruction books by Mr. Fish: Progressive Practical inlaid silver presentation plate neatly inscribed "Won by / JACOB Arithmetic from 1879, and two copies of Progressive Primary Arithmetic, EHRLICH / Individual Schoolboy Champion / of Greater New York / one from 1875 and the other from 1881. The books show rather heavy Awarded by the / Union Metallic Cartridge Co. / 1909". The barrel retains use with flaking and small tears along the exteriors and scribblings about 90% original blue with loss due to areas along the forward edges throughout the inside covers. Most, or all, of the pages are intact with toning to brown along with some scattered small patches of minor good print. Further research indicates Daniel W. Fish was born in 1820 pinprick pitting. The action retains a similar amount of strong and passed away on September 4, 1899. A lovely ensemble for the case-hardened colors that are muting slightly overall to a smoky tone advanced Smith & Wesson collector. (13C10000-3) {ANTIQUE} [Roy along with a little gray-brown speckling here and there. The screws and Jinks Family Collection] (3500/5000) small action parts retain about 95% original bright blue, the breechblock Est. 3,500 - 5,000 spur with some very light pitting and all markings remain intact and Excellent Smith & Wesson Third Model 22 Ladysmith Revolver with Box strong. The smooth walnut buttstock and schnabel forend with ebony serial #24171, 22 RF, 2 1/4" barrel with a bright excellent bore. This is a forend tip remain in near excellent condition, retaining most of their lovely revolver with its original box and scarce short barrel. The metal original varnish, showing some scattered very tiny dings, minor handling surfaces retain about 99% original nickel finish showing some scattered marks and a couple tiny drying cracks at the forend tip. The wood is of light handling marks, a few sparse freckles along the cylinder and a few higher deluxe grade showing lovely figure throughout and the silver areas of subtle clouding. There is a small area of very thin scratches on presentation plate shows a pleasant mild patina. Strangely the barrel is the left side frame that would hardly be worth the mention if it were not numbered "41216" and is otherwise sighted with standard sporting rear for the fine condition of the arm. The cylinder release retains about 98% and Marble's Sheard front sights. The action seems to function well original bright blue while the hammer and trigger show strong vibrant mechanically and this rifle is pictured and described on page 276 of case-hardened colors throughout, muting very slightly on the hammer. Marcot's Remington Rolling Block Rifles book. Preliminary research All markings remain crisp and clear, the address and patent dates does not come up with any information regarding Ehrlich but further properly stamped along the right side of the barrel. The smooth walnut in-depth research may prove interesting. An interesting and very grips with gold S&W medallions remain in near excellent condition handsome example, with a lovely and very rarely seen presentation. retaining 95% original varnish showing a little wear and a few shallow (13B9670-123) {C&R} [David & Lore Squier Collection] (2000/3000) dings near the bottom edges. The right panel is appropriately Est. 2,000 - 3,000 pencil-numbered to the gun, the remaining serialized parts are also Fine Remington Hepburn No. 3 Sporting Rifle 5 serial #138, 40-50 Sharps Straight (40 1 7/8), 28" part round part matching and the action seems to function well mechanically. The pale brown paper-covered box remains in about very good plus condition octagon barrel with a bright very fine bore showing a few small patches of oxidation, a bit more noticeable nearer the muzzle, and otherwise showing some small tears along the edges of the lid and other light handling marks. The internal sides of the box show a loose end and one crisp rifling throughout. The barrel of this early rifle retains about 95% piece broken off with intact internal labels. The correct end label is also plus original blue showing some scattered mild thinning to gray-brown, a intact showing a few small flakes and any serial number on the base has few errant freckles and handling marks. The barrel shows crisp E. been lost to the years. A wonderful Ladysmith revolver for the Smith & Remington & Sons address and caliber designation. The action retains a Wesson collector. (13B10000-70) {C&R} [Roy Jinks Family Collection] similar amount of lovely vibrant case-hardened colors with some (2500/3500) speckling and muting along the tangs and a little oxidation staining on Est. 2,500 - 3,500 the right side near the breechblock. The breechblock itself shows a patch of light pitting and moderate oxidation on its top surface with otherwise strong bright blue, and the trigger and hammer retain a healthy amount of brilliant fire blue. Both the buttplate and steel schnabel forend tip also show generous vibrant colors throughout with some old oxidation. The checkered walnut round knob pistolgrip buttstock and smooth forend remain in excellent condition with strong oil finish and showing just a few small dings and handling marks here and there. Stock fit is excellent throughout and the buttstock shows some rather nice subtle grain figure. The rifle is sighted with Remington combination peep rear sight (often seen on earlier rolling block sporting rifles) and Beach combination front sight that still retains most of its original gold wash and fire blue finishes. The action seems to function well mechanically. This rifle is pictured and described on pages 32 and 33 of Remington's No. 3 Hepburn by Rowe. A lovely early Hepburn rifle for the Remington collector. (13C9790-76) {ANTIQUE} [Bob Borcherdt Collection1 (4000/6000)

Lot Title/Description

Winchester Model 1895 Flatside Lever Action Rifle Very Fine Winchester Model 1894 Deluxe Lever Action Rifle 13 15 serial #4559, 38-72 WCF, 26" round barrel with a bright very good plus serial #183382, 38-55, 26" octagon barrel with full magazine and a bore showing some light frosting and pinprick pitting scattered about bright excellent bore. The barrel and magazine tube of this wonderful with otherwise crisp rifling throughout. The barrel of this attractive early deluxe rifle retain about 97% original blue showing some mild edge wear rifle retains about 70% original blue appearing stronger under ambient and a few small areas thinning slightly to gray. There is one thin 3/8" old light with some scattered light handling marks, a few small specks of old ding on the right flat about 5" ahead of the nosecap. The action retains oxidation staining and overall toning to a nice gray-brown patina. The about 95% original bright blue with some mild edge wear and most of rear sight and front sight base both retain strong original bright blue and the loss along the bottom metal which is thinning slightly to a mild gray the barrel markings remain completely intact and strong. The action patina. The nosecap also retains about 95% bright blue, the bolt about retains perhaps 50% original bright blue flaking and toning to a mix of 99% bright blue and the extractor and loading gate show strong brilliant mild gray and gray-brown patina along with a little brown speckling and fire blue. The hammer and lever show vibrant case-hardened colors some very thin old scratches along the left side. The magazine retains throughout, the lever with some old, hardened preservative and the about 75% original rust blue taking on a similar patina as the barrel. The exposed edge toning to a bright silvery case-hardened patina. All hammer and lever linkage show generous smoky mottled blue-gray, the appropriate markings remain intact and crisp. The checkered capped extractor retains some subtle fire blue and the buttplate is a nice silvery pistolgrip deluxe walnut buttstock and forend remain in near excellent case-hardened patina. The smooth walnut buttstock and schnabel condition retaining about 95% original varnish which shows a little bit of forend with ebony tip insert remain in very good plus to very fine scattered mild flaking, mostly at the heel, along with a little crazing along condition retaining a lovely honest appearance showing perhaps a little the left side forend, some scattered very light dings and a very thin 2' bit of old period oil finish and the expected scattered light dings. The scratch on the left side near the toe that does not breach the finish. Both buttstock shows a very small chip at the lower right corner where it stock and forend show lovely grain figure throughout, the forend with meets the frame and two small dents on the right edge behind the lower some very fine feathercrotch figure, and the hard rubber pistolgrip cap tang, but these are guite unobtrusive and stock fit remains otherwise and shotgun buttplate are excellent. The forend shows a very thin gap at superb overall. The original sporting rear sight and small German silver the nosecap but it is unobtrusive and due to very minor shrinkage. Strangely, the assembly numbers are mismatched "16855 XX" on the blade front sight are intact and the action seems to function well inside lower tang and "9251 94" inside the buttstock inlet. The buttstock mechanically. These flatside rifles are a desirable addition to any Winchester collection and are seldom seen with any condition. fit is absolutely perfect and it has clearly been with this rifle forever. The (13C10249-30) {ANTIQUE} (3000/4000) rifle is listed in the records as a checkered pistolgrip rifle with shotgun Est. 3.000 - 4.000 rubber buttplate, octagon and in 38-55. It was received in the warehouse Fine Winchester Model 1873 Semi-Deluxe Lever Action Rifle 14 on 8-18-03 and shipped on the 20th. The rifle is sighted with standard serial #232439B, 38 WCF, 24" octagon barrel with full magazine and a sporting rear sight, small German silver blade front, and the action bright very good plus bore showing some scattered areas of light pitting functions well mechanically. A lovely, high condition deluxe rifle for the and otherwise strong rifling throughout. This is a very handsome Winchester collector. (13D10249-19) {C&R} (5000/7000) 1888-made rifle, special-ordered with smooth XX stocks. The barrel and Est. 5,000 - 7,000 magazine retain about 85% original blue appearing very strong in 16 Winchester Model 1894 Special Order Deluxe Takedown Rifle ambient light, toning to a pleasant plum-brown patina under bright light serial #138312, 30 WCF, 24" round barrel with half magazine and a very with high edge wear and some sparsely scattered old oxidation staining. good bore showing some fine pinprick pitting and light oxidation in the The action retains a similar amount of original bright blue showing some grooves with otherwise strong rifling throughout. This is an attractive thin striations along the sides, toning to plum-brown patina, light special order takedown rifle made in 1902 featuring deluxe "XXXX" handling marks and a few spots of minor oxidation staining. The wood and what appear to be factory swivel eyes. The barrel and hammer and lever show generous vibrant case-hardened colors with magazine retain about 80% original blue, quite strong under ambient muting to gray along the lever and the rear of the lever with a few small light with overall thinning and toning to a pleasant gray-brown patina, spots of moderate oxidation. The nosecap retains strong bright blue, the light handling marks and a few sparsely scattered tiny areas of pinprick buttplate is a mix of smoky gray case-hardening and plum-brown and pitting that appear to have been touched-up slightly very long ago. The the loading gate shows some nice subtle fire blue. The cartridge lifter takedown boss has mostly toned to pewter showing an area of shallow has toned to ocher and retains crisp cartridge designation, the left frame dings along the right side, and the nosecap retains a healthy amount of screw heads show a little slot wear and the remaining markings are original bright blue. The action retains perhaps 65-70% original bright intact and strong. The smooth deluxe walnut stocks remain in very fine blue showing moderate edge wear, scattered handling marks and toning condition retaining generous original varnish and showing some nice to pewter gunmetal while the bolt retains about 90% original bright blue. raised grain along with some areas darkened somewhat from the years, The lever is mostly an attractive silvery case-hardened patina with some a few small dings and light handling marks. The grain figure is actually generous vibrant colors along the sides, the hammer also showing rather subtle but attractive, the forend showing some handsome tiger strong vibrant colors, and the loading gate and extractor retain fine fire blue. All markings remain intact and strong. The checkered capped striping, the left side of the butt is rather plain and the right side exhibits some nice striping. Stock fit remains excellent and the assembly pistolgrip deluxe walnut buttstock and forend remain in very fine numbers are matching with "3 XX 38" stamped on the inside lower tang condition showing a little bit of older added oil finish along with some and "P 38 3" inside the buttstock inlet. One tang sight filler screw is sparsely scattered light dings and minor handling marks; the hard rubber pistolorip cap and buttplate show just some scattered minor dings. The missing and the rifle is sighted with 1873 sporting leaf rear sight and a nice Beach combination front sight. The action seems to function well wood has darkened somewhat from the years and shows somewhat worn checkering, the buttstock otherwise with stunning feathercrotch mechanically and a four piece cleaning rod also remains housed inside the butt. This is a lovely 1873 rifle with tasteful and attractive upgraded grain figure along its full-length on either side, the forend with some wood that adds just a little something extra to an otherwise standard subtler but still very nice figure throughout. The inside tang shows configuration arm, (13C10249-7) (ANTIQUE) (3500/5000) "13673 XXXX OHR" and the number on the stock inlet is a little Est. 3,500 - 5,000 obscured but matching with "136" visible along with "94" stamp. The center of the sling swivel eye set into the toe line measures about 3 5/8" from the toe of the buttplate and the other eye is neatly set into the nosecap. The rifle is equipped with standard sporting rear sight, Lyman small ivory bead front and a Lyman tang sight and the action seems to function well mechanically. A wonderfully configured rifle for the Winchester collector with seldom-seen "XXXX" wood grading.

(13C10097-5) {C&R} (4000/5000) Est. 4,000 - 5,000

Lot Title/Description

Smith & Wesson 44 Magnum Hand Ejector Revolver Lovely Smith & Wesson 38/44 Outdoorsman Hand Ejector Revolve 17 20 serial #S179951, 44 Magnum, 4" heavy barrel with an excellent bore serial #50940, 38 Special, 6 1/2" barrel with an excellent bore. This beautiful four-screw transitional pre-Model 29 remains in excellent Outdoorsman revolvers tended to see considerable use and to find one condition. The metal surfaces retain about 97% original blue, the high in such superb condition with its box is a treat for the collector. The edges showing light scattered wear with light handling marks. There are metal surfaces of this revolver retain about 99% original blue finish a few very small spots of very light pitting on cylinder with one tiny stray showing very light handling marks and few minor oxidation blemishes on the sideplate that is hardly noticeable as it is on the edge of the grip that would hardly be worth mentioning if not for the guns superb line. The .500" target trigger and .500" target hammer have beautiful condition. The service trigger and hammer retain the beautiful swirls of swirls of case-hardened colors. The grips are the coveted diamond case-hardened color common on the pre-war guns. The diamond checkered Coke bottle goncalo alves target stocks with silver S&W checkered walnut factory grips with silver S&W medallion are numbered medallions. They rate very fine to excellent showing small handling to another oun but rate excellent with a few handling marks. As you marks on the panels and a tiny chip missing from the toe of the right would expect from such a fine gun all the appropriate parts are correctly panel. This gun is equipped with a red ramp front (the insert is a later numbered to the frame, it is equipped with a Patridge front sight, black replacement), white outline adjustable rear sight, and functions blade adjustable rear sight and it functions as well as the day it left mechanically with excellent timing and lock up. Smith & Wesson was not factory. The two-piece black factory box is printed, and serial numbered as fastidious in numbering the individual parts on these transitional to the gun. It remains in good to very good condition, the printing on the Pre-Model 29 as they were with other Hand Ejector revolvers and serial box has lightly faded and worn with the picture of the Outdoorsman in numbers only appear on the frame under the crane, and under the the center of the cover showing the most loss. The metal reinforced extractor on this gun. A factory letter is included and indicates this gun corners remain intact, and the edges show wear with a few scratches was shipped as described on January 29, 1958, to Harris & Stroh across the cover. The printing inside the cover remain crisp with slight Sporting Goods Co., Millbrae, California. This is a beautiful example wear. There is a factory letter provided and it indicates this gun was showing reasonably light use and great care. (8A10090-31) {C&R} shipped as described on May 19, 1937, to the City of Richmond, (2000/3000)Richmond Police Department, Chief Henry Vogoloong, Richmond, Indiana. In the letter Mr. Jinks indicates the Chiefs last name was a Est. 2.000 - 3.000 Scarce Smith & Wesson Fourth Model 44 Hand Fiector Target Revolver guess as the records were difficult to read. The included 18 serial #S118277, 44 Special, 4" barrel with an excellent bore. This fine correspondence from Richmond IN indicates it is correctly spelled revolver is fitted with the scarce 4" barrel and retains overall excellent Vogelsong. Chief Vogelsong enjoyed a spirited 42 year career with condition. The metal surfaces maintain about 96% original blue with light Richmond and was lucky enough to never have to draw his sidearm, high edge wear, a few handling marks consistent with a gun of this age, using his mace only a few times. A magnificent example of an and a small area of pitting on the left side of the frame that is Outdoorsman that obviously did not see much use by the good Chief unobtrusive as it is hidden by the grips. This gun has .500" target and was well cared for. (8B10090-54) {C&R} (2500/3500) hammer and .500" target trigger showing bold case-hardened colors. Est. 2.500 - 3.500 The grips are the very desirable diamond checkered factory rosewood 21 U.S. Special Model 1861 Percussion Rifle-Musket by Colt Coke bottle grips with silver S&W medallions showing minimal handling .58 cal., 40" barrel with a pristine bore. The metal surfaces have aged to marks and overall excellent condition. There is a hairline crack on the a nice even blend of gray and brown patina showing some scattered back of each panel where it butts against the shoulder of the backstrap areas of old light oxidation and perhaps a light handling mark or two and a tiny chip missing from the diamond on the right panel. This gun is from the years. The metal markings are correct and very crisp, the small equipped with a black blade micro adjustable rear sight, Baughman Federal Eagle on the bolster is slightly softened yet perfectly clear, with ramp front sight with later added translucent green insert, and it times "M.L.H." inspection initials on the left breech flat along with "STEEL" and and locks up as well as the day it left Springfield. The gun was well both the breech and lockplate are dated 1863. The American black cared for over the years and saw relatively light use. A great opportunity walnut stock rates very good plus to perhaps fine with a few small chips for the collector or revolver aficionado. (8A10090-12) {C&R} and dings along the wood line, ramrod channel and action and the (2000/3000) expected overall handling marks from military service. The stock flats Est. 2,000 - 3,000 retain nice definition and there are two identical crisp cartouches on the 19 Colt Prewar National Match Semi-Automatic Pistol left flat and inspection initials just ahead of the buttplate. The original serial #C183082, 45 ACP, 5" National Match barrel marked on the left sights, swivels and cupped tulip-head ramrod with threaded end are side radius above the lug "Colt 45 Auto/Auto Match" along with a circled intact and the action is strong and crisp. A very nice example of a Colt "MB" on the left lug itself, with an otherwise bright excellent bore which Special Model with an exceptional bore. (23A10251-1) {ANTIQUE} shows one small spot of very light pitting at the muzzle at about 3 (1200/1800) o'clock. The metal surfaces on this lovely gun retain about 98% original Est. 1,200 - 1,800 blue showing only the very lightest high edge wear at the front of the 22 Excellent U.S. Model 1843 Hall-North Percussion Carbine slide and perhaps sharp edges of the bow of the guard. There are the .52 cal., 21" barrel with a bright fine smooth bore showing some oddly scattered very sparse freckles of extremely light surface oxidation scattered patches of light pitting. The metal surfaces retain about 97% here and there on the slides left radius and a couple very superficial original brown finish with some light muzzle and high edge silvering, scratches but they are a barely noticed; the bright polished chamber some scattered light handing marks toning to grav and some small spots portion atop the barrel remains brilliant. The checkered walnut grips rate of old light oxidation with overall light flaking of the protective varnish. excellent with one or two flaked diamonds here and there. The pistol The breechblock displays a smoky case-hardened patina with some comes with a correct "Colt/45 Auto" marked two-tone magazine which is scattered small areas of pinprick pitting while the thumb lever is a dark lovely and shows perhaps a few very sparsely scattered, very light gray patina. The breechblock markings are crisp showing "U.S. / S. NORTH / MIDLTN. / CONN. / 1845" and the initials of a sub-inspector speckles of surface oxidation, but it is otherwise excellent. The slide is correctly numbered to the gun beneath the firing pin stop and its are on the left side of the action behind the rear sight. The black walnut underside which travels over the hammer and disconnector is beautifully stock rates about fine with a narrow chip in the right side of the nose of factory bright-polished. The breech face on the slide retains all its the forend and another just below the right side of the action, a few tiny original blue and the feed ramp of the barrel is immaculate. While likely impact marks on the left side of the action and some scattered light fired, it certainly was not fired much, and was very well taken care of handling marks from military service. Both stock flats show the faint The gun seems to function properly mechanically and is an absolutely remnant of an inspection cartouche, the edges of the flats retaining beautiful example of these most-beautiful of Colt National Match pistols. some nice definition. The ring is missing from the sling bar, there is a (3E10090-119) {C&R} (8,000/12,000) vacant hole on the triggerguard extension behind the forward screw, the Est. 8.000 - 12.000 sights and original ramrod are intact and the action appears to function well mechanically. An excellent example of these desirable carbines which were widely issued during the Civil War. (23B10229-7) {ANTIQUE} (2000/3000)

Lot Title/Description

33 U.S. Colt Model 1911A1 Transitional Model Semi-Automatic Pistol 35 Important U.S. Colt Model 1908 General Officers Pistol Belonging to Identified to Colonel Donald Bowman General Eisenhower's Staff Brigadier General Doyle O. Hickey 3rd Armored Division and Chief of serial #706797, 45 ACP, 5" intertwined "HP" marked Colt barrel with a Staff Under Generals MacArthur, Ridgway And Clark bright near excellent bore which shows just the slightest amount of serial #136832, 380 ACP, 3 3/4" barrel with a bright ex-cellent bore. The frosting in the grooves. The frame retains about 95-97% original blue, polished blue surfaces on this nice Model 1908 retain about 98% the loss due to some flaky oxidation on the frontstrap, some flaky plum original blue, showing only light high edge wear with remnants of a few and pewter oxidation on the right of frame and toning to plum along the freckles of extremely light surface oxidation sparsely scattered about the grip safety and arched mainspring housing. The slide was quite nice but left of frame. A couple of these spots show evidence of very light steel evidently saw a little poor storage as there are flaky sections of plum wool use, no doubt to mitigate the very light surface rust, but it is very and brown loss where it made contact with a piece of textile which was unobtrusive. The fire blue on both the trigger and safety remains strong no doubt wet or contaminated, as it has caused splotchy light pitting in and there is a good ordnance wheel stamping to the rear of the safety. those areas of loss. The fully checkered walnut grips rate excellent with The bright polished muzzle and chamber area of barrel remain brilliant a couple lightly chipped points here and there. All of the markings and the slide is correctly numbered to the frame. The checkered walnut remain crisp including the second style circled "WTG" inspectors grips with silver Rampant Colt medallions rate excellent, the left showing marking. Included is a single unmarked two-tone Colt magazine which a couple compressed points. The pistol comes with its original issue rates very fine to perhaps near excellent showing a bit of scattered light kraft box with the serial number penciled on the underside of the box oxidation. A few of the stock screws show very slight slot damage which bottom, along with two very nice blued "Cal.380/Colt" marked could easily be rectified or they replaced. Included with the arm is a magazines, a boar bristle cleaning brush and the original fold-out notarized statement from the grandson of Col. Donald Stanley Bowman instruction pamphlet which shows a bit of foxing and oil stain-ing from swearing that this 1911A1 pistol, by serial number, belonged to his the years. The box itself rates very good with the lid showing a number grandfather who was on General Dwight D Eisenhower's staff during of separations but the box bottom is intact. "Brig. Gen. Hickey" and "3rd World War II. Amusingly he recounts his grandfather telling him that he Armd Div" are neatly written in reddish ink in longhand on the lid. The was "one lucky SOB" to have been stationed in both Washington and pistol remains in a very fine state of condition and included are a 3rd France during the war, saving him from combat. A black and white Armored Division/Spearhead shoulder patch and collar device. Brigadier image of the good colonel is included along with the letter. Bowman General Doyle Overton Hickey had a long military career serving in both enlisted in 1935 and served in World War II. Korea and Vietnam and is World Wars and the Korean conflict. He enlisted in 1917 and after buried in Arlington National Cemetery. An attractive transitional model attending officers candidate school was commissioned a 2nd lieutenant with a solid connection to a dedicated and long-serving officer. of artillery, assigned to the 31st Infantry Div. in France. Post-war he (310090-91) {C&R}(3000/5000) attended field artillery school at Fort Sill and graduated from the Est. 3,000 - 5,000 Command and General Staff College, commanding the 9th Infantry U.S. Model 1903 General Officers Pistol Belonging to Brigadier General 34 Regiment at Fort Bragg from 1940-41. In '41 he was made an executive Robert E. Coffin officer of the Field Artillery Replacement Center and in '42 he would join serial #570366, 32 ACP, 3 3/4" barrel with a bright excellent bore. The the 3rd Armored Division commanding Combat Command A, being metal surfaces retain 98% dark gray-blue arsenal grade phosphate promoted to Brig. Gen. With the tragic death of 3rd Armored's finish showing only very light high edge wear and a few very sparsely commander Major General Rose in '45 he assumed command of the 3rd scattered handling marks, remnants of very fine pinprick pitting beneath Armored being promoted to Major General. Postwar he would serve as the arsenal refurb. The checkered walnut grips with the silver Rampant Chief of Research and Development Division, Headquarters of the Army Colt medallions rate very fine showing some minor handling marks and Ground Forces in Washington. He served as a Deputy Chief of Staff for a few very lightly chipped diamonds. The markings remain crisp with a the Far East Command, Tokyo under Douglas MacArthur, being slightly light off-struck ordnance bomb on the frame to the rear of the promoted in 1951 to Lieutenant General, serving under both generals safety catch. Included is a single "Cal. 32/Colt" marked blued magazine Matthew Ridgway and Mark Clark during the Korean War. His awards and the slide is correctly numbered to the gun on its interior. According include the Distinguished Service Medal, Legion of Merit, Bronze Star to The Colt Pocket Hammerless Automatic Pistols II © Brunner, the gun and 4 Silver Stars. Not only is this pistol in an extremely fine state of was issued to Brig. Gen. Robert E. Coffin in July 1963. Robert condition with its original issue accoutrements, it belonged to a Edmonston Coffin graduated from Stanford University in 1939, and was accomplished military man who, like his predecessor General Rose, "led commissioned in the field artillery from the Reserve Officer Training from the front", and it would be a proud addition to any advanced military Corps serving as a Lieutenant, entering active duty with 7th Army, 3rd collectors portfolio. (3E10090-87) {C&R} (6000/8000) Infantry Div. serving in North Africa, participating in the first wave of Est. 6,000 - 8,000 assault landings at Casablanca Morocco. He was transferred to Patton's 36 German P.08 Luger Pistol by Mauser with Matching Magazine I Armor Corps as counterbattery and Naval Gunfire Officer. He landed in serial #6027h, 9mm, 4" barrel with a bright excellent bore showing one or two tiny freckles and strong rifling throughout. The metal surfaces of Sicily with the assault forces and participated in the campaign to seize this 42-coded and 1940-dated pistol retain about 95% original blue Palermo and Messina. In the European Theatre he would land at Normandy on D-Day, directing the Naval gunfire in support of the showing some areas of silvering along the high edges, mild operational assault. Post-war he was chief of the Soviet Branch, War Department wear and a small ding at the right rear edge of the frame. There are a General Staff Intelligence Division from 1945-1948, then commanded an couple very tiny pinprick pits at the right edge of the muzzle but they are artillery battalion in Korea in 1953. He was a graduate of the Command unobtrusive and the elector has taken on the familiar deep plum patina and General Staff College, Armed Forces Staff College and the National and all appropriate markings remain intact and crisp. The pistol is stamped with proper "(Eagle) / 656" Waffenamts and eagle firing proofs. War College. He would serve successively as chief of the research division, Nuclear Division; and Missiles and Space Division. Armv The checkered walnut grips remain in near excellent condition showing Research and Development from 1957-1959 and was involved with the a few very lightly chipped points or minor handling marks. The grips are un-numbered and show crisp "(Eagle) / 656" Waffenamts on their launch of Jupiter-C rocket: commanded a missile task force. Italv circa 1963. Coffin would become the Assistant Division Commander, 2nd interiors. All of the serialized parts are matching and the action seems to Infantry Division at Fort Benning, testing large-scale use of helicopters in function well mechanically. One blue-bodied aluminum base 122-coded air assault scenarios also in '63; became chief of Nuclear Activities magazine is included that rates near excellent and is crisply Branch, SHAPE in 1965; Deputy Chief of Army Research and stamp-numbered matching the pistol along the base. A very fine Development 1967; commanding general, SETAF, North Atlantic Treaty example for the martial collector with desirable matching magazine. Organization Nuclear Force, Italy in 1970, and was Deputy Director of (13B10196-16) {C&R} (2000/2500) Defense Research and Engineering, Office of the Secretary of Defense Est. 2,000 - 2,500 from 1971 until his military retirement on April 30, 1974. General Coffin passed away in 2010 at the age of 92. The arm comes in a simple, otherwise unmarked kraft box with anti-corro paper, steel cleaning rod and the serial number in ink marker on its underside. A very fine pistol owned by this long-serving U.S. General. (3C10090-83) {C&R} (3000/5000)

The metal surfaces are toning to a gray patina with a small vise "bite" mark on the left breech flat along with overall softened pinprick pitting, light handling marks and some scattered small spots of light oxidation staining and the brass forend cap is an attractive warm ochre patina. All metal markings are correct and very crisp with both the barrel and lockplate dated 1857. The American black walnut stock rates about fine as perhaps very lightly cleaned with a touch of added finish, and the expected scattered light dings and handling marks from military service and a light "ESA" inspection cartouche is visible on the left flat. The original sights including the long range rear are intact, a correct cupped tulip-head ramrod with swelled shank is included, the primer mechanism appears to function well mechanically and the action is very strong and crisp. This Model 1855
39	and operational wear with a few sparsely scattered pinprick pits and some small areas of mild oxidation staining. The ejector has taken on the familiar dark plum patina and all markings remain intact and strong showing proper "(Eagle) / 655" Waffenamts and eagle firing proofs. The checkered walnut grips remain in very fine condition showing a few lightly chipped points mostly along the left panel. The grips are un-numbered and show small "(Eagle) / 655" Waffenamts on their interiors. All of the serialized parts are matching, the action seems to function well mechanically and one fxo-coded magazine in near excellent condition is included. A solid example for the martial collector. (13B10171-7) (C&R) (1500/2000) Est. 1,500 - 2,000 Scarce John Walch 10-Shot Percussion Pocket Revolver serial #1317, .31 cal, 3 1/4" octagon barrel with a mostly bright very			light pitting in the strong rifling. The metal surfaces are toning to a gray patina with a small vise "bite" mark on the left breech flat along with overall softened pinprick pitting, light handling marks and some scattered small spots of light oxidation staining and the brass forend cap is an attractive warm ochre patina. All metal markings are correct and very crisp with both the barrel and lockplate dated 1857. (13B10171-7) {C&R} (1500/2000) Est. 1,500 - 2,000 Scarce John Walch 10-Shot Percussion Pocket Revolver serial #1317, .31 cal, 3 1/4" octagon barrel with a mostly bright very good bore showing some patches of oxidation mostly nearer the muzzle and otherwise crisp rifling. The iron parts of this revolver show evidence of a light cleaning very long ago with some remnants of a black enamel finish in the protected areas, having mostly toned to a dark blue-gray patina with remnants of partially smoothed over fine pitting. The barrel markings remain intact and strong showing Walch Fire-Arms Co. New York address and 1859 patent date. The frame has taken on a wonderful rich ocher patina retaining very nice edges and showing the expected very light dings and handling marks. The smooth walnut grips remain in very good plus to fine condition retaining about 90% original varnish showing some thin drying cracks along the bases and overall light dings. The right panel is stamp-numbered "194", the left is matching			light pitting in the strong rifling. The metal surfaces are toning to a gray patina with a small vise "bite" mark on the left breech flat along with overall softened pipprick pitting, light handling marks and some scattered small spots of light oxidation staining and the brass forend cap is an attractive warm ochre patina. All metal markings are correct and very crisp with both the barrel and lockplate dated 1857. The American black walnut stock rates about fine as perhaps very lightly cleaned with a touch of added finish, and the expected scattered light dings and handling marks from military service and a light "ESA" inspection cartouche is visible on the left flat. The original sights including the long range rear are intact, a correct cupped tulip-head ramrod with swelled shank is included, the primer mechanism appears to function well mechanically and the action is very strong and crisp. This Model 1855 Type I is sure to make a welcome addition to your Civil War collection. (23A10229-4) (ANTIQUE) (2000/3000)
39	and operational wear with a few sparsely scattered pinprick pits and some small areas of mild oxidation staining. The ejector has taken on the familiar dark plum patina and all markings remain intact and strong showing proper "(Eagle) / 655" Waffenamts and eagle firing proofs. The checkered walnut grips remain in very fine condition showing a few lightly chipped points mostly along the left panel. The grips are un-numbered and show small "(Eagle) / 655" Waffenamts on their interiors. All of the serialized parts are matching, the action seems to function well mechanically and one fxo-coded magazine in near excellent condition is included. A solid example for the martial collector. (13B10171-7) (C&R) (1500/2000) Est. 1,500 - 2,000 Scarce John Walch 10-Shot Percussion Pocket Revolver serial #1317, .31 cal, 3 1/4" octagon barrel with a mostly bright very good bore showing some patches of oxidation mostly nearer the muzzle and otherwise crisp rifling. Lot Title/Description

42 Very Fine U.S. Model 1816 Flintlock Musket by N. Starr 44 Excellent U.S. Model 1863 Zouave Percussion Rifle by Remington .69 cal., 42" barrel with a bright excellent bore. This is a very fine original .58 cal., 33" barrel with a pristine bore. The barrel of this beautiful rifle flint U.S. Model 1816 Type III musket by Nathan Starr of Middletown, retains about 95% original blue evenly thinning to a pleasant gray-brown CT. The barrel retains about 98% original "National Armory Brown" finish patina under bright light with some scattered small spots of old light with a streak of bright wear on the right breech flat from contact with the oxidation and pinprick pitting. The lockplate and hammer display an frizzen, some light silvering at the muzzle and on the high edges and the attractive smoky case-hardened patina with strong case-hardened expected overall light handling marks in the protective varnish. While a colors remaining in the protected areas of the hammer and some browned barrel is typically seen on a Type II musket, Robert M. Reilly modest whisps of the same overall. The brass mountings which lend this mentions on page 103 of United States Martial Flintlocks that though rifle its charm have aged to a warm ochre patina which is more of a dark mustard on the patchbox and buttplate with a tiny ding on the right side Starr only produced Type III muskets a "number of unusual finishes have been noted on some of these arms" including browned. The of the triggerguard. All metal markings are correct and crisp with both remaining metal surfaces have aged to a lightly-mottled gray patina with the lockplate and barrel dated 1863 and "STEEL" along with "R.K.A." is small spots of old light oxidation and softened pinprick pitting on the left breech flat. The American black walnut stock rates very fine throughout. The lockplate and exterior lock parts are a dark smoky with sharp edges on the stock flats and nice raised grain throughout case-hardened patina while some of the interior parts retain strong along with a few tiny chips on the forend and along the edges of the original fire blue and the brass pan and front sight blade display a warm ramrod channel and a few of the expected light handling marks from the mustard hue. The metal markings are exceptionally crisp with the years. There are two boxed inspection cartouches on the left stock flat. lockplate featuring Starr's earlier style of "US / (ornate sunburst) / N. There is a spare nipple in the patchbox, the original sights, bayonet lug STARR" ahead of the cock and "MIDDTN / CONN / 1832 / (rosette)" to and cupped tulip-head ramrod with threaded end are intact and the the rear while "US / JM" over a raised "P" in sunken circular cartouche action of this gorgeous rifle appears to function well mechanically. (23C10196-8) {ANTIQUE} (2000/3000) are on the top of the breech. Like the lockplate, the barrel tang is also dated "1832", "P" is on the left stock flat and all the lock parts abound in Est. 2,000 - 3,000 45 Attractive Sharps Model 1874 Sporting Rifle small inspection marks. The American black walnut stock rates very fine perhaps showing a touch of old added finish with nice raised arain serial #C. 54323, 44-90, 30" octagon barrel with a bright very good throughout and good definition to the stock flats, along with some areas plus-very fine bore showing some scattered small spots of very fine pitting or oxidation with otherwise crisp rifling throughout. The barrel of of oil soaking, the typical cracks around the action and buttplate, and a few scattered light handling marks and there is the remnant of a this very attractive Hartford Sharps retains perhaps 70-75% original blue cartouche just ahead of the buttplate tang. The upper sling swivel is a with most of the loss due to some scattered areas of old light pitting. later replacement and is broken on the right side, a trumpet-head mild oxidation staining and areas toning to a pleasant plum-brown ramrod with threaded end is included and the action is very robust and patina. The barrel retains strong Sharps Rifle Co. Hartford address, "44 crisp. A very fine Model 1816 musket which would be difficult to improve CALIBRE" designation and the rear sight spring shows Lawrence patent upon. (23C10196-5) {ANTIQUE} (3000/5000) information and retains some nice subtle fire blue. The action and Est. 3,000 - 5,000 lockplate are generally toning to an attractive mix of smoky 43 Exceptional U.S. Model 1842 Percussion Musket by Springfield Armory case-hardened colors and mild gray-brown patina with some generous .69 cal., 42" barrel with bright very fine bore showing a couple streaks of vibrant colors particularly along the lockplate. The lock screw head light oxidation. This is the nicest example of a Springfield Model 1842 shows a little bit of minor slot wear and the firing pin and a couple of the musket that this writer has ever seen. The metal surfaces remain screw heads retain some subtle hints of pale fire blue. The smooth "National Armory bright" with some overall fine speckles of light walnut buttstock and forend with handsome pewter tip remain in about oxidation staining and a few scattered tiny spots of pinprick pitting which very fine condition retaining about 90% original varnish with the are unobtrusive and a few light handling marks along the barrel. The expected scattered light dings and handling marks. The buttstock shows brass front sight blade has aged to a pleasant ochre patina, the trigger a bit more wear with three small notches near the point of comb, small retains nearly all its original fire blue and all metal markings are correct chip at the left top edge wear it meets the frame, a thin 1 1/2" crack on and very crisp with both the lockplate and breech of the barrel dated the right side between the upper tang and lockplate and some smaller 1853. The gorgeous American black walnut stock rates excellent plus more minor drying cracks here and there. The rifle is sighted with with wonderfully-sharp edges around the stock flats, raised grain Sharps Rifle Co. sporting tang peep sight (missing its disc), high notch throughout and a strong original finish with a few tiny dents along the sporting rear sight and factory globe front sight. The half cock notch will wood line and a small area of light scratches on the underside of the require some mechanical attention, the firing pin is intact and the lock forend from contact with the sling hook, which are only worth mentioning otherwise seems to function well mechanically on full cock. This is a due to the incredible state of preservation of this arm. There is a crisp very handsome Sharps rifle retaining strong condition. (13D10121-6) inspection cartouche on the left stock flat and inspection mark ahead of {ANTIQUE} (6000/8000) the tang of the buttplate, the bayonet stud and correct trumpet-head Est. 6,000 - 8,000 ramrod are intact and the action is very strong and crisp. Included is a 46 U.S. Model 1903 Bolt Action Rifle by Springfield Armory buff colored leather 1 1/4" sling which is deeply stamped with the serial #445464, 30-06, 24" 10-10 dated Springfield Armory barrel with a makers mark "S.H. YOUNG / & CO. / NEWARK" along with oval bright excellent bore. The receiver, bolt shroud, and cocking piece retain inspector's stamp in oval "R. WHITE / U.S. / ORD. DEPT. / SUB. about 95% original oil quenched case hardening with light wear on the INSPECTOR". The sling also rates excellent plus and is remarkably high edges and contact points, scattered specks of pinprick pitting, and clean with just a little bit of soiling from the years and the brass hook is a few light handling marks. The original rust blue on the barrel, bolt toning to a bright goldenrod patina. The sling appears to us to be very body, extractor, upper barrel band, and rear sight base has toned largely much original and is a wonderful accompaniment to this investment to a light brown patina when viewed under direct light with some light grade Model 1842 musket. (23C10196-19) {ANTIQUE} (2500/3500) wear on the high edges and contact points, and a few minor handling Est. 2.500 - 3.500 marks. The triggerguard, lower barrel band, and the remaining rear sight assembly retain about 96% original fire blue with light edge wear. specks of oxidation staining, and minor handling marks. The magazine cutoff and safety show strong case-hardened color, and the magazine floorplate shows the only incorrect finish, retaining about 98% arsenal black parkerized finish. The walnut stock is in very good plus to excellent condition with an old light abrasion on the left side of the forend at the grasping groove and a few minor handling marks, is marked with a crisp boxed "J.F.C." inspector's cartouche and crisp circled "P" proof behind the triggerguard, and features a checkered buttplate. The receiver and barrel markings are crisp and easily legible. The rifle retains the standard blade front sight, with "(ordnance bomb) / U.S." marked front sight hood, and Model 1905 rear sight; included with the rifle is a P.J. O'Hare rear sight cover that fits the rear sight securely. As with all low numbered M1903 rifles this rifle is sold as a collectable only and no thought should be given to loading or firing this rifle. A fantastic 1910-dated M1903 rifle retaining almost complete original finishes. (14B10286-11) {C&R} (2000/4000) Est. 2,000 - 4,000

