

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
1	Scarce Smith & Wesson First Model Single Shot Target Pistol serial #19916, 22 LR. 10" ribbed round barrel with a very good bore showing pitting in places and strong rifling throughout. The metal surfaces of this pistol show 70% original blue on the barrel and frame, with toning to plum-patina and significant surface wear. The trigger and hammer retain very good color case-hardened finish with silvering on the contact points and some abrasions on the front of the trigger. The triggerguard shows gray finish with pitting and oxidation. The barrel, extractor, and latch are all serialized to the frame, and all other components of the pistol appear to be original. The markings on the rib are crisp, as is the caliber designation on the barrel with the exception of "CTG" which has softened, and the frame shows a crisp Smith & Wesson trademark. Barrel-to-frame fit is excellent and the action appears to function well mechanically. An honest example of these seldom-seen early target pistols. (26B9100-238) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500
2	German P.08 Luger S/42 Pistol by Mauser serial #8389c, 9mm, 4" barrel with a very good bore showing light frosting with otherwise strong rifling. The metal surfaces of this 1940-dated pistol have toned to an overall pewter and dark gray patina. The receiver bears two crisp "(eagle)/655" waffenamts, and military test fire proofs are present on the receiver, barrel, and toggle. All numbered parts including the grip are matching, with the exception of the takedown lever which is marked "24". The front sight has been modified with a bead of celluloid during the period of use. The checkered wood grips show some softening of the points and are in overall very good condition. The weapon appears to function well mechanically, and included is one unmarked aluminum based and bodied magazine. A solid early war Luger for the martial collector. (26B9100-1136) (C&R) [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200
3	Winchester Model 12 Black Diamond Trap Slide Action Shotgun serial #504666, 12 ga., 26 1/4" overall length solid rib barrel with deluxe polychoke with Cutts, showing a bright excellent bore. The metal surfaces retain perhaps 75-80% original fading blue, toning to pewter on high edges and contact points with a few sparsely scattered speckles of oxidation here and there. The checkered walnut straight grip buttstock shows some lovely feathercrotch figure and the black diamonds remain intact left and right at wrist. The stock rates about very good with fading varnish and a 13 5/8" length of pull to the Red Head recoil pad. The extended semi-beavertail style forend rates perhaps closer to fine. The arm takes down properly, the numbers match, "TRAP" marked adjacent to them and the arm seems to function mechanically. The left side of the receiver shows a couple reassembly scars which could be dressed. (3A6520-3617) (C&R) [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
4	Parker Brothers Grade 2 Double Hammergun serial #28388, 10 ga. (2 7/8") on a No. 2 frame, 30" damascus steel barrels seemingly choked improved cylinder (about .005" constriction in each), with about very good bores which show light scattered pitting their full length. The barrels retain a fading contrasting two-tone Damascus pattern on their underside with the top surfaces an overall light surface oxidation, a few spots more moderate, consistent with an arm hung horizontally on a wall for years. The frame and lockplates are a silvery patina with scattered light oxidation and perhaps some areas of sparse light pitting; the guard shows moderate oxidation. The checkered capped pistolgrip buttstock rates very good with the expected handling marks, worn checkering, devoid of finish, a bit dark at the head: the splinter forend shows a bit more wear being nearly smooth. The right lock functions, the left has the stud broken off the tumbler, it is still attached to the included original hammer. The barrels lock-up well, are on-face, and are numbered to another gun, the forend matches the frame. (3A6520-1703) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (150/250) Est. 150 - 250