51 Remington No. 1 Rolling Block Short Range Target Rifle 53 Japanese Tanegashima Matchlock Musket with Fine Silver Inlay serial #11060, 32-20 WCF, 36 1/4" octagon barrel with a partially bright .55 cal, 41 7/8" barrel with cannon belled muzzle and an oxidized bore. about very good bore showing some scattered patches of fine pitting This is a lovely tanegashima no doubt constructed for somebody of high and oxidation, one small area a bit more moderate about 8" ahead of the social standing and features some lovely silver inlays along the barrel. chamber, with otherwise strong rifling throughout. This is an attractiv The barrel has mostly toned to an attractive deep plum-brown patina short range target rifle neatly converted during the period of use to showing some scattered remnants of old oxidation staining. The 32-20. The barrel has mostly toned to a deep plum-brown patina octagonal cannon belled muzzle is accented with silver wedding band retaining generous streaks of original blue and showing some overall old and teardrop inlays along the edges. Behind the front band there is a oxidation staining and small areas of light pitting. The barrel markings mythical phoenix (hou-ou) and on either side of the rear band there is a remain intact and strong showing crisp E. Remington & Sons address fine mountainous scene with another phoenix amidst maple branches. and "32" caliber designation: the underside beneath the forend is Finally there is what is very likely a familial kamon emblem behind the marked "ST J.C.G". The action retains perhaps 60% original rear sight; all of these silver inlays have taken on a wonderful dark case-hardened colors remaining quite vibrant along the sides, with the tarnish and there is just one small strip missing through the rearmost balance toning to a mix of mild plum-brown and gray case-hardened mountain. There are a few more silver inlays along the stock consisting patina. There are some spots of old oxidation and small patches of light of cherry blossoms, chrysanthemums and a monogram plate at the toe pitting along the right side edges. The small action parts show flaking no doubt engraved with an individual's name. The remaining brass bright blue, some of the screw heads with evident fire blue and the hardware has taken on a pleasant mild ocher patina overall, some of the edges of the trigger showing pale straw color. The smooth walnut chrysanthemum inlays with somewhat softened details and there is a buttstock and forend with steel schnabel remain in very good plus tiger inlay on the right side butt that also shows some softened details condition as lightly cleaned and refinished long ago, showing one small and is somewhat loose, as six of its pins are missing. There are a couple of other tiny inlays and small pins missing, and the rear barrel band is hairline crack at the upper tang and a small repaired chip at the bottom right corner where the stock meets the frame, along with some other broken, but these are relatively minor apologies. The hardwood stock scattered handling marks. Stock fit remains very nice overall and the remains in very fine condition showing some thin drying cracks along the buttstock shows some subtle attractive grain figure. The rifle is sighted butt and edges of the forend, the forend also with some slivers missing with a short range Vernier-style tang sight that has mostly toned to mild along the edges, one more noticeable along the right side that shows a gray patina, original flattop sporting rear iron sight and a target globe period repair. The original wooden ramrod is present, the pan cover has front sight with large aperture insert. The rifle is equipped with a factory been lost to the years and the mainspring is very weak though the cock single set trigger and the action seems to function well mechanically. does hold. This is a wonderful example of these interesting Japanese This rifle is also pictured and described on page 192 of Marcot's muskets for the advanced antique arms collector, (139670-590) Remington Rolling Block Rifles book. A solid Remington target rifle {ANTIQUE} [David & Lore Squier Collection] (3500/5000) updated to centerfire. This is a hefty serial #1387, 38 RF Extra Long, 26" octagon barrel with a bright very caplock gun with barrel measuring about 1 5/8" at the muzzle and fine bore showing a little mild oxidation and some sparsely scattered pits almost 2" at the breech. The barrel and lock have mostly toned to a with otherwise crisp rifling throughout. This is an interesting early series pleasant plum-brown patina with some scattered mild gray undertones 1870 rifle equipped with a rather short barrel, factory sling swivels and and remnants of old oxidation staining and minor fine pitting. There is single set trigger. The barrel retains perhaps 60-70% original blue, what is likely a familial kamon emblem behind the rear sight that was appearing stronger under ambient light, that is toning overall to a probably once inlaid with gold and silver, most of the inlay now lost to pleasant plum-brown patina, also with remnants of moderate oxidation the years with only a few thin lines of gold still present. The arm is staining or freckling and a small ding at the left edge at the muzzle. The equipped with a very large hammer and bolster and a "European style" rear sight retains good flaking bright blue and the barrel is marked "38" curved trigger rather than the typical ball shape seen on the earlier on the underside with matching serial number beneath the forend. The matchlocks. Some of the screw heads show old slot wear and two barrel action retains about 85% original case-hardened colors, guite vibrant pins are missing. The arm is equipped with brass hardware including throughout, with toning to gray and showing some moderate gray-brown cherry blossom pin escutcheons, ramrod reinforcement and heavy speckling along the sides. The small action parts show lovely brilliant fire breech band; the toe plate is no longer present. The hardwood stock blue throughout and the action is marked only along the upper tang with remains in very fine condition showing some scattered thin drying Remingtons Ilion address and two patent dates. The smooth walnut cracks, light handling marks and a 4 1/2" crack along the right side tip buttstock and forend with steel schnabel remain in very fine condition that shows an old period nail repair. The left stock flat behind the barrel retaining most of their original varnish showing the scattered light dings shows a series of kanji characters that remain mostly legible, the original and mild abrasions that come from honest use. There are a couple very wooden ramrod is present and the lock seems to function well mechanically. A fine and interesting example for the antique arms tine drying cracks at the tangs that are unobtrusive and the buttstock exhibits some attractive grain figure throughout. The rifle is sighted with collector, not often seen in percussion. (13C10221-64) {ANTIQUE} Remington's combination rear sporting sight and Beach front sight (the [David Rose Collection] (1800/2200) globe having broken off) and the action seems to function well Est. 1.800 - 2.200 Lovely Smith & Wesson 44 Magnum Hand Ejector Revolver 55 mechanically. This rifle is also pictured and described on page 40 of serial #S167127, 44 Magnum, 6 1/2" heavy barrel with an excellent Marcot's Remington Rolling Block Rifles book. A very attractive and seldom seen Remington sporting rifle with some interesting features for bore. This beautiful 1956-1957-manufactured revolver remains in the advanced collector. (13C9670-159) {ANTIQUE} [David & Lore outstanding condition, the metal surfaces retaining about 99% original Squier Collection1 (3000/5000) bright blue finish showing very limited edge wear, a few scattered light Est. 3,000 - 5,000 handling marks and a light turn ring on the recessed cylinder. The .500" target hammer and .500" target trigger retain the beautiful case-hardened colors found on the early guns with minor operational wear. The beautiful diamond checkered walnut Coke bottle grips with silver S&W medallions rate very good showing little wear although the heel of the right panel has a dent on the edge of the butt and a small chip missing where it meets the guns backstrap. This lovely N-frame features a red ramp front sight, white outline micro adjustable rear sight, and all the appropriate parts are correctly numbered to the gun. The gun times in double action mode but comes up late in single action and will need attention although lock up is excellent. This gun would have been manufactured at the tail end of the five-screw production run with the change-over to four-screw configuration in 1957 around serial #167500. A wonderful collectible that has seen light use and great care over th years. (8B10249-72) {C&R} (3000/5000) Est. 3,000 - 5,000

Unique Colt Calvin Coolidge Presidential Edition Single Action Army Revolver serial #CC-1, 45 Colt, 7 1/2" barrel with an unfired bore. This one-of-a-kind revolver is as-new, absolutely unfired, unturned since leaving the Colt factory in November 1984. Colt planned a separate commemorative revolver for each of our presidents, this example paying tribute to the 30th president and our only from the great state of Vermont. There is wonderful open flowing Colt scroll in factory C-grade coverage, all of the wonderful work on the revolver by factory master engraver Brisson Gwinnell. The White House is on the left of the cylinder with a 48 star American flag on the right, the bust of the good president on the left recoil shield which has been neatly flattened for the purpose of engraving his portrait there. The knuckle atop the grips shows President Coolidge's dates in office 1923-1929 and "30th President of the United States" down the back strap. There are lovely gold line inlays scattered about the surface of the arm with 13 gold stars inlaid circumferentially around rear of the unfluted cylinder. The ejector rod, cylinder pin, hammer and trigger, and both front and backstraps are all gold plated. The arm features a one piece ivory grip with carved fleur-de-lis at top and bottom and a gold medallion Great Seal of the President of the United States inlaid on the left side of the grip. Each of these revolvers from Colt had a special serial number unique unto itself, this example "CC-1" inlaid in gold as well. These arms came cased in an ostrich skin-covered case with a candy apple red French-fitted interior. On the interior we find ivory handled gold plated turn screws, with brass cleaning rod and brass ferrule boar bristle brush with a turned ivory oil bottle and an ivory spares box, all of these with the Colt logo prominently carved. There is a protective pillow included that rides within the box when the lid is closed and the arm is not displayed, and there is a factory canvas slipcover for the case as well. Included with the arm is its original woodgrain Colt box with custom shop end label numbered to the gun, instruction manual and papers within. The included two page factory letter details every aspect of the engraving and confirms the factory master engraver as Gwinnell and shows shipment to "Armsmear II" in Anaheim California in 1984. Coolidge was a friend to American business and a fiscal conservative, favoring tax cuts and very limited government spending and as well kept the U.S. out of the League of Nations while restoring faith in the government and the White House that was lost during the corrupt Harding administration. This is absolutely beautiful revolver done by one of Colt's most gifted factory engravers and is a fitting tribute to the 30th president from the Green Mountain State. (3G10206-10) {C&R} (10,000/15,000) Est. 10.000 - 15.000

Lot Title/Description

Important Engraved Smith & Wesson Three Revolver Set Factory Made for Legendary U.S. Border Patrol Agent Bill Jordan serial Nos. N493010, 11 and 12. This is a three gun set consisting of a Model 57, 29 and 27, all engraved by the Smith & Wesson custom shop for legendary border patrol agent, fast draw expert and retired United States Marine Bill Jordan. In order of serial number: Smith & Wesson Model 57 serial #N493010, 41 Magnum, 8 3/8" barrel with an unfired bore. The metal surfaces retain all of their original post-engraving deep factory blue. This arm shows open flowing scroll engraving sparsely scat-tered about its surface intermingled with Marine Corps vignettes. The sideplate shows the familiar Marine Corps emblem of the Federal Eagle surmounting the globe atop a fouled anchor inlaid in gold and silver, Semper Fidelis emanating from a riband in his beak. There is a facsimile of Jordan's signature inlaid in gold ahead of it along with his years of serv-ice in the Corps "1943 1965". The barrel has a gold and silver inlay of landing craft coming ashore, a nod to Jordan's service in the Pacific theater during the Second World War, this is surmounted and underlined by "A Few/Good Men". There is a small gold inlaid band at the muzzle with the maker and caliber markings inlaid in gold as well and the left of the frame is marked "Major-USMCR" inlaid in gold (amusing as Jor-dan retired out as a Colonel). The cylinder shows "Iwo Jima", "Eniwetok" and "Oki-nawa" all inlaid in gold in the fields between the flutes, the off-fields each show an inlaid silver star. The rear knuckle of the frame has a shield-shaped gold inlay with a target at the center and with "Distinguished Marksman" engraved thereon. The smooth target style Goncalo Alves grips fea-ture a bit of scroll carving left with a very nice enameled vignette right of the famous flag raising atop Mount Suribachi with "Uncommon Valor Was a Common Virtue" surrounding the vignette; there are a few flakes in the paint but it still remains very vivid. The arm is equipped with a white outline rear sight and brass-front inlay, the color case-hardening on the target hammer and trigger are as-new. Smith & Wesson Model 27-2, serial #N493011, .357 Magnum, 8 3/8" barrel with an unfired bore. The metal surfaces retain all of their wonderful factory post-engraving blue. The revolver has near full coverage open flowing scroll engraving with gold accenting scroll vignettes both left and right, with gold border outline engraving at the front of the frame flats, rear portion of the cylinder and at the barrel. The right side of this arm is a nod to Jordan's Border Patrol days with the Border Patrol insignia on the side plate, facsimile of Jordan Signature ahead of this, with a gold inlaid riband at the front of the frame showing his years of service 1932-1965. On the right side of the frame ahead of the cylinder we see a vignette of the man himself, standing with a rifle, this inlaid in gold as well. The maker's name and cal-iber on the barrel are inlaid in gold, each flanked by two inlaid silver stars and the name of his famous book "No Second Place Winner" with his initials, are both inlaid in gold at the right side of the muzzle. There is an additional geometric gold inlay on the bow of the triggerguard and his initials are atop the knuckle of the frame "WHJ" above "USBP". The arm features white outline rear and flat face Patridge front with gold overlay and the color case-hardening on the target trigger and hammer are as-new. The smooth Goncalo Alves target grips each have a gold plated ac-centing butt plate left and right with light loose open scroll. Smith & Wesson Model 29-2 serial #N493012, 44 Magnum, 8 3/8" barrel with an unfired bore. The metal surfaces retain all of their post-engraving factory blue and the arm is engraved with the finest quality scroll with extremely fine background shading, accenting the lovely scrollwork, this nearly in full coverage. The side plate features the National Rifle Association's em-blem inlaid in gold and silver, again with Jordan Signature ahead of it, while the left side of the frame shows a neck-up engraving of Jordan himself with his signature border patrol hat, with riband ahead reading "Fast Man With a Slow Drawl". The underside of the barrel has a bald eagle head inlaid in silver and gold with a long chiseled gold riband emanating from its beak, the right engraved "The Right to Bear Arms", the left engraved "Speeds Fine But Accu-racy's Final". The gun has a white outline rear sight and a gold insert front sight with an interesting engraved face on its flat. The bow of the triggerguard has been neatly sculpted and chiseled with a rattlesnake intertwining with beautiful quality scroll. The smooth Goncalo Alves target grips have a nice carved scroll at their top edges, with gold enamel accenting within, offsetting the scroll-work. The guns are each additionally engraved with a gold inlaid 1, 2, 3 on the front of the ejector rod shroud, unfortunately not following the sequence of the serial numbers with the model 27 being 1, the 57 being 2 and the model 29 being 3. The guns all ride in a top-quality mahogany presentation case with three fitted burgundy-lined drawers to accom-modate the lovely revolvers. The drawers have gold pulls and there is an oval gold-tone monogram plate affixed to the lid which reads: Custom Engraved By Smith & Wesson For Bill Jordan 1979". Bill Jordan is a true American hero and his exploits the stuff of legend, and need not be re-counted here. This is a very fitting tribute to a brave man and true Amer-ican hero, the mettle of which we see all too infrequently these days. (3K10082-21,22,23) {MODERN} (20,000/30,000) Est. 20,000 - 30,000

(8A10090-8) {C&R} (2500/3500) Est. 2,500 - 3,500 Smith & Wesson 357 Magnum Hand Ejector Revolver serial #S119858, 357 Magnum, 5" barrel with an excellent bore. This wonderful gun has seen minimal use and remains in grand condition. The metal surfaces of this five-screw revolver retain about 99% original blue with a wisp of wear at the muzzle and a light turn ring on the recessed cylinder. The service trigger and .400" semi-target hammer retain beautiful case-hardened colors. The diamond checkered walnut factory grips with silver S&W medallions are correctly numbered to the gun and remain in outstanding condition. This gun features a Baughman ramp front sight, black blade micro adjustable rear sight, a crisp action that times and locks up correctly, and all appropriate parts are correctly numbered to the gun. It includes the original gold factory box that is correctly end labeled and numbered to the gun. The box rates very good plus with light scattered edge wear, a small section of the gold covering peeled on one end and metal reinforced corners remain strong. The		65	surface oxidation and fine pitting. The bolt is electric pencil marked to the 458 Win Mag barrel and collar and has a small amount of flaking and loss on the bolt handle knob. Additionally, there are a few light handling and tool marks scattered about. The checkered walnut Monte Carlo stock rates excellent and has a few small dings and other light handling marks. The stock features a satin oil finish and has a rosewood forend tip and gripcap and a White Line ventilated recoil pad. The gripcap has a tarnished silver oval monogram plate in center with the initials "CMJ". The barrel is equipped with a set of factory sights, and front sight hood. A set of European claw mounts are included. The barrels on these model 66S rifles are easily interchangeable by removing only two mounting screws. This is a near excellent example of these classic Mauser sporting rifles that were developed in the mid 1960's and is capable of harvesting most any large game animal in the world. Please note that an accessory barrel chambered in 7mm Rem Mag is available in the online only sale that is running concurrently with this sale. (4A10007-1) {MODERN} (1500/2000) Est. 1,500 - 2,000 Grulla Armas Model 216 Sidelock Smallbore Double Ejectorgun

A set of European claw mounts are included. The barrels on these model 66S rifles are easily interchangeable by removing only two mounting screws. This is a near excellent example of these classic Mauser sporting rifles that were developed in the mid 1960's and is capable of harvesting most any large game animal in the world. Please note that an accessory barrel chambered in 7mm Rem Mag is available in the online only sale that is running concurrently with this sale. (4A10007-1) (MODERN) (1500/2000) Est. 1,500 - 2,000 Grulla Armas Model 216 Sidelock Smallbore Double Ejectorgun serial #31-03-126-97, 28 ga., 29" barrels choked modified and full with excellent bores. This is a very attractive Spanish shotgun, it has a very solid feel while being light and agile. The barrels retain 99% original blue with nice double zig-zag border engraving around the breeches and tight engine-turned patterns on the water table and barrel flats. The coin-finished rolled-edge triggerguard, frame and lockplates are excellent with beautiful tight Purdey-style scroll and rose bouquet
	ordering large numbers of guns is not a recent phenomenon and produces interesting and desirable variations. A well cared for Third Model showing honest use. (8A10090-8) {C&R} (2500/3500) Est. 2,500 - 3,500 Smith & Wesson 357 Magnum Hand Ejector Revolver serial #S119858, 357 Magnum, 5" barrel with an excellent bore. This wonderful gun has seen minimal use and remains in grand condition. The metal surfaces of this five-screw revolver retain about 99% original blue with a wisp of wear at the muzzle and a light turn ring on the recessed cylinder. The service trigger and .400" semi-target hammer retain beautiful case-hardened colors. The diamond checkered walnut factory grips with silver S&W medallions are correctly numbered to the gun and remain in outstanding condition. This gun features a Baughman ramp front sight, black blade micro adjustable rear sight, a crisp action that times and locks up correctly, and all appropriate parts are correctly numbered to the gun. It includes the original gold factory box that is correctly end labeled and numbered to the gun. The box rates very good plus with light scattered edge wear, a small section of the gold covering peeled on one end and metal reinforced corners remain strong. The inside cover has crisp printing. The 5" barreled N-frame revolvers had the best balance and feel, and this one is a superb example. (8A10090-45) (C&R) (1500/2500) Est. 1,500 - 2,500 Excellent Weatherby Crown Custom Mark V Left Hand Bolt Action Rifle serial #39591, 300 Weatherby Magnum, 24" barrel with a bright excellent bore. The metal surfaces on this West German rifle retain 99% original high-polish blue. The receiver has toned to deep plum and the		65	surface oxidation and fine pitting. The bolt is electric pencil marked to the 458 Win Mag barrel and collar and has a small amount of flaking and loss on the bolt handle knob. Additionally, there are a few light handling and tool marks scattered about. The checkered walnut Monte Carlo stock rates excellent and has a few small dings and other light handling marks. The stock features a satin oil finish and has a rosewood forend tip and gripcap and a White Line ventilated recoil pad. The gripcap has a tarnished silver oval monogram plate in center with the initials "CMJ". The barrel is equipped with a set of factory sights, and front sight hood. A set of European claw mounts are included. The barrels on these model 66S rifles are easily interchangeable by removing only two mounting screws. Lot Title/Description

John Amber's Sarasqueta Sidelock Double Ejector Rifle serial #97690, 375 H&H, 25 1/4" barrels with bright excellent bores. This is an absolutely lovely and the top-of-the-line Sarasqueta double ejector rifle, sold at the John Amber auction by Bourne Auction Company back in 1986, made specially for John Amber for an extensive article in the 32nd Anniversary Deluxe Edition of Gun Digest in 1978. The frame and lockplates are coin finished and remain excellent with the long tang triggerguard and top lever retaining all of their original blue. The barrel and frame flats show a lovely fine engine turning with vertical burnishing on the breech faces remaining completely intact. The frame has overall oakleaf engraving which continues onto the bow and tang of the triggerguard, with the lockplates and the belly of the frame with extensive game scenes, leaping deer left, standing rehbock right and a large hawk about to pounce on a red fox which has just killed a hare, this against a woodland backdrop. The locks feature dial-style cocking indicators and are hand detachable with the takedown lever on the left lockplate, they are beautifully engine-turned on their interiors. The gun features non-automatic safety, double triggers, the front articulated, and ejectors. The English walnut buttstock is straight-grained so as to be rugged to absorb the rifle recoil, has dropper points at the rear of the flats, a nice left side rounded shadowline cheekpiece and shows nice grain figure with checkered panels left and right and a skip-line checkered panel at the bottom of the pistolorip. The splinter forend is checkered in similar fashion and the forend metal retains all of its original blue. The length of pull to the 1/2" Old English rifle pad is 14" with drops of 1 3/8" and 2". The gun locks up tightly on face with the top lever slightly right of center and functions well mechanically and appears to have seen little or no use, likely being reviewed by Amber and if taken afield was done so carefully and likely only once or twice. The arm is sighted with a simple bead style front sight atop a raised sighting block showing light engraving, the rear with a simple shallow v-notch with gold index line sitting amidst a nicely engraved quarter rib. The right barrel has the Victor Sarasqueta name engraved while the left is engraved "Made for John T Amber". This is a rugged and beautifully executed gun weighing in at just over 8 3/4 pounds, made for this very famous and storied author and gunning gentleman, in the perfect caliber. A very rare opportunity to own a fine double rifle from one of the most influential men in this field. (3F10295-10) {MODERN} (8,000/12,000) Est. 8,000 - 12,000 Wonderful Colt Model 1878 Factory Engraved Deluxe Double Hammergun serial #22684, 12 ga., 30" Damascus barrels with bright bores which show some pitting in the right tube, the left is smooth. In addition to the game scene engraved locks, this shotgun features a special order checkered half pistolgrip stock and splinter forend. The locks are engraved with wedges of fine relief scroll along with a pointer just ahead of hammer left and a pair of snipes ahead of hammer on right lock. The locks do not show the typical makers mark due to the engraving; they are engraved simply beneath each hammer "COLT". The frame shows fine relief scroll with geometric patterns with a duck in flight on the triggerguard. The tangs, top lever, hammers, bottom of barrel lugs and forend metal all show light decorative engraving as well. The condition of the shotgun is guite nice with the barrels a smooth gray brown overall with strong Damascus pattern visible their entire length. There are some areas that are thinning somewhat as well as a few patches of oxidation but overall, the barrels are guite nice. The action and locks show about 85% faded original color case hardened finish which is vivid in protected areas and shows more of a mottled pewter color where fading has occurred. The triggerguard shows about 50% original blue with the tang showing honest use and now bearing a pleasing smooth brown patina. The checkered half pistolorip buttstock and splinter forend are of nicely figured Circassian walnut and rate excellent with 95% original finish remaining and with checkering remaining sharp. There is a plain monogram plate in the toeline of stock and the stock wears its original checkered hard rubber shotgun buttplate and horn forend tip inlay. Sutherland's lists the last serial number as 22683 within the ranges for each year, under serial numbers he states the last number was 22690 making this one of the very last of these fine shotguns ever produced. A lovely example of the Colt 1878 double gun. (1C10097-13) {ANTIQUE} (3500/5500) Est. 3,500 - 5,500

Fine Colt Model 1878 Double Hammergun serial #6075, 12 ga. (tube set installed making it a 20 bore with 2 3/4" chambers), 30" Damascus barrels with bright excellent bores and constrictions of .004" and .016". This shotgun remains in a very fine state of preservation. The barrels show lots of original brown finish with strong, vivid damascus pattern showing their entire length. The action and locks show the typical simple border engraving and retain over 90% original color case hardened finish which remains quite vivid on the locks and somewhat more subdued on the belly. The checkered straight grip buttstock and splinter forend are of nicely figured walnut and rate excellent with 95% original finish remaining and with crisp checkering. The shotgun has a 14 1/2" length of pull with drops of 1 7/8" and 3". With the tubes installed the shotgun is a bit hefty weighing in at just a smidge over 8 1/2 lbs. A Briley knock-out tool is included. A nice, high condition 1878 which can have the tubes popped out for a purist collector or can be left as it is for the nostalgic shooter. Colt hammerguns from the 1880's rarely show this much original finish. (1B10206-49) {ANTIQUE} (2000/3000) Est. 2,000 - 3,000 Winchester Model 1885 Special Order High Wall Rifle serial #92077, 38-55, 36" No. 4 weight barrel with a very good bright bore that shows a little light pitting at the throat. In addition to the longer than standard barrel, this rifle also features special order close coupled double set triggers and special Lyman sights. This 1902 production rifle is properly upproofed and remains in nice honest, original condition. The barrel shows about 75% evenly thinning original blue which is blending with a smooth brown patina in areas and turning to a silver gray on high edges. The action shows about 70% original blue with areas of loss showing a pleasing smooth brown patina and striations visible on the right side of action. All metal surfaces remain smooth and free of pitting. The hammer and lever show faded original color case hardened finish blending with a pleasing smooth gray patina. The walnut buttstock and forend rate about very good plus to excellent with light to moderate handling marks on the butt, particularly along the toeline. The stocks show about 95% original finish overall with some light thinning on the forend. The rifle is sighted with a Beach combination front, open sporting rear and a Lyman cup disc folding tang mounted peepsight which is windage and elevation adjustable. The rifle comes with a factory letter which lists the rifle as follows: Rifle, 38/55, Octagon No. 4 Weight barrel, 36 inches, set trigger, Lyman rear cup disc, Lyman combination front and the rifle was received on November 24th, 1902, and shipped November 20th, 1902 (clearly a mistake in the dates). A very nice and completely honest special order High Wall rifle, (1B10206-37) {C&R} (3000/5000) Est. 3,000 - 5,000

nole and the nosecap shows very nice refreshed case-hardened colors and a neatly filled-in sling swivel hole on the bottom. The checkered
and a neatly filled-in sling swivel hole on the bottom. The checkered
distolgrip deluxe walnut buttstock and short forend remain in very fine
condition showing mostly worn varnish, some scattered light dings and
nild handling marks. There is a neatly filled-in sling swivel hole along
he toe line and a very thin 1 1/4" hairline crack right of the upper tang
hat is easily missed at first glance. The ebony pistolgrip insert is intact
and the wood exhibits won-derful grain figure throughout. Stock fit emains excellent as well and the left side tang shows "2104 XXX"
natching "2104" stamped on the upper tang inletting of the stock.
ength-of-pull is about 12 13/16". The rifle is sighted with platinum line
express rear sights with standing 50/100 yard wide v-notch and flip-up
200 and 300 yard leaves and low-profiled plain bead on matted ramp
ront sight. The action seems to function smartly. Another deluxe short
ifle is pictured and described on page 222 of The Winchester Book by
Madis which has iden-tical sights and is also marked by Holland &
Holland. This rifle was no doubt also regulated by H&H or at least
nother fine British firm. The included factory letter indicates this rifle
hipped from the warehouse on February 9, 1885 originally with a half
nagazine (perhaps replaced with the current full magazine in England).
Il other features are called out on the letter and correct. A very
ttractive rifle in a desirable configuration. (13F10144-5) {ANTIQUE}
10,000/15,000)
Est. 10,000 - 15,000

serial #23384, 50-95, 26" octagon barrel with full magazine and a mostly bright very good bore showing scattered areas of light pitting and otherwise strong rifling. This is a very handsome and interesting rifle which, after numerous trips back and forth from the factory, is in its current configuration. According to the included factory letter, the rifle orig-inally left in August 1882 as a round barrel express short rifle with checkered stocks and half magazine. It was then re-turned two months later in October for the addition of factory sling swivel eyes and swapping the barrel to octagon before being returned again just three days later to again swap the barrel out for a round one (perhaps the initial barrel change was a factory mistake?). It was returned one last time in November 1884 and changed to what is listed as "Rifle, Express, Octagon Barrel, Plain Trigger", while not a lot to go on this presumably indicates its current configuration. It then sat around the warehouse until it shipped out again in December 1886, probably resold. The barrel and magazine retain about 95% factory refurbished rust blue with most of the loss due to some discolored gray-brown speckling scattered along the length of the barrel, mostly noticeable under bright light, a couple small dings and some thinning to grav along the magazine. The receiver has also been factory refurbished, likely before the 1886 resale, retaining about 96-97% lovely bright blue showing some sparse aray-brown speckling and light flaking along the tangs. The hammer. lever and crescent buttplate all show lovely vibrant case-hardened colors, the lever with some muting to smoky gray. The loading gate retains almost all of its lovely brilliant fire blue. The cartridge lifter is a mild ocher patina and retains strong cartridge markings and all other markings remain intact and strong including the two-line express markings on the dust cover. The inside lower tang shows "\$385" stamped on the left side. The smooth walnut buttstock and forend remain in very good plus condition showing an old oil finish with some scattered light dings and handling marks, the forend with a more moderate 1 1/4" rectangular abrasion along the right edge behind the nosecap. Buttstock fit is a hair shy around the tangs and there is a slightly faded stamp at the heel "J137'. The rifle is sighted with standard sporting rear sight, small German silver blade front sight, and the action seems to function well mechanically. A very attractive second model express rifle with an interesting history. (13E10144-4) {ANTIQUE} (10,000/15,000) Est. 10,000 - 15,000 Very Fine Remington Hepburn No. 3 Sporting and Target Rifle serial #6290, 40 2 1/2, 28" octagon barrel with a bright excellent bore. The barrel of this lovely rifle retains about 96-97% original blue with most of the loss due to some scattered light freckling, a few light dings along the edges and some faint toning to plum-brown under bright light. The action retains about 97% wonderful vibrant case-hardened colors showing some areas of very faint muting, mostly along the lower tang and a little bit of mild gray-brown speckling. The buttplate retains about 90% vibrant colors toning to silvery gray around the edges while the lever is a smoky gray case-hardened patina, and the nosecap is an attractive silvery case-hardened patina. The breechblock retains about 98% original bright blue and the remaining small parts retain strong fire blue, the finish on the rear sight particularly brilliant. The E. Remington & Sons barrel address remains crisp and clear and the barrel is matching the frame. The checkered round knob pistolorip walnut buttstock and smooth forend remain in very fine condition retaining a healthy amount of original oil finish showing some lightly chipped points, a very tiny drying crack forming at the upper tang and some scattered light dings. Interestingly it appears the gun was struck with some birdshot as there are about eight small dents on the left side butt and bottom of the pistolorip and one on the comb line that still has a piece of lead shot embedded in it! The stocks and buttplate are matching the frame and the fit remains excellent. The rifle is sighted with a standard sporting rear sight, small German silver blade front and an unmarked period tang sight with wide aperture disc and no range markings. The action seems to function well mechanically. This rifle is pictured on pages 48 and 49 in Remington's No. 3 Hepburn by Rowe, there is a typographical error as the serial number is listed as "6390" but it is undoubtedly this rifle and admittedly the "2" on the tang could be misconstrued as a "3". The author notes the unusual tang sight and speculates that it is not a Remington factory offering. A wonderful example of these fine Remington sporting rifles. (13C9790-79) {ANTIQUE} [Bob Borcherdt Collection] (2000/4000) Est. 2,000 - 4,000

83 Attractive Remington Hepburn No. 3 Sporting Rifle Rare Remington Hepburn No. 3 High Power Special Order Rifle 85 serial #5781, 32-40 Remington, 32" octagon barrel with a bright near serial #9778, 30-40 Krag, 29 1/2" round barrel with an about very good excellent bore showing a few scattered small minor pits and otherwise bore showing darkness and light oxidation in the grooves with otherwise crisp rifling. The barrel of this nice rifle retains about 95% original blue strong rifling throughout. This is a solid example of the rare showing some mild edge wear, light handling marks and areas toning to late-production "High Power" rifle with the added bonus of special order pleasant plum-brown patina under bright light. The barrel shows crisp E. double set triggers. The barrel of this rifle shows generous original blue Remington & Sons address and the cartridge designation appears to throughout that is toning overall to an attractive rich plum-brown patina have been factory over-struck to read "32. 2 1/8". The action retains showing some silvering along the sides of the muzzle and some about 97% lovely vibrant case-hardened colors showing a little subtle scattered very small spots of old oxidation. The barrel shows Remington muting and mild gray speckles mostly along the tangs. The buttplate and Arms Co. address and "30-40" cartridge designation. The action shows steel forend schnabel also show lovely colors, the breechblock retains about 60% vibrant case-hardened colors with the balance taking on a about 98% original bright blue and the hammer and trigger show fine speckled gray-brown patina. The breechblock and hammer retain about brilliant fire blue. The checkered walnut pistolgrip buttstock and smooth 90% original bright blue, many of the screw heads retaining good fire forend remain in very fine condition retaining most of their original oil blue, and the set triggers with nice straw color. The checkered walnut finish, the buttstock with a small dent behind the pistolgrip, some lightly round knob pistolgrip buttstock and smooth forend remain in very good chipped points and the expected scattered handling marks. It appears a plus condition retaining about 85-90% original varnish, the forend with small tag or plate was pinned into the toe line long ago, only two small more wear overall, along with a couple tiny drying cracks and the vacant holes and a vague outline now visible. Strangely, this rifle is an expected overall light dings. The ebony tip insert is present and the butt assortment of numbers, the barrel and forend are "5534" and the is fitted with the late-style rifle buttplate; length-of-pull is very short at buttstock and buttplate are "675" though the fit of everything is excellent about 12 1/4", if the buttstock was shortened it was certainly very long overall. The rifle is sighted with standard sporting rear sight, German ago and well-executed as the fit of the buttplate is very nice. The lower silver blade front and the action seems to function well mechanically. tang of this rifle does not bear a serial number though the barrel, forend, This serial number is listed in the survey on page 412 of Remington's buttstock and buttplate are all numbered "9778". The rifle is sighted with semi-buckhorn rear sporting sight, brass blade front (the blade itself a No. 3 Hepburn by Rowe. (13C9790-82) {ANTIQUE} [Bob Borcherdt Collection1 (3500/5000) period replacement) and the action seems to function well mechanically. Est. 3.500 - 5.000 This rifle is pictured and described along with only one other High Power 84 Extremely Rare & Very Fine Remington Hepburn No. 3 C Grade Long Hepburn on pages 62 and 63 of Remington's No. 3 Hepburn by Rowe. Range Creedmoor Rifle with Factory Cased Sights The author does not believe that more than 25 of this variation were serial #87, 44 2 6/10, 34" round barrel with Rigby breech flats and a made. (13C9790-73) {C&R} [Bob Borcherdt Collection] (4000/6000) bright excellent bore. This is a wonderful rifle pictured and described on Est. 4,000 - 6,000 pages 164 & 165 of Remington's No. 3 Hepburn by Rowe, though there 86 Winchester Model 1886 Lever Action Short Rifle is an honest typographical error in the serial number listed as "58" in the serial #95955, 38-70 WCF, 22" octagon barrel with full magazine and a book; it is clearly the same rifle. The author notes this is the only long fair-good bore, the first third of the bore forward of the breech showing range Creedmoor rifle known that he felt comfortable definitively moderate oxidation and pitting, but the balance is otherwise bright with classifying as a C Grade and is also accompanied by the only known crisp rifling. This is a handsome rifle that was perhaps reconfigured into factory cased set of long range sights. Condition is lovely with the barrel a short rifle long ago, the included factory letter only indicating it as an retaining about 97% original blue showing a few scattered mild handling octagon barrel rifle with no length stated. The barrel and magazine of marks and some faint thinning to a pleasant gray patina under bright this rifle retain about 90-92% original blue showing some edge wear, light. The barrel retains nice markings with E. Remington & Sons scattered light handling marks and overall toning to a deep plum-brown address, cartridge designation and Hepburn patent marking stamped on patina under bright light. The hanger and front sight dovetails show the bottom breech flat beneath the forend. The action retains about some light tool marks and are not quite perfectly cut but their spacing 96-97% vibrant case-hardened colors which show a little subtle muting and measurements are consistent with factory standards. The action along the lower tang and some very minor gray speckling here and retains about 92% lovely case-hardened colors that show some overall there. The breechblock retains 99% original bright blue, the heel and fading and muting, with the bottom metal and lever toning to bright tang sight bases retain about 95% bright blue and the hammer, trigger silvery case-hardened patina, along with a little bit of old mild oxidation and a number of screw heads show beautiful brilliant fire blue. The staining mostly along the lever. The colors in the protected areas remain frame shows crisp Hepburn patent date on the lower right side. The particularly vibrant. The bolt and loading lever retain about 97-98% checkered deluxe walnut round knob pistolgrip buttstock and forend original blue and all markings remain intact and strong. The smooth remain in excellent condition retaining about 98% original finish showing walnut buttstock and long forend remain in very fine condition retaining a few tiny dings and light handling marks scattered about. Stock fit is about 90% original varnish with some areas of mild thinning finish and some scattered light dings and handling marks. Stock fit is excellent and excellent with crisp checkering and lovely grain figure showing attractive tiger striping. The forend is equipped with smooth hard rubber tip and the rifle is sighted with standard sporting rear sight and small German the butt with checkered black hard rubber shotgun-style buttplate that silver blade front. The action seems to function well mechanically. The rate excellent. The serialized parts are matching the frame and the included factory letter indicates it was received in the warehouse January 12, 1895 and apparently sat around for nine years until it action seems to function well mechanically. The original sight set is also shipped out on March 7, 1904. (13C10144-12) {ANTIQUE} (6000/9000) wonderful, the leather-covered case remaining in very fine to near Est. 6.000 - 9.000 excellent condition showing a few light scuffs and handling marks along 87 Early & Desirable Smith & Wesson No. 3 First Model "Vent Hole" the edges of the lid. The lid shows gold embossed "Vernier & Wind-Gauge Sights / for / Remington long range Rifle". The interior is American Revolver lined in a fine deep purple baize and all accouterments are intact (minus serial #50, 7" ribbed round barrel with a bright very good plus bore perhaps a couple front sight inserts). The sight parts retain about 95% showing some fine oxidation and frosting with otherwise crisp rifling original blue, the stem is stamped-numbered to the rifle "87" near the throughout. This is a very attractive and very early vent hole revolver, in bottom and shows some fine flaking and a few tiny pinprick pits. The full nickel finish and also with the scarce 7" barrel. The metal surfaces wide aperture disc and wind gauge front sight are in excellent condition, retain about 80-85% original nickel finish showing some overall flaking the left edge of the front sight numbered "21" which is matching the front along the sides to medium gray-brown patina along with some old sight base on the rifle and it is equipped with a rose-colored level. A oxidation speckling and scattered handling marks. The screw heads spare clear level is also provided and there are three inserts present show some light slot wear and the single line barrel address and patent including a fine bead, medium aperture and a semi-aperture with two dates remain crisp and clear. The smooth walnut grips remain in horizontal posts. A spectacular long range Hepburn suitable for the excellent condition retaining much of their oil finish showing some mild finest Remington or American arms collection. (13F9790-87) {ANTIQUE} edge wear and a tiny flake at the toe of the right panel hardly worth the [Bob Borcherdt Collection] (10,000/15,000) mention. Fit to the frame remains excellent and the right panel is Est. 10,000 - 15,000 appropriately stamp-numbered matching the frame. The other numbered parts are matching by assembly number, the ejector seems a little weak but this is relatively minor and barrel-to-frame fit is excellent. The action also seems to function well mechanically with solid timing and lock-up. This is a very handsome and super early First Model American, with a nice even two-digit serial number. An excellent example for the advanced Smith & Wesson collector. (13D10000-15) {ANTIQUE} [Roy Jinks Family Collection] (5000/7000) Est. 5,000 - 7,000

Lot Title/Description

Japanese Navy Smith & Wesson No. 3 Second Model Russian Revolve Exceptional Winchester Model 21 Grand American Two Barrel Set 90 serial #5637, 44 S&W Russian, 7" ribbed round barrel with a bright Presented To Henry Ford II On The Occasion of His 50th Birthday excellent bore showing one or two tiny specks of mild oxidation and serial #304101, 12 ga., 26" barrels choked improved cylinder and crisp rifling throughout. The metal surfaces of this revolver retain about modified and 30" barrels choked improved modified and full, all showing 60% original bright blue with overall flaking to deep plum-brown patina, bright excellent bores. This is the iconic Winchester Grand American along with some scattered old mild oxidation staining and light tool Model 21 shotgun, in perhaps what is the most versatile combination available, and it was presented to this legendary Detroit auto man who marks around the screw heads. The hammer and spur trigger retain a generous amount of silvery gray case-hardened patina with areas of arguably could be said to have saved the Ford Motor Company during a plum-brown, and the top latch retains about 95% original bright blue. time when Ford's domestic sales were in decline and their European The barrel address and patent dates remain crisp and clear as does the firms still suffering with war damage (at one point in 1943-44 Ford losing distinctive Japanese naval anchor stamp on the underside of the frame. over \$10 million a month). "Hank the Deuce" assumed the presidency in The revolver wears a set of un-numbered replacement checkered walnut September 1945 and immediately took the helm, bringing aboard top grips that remain in very fine condition showing some older added executives from GM as well as 10 young "up and comers" that the varnish and scattered light dings. The barrel hinge bushing does not industry deemed the "whiz kids", derived from the Army Air Force. Fresh from their logistical challenges of the Second World War, these men seat properly and is a little loose causing the barrel-to-frame fit to exhibit play. The cylinder appears to have been Japanese arsenal-renumbered updated management control systems, helped control costs, and instituted modern recruitment and career training programs for to match and the other numbered parts are also matching. The action is otherwise functional with good timing and lock-up. (13B10000-111) FOMOCO. Hank II's aggressive management tactics coupled with his {ANTIQUE} [Roy Jinks Family Collection] (2000/3000) ability to surround himself with the best and brightest in the automotive field rapidly restored the company's financial health by the mid-1950s Very Rare Turkish Contract Smith & Wesson No. 3 Transitional Model and greatly expanded Ford's operations in overseas markets. It was on his watch that two of the most iconic Ford Motor cars ever produced serial #913, 44 Henry RF, 7" ribbed round barrel with a partially bright were unveiled, the upscale Thunderbird, at the Detroit auto show in '54 and the forever iconic Mustang at Ford Motor Company's pavilion at the very good bore showing scattered areas of light pitting and oxidation with otherwise strong rifling throughout. This is a very rare revolver, one New York World's Fair in '64. The Mustang set the industry record for of the first lot of 1.000 revolvers built on special contract for Turkey with sales during the first year with more than 418,000 units sold. At that time purpose-made rimfire frame before fully transitioning to the third model General Motors, Chrysler and AMC had nothing to match it, giving Ford revolver. The revolver is equipped with a second model-style barrel and a jump on an untapped market. Indeed, for the first time in its history. Ford Motor Company would become a publicly traded company in 1956, third model-style frame. The barrel and cylinder have mostly toned to a dark gray-brown patina with some areas of light to moderate pitting and under HF2's leadership. The gun itself was presented to Henry Ford II a bit of old oxidation staining. The barrel retains strong streaks of on the occasion of his 50th birthday in September 1967, in truth it was arsenal blue in the more protected areas and the single line barrel ordered on that occasion. Factory records show the order being placed address and patent dates remain mostly intact and strong. The frame September 28th with work commencing in October of that same year, retains perhaps 70% arsenal quality blue toning to gray-brown, again shipping to Nick Kusmit in May 1968 with final inspection being finished with some areas of light pitting and some tool marks around the screw later that same month. The "Sold to.." was T.S. Nichols of Olin, in New holes. The hammer and spur triggerguard are toning to gray, the York City and the "ship to" is none other than Henry Ford II himself in hammer with some hints of good colors lurking about. The lanyard ring Grosse Pointe Michigan. The factory letters confirm the configuration has been ground from the butt and the left side frame shows what is throughout. The 26" barrels retain all of their original blue showing only perhaps a later Turkish inventory stamp "11.35". The butt is stamped some very faint fading, are chambered for 2 3/4" shells, and have sharp with the correct small "W" inspector mark seen on Turkish contract guns. damascened engine turning on the undersides and on the face of the The smooth walnut grips remain in good condition having darkened from barrels showing little discernible wear. The sprays of en-graving over the the years with overall dings, handling marks and some slight warping at chambers remain crisp and the rib is of course marked "Custom-Built By the base of the right panel. The right panel is stamp-numbered "627' Winchester for Henry Ford II". The 30" tubes are identical and feature 3 and their fit remains quite good. There is a faint small five-pointed chambers, with the same crisp engraving and same field within the rib asterisk stamped at the top of the left panel and another small asterisk showing for whom this beautiful gun was custom-built. The frame retains stamped inside the barrel. The latch is numbered "57" while the barrel all of its original factory blue with lovely open scroll and the engine and cylinder are matching the frame by serial number. Barrel-to-frame fit turning on the water table and standing breech still very crisp, the remains solid and the action seems to function well mechanically with breech faces showing only light wear from the extractors. The left and nice timing and lock-up. A very solid example of an interesting contract right of frame have gold inlaid gun dogs of the beautiful quality Kusmit is arm, very rarely seen in this country. (13C10000-42) {ANTIQUE} [Roy known for, along with two pheasant on the belly of the frame, and a Jinks Family Collection] (2500/3500) dog's head in vignette on the bow of the triggerguard. "Safe" is inlaid in gold on the upper tang and "Grand American" is inlaid in gold on the lightly engraved steel pistolgrip cap which has a gold inlaid rope border as well; the selective trigger retains essentially all of its gold plate with only very light sharp edge wear. The checkered AA grade Amer-ican black walnut capped pistolgrip buttstock and both semi beavertail style forends all rate very fine to near excellent showing stunning grain figure in the butt, also with some light crazing of finish that comes from the years and the combination of highly figured wood, primarily near the buttplate and point of comb showing some very light flakes on each of the forends. Neatly affixed to the right side of the butt and verified in the factory letter is a gold presentation plate which reads "Presented To/Henry Ford 2/By His Friends And Directors/In Celebration Of /His 50th Birthday/Sep-tember 1967", the oval monogram plate along the toeline as well is engraved "HF II". The stock and both forearms are checkered in the factory 21B fleur-de-lis pattern, each of the forearms also with the appropriate ebony tip inserts. The forend metal on each remains in the same fine state of condition with beautiful engine turning throughout. The arm is listed with 14 1/4" pitch, 2 1/4" pull and 1 9/16" drop at the heel with a medium comb and the factory "Winchester Recoil Pad Leather Covered Style #2" remains intact and supple. The arm rides in a Winchester factory-provided leather luggage case, also delineated in the factory letter, embossed in black on the lid "HF II". The interior of the case is a bur-gundy color and rates excellent with a pair of nickel snap caps and the luggage straps. Both sets of barrels are tight on-face and the arm functions very well mechanically, although after all these years it doubtless could use a good cleaning. An extremely fine shotgun in an extremely fine state of condition belonging to this proud, influential, astute and aggressive businessman who was determined to see the

company that bore his forbearers name be brought to, and indeed surpass, its former glory. (3J10074-3) {C&R} (25,000/35,000)

Title/Description Lot

	Churchill Finest Quality Hercules Model Scalloped Boxlock Double
	Ejector-gun Belonging to Henry Ford II
	serial #23887, 20 ga. (2 3/4"), 28" barrels choked roughly im-proved
	cylinder and modified, showing bright excellent bores. This is a lovely 20
	bore on a di-minutive frame with assisted opening, once belonging to
	Henry Ford II, "Hank the Deuce" and remains in a lovely state of
	condition. The barrels retain 99% original blue showing per-haps some
	very very light fading and muzzle wear with perhaps a very sparsely
	scattered handling or rub mark here and there; the original burnished
	vertical striations on the breech faces remain visible showing only the
	slightest wear. They are maker marked on the barrels with the Pall Mall,
	St. James address and feature excellent quality wedges of engraving at
	the breeches flanking the wide end of the rebated rib. The scalloped
	boxlock frame shows overall tight English scroll with floral decorations at
	the screw heads and retains perhaps 98% original color case-hardening,
	fading only on the sharp edges of the carry point of frame and the ribs
	surrounding the fences. The bottom plate, triggerplate and long tang
	triggerguard retain nearly all of their original blue as well, the trigger with
	some pale fire blue. The straight grip English walnut buttstock rates
	excellent and shows some nice shimmering grain figure in the area of
	the butt with nice dropper points at the rear of the stock cheeks, crisp
	checkering and a rounded checkered butt for fast mounting. The toeline
	has very neatly inletted block initials "HF II" and the length of pull to the
	single nonselective trigger is 14 3/4" with drops of 1 3/8" and 2", showing
	about a full 1 1/8" of cast on (Mr. Ford was a left-hander). The splinter
	forend rates otherwise about excellent as well showing a couple flakes
	at its rear edge which appear to have been reattached at some point.
	The gun locks up tightly on face and has an automatic safety, single
	non-selective trigger, and ejectors and seems to function well
	mechanically. The arm comes in a nice leather luggage case with
	Churchill makers label on the interior of the appropriate period as the
	gun with "HF II" embossed in gray ink on the face. On the interior is a
	Churchill nickel silver oil bottle, wooden wiping rod, selection of Churchill
	shotgun patches and the keys to the case. The gun is tight, the top lever
	barely wants to close on the in-cluded nickeled Churchill snap caps and
	the arm appears to have seen little or no use with the years. A fabulous
	lit-tle smallbore double that points quickly and is just of the medicine if
	you are a left-hander like the venerable HF2. (3F10074-2) {C&R}

This interesting revolver has been engraved in an overall floral motif with gold band accenting at the muzzle and light open gold work midway down the barrel flanking a silver inlay atop the top barrel flat which reads "To Henry Ford 2". The gold intertwining repeats itself on the cylinder ahead of each of the stop notches with the cylinder and barrel retaining all of their nice post-engraving blue. The frame exhibits no vestiges of color case-hardening nor does the loading lever, likely finished a French gray when new, now drifting slightly to a tarnished pewter tone; the triggerguard is an ochre patina and is lightly engraved as well. The front and back straps show a very light bit of oxidation staining remnants and the backstrap is very neatly engraved in script "From Armando Masieri/Brescia Italy". The smooth Circassian walnut grips have a nice semi-gloss finish and rate very fine to perhaps near excellent with only scattered light handling marks from the years. The gun times and locks up as-new. Literally nothing can be gleaned about Armando Masieri except for one small narrative we were able to locate in the Danville Virginia newspaper "The Bee" of August 24, 1963, which has a small vignette in the social column which reads: "Maria Cristina Vettore Austin, a 36-year-old Italian who has been linked romantically with Henry Ford II, is spending the weekend at the Vilia of Italian industrialist Armando Masieri on the southwest shore of Lake Garda". Maria Cristina Vettore Austin was an Italian socialite who became better known as Cristina Ford after her marriage to Henry Ford II on February 19, 1965. Obviously some connection, perhaps Mr. Ford met Mr. Masieri

93	Parker GH Boxlock Double Shotgun with Ford Family Connection
	serial # 132211, 20 ga. (2 5/8"), 26" damascus steel barrels choked
	cylinder and modified, with bright about excellent bores which shows
	some remnants of some very light oxidation and some scattered light
	pitting, each tube with a few very tiny dings, barely worth the mention
	and likely not worth any effort to raise. The barrels show a nice fading
	brown and pewter damascus star pattern nearly their full length, the right
	tube with some oxidation and light pitting about halfway down its length,
	the left with some scattered oxidation staining. The frame zero is a plum
	brown and silvery gray patina with some sparsely scattered light
	oxidation here and there, primarily on the belly of the frame, but the
	engraving remains crisp. The checkered round knob English walnut
	buttstock was cracked completely through the wrist and has been
	re-affixed, likely sanded at that point as the checkering is smooth, the
	buttstock needing to be replaced. The splinter foreign rates very good
	with fading original varnish, good checkering and a dark oil soaked
	wood near the iron. Features automatic safety, double triggers and
	extractors, the gun does seem to function properly and is on-face with
	the top lever just about dead center. The arm comes with what is likely a
	repair box from Remington DuPont, the interior with appropriate
	cardboard inserts to protect the buttstock and barrels from one another
	during shipping. It was closed with a Remington DuPont red ball piece of
	packing tape and rates roughly very good to perhaps fine, the lid with a
	number of rips or tears or compressions. The exterior is marked in pencil
	on its face "Factory Job 1111-A Returned 4-30-47" and in the lower
	right-hand corner from this marking "Mr. H.F. II", this appearing to be in
	ink pen rather than pencil. The back is marked in black grease pencil
	"RP 4887-1". The included Parker letter shows shipment in October of
	1907 to the Fletcher Hardware Co. of Detroit to be sent to Ford Motor

Title/Description

Lot Title/Description

Masterful Dennis Kies Hidden Screw Engraved Colt Single Action Army 95 Revolver serial #S25592A, 45 Colt, 4 3/4" barrel with an unfired bore. This amazing revolver is devoid of any factory roll markings and features hidden screws on the frame with no telltale slots nor protrusions left or right. It retains all of its original amazing deep wet-look Royal-style blue. Kies has engraved the barrel with a wide open flowing foliate and acanthus leaf scroll of the finest quality with open flowing scroll atop the topstrap, dripping down the left and right of frame, the left with a small serpent emanating from the foliage. The rear shows a similar scroll with a wolf's head at left of recoil shield, the scroll emanating from its mouth. Each frame flat where we would normally find screws has bold lions heads, again the scroll emanating from their roaring mouths and ending in an inter-twined vine-like motif. The unfluted cylinder features a Griffin on left and a rampant lion on right, with a wonderful gold line inlay at its rear edge, a similar inlay on the rear of the barrel. The gold line bordering continues on both of the frame flat vignettes and the small diamond checkered panels at the rear of the triggerguard plate, with small gold foliate decorations at the roots of the triggerguard left and right. The knuckle atop the backstrap shows a very wolf-like gargoyle with scroll emanating from his jaws, with nice floral vine work and a checkered thumbprint down the backstrap. There are very tasteful sprigs of flow-ing scroll on the butt, bow of the guard and front extension of the trig-gerguard with a nice crosshatched X-motif at right of frame. scroll continuing onto the ejector rod housing. All of this lovely engraving is finished French gray by Mr. Kies giving a sharp contrast to the deep beautiful blue and gold embellishment on the gun. The gun is abso-lutely unturned since leaving Mr. Kies and the bright-polished sides of the hammer remained brilliant; it is signed on the radius of the frame just beneath the base pin. The arm has a very handsome mellow cream-colored one-piece ivory grip from Dan Chesiak which fits flaw-lessly and is as-new. Included is a blue two-piece Colt Custom Shop box with no outer sleeve. We have come to expect stunning work from Mr. Kies, the combination of this revolver's subject matter, final treat-ments of the three contrasting finishes, and the fact that the frame has hidden screws, put this revolver in another level, head and shoulders above typical custom-engraved arms. (3E10247-6) {MODERN} (7000/9000) Est. 7,000 - 9,000 96 U.S. M15 General Officer Model Pistol Belonging to Brigadier General William Bennett Hurley, 26th Infantry Division serial #GO 187, 45 ACP, 4 1/4" barrel with a bright excellent bore. The metal surfaces retain about 97% original blue, the loss due to light high edge carry wear, consistent with holster use, the trigger retaining its original chrome plate, showing some very slight flaking at left rear, the bright-polished sides of the hammer showing a bit of staining at the spur. The fully checkered walnut grips rate about excellent with the Rock Island Arsenal crossed cannon flaming bomb inlay on right and the left grip with the oval monogram plate neatly engraved "General/W.P. Hurley", the left grip showing a few chipped points. The gun functions properly mechanically and clearly shows signs of being carried and used but was well-cared for. Included with the gun are appropriate dress leather and field belt-holster rigs. Field rig features an OD Green web belt with black cordura flap holster. The dress belt rig shows some very light scuffing and wear and features a holster appropriate for the M15 pistol, the magazine pouch appears to be for double stack Beretta M9 magazines, however a Colt Government Model magazine will fit. The magazine included with the gun is properly scratch-numbered to the pistol "187" at its right bottom. Brig. Gen. William Bennett Hurley, 26th Division, Massachusetts National Guard was 101st Engineer Co. commander. Deputy G4 in the division, instructor at the Command and General Staff College, Brigade Commander of the 1022 Civil Affairs Division and was the Deputy Chief of the US Army Corps of Engineers Emergency Operations Center at the Pentagon. He was a past president of the first Corps of Cadets and a member of the Ancient and Honorable Artillery Company. Gen. Hurley served with the 26th Division Massachusetts National Guard for 40 years and retired as a Brig. Gen. in 2005. In civilian life he was a lifelong educator earning a doctorate from Johnson and Wales and was an Adjunct Professor at North Shore and Cambridge Colleges, teaching right up until his passing. The pistol is listed by serial number in the Colt US General Officers Pistol © Greeley. A very nice pistol-rig combination in a fine state of condition that was clearly used and enjoyed by its owner. U.S. M15 Duplicate Serial Number General Officer Model Pistol Issued	
To Major General Freeman H. Forrest	
serial #GO 178, 45 ACP, 4 1/4" barrel with a bright excellent bore. The	
metal surfaces on this very nice General Officer Model pistol retain 98%	
plus original blue showing only some very light, very sparse sharp edge	
wear and a few very tiny scratches on the slide itself. The chrome plated	
trigger is as-new and the barrel polish remains brilliant with the tiniest bit	
of oxidation staining at the spur of the hammer. The checkered walnut	
grips rate excellent to as-new with a crisp right side Rock Island Arsenal	
crossed cannon flaming bomb insignia and the chrome oval monogram	
plate in the left grip un-engraved. The arm functions properly	
mechanically and comes with two original magazines nicely	
scratch-numbered to the gun on their lower right side "178". Included	
with the pistol is a nice officer's dress belt with gold-tone buckle with	
Federal Eagle and acanthus leaves showing only some very light wear	
along its top edge. There is included an as-new leather dual magazine	
pouch dated 1962, Bucheimer Deputy model B16-74 right-handed belt	
hol-ster for the pistol as well as a field-modified shoulder holster which	
now appears to have had belt loops affixed, no doubt something of the	
generals own design. Interestingly the Rock Island Arsenal Museum	
also holds Gen-eral Officer Model pistol serial #GO 178, that example	
built on an Ithaca M1911A1 pistol made in 1943 (small arms exhibit	
panel 4). The story being that is the first such pistol built, but rather than	
having "GO 1" on hand, the Armorer added the "78" at a later date, to	
make the gun less enticing to any "brass' that might otherwise	
requisition serial number "1" and remove it from the Arsenal collection. A	
native of Minnesota, Freeman enlisted in the Marine Corps officer	
training program in 1942 and after 3 1/2 years of service during the	
Second World War returned to the states to graduate from Notre Dame	
in 1948. Following his return to civilian life Mike served in the Iowa	
National Guard, in the 34th Infantry Division and upon completion of his	
Guard service, served as Chief of Staff in the Iowa National Guard	
Emergency Operations Headquarters, transferring to the Army Reserve.	
In the Army Reserve he was Commandant of the 5040th US Army	
Reserve School, Commander 205th Infantry Brigade and Commander	
88th United States Army Reserve Command. Mike was appointed	
Principal Member for Fifth United States Army to the Army Reserve	
Forces Policy Committee from 1978 to 1981. Major General Forrest	
retired from military service in 1983 with the Army Distinguished Service	
Medal. In civilian life he practiced as an attorney and would become an	
assistant Atty. Gen. for the state of Iowa, returning for a while to private	
practice and upon his retirement went to Washington, DC for a year,	
adjudicating military claims. He would be appointed by Governor	
Branstad as the first lowa drug policy coordinator upon his return to the	
state and was instrumental in formation of both the Iowa Substance	
Abuse Consortium at the University of Iowa, and the Iowa Research	
Council in Des Moines. Among his other many accolades he was	
honored as an "Honorary Judge" by the Iowa Judges Association for his	
long career of public service. The U.S. General Officer Pistol by	
Williams-Brunner list this serial number as-issued to General Forrest in	
1973. A very nice, very complete Gen. Officers pistol rig belonging to	
this dedicated military man and public servant. (3C10090-103)	
{MODERN} (6000/8000)

 Rare Smith & Wesson Model 1950 Military Hand Ejector Revolver	
serial #S86693, 45 ACP, 5 1/2" barrel with an excellent bore. This	
excellent revolver is a descendent of the U.S. Model 1917 with several	
post war improvements. There was only a tad less than 4,000 of this	
model manufactured making it a scarce and desirable gun. This gun	
retains about 97% original blue, the barrel and cylinder have light high	
edge wear with some thinning, a few very light handling marks, and	
minor blemishes from oxidation. The service trigger and hammer retain	
bold case-hardened colors. The diamond checkered hardwood grips	l
with silver S&W medallions are numbered to another gun but rate near	
excellent showing a few handling marks. The appropriate parts are	
numbered to the gun, the action is crisp and it times and locks up	
correctly. A factory letter is included and indicates this gun was shipped	
on July 22, 1952, to Belknap Hardware Co., Louisville, Kentucky. This is	
one of those post war guns that did not seem to click with shooters, but	1

the collectors love it. (8A10090-15) {C&R} (1800/2200)

Lot Title/Description

Lot Title/Description

Fine British Percussion Match Rifle by George Gibbs

105 Colt Python "The First 4 Inch Barrel" Double Action Revolver serial #253, 357 Magnum, 4" barrel with a bright excellent bore. This is a rather storied early Python, leaving Colt in 1955, a full five or more years before the 4" barrel was offered, shipping as a 6" gun. Purchased by a Mr. Phillip Perry in Illinois in 1956 while working for his Police Department, which only allowed 4 inch barreled guns as duty arms, he immediately brought the gun to the famous Tommy Haas, who expertly shortened the barrel, matching the original factory profile and set-back at muzzle precisely. A copy of his original sales receipt with serial number, dated February of 1956 is included along with two detailed letters from the owner describe the modification. He further goes on to detail a joint Police Shoot in May 1959, sponsored by Colt Firearms and Indiana University, in-which he was shooting his 4" Python, which drew the attention of many of the shooters, but also the Colt reps. on-hand. One of them (Bob Matt) convinced Officer Perry to let him take the gun back to Colt's for study and inspection. An included copy of a December 1959 dated letter to Mr. Perry from Mr. Robert Matt at Colt's thanks him, tells him the Colt Custom department has cleaned his revolver for him and put it in A-1 Condition, and mentions precisely: "The Research and Development Department here at Colt's were very much interested in seeing your weapon. They joined me in thanking you for permitting me to bring the gun to the factory for their inspection." One can easily surmise, this arm was indeed the seed that blossomed into the four-inch Colt Python revolver just a year or so later. (Matt himself was a former Indiana State Trooper and the Director of Public Relations at Colt.) The gun shows carry wear associated with holster use, retaining perhaps 92-95% original blue. The action is slick as glass and timing and lock-up are perfect. The fully checkered American walnut silver Rampant Colt medallion grips rate excellent to as-new. Officer Perry having replaced them with a pair of finger groove grips for carry; those grips are included with the gun as well. Later on Officer Perry replaced the factory sights with a set of Millet orange bar front - white outline rear sights, but if one wished, factory sights could easily be put back on the gun. Included is the copy of the return letter from Bob Matt at Colt's, a letter from Perry to Mr. S.P. Fjestad at the NRA, and another to Roy Huntington at Publisher's Development Corp (American Handgunner, GUNS Magazine and Shooting Industry), both letters detailing the history of the gun, its modifications and the fact that he still had the original grips, sights and piece of cut-off barrel, hoping they would wish to do an article on the gun (the piece of barrel is also included with the gun), as-mentioned, the original sales receipt (Officer Perry was 24 at the time of the purchase of his Python), and two copies of "Guns" magazine, one from February 1960 in-which there is a detailed article on the very match Mr. Perry participated in when he met Mr. Matt of Colt (it is in fact the cover story) and a June 1961 issue in-which Mr. Matt is shown shooting a 6" Colt Python in multiple shooting positions at the very same Indiana University police training facility. A very handsome example, that saw honest, likely daily use, and has an irrefutable connection to the development of the iconic 4" barrel Python we know today. (3B10051-87) {C&R} (4000/6000) Est. 4,000 - 6,000 106 Sharps Borchardt Model 1878 "Short Range" Rifle serial #16856, 32 CF, 25 3/4" octagon barrel with a bright very fine to near excellent bore showing a little bit of light pitting ahead of the chamber and otherwise strong rifling throughout. The barrel of this rifle is completely unmarked but appears to be from the period of use, it is of excellent quality and has been very nicely installed. The barrel retains about 95% fine plum-brown finish with silvering along the high edges and some light handling marks along the underside. The action retains about 97% lovely vibrant case-hardened colors showing some muting to pewter along the lever and some scattered mild grav-brown speckling. the markings along the left side were only partially struck. The screw heads and tang sight screw show fine brilliant fire blue and the remaining sight parts all retain most of their original bright blue. The checkered capped pistolgrip walnut buttstock and forend with slight schnabel tip remain in very fine to near excellent condition retaining about 95% original varnish showing some scattered very light dings and handling marks. The fluted horn pistolgrip cap rates excellent and the buttstock features a dainty left-side cheekpiece and Swiss-style buttplate that has toned to a mild ocher brass patina. Disassembly reveals the buttplate, buttstock and forend are all un-numbered and unmarked though their fit is excellent. The action seems to function well mechanically and the rifle is sighted with a short range-style tang sight that shows three hash marks along the left side with one of them marked only "10", standard sporting rear and small German silver blade front. Testing indicates the rifle may be chambered for the 32-40 cartridge, though a competent gunsmith should be consulted for a proper chamber cast. A very attractive and interesting Sharps Borchardt rifle. (13D9790-86) {ANTIQUE} [Bob Borcherdt Collection] (4000/6000) Est. 4,000 - 6,000

serial #309, .451 cal, 36" round barrel with Rigby breech flats, Metford patent rifling and a bright very fine to near excellent bore showing a few scattered pinprick pits and strong rifling throughout. The barrel of this handsome rifle retains about 92-94% original blue showing some scattered small areas of old mild oxidation staining, handling marks and overall toning to a pleasant plum-brown patina under bright light. The patent breech features a platinum blowout plug and retains generous vibrant case-hardened colors. The barrel is marked "METFORD'S PATENT. 309." and "GEORGE GIBBS. 29. CORN STREET. BRISTOL". There is a neatly engraved "ME" monogram atop the breech and the undersides of the barrel and breech show London proof marks and matching "309". The "LAC"-marked lockplate is toning to a smoky gray patina with a little fine pinprick pitting along the harmer and some generous vibrant case-hardened colors in the protected areas. The upper tang, triggerguard and smooth steel buttplate are all toning to a nice mild gray patina. The checkered capped pistolgrip English walnut stock remains in very fine condition showing a little bit of older added finish with a couple scattered light dings and handling marks. The diamond point checkering shows a little overall wear and otherwise remains intact and quite strong and the stock shows some lovely grain figure throughout. The horn forend tip and pistolgrip cap remain in excellent condition and the barrel is secured via single wedge. The rear tang sight is George Gibbs-marked and features a wide aperture disc with smaller separate eyepiece, peep sight and clear insert. The left side is marked "Radn 37.8" and with increments 0 to 3. The front sight is a rather complicated affair featuring a heavy brass base, thick target globe with fine bead-on-post and is finely adjustable for windage and also equipped with a spirit level. An unmarked heavy knurled ramrod guide is included and the lock is equipped with a sliding safety and seems to function well mechanically. A very
Est. 5,000 - 7,000 Scottish Field's Patent Falling Block Rifle by J. MacNaughton serial #2091, 450 BPE, 28 3/4" barrel with Henry rifling and a bright near excellent bore showing a few tiny pinprick pits and strong rifling throughout. The barrel of this fine rifle retains about 99% excellent quality restored blue finish showing a few scattered light handling marks and some areas taking on a slight plum patina under bright light. The top of the barrel is flat showing nice fine line matting and all markings are completely intact and unmolested with "JAMES MACNAUGHTON, 26 HANOVER ST. EDINBURGH & PERTH" address and the underside beneath the forend showing original cartridge designation and Birmingham black powder proofs. The action retains strong original case-hardened colors throughout, particularly vibrant along the left side and protected areas around the hammer and triggerguard, with overall muting and toning to a pleasant silvery case-hardened patina along with a little mild gray speckling. The breechblock sidelever retains about 97% bright blue and the screw heads all show wonderful brilliant fire blue. The left side action show Field's patent information and maker's name. The checkered capped pistolgrip English walnut buttstock and forend remain in very fine condition as nicely refinished long ago, the forend with a bit more wear showing some scattered old dings in the checkering. The pistolgrip retains nice flattop diamond checkering and is a little shy of the tangs, the horn pistolgrip cap rates excellent and the smooth steel buttplate shows a fine restored fire blue finish. The rifle is equipped with sling swivel eyes, standing 100 yard wide v-notch rear sight with platinum line and flip-up 300 yard leaf and a low profile ivory bead front sight. Length-of-pull is about 14 5/8", weight is 7 1/2 pounds and the action seems to function well mechanically. A lovely falling block sporting rifle from this quality Scottish maker. Lot Title/Description

Magnificent Gustave Young Engraved and Gold Inlaid Smith & Wesson Model 1 1/2 Second Issue Factory Exhibition Revolver serial #30451, 32 RF, 3 1/2" barrel with an as-new bore. This revolver was made and embellished to be used by the factory as a promotional display piece and was later retained by company founding partner Horace Smith. This revolver represents the pinnacle of embellished Smith & Wesson arms, completed and delivered to Gustave Young in January of 1868. When embellishment was complete the revolver, with its original case, was delivered to the office of D.B. Wesson to be used as an example of Smith & Wesson's high-quality craftsmanship. The engraving is very extensive with fine relief scroll in near full coverage including spine and sides of hammer and full coverage on the cylinder stop mounted in top-strap. The gold inlay work includes double bands at muzzle and rear of cylinder, each side of barrel also shows a vine with clusters of grapes and grape leaves. The cylinder shows gold inlaid scroll between each flute, each is identically formed and symmetrical. The left side of the frame shows more wonderful gold inlaid scroll surrounding a field with script initials which are beautifully executed stylistically but very difficult to decipher. There appears to be an "S' among the letters but aside from that, it is difficult to even decipher how many letters there are. The right side of the frame shows another area of gold inlaid scroll with a dog's or wolf's head at center with scroll emanating from its open mouth. There is an addition area of gold scroll on the top of the backstrap, this with an eagle head at center with scroll emanating from its mouth. The revolver wears its original mother-of-pearl grips which are carved in relief scroll, which was also completed by Gustave Young. The revolver remains in stunning condition retaining 95% bright original blue finish overall with only noticeable loss being some light thinning on the backstrap. The front strap shows strong bright blue; it is only the backstrap below the gold where there is thinning on the high surfaces. The hammer and ejector rod show virtually all of their brilliant original color case hard-ened finish. The revolver comes in its original walnut presentation case which is shows beautiful figure and is of very fine quality construction. The sides of the case are made from the same piece of walnut so when the case is closed the grain matches. The interior of the case is lined in blue baize with a covered cartridge compartment along with a smaller open compartment. The covered compartment appears to be a cartridge block but the cartridges in the block are permanently affixed dummy rounds which can be used to remove the lid and expose the interior. This is further evidence that the revolver was created as an exhibition piece, intended to display with cartridges but designed so it could not be loaded from the shell block. The condition of the case is as superb as the con-dition of the revolver. While Smith & Wesson records are not detailed as to which exhibitions par-ticular arms were displayed at, it can be easily surmised that this gun was displayed at World Exhibitions in Europe and perhaps at the Centennial exhibition in Philadelphia where arms makers brought out their finest, most beautifully embellished arms. The revolver was also part of the Springfield History Museum Tour which toured U.S. museums from 1991 until 1995. This tour was entitled "Artistry in Arms" and was an exhibit of fine and highly embellished Smith & Wesson arms. The tour spanned four years and 8 different museums including the Gene Autry Western Heritage Museum in Los Angeles, the Buffalo Bill Center of the West Museum in Cody, Wyoming, the National Cowboy Hall of Fame in Oklahoma City among others. The revolver appears in several publications including the dust jacket of The History of Smith & Wesson by Roy Jinks, on page 143 of Colt Engraving by Wilson, on pages 10, 57 and 63 of Artistry in Arms by Roy Jinks. The revolver was acquired by Mr. Jinks in 1973 from Mr. Fred Miller who was the assistant sales manager for Smith & Wesson, later becoming the sales manager for the company. Mr. Miller told Mr. Jinks that he acquired the revolver from a descendent of the Horace Smith family. This is truly one of the very finest Smith & Wesson revolvers ever completed by the company in their 170 years in business. It was originally delivered to the office of D.B. Wesson and then retained by the company's other founder Horace Smith, a true testament to its quality and importance. A Gustave Young masterpiece worthy of the very finest private or institutional collection of antique arms. (110000-121) {ANTIQUE} [Roy Jinks Family Collection] (75,000/125,000) Est. 75,000 - 125,000

121	Stunning Weatherby Crown Custom Mark V Left Hand Bolt Action Rifle serial #24322, 300 Weatherby Magnum, 24" barrel with an excellent bore. The metal surfaces retain 99% original high-polish blue, the receiver, bolt and floorplate have all drifted to plum and factory markings are crisp. The underside of the smooth-knob bolt handle is correctly-marked "4322" and the follower and fluted bolt body are bright with a tight damascened pattern and no operational wear to speak of. The floorplate and triggerguard are engraved with crisp flowing scroll, the former further-embellished with a very well-done in-relief gold white-tail buck game scene. The skip-line checkered mesquite Monte Carlo stock with right-side cheekpiece and rosewood grip cap and forend tip is excellent, the only anomalies being some slight shrinkage of the ebony spacers from the years leaving the varnish in those areas slightly-flaky and a factory repair to an imperfection at the front stud most likely a knot. The wood is fantastic with an excellent high-gloss finish, pattern #10 rosewood, maple and dark walnut inlays on the flats
	and belly along with a pattern #30 running gazelle inlay on the left-side butt. A stunning 1960-manufactured West German Crown Custom right at home in the field or in your high-end gun collection, or both. (22D9949-40) {C&R} [Dr. James D. Morgan Collection] (4000/6000) Est. 4,000 - 6,000
122	Excellent Weatherby Crown Custom Mark V Left Hand Bolt Action Rifle serial #P53278, 340 Weatherby Magnum, 26" barrel with an excellent bore. This is an early-70s West German manufactured Crown Custom in an excellent state of preservation. The metal surfaces retain 99% strong original high polish blue with just a few tiny blemishes and the bolt and receiver drifting to deep plum, the floorplate is marked with "WEATHERBY CUSTOM" in riband surrounded by some light floral scroll engraving. The underside of the checkered-knob bolt handle is appropriately-marked "53278" and the bolt body and follower have been nicely-damascened. The custom mesquite stock rates excellent and has been customized with pattern #13 oak leaf and acorn carving with stippled background and a pattern #3c gold monogram inlay marked "WLF" with iridescent diamond-shaped abalone accents on the belly of the forend. All this custom work was expertly and no doubt painstakingly done, the stock also features a right-side cheekpiece and rosewood forend tip and grip cap with ebony and maple spacers. A fantastic one-of-a-kind rifle chambered for a hard-hitting caliber. (22D9949-22) [MODERN] [Dr. James D. Morgan Collection] (4000/6000) Est. 4,000 - 6,000
123	Fantastic Weatherby Crown Custom High Power Bolt Action Rifle serial #2059, 375 Weatherby Magnum, 26" Mag-Na-Ported barrel with an excellent chrome-lined bore. This rifle was custom-built at Weatherby's Southgate, CA shop in 1954 and remains in an absolutely stunning state of preservation. The metal surfaces retain 99% original blue with the barrel and rear portion of the bolt drifting slightly to plum and attractive high polish still found throughout. The rear half of the barrel and receiver have been intricately-engraved with a flowing scroll and dot-shaded background, subtle scroll accents are found on the bolt handle and bolt release. The floorplate and triggerguard are similarly-engraved, the floorplate being further-embellished with a high-relief gold bear with a shaded background. The skip-line checkered Monte Carlo walnut stock is excellent with only a small shallow dent along the right edge of the stock at the receiver ring, there is a right-side cheekpiece and contrasting grip cap and forend tip with white spacers. The wood has also been customized with Pattern #12 ebony, rosewood and maple inlays on the left-side butt, on both flats and the belly of the forend, the latter having an unmarked gold monogram plate. The rifle also features a very crisp Jaeger trigger and the bolt body and follower have been finely engine-turned. Roy Weatherby took these Mauser actions and created some of the most eye-catching and desirable custom guns ever produced this rifle is no exception. (22D9949-73) {C&R} [Dr. James D. Morgan Collection] (5000/7000)

124 Handsome Weatherby Crown Custom Mark V Left Hand Bolt Action 126 Lovely U.S. Colt Model 1908 General Officers Pistol Belonging to Brigadier General Otis Schreuder Riflo serial #P19615, 460 Weatherby Magnum, 26" barrel with Pendleton serial #M137520, 380 ACP, 3 3/4" barrel with a bright excellent bore. brake and an excellent bore. The metal surfaces retain 99% original This is an absolutely lovely Model 1908 pistol. The metal surfaces retain blue with some faint freckles mostly-found near the muzzle and on the 98% to near 99% original blue, the only true loss being very light sharp brass bead front sight with the receiver and the numbers-matching bolt edge wear at the front and rear of the slide with a very tiny rub mark at toning to a brownish-plum hue. The surfaces are wonderfully-engraved the bottom of the frontstrap and light operational wear on left of trigger. in a flowing scroll and punch-dot-shading motif with about 50% coverage The bright polished muzzle and chamber area of barrel remain brilliant on the barrel and receiver, full coverage on all three sides of the bolt and all of the markings remain crisp including the slightly off-struck shroud and a small wedge on the two-panel-checkered bolt handle. The ordnance wheel to the rear of the safety. The checkered walnut silver floorplate completes the metal accents with an excellent Rampant Colt medallion grips likewise rate excellent to as-new. Included engraved-in-relief gold elephant with continent of Africa background and with the gun is a single two-tone "Cal.380/Colt" marked magazine with more flowing scroll, the bolt body and follower remain bright with a tight an appropriate "M" stamped on the front extension of the base, matching damascened pattern. The skip-line checkered mesquite Monte Carlo the number ahead of the serial number, signifying tuning of feed lips and stock with rosewood grip cap and forend tip, right-side cheekpiece and extractor by Colt. General Otis Blaine Schreuder began his military pattern #8 ebony and rosewood inlays is excellent with a couple very career in 1917 at the Presidio of San Francisco as a student officer, entering the Aviation Section, Ground School at the University of minor blemishes. The purchaser of this rifle spared no expense, there is an unembellished gold monogram plate in the center of bottom forend California. He would receive his first commission as a 1st lieutenant in inlay and a pattern #33 elephant inlay with genuine ivory tusks was the Air Service May 1917 and shipped overseas, remaining with the placed in the left-side butt. This handsome 1966 West German rifle is Army of Occupation until August 1919. Upon his return to the United equipped with open sporting sights. These early Crown Customs States he earned a Doctor of Medicine degree in 1924 from the withstand the test of time and remain Weatherby's most attractive and University of Oregon, interning at Seattle City Hospital. In 1925 he was sought-after offering, (22D9949-3) {C&R} [Dr. James D. Morgan appointed a 1st lieutenant in the Medical Corps. Regular Army and ordered to Walter Reed General Hospital in Washington, D.C. He would Collection1 (5000/7000) Est 5 000 - 7 000 spend the rest of the interwar years in numerous medical roles in Fine Whitworth Rifle Company Percussion Target Prize Rifle 125 Hawaii, Texas and then finally back to Walter Reed in 1940 and then to serial #B319, .50 cal, 32" round barrel with a bright excellent California where he was appointed the Executive Officer of Moffett Field Whitworth-rifled bore. A very interesting and obviously quality-made rifle, and post-surgeon. A year later he was transferred to Santa Ana, to it retains some lovely case colors and overall condition and has a become post surgeon of the Cadet Classification Center and became circular silver presentation plate inletted into the left side of the butt. The surgeon for the AAF Technical Training Center at Knollwood Field, North barrel itself is an overall soft plum brown patina, showing some Carolina, in July 1942. In December of that year he became surgeon at remnants of original browning in the protected areas, the barrel now with the AAF School of Applied Tactics at Orlando, and the next October was remnants of light pinprick pitting about its surface. The bands have appointed chief of the Air Surgeon Branch of the AAF Tactical Center at primarily flaked to a smooth brown with some generous trace bright Orlando, being named surgeon of the Tactical Center in July 1944. In original blue toward their rears. The rifle is sighted with a windgauge May 1945, he went overseas for duty in the Surgeon's Office of the U.S. adjustable Goodwin patent flat-top platinum index line front sight and Strategic Air Forces in Europe and in October of that year he was Whitworth service style target rear, also with platinum index lines. The named air surgeon of the U.S. Air Forces in Europe. He returned to the left side of barrel features appropriate British proofs and the serial United States in February 1948 and was appointed air surgeon of Air number with "Whitworth Patent" atop to the rear of the sight. The breech Material Command at Wright-Patterson AFB, Ohio, a position he held shows very light borderline engraving and lovely brilliant original color until his retirement from the Air Force on July 31, 1953. General case-hardening, as does the lockplate. The lockplate shows Whitworth's Schreuder was awarded the Army Commendation Ribbon with one Oak Crown over W at rear with "Whitworth Rifle Co. Manchester" along its Leaf Cluster. The included Springfield Research Service letter shows bottom edge with light borderline engraving. In addition to the nice case issue of the pistol to Schreuder in January 1950. An absolutely beautiful colors the sliding safety still exhibits some pale purplish temper blue. Model 1908 "Model M" in pristine condition issued to a dedicated Army The bottom metal has toned to a plum with some trace case colors on Air Corps and Air Force medical officer. (3B10090-82) {C&R} the bow but the patchbox still shows a very nice color case-hardening (4000/6000) Est. 4,000 - 6,000 along with a bit of toning and sparse oxidation staining. The stock rates excellent with crisp checkering at the wrist, forestock and the thumb rest area to the rear of the hammer. There is some nice fiddleback grain in the area of the butt and as-mentioned there is a silver presentation plate which reads: "National Rifle Association/1863" "Queens First Thirty", sadly due to someone's overzealous polishing over the years the gentleman's name cannot be made out, but the capital letter "C" and the capital letter "B" can be made out. Some diligent research from a good friend "across the pond" turns up the recipient as a "Captain Benning" of the 2nd Bedfordshire Rifle Volunteers. The actual "Queen's Prize" (1st place) that year was won by a Sgt Roberts; the reference source of this information the Volunteer Gazette of July 18th, 1863. The plate shows some dings and dents from the years and there is a small dent in the wood at its bottom edge where it appears as though someone contemplated prying the plate off, thankfully unsuccessfully. What appears to be the original Whitworth ramrod with hexagonal rotating head is present and the lock is crisp and functions very well mechanically. The buttplate is a bit proud at the heel and toe but this is likely due only to shrinkage as the wood appears completely unmolested. Interestingly an old paper tag within the patchbox reads "No 319/800 yards 2° (minute marking is faded and lost to the years)/900 yards 2° 35' /1000 yards 2° 56' " and there is a small plastic container which holds a tiny barleycorn style dovetail front sight which would fit into the raised base at the muzzle were the current front sight removed. Really a very lovely, very handsome Whitworth rifle in a fine state of condition. (3D9670-53) {ANTIQUE} [David & Lore Squier Collection] (5000/7000) Est. 5,000 - 7,000

U.S. Model 1908 General Officers Pistol Dual-Issue To Brigadie

General Lewis E. Cotulla And Major General William S. Rumbough

U.S. Colt Model 1903 General Officers Pistol Belonging to Major General William Henry Harrison Gifted To Brigadier General and Known Mobster Charles Baron serial #570594, 32 ACP, 3 3/4" barrel with bright excellent bore. This is a very interesting pistol which according to The Colt Pocket Hammerless Auto-matic Pistols II © Brunner, was issued both to Generals William H Harrison Jr. and Edward D. Sirois, showing Harrison and Sirois both in August 1955, and then a reissue date in June 1959 to Harrison again. The pistol retains about 97% Arsenal grade parkerized finish, the loss being light high edge wear with some scattered very superficial light scratches, mostly along the surface of the slide. The checkered walnut grips with silver Rampant Colt medallions rate very fine showing a few very lightly chipped points here and there. There is a single blued "Cal. 32/Colt" engraved magazine included. The right side of the slide is very neatly engraved in a simple flowing script "Brig. General/Charles Baron 0383316/US Army" and there are in fact three other such presentation guns out there, two Smith & Wesson's and one small auto pistol, engraved nearly identically, General "Babe" Baron being a fancier of handguns. Brig. General William Henry Harrison was a veteran of both world wars, serving in the Navy during the First World War, and in the European Theater during the Second World War as a colonel of the quartermaster corps. He earned citations for his efficiency in the handling of cargo and matériel dispatching for the invasion of Europe Back home in Massachusetts, Harrison was a military aide for Governor Elv and was on the military staff of Governor Hurley. In 1946 Harrison was appointed Massachusetts Adjutant General, attaining the rank of brigadier general, and was heavily involved in the re-establishment of the National Guard in Massachusetts. Just how he knew Baron is not known however one can easily surmise some conference of State adjutants or Brig. Gen.'s, the two would have met. Gen. Baron's entered military service in Nov. 1938 and was placed on active duty from March 1941 through Jan. 1946 continuing postwar in various National Guard positions. He actually won many decorations and awards including: the Bronze Star, European African Middle Eastern Theater Ribbon with 5 Service Stars, American Defense Ribbon, American Theater Ribbon, WWII Victory Ribbon, and Army Occupation Medal Ribbon. Charles "Babe" Baron was an organized crime figure in Chicago, Illinois, operating The Riviera casino in Cuba prior to the revolution, after which time he went to Vegas and became the "official greeter" at the Sands Hotel and Casino. He owned Charles Baron Ford in Chicago and was a associate of Meyer Lansky and was actually arrested for murder twice. Interestingly, in researching this firearm, there was a letter auctioned off on eBay in 2013, dated 1966 on the Sands Hotel letterhead, signed by Baron, to Brig. Gen. William Henry Harrison, thanking him for the gift of his pistol and holster and mentioning Baron was hoping to see him when he visits the West Coast. Where that letter is now no one can tell but it would be amazing to put it back together with this gun could it be located. It should be noted that the slide is not numbered to the gun but during arsenal refurbishment that was a fairly common thing to have happen. The gun functions properly me-chanically and is unique with its connection to three different brigadier generals, one of whom had a very notorious and non-military history. (3B10090-89){C&R} (4000/6000) Est. 4,000 - 6,000

serial #M136990, 380 ACP, 3 3/4" barrel with a bright excellent bore. This is a stellar little auto pistol, showing issue to two different generals. The metal surfaces retain about 98 to perhaps even near 99% original blue showing only some very sparse, very light high edge wear with a very sparsely scattered light handling mark here or there, primarily noticeable across the top surfaces of the slide, many do not even breach the blue. The checkered walnut grips with silver Rampant Colt medallions rate excellent with perhaps one or two tiny chipped diamonds. All markings remain crisp with a slightly off struck ordnance wheel to the rear of the safety and the Colt factory applied "M" ahead of the serial number showing factory tuning of the ejector and feed lips of the mag. The slide is correctly numbered to the gun and a very nice two-tone blued "Cal. 380/Colt" marked magazine, also with the factory "M" stamped on its front extension is included. A check of the Colt Pocket Hammerless Auto-matic Pistols II © Brunner, shows serial #M136990 being issued to both the Brig. Gen. Lewis Edward Cotulla and Maj. Gen. William Samuel Rumbough. Dates are not given, only "5/22" (no year) for the Cotulla issue. Lewis Cotulla of Oklahoma registered for military service in 1939, little seems to be evident about his early military career however he was in charge of logistics and supply of gasoline, fuels and oil for the European theater with during World War II. He was a career Army General and was awarded both the Legion of Merit and Bronze Oak Leaf Cluster, in lieu of a Second Award of the Legion of Merit, for exceptionally meritorious conduct in the performance of outstanding services to the Government of the United States from August 1946 to February 1959, also in his role as head of petroleum logistics in the office of the Assistant Secretary of Defense. Maj. Gen. William Rumbough had an earlier record of service than Cotulla, enlisting in the Maryland National Guard Army in 1916 and was commissioned into the U.S. Regular Army as a second lieutenant of infantry in 1917 and was commissioned into the Signal Corps two years later. When the United States entered World War II, he was the first commander of Camp Crowder, a Signal Intelligence Service training base for a year, before he was stationed in Europe as the chief Signal Corps officer for the US Army. The Signal Intelligence Service was a codebreaking division of the U.S. Army, the Signal Corps basically in charge of maintaining the secrecy around the D-Day invasion, as well as feeding false in-formation to the Axis Powers in Europe. They were also instrumental in breaking the "Purple" code, an extremely secure encryption code the Ja-panese used throughout World War II. Leaving the Army in 1946, his decorations included the Distinguished Service Medal, the Legion of Merit, the Bronze Star Medal and the British award Commander of the Most Excellent Order of the British Empire. While no date of issuance is given, given the two men's service records, he obviously was issued the gun before Cotulla, Cotulla being issued the gun no doubt post-war. The gun comes in an otherwise unmarked kraft box with anti-corro paper, minty instruction pamphlet that is as nice as the gun itself and steel cleaning rod. An absolutely stellar example, with the bonus of being a dual issue, both men doing exceptional service to their country in achieving victory during the Second World War. (3D10090-81) {C&R} (4000/6000) Est. 4,000 - 6,000 Rare and Fine Pair Of Consecutively Numbered Colt New Service "Battle Of Britain" Revolvers serial #346199 & #346200, 45 Colt, 7 1/2" barrels with bright mirror bores. The revolvers are finished in full nickel with checkered walnut grips with nickel silver Colt medallions. These revolvers were purchased by the British Purchasing Commission and shipped together to Win-chester Repeating Arms Company on July 22, 1940 with 17 other revolvers configured in the same fashion. After the evacuation of Dunkirk in June of 1940, Britain was preparing for a German invasion and placed an order with Colt for "all available handguns suitable for military use". Winchester acted as the purchasing agent, acquiring and preparing the guns for shipment to England from New Haven. Colt shipped over 1500 New Service revolvers to Winchester for Britain, including some target models and some Shooting Masters. The condition of the revolvers is wonderful with 99% bright original nickel-plated finish remaining overall. Even as the Germans were practicing their beach landing tactics, these arms were still sent to the London proof house for proofing. Many of the guns were then put into storage and never used, ac-counting for many of them remaining in very fine condition. All markings including proofs remain crisp and fully legible. The grips are all num-bered to their corresponding revolvers rate excellent plus with crisp checkering. The included factory letter lists both guns on the same letter, showing nickel finish and being part of a 17 gun shipment to Winchester Repeating Arms Company on behalf of the British Purchasing Com-mission. These are a very fine and interesting pair of Colt New Service revolvers which would surely be a highlight in any collection of fine Colts. Rare Smith & Wesson 44 Double Action Revolver

130 U.S. Colt Model 1903 General Officers Pistol Belonging to Brigadie General James W Cook serial #568115, 32 ACP, 3 3/4" barrel with a bright excellent bore. This is a very lovely 1903 General Officers pistol. The metal surfaces retain 98% plus original parkerized phosphate finish with some very light high edge wear here and there and perhaps a very superficial handling mark one must really search for. The bright polished area of the barrel above the chamber and the muzzle are still brilliant and there is a very nice ordnance wheel to the rear of the safety that, while slightly off struck, shows bright metal within. The checkered walnut silver Rampant Colt medallion grips rate excellent to very nearly as-new. The slide is properly numbered to the gun and there are three blued "Cal. 32/Colt" magazines included. The gun rides in an old vintage two-piece kraft box with manila tag affixed with antique packing tape, showing the guns serial number, along with an 11-54 dated Rock Island Arsenal tag, perhaps from an outer shipping carton, showing an item stock number. There is moderate tape about the surface of the box and the corners of the lid have separated and the extra magazines and cleaning brush are delineated in pencil on the lid of the box, there appears to be an old serial number on the underside of the box which was scratched out before the tape was applied. Within we find an appropriate blued steel cleaning rod and the instructional pamphlet which shows appropriate light oil staining and wear from the years but remaining in very fine condition overall. Both the Springfield Research Service records and the Colt Pocket Hammerless Automatic Pistols II © Brunner, list this gun by serial number and show issue in December 1954 to Brig. Gen. J. W. Cook. An exhaustive search of Brigadier General's with those initials leads us to believe with certainty that this was Brig. Gen. James William Cook of the California National Guard. The general's 37 year military service began in 1917 when he was a private in border actions against Mexican bandits, his service spanning two world Wars his career culminating with the California National Guard. Brig. Gen. James William Cook was appointed Gen. in 1950 and was the Commanding General 112th California National Guard, AAA Brigade in 1956 and it would appear as though he retired in '59 and would ultimately attain the rank of Major General. Overall this is a very complete Model M officers pistol in a very fine state of preservation with some very desirable accessories. (3B10090-85) {C&R} (4000/6000) Est. 4,000 - 6,000 131 Fine Smith & Wesson 44 Double Action Revolver with Box serial #18818, 44 S&W Russian, 4" ribbed round barrel with a bright excellent bore. This revolver shows factory "star" refurbishment stamp and strangely the barrel is numbered to another gun "38231" but it otherwise remains in excellent condition. The metal surfaces retain 99% excellent factory restored nickel and blue finishes while the hammer and trigger show dark smoky case-hardened colors throughout. The cylinder is the 1 7/16" variety and the barrel address and patent dates remain crisp and clear. The frame shows refurbishment date of "5 52" beneath the grip. The black checkered hard rubber grips remain in near excellent condition showing a handful of small dings and some toning to brown under bright light. The right panel is appropriately scratch-numbered matching the gun, the barrel latch and cylinder are matching the frame and the action seems to function well mechanically in double and single action. Barrel-to-frame fit is also excellent and it seems most likely that the barrel needed to be replaced during the refurbishment. The black pebbled paper-covered box remains in good condition showing some mild water staining along the exterior and evidence of slight compression. The end flaps on the label end show tears and are coming loose as are some of the internal sides. The interior label is otherwise mostly intact along with the green end label that shows one flake along the bottom edge. There is no legible number on the base. An excellent first model DA as-factory-refurbished. (13B10000-128) {ANTIQUE} [Roy Jinks Family Collection] (2000/3000) Est. 2.000 - 3.000

	serial #51, 38 Winchester, 6 1/2" barrel with an excellent bore. This revolver was part of a run of only 276 revolvers chambered in this caliber and made with the longer 1 9/16" cylinder. The revolver is outwardly identical to the 44 DA except the mark on left side of barrel reads "38 WINCHESTER CTG". The revolver shows 99% bright factory nickel plated finish overall with all markings remaining crisp and clear. Mr. Jinks' notes state that this revolver was "unsold from the factory". The finish is clearly factory but the polish is quite heavy with softened edges and slightly dished screw holes, particularly the latch screw hole in topstrap; there is no factory rework marking on the gun. Based on the cleanliness of the markings it appears that the revolver was polished prior to the markings being applied. The gun features matching serial number "51" on butt, rear of cylinder and rear of barrel, the locking latch is numbered "1360". The triggerguard shows nearly all of its beautiful original blue finish. The checkered hard rubber grips rate excellent plus with no evident wear. An interesting and rare early Smith & Wesson double action revolver. (1B10000-33) {ANTIQUE} [Roy Jinks Family Collection] (2000/4000)
133	Est. 2,000 - 4,000 Rare Cased Smith & Wesson 38 Single Action Third Model Combination
133	Rare Cased Smith & Wesson 38 Single Action Third Model Combination Set serial #20321, 38 S&W & 22 LR, 3 1/4" 38 barrel with a partially bright good bore showing some scattered light pitting and strong rifling and 8" single shot 22 barrel with a bright excellent bore. This is a lovely little cased set with components for three models: a standard 38 SA, Mexican model spur trigger pocket revolver or a 22 caliber single shot target pistol with extended target grip, standard trigger and triggerguard. The revolver is currently set up in the 38 SA configuration and retains about 80% original bright blue showing high edge and operational wear and some overall flaking to mild gray-brown patina. The third model-style hammer retains nice case-hardened colors, the triggerguard is a smoky case-hardened patina and the trigger shows fading straw color. All markings remain crisp and clear, the barrel markings with "MODEL OF 91". The black checkered hard rubber grips remain in excellent condition showing a few light handling marks, the right panel is scratch-numbered "101622" and both panels otherwise fit the frame very well. Barrel-to-frame fit is solid and the action seems to function well mechanically with solid timing and lock-up. The 38 barrel and cylinder are matching the frame and the latch is numbered "10738". The 22 single shot barrel is also matching the frame and is equipped with a un-numbered latch. It retains about 95% original bright blue showing a little mild edge wear and some areas of fine flaking, it is equipped with factory target sights and the markings remain crisp also showing "MODEL OF 91". The Mexican model spur trigger and scant sheath-type guard retain about 97% original bright blue and rich straw finishes. The hard rubber target grips appear to be un-numbered and remain in very fine condition showing some scattered tiny dings and light handling marks, the left panel retaining a very nice patent date. The included factory black leatherette case remains in very fine to excel
	Mexican model parts. This is a very rare cased set for the advanced collector. (13B10000-106) {ANTIQUE} [Roy Jinks Family Collection] (5000/7000) Est. 5,000 - 7,000

The barrel and magazine tube of this lovely rifle retain about 96% original blue showing some very mild edge wear and most of the loss due scattered light oxidation speckling toning to plum-brown patina. The action retains about 98% lovely vibrant case-hardened colors showing some sparse oxidation speckling and a coat of heavy preservative, the crescent buttplate also with wonderful colors and a little old oxidation staining. The nosecap retains about 95% original blue with light flaking while the bolt retains about 98% original blue and the screw heads all show strong bright blue. All markings remain intact and strong, the top of the action with "MARLIN SAFETY". The smooth walnut stocks remain in excellent condition showing a touch of older added finish with a small knot in the wood on the right side showing some filler along with some scattered mild handling marks. The rear sight dovetail has been neatly blanked and the rifle is sighted with a Marble's tang sight and silver
136	handling marks and toning to pale brown patina. The right panel is mismatched scratch-numbered "2050" and the left panel retains a very nice patent date along the bottom edge. The remaining serialized parts are matching and the revolver is sighted with Paine silver bead front sight and fine u-notch rear. Barrel-to-frame fit is excellent and the action seems to function well mechanically with solid timing and lock-up. This revolver has seen some honest use but remains a fine example of a desirable low-production arm for the Smith & Wesson collector. A wonderful example of the last of			otherwise strong rifling throughout. The barrel and magazine of this interesting rifle have mostly toned to a pleasant rich plum-brown patina showing some scattered remnants of old very mild oxidation and some subtle streaks of original blue in the protected areas. The action and buttplate have taken on a wonderful rich ocher patina showing some scattered light dings and handling marks, the action is tastefully embellished with attractive loose foliate scrollwork and rather large punch-dot shading along with some light zigzag border motifs. The bolt and loading gate parts are mostly toned to pewter gunmetal patina and the markings remain intact and mostly strong. This variation shows Robinson patent information and Adironadack Fire Arms Co. markings atop the bolt parts and also Robinson patent information and A.S. Babbit maker markings along the inside lower tang. The underside of the action is stamped with a small "7", the left barrel flat shows "53" and also a small "7" on the top flat nearer the breech. The smooth walnut buttstock
142	Excellent Savage Model 99-G Deluxe Takedown Lever Action Rifle serial #397781, 300 Savage, 24" barrel with a bright excellent bore. The metal surfaces of this attractive rifle retain about 98% original blue which is slightly thinning to gray under bright direct light with some slight silvering at the muzzle and a light handling mark or two. The bolt is bright with some faint gray speckling and the lever retains 99% vibrant case-hardened colors with a subtle hint of edge wear. The checkered walnut capped pistolgrip stock and schnabel-tipped forend rate very fine with sharp checkering and a lovely original oil finish showing just a few scattered light handling marks while the shaped serrated steel buttplate shows some light wear at the toe and heel. All metal markings are crisp, the barrel is sighted with an original white metal bead front and a sporting-style rear with elevator and the takedown feature and action appear to function well mechanically. A wonderful example of the last of the Model 99 takedown rifles. (23B10187-59) {C&R} (1500/2000)			otherwise strong rifling throughout. Lot Title/Description

155 Connecticut Shotgun Model 21 Grand American Grade Over Under 157 Fine Rogers & Spencer Army Model Percussion Revolver serial #4167, .44 cal, 7 1/2" octagon barrel with a bright excellent bore. Shotaun serial #W50292, 20 ga., 28" ventilated rib barrels with Connecticut The barrel and frame of this attractive revolver retain about 92% original Shotgun screw chokes and bright excellent bores. The barrels retain all bright blue showing some overall flaking to pleasant plum-brown patina, of their original maker blacking and are equipped with a red Bradley scattered oxidation speckling and light handling marks. The cylinder front bead. Frame retains all of its rich maker blue and shows exquisite retains about 50% original bright blue flaking to plum-brown and miniature scroll, floral and geometric decoration with chiseled oakleaf showing some operational wear while the hammer and loading level engraving on the fences. There are gold sporting dogs left and right with assembly show attractive smoky case-hardened colors throughout with a brace of pheasants on the belly of the frame and a retrievers head on a little gray-brown speckling. The trigger remains mostly bright and the bow of the guard. The trigger retains all of its original gold plate and some of the screw heads show some light slot wear with otherwise "Grand American" is inlaid in gold on the blued steel pistolgrip cap. The strong bright fire blue. All markings remain crisp and clear. The smooth gun is stocked in a stunning feathercrotch grade of American black walnut grips are stamp-numbered matching the frame and remain in walnut with a Winchester-style carved fleur-de-lis checkering pattern on very fine condition retaining about 95% oil finish with two small repairs left and right of grip and stock cheeks, the forend is similar, both rating along the bottom edge of the right panel and one repair at the base of excellent to as-new. The length of pull to the solid Winchester shotgun the left. The left panel retains a crisp "RPB" inspector cartouche. All of pad is 14 1/2" and the gun locks up as-new with the top lever right of the serialized parts are matching and the action generally seems to center and of course functions perfectly mechanically. Features single function well mechanically with excellent timing and lock-up, the hand selective trigger, automatic safety and of course, ejectors. Includes 5 spring may require some attention as the cylinder sometimes does not choke tubes and wrench, skeet through full. A wonderful over under advance. A handsome Rogers & Spencer revolver for the U.S. martial shotgun with Connecticut Manufacturing's nod to Winchester's collector. (13B10206-15) {ANTIQUE} (2500/3500) venerable Model 21, the engraving and stock carving closely matching Est. 2,500 - 3,500 Winchester factory patterns. (3B10295-6) {MODERN} (7000/9000) 158 Fine & Rare U.S. Colt Model 1851 Navy-Navy "Non-Standard" Cartridge Est. 7.000 - 9.000 Converted Revolver serial #61852, 38 CF, 7 1/2" round barrel with a bright near excellent 156 Fine Cased Remington New Model Army Commercial Revolver with Verv Rare Fluted Cylinder bore showing crisp rifling throughout. This is a fine example of a serial #16738, .44 cal, 8" octagon barrel with a bright excellent bore non-standard Navy-Navy Richards Mason conversion which has utilized showing a little fine frosting just ahead of the breech and otherwise crisp a Model 1861 barrel. The barrel has mostly toned to a mild gunmetal rifling throughout. This is a very handsome and interesting revolver and patina showing scattered light handling marks, a few pinprick pits and the only New Model Army known to us with a fluted cylinder, a feature some generous bright blue in the more protected areas at the rear. The more commonly seen on their slightly later Belt Model revolvers. The ejector rod housing retains most of its nice dark gray oil-quenched fluting appears factory in every respect, all six are identically fashioned case-hardening showing a patch of tool marks above the wedge. The and flare out very slightly at the chamber mouths. The barrel and cylinder is similar to the barrel showing some fading streaks of original loading lever retain about 92% original bright blue showing some light blue and with a small area of old dings, otherwise retaining strong edge wear and fine flaking to pleasant gray-brown patina, the flaking a markings and a really nice naval engagement scene. The frame retains bit more noticeable along the lever. The frame retains about 45% about 85% strong case-hardened colors throughout with some silver original bright blue strongest along the right side with overall flaking to a along the high edges and mild fading, the hammer and breech plate also pleasant mild gray patina and the cylinder retains about 60% bright blue with strong colors. The triggerguard and backstrap are mostly gunmetal showing moderate edge wear with thinning to gray and scattered gray with some small areas of old minor pitting and many of the screw handling marks. The trigger, base pin and many of the screw heads heads and the trigger retain a healthy amount of pale fire blue. All markings remain intact and strong, the barrel with New York address retain most of their lovely pale fire blue, the triggerguard is a nice ocher patina and the hammer shows smoky case-hardened colors. This is a and the frame showing "COLTS / PATENT / U.S." and crisp dual patent quite early New Model and as-such is still not stamped with the "NEW dates. The back surface of the cylinder shows small "H" inspector stamp and the butt shows "USN". The smooth walnut grip appears to be MODEL" marking on the barrel, only with the patent date and address. All markings are crisp and clear with the various components showing un-numbered along the inside and remains in very fine condition small factory sub-inspector stamps, the back of the cylinder with a small showing the expected edge wear and some light handling marks. There "K". The smooth walnut grips appear to be un-numbered and remain in are three small divots along the base of the left side and two small very fine condition retaining almost all of their nice oil finish along with a divots and a carved "1" on the right. This revolver falls into the few very light handling marks and a thin 5/8" chip at the heel of the right sub-variation of non-standard conversions which has the original panel. The barrel and triggerguard are matching the frame, the cylinder number left on the barrel without removal or re-matching. The barrel is is un-numbered and the silver cone front sight is intact. The action numbered "1513", the wedge is un-numbered, the cylinder's original seems to function well mechanically with solid timing and lock-up. The number is "4260" and it has been restamped to match along the back included black leather-covered case is French-fitted to the revolver and surface "852", the triggerguard is matching and the backstrap has also accessories and is of older quality construction, though later than the been renumbered to match with the full serial number under the original revolver. The exterior shows a little edge wear, some mild scuffs and "89345". The loading gate and arbor show number "738" one of the brass clasps is missing. The maroon baize interior rates near Barrel-to-frame fit is excellent, the hammer is crisp and the action seems to function well mechanically with solid timing and lock-up. This revolver excellent and holds a number of nice original accessories including a Remington powder flask with lying dog, game birds and bent spout that is pictured and described on page 241 of A Study of Colt Conversions and Other Percussion Revolvers by McDowell. This is a lovely example rates very fine retaining much of its bronze finish with scattered edge wear. The spring is strong and retains a healthy amount of brilliant fire of a seldom seen and desirable U.S. Navy converted revolver for the blue. There is a dual cavity bullet mould that has mostly toned to advanced antique or U.S. martial collector. (13C10206-34) {ANTIQUE} gray-brown patina showing some light dings and old oxidation, a full (5000/7000) container of Braun & Bloem percussion caps and a waxed paper packet Est. 5,000 - 7,000 of six .44 cal cartridges that appears to be full and original with a small tear forming along one end flap. A very attractive ensemble and an interesting example for the advanced Remington or American arms collector. (13B10160-42) {ANTIQUE} (3500/5000)

Lovely Smith & Wesson Model 29-3 Hartford Gun Club Special 100th 166 Smith & Wesson Factory Engraved 32-20 Hand Ejector Target Model of 164 Anniversary Commemorative Revolver 1905 Second Change Revolver serial #ADU8366, 44 Magnum, 6" barrel with an unfired bore. The metal serial #45054, 32-20, 6 1/2" barrel with an excellent bore. This revolver surfaces on this big bore 29 retain all of their original post-engraving features nearly full coverage relief floral scroll engraving with open factory blue and the color case-hardened target hammer and trigger presentation panel on backstrap. There is a wonderful monogram on the show vivid colors. The gun shows nice quality open flowing scroll at both bottom of the frame just ahead of triggerguard which shows intertwined muzzle and breech end of barrel with nice sprays of foliate scroll on the initials "ESA". The buttstrap shows a factory five-pointed star marking frame flats and the radii above the barrel. The cylinder as well shows indication the revolver was returned to the factory for service. The nice wedges of scroll flanking the flutes with a nice small spray on the revolver shows 98% old factory restored nickel plated finish which has bow of the guard and atop the knuckle. The sideplate shows a very nice dulled over time and has a lovely appearance. The revolver features a two toned depiction in silver of the Hartford Gun Club logo showing the lovely set of carved steerhead mother-of-pearl grips with applied dark Charter Oak, to its right is a chiseled in-relief silver inlay of the Statue of eyes. The grips rate excellent showing proper age and shape but they fit Liberty with a riband beneath both reading "100th Anniversary". The a little over in some spots. The hammer and trigger show beautiful faded front of the frame where we normally find the Smith & Wesson patent original color case-hardened finish. The revolver is sighted with a white information shows an inlaid silver riband with "1884-1984" amidst quality beaded blade front and adjustable target rear sight. A fine factory scroll. There is a white outline rear sight and the front sight insert is engraved Smith & Wesson hand ejector target revolver. (1C10187-67) {C&R} [Roy Jinks Family Collection] (3500/5500) brass. The butt wears a lovely pair of smooth target style genuine ivory grips with small swirls of engraved scroll where the S&W medallions Est. 3,500 - 5,500 Rare Weatherby High Power Mathieu Left Hand Bolt Action Rifle would normally be, and a very nice engraving of the Charter Oak at 167 bottom of right grip, all this accented with black ink within, the engraving serial #L247/1276, 270 Weatherby Magnum, 24" barrel with an excellent signed by Smith & Wesson factory engraver "RJS" (Russell J Smith). bore. The metal surfaces retain 99% original high-polish blue, the floorplate has been marked "MRM" and the bell-shaped bolt knob is The gun rides in a very nice oak presentation case with fitted green felt interior, the exterior lid plaque reading "Hartford Gun Club/100th one-panel checkered. The bolt body and follower remain mostly-bright with underside marked "L247". The high-gloss glass-bedded French Anniversary/1884-1984". In the interior there is a small commemorative Hartford Gun Club pin and a vintage "Hartford Gun Club est 1884" patch walnut Monte Carlo pistolorip stock is near excellent with a barely-visible showing the capitol dome; the key to the case is included. A very 1/2" hairline crack behind the top tang and a nice replacement rosewood handsome big bore revolver, no other examples can be located and it is grip cap. This is a unique stock, the wood figure is fantastic with pattern likely this is a unique piece unto itself. (3C10082-41) {MODERN} #27 ebony, birch and rosewood inlays and a rosewood forend tip. Bud (5000/7000)Mathieu provided just 185 "true" left-hand receivers to Roy Weatherby Est. 5,000 - 7,000 between 1955-59; this is a rare and very attractive one-of-a-kind 165 One-Of-A-Kind Smith & Wesson Distinguished Combat Magnum Factory Weatherby. Lot Title/Description

Rare A.H. Fox CE Grade Boxlock Double Ejectorgun Two Barrel Set Identified to J.W. Williams, Major, OSS serial #28043, 12 ga. (2 1/2" in both), 26" chromox fluid compressed steel barrels choked improved cylinder and modified, with bright about excellent bores which show remnants of some very light oxidation staining ahead of the forcing cones, an older raised dent in the right tube, with a small ding about 5" from the muzzle. They retain about 92% to perhaps 95% original blue, the balance is due primarily to even fading, with sparsely scattered light oxidation stains here and there. 32" chromox fluid compressed steel barrels choked a light full in each, with bright about excellent bores showing remnants of some light oxidation staining sparsely scattered, each of the tubes showing old neatly raised dents about 5" from the muzzles and a small ding midway down the left tube. The barrels retain perhaps 80% original blue, the loss due to even overall fading, wear in the carry area above the forend and at the muzzle. There is over all light oxidation staining and freckles with scattered light handling marks. Both sets of barrels have nice 1 1/2" wedges of engraved scroll at the breeches and both are fitted with ivory front and mid rib beads. The frame shows the typical nice quality C-grade scroll engraving with woodcock vignettes right, guail left and a setter on point on the belly of the frame, each flat with "Ansley H Fox" at the top of the vignette. The frame retains perhaps 30% original color case-hardening, primarily in the area to the rear of the fences and beneath the top lever, the balance a smooth pewter case-hardened patina showing lightly scattered and very sparse oxidation staining here and there but all of the remaining engraving remaining crisp. The straight grip long tang triggerguard has toned primarily to pewter as have the double triggers. The straight grip English walnut stock rates very good with the checkering wearing slightly, the very beginning of a small crack behind the upper tang but with nice figure in the English walnut. There are the expected overall light dings and handling marks that come from the years and a later Pachmayr recoil pad has been fitted giving a 14 1/8" length of pull with drops of 1 1/2" and 2 3/4". The single splinter forend rates about very good as well, showing perhaps a bit more wear, the metal a pewter patina. The forend is numbered "2" however it fits both sets of barrels perfectly and functions well with both. Both sets of barrels are tight on face with the top lever slightly right of center on both, and both sets of barrels function properly mechanically on the frame with quite robust ejectors. The arm comes cased in Abercombie & Fitch leather luggage case with a fading burgundy interior. It rates good to near very good with the expected scuffs and scratches that come from the years, with leather reinforcements on all four corners, the handle has come detached from the face but it is included and the left side hasp is no longer present. The lid is embossed and black inked "JWW", for John Winslow Williams, a Yale graduate and prominent Baltimore businessman and also a Major in the Office of Strategic Services stationed in West Africa 1943 to 1944, gaining promotion to Lieutenant Colonel in 1944. The interior of the case has a bit of ink writing of the name of his son who was deceased in 2005; if one wished the interior lining could certainly be replaced but it directly connects the gun to the man. This is a rare CE Grade Fox shotgun with enough wear that it could certainly be used and taken afield and has many many more years in it, judging by its tight lockup and position of the top lever. (3D10216-7) {C&R} (4000/6000) Est. 4,000 - 6,000

Lot Title/Description

Extremely Rare Winchester Model 54 Factory Engraved & Full-Stocked Bolt Action Rifle serial #48201A, 30-06, 20" barrel with a bright excellent bore. This is a lovely and extremely rare rifle. Factory engraved model 54's are nearly unheard of, full-stock factory rifles are a great rarity in themselves; this example combines both of these extremely rare features and remains in a superb state of condition. The barreled action retains about 98% plus original factory blue with some light wear along the races and the top of the barrel showing a small handful of extremely light oxidation spots, primarily around the roll marking. The bottom metal is in a similar state of condition with only light wear on the high edges and on the front action screw. The barrel shows nice wedges of light scroll engraving at the breech with a circumferential engraved border with similar engraving surrounding the front sight ramp with a near identical engraved ring at the muzzle. The receiver shows nicely matted top flats with geometric borderline engraving and nice-quality loose scroll on the receiver ring and the sides of the receiver bridge; the barrel and receiver show appropriate raised Winchester proofs. The bottom metal is nicely embellished as well with tasteful light sprays of scroll on the floorplate which has nice geometric borderline engraving and lovely scroll on the triggerguard bow. The bolt body and extractor have been polished bright and nicely nickel plated, the bolt knob has been neatly dual-panel checkered and the underside of the body is appropriately DC pencil-numbered to the receiver. The factory full-length Mannlicher style stock is classic style with a rounded left side cheekpiece with shadowline. The stock features a horn forend tip, nicely checkered panels and factory 1 1/4" sling swivels. The pistolgrip shows a lovely blued steel gripcap with geometrically engraved border and a nice scroll-engraved panel at its center, ex-hibiting some light flaking of the blue finish to mild gray-brown patina, while the butt has a checkered steel Winchester buttplate with widows peak. The stock itself rates near excellent with only a handful of minor dings or handling marks from light use afield. A standard factory hooded sporting ramp front sight is in place, with a very finely hand-matted ramp, as is a factory-in-stalled Lyman receiver sight. Additionally the gun has been factory fitted with a high-quality quick-detach lever-release telescopic sight mount which holds a Carl Zeiss Zielklein telescopic sight with post and crosshair reticle and near excellent optics; the top face of the bolt handle has been slightly relieved for scope clearance, it was very professionally done. Accompanying the rifle is a letter from noted Winchester historian Herb Houze which indicates the rifle is a factory product and likely was ordered directly by John Olin, as most full-stock rifles were ordered by him. He states the engraving is likely the work of Alden Ulrich and that the engraving is in fuller coverage than normally seen on factory engraved rifles, and mentions particularly the granular matting of the Winchester front sight ramp, explaining it is rarely seen. Another letter by Winchester engraver Pauline Muerrle is also included, also identifying the work as Alden Ulrich and stating it is a classic example of his work. Such rifles were generally gifts for important Winchester clients or personal friends of John Olin's such as Walter Chrysler and Robert Woodruff, both of whom received special order rifles from John Olin himself. Overall a very rare and desirable Winchester model 54 in a fine state of condition, suitable for the finest collection of Winchester Model 70 or Model 54 rifles. (3,13E10144-20) {C&R} (8,000/12,000) Est. 8.000 - 12.000

198	Danish Contract M1 Garand Rifle by Beretta	201	Melvin Maynard Johnson, Jr.'s Original "Betsy" Semi-Auto Rifle
	serial #PB6310, 30-06, 24" 6-57 dated VAR barrel with a very good bore		30-06, 24 3/4" barrel with a bright excellent bore. This is the first
	with intermittent light frosting in the grooves but strong rifling throughout.		complete firing rifle finished in August 1936 by the same Boston
	The metal surfaces retain about 98% arsenal parkerized finish with		machine shop that made the basic action model. Christened "Betsy" by
	some light wear on high edges, light wear on the forward stock ferrule,		Johnson, this rifle was the progenitor of the Model 1941 rifle and would
	and some scattered light handling marks. The birch stock is in very good		be followed by the Marlin-made prototypes of late 1937, the 1938-1939
	plus condition as lightly cleaned with a small circular arsenal repair		Taft-Peirce proof models and finally the 1941 serial-production model.
	below the operating rod, the remnants of some light abrasions, and a		Through Johnson's connections in the Marine Corps., this rifle started
	few light handling marks. The barrel channel is serialized and matching		gaining early interest and was informally tested and studied by ordnance
	to the rifle. The left side of the receiver is marked "BERETTA-ARMI /		officers while Johnson worked with Marlin to get further prototypes
	ROMA-ITALIA", the rear of the receiver is marked "(crown) / FKF", the		ready. The rifle features a very heavy machine shop-made steel
	bolt is marked "P" to the rear of the head, the barrel is serialized and		receiver, most of the other parts being adapted from existing arms. The
	matching to the rifle, and all small parts appear to be "PB" marked. The		barrel is a 3- 36-dated Springfield Armory 1903 barrel modified with the
	rifle retains the standard open sights and features T105 rear sight		necessary middle collar assembly and breech piece, the front sight also
	drums, a stamped triggerguard, and a two-slot gas plug. A fine		being raised. The bolt knob is straight from a Remington Model 81, and
	Italian-made Danish M1 rifle with almost all Beretta parts. (14A10219-4)		the checkered steel buttplate and trigger from a 1903 NRA sporter. The
	{C&R} (2000/3000)		metal surfaces retain about 90-92% original smooth dark gray finish
	Est. 2,000 - 3,000		showing some thinning along the receiver, silvering along the high
199	U.S. M1 Garand Rifle by Springfield Armory with British Proofs		edges and some scattered handling marks. The receiver is unmarked
	serial #373013, 30-06, 24" 11-41 dated Springfield Armory barrel with a		and shows a couple of small drilled and tapped holes along the right
	bright excellent bore. The metal surfaces retain about 98% original		side, no doubt from period experimentation and modification. Rather
	parkerized finish with light wear on the high edges, a few small spots of		than the more elaborate barrel retaining lever with integrated spring
	pinprick pitting on the rear of the receiver, and a few minor handling		seen on later production models, the barrel on this rifle is retained by a
	marks; the black enamel finish on the gas cylinder is in excellent		simple heavy duty cross screw, the barrel return spring being integrated
	condition with only a few light spots of wear. The pistolgrip walnut stock		into the stock. The checkered pistolgrip walnut stock remains in very
	is in very good plus condition with a few light impact marks and dings on		good plus condition showing a very thin hairline crack and a few small
	the buttstock and underside of the forend, a light chip on the edge of the		chips at the nose, very minor sliver missing along the left edge of forend
	operating rod channel, and a few light handling marks. The stock is		and some overall light dings and handling marks a bit more noticeable
	marked with a crisp boxed "S.A. / G.H.S." inspector cartouche next to a		along the pistolgrip. As an early prototype rifle there is no safety
	mostly crisp ordnance wheel and a partially obscured circled "P" proof		provided and not much concern was giving to weight savings as it
	on the inside of the pistolgrip; the barrel channel is marked with a crisp		weighs in at 11.5 pounds. The Marlin rifles produced about a year later
	"73". The receiver markings remain crisp, the barrel shows clear British		had a target weight of only 9 pounds. The rifle is sighted with a
	export proofs, and all marked parts are of Springfield Armory		commercial Lyman receiver sight mounted to the right side and the
	manufacture with drawing numbers consistent with the 1941 barrel and		action seems to function well mechanically. The included 4-round
	receiver date. The rifle features a milled triggerguard, single slot gas		magazine was modified from a 30-06 Savage Sporter magazine and
	screw, flush nut rear sight drums, and the operating rod has not been		does not quite engage the magazine catch properly but otherwise fits
	relief cut. Included is a plastic oiler, grease, three-piece cleaning rod in		very well and was obviously purposefully modified for this rifle. It is
	fabric container, and a white canvas sling with a few spots of light		believed this rifle originally had a different stock and was made to accept
	staining. A solid early M1 rifle sent to the UK during the lend-lease		modified BAR magazines, as these would have been plentiful for
	program. (14B10206-40) {C&R} (1800/2200)		Johnson and were a natural choice. Included with the rifle is a
	Est. 1,800 - 2,200		photocopy of a notarized letter by the Johnson family describing the rifle
200	Melvin Maynard Johnson, Jr.'s Original Model Of The Basic Action For		above and indicating it was from the estate of Melvin Maynard Johnson,
	The Johnson Rifle		Jr. and was also displayed by him at the Franklin Institute in
	30-06, 24" barrel with a bright excellent bore. This is the original basic		Philadelphia. Arguably the most important of the Johnson arms offered
	action for the Johnson rifle, completed and successfully test-fired on		and a truly unique opportunity for the most advanced martial collector.

Title/Description Lot

202	Extremely Rare Johnson Automatics Proof Model Semi-Auto Rifle by the
	Taft-Peirce Company serial #MR1, 30-06, 22 3/4" barrel with a bright excellent bore. This is a
	very fine example of the first production proof model of the Johnson
	Rifle, made by the Taft-Peirce machine tool company of Woonsocket,
	Rhode Island circa January 1939. The first three box mag-azine rifles
	were made to reflect minimum, maximum and medium tolerances, this
	example is the minimum or "tight" tolerance rifle. The firm was never
	intended to enter full-scale production, only to provide proof and test
	models, with an estimated 14 to 17 rifles made in total. In his book
	Johnson's Rifles and Machine Guns, author Bruce Canfield provides photographs of various "MR" prefix guns, both with box magazines and
	the later military pattern rotary magazine. This rifle is pictured on pages
	40 and 41 in a slightly different configuration, no doubt these
	photographs are copies of very early original plates, and the rifles were
	certainly modified slightly as development work continued. In the book
	the stock is checkered, the checkering is now removed but the stock is
	unmistakable in the pictures due to its grain figure, also the rifle now has
	two small added holes near the rear sight base, no doubt added during the period of testing for different sights. The rifle also now has a slightly
	different magazine and magazine well / guide rib assembly than in the
	original picture as well as a front sling swivel. Johnson is seen holding
	and firing a smooth-stocked rifle on pages 41 and 42 as well. The
	condition of the rifle is very fine with the metal surfaces retaining about
	92% original blue, the loss due to expected silvering along the high
	edges, light operational wear and some very sparsely scattered mild
	oxidation speckling, most of the loss along the triggerguard and upper tang cover plate. The bolt remains mostly bright showing subtle
	engine-turning and all markings remain intact and strong showing
	"JOHNSON AUTOMATICS / SEMI-AUTO. 30-06 / PROOF MODEL" on
	top of the action and the right side rear receiver stamped with the
	Taft-Peirce logo and "MR 1". While Taft-Peirce did fabricate most of the
	components by-hand for these models, the actual barrel utilized is from
	a commercial Winchester rifle modified with military style front sight,
	Johnson middle collar assembly and breech piece. The collar shows
	"30-06" designation and "39" date stamp. The smooth pistolgrip walnut stock also rates very fine as lightly and carefully cleaned during the
	period of use showing a few very thin hairline cracks around the upper
	tang and some overall light dings, exhibiting some very lovely grain
	figure throughout. The butt is fitted with an unmarked black checkered
	hard rubber buttplate. One original magazine is included and the action
	seems to function well mechanically. Also included with the rifle is a
	photocopy of a notarized letter by the Johnson family describing the rifle
	above and indicating it was from the estate of Melvin Maynard Johnson,
	Jr. and was also displayed by him at the Franklin Institute in Philadelphia. Very likely used as a demonstrator by Johnson himself,
	this rifle would be an essential addition to the most advanced of U.S.
	martial arms collections. (13E10082-10) {C&R} (25,000/50,000)
	Est. 25,000 - 50,000
	Melvin Maynard Johnson, Jr.'s Personal Model 1941 Semi-Auto Rifle
	serial #A0000, 30-06, 22" 41-dated barrel with a bright excellent bore.
	This is the 10,000th Model 1941 rifle produced which was retained
	personally by Johnson and remains in lovely condition. The metal surfaces retain about 99% original Parkerized finish showing just some
	very light sparsely scattered handling marks. The bolt body remains
	bright and all markings remain intact and crisp. The smooth pistolgrip
	walnut stock and forend remain in very fine condition retaining much of
	their original oil finish showing a very thin 1" hairline crack at the upper
	tang missed at first glance, a very small flake at the edge behind the
	magazine and at the heel and some other scattered light dings and
	handling marks. Included with the rifle is a photocopy of a notarized
	letter by the Johnson family describing the rifle above and indicating it
	was from the estate of Melvin Maynard Johnson, Jr. and was also displayed by him at the Franklin Institute in Philadelphia. An excellent
	example with solid provenance for the advanced collector.
	(13C10082-11) {C&R} (10,000/20,000)
	Est. 10,000 - 20,000

204	Melvin Maynard Johnson, Jr.'s Original Test Model Rotary Magazine
	The ten-shot rotary magazine is perhaps the most distinctive feature of
	the Model 1941 Johnson rifle and this original test model was
	assembled in February 1939 for the Taft-Peirce Proof Model rifle "MR2".
	The metal surfaces of the magazine retain about 85% original blue and
	black enamel finishes showing edge wear, areas thinning to pewter
	gunmetal patina and some small spots of oxidation along the interior
	surfaces. There are some expected dents and dings along the exterior
	body along with a small crack through the forward edge but these are
	relatively unobtrusive. All components still seem to function as-intended
	and the follower spring remains strong. Included is a photocopy of a
	notarized letter by the Johnson family describing the magazine and
	indicating it was from the estate of Melvin Maynard Johnson, Jr. and
	was also displayed by him at the Franklin Institute in Philadelphia. An
	iconic piece from the Johnson collection. (13C10082-12) (1000/1500)
	Est. 1,000 - 1,500
205	Melvin Maynard Johnson, Jr.'s Personal Model 1903 NRA Sporter Bolt
	Action Rifle
	serial #1273362, 30-06, 24" star-gauged 2-34-dated Springfield Armory
	barrel with a bright near excellent bore showing a little fine frosting in the
	grooves and otherwise strong rifling throughout. The metal surfaces of
	this attractive rifle retain about 90% plus original blue showing some
	scattered light oxidation speckling, small areas flaking to plum-brown
	patina and handling marks. The receiver and checkered steel buttplate
	are taking on a pleasant plum-brown patina under bright light and all
	markings remain intact and crisp. The bolt remains mostly bright
	showing some scattered mild gray speckling and the body is
	electro-penciled matching the receiver. The walnut stock has been
	modified by Johnson with nice diamond point checkering and a black
	hard rubber pistolgrip cap. The stock rates very fine showing a very tiny
	hairline crack forming at the upper tang, some scattered light dings and
	areas of slightly worn checkering. This rifle is correctly listed by serial
	number in the DCM sales book and identified as a Sporter. The rifle is
	sighted with Lyman 48 receiver sight and a tall Lyman target globe front
	sight with large square post insert and the action seems to function well
	mechanically. Included with the rifle is a photocopy of a notarized letter
	by the Johnson family describing the rifle above and indicating it was
	from the estate of Melvin Maynard Johnson, Jr., also noting the
	checkering, its use by Johnson as his personal hunting rifle and
	indicating he discussed it in articles submitted to the American Rifleman
	magazine. (13C10082-13) {C&R} (5000/7000)
	Est. 5,000 - 7,000
206	Melvin Maynard Johnson, Jr.'s Personal Sako Bolt Action Rifle Used to
	Test 5.7 Spitfire Ammunition
	serial #23421, 5.7 Spitfire, 24" heavy round barrel with a mostly bright
	very good plus bore showing some mild oxidation in the grooves and
	strong rifling throughout. Fitted with a replacement .22 cal heavy
	sporter-style barrel, this rifle was used by Johnson for pre-production
	testing of his 5.7 (22) Spitfire ammunition, utilizing a 30 Carbine case
	necked down to 22. This cartridge would be introduced for the "MMJ
	5.7mm Johnson" M1 Carbine conversion introduced in 1963. The barrel
	of this rifle has mostly toned to a mottled gray patina showing scattered
	old oxidation and some areas of light pitting mostly along the left side.
	The action retains about 95% original blue with most of the loss due to a
	few spots of oxidation on the bolt release and some pitting along the
	triggerguard. The bolt body remains mostly bright with the knob showing
	some moderate oxidation. The action is nicely fitted into a commercial
	Marlin smooth capped pistolgrip walnut stock that remains in very good
	plus condition showing some mildew staining along the sides of the butt
	and some scattered light handling marks. The Marlin buttplate, pistolgrip
	cap and bullseye are intact. The rifle includes a Lyman All-American 6X
	Perma-Center scope with crosshair reticle and fair optics that show
	moderate yellowing but are certainly usable. The scope shows a couple
	small dings and light oxidation along the adjustment knob covers. The
	action seems to function well mechanically and one "cal. 222" marked
	magazine is included along with a photocopy of a notarized letter by the
	Johnson family describing the rifle above and indicating it was from the
1	estate of Melvin Maynard Johnson, Jr. An interesting rifle for the
	advanced American arms collector. (13B10082-16) {C&R} (2000/4000)

212 Extensive Archive of Johnson Automatics Blueprints, Correspondence 215 Very Fine U.S. Model 1903 Rod Bayonet Rifle by Springfield Armory serial #33165, 30-03, 24" barrel with a bright excellent bore. This is a and Documents This is a large grouping of original documents relating to the Johnson lovely example of these interesting and very desirable U.S. martial arms. Automatics Firm, the Model 1941 semi-auto rifle and light machine gun. The rear sight base and barrel retain about 90% original blue that is Included are over 100 blueprints covering many of the components for taking on a pleasant plum-brown patina with areas thinning to gray and both the Johnson rifle and light machine gun, numerous factory some silvering at the muzzle. The receiver retains almost all of its numerical parts and assemblies lists and extensive correspondences attractive smoky gray oil-quenched case-hardening as do the bolt sleeve between Johnson and members of the U.S. government and military and trigger. The rod bayonet, bayonet assembly and rear barrel band all relating to the consideration of his arms. There are also a handful of show lovely brilliant bright blue, the forward barrel band with a bit more original photographs and negatives showing rifles, machine guns and flaking to gray-brown patina, while the triggerguard and floorplate retain their components along with some company brochures and materials about 80% original bright blue showing some light oxidation freckling from the post-war period relating to the Spitfire rifle and other and fine flaking to pleasant gray-brown patina. The bolt body is properly commercial enterprises and a bundle of M1 Carbine blueprints and in-the-white and remains mostly bright showing a little mild freckling drawings perhaps utilized for the Spitfire rifles. Some interesting items while the heat-treated handle has toned to a deep gray patina overall. include a number of spiral bound notebooks written in Johnson's hand The distinctive ex-tractor also retains about 95% brilliant fire blue, the consisting of rough drafts for magazine articles and a partial biography, loss due to just a very thin scratch along the bottom edge. The buttplate a photostat of Johnson's handwritten patent claim, typewritten military has toned to gunmetal gray and the safety re-tains strong original proving ground reports and more. There are some more modern pieces blackening. All receiver markings remain crisp and excellent and the of information and research relating to Johnson included as well. One barrel is properly unmarked. The smooth walnut stock and handguard interesting USMC document dated November 5, 1937 is signed by remain in near excellent condition showing a fine oil finish along with Johnson and has him taking receipt of "12 - Magazines, assembly some scattered very light dings and a tiny flake at the toe. There is a B.A.R. / parts spare". Note the early operational examples of the thin repaired 3/4" sliver along the right side edge of the stock between Johnson rifle utilized modified BAR magazines. Condition ranges from the bands and a very expertly repaired 4" hairline crack at the nose that fair to very good plus, a number of documents show moderate water is only no-ticeable upon very close inspection. The stock retains crisp damage and deterioration along with staining and light tears but most of "77" and circled "P" behind the triggerguard and "JSA / 1904" car-touche the material is intact and legible. The vast majority of this material was on the left side wrist. The handguard shows a slightly darker reapplied acquired from the Johnson estate. This is a fine and interesting finish and it may be an old re-placement or arsenal modification. It is the ensemble reflecting the prolific and talented work of Mr. Johnson correct length and shows proper riveted spring clip though the tenon at Please see our Online Auction for a few more smaller items related to the tip was very nicely spliced-in and glued, the work being expertly Johnson Automatics. (13B10082-8E) (400/600) executed. The stacking swivel is the correct style but shows an old Est. 400 - 600 Parkerized finish, the magazine follower is the later style and the firing Johnson Automatics Indoor Target Gun with Original Box 213 pin rod may be a replacement as it shows a little pinprick pitting beneath This is a very fine example of these scarce rubber band-powered "guns" its dark gray finish. The rifle otherwise appears to be equipped with made for fun indoor shooting by the Johnson company just post-war. correct parts and features including the famous 23 1/2" rod bayonet, The upper metal housing retains about 96% original blue showing some distinctive front sight assembly, thin smooth trigger, correct safety and scattered light oxidation and minor handling marks. The dark brown bolt sleeve, smooth buttplate with Krag-style trap door, magazine cutoff Bakelite stock remains in excellent condition showing a few minor with polished "ON" side and Model 1902 2000 meter rear leaf sight with handling marks and the right side shows factory molded marking flip-up aperture blade (the aperture has been opened slightly). The "INDOOR TARGET GUN / JOHNSON AUTOMATICS U.S.A. / PATS. action seems to function well mechanically and an original muzzle cover PENDING". The rubber band has deteriorated but all other parts appear in very fine condition is included. Surviving rod bayonet rifles are to be intact and the original sights are present. The box has seen better extremely rare and this example retains lovely condition and mostly days showing moderately sized portions missing, extensive tears and correct parts. An excellent rifle for the advanced U.S. martial collector. blown out corners but is mostly present. The linen backstop is mostly (13F10082-57) {C&R} (15.000/25.000) intact as well showing some staining and small tears along with the Est. 15,000 - 25,000 metal target stand that shows scattered oxidation, a few targets, empty 216 Fine Smith & Wesson No. 1 Second Issue Revolver with Gutta Percha rubber band and pellet packets and hang tags. (13A10082-15) Case (200/300) serial #41657, 22 RF, 3 3/16" ribbed octagon barrel with a bright very Est. 200 - 300 good bore showing some spots of light oxidation and strong rifling Johnson Automatics Indoor Target Gun with Original Box 214 throughout. The barrel and cylinder of this handsome revolver retain This is an excellent example of these scarce rubber band-powered about 80% original bright blue showing scattered flaking to pleasant "guns" made by the Johnson company just post-war. The upper metal gray-brown patina, a few specks of old oxidation and some fine pinprick housing retains about 99% original blue showing a few minor handling pitting along the cylinder edges. The cylinder stop and ejector also retain marks. The yellow cocking lever warning sticker is still present on the left a healthy amount of flaking bright blue. The frame retains about 99% side. The dark brown Bakelite stock remains in excellent condition and original silver finish showing a few scattered mild handling marks and is the right side shows factory molded marking "JOHNSON / INDOOR taking on a wonderful tarnish overall. The trigger is a smooth grav patina TARGET GUN / PATS, PENDING", a slightly different and simpler and the hammer shows generous wisps of vibrant case-hardened colors marking than the previous lot. The rubber band has deteriorated but all along the sides. The smooth rosewood grips remain in excellent condition retaining about 98% original varnish showing a few scattered other parts appear to be intact and the original sights are present. The original box rates very fine showing some moderate wear at the ends handling marks, their fit is excellent and the right panel is appropriately with some light flaking and small tears. The interior linen backstop stamp-numbered matching the frame. The other numbered parts are remains in excellent condition as does the metal target stand. Also matching by assembly number, barrel-to-frame fit exhibits a little bit of included are a few unused targets and a full packet of pellets. This is an minor play and the action seems to function well mechanically with solid excellent example of these interesting Johnson products, which were a timing and lock-up. The original dark brown gutta percha case with commercial flop largely due to their high price of \$15 in 1947. image of revolver remains in very good plus condition, the biggest (13A10082-14) (250/350) apology being a 3 3/4" area at the top right corner of the base near the Est. 250 - 350 hinge that shows some light cracks, an old synthetic repair and scuffing. The exterior is otherwise quite nice showing just a couple very tiny chips and minor dings scattered about. The interior lid is lined in dark maroon baize with embossed foliate motif showing some mild discoloration and one small thin tear and the base lining rates very fine. The small spacer at the top right of the base has been lost to the years but the cartridge block and barrel rest are excellent. A very handsome ensemble for the antique Smith & Wesson collector. (13C9997-305) {ANTIQUE} [John

Lipski Collection] (2000/3000) Est. 2,000 - 3,000

A very pleasing example of the last U.S. government National		232	Est. 1,800 - 2,200 Fine U.S. Model 1826 Navy Flintlock Pistol by S. North .54 cal, 8 5/8" round barrel with a very good light oxidized bore. The barrel and mountings of this attractive pistol have mostly toned to a pleasant mild gunmetal patina showing some scattered gray speckling and remnants of old light pitting that is mostly smoothed-over from the years. The breech retains very nice markings with "US / AH / P". The lockplate has toned to a nice deep plum-brown patina showing a little old oxidation speckling while the brass pan is a lovely rich ocher tone and the frizzen spring even retains some faint streaks of fire blue. The lockplate also retains very nice strong markings with 1828 date at the rear and "U.S. / S. NORTH" in the center. The pistol remains in the original flint and lockplate fit is perfect throughout. The smooth walnut stock remains in very fine condition with very nice edges and fit overall. There are a couple of very thin drying cracks and tiny chips mostly at the tip along with the expected scattered light handling marks. There is a small "X" carved at the right side tip and the original markings have softened somewhat but remains remarkably strong with nice "ET" inspector cartouche on the left stock flat and small "T" stamp on the left side grip. The belt hook and swiveling ramrod assembly are intact and the lock functions crisply. This is a very handsome example of these desirable low contract pistols, only about 3000 of which were produced, and seldom seen in the original flint. A very fine pistol for the U.S.

240	Exceptional Smith & Wesson New Model No. 3 Revolver with Rare Kelton Safety Device serial #24514, 44 CF, 6 1/2" ribbed round barrel with a bright excellent bore. This is a superb example of a New Model No. 3 equipped with the very rare Kelton patent thumb safety device. Curiously this example also appears to be chambered in some sort of experimental cartridge, the chamber mouths are typical 44 S&W Russian at about .432" but the rear end of the chambers are wider than normal for the 44 Russian, measuring about .478"; cylinder length is 1 7/16". As essentially all of these revolvers were semi-experimental in nature it is not incon-ceivable that other aspects of the gun may have been experimental as well. The metal surfaces retain nearly 99% original nickel finish showing one tiny area flaking to dark brown patina at the right muzzle edge and a few other scattered light handling marks. The case-hardened colors along the hammer and triggerguard have muted somewhat from the years to a pleasant smoky gray patina, the hammer with some good colors, while the barrel latch retains 99% original bright blue and the trigger shows		242	Scarce Smith & Wesson First Model 32 Hand Ejector Target Revolver serial #17419, 32 S&W Long, 6" ribbed round barrel with a bright excellent bore. The metal surfaces of this nice revolver retain about 90% original bright blue with most of the loss due to flaking to a pleasant gray-brown patina along the sides of the barrel and cylinder, scattered edge wear and a few thin scratches on either side of the frame. The hammer and trigger retain bold case-hardened colors muting overall to an attractive smooth gray patina and all markings remain intact and crisp, the cylinder flats with the distinctive maker markings and patent dates. The checkered black hard rubber target grips remain in excellent condition showing some subtle discoloration under bright light and a few minor handling marks; the left panel retains a strong patent date beneath the monogram. The grips are un-numbered but their fit to the frame is perfect and the other serialized parts are matching. The action seems to function well mechanically with solid timing and lock-up. An attractive example of Smith & Wesson's first swing-out cylinder revolver in the desirable target configuration. (13A10000-67) {ANTIQUE} [Roy

			Est. 5,500 - 6,500

Colt New Service Target Model Revolver serial #328171, 44 S&W Russian & Special, 7 1/2" barrel with a bright excellent bore. The barrel of this handsome revolver shows remnants of some older applied cold blue having mostly toned to a pleasant smooth deep gray patina. The frame and cylinder retain about 95% original blue showing some mild edge wear, light handling marks and slight thinning along the cylinder flats under bright light. The checkered trigger and back surface of the hammer showing some very mild thinning blue, the polished sides of the hammer remain brilliant and the ejector rod head retains all of its strong case-hardened colors. All markings remain intact and strong and the gripstraps show proper deep diamond checkering that remains crisp. The checkered walnut fleur-de-lis grips with recessed gold Colt medallions remain in excellent condition showing a few mild handling marks and their fit to the frame is perfect. Both panels are pencil-numbered matching the frame and also show a small ink marking on their interiors "OK 57361". The crane is matching the frame and revolver is sighted with adjustable square notch blade rear sight deepened very slightly during the period of use and adjustable front sight with brass bead. The action seems to function well mechanically with excellent timing and lock-up and a smooth light trigger pull. The included factory letter does not indicate the stocks but otherwise confirms the revolver shipped as-described on December 27, 1930 in a single day shipment, sold to the Bolles Brendanour Co, and shipped to the Kruse hardware Co. of Cincinnati, Ohio, A fine New Service Target revolver in 44 Russian, (13B10187-14) {C&R} (5000/7000) Est. 5.000 - 7.000

Lot Title/Description

270 Exquisite Exhibition-Grade Pair Of J Adam Kuchenreuter Percussion Pocket Pistols .36 cal, 3" octagon barrels showing very good bores. This aston-ishing set of pistols showcases the exceptionally exquisite work that Kuchenreuter was known for. Obviously made for some person of import, or more likely for an exhibition, the pistols are cased en suite in a French fitted burl faced presentation case with a complete complement of accessories and tools. The metal treatment on the arms is indeed artistry in metal. Nearly every iron and steel surface shows exquisite chiseled open flowing scroll inlays in silver and gold with the finest satin finish damascus pattern visible beneath on the barrels. The largest open flowing scroll inlays with scallop shell and flo-ral motifs are of silver, with smaller inter-mingled gold inlays of simple scroll with scalloped floral and dot decorations. Each pistol is fitted with a diminutive simple blade front sight drift-adjustable in a tiny dovetail, with a tiny v-notch elevation-adjustable rear sight and each features the makers name inlaid in gold across the top flat "J Adam Kuchenreuter in Regensburg", each numbered in turn to the front of the sight blade "1" and "2". The balance of the iron surfaces are identical with the steel beneath a pewtery gunmetal finish, the hammers showing a tiny bit of light oxidation staining from the years. The lockplates are neatly rebated at their rear edges and each features a piv-oting weighted hammer rest safety catch. The arms are stocked in a lovely grade of French walnut which is overall carved with flowing relief scroll with the finest background stippled shading. The grooved butts flare very slightly and are capped with lovely flat blued steel scalloped-edge plates with light gold and silver inlay, each with a very handsome chiseled silver relief cap of a male African lion, fine silver wire inlay gracing the front and rear of each grip with an unengraved squarish silver monogram plate atop each wrist. The stock flats of each pistol exhibit some light handling marks and flaking varnish but each rate very fine to excellent over all, with a tiny drying crack evident in the thin wood beneath the flared bolster area. Each pistol is equipped with a single set trigger and the locks function properly mechanically. Inside the case we find patch cutter, original bullet mould, nipple spanner, turnscrew, mainspring vise, a very neat key for adjusting the rear sight elevation, loading rod, nickel silver cleaning rod with a mallet-style head of horn, powder measure and a breech wrench, all are bright-polished, the turnscrew and nipple spanner with burl handles and nickel silver inlays. There are two nickel silver patch or cap containers and a lovely ribbed powder flask of bone with nickel silver top and bottom, its stopper has gone missing but would certainly be easy for a craftsman to fashion. The turn screws mainspring vice and sight adjustment tool all feature the same geometric pierced cross-fleury / cross bottony quadrefoil decoration. The interior of the case is a deep forest green baize with burgundy outlining and features an impressed gold makers mark on the interior lid "Johan Adam/Kuchenreuter/in/Regensburg". The case proper is hardwood with an exterior walnut burl veneer applied with a small brass geometric inlay in the lid, it rates excellent, the lid slightly warped. It is clear that no expense nor effort of workmanship was spared in the construction of these arms and their accessories, it was doubtless a showpiece either in Kuchenreuter's shop proper or in some European exhibition. Kuchenreuter is known for constructing the highest-quality arms seen in the period, this pair is no exception and is worthy of the finest collection of ornate or high-quality European pistols. (3F9670-493) {ANTIQUE} [David & Lore Squier Collection] (18.000/22.000) Est. 18.000 - 22.000 271 Rare Smith & Wesson Registered Magnum Double-Action Revolver serial #55162 (Reg No. 3271), 357 Magnum, 4 1/2" barrel with a bright excellent bore. The metal surfaces retain about 95 to perhaps near 97% original blue, the loss being primarily some muzzle wear with high edge and contact point wear, the cylinder showing a couple light rub marks. The grooved trigger and humpback grooved hammer show excellent original color case-hardening. The revolver now wears a nice pair of Roper grips which were adapted from a different revolver, disassembly reveals some synthetic material on their interior that has been used to adapt the grips to this revolver for a non-slip fit. Externally one cannot tell and they rate very fine showing sharp points and just a bit of expected wear. The arm features a red King reflector front sight and a square notch white outline rear and times and locks up perfectly with matching numbers. Factory records indicate that there were only 90, 4 1/2" barreled Registered Magnum's produced. A very respectable Registered Magnum for that hole in your Smith collection. Lot Title/Description

Lot Title/Description

272 Smith & Wesson Registered Magnum Double-Action Revolver Shipped to Wyoming and Nevada serial #48723, .357 Magnum (Reg No. 1413), 6 1/2" barrel with a bright excellent bore and original 8 3/4" barrel also with a bright excellent bore. Perhaps originally intended as someone's target gun, this gun shipped from the factory with an 8 3/4" barrel with Patridge front sight. At some point its user decided a shorter barrel would be handy and clearly returned the gun to Smith & Wesson to have a shorter barrel with duty-style sight fitted. Both of the barrels are correctly numbered to the gun within the ejector rod recess in matching fonts. As it currently sits the revolver retains about 92 to perhaps near 95% original blue, the primary loss being holster wear on left and right of barrel and wear on the cylinder, also consistent with holster use. There is a bit of light high edge wear and holster rub on bow of guard and underside of frame with a bit of very light oxidation speckling on the left of the frame near the Smith & Wesson trademark. The grooved service style trigger shows very good color case-hardening, muting on its left while the grooved hammer has excellent original color case-hardening. The checkered walnut Magna style Smith & Wesson medallion grips rate very fine showing some minor handling marks and light compression of the points and are numbered to the revolver. The original barrel shows guite a bit less wear and if one were to install it, the gun would likely rate closer to 97%. The included factory letter shows that the revolver shipped in September 1936 to Chester Simpson of Jackson Wyoming with the 8 3/4" barrel and Patridge front sight and a square notch rear, it was sighted in at 25 yards with .357 Magnum ammunition using a 6 o'clock hold. Chester Simpson of Jackson Hole Wyoming ran a hardware store, was a town Councilman, and he leased Turpin Meadows Lodge from the Forest Service, a hunting camp out of town. The second factory letter shows the arm shipping to the Cleveland Mine in Montello Nevada, when the then owner, Jack McWhorter, had a problem with the gun, and upon sending it back to Smith, also requested the current shorter barrel be installed. Doubtless Mr. McWhorter travelled through Jackson Hole and may have purchased the gun from Simpson's Hardware. A copy of the correspondence letters between he and D.B. Wesson are included with the factory letters. A handsome registered Magnum with the additional bonus of an original spare barrel. (3B10090-4) {C&R} (5000/7000) Est. 5,000 - 7,000 273 Smith & Wesson Registered Magnum Double-Action Revolver serial #57662(Reg No. 4335), .357 Magnum, 6 1/2" barrel with a bright excellent bore. This big registered Magnum remains in very fine condition. The metal surfaces retain a solid 97 to near 98% original blue showing only sharp edge wear, primarily at the muzzle, and a very sparse, very light handling mark here and there. The grooved trigger shows excellent color case-hardening fading only along its right sharp edge and the grooved hammer has excellent original color case-hardening. The diamond checkered Magna walnut grips with silver Smith & Wesson medallions rate excellent with sharp points and all the original varnish, they are numbered to a different gun but their fit is excellent. The gun times well and locks up properly and is fitted with a Call bead front sight and black blade square notch rear and appears to have seen little or no use, the face of the cylinder is immaculate and there are no wear marks on the face of the recoil shield, with the forcing cone remaining bright and strong blue within the barrel. The included factory letter shows shipment in December 1938 to Lou Eppinger Inc. of Detroit Michigan, the famous sporting goods and fishing lure dealer and manufacturer (his Daredevle still can't be beat) and confirms the configuration including the front sight mentioning the revolver was sighted in at 25 yards using 6 o'clock hold. A strong condition Registered Mag with a rather nice special order front sight. (3B10090-38) {C&R} (5000/7000) Est. 5.000 - 7.000

	serial #53326 (Reg No. 2802), 357 Magnum, 5" barrel with a bright excellent bore. The metal surfaces on this attractive Registered Magnum retain about 97% original blue, the loss being some muzzle edge wear and light wear on the sharp edges and contact points and cylinder ring. The grooved trigger shows strong original color case-hardening with silvering on its right side while the grooved hammer retains excellent original color case-hardening. The checkered walnut Magna grips with silver Smith & Wesson medallions rate very fine to near excellent showing just light wear and are numbered to the gun. The arm features a Marbles Sheard style front sight on a King ramp and a very nice shallow u-notch rear sight which gives a sharp sight picture. The left side of the frame shows some odd polishing around the cylinder thumblatch but a close inspection of the balance of the metal surfaces show no evidence of a refinish at all, close scrutiny with a powerful loupe shows the balance of the metal surfaces to be just as they left the factory, perhaps a Friday afternoon or Monday morning job (perhaps the gun was damaged after polishing before final blue) in any event it appears to be original blue in all respects. Really a very handsome shorter-barreled registered Magnum with just enough wear it could be utilized at the range while maintaining solid investment potential (3B10090-17) {C&R} (4000/6000)
275	Smith & Wesson Model 320 Revolving Rifle with Original Case
	serial #644, 320 S&W, 16" ribbed round barrel with a bright near excellent bore showing a few small spots of mild oxidation and strong
	rifling throughout. The barrel of this revolving rifle retains about 40% original bright blue strongest in the protected flutes with the balance
	toned to a medium gray patina showing some sparse remnants of old
	oxidation staining and a few small areas of fine pinprick pitting that have been very lightly cleaned long ago. The frame and cylinder retain about
	60% original bright blue with the cylinder showing flaking to pleasant
	gray-brown patina and the sides of the frame toning to gray and exhibiting some very fine scratches. The stock mounting cut shows
	some additional fitting from the period, the butt cutout is almost the
	full-length of the base and the serial number is no longer present. The hammer and triggerguard show generous vibrant case-hardened colors,
	the triggerguard with areas muting to mild gray, and the sides of the
	trigger show a hint of pale straw color. The checkered mottled black and red hard rubber grips and forend remain in excellent condition showing a
	very minor thin crack forming along the base of the right panel and a
	couple other tiny handling marks. The right panel is pencil-numbered matching and fit to the frame is excellent. The original shoulder stock
	remains in very fine to excellent condition and is the correct variant with
	large factory filler screw for installation of a tang sight, stock hardware retains about 80% original bright blue flaking to pleasant gray-brown
	patina, the walnut shows a few scattered light dings with some nice
	subtle grain figure and the hard rubber buttplate is excellent. Despite the lack of frame number, all other numbered parts show matching "644",
	barrel-to-frame fit is excellent and the action seems to function well
	mechanically. The front sight, which would have slid onto the barrel rib,
	is not present and the flip-up rear iron sight is intact. The included original case shows its age and rates about good showing moderate
	overall scuffs, flaking and some small tears. The lid attachment is rather
	tender and the leather straps and carry handle have been lost to the years, though the brass handle attachment hardware is present. The
	interior shows similar wear with scuffing, small tears and a loose
	partition. Also included is a full box of 50 original cartridges by UMC in buff box with lid depicting image of the rifle. There is a small puncture in
	the lid and some scuffs along the edges but it otherwise rates about very
	fine. The cartridges are very fine to near excellent showing some
	scattered mild tarnishing and are devoid of headstamps. This revolving rifle has seen honest use and remains a very solid example of these
	interesting and scarce Smith & Wesson arms. (13D10000-8) {ANTIQUE}
	[Roy Jinks Family Collection] (7000/9000) Est. 7,000 - 9,000
276	Smith & Wesson No. 3 Second Model American
	serial #30211, 44 S&W American, 8" barrel with an excellent bore. This is a very high condition revolver. The grips are numbered "32688" on
	inside of right panel and the gun shows matching assembly number
	"376" on right side of grip frame, rear face of cylinder, underside of barrel latch and on the rear face of the barrel. The metal surfaces of the
	revolver show 98% original nickel plated finish showing just a little high
	edge wear. The hammer and triggerguard show strong original color case hardened finish. Screwheads show just the lightest of slot wear.
	The two-piece walnut grips rate excellent with nearly all of their original
	finish and hardly any handling marks. The grips fit very nicely and seem
	to have been with the revolver since the period of use. A wonderful nickel-plated second model American. (1C10000-24) {ANTIQUE} [Roy
	Jinks Family Collection] (6000/8000)
	Est. 6,000 - 8,000

Smith & Wesson Registered Magnum Double-Action Revolver

277

278

(3000/5000) Est. 3,000 - 5,000

Smith & Wesson New Model No. 3 Single Action Target Revolver with Lyman Ivory Front & Rear Sights serial #2823, 32-44 S&W Target, 6 1/2" ribbed round barrel with a bright excellent bore. The metal surfaces of this revolver retain about 60% original bright blue showing moderate loss along the sides of the barrel, cylinder and high edges toning to a mix of gray and plum-brown patina, and the cylinder with areas of old oxidation staining and some light pitting scattered about. The hammer and trigger retain attractive vibrant case-hardened colors throughout muting to a pleasant mild gray in areas and the protected sides of the trigger show a hint of straw color. The barrel address with reissue patent date remain crisp and clear and the frame has been modified during the period of use to accept Smith & Wesson's revolver shoulder stock, the two middle digits of the serial number on the butt lost to the milled slot. The black checkered hard rubber grips remain in near excellent condition showing a few mild handing marks; they appear to be un-numbered and their fit to the frame is excellent. The revolver is sighted with a fine Lyman ivory bead No. 16 front sight and the Lyman No. 19 rear sight blade that features fine line anti-glare matting, thin ivory line inserts and a rather generous notch. The throw of the extractor seems to be a bit short but this is relatively unobtrusive and the cylinder is the 1 7/16" variety. All of the remaining serialized parts are matching, barrel-to-frame fit is solid and the action is functional with timing a little bit off on a few chambers and otherwise good lock-up and a crisp hammer. A solid example of these scarce target revolvers with seldom-seen sights, (13B10000-112) {ANTIQUE} [Roy Jinks Family Collection] (1800/2200) Est. 1,800 - 2,200 Smith & Wesson New Model No. 3 Revolver "Two Barrel Set" serial #537, 44 S&W Russian, 6 1/2" and 3 1/4" ribbed round barrels with bright excellent bores, the longer barrel with a hint of faint frosting. The metal surfaces of this revolver retain about 96% original nickel finish with most of the loss due to some fine flaking to gray-brown patina along the right side frame and gripstraps, also with some scattered light handling marks. The cylinder and sides of the longer barrel show some mild clouding and there is moderate slot wear and some small tool marks around the hinge screw. The triggerguard and hammer retain most of their attractive case-hardened colors, the hammer particularly vibrant and the trigger shows nice straw color. The latches also retain about 98% original blue, all markings remain crisp and clear and the

cylinder is the 1 7/16" variety. Both barrels show two line address and patent dates with "Reissue" date, the font on the 3 1/4" barrel is appropriately smaller and shows two additional patent dates along the topstrap. The black checkered hard rubber grips remain in near excellent condition showing a couple tiny dings and some mild edge wear. The right panel is pencil-numbered to the gun and their fit is excellent. The 6 1/2" barrel, its latch and the cylinder are matching the frame while the 3 1/4" barrel and its latch are numbered "15232". There is no latch spring present with the longer barrel, barrel-to-frame fit is otherwise solid and the action seems to function well mechanically with excellent timing and lock-up. A lovely New Model No. 3 with rare short barrel. (13B10000-9) {ANTIQUE} [Roy Jinks Family Collection]

Lot Title/Description

279	Factory Engraved Remington Rolling Block "E" Grade Mid-Range Target
	Rifle serial #6893, 40-70, 32" part round part octagon barrel with a bright
	excellent bore. This lovely rifle features matching numbers on the barrel,
	frame, and end-grains of both the buttstock and the forend as well as
	the inside surface of the buttplate. This rifle features wedges of
	beautifully executed scroll engraving on the action, triggerguard, barrel
	breech and forend tip. All screwheads and pins are engraved including
	the buttplate screws, the smooth steel shotgun buttplate is not
	engraved. The barrel shows the six-line patent dates on the top flat
	ahead of breech, presumably to give the engraver more of a blank
	canvas on the action. The barrel has been nicely reblued long ago with neatly filled holes, one through the patent dates and the other further
	forward on the octagonal section. There is also a dovetail cut through
	the barrel address after the "E" in the "E. REMINGTON & SONS"
	address with the first few letters in "Remington" being no longer visible.
	The color and style of the finish is excellent, the finish is old and passes
	muster upon first glance. The bottom of the barrel beneath the forearm
	is marked "T P & B PG ENG". The barrel shows about 90% of this
	quality blue with areas of thinning and loss taking on a pleasing brown
	patina. The action shows perhaps 70% original color case-hardened
	finish which has faded to a pleasing smooth mottled pewter gray. The metal remains smooth and the engraving remains crisp. The rifle
	features its original factory single set trigger. The checkered pistolgrip
	buttstock and smooth iron tipped forend rate very good appearing to
	have been very lightly refinished long ago, the surface and color are
	wonderful and there is an old repaired break through the wrist that is in
	the checkering, sound and well camouflaged. The fit remains excellent
	both at the action and at the buttplate and the lower stock screw is a
	replacement. The interior of the forend is written in large block pencil
	letters "J. APPEL" indicating that this rifle as once part of the famous
	Jack Appel Collection which was sold at auction in the 1980's. The rifle
	is sighted with a windgauge front with spirit level and a mid-range
	Vernier tang mounted peepsight. This rifle is illustrated and de-scribed in
	Marcot's Remington Rolling Block Sporting and Target Rifles on page
	182. Engraved Rolling Blocks are very rare, the opportunity to acquire one is even more rare. A fine and handsome factory engraved Rolling
	Block rifle. (1D9670-162) {ANTIQUE} [David & Lore Squier Collection]
	(8,000/12,000)
	Est. 8,000 - 12,000
280	Very Fine Smith & Wesson No. 3 First Model Russian Commercial
	Revolver
	serial #24893, 44 S&W Russian, 8" ribbed round barrel with a bright
	excellent bore showing a few sparsely scattered freckles and crisp rifling
	throughout. The metal surfaces of this wonderful revolver retain about
	96% original nickel finish showing some areas of very fine flaking and
	freckling scattered about, one cylinder flat worn slightly to gray patina
	and a few scattered light dings along the edges. The hammer shows
	lovely vibrant case-hardened colors throughout, the triggerguard also with strong colors muting to a pleasant smoky gray. The latch and
	trigger retain almost all of their nice dark gray oil-quenched
	case-hardening and the single line barrel address with patent dates and
	"RUSSIAN MODEL" remain crisp and clear. The lanyard ring hole on the
	base of the frame shows a factory filler screw. The smooth walnut grips
	remain in near excellent condition retaining strong oil finish and showing
	some scattered small dings, their fit is a little bit proud of the backstrap
	though the right panel is appropriately stamp-numbered matching the
	frame. The remaining numbered parts are matching by assembly
	number, barrel-to-frame fit is excellent and the action seems to function
	well mechanically with solid timing and lock-up. A very handsome first
	model Russian for the Smith & Wesson collector. (13C10000-21)

The barrel is missing the accelerator, accelerator block, accelerator block pin and should not be fired until they are replaced by a professional. The left side of the barrel extension is marked "AUTO MAG
295	Superb Smith & Wesson No. 3 Second Model American Revolver serial #16384, 44 S&W American, 8" barrel with a perfect, as-new bore. This is an extremely high condition American. The barrel shows proper one-line address and shows 95% original bright blue finish remaining with loss due to some light freckling on the left side along with some light muzzle wear. The cylinder shows about 97% original blue with loss only on the highest edges and due to a turn ring. The frame shows 95 - 97% original bright blue with some very light freckling on the top of the backstrap. All areas which show the light freckling show a lovely smooth brown patina which blends nicely. The hammer and triggerguard show strong original color case hardening overall. The butt has a factory filler screw in the lanyard swivel hole and some frame screws show the slightest of slot wear which wouldn't warrant mention if not for the excellent plus with virtually all their original finish remaining and are properly numbered to the gun under the right grip. Assembly number "328" appears on rear face of cylinder, underside of barrel latch and on		298	"A" prefix, of which only 108 where chambered for the 357 AMP cartridge. A scarce and very desirable version of the Auto Mag in excellent condition. (8A10141-8) {MODERN} (2500/4000) Est. 2,500 - 4,000 Scarce TDE Auto Mag Semi-Auto Pistol serial #A06872, 44 AMP, 8 1/2" plain tapered barrel with an excellent bore. A fine example of an El Monte, California, manufactured TDE marked pistol with the Jurras Lions Head logo. The pistol remains in fine condition, the stainless steel surfaces rate very good to excellent with a freckling of very light stains, mostly on the barrel and barrel extension in addition to few handling marks. The grips rate good showing very little wear but both panels have surface blemishes on the upper portions from contact with some contaminant and there is a 5/8" wide piece of the right panel at the rear that fractured and was reattached. The pistol features a semi-ramp stainless steel front sight, and blue finished adjustable rear sight. The barrel is missing the accelerator, accelerator block, accelerator block pin and should not be fired until they are replaced by a

The butt has a factory filler screw in the lanyard swivel hole and some frame screws show the slightest of slot wear which wouldn't warrant mention if not for the extremely fine condition of the revolver. The two-piece walnut grips rate excellent plus with virtually all their original finish remaining and are properly numbered to the gun under the right grip. Assembly number "328" appears on rear face of cylinder, underside of barrel latch and on rear face of barrel. This is an exceptional Smith & Wesson American, clearly one of the finest surviving examples. A great opportunity for the Smith & Wesson collector. (1D10000-43) {ANTIQUE} [Roy Jinks Family Collection] (6000/8000)			 "A" prefix, of which only 108 where chambered for the 357 AMP cartridge. A fine example of an El Monte, California, manufactured TDE marked pistol with the Jurras Lions Head logo. The pistol remains in fine condition, the stainless steel surfaces rate very good to excellent with a freckling of very light stains, mostly on the barrel and barrel extension in addition to few handling marks. The grips rate good showing very little wear but both panels have surface blemishes on the upper portions from contact with some contaminant and there is a 5/8" wide piece of the right panel at the rear that fractured and was reattached. The pistol features a semi-ramp stainless steel front sight, and blue finished adjustable rear sight. The barrel is missing the accelerator, accelerator block, accelerator block pin and should not be fired until they are replaced by a professional. The left side of the barrel extension is marked "AUTO MAG / 44 AMP MODEL 180 / EL MONTE, CALIF. / PATENTED" flanked left and right respectively with TDE logo and Lee Jurras Lion Head logo. The pistol includes a single factory magazine. A very good example of a TDE Auto Mag with the very scarce 8 1/2" barrel. (8A10141-9) (MODERN} (2000/4000) Est. 2,000 - 4,000 Scarce TDE / High Standard Model 160 Auto Mag Semi-Auto Pistol serial #A05580, 357 AMP, 6 1/2" ventilated rib barrel with an excellent bore. This fine El Monte, California, manufactured pistol remains in excellent condition showing little or no use. The matte and satin stainless steel surfaces rate excellent as lightly cleaned on the frame. The checkered black synthetic factory grips rate excellent showing light handling wear on the right panel. The pistol features a smooth integral stainless steel surfaces rate excellent a
295	Superb Smith & Wesson No. 3 Second Model American Revolver serial #16384, 44 S&W American, 8" barrel with a perfect, as-new bore. This is an extremely high condition American. The barrel shows proper one-line address and shows 95% original bright blue finish remaining with loss due to some light freckling on the left side along with some light muzzle wear. The cylinder shows about 97% original blue with loss only on the highest edges and due to a turn ring. The frame shows 95 - 97% original bright blue with some very light freckling on the top of the backstrap. All areas which show the light freckling show a lovely smooth brown patina which blends nicely. The hammer and triggerguard show strong original color case hardening overall. The butt has a factory filler screw in the lanyard swivel hole and some frame screws show the slightest of slot wear which wouldn't warrant mention if not for the extremely fine condition of the revolver. The two-piece walnut grips rate excellent plus with virtually all their original finish remaining and are properly numbered to the gun under the right grip. Assembly number "328" appears on rear face of cylinder, underside of barrel latch and on rear face of barrel. This is an exceptional Smith & Wesson American, clearly one of the finest surviving examples. A great opportunity for the Smith & Wesson collector. (1D10000-43) {ANTIQUE} [Roy Jinks Family Collection] (6000/8000)			 "A" prefix, of which only 108 where chambered for the 357 AMP cartridge. Lot Title/Description

305 Handsome Special Order Joseph Lang Miniature Boxlock Double Ejectorgun serial #19210, 410 bore (3"), 26" ventilated rib barrels choked a tight modified left and light full right, showing bright excellent bores (the single non-selective trigger fires the left barrel first). The barrels retain a nice 97%, likely original blacking, showing some very light muzzle wear and perhaps a scattered very light handling mark here or there one must really search for. The barrels are maker-marked "Joseph Lang & Son" and "7 Bury St., St. James London England" and have light bands of engraving at the breech with a lovely very finely hand matted section raising to the wavy matted rib. There is an ivory bead front and the center bead has broken off but would be a very easy replacement and the barrels are Nitro proved for 9/16 oz. of shot. The miniature frame retains perhaps 75-80% original color case-hardening, muting along the bottom edges adjacent to the triggerplate, very strong along the top edges and areas of the fences. It shows only the very lightest borderline engraving with floral treatment at the hinge pin covers, maker marked both left and right "Joseph Lang & Son". The bottom plate retains some very good original blue, stronger on the triggerplate and bow of the quard with the grasping area of the long tang fading to plum, the top lever with strong original blue. "Safe" is inlaid in silver ahead of the automatic safety. The arm is stocked scant round knob pistolgrip in a very nice grade of English walnut showing lovely grain figure throughout. It features nicely checkered panels with mullered borders and an un-engraved German silver oval monogram plate along the toeline. The length of pull to the grooved butt is 13 7/8" from the single nonselective trigger with drops of 1 5/8" and 2 5/8". The checkered English walnut semi-beavertail style forend is very generous and hand-filling and has a 3 scant Schnabel-like tip, the checkering also with mullered borders. The gun is tight on face with the top lever still just right of center and seems to function well mechanically. As-mentioned the shotgun features ejectors, automatic safety, single nonselective trigger and weighs in at just a smidge over 5 pounds. An exceptional little specially ordered handmade Lang of the finest quality that would be a joy afield over a good dog. (3D10295-11) {C&R} (10,000/15,000) Est. 10,000 - 15,000 306 John Rigby Sidelock Double Ejectorgun serial #17407, 12 ga., 30" barrels with bright excellent bores choked .009" and .020". This shotgun is London nitro proofed for 1 1/8 oz. loads and retains its original 2 1/2" chambers. The barrels are engraved on the rib "Jno Rigby & Co. 72 St. James Street London" and show minimum wall thicknesses of about .027 left and .028 right, barrel flats are also marked "Class B". The shotgun locks up on double locking underlugs with a hidden third fastener in the doll's head rib extension. The action and locks show lovely full coverage relief scroll engraving with makers name engraved on each lock. The shotgun is in typical configuration with double triggers, automatic safety with an English grip and checkered butt. The condition of the shotgun is fabulous being a complete London quality restoration retaining 98% black on barrels and brilliant color on action and locks. The engraving is all very sharp and 3 crisp and all screwheads remain unmaligned and the gun shows limited use since restoration. The checkered straight grip buttstock and splinter forend rate excellent, the buttstock likely a replacement from the time of restoration. The stock is of the highest quality craftsmanship and fits like a London stock should. The oun has excellent dimensions with a 15 1/2' length of pull with drops of 1 3/8" and 2". The gun points and swings nicely weighing in at just a smidge over 7 lbs. The gun comes in a modern leather trunk style case with leather Rigby label and blank charge card. The gun remains tight and on-face. An essentially near new London double ejector gun by this esteemed maker that is ready to go afield. (1C10303-3) {C&R} (7000/9000) Est. 7,000 - 9,000

307	John Dickson & Son Sidelock Double Ejectorgun
	serial #6982, 12 ga., 27 1/4" barrels with bright excellent bores choked
	.007" and .004". The barrels are engraved on top rib "JOHN DICKSON & SON 63 PRINCESS STREET EDINBURGH", are London nitro
	proofed for 1 1/8 oz. loads, retain their original 2 1/2" chambers and
	show minimum wall thicknesses of about .025". The action and locks
	show classic full coverage rose and scroll engraving with maker name
	engraved on each lock. The belly of the action is also marked within the
	rose and scroll "DICKSON / EDINBURGH". The barrels retain 97%
	lovely London black finish overall with all markings remaining clear and
	legible. The barrels show fine scroll around breeches with wedges within
	the first few inches of the rib. The action and locks show a pleasing mix
	of faded color case-hardened finish and a smooth gray patina. The triggerguard retains perhaps 40% faded blue overall blending with a
	smooth brown patina. The shotgun features an automatic safety and
	double triggers with articulated front. The gun features a checkered
	straight grip buttstock with splinter forend which are of beautifully figured
	English walnut and are likely top quality custom replacements. The style,
	quality, fit and finish is all exactly what we would expect to see on a best
	Scottish or London double and they remain excellent overall with crisp
	checkering and virtually all of their original finish. The gun points nicely
	with a 14 1/2" length of pull over a checkered butt with drops of 1 1/2"
	and 2 3/8". The gun handles and swings beautifully weighing in at 6 1/4
	lbs. The gun is on-face, locks up tight with top lever right of center and the ejectors are in-time. The gun comes in a modern leather trunk style
	case with added leather Dickson label on interior of lid. A fine double
	that is ready to go afield. (1D10303-4) {C&R} (7000/9000)
	Est. 7,000 - 9,000
308	AYA No. 2 Sidelock Double Ejectorgun
	serial #329, 16 ga., 28" barrels choked a tight improved cylinder and
	tight modified with bright excellent, unfired bores. The barrels retain all of their original factory blue and have light sprays of engraving on rib at
	rear with the rib maker marked ahead. The coin finished frame as well is
	brilliant and has overall tight scroll engraving with gold line cocking
	indicators left and right. The top lever and rolled edge long tang
	triggerguard retain all their factory blue as well. This arm was purchased
	from New England Custom Gun Service in Plainfield and was never
	used by the owner. The breech face has a good deal of original
	hardened oil on it as do the breeches of the barrel and barrel flats. The
	straight grip French walnut buttstock and splinter forend both the rate excellent to as-new, the butt with one or two tiny rack marks. Both
	feature wraparound checkering patterns with drop points at the ends of
	the stock flats and a length of pull to the checkered butt of 15" showing
	drops of 1 1/2" and 2 1/2"; the German silver oval monogram plate on
	the toeline remains un-engraved. Featuring automatic safety (S inlaid in
	gold), double triggers, the front articulated, and ejectors. Despite the
	hardened oil the gun seems to function perfectly mechanically with
	robust ejectors. A fabulous 16 bore ready for late-season birds, that
	clearly saw no use. (310284-3) {MODERN} (4000/6000) Est. 4,000 - 6,000
309	Winchester Model 21 Prewar Boxlock Double Ejectorgun
	serial #7530, 12 ga., 30" barrels choked improved cylinder and a light
	full, with bright excellent bores. The barrels on this 1937-made
	Winchester double retain about 95% original blue, appearing stronger
	under normal ambient light, showing some even fading, more prominent
	in the carry area above the forearm, with some very sparsely scattered,
	very light handling marks here or there but none are obtrusive. The frame retains 97 to perhaps near 98% original blue showing just light
	high edge, edge of fences, and rounded carry point wear on the belly,
	with a few light scuffs on the bow of the guard. The checkered pistolgrip
	American walnut buttstock rates very good with much original varnish
	and the expected very light dings and handling marks that come from a
	field-used arm, the butt professionally extended years ago with a 1"
	walnut extension which matches fairly well, giving a length of pull from
	the single selective trigger to the leather covered recoil pad of 15". The
	drops are 1 5/8" and 2 3/4" and the pad remains very functional although
	it is scuffed at both heel and toe from its years of faithful service afield. The splinter forend rates very good as well showing some wear at its
	rear edge, the checkering a bit worn. The automatic safety works
	properly and the arm has robust ejectors, the main stems remain solid
	but the top guide pin of each broken off and are retained in the barrels,
	but this does not affect the function of the gun, the barrels still close and
	ejectors operate properly as-designed. The gun is tight on face with the
	top lever just right of center. A rugged 1937-produced Model 21
	"Winchester's finest" that looks as though it has much more life and
	many more birds left in it. (310206-50) {C&R} (4000/6000) Est. 4,000 - 6,000

The smooth walnut stocks remain in very good plus condition showing an added coat of semi-gloss varnish that shows some thin crackling. There are some scattered light dings and handling marks, the stock fit remains quite nice overall and the comb area actually shows some rather attractive grain figure. The inside lower tang shows "P802 886", the "802" appears to have been an honest factory error and has been canceled with sideways struck "8" stamps. The upper tang stock inlet shows matching "P886". The rifle is sighted with 1876-marked leaf sight that shows a small moderate ding along the left edge, small German silver blade front sight, and the action seems to function well mechanically. A very respectable rifle made in early 1880 retaining some
	configuration and the barrels being unmarked. The barrels retain about 50% original bright blue flaking overall to gray-brown patina and showing some areas of old fine pitting. The brass frame retains about 70-75% original silver finish taking on a lovely dark tarnish overall and the brass toned to a rich ocher patina showing some scattered light handling marks. The back surface of the hammer retains generous case-hardened colors and the smooth rosewood grips remain in near excellent condition retaining strong original varnish with some scattered light handling marks mostly along the bases. Grip fit is excellent, barrel-to-frame fit is solid and the action seems to function well mechanically. A fine example retaining strong condition. (13B10160-3) {ANTIQUE} (1000/1500)		ocher patina and all markings remain intact and strong. The frame is cut for a set trigger though the rifle is equipped with a standard trigger. The smooth walnut stocks remain in very good plus condition showing an added coat of semi-gloss varnish that shows some thin crackling. There are some scattered light dings and handling marks, the stock fit remains quite nice overall and the comb area actually shows some rather attractive grain figure. The inside lower tang shows "P802 886", the "802" appears to have been an honest factory error and has been canceled with sideways struck "8" stamps. The upper tang stock inlet shows matching "P886". The rifle is sighted with 1876-marked leaf sight that shows a small moderate ding along the left edge, small German silver blade front sight, and the action seems to function well

323	Rare Factory Engraved Winchester Model 1873 Deluxe Short Rifle serial #540714, 44 WCF, 20" octagon barrel with full magazine and an oxidized bore showing faded rifling. This is an honest short rifle made in 1899, and in a configuration popular along the southern border around this time, featuring factory set trigger, tasteful \$2.00 engraving and also deluxe wood. The rifle has seen a fair amount of use with the metal surfaces toning to a mix of mild gray-brown and gunmetal patina overall. There are scattered areas of old light pitting and oxidation staining and the screw heads show light slot wear. The barrel retains some good streaks of original blue in the protected areas and the action shows some remnants of bright blue along the left side. All markings remain intact and strong and the engraving along the action is completely intact and remains quite attractive showing simple line borders with tasteful foliate flourishes scattered about. The left sideplate shows an endearing little scene with a single nicely detailed buck. The deluxe walnut stocks remain in good condition with ghostly remnants of the original checkering still visible, scattered old dings and handling marks. There is an expertly repaired small chip at the toe and the left side wrist below the upper tang shows a moderate 2" smoothed over depression. The inside lower tang is stamped "9495 XX" and there is no longer any legible number on the inlet of the butstock though the inside toe of the buttplate is appropriately stamped "9495". The original carbine rear sight and small German silver blade front sight are intact, the set function of	326	Attractive Winchester Special Order Model 1892 Saddle Ring Carbine serial #927492, 44 WCF, 20" round barrel with button magazine and a bright near excellent bore showing a few tiny pinprick pits nearer the muzzle and otherwise crisp rifling throughout. The barrel of this handy carbine retains about 92% original blue showing a small area of very fine pinprick pitting about 5" back from the muzzle, some scattered light handling marks and the expected toning to a pleasant plum-brown patina under bright light. The action retains about 45% original bright blue flaked to a smooth mild gray-brown patina along the sides and bottom metal, the rear more protected areas of the sides and the bolt and hammer retain about 99% original blue. The magazine cap and barrel band retain generous original bright blue showing some mild flaking and the buttplate is a smooth walnut stocks remain in near excellent condition showing a little bit of older added finish and some scattered light dings, otherwise retaining excellent fit overall. The carbine is equipped with factory sling swivel eyes, the saddle ring is intact along with the standard carbine rear sight and blade front. The action seems to function well mechanically. This is a very attractive carbine made around 1924, in the most desirable of chamberings and in a nice lightweight configuration. (13C10144-15) {C&R}
	and small German silver blade front sight are intact, the set function of the trigger will require a little attention and the action otherwise seems to function well mechanically. A solid and desirable example with a lot of character. (13C10060-3) {C&R} (4000/5000) Est. 4,000 - 5,000	327	Est. 4,000 - 6,000 Early Savage Model 1895 Lever Action Rifle serial #4251, 303 Savage, 26" octagon barrel with a bright excellent bore. The "JM" and "M" marked barrel of this 1896-produced rifle retains about 90% lightly thinning blue which is toning to a blue-dark gray patina
324	Extremely Rare Prototype Marlin Model 336 Lever Action Rifle in 250-3000 Savage serial #27037108, 250-3000 Savage, 24" round barrel with a bright excellent bore. This is a very interesting prototype rifle, one of ten made in 1973, when Marlin was toying with the idea of chambering the 336 in this famous high velocity smallbore cartridge. The metal surfaces retain about 99% original blue showing just a few scattered light handling marks from the years and the bolt body remains mostly bright showing a little mild gray speckling. The barrel shows an off-struck edge of a "JM" proof along with "250 SAV." designation and two line Marlin Firearms Co. address. The complete model designation was never stamped and the barrel says only "MODEL". Some of the screw heads show light slot wear but this is unobtrusive. The smooth walnut capped pistolgrip buttstock and forend remain in excellent condition showing a few scattered light handling marks and missing Marlin bulls eye from the toe line. The rifle is equipped with sling swivels, sporting rear sight and hooded plain bead front. The action seems to function well mechanically. In order to safety utilize pointed bullet cartridges, Marlin equipped this rifle with a spiral-bodied magazine tube, similar to that seen on the earlier Remington Model 14, in order to set them slightly off-center. Included with this rifle are a couple of factory letters, one from Brophy, confirming its provenance along with letters from Robert Behn, Jim Carmichel and a photocopy of an American Rifleman article in which these rifles are mentioned. An extremely interesting prototype rifle that would make for an excellent addition to the most advanced Marlin	328	under bright light with some scattered small spots of old hardened lubricant along with a few tiny spots of old light oxidation and some light handling marks to be expected of an antique sporting rifle. The receiver retains about 80-85% original blue which is very strong around the lever and in the protected areas and lightly thinning to blue gray with the carry point toning to a gray patina, along with some high edge silvering and some overall light handling marks. The bolt is mostly bright and the lever retains about 97-98% original case-hardened colors with a tiny spot of pinprick pitting on the inside of the lever and some light muting to gray towards the rear. The rifle is equipped with the early hole-in-bolt cocking indicator and features the familiar cartridge counter and the Savage Repeating Arms Co. barrel address is crisp. The smooth walnut schnabel-tipped forend rates about very good plus with a few short hairline cracks around the tip and some scattered light handling marks and is numbered to another rifle. The straight grip rifle stock and crescent buttplate are later replacements and have been restamped to match the receiver; the stock rates perhaps fine as reprofiled around the buttplate which is proud of the wood while there are gaps in the fit around the receiver allowing for some play. The original sights are intact, a Marbles aperture sight with insert has been installed on the upper tang and the action of this early Savage Model 1895 appears to function well mechanically. A very respectable example of these antique Savage rifles. (2301187-51) {ANTIQUE} (2000/3000) Est. 2,000 - 3,000
325	collection. (13D10187-6) {MODERN} (4000/6000) Est. 4,000 - 6,000 Connecticut Shotgun Manufacturing Christian Hunter Round Body Double Ejectorgun serial #SD000157, 20 ga., 28" barrels with CSM choke tubes and bright excellent bores. This is a lovely and handy smaller frame 20 bore shotgun with a handsome round body scalloped frame. The frame and long tang triggerguard have an excellent to as-new coin finish and have overall open foliate engraving detail wonderfully. The left and right show gunning dogs on point while the belly vignette features a hunter shouldering his side-by-side taking aim at his quarry. The gold plated cocking levers and the triggers retain all of their factory finish. The shotgun is stocked in a very lovely grade of exhibition quality feathercrotch American black walnut with flawlessly executed borderless panels left and right, the forearm with a wrap-around diamond-centered pattern. The semi gloss truoil finish is as-new and there is an un-engraved gold monogram plate along the toeline, these two options alone \$750 in upgrades. The length of pull to the leather covered 1/2" recoil pad (a \$500 premium) is 14 7/8" with drops of 1 1/2" and a 2 3/8". The gun locks up tight on-face and the top lever is still right of center, the gun showing more evidence of being taken apart and put together than firing, appearing new unfired throughout. Features double triggers,		serial #10919, 303 Savage, 26" part round part octagon barrel with a very good plus bore showing light frosting with strong rifling throughout. The barrel of this 1900-manufactured rifle retains about 85% original blue which is strong on the flats and thinning to a blue-gray patina under bright light forward of the forend with some scattered spots of pinprick pitting and old light oxidation and some light handling marks from the years. The receiver has aged to an attractive plum patina that thins to gray on the carry point with some very light high edge silvering and the bolt with cocking indicator is bright. The lever displays a lightly-mottled gray patina with speckles of pinprick pitting and some generous remnants of original case-hardened colors in the protected areas. The Savage Arms Co. barrel address, patent dates and caliber are crisp. The smooth walnut straight grip stock and schnabel forend rate fine with a small chip at the toe of the crescent buttplate, a shallow and unobtrusive dent in the right side of the point of comb, some slight finish wear to the high edges of the cheeks and a few scattered light handling marks. The rifle is equipped with a Lyman brass bead front sight, Savage No. 21 micrometer rear sight and an aperture with flip-up insert is fitted to the tang. A lovely example of these desirable early Savage Model 1899 rifles. (23B10187-50) {C&R} (1200/1800) Est. 1,200 - 1,800
	automatic safety and ejectors and functions well mechanically. The included choke tubes are skeet and improved cylinder. A very handsome and fast handling little American 20 that weighs in at a smidge over 6 1/4 pounds. (3C10295-16) {MODERN} (10,000/15,000) Est. 10,000 - 15,000		

329	Winchester Special Order Model 1894 Lever Action Rifle serial #425606, 32 Special, 26" part round part octagon barrel with button magazine and a very good plus bore showing some frosting and fine pinprick pitting in the grooves with otherwise strong rifling throughout. The barrel of this nicely-configured 1908-made rifle retains about 75% original blue showing some scattered light handling marks and overall thinning to mild gray patina under bright light. The action	:	332	Beautiful Restored Colt U.S. Model 1911 Pistol serial #327570, 45 ACP, 5" barrel with a bright excellent bore. The metal surfaces of this nice "Army black" restoration retain 99% plus museum quality restored blue. All of the markings remain crisp and were no doubt partly refreshed and restored during the refinishing process, the left of frame with eaglehead S8 inspectors marking. The hasty polish lines, and heavier grit polishing are masterfully re-created and look perfect. The
	retains about 60% original bright blue flaking and toning to pewter gunmetal patina while the bolt retains about 90% blue and the loading gate 95%. The back surface of the hammer and protected areas of the lever retain some good smoky case-hardened colors, the exterior of the			diamond-checkered walnut grips rate excellent and are likely correct modern replacements. Included is a single pinned-based two-tone lanyard loop magazine which rates excellent to very nearly as-new. The barrel shows a slightly off-struck intertwined "HP" marking atop the
	lever and the crescent buttplate otherwise taking on a pleasant silvery patina. All markings remain intact and strong and the smooth walnut stocks remain in very fine condition showing honest wear, the buttstock with generous original varnish throughout along with some scattered light dings and handling marks. Stock fit remains excellent throughout			chamber area with "G" and "H" around the disconnector hole; Hosmer's "H" is also at rear of slide above firing pin stop. A very handsome as-restored pistol originally made in June 1918 and shipping to Bush Terminal in Brooklyn. (3B10087-2) {C&R} (2500/3500) Est. 2,500 - 3,500
	and the rifle is sighted with Winchester's 32 Special rear sight and small German silver blade font. The action seems to function well mechanically. A nice honest rifle in a classic quick-handling special order configuration. (13A10216-44) {C&R} (1200/1800) Est. 1,200 - 1,800		333	U.S. Model 1911 Semi-Auto Pistol by Colt serial #122846, 45 ACP, 5" barrel with an excellent bore. This lovely mid-war pistol has about 99% factory quality reapplied blue finish on its surfaces. There are a few minor handling and assembly marks that are hardly worth mentioning if not for its splendid condition. The double
330	U.S. Model 1911A1 Semi-Auto Pistol By Singer Manufacturing Co. un-serialized, 45 ACP, 5" barrel with a bright very good bore. This is a very interesting, un-serialized Singer Manufacturing Co. 1911A1 pistol. This company has sold in the past, un-serialized Singer pistols and a detailed inspection of the frame and all of the markings on the arm leads us to no other conclusion than that this is a true Singer Manufacturing Co. un-serialized 1911A1 pistol. The right side frame markings are identical to and unique to Singer Manufacturing guns, the other manufac-turers markings being from slightly, to vastly different, in many			diamond walnut factory grips rate excellent with faint diamond point wear. The thumb safety is a later checkered replacement from the era (no milling cut present under the tab), although all the other parts appear correct for the period of manufacture. The gun functions mechanically, Major Gilbert H. Stewart's inspection mark remains crisp as do the other factory markings. The pistol includes a single factory refinished two-tone Colt magazine with lanyard loop on the pinned floorplate in very good to excellent condition showing light wear. A nicely restored Model 1911. (8A10212-43) [C&R} (1500/2000)
	respects; the slide marking is original and perfect. Detailed micrometer dimensions of both slide and frame verify that they remain in the original thickness and no material has been removed from any of the slide or frame flats. The arm shows 98-99% post-war reparkerized finish, showing perhaps a few very light handling marks here and there, most of which do not even breech the blue. As an arm which was possibly an employee presentation, like the last un-serialized example this firm sold, or perhaps an "out the back door" gun, there are no inspector markings of any kind. The pistol has a nice pair of later Keyes Fibre Co. grips with the reinforcing ribs on the interiors, they rate excellent. Included with the gun is a single unmarked blue pinned base magazine rat-ing very fine showing only light wear. There are remnants of scattered light pinprick pit-ting about the surface of the gun, no doubt what necessitated the refinish. The slide stop is checkered, the safety is grooved, hammer is wide short spur, Colt-style and there is a checkered arched lanyard loop mainspring housing which is identical to the Singer Manufacturing example photoed in Colt 45 Service Pistols © 1991 Clawson. A respectable and overall mostly correct example-piece, which does not carry the huge price tag an unrefinished all matching example does. This is a very fine addition for the Colt collector of more modest means, certainly worthy of a professional Mu-seum-grade re-polish and restoration yet still very respectable as-is. (310192-1) {C&R} [John Lipski Collection] (10,000/20,000)		334	Est. 1,500 - 2,000 Colt Government Model Semi-Auto Pistol serial #C137490, 45 ACP, 5" High Standard marked replacement barrel with an excellent bore. This fine pistol retains about 95% original pre-war blue finish, the frontstrap has worn to pewter with overall light high edge wear, handling marks and assembly marks on the frame around the slide stop. The grips are vintage WWII fully checkered synthetic Keyes Fibre with reinforcing rings around the screw holes that remain in excellent condition. This pistol has several later added parts including a checkered arched mainspring housing and 1911A1 style grip safety, although the remaining parts are correct for the period of manufacture (1924). The slide is correctly numbered to the gun under the firing pin stop and it functions mechanically. The pistol includes a near excellent condition two-tone magazine. This between-wars commercial Colt has a few later added upgrades but remains a viable collectible with great condition. (8A10208-47) {MODERN} (2000/3000) Est. 2,000 - 3,000
331	Handsome Restored Springfield Armory U.S. Model 1911 Pistol serial #118538, 45 ACP, 5" Springfield Armory barrel with a bright excellent bore, both "S" and "P" marked on the left barrel lug. The metal surfaces retain 99% plus excellent quality, truly museum grade, restored rust blue-like low luster finish. All of the edges and principal markings remain sharp, no doubt some of the markings were restored or refreshed during the refinishing process, left of frame with good flaming ordnance bomb stamp and the Eagle on right of slide remaining very crisp. The double diamond checkered walnut grips rate excellent to as-new and are correct quality replacements from the time of the restoration, having nine lines between the diamonds. All of the following parts are "S" stamped denoting Springfield manufacture: barrel, hammer, slide stop, hammer, safety, grip safety, mainspring housing, trigger, magazine catch, extractor, firing pin stop, sear, and disconnector. Included is a single two-tone magazine with "S" stamped on its floorplate extension, rating excellent with tiny bit of oxidation staining along its top left edge. Really a very well-executed Springfield Armory-produced 1911, made in April 1915. (3B10087-1) {C&R} (3500/S000) Est. 3,500 - 5,000

335 Lovely Engraved Smith & Wesson Second Model American Revolver 337 Custom Muerrle Engraved Winchester Model 12 Slide Action Shotgun serial #15936, 44 S&W American, 8" ribbed round barrel with a mostly serial #1848598, 16 ga., 28" Simmons ventilated rib barrel choked bright very good bore showing some scattered fine pitting and oxidation modified with a bright excellent bore. The metal surfaces retain about with otherwise strong rifling throughout. This revolver shows lovely fine 99% post-engraving blue with some extremely light pitting at the right of quality embellishments by one of Smith & Wesson's contract engravers muzzle in the pattern of a fabric gun case, it is about 1/2" long and of the period featuring tasteful detailed foliate scrollwork throughout the unobtrusive. The carrier retains excellent engine turning with only light sides of the frame, barrel and cylinder flats. There are a few areas of wear while the bolt shows moderate operational wear with strong engine scrollwork that overlap with one another and the background shading is turning along its top surface. The barrel has wedges of open scroll quite attractive and distinctive consisting of a very fine matting technique engraving near the breech and on the barrel takedown boss while the rather than the more often seen punch-dots. The single line barrel receiver is engraved left and right with waterfowl and hunting dog address and patent dates show a nice little border and there is a thin vignettes, flanked by open flowing scroll, loosely in the factory No. 5 engraved band at the muzzle intersecting a foliate flourish on each side. pattern, post-factory by Ms Pauline Muerrle. The bow of the triggerguard The metal surfaces retain about 95% original nickel finish showing some is very neatly engraved with the initials "MAW", being a well-known very fine flaking to mild gray-brown along the sides of the muzzle and Hartford trap and skeet shooter Martin A. Wutsch, who was also a barrel, a bit more flaking along the edges and flutes of the cylinder and successful Connecticut gunsmith for many years. The checkered some other scattered light handling marks. The barrel shows some capped pistolgrip buttstock shows lovely feathercrotch figure, as-does honest holster wear at the muzzle, exhibiting some fine pinprick pitting the extended semi-beavertail style forend, both checkered and carved in and a no-ticeable worn down area at the 12 o'clock position. The the factory B pattern. The length of pull to the grooved Winchester recoil hammer is taking on a medium plum-brown patina and the screw heads pad is 14". The pad appears to be a later addition and both stocks have show some light unobtrusive slot wear. All embellishments and the been refinished, the comb of the butt has been taken down slightly prior barrel markings remain completely intact and strong and the trigger to the refinish, the finish showing a few runs and some dust in it but retains a hint of good straw color along its protected edges. The smooth could easily be toned down by someone who knew their business, the walnut grips remain in excellent condition retaining strong oil finish and checkering and carving remains crisp. The barrel mounts solidly to the showing some light handling marks and a number of dings scattered frame and the oun functions well mechanically. A very attractive Model along the bases. Grip fit is excellent and the right panel is appropriately 12 ventilated rib shotgun, in a deluxe configuration with some nice stamp-numbered matching the frame by serial number. The latch shows quality engraving by this famed factory engraver that would be sure to assembly number "209" and strangely the barrel is un-numbered though turn heads afield or on the skeet field. (3B10238-3) {C&R} (2000/4000) the cylinder is matching the frame with number "22". Barrel-to-frame fit is Est. 2.000 - 4.000 338 Handsome Winchester Model 42 Skeet Slide Action Shotgun solid and the action seems to function well mechanically with very good timing and lock-up. The included factory letter confirms barrel length, serial #59305, .410 bore, 26" solid rib barrel, choked and marked skeet, finish and grips but makes no mention of engraving. It was in a 40 gun with a bright excellent bore. The metal surfaces retain 98% original blue. shipment to M.W. Robinson, likely in January of 1873. This is a lovely showing the later hasty post-war polish on some of the screw heads and and very fine engraved American for the advanced Smith & Wesson lesser surfaces, with edges of the sideplate remaining crisp and nice collector. (13E10000-25) {ANTIQUE} [Roy Jinks Family Collection] raised metal around the proofs and serial numbers on the barrel collar; (7000/9000) the bolt and carrier remain bright. The checkered AAA grade American Est. 7,000 - 9,000 walnut buttstock rates excellent showing an older top-quality refinish Winchester Model 12 Heavy Duck Slide Action Shotgun 336 with crisp checkering and the hard rubber pistolgrip cap and buttplate serial #1333147, 12 ga. (3"), 32" solid rib barrel choked full with a bright remaining excellent. The extended semi-beavertail style forend rates excellent bore. The metal surfaces on this big long range Model 12 excellent as-refinished, also with crisp checkering. The gun functions retain 92% to perhaps 95% original blue, the loss is due to even fading well mechanically and would be a great accompaniment afield that will and high edge and contact point wear. The left side of the barrel in the still increase in value as the years pass. (310238-1) {C&R} (4500/6000) area of the magazine tube hanger shows some light speckle-ish blue Est. 4,500 - 6,000 339 Unique Prototype Smith & Wesson Model 547 Frame Revolver for Roy loss, from some contaminant which has also left a few pinprick freckles of pitting, one would suggest perhaps waterfowl blood knowing where Jinks to Evaluate the 22 Hornet Performance this gun no doubt spent lots of time. The carrier and bolt body have serial #ABL3949, 22 Hornet, 8 1/4" full shroud barrel with a bright toned a bit to pewter with some light operational wear on the bolt, both excellent bore marked on its right side "22 Long Rifle Ctg". This is a very with very light speckling, and the very leading edge of the receiver interesting prototype revolver with steel frame, steel barrel, two shows a tiny bit of pinprick pitting as well. The smooth pistolgrip aluminum barrels and two cylinders, the crane tool room-fitted and still American walnut buttstock and grooved flat bottom forend rate excellent unpolished, unfinished, in-the-white. The balance of the metal surfaces with added finish, the wood is still proud of the metal at the receiver retain 99% plus original factory blue and anodized finishes on the however and it was not likely sanded. The length of pull to the solid aluminum barrels. The color case-hardening on both hammer and Winchester recoil pad is 13 3/4", the pad being a bit proud in some spots trigger is fully present although muted somewhat. The arm currently but that could easily be rectified if one wished. These Heavy Ducks are wears a Pachmayr gripper grip in very fine condition and mounted to the getting harder and harder to come by and this example remains in very barrel is a Simmons 2.5-7x28 pistol scope with duplex crosshair reticle good to fine condition and could still be used afield if one wished without and bright excellent optics. As-mentioned the arm comes with two fear of harming its value, but it will doubtless continue to improve cylinders, one chambered for the 22 Hornet, the other a K-Hornet. The monetarily as the years pass. (310238-4) {C&R} (1200/1800) two aluminum barrels are also 8 1/4" in length and both are marked Est. 1.200 - 1.800 "S&W 22 Magnum", one has a steel liner installed rating bright excellent, the other has been reamed for the liner but none is installed. Interestingly, the frame features two firing pins, a rimfire pin is mounted above the centerfire pin, it is slightly shorter than the centerfire pin, both seem to work as-designed, perhaps Smith was contemplating a 22 Hornet/22 LR convertible. Purportedly the results were less than satisfactory and the project was halted. Overall a very interesting and rare factory experimental revolver that would be interesting to take to the range and gauge its performance yourself. (3A10082-38) {MODERN} (2500/4000)

Lot Title/Description

340 Smith & Wesson Model 5904 Semi-Automatic Pistol of Smith & Wesson Team Shooter Judy Woolley serial #TCW6548, 9mm, 4" barrel with a bright excellent bore. This pistol was used by Judy Woolley early in her career, and was won by her at the 1990 Steel Challenge, or the World Speed Shooting Championship as it is also known. She captured the spot for top woman in all seven events at that shoot. It was modified for her by her husband prior to receiving her Smith & Wesson Performance Center guns. A Patridge front sight was installed, the hammer drop safety was converted to a hammer block only and of the right side "ambidextrous" lever removed and the magazine disconnect feature was removed. While shooting the gun Wooley found that that frame impacted the knuckle of her right finger adversely, so that area was neatly relieved to provide clearance; an extended magazine release was also fitted to facilitate faster magazine changes. The gun retains perhaps 97% original blue, showing holster wear at front of slide and frame and a few light handling marks. The checkered one piece black synthetic grip rates excellent. The gun comes in its original box serial numbered to the gun with a single magazine, papers and factory cleaning kit intact. The pistol was used by Woolley at various sales promotions, shooting demonstrations and local USPSA and IPSC matches. Included with the arm is Woolley's Team Smith & Wesson card, signed by her, a pair of her team Smith & Wesson competition pants, a team Smith & Wesson golf shirt with her name embroidered and a team Smith & Wesson colf shirt with no name. along with a small cloissonned Smith & Wesson tie tack. An important pistol that this gifted female shooter used, which still could be taken to the range and put through its paces by its next owner. (3B10277-1) {MODERN} (1500/2000) Est 1 500 - 2 000 341 Smith & Wesson Performance Center Special Model 4006 Semi-Automatic Pistol Of Smith & Wesson Team Shooter Judy Woolley serial #XPX0013, 9 mm, extended 5" barrel with a bright excellent bore This highly modified pistol was the first received by Woolley from the Smith & Wesson Performance Center and was used in the 1991 Steel Challenge. Woolley mentions that she was extremely excited to shoot it and won that event for the second time. The arm features a lightened slide which had its open sights removed and lightening cuts made, the ambidextrous hammer drop safety was removed and a frame-mounted manual safety installed by the Performance Center, there is a light weight slide stop and extended magazine release fitted. Additionally the front and back straps have been very neatly hand-checkered by them and the front of the triggerguard modified into a square profile, neatly checkered as well. There is a generous beavertail at the rear of the frame to protect Wooley's hand during the rigors of competition and a very widely flared magazine well in place to facilitate the rapid magazine changes needed in competition. The pistol has fully checkered walnut grips of a thin profile, they rate excellent. Now single action-only, the arm features a short spur hammer and crisp clean trigger pull which feels about 2 pounds. The left side of the frame has been fitted by the Performance Center shop with an aluminum optics mount hard-fixed to left of frame and then also screwed to the Tasco Propoint which is mounted atop the gun. The Propoint shows some marks from having been mounted previously but seems to function properly. Included with the gun are three magazines with CP Bullets bumpers and a copy of Woolley's Team Smith & Wesson card with her signature on the back. this very gun actually pictured on the card with a slightly different optics mount. Also included are a pair of her team Smith & Wesson competition pants, a team Smith & Wesson golf shirt with her name embroidered and a team Smith & Wesson golf shirt with no name, along with a Smith & Wesson tie tack and blue S&W pistol case. Woolev would go on to use this gun to win the Bianchi Cup the same year. winning the speed event for women and again at the Masters International, capturing the woman's title as well. The included factory letter mentions the Performance Center modifications and shows shipment to Woolley in March 1991. A very nice Performance Center gun that handles well and points quickly. 342 Smith & Wesson Performance Center Special Model 5904 Semi-Automatic Pistol of Smith & Wesson Team Shooter Judy Woolley serial #XPX0030, 9 mm, 4 1/2" Bar-Sto match barrel with recoil reducing compensator and a bright excellent bore. This pistol was used extensively by Woolley in the 1992 season and actually broke from the extensive use, the factory fitted beavertail extension of the frame chipped off and the frame inside the magazine well, just ahead of the disconnector chipped out as well, fortunately Woolley used the arm in the following lot as her backup gun. The gun has been extensively modified by the custom shop, the slide with special lightening cuts throughout, the most prominent of which exposes the barrel. The ambidextrous safety has been removed and the recess now has two extending hand-checkered nubs which aid in withdrawing the slide. The arm is now single action only and has a manual safety on the left side of frame. Woolley mentions due to the need to draw the gun from the holster, literally tens of thousands of times, that the forward area of the triggerguard was slightly relieved to perfectly fit the holster and aid in its speed of draw while still retaining the gun solidly. The front of the grip frame and rear of the hammer spring housing were hand-checkered by the factory and the magazine well is flared and beveled and an extended magazine release has been fitted. Additionally the left of frame has been drilled and tapped for the custom shop optics mount, currently mounting a Tasco Propoint which shows wear but is functional. The grips are fully checkered walnut and rate excellent, it would appear as though the lower right grip screw is not present. Included with the arm is a single magazine with CP Bullets bumper (it is 40 S&W marked but feeds 9 mm "dummy rounds" perfectly) and a pair of her team Smith & Wesson competition pants with a team Smith & Wesson golf shirt with her name embroidered. Also included is her Team Smith & Wesson card with her signature on the back and cloissonned tie tack along with a blue Smith & Wesson hardcase with the guns serial number on a top label along with the Woolley's name. The included factory letter shows shipment in March 1992 to Woolley and confirms the barrel with compensator, scope mounts, finish, special safety, grips and the specially tuned action. While no longer a functional arm due to the frame crack, to this writer this is perhaps the most exciting pistol in the offering as it was used extensively by Woolley, so much in fact that the gun actually experienced dual failures from the extensive punishment of competition. She used it in the Steel Challenge, the Bianchi Cup speed event and the Masters International Practical, winning all three events in the female category. (3B10277-3) {MODERN} (1500/2000) Est. 1,500 - 2,000 343 Smith & Wesson Performance Center Special Model 5904 Semi-Automatic Pistol of Smith & Wesson Team Shooter Judy Woolley serial #XPX0034, 9 mm, 4 1/2" Bar-Sto match barrel with recoil reducing compensator and a bright excellent bore. This pistol was used by Woolley after the previous lot in this sale failed due to the extensive punishment the guns received during competition. Woolley quips this gun: "saved my bacon after 0030 had to be taken out of circulation...." Like its predecessor, the arm was highly modified by the custom shop in an identical fashion. Of the two pistols, Judy comments: "These aluminum frame guns were highly modified to reduce the overall weight by machining the slide to a minimum, which made it guicker to draw from the holster, get on target and move to the next target. The dual-chamber compensator helped keep the muzzle down during the firing of the gun to assist with rapid sight acquisition. These were a dream to shoot!". This gun retains more finish than its predecessor with 98% plus original factory blue and anodized finishes, showing a few scuffs or scratches here and there. The arm features the same scope mount as its predecessor with a functional Tasco Propoint mounted. The fully checkered walnut grips rate as-new. The included factory letter shows shipment in February 1992 to Woolley and confirms the barrel with compensator, scope mounts, finish, special safety, grips and the specially tuned action. Included with the arm is a single magazine with CP Bullets bumper (it is 40 S&W marked but feeds 9 mm "dummy rounds" perfectly) and a pair of her team Smith & Wesson competition pants with a team Smith & Wesson golf shirt with her name embroidered along with her Team Smith & Wesson card with her signature on the back and cloissonned tie tack. A top-notch competition pistol from this gifted and amazing pioneering female shooter. (3B10277-4) {MODERN} (2000/3000) Est. 2,000 - 3,000

378 Custom-Engraved U.S. Colt First Model Dragoon Percussion Revolver 380 Smith & Wesson No. 1 Volcanic Lever Action Magazine Pistol serial #4012, 44 cal., 7 1/2" barrel with a poor bore. This interesting serial #87, .31 cal, 4" part round part octagon barrel with a good bore revolver has been lightly cleaned overall and has had modern showing some scattered light pitting and oxidation with otherwise strong 20th-century engraving applied at some point over perhaps 90% of the rifling throughout. The metal surfaces of this attractive pistol have mostly surfaces. The engraving is of decent quality and shows wide open toned to a nice pewter gunmetal patina, the barrel perhaps very lightly flowing scroll with background punch-dot shading, the cylinder with cleaned long ago showing some sparsely scattered light to pinprick diamond-shaped vignettes. The metal surfaces are all a pewter gray, pitting and some minor remnants of gray oxidation staining. The barrel retains a hint of brown finish in the very protected areas on the right side with perhaps a bit of a plum cast, with the barrel address, patent marking and "US" stamping still visible. The numbers are all matching and shows very slightly softened but completely intact and legible with the exception of the wedge (419) however the butt, frame and markings with "CAST-STEEL" on right flat, "SMITH & WESSON / triggerguard are different antique serifed fonts. The gun has been fitted NORWICH. CT." on the top and "PATENT / FEB. 14. 1854." on the left. with a modern pair of antique carved ivory grips which are very The frame edges remain strong and the factory engraving along the hand-filling and rather squarish, the right with a depiction of Col. Colt frame and sideplates remains really lovely and quite crisp featuring fine with some open flowing scroll, the left with a rattlesnake, they have age quality wide flowing scrollwork, all of the fine line detailing remaining crackling and are very possibly mammoth ivory. The gun does function completely intact. There is a nice foliate motif along the backstrap and properly with quite a bit of play in the cylinder itself, the loading lever lovely little flourish on the back surface of the hammer. There is a very with lateral play as well. An interesting modern-embellished example tiny thin crack in the frame behind the hammer that is missed at first piece for the Colt or Martial collector, while modern, the engraving is glance and very unobtrusive and the interior bolt body actually shows endearing and lends an attractive tone to the gun overall. (3C10091-34) some fading streaks of fire blue. The smooth rosewood grips remain in {ANTIQUE} [Chester Reginald Dunbar Collection] (6000/8000) very fine condition showing somewhat worn finish and otherwise just Est. 6,000 - 8,000 some scattered light handling marks. The grip screw is stuck, precluding 379 Cased Pair of British Percussion Target Pistols by Reynolds easy removal to check the numbers but they are no doubt matching, the .56 cal. 9 3/4" octagon smoothbore barrels with partially bright good left panel is a little loose and their fit is otherwise quite nice. Both grips bores showing scattered patches of light pitting and oxidation. This is a show a small stamped number in serifed font "2119" near the bases solid pair of pistols that have seen some honest use through the years. perhaps some sort of old inventory number. The lever hangs a bit at rest otherwise retaining strong condition. The barrels retain a healthy amount but this is unobtrusive, the original sights and the hook extractor are of original plum-brown finish with some scattered areas of old oxidation intact and the action seems to function well mechanically. A fine staining and pinprick pitting, a bit more noticeable along one of the guns, example of these iconic and important arms for the advanced Smith & both barrels with subtle swirling damascus patterns throughout. The top Wesson or Winchester collector, this one retaining some really lovely barrel flats show crisp fancy "Reynolds" marking and undersides show engraving. (13E10286-12) {ANTIQUE}. (8,000/12,000) Birmingham proof marks. The patent breeches show triple gold bands Est. 8.000 - 12.000 381 Early Smith & Wesson No. 1 1/2 Single Action Revolver with Rare and platinum blowout plugs and the lockplates and triggerguards have Factory Wooden Case toned to a medium gray-brown patina showing some scattered pinprick pitting and slightly softened but intact fine quality foliate scrollwork serial #6002, 32 S&W, 3 1/2" ribbed round barrel with a bright very fine embellishments. Both lockplates are maker marked and the hammer on bore showing a few small patches of light pitting and otherwise crisp one pistol shows some old repairs and its screw is a neatly fashioned rifling throughout. This is a handsome little revolver with scarce blue more modern replacement. The finely checkered walnut stocks remain finish, smooth walnut grips and early eccentric strain screw, also in very good plus condition retaining generous original finish with some accompanied by a very rare factory wooden case. The metal surfaces scattered areas of darkening from oxidation leaching along the edges retain about 65-70% original bright blue that appears much stronger along with the expected scattered light dings and handling marks. Stock under ambient light showing overall flaking to an attractive gray-brown fit and edges remain really nice overall, the flats with small dropper patina along with a little mild freckling and the sideplate and right bottom points, and the stocks are equipped with nice silver wedge escutcheons. edges of the frame showing some very fine pinprick pitting. The hammer nosecaps and un-engraved monogram plates atop the wrists. The shows vibrant case-hardened colors throughout, the trigger and latch tailpipe of one pistol shows a small chip and the ebony-tipped hickory retain all of their nice dark gray oil-quenched case-hardening and the ramrods with worm ends are intact. Pistols are sighted with fine u-notch front sight is nickel-plated. All markings remain intact and crisp. The rear sights and silver blade fronts, the locks are equipped with sliding smooth walnut grips remain in near excellent condition showing a little safeties and seem to function well mechanically. The pistols include their bit of older added finish, some light handling marks and the base of the original case that remains in very fine condition, the exterior with some left panel appears to show a very small minor repair. The right panel is scattered light dings, handling marks and very slight lid warping. The appropriately stamp-numbered to the gun and their fit is excellent. The interior is lined in dark green baize, probably restored long ago, and the remaining serialized parts are matching, barrel-to-frame fit is solid and case contains an assortment of nice period accessories including: nice the action seems to function well mechanically with nice timing and nipple wrench with coarsely checkered rosewood handle, rosewood lock-up. The case rates very fine to near excellent showing a few small cleaning rod, iron powder measure, small unmarked powder flask in very dings and light handling marks along the exterior lid. The interior shows fine condition showing a few small dents, single cavity round ball mould a space for the revolver and two partitions, one holding an antique oil showing some moderate pitting. German silver oiler and Elev cap tin. An bottle, and the base is lined in red baize that shows some scuffing and attractive cased set for the antique arms collector. (13B9670-451) discoloration. The inside lid retains an excellent black and gold {ANTIQUE} [David & Lore Squier Collection] (3500/5000) instructions sticker that shows just a few light handling marks. The case Est. 3.500 - 5.000 has a small brass catch and lock escutcheon on the exterior though there is no lock hardware installed. A very attractive ensemble for the advanced Smith & Wesson collector, (13B10000-14) {ANTIQUE} [Rov Jinks Family Collection] (1200/1800) Est. 1,200 - 1,800

Lot Title/Description

395 Lovely and Ornate Percussion German Jaeger Stocking Rifle by Wolfgang Leithner About .58 cal., 22 3/4" octagon barrel with a bright excellent bore with deep seven groove rifling. This is a beautifully appointed and engraved rifle with ornate game scenes and scroll throughout. The barrel retains perhaps 90% original maker blue, a deep gray-blue patina, flaking to plum here and there and fading to pewter on the sharp edges. There is a simple silver bead front side and flat-top u-notch rear with chiseled extension, the maker's name inlaid to its rear "W Leithner in Ischl". The long tang and patent bolster show beautiful deep relief engraving of chamois atop a mountain, a huntsman climbing up a rocky crag to reach him, his hat doffed to comrades below, with the same exquisite scroll and running chamois on lockplate and hammer. The iron surfaces are a very pleasing tarnished pewter patina and primarily smooth. The same chamois and beautiful foliate scroll scenes are on the front extension of the triggerplate and bow of the guard with running chamois on the bat-winged side plate. The arm is stocked in a very nice grade of English or French walnut, the stock rating very fine with the expected light dings and handling marks that come from the years. It shows nice checkered panels at forestock and grip area with a generous flared left-sided cheekpiece and a wonderful antler base forend tip near the muzzle, with dual ramrod thimbles of antler. There is a nice grip swirl to the rear of the guard which shows one small chip and a dual sling swivel studs along the toeline. The arm is equipped with a dual acting lock and double set triggers with a pivoting hammer interceptor on the lock itself. the tang with a very nice flip-up lollipop aperture sight adjustable for windage and elevation. The checkered wooden sliding patchbox door with antler thumbpiece appears to be an antique replacement made many years ago and there is a very endearing German silver inlaid chamois on the cheekpiece. The arm comes in a quality-made modern production case of a light walnut with green felt interior, an appropriate bullet mould, a couple modern ramrods and an older flattened horn powder flask with detached nozzle. Wolfgang Leithner was active in Bad Ischl in Austria from roughly 1850-1880 and Stockel lists him as court gunsmith both Imperial and Royal (K ü K Kaiserlicher und Koniglicher). This arm certainly exudes that quality and with its outstanding bore could no doubt be taken afield once more and used in these fields for whitetail-sized game after a competent inspection by an antique 'smith. (3D10053-19) {ANTIQUE} (4000/6000) Est. 4,000 - 6,000 396 Prussian Jaeger Style Flintlock Rifle With Wootz Steel Barrel .72 cal., 34 1/2 part round barrel with a straight-rifled bore which shows light oxidation its full-length. This is a very well-made rifle that seems to have had an interesting life. It clearly started off as a Prussian Jaeger rifle, no doubt stocked to the muzzle, and at some point in its history has had a nice quality Mediterranean-Turkish style damascus steel barrel fitted by a gunsmith of some talent. The barrel is a dark brown and light pewter with a wootz damascus pattern its full-length and with heavy silver and gold-toned chiseled damascening near the muzzle, flanking the half moon silver blade front sight, with a number of medials. Halfway down its length the barrel transitions from round to dodecagonal with Middle Eastern style geometric silver and gold-toned chiseled inlays, this continuing at the breech end of the barrel for about 7 1/2", with the same silver and gold-toned overlays and damascening, with four silver stars, two of which have orange coral inlaid within. The European lockplate shows beyeled edges and has relief chiseled game scene engraving with scroll on the swan neck cock, faceted pan and unbridled frizzen, the frizzen spring lightly chiseled with a foliate tail. The arm retains its heavy chiseled-in-relief Germanic hardware with chiseled rococo tailpipe. triggerguard front extension, with similar sideplate and buttplate tang. The bow of the guard, sideplate and heel of buttplate all showing deep chiseled game scenes with stags and hounds. The European walnut stock rates very good with some nice open foliate carving in the area of the forestock, to the right of the comb and to front and rear of the square bottom Jaeger style cheekpiece. The arm was likely shortened when the later barrel was fitted and the stock nose narrowed and the horn forend tip re-fitted. The stock rates very good showing older repairs to a number of cracks along the forend and barrel channel, a sliver or chip missing along the left of barrel channel and an older spliced repair to a moderate chip along the edge of the cheekpiece, with some filed-in splices in the highly figured wood of the butt, perhaps done when the arm was constructed. The lock functions well mechanically and the arm is equipped with a single trigger and there is an antique bone-tipped ramrod included, retained by simple thimbles soldered to the underside of the barrel. Really a very interesting amalgam of these two gun cultures, the original craftsman who built the Jaeger arm was gifted, the fellow who made and fitted the barrel a master of his trade as well (3F9670-310) {ANTIQUE} [David & Lore Squier Collection] (3000/5000) Est. 3,000 - 5,000

 .38 cal, 32 1/2" octagon barrel with a bright near excellent bore showir a little mild oxidation nearer the muzzle and otherwise strong rifting throughout. This is a very handsome rifte, strangely unmarked but quality made throughout. The barrel retains about 95% original plum-brown finish showing some mild high edge wear and light handlit marks along with a little fine pinprick pitting scattered along the right side. The patent breech, lockplate, upper tang and triggerguard all reta a healthy amount of lovely vibrant case-hardened colors that is muting and flaking to a pleasant silvery gray case-hardened patina. The lock screw head shows some solt wear and the bolster features a nice swith The checkered walnut stock remains in very fine condition showing some areas of worn finish and the expected scattered light dings and minor handling marks. The diamond point checkering remains mostly intact and strong and the stock shows lovely grain figure throughout. The stock features a nice scallop shell carved horn nosecap that show a thin crack along the left side, German silver patchbox with shell cove that shows thinning tarnished silver finish, silver barrel wedge escutcheons and silver monogram plate behind the upper tang that is neatly engraved with what appears to be "MS". The rifle is sighted with flip-up tang aperture disc, flattop v-notch sporting rear and German silver blade front sight. Equipped with adjustable single set trigger, the lock seems to function well mechanically and the original brass-tipped hickory ramrod with worm end is present. 406	Exceptional Colt Python Double Action Revolver with Custom Shop			of its post-engraving factory blue and the color case-hardening on the
	Sights			hammer and trigger is as-new. The arm features the highest quality
	serial #V84004, 357 Mag, 6" full lug ventilated rib barrel with an unfired			flowing foliate scroll on the frame, continuing on the bow of the guard
	bore. This exceptional revolver is new in the factory box, unfired since			and shroud area of barrel and at the underside of muzzle. The barrel is
	leaving the blue dome. The arm retains all of its wonderful rich Royal			outlined in fine gold wire inlay left and right with the right side with a
	Blue finish with the bright-polished sides of the hammer unstained and			facsimile in gold of Jordan's signature. The cylinder has triangular
	brilliant. The checkered walnut target style gold Rampant Colt medallion			wedges of scroll engraving between each of the flutes, bordered also by
	grips are as-new. The arm features a slightly undercut Patridge style			fine gold wire inlay. The sideplate features a facsimile of the United
				States Border Patrol badge inlaid and chiseled in relief in two-tone gold
	front sight and a black blade Elliason rear with 120" square notch. The	1		and silver while the left of frame below the cylinder cut shows a gold

415	Winchester Model 1873 Deluxe Lever Action Rifle	417	Fine Savage Model 1899 Lever Action Takedown Rifle Two Barrel Set
	serial #214208, 32 WCF, 22" octagon barrel with full magazine and a		with British Proofs
	good bore showing old light pitting its full-length and otherwise good		serial #110132, 30-30 Win & 25-35 Win, 20" barrel with a bright
	rifling throughout. This is a nice honest special order rifle in a lovely		excellent bore and a 20" barrel with a bright excellent bore. The receiver
	configuration featuring case-hardened action, deluxe wood, single set		retains about 95% original blue with light wear on the high edges and
	trigger and rare Winchester 62B tang sight. The barrel and magazine		contact points, overall speckled oxidation staining largely visible only
	have mostly toned to a pleasant deep plum-brown patina showing some		when viewed under direct light, and a spot showing evidence of light
	scattered light handling marks and generous streaks of original blue in		cleaning, perhaps with steel wool, inside the triggerguard. The 30-30
	the more protected areas. The action retains perhaps 60% strong		Win barrel retains about 95% original blue with light wear about 3" from
	case-hardened colors that are taking on a lovely smoky tone and remain		the muzzle, a few spots of pinprick to perhaps light pitting, and some
	particularly vibrant in the protected areas. The balance of the action is		minor handling marks, and the 25-35 Win barrel retains about 97-98%
	taking on a mix of nice plum-brown and attractive bright silvery		original blue with a touch of wear at the muzzle, a few scattered spots of
	case-hardened patina and the buttplate and nosecap are also a nice		oxidation staining with some pinprick pitting, and some minor handling
	silvery patina. The tang sight and rear iron sight retain some strong		marks. The lever has toned largely to gray with muted casehardened
	original bright blue toning to plum-brown and the loading gate shows		colors, a few spots remaining vibrant, and some oxidation staining. The
	nice fire blue. The cartridge lifter has taken on a nice ocher patina with a		smooth straight grip walnut stock and forend are in near excellent
	slightly softened caliber designation and all other markings remain intact		condition with a tiny shallow flake on the left side stock flat, an expertly
	and strong. The checkered deluxe walnut pistolgrip buttstock and forend		repaired crack on the right side of the forend, some minor handling
	remain in very good plus condition, the forend with a bit more wear		marks, and a touch of added finish; the hardrubber shotgun-style
	having darkened from the years and showing a thin 1" old chip along the right edge at the tip and checkering worp to flattop. The buttstock retains		buttplate is marked with the Savage logo and the forend is numbered to the rifle. Both barrels are crisply marked "SAVAGE HI-PRESSURE
	right edge at the tip and checkering worn to flattop. The buttstock retains		STEEL / -MODEL 1899-" and have two-line barrel address ending in
	perhaps 75% original varnish showing a fine craquelure with some		
	darkened areas and the expected overall handling marks from honest		patent date "JUNE. 1 1909", each barrel is marked with British "(crown) /
	use. The ebony pistolgrip insert appears to have been reattached long		BNP" proofs and details of the chambering on the left side below the
	ago and there is a tiny repair behind the lower tang but this is very		original chambering mark, "(crown) / BNP" is stamped on the bolt, and
	unobtrusive, and the buttstock shows lovely feathercrotch grain figure		both barrels are serialized and matching to the rifle. Both barrels are
	throughout and retains excellent fit. The rifle shows proper matching		equipped with bead-on-blade front sights and semi-buckhorn
	assembly numbers with "1074 XX 32" on the inside lower tang and "S 32		sporting-style rear sights and the rifle appears to function well
	1074" in the buttstock tang inlet. The rear iron sight is the standard		mechanically, the safety being slightly sluggish and likely just needing a
	sporting style and the front is small Lyman bead that shows some dings		thorough oiling. Included with the rifle is a Marble's three-piece cleaning
	along the edges. The set function for the trigger will require a little		rod with original fabric pouch, and a modern plum colored fabric-covered
	mechanical attention and the action otherwise seems to function		hardcase, lined with plum felt, with compartments that fit both barrels
	smartly. This is wonderfully configured rifle made around 1886 that saw		and the stock receiver; the case is in very good plus condition with the
	genuine use from its original owner, still retaining strong condition and a		lining separating light front the one edge. A minty two-barrel set Model
	fine honest appearance. (13E10060-4) {ANTIQUE} (6000/8000)		1899 that spent time across the pond. (14B10187-66) {C&R}

Lot Title/Description

Handsome Remington Model 32TC F-Grade Over Under Trap Shotgun Purportedly Belonging to Big Band Great Paul Whiteman serial #999, 12 ga., 26" ventilated rib Remington Arms Company barrels and 30" Krieghoff barrels, both numbered to the gun and appropriately engraved. The Remington Arms Company barrels, doubtless original to the gun, are choked skeet and skeet and have bright excellent bores. They retain perhaps 95% later, very good quality rust blue and their barrel code would place them in August 1932. The H. Krieghoff barrels are marked "Model 32 Trap" and are numbered to the gun with a spray of engraving above the bolsters which matches very closely, but not precisely, the original Remington engraving on the other set of barrels. It is choked full and improved modified and has bright excellent bores as well; both feature white Bradley fronts with ivory midrib beads. The frame retains perhaps 97% of what appears to be original blue in every respect, showing some light high edge and carry wear with overall open foliate flowing engraving, very much in the style of factory engraver Joe Loy or Owen Delange. The bottom has the Remington name, model and serial number neatly engraved in riband with the model "TC" stamped on the interior near the serial number with a small "F" stamped on the frame flat between the hinge points. The right exterior frame flat shows a gunning dog on point with a flying woodcock, inlaid and chiseled in gold, the left with a grouse and a gunning dog, a flying waterfowl on the bow of the guard, all inlaid in gold: the balance features the same full coverage open foliate scroll throughout. The Miller single trigger and its selector retain all of their original gold plate and there is a gold washed steel pistolgrip cap in place on the buttstock. The stock itself appears very much to be Mesquite, looking at its grain structure, color and of the pores in the grain proper, the stock maker unknown. The buttstock is Monte Carlo style with a left side flared shadowline cheekpiece, the checkering borderless and nicely executed. The forend is a very hand-filling wide semi-beavertail style showing the same grain structure and some light drying cracks, with a generous borderless pattern. The belly of the forend has been neatly inletted with a circled dogs head and shotgun of the Philadelphia Gun Club and is so marked around the belt riband with the year of founding 1877. The length of pull to the Pachmayr pad is 14 1/8" with drops of 1 5/8" across the Monte Carlo comb. The gun seems to lock up well, the top lever still right of center with both sets of barrels, and it seems to function well mechanically. The gun came to us in a leather covered red baize lined luggage case, the lid embossed "Paul Whiteman/Walking Horse Farm/Rosemont New Jersey". Whiteman having owned Walking Horse Farm from 1938 to 1959 before moving to New Hope, Pennsylvania. Clearly not specifically for this oun the interior leather label reads "Made In England Exclusively for Continental Arms Corporation New York". However there is included with the gun a typed note on Mrs. Paul Whiteman's stationary from New Hope Pennsylvania, dated February 1978, in a matching envelope, amusingly printed with the commercial face of the late Mr. Whiteman, the letter reading "This gun was the personal property of my late husband, Paul Whiteman" it is signed in ink Mrs. Paul Whiteman. There is nothing further on the paper denoting make, model or serial number of any firearm. Big band leader and "King of the Jazz Age" Paul Whiteman was legendary in his time and a gifted composer, conductor, and is known to have been a "sport" later in life and shot trap and skeet and actually became quite a NASCAR aficionado, racing cars at the age of 70. An excerpt from Paul Whiteman Pioneer in American Music 1930-1967 © 2013 Don Rayno, reads "Pops belong to two gun clubs. his good friends Dave Hassinger and Frank Sidebotham were in one, the Philadelphia Gun Club and they shot with him when the club participated in the annual duck shooting championship of the world in Ringoe's New Jersey" it goes on "Whiteman also loved trap shooting. He was so enthusiastic about it that he had his own range built where he and his friends could shoot clay pigeons". Additionally Ruger and His Guns © 1996 Wilson, shows a Woodward shotgun "...once owned by 1930s bandleader Paul Whiteman, a member of the Philadelphia Gun Club and a dedicated trap shooter", that gun has the exact Philadelphia Gun Club inlay, in the exact same spot on the forend. While there is no concrete evidence to prove or disprove this gun being Whiteman's, evidence would seem to point to the likelihood that it certainly was owned and used by him given the case present, the inlay in the forearm of the shotgun and the included stationary signed by Mrs. Whiteman. The F grade Model 32 is a fairly rare gun in its own right, having the connection to this big band leader and King of the Jazz age makes it all the more interesting. 430	Pennsylvania Percussion Double Rifle by Roth
	About 52 cal, now smoothbore, 31 1/4" octagon barrels with oxidized
	bores. The barrels are an overall pleasing plum brown patina with some scattered light oxidation and some areas of light pitting nearer the
	breeches. There are the expected light handling marks here and there
	that come from the years and there is a simple brass blade front sight
	with a flat-top rear (slightly loose on the rib). The breeches show dual
	inlaid silver bands with breech plugs and tang toned to a plum brown
	patina. The back action locks and hammers are a similar pleasing
	smooth plum tone and are unadorned, each lockplate maker marked
	"Chas Roth", additionally the left lockplate shows a number of small
	shallow screw holes and a protruding stud, which may have been where
	some manner of bridge style aperture sight was once fitted. German
	silver furniture includes nosecap, wedge escutcheons, large bow
	triggerguard and semi-fancy toeplate with simple crescent buttplate. The triggerguard front extension is lightly chiseled, there is a semi-ornate
	pendulum style patchbox and a running deer inlay, in German silver, on
	the left side flared shadowline cheekpiece. The stock itself rates very
	fine with much original varnish and the expected light dings and
	handling marks from the years with a bit of added finish which has
	slightly filled the nice checkering at the grip area. Each of the lockplates
	show a few small chips around them, the right lock seems to function
	properly and hold well, the left lock needing a bit of mechanical
	attention. Beneath the patchbox we find a worm for the ramrod, what is
	likely the original ramrod is present. Charles Roth was active in
	Wilkes-Barre Pennsylvania from around 1842 to 1887. (3B10088-10)
	{ANTIQUE} (1500/2000) Est. 1,500 - 2,000
431	Fine Smith & Wesson Third Model 22 Ladysmith Revolver
	serial #18276, 22 RF, 6" round barrel with a bright very fine bore
	showing a few small pits and spots of minor oxidation with otherwise
	strong rifling throughout. This is an attractive example of the desirable
	long-barreled Ladysmith with standard fixed sights. The metal surfaces
	retain about 95% original bright blue showing some edge wear, handling
	marks and a few small areas of light pinprick pitting on the topstrap near
	the breech and at the muzzle. There are a few tiny dings scattered along
	the bottom of the barrel that are mostly unobtrusive and the small parts retain bold case-hardened colors, muting somewhat to a pleasant
	smooth gray along the hammer. All markings remain intact and crisp.
	The smooth walnut grips with gold S&W medallions remain in near
	excellent condition showing some finish wear along the edges and a few
	minor handling marks. All of the appropriately numbered parts are
	matching and the action seems to function well mechanically with solid
	timing and lock-up. A very attractive and seldom-seen Ladysmith
	revolver. (13B10000-79) {C&R} [Roy Jinks Family Collection]
	(2000/3000)
432	Est. 2,000 - 3,000 Fine Smith & Wesson No. 1 First Issue Fifth Type Revolver
102	serial #4354, 22 RF, 3 3/16" ribbed octagon barrel with a fair bore
	showing pitting and oxidation throughout, along with some bright areas
	and otherwise strong rifling. The barrel retains about 60% nice original
	bright blue, appearing very strong under ambient light, with flaking to a
	pleasant mild gray patina overall and showing some scattered very fine
	scratches along the sides. The ejector spud retains about 95% original
	bright blue and the barrel address remains crisp. The cylinder has
	mostly toned to a medium gray-brown patina showing some very fine
	scattered pinprick pitting and strong dual patent dates. The frame retains about 96% original silver finish showing a little high edge wear to
	mild ocher brass and some small areas of very fine bubbling. The silver
	has taken on a wonderful tarnish overall. The trigger and hammer have
	toned to a smooth gray patina while the articulated spur and cylinder
	stop show attractive dark gray oil-quenched case-hardening. The
	smooth rosewood grips are stamp-numbered matching the frame and
	remain in excellent condition retaining 98% original varnish and
	excellent fit. All of the remaining numbered parts including the spur are
	matching by assembly number, barrel-to-frame fit is excellent and the
	action seems to function well mechanically with solid timing and lock-up.
	Included with this revolver is just the bottom portion of an original factory marbled paper box that appears to be un-numbered and rates about
	very good showing one broken corner, some light staining and warping.
	This is a lovely first issue revolver, this variant seldom seen with any
	condition. (13B10000-6) {ANTIQUE} [Roy Jinks Family Collection]

Lot Title/Description

467 Sharps Rifle Co. Model 1874 Sporting Rifle serial #C, 49441, 45 2 1/10 (45-70), 28" round barrel with a bright near excellent bore showing a little frosting nearer the muzzle and crisp rifling throughout. The barrel and action of this Bridgeport Sharps retain about 95% older reapplied rust blue showing some fading to mild gray patina along the barrel and some scattered pinprick pitting beneath the finish. The breechblock and lockplate are toning to a mix of gunmetal and gray-brown patina with some evidence of a light cleaning long ago and the lever retains some good silvery case-hardened patina. The Sharps patent markings on the frame are rather soft while the lockplate and barrel markings remain intact and strong, the barrel with the famous "Old Reliable" marking. This example was built using an old percussion frame and converted lockplate. The checkered straight grip walnut buttstock and smooth forend with subtle schnabel remain in very fine condition showing an older applied dark oil finish with a couple tiny slivers missing along some of the edges, a thin 1 3/8" crack right of the upper tang between the lockplate and some other scattered light handling marks. The checkering shows light wear and remains mostly intact and stock fit remains quite nice overall. The left side wrist shows factory filled-in sling bar inletting and the right side forend shows remnants of a lightly scratched name with "Bu" legible. The rear sight dovetail has been blanked and there is a single small drilled and tapped hole about 1 1/2" ahead of it with small filler screw. The barrel is matching the frame, there is a short range Vernier-style tang sight installed and the front sight is a blackened brass blade. Equipped with double set triggers, the set is rather stiff and the hammer safety notch is worn, but the action otherwise seems to function normally. A solid Sharps sporting rifle with a very fine bore. (13B10296-10) {ANTIQUE} (2000/3000) Est. 2.000 - 3.000 468 Smith & Wesson 44 Double Action Frontier Revolver serial #5780, 44 S&W Russian, 6 1/2" barrel with a very good bore that shows just a little light pitting just ahead of the cylinder. The revolver features a New Model No. 3 barrel with address ending in the "Reissue' date. The revolver features matching serial number on frame, rear of cylinder and underside of barrel latch. The rear of the barrel is numbered "802". The condition of the revolver is quite nice with metal surfaces retaining about 95 - 97% original nickel plated finish overall. The right side of the frame shows numerous light impact marks including on the rear top edge where there some minor finish loss. The hammer and trigger show nice original color case hardened finish with the triggerguard retaining about 70% original blue. The two-piece checkered hard rubber grips rate about very good showing light wear, more on the right side but with no chips or damage of any type. The grips screw escutcheons are more deeply recessed than normally seen on Smith grips from the period. (1B10000-45) {ANTIQUE} [Roy Jinks Family Collection] (1500/2500) Est. 1,500 - 2,500 Smith & Wesson No. 2 Army Model Revolver 469 serial #8901, 32 RF, 5" octagon barrel with a very good bore showing just a few small patches of light oxidation or pitting. The revolver shows matching serial numbers on butt and inside of right grip panel and matching assembly number "83" on the left side of grip frame, rear surface of barrel and on front of cylinder. This is the standard production revolver with three pins retaining the cylinder stop in the topstrap. Metal surfaces of revolver retain about 65% original blue finish with the most concentrated loss being on the grip straps and the sides of the barrel. Areas of finish loss shows a pleasing gray patina and remain quite smooth and free of pitting. The sideplate shows scratches around the periphery of the retaining screw and the barrel hinge screw shows some slot wear. The hammer and ejector pin show nice original faded color casehardening. The two-piece rosewood grips rate very good with 85% original varnish, the right panel shows a 1" long sliver missing along the lower backstrap. A nice solid No. 2 Army. (1A10000-73) {ANTIQUE} [Roy Jinks Family Collection] (1000/1500) Est. 1,000 - 1,500 470 Smith & Wesson .38 Single Action Mexican Model Revolver serial #14714, 38 S&W, 4" barrel with a very good bore showing a little frosting toward muzzle. This revolver shows matching serial number on the butt, rear of barrel and underside of barrel latch, the cylinder is numbered "95998". The revolver features the "MODEL OF 1891" marked barrel and rebounding, smooth sided hammer without half-cock (there is some friction on the hammer at the half-cock point but it does not hold). The revolver remains in nice condition retaining about 95% original nickel plated finish overall with many areas remaining bright while areas which receive more contact have mellowed to a less shiny appearance. There are the typical scattered light abrasions in only the surface of the finish. The hammer shows vivid original color case hardened finish and the spur trigger assembly shows 97% bright original blue. The revolver wears a pair of period ivory grips which show a lovely mellow patina but fit slightly over on all sides. (1B10000-56) {ANTIQUE} [Roy Jinks Family Collection] (1200/1800) Est. 1,200 - 1,800

471	American Flintlock Militia Musket with T. Earl Lockplate
	.79 cal, 45 1/8" part octagon part round barrel with turned medial at the
	point of transition and an oxidized bore. The metal surfaces of this
	interesting musket have toned to a dark brown patina with some overall
	old oxidation and areas of old pitting that is not too obtrusive. The barrel
	no longer bears any evident markings externally and shows remnants of
	a worn down brass front sight blade and there is a small lug presumably
	for affixing a bayonet though it is curiously mounted on the underside
	and is rather close to the muzzle. The lockplate is of expected early
	construction with unbridled frizzen, the pan with remnants of
	smoothed-over facets. Lockplate markings remain strong with "US" at
	the rear and "T EARL" impressed maker mark with zigzag border in the
	center. The interior of the lockplate shows only a small stamped "A" and
	there are moderate gaps between the lockplate and barrel. The
	lockplate shows extensive use with evidence of a period resurfacing and
	a very old crack along the neck of the cock. The arm is equipped with
	simple brass fittings including nosecap, dual ramrod thimbles with
	tailpipe, triggerguard with rudimentary acorn finial and buttplate that
	shows a small piece missing at the heel. The brass has taken on a
	lovely untouched dark patina with some areas showing remnants of an
	old lacquer. The stock is of Yankee construction and is cherry,
	remaining in about very good condition showing the expected overall
	light dings and small shallow chips with a number of thin repaired drying
	cracks scattered about, some more lengthy along the edges of the
	forend. There is an antique repaired chip above the lockplate showing
	three iron nails with a small piece lost to the years at the rear. A period
	iron ramrod is present and the lock is not functional as the mainspring is
	not present and the cock and its screw are rather loose. The most
	prominent "T Earl" of the period was Thomas Earl (later spelled Earle) of
	Massachusetts, one of the most accomplished and respected gunsmiths
	of Worcester county in the early 1770s. Legend has it that George
	Washington commissioned a fowler from Earl and suggested he add an
	"e" to the end of his name. I hough the martial style of this lockplate and
	"e" to the end of his name. Though the martial style of this lockplate and the markings are quite a bit different than other known Earl guns it is

The American black walnut cadet stock rates fine with a nice original finish over raised grain throughout, a streak of darker contaminant staining on the right side of the buttstock, a small dent in the right side of the cleaning rod channel and the expected light handling marks throughout. The left stock flat features a clear "ESA" cartouche, "33" is on the comb and "33 / 17" is on the right side of the buttstock. The original sights and serrated-head cleaning rod are intact and the action is very strong and crisp on the fine Model 1869 Trapdoor			Boddington detailing a safari and several game animals taken with this rifle is also included. The metal surfaces retain 99% original matte black oxide with some scattered light signs of handling, the bolt body and follower show a crisp damascened pattern and the underside of the checkered bolt handle is electro-penciled with a faint "127". The floorplate is inscribed to Mr. Boddington from the Los Angeles chapter of the Safari Club International, his letter mentions that this was a later addition to this gun and that he felt that it should stay with this rifle. The hand-laminated Kevlar fiber composite Monte Carlo stock with right-side cheekpiece is excellent and the action has been mounted to an aluminum bedding plate inside the stock for strength and durability. In typical Safari configuration, the rifle is sighted with a shallow V adjustable rear sight and a hooded brass bead front. A very rare

	partial feathered backstrap and an ivory grip with typical Ames		serial #29642h, 8mm Mauser, 24" barrel with a bright very good plus
	geometric motif. The metal retains much original gold wash with the		bore with scattered pinprick pitting, remnants of light oxidation, and
	exposed brass surfaces bearing a pleasing patina. The ivory has		strong rifling throughout. The metal surfaces of this "byf / 44" coded rifle
	acquired a lovely cream color with age and rates excellent with a couple		retain about 75-80% arsenal reapplied blue finish with light to moderate
	thin drying cracks along the lower edge. The leather scabbard is		wear on the high edges and contact points, some scattered light pitting
	decorated with gilded engraved brass mounts; the top mount has raised		on the barrel bands and barrel, and scattered light oxidation staining; the
	Ames scroll on the reverse and a raised anchor on the frog stud, the		bolt shows light operational wear, light wear on the handle, and the
	center mount is decorated with a fouled anchor and the tip chape an oak		extractor has toned to plum. The laminated hardwood stock is in about
	branch with leaves an acorns. The leather shows light crazing and		excellent condition as lightly cleaned with only a thin sliver just in front of
	crackling but remains supple and intact and the brass mounts retaining		the lower barrel band and a few light handling marks. The stock is
	much original gilt mellowing to a bright goldenrod with very fine flaking		marked with a light but easily legible "(eagle) / WaA135" waffenamt on
	along the top mount. This sword is identical to the one pictured on page		the right side of the butt, and the handguard is numbered to the rifle; the
	93 of U.S. Naval Officers Their Swords and Dirks by Peter Tuite and is		stock is otherwise unmarked. The serial number on the barrel, firing
	discussed in chapters two and three. A fabulous 1841 Naval Officers		proofs, coding, and waffenamts on the receiver remain clear and easily
	sword by a sought after American maker very-seldom encountered for		legible, all waffenamts appear to be the correct "135", the bolt assembly
	sale and would make a fine addition to the sword or maritime collector.		is mismatch, the barrel bands and floorplate are numbered to the rifle,
	(58814-3) (2000/3000)		and all other parts are unnumbered; the cupped steel buttplate is
	Est. 2,000 - 3,000		correctly marked with a faded "WaA98" waffenamt and "gqm / 44". The
491	Factory Engraved Remington New Model Police Cartridge-Converted		stamped upper barrel band is perhaps an arsenal replacement, the
	Revolver		milled lower barrel band is correct for the rifle, and the triggerguard and
	serial #16039, 38 RF, 4 1/2" octagon barrel with a dark moderately		floorplate are correctly stamped. The rifle retains the standard open
	oxidized bore showing old light pitting and worn evident rifling		sights and appears to function well mechanically. No cleaning rod is
	throughout. The metal surfaces of this revolver have mostly toned to a		present. A later production Mauser K98k rifle that will fit well in a WWII
	mix of gunmetal and dark gray-brown patina showing some scattered		collection. (14A10229-13) {C&R} (1000/1500)
	areas of cleaned moderate pitting more prevalent along the right side		Est. 1,000 - 1,500
	and some areas of the cylinder along with some scattered light dings		
	and the cartridge rim cutouts on the back of the cylinder enlarged		
	somewhat. The revolver is embellished throughout with fine quality		
	foliate scrollwork with punch-dot shading and light geometric motifs that		
	are obscured in some areas from the pitting but remain mostly intact.		
	The barrel address and patent dates have softened slightly but remain		
	legible and the triggerguard has toned to a mild ocher patina showing a		
	few small moderate dings. The smooth rosewood grips remain in good		
	condition showing mostly worn finish, a few tiny smoothed-over chips at		
	the corners and scattered mild dings. There are no visible pencil		
	numbers on the insides of the grips, the cylinder and cover plate are		
	matching each other by assembly number and the action remains		
	functional with good timing and somewhat loose lock-up. A good		
	"example" piece of a factory engraved New Model Police. (13B9857-11)

The rifle is sighted with a small German silver blade front sight and a semi-buckhorn sporting-style rear sight and appears to function well mechanically. A solid 1894-dated Winchester Rifle in a desirable caliber. (14A10208-23) {ANTIQUE} (1200/1800)	509	 the trigger. The barrel markings are crisp while the Savage logo on the matching shotgun-style buttplate is softened yet clear. The smooth walnut straight grip stock and schnabel-tipped forend rate about excellent with a nice oil finish and a few scattered light handling marks. The Rocky Mountain rear sight is intact, the front is a Lyman globe and a Lyman aperture sight with insert is installed on the upper tang. The takedown feature and action appear to function well mechanically on this very nice early Savage 99. (23B10187-49) {C&R} (1000/1500) Est. 1,000 - 1,500 Savage Model 1899-B Lever Action Rifle serial #76953, 30-30, 26" octagon barrel with a bright very good plus bore showing some light oxidation in the strong rifling. The barrel of this handsome 1908-vintage rifle retains about 85-90% original slightly-thinning blue which tones to a pleasant blue-plum patina under direct bright light with some scattered small spots of loss toning to gray, some light on this mess slight thinning to blue-gray on the sides, and a few tiny spots of loss toning to gray while the finish on the upper tang and around the lever is particularly strong. The lever retains vibrant case-hardened colors around the trigger and in the protected areas with
	of blue in the protected areas, scattered spots of pinprick pitting and old oxidation, and some light handling marks. The smooth walnut stock and forend are in very good plus condition as lightly cleaned with a few light handling marks, a few streaks of the finish on the buttstock and a discolored area on the left side of the heel, and the buttplate is lightly proud at the sides and toe. The two-line barrel address and caliber marking remain clear and are easily legible when viewed under direct light, the brown patina otherwise making them slightly concealed, the serial number is light but legible, and the Winchester trademark on the upper tang is crisp. The rifle is sighted with a small German silver blade front sight and a semi-buckhorn sporting-style rear sight and appears to function well mechanically. A solid 1894-dated Winchester Rifle in a desirable caliber. (14A10208-23) {ANTIQUE} (1200/1800)	509	 the trigger. 511	Soviet SVT-40 Semi-Automatic Rifle by Izhevsk			serial #9491, 12 ga, 28" Krupp Fluid Steel barrels choked improved
	serial #2317/T19066, 7.62x54R, 24 3/4" barrel (27" overall including			cylinder and improved modified with bright excellent bores showing only
	compensator) with a very good frosted bore with evident rifling			three tiny spots of light pitting near the muzzle of the left barrel. The
	throughout. The metal surfaces of this 1941-dated rifle retain about 95%			barrels retain about 80% original blue with light wear at the muzzle,
	arsenal reapplied blue finish with light wear and handling marks on the			moderate thinning along the sides of the barrel, and a few minor
	ventilated heatshield, remnant of black enamel finish on the same,			handling marks and tiny spots of light pitting. The frame retains about
	flaking wear primarily on the left side of the magazine, the bolt has toned			50% casehardened colors with the areas of loss having worn to a silvery
	to plum, and previous pinprick to light pitting is present beneath the			casehardened patina, strong casehardened color on and around the top
	finish. The pistolgrip Eurasian hardwood stock is in very good plus			lever, protected area around the fences and top edge of the frame side,
	condition as lightly cleaned with two arsenal-quality repairs at the right			and in the protected area around the trigger, and scattered spots of
	side woodline, one 3 3/8" repair below the charging handle and one			oxidation staining; the long tang triggerguard retains about 50% blue
	about 5" repair reaching the rear of the receiver, a few very small dings			with the tang worn to a pewter patina and the triggerguard bow has light
	showing filler-repair, and some minor handling marks; the right side of			wear. The checkered round knob pistolgrip attractive English walnut
	the stock is stamped with the rifle's serial number, minus the Cyrillic			stock and splinter-style forend are in very good condition with scattered
	prefix. The rifle is stamped with an arsenal refurb mark next to the still			finish loss on the buttstock, moderate finish loss at the rear of the
	crisp Izhevsk arsenal mark, the bolt and triggerguard are electro-pencil			forend, a small chip in the checkering on the forend, and scattered light
	renumbered to the rifle, and the magazine is electro-pencil numbered			handling marks; the grooved hardrubber buttplate is cracked through the
	"313"; a small but clear CDI import mark is present on the right receiver rail. The rifle is sighted with the standard open sights, and features a			toe and a 2" chip is missing from the right side. The frame is decorated with crisp B grade engraving in the early style, showing a woodcock on
	cleaning rod and one 10-round magazine. An attractive arsenal			the left and a quail on the right and both sides bearing "ANSLEY H.
	refurbished example of these Soviet battle rifles. (14A10229-9) {C&R}			FOX", the barrels are crisply marked "KRUPP FLUID STEEL MADE BY"
	(1200/1800)			and "A.H. Fox Gun Co. PHILA. PA", and the forend and barrels are
	Est. 1,200 - 1,800			numbered to the shotgun. The shotgun locks up tightly with the barrels
512	Swedish AG-42B Ljungman Semi-Auto Rifle by Carl Gustafs			on face, the lever comes to rest right of center, and the shotgun features
0.2	serial #13947B, 6.5x55mm Swedish, 25 1/2" integrally compensated			2 1/2" chambers, an automatic safety, double triggers, an about 14"
	barrel with a bright very good plus bore with light frosting but strong			length of pull with drops of about 1 3/4" and 3", and is sighted with a
	rifling throughout. The metal surfaces retain about 85-90% arsenal blue			single silver bead. An attractive early Fox that has seen some time in the
	finish with light wear on the edges of the triggerguard and receiver rails,			field. (14A10280-2) {C&R} (1500/2000)
	moderate wear to a silvery patina on the receiver cover, light machining			Est. 1,500 - 2,000
	marks on the stripper clip guide, some scattered handling marks on the		515	Winchester Model 1892 Takedown Lever Action Rifle
	barrel and bands, and the bolt has toned to plum; interestingly, the blued			serial #128313, 38 W.C.F., 24" octagon barrel with a full magazine and
	surfaces are a mix of bright and matte blue finishes. The pistolgrip			a bright very good to very good plus bore with some scattered light
	European hardwood stock is in very good plus condition with a tiny chip			pitting, predominantly closer to the chamber, but strong rifling
	at the rear barrel band, an abut 3/4" drying crack on the left side of the			throughout. The receiver and forend cap have worn to gun metal with
	butt, and a few easily missed arsenal-quality repairs at the stock nose;			remnants of original blue in the protected areas, especially around the
	the buttplate is serialized and matching to the rifle. Two small crown			hammer and trigger, overall light oxidation staining, and a few light
	proofs are marked on the inside of the pistolgrip, and the brass stock			handling marks; the lever has a gray casehardened patina with muted
	disc is present and shows only slight tarnishing. The receiver is crisply			casehardened color, a spot on the right side remaining fairly vibrant. The
	marked and dated "14 ((crown) / C) 43", the right side of the receiver is			barrel and magazine tube have a light brown patina with generous
	stamped "S.S.", the bolt is scratch numbered to the rifle, and multiple			streaks of original blue, light wear on the edges of the barrel, and a few
	small parts are marked with crown proofs and "B"; the right side of the			light handling marks, retaining about 40%. The smooth walnut stock and
	barrel is import marked by CAI. The rifle retains the standard open			forend are in very good plus condition with an old light abrasion on the
	sights, appears to function well mechanically, and included is correct			underside of the forend, smoothed with time, and scattered light
	cleaning rod. A nice example of Sweden's first standard issue			handling marks consistent with age and light use; the forend shows
	semi-automatic military rifle. (14A10229-37) {C&R} (1200/1800)			some attractive figure and the crescent steel buttplate has toned to gray
	Est. 1,200 - 1,800			with light oxidation staining. The two-line barrel address appears
				somewhat light with a small ding marring a couple letters but remaining
				still easily legible, and the caliber designation, Winchester trademark on
				the upper tang, and the serial number all remain crisp. The rifle is
				sighted with a Lyman blade front sight and a sporting-style rear sight, a
				few screws show minor slot damage, and the takedown feature appears
				to function correctly. An 1899-dated Model 1892 that would make a fine
				addition to a Winchester collection. (14A10219-9) {C&R} (1200/1800)
		I		Est. 1,200 - 1,800

516	Special Order Winchester Model 1894 Takedown Lever Action Rifle	519	U.S. Colt Model 1911A1 National Match Modified Semi-Auto Pistol
	serial #154740, 30 W.C.F., 26" part-octagon part-round nickel steel		serial #2184298, 45 ACP, 5" Colt factory barrel, no doubt National
	barrel with a half magazine and a very good bore with scattered light		Match, with the last four digits numbered to this gun on its right above
	pitting but evident rifling throughout. The receiver, forend cap, and lever		chamber, with the remnants of a seven digit number beneath which was
	have a light brown patina with undertones of gunmetal gray with some		removed, making us believe this is a National Match barrel repurposed
	light wear on the high edges, strong remnants of blue in the protected		by a government armorer from an earlier pistol. The Colt post-war
	areas around the trigger and hammer, a few scattered spots of old		commercial slide and Remington Rand frame retain about 97-98%
	oxidation, what appear to be light vise marks on the front of the receiver,		post-rebuild parkerizing, the loss being some very light high edge wear,
	and a light handling mark or two; the lever shows a few spots of muted		primarily at the muzzle. The arm is fitted with a long aluminum trigger
	casehardened color in protected areas. The barrel and magazine retain		adjustable for overtravel, identical to government National Match
	about 70% original blue with light wear on the high edges, intermittent		examples and the arm has been very neatly stippled on the frontstrap,
	light oxidation staining along the length, and a few spots of light pitting.		nearly identically to Army Marksmanship Unit examples noted. The
	The smooth walnut stock and forend are in very good plus condition as		sides of the hammer have been lightly relieved, as we see on AMU
	perhaps lightly cleaned long ago with a small shallow chip on the left		examples, the underside of the slide is stamp-numbered to the gun and
	edge of the lower tang and a few light handling marks. The two-line		a number "5" is stamped on the right of frame beneath the mag release
	barrel address and barrel markings and the "WINCHESTER" in the		cut. The Triangle rear sight is "U.S." marked on its left lower edge and
	Winchester trademark are softened but remain easily legible. The rifle is		there is a flat face Patridge style front sight present. The checkered
	sighted with a small German silver blade front sight and a Winchester		walnut grips rate excellent to as-new with sharp diamonds. The barrel
	Express rear sight with notches for 50, 100, and 200 yards, and the		has had its lugs match fitted and the barrel relieved along its full length
	takedown feature appears to function correctly. A solid 1902-dated rifle		but at the muzzle, to accommodate the match bushing that was fitted to
	with multiple special-order features including the takedown feature,		both barrel and slide, requiring a wrench to be removed from the slide,
	part-octagon, part-round barrel, and half magazine. (14A10221-9) {C&R}		the bushing is numbered "4298" on its left underside. Inspection of the
	(1200/1800)		frame reveals that the rails have been tightened and the top surface
	Est. 1,200 - 1,800	4	polished, leaving only remnants of a letter "G" near the disconnector
517	Factory Engraved Early Smith & Wesson New Model Schofield Single		hole. A single blued seven round magazine with folded spot welded rear
	Action Revolver		seam is included and the gun functions well mechanically. A very nice
	serial #SCH0005, 45 S&W, 5" barrel with an unfired bore. This is the fifth		National Match gun, obviously professionally done by someone who
	New Model Smith & Wesson Schofield off the line, beautifully custom		knew their business, appearing very much to be an AMU gun in many
	embellished by factory master engraver Wayne D'Angelo. The arm		respects, further research may prove interesting. (3B10090-90) {C&R}
	retains all of its beautiful deep wet-look blue finish with vibrant color		(2000/4000)
	case-hardening on the hammer, muted somewhat on the trigger and the	500	Est. 2,000 - 4,000
	pivot pin at the frame knuckle. The gun features 90% plus coverage of	520	Smith & Wesson No. 1 First Issue Revolver with Playing Cards Gutta Percha Case
	exquisite flowing scroll with background punch dot shading, this		
	intermingled with beautiful open scroll gold inlay on frame flats, sides of barrel, knuckle of frame and in between the flutes on each of the		serial #4598, 22 RF, 3 3/16" ribbed octagon barrel with a mostly bright
	cylinders. The front sight blade reads "Mod. 3 Schofield 1875" on its		very good plus bore showing some areas of light oxidation and strong rifling throughout. The metal surfaces of this fifth type revolver retain
	right side with the left side reading "Performance Center 2000". The		about 95% older period reapplied silver finish, the cylinder showing
	smooth burl walnut grips are as-new, the grain absolutely stunning, the		some small flaked areas and minor pinprick pitting, along with some
			other minor handling marks. The silver has taken on a lovely dark
	left side with a facsimile "IFEC" inspectors marking. The gun comes in a

The gun is of course absolutely unturned, unfired since leaving Smith & Wesson and is a beautiful example of a very early serial numbered custom engraved New Model Schofield. (310082-42) {MODERN} (3000/5000) Est 3,000 - 5,000 Winchester Model 1894 Lever Action Rifle serial #407870, 32-40, 26" octagon barrel with full magazine and a bright very near excellent bore. This rifle shows honest use and remains in very nice condition. The barrel and magazine retain 93 - 95% original blue with most loss due to light edge wear. The action shows about 75% original blue with most loss on the belly from honest carry wear. There is a small round impact mark on the left side of the frame along with some other light marks that are just through the finish. Nice faded original color case hardened finish is clearly visible on the hammer and lever. The		tarnish overall, the barrel address remains intact and strong and the patent dates along the cylinder have softened a little bit but remain legible. The smooth rosewood grips are stamp-numbered to the gun and remain in excellent condition retaining about 95% original varnish and showing a minor drying crack at the base of the left panel. The remaining numbered parts are matching by assembly number and the action seems to generally function well mechanically with timing and lock-up just a little off. The revolver includes an original brown gutta percha case with the playing card motif on the lid and small revolvers around the periphery. The case rates very good plus showing some scattered thin cracks along the sides, a thin 1" chip at the front edge lid and a small synthetic filler repair at one of the hinges. There are a few small black ink marks along the lid and the interior is lined in purple baize that shows some mild staining and features an ebony-stained hardwood cartridge block and barrel rest (the rest has come loose). An attractive cased first issue revolver. (13B9997-304) {ANTIQUE} [John Lipski Collection] (1800/2200)
518	glass top oak case with a sky-blue interior with the Smith & Wesson logo etched in the glass, which rates as-new; the interior is flat and not fitted for the gun but certainly one could have custom fitting done if one wished. The gun is of course absolutely unturned, unfired since leaving Smith & Wesson and is a beautiful example of a very early serial numbered custom engraved New Model Schofield. (310082-42) (MODERN) (3000/5000) Est. 3,000 - 5,000 Winchester Model 1894 Lever Action Rifle serial #407870, 32-40, 26" octagon barrel with full magazine and a bright very near excellent bore. Title/Description Lot

521	Fine Smith & Wesson No. 1 Third Issue Revolver with Original Box	[525	Swiss Martini Falling Block Schuetzen Rifle by Hofstetter with
	serial #77335, 22 RF, 3 3/16" ribbed round barrel with a bright excellent			Presentation
	bore. The metal surfaces of this handsome little revolver retain about			serial #47, .43 cal CF, 32 1/2" barrel with octagonal breech and a mostly
	95% original bright blue showing some scattered fine flaking to a			bright very good bore showing some scattered areas of old oxidation
	pleasant gray-brown patina mostly along the cylinder and backstrap			and otherwise strong rifling. The metal surfaces of this interesting rifle
	along with some other very light handling marks. There is one very small			retain about 95% reapplied matte blue finish showing some thinning
	area near the bottom left edge of frame that shows some pinprick pitting			along the barrel and other light handling marks. There are some spots of
	and light scratching and the screw heads show some very light slot			old light pitting beneath the finish along the octagonal section of the
	wear. The hammer, ejector and trigger show generous attractive smoky			barrel and the action and lever show a bit more noticeable old pitting
	case-hardening, the right side hammer with some particularly vibrant			beneath the finish throughout. The barrel features dual bands a the
	colors. Barrel markings remain completely intact and crisp and the			muzzle and breech and the top rear of the action is inlaid in gold with
	smooth rosewood grips remain in excellent condition retaining 99%			maker's name "JOH. HOFSTETTER / HORGEN". The action features
	original varnish. The right panel is appropriately stamp-numbered			some wonderful embellishments that have sadly been obscured
	matching the frame and the other numbered parts are matching by			somewhat from the old pitting and refinishing but remain mostly visible
	assembly number. Barrel-to-frame fit is solid and the action seems to			featuring fine quality flowing foliate scrollwork and nice bordering. The
	function well mechanically with solid timing and lock-up. The revolver			action is embellished with an endearing William Tell-like scene on either
	includes a scarce original box with black textured paper covering with			side, the left side with a child standing against a tree with an apple on
	repeating foliate motif. The box rates about good showing some flaking			his head and a man down range taking aim with a crossbow. The right
	and edge wear of the black covering, one end flap of the lid is missing,			side then shows another man on horseback coming up to the crossbow
	and the other end, and part of the side shows some modern hardstock			shooter who is apparently exclaiming and showing off the shot he just
	repairs along with some other smaller repairs along the base. There is			successfully made, the child appears to be an excited state as well. The
	no legible number along the base though the inside of the lid is			underside of the action shows a patriotic Swiss cross and panoply of
	pencil-numbered "77335" and a simple steel cleaning rod is also			arms motif. The deluxe carved walnut full-length forend and buttstock
	included. A very nice blued third issue with seldom-seen box.			remain in very good plus condition showing a very small thin drying
	(13A10000-11) {ANTIQUE} [Roy Jinks Family Collection] (1000/1500)			crack at the upper tang, some scattered light dings and handling marks
	Est. 1,000 - 1,500			to be expected. The stocks feature lovely carved foliate scrollwork and
522	Smith & Wesson Gutta Percha Case			the stock cheeks and rear of the forend with nice scalloped motif. The
	This is a nice original black case with molded image of revolver, Smith &			left side butt features a nice cheekpiece and the wood shows some
	Wesson address and foliate motifs along the lid. The case remains in			lovely tiger stripe grain figure throughout. Forend features a nosecap
	about very fine condition showing a few small chips along the edges and			with full-length cleaning rod retainer and both the forend and buttstock
	in the "grip" of the revolver, light handling marks and a few thin cracks at			are rather shy of the frame. The right barrel wedge escutcheon screws
	the bottom right corner of the lid. The interior is lined in marcon baize,			are loose but included and the butt is equipped with a Swiss style
	-			buttplate with acorn finial. The right side also shows a silver inlaid plate
	the lid with nice embossed foliate motif and shows some very light scuffs			
	and mild staining. There are some small chips at either end of the			neatly engraved with a crosshatch pattern and "ALEXANDER
	internal barrel rest and edge of the cartridge block. There is a slight gap			WATTENHOFER / NEW - ORLEANS". The rifle is equipped with
	at the rear when the lid is closed but this is relatively minor. A very			European style sling swivels, Swiss-style adjustable u-notch rear sight,
	handsome early variation case to accompany any fine No. 1 revolver.			plain fine blade front, adjustable double set triggers and a mount at the
	(13B10000-115) [Roy Jinks Family Collection] (1000/1500)			upper tang for additional sights. The set trigger will require a little
	Est. 1,000 - 1,500			mechanical attention but the action otherwise seems to function
523	Smith & Wesson Gutta Percha Case			
1 323	Sililii & Wesson Gulla Fercha Case			normally. Johann Hofstetter was active in the town of Horgen just

(13D10174-12) {ANTIQUE} (1000/1500) Est. 1,000 - 1,500 Excellent Smith & Wesson 32 Safety Hammerless "Bicycle" Revolver serial #139659, 32 S&W, 2" ribbed round barrel with a bright excellent bore. The metal surfaces of this handsome Second Model revolver retain about 95% original blue which is slightly thinning to a blue-gray patina under bright direct light on the grip frame, knuckle and a couple small areas on the frame, with some slight high edge silvering and some tiny speckles of light oxidation. The trigger displays strong colors throughout with some mild muting to a smoky case-hardened patina and the unnumbered S&W factory mother-of-pearl grips rate excellent. All the correct parts are serialized to the frame and barrel-to-frame fit as
	This is a very good example of the later variation dark brown case with flags and stand of arms in the center and foliate motifs in the corners featuring emblems of various industries. The lid moldings remain very nice showing one small 1" area of bubbling near the upper left corner. There are a few thin cracks mostly along the sides of the lid, the initials "JR" are carved into the back surface of the lid and the lower right corner of lid and base show an old brown synthetic filler repair, about 2" on the base. The interior lid shows purple baize lining with nice embossed foliate motif and just a little mild staining or discoloration. The maroon base liner also shows a little miror fading. The cartridge block is intact with a full complement of antique copper-cased cartridges, the small protrusion at the top right corner also present which is rarely the case. The barrel rest shows a few small chips along the edges but its baize covering is still mostly intact. (13B10000-116) [Roy Jinks Family Collection] (1000/1500)	5	526	outside of Zurich from about 1850-1895. A very ornate rifle that was not doubt quite lovely in its day.