Lot	Title/Description
5	British W.W. Greener Double Hammergun serial #2278, 10 ga. (2 5/8"), 30" damascus steel barrels with good to about very good bores showing pitting their full length with a ding about halfway down the left tube. The barrels are now a dull pewter and gray-plum patina with scattered oxidation staining and light scattered pitting. The rib has light engraving at its rear and features the 68 Haymarket London address and winner of the gun trials dates of 1875, 77, 78 and 79. The frame and lockplates are a dull pewter patina and are overall engraved in tight English scroll with maker name in ribband on each plate. The right hammer has a crack at its inside front edge, the left with an old welded repair. The checkered round knob English walnut buttstock rates good plus to perhaps near very good with overall light dings and handling marks, the checkering worn smooth, some moderate scuffs along its right edge. The splinter style forend is similar showing a bit more wear with a nice horn tip insert. The rebounding lockplates seem to function properly and the barrels are slightly off-face; a few screwheads show some slot damage. (3A6520-1401) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (150/250) Est. 150 - 250
6	Winchester Model 12 Trap Slide Action Shotgun serial #Y2004398, 12 ga., 30" ventilated rib barrel choked full with a bright excellent bore and non-professional porting nearer the muzzle. The barrel and magazine tube assembly retain about 95% original blue showing only some light operational wear. The receiver has toned more and shows some light oxidation on the belly with fading to pewter on the top radius, retaining perhaps 90% original finish overall. The bolt retains some good engine turning with light oxidation staining, the carrier showing more wear and oxidation staining, the triggerplate fits inexpertly and is perhaps from a different Model 12. The checkered walnut Monte Carlo stock with blue steel gripcap rates very fine as refinished with a heavy coating of varnish, the extended semi-beavertail forend is similar. The length of pull to the curved face KickEez recoil pad is 13 7/8". The arm seems to function well mechanically and takes down properly and there has been a pivoting lever-style safety installed; there is a very tiny ding in the magazine tube behind the hanger. (3A10455-97) (C&R) (400/600) Est. 400 - 600
7	Winchester Model 12 Trap Slide Action Shotgun serial #Y2023066, 12 ga., 30" ventilated rib barrel choked full with a bright very good bore which shows some scattered light pitting. The metal surfaces retain about 95-97% original blue, showing light operational wear and fading of the high edges and contact points. There are a few spots of gray oxidation with very light pinprick pitting in the area of the muzzle, primarily at the left side, where a contaminant has removed the blue. The bolt and carrier show light jewelwing with operational wear, the carrier with light oxidation staining. The checkered walnut capped pistolgrip buttstock rates very good with light dings and handling marks, some flaking varnish and a blue steel Winchester grip cap; the extended semi-beavertail style forend is similar. The length of pull to the added ventilated recoil pad is 14 3/4". The arm seems to function properly mechanically, takes down well, has a left-hand safety and a trigger shoe installed and the trigger group screw is a non-gun replacement. (3A10455-275) (C&R) (500/700) Est. 500 - 700
8	Winchester Model 12 Trap Slide Action Shotgun serial #1066433, 12 ga., 30" Simmons ventilated rib barrel choked full with a bright excellent bore. This example is indeed marked "Model 12 Trap" on the magazine tube support. The metal surfaces retain about 97% later Simmons Gun Specialties blue, with the rear of the rib and rib extension retained by two screws, the rib itself is the Simmons donut post style. The bolt and carrier show light operational wear, the carrier with some remnants of oxidation staining. The checkered deluxe walnut capped pistolgrip buttstock rates perhaps very good as refinished with dings, scratches and handling marks, a few more moderate on the left side. The extended semi-beavertail style forend is similar, the checkering now filled with varnish and showing a 2" crack along its rear edge which will not flex. The length of pull to the ventilated screen face recoil pad is 14 1/2". The arm seems to function properly mechanically and takes down properly and is sighted with dual ivory beads. (3A10455-173) (C&R) (400/600) Est. 400 - 600

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
9	Winchester Model 12 Trap Slide Action Shotgun serial #Y2004656, 12 ga., 30" ventilated rib barrel choked full with a bright very fine bore showing remnants of some light pitting in the area just to the rear of the choke, which has been honed. The barrel and magazine tube retain about 97% original blue, showing some operational and high edges wear with some sparsely scattered very light freckles of oxidation here and there. The receiver retains about 90% excellent quality restored blue, showing remnants of some light pinprick pitting on the flats beneath. The bolt shows some light oxidation with strong jewelings and light operational wear while the trigger group is from a different Model 12 with a pewter-gray un-jeweled carrier, the trigger group sitting slightly proud in relation to the receiver. The checkered Monte Carlo Walnut buttstock rates fine with only light dings or scratches here and there, the comb appears to have been lowered very slightly years ago. The extended semi-beavertail forend rates very fine as well with some crazing finish and light handling marks. The arm seems to mount solidly and function well mechanically with a 14 1/2" length of pull to the Winchester recoil pad. (3A10455-185) (C&R) (350/550) Est. 350 - 550
10	Winchester Model 12 Trap Slide Action Shotgun serial #1931017, 12 ga., 30" ventilated rib barrel choked full with a bright excellent bore. The metal surfaces retain about 95-97% original blue, the loss due to operational and high edge wear, the receiver showing numerous small scratches about its surface, the barrel with some light surface oxidation. The bolt and carrier show light wear with a bit of oxidation staining. The checkered capped pistolgrip buttstock and extended semi-beavertail forend rate very good with overall light dings and flaking varnish, the forearm showing worn finish along its entire bottom surface. Barrel mounts solidly and the action seems to function properly mechanically. The length of pull to the inexpertly fitted KickEez recoil pad is 14 1/2". (3A10455-303) (C&R) (400/600) Est. 400 - 600
11	Winchester Model 12 Trap Slide Action Shotgun serial #1126828, 12 ga., 30" Simmons ventilated rib barrel choked full with a bright excellent bore. The metal surfaces retain about 95-97% later buffed blue, the trigger group obviously from a different gun and is a gray and pewter patina showing oxidation staining and light pitting. The bolt and carrier show light operational wear, the carrier also with light pitting. The smooth walnut pistolgrip custom Monte Carlo stock with semi-roller comb and extended smooth semi-beavertail forend rate very fine, the buttstock showing numerous light scratches here and there and an inexpertly fitted recoil pad. The butt has a rather large flared pistolgrip insert of what may be pau ferro or rosewood, and the length of pull to the screen face pad is 14". The magazine tube cap and hanger appear to be chrome plated. The barrel mounts solidly to the receiver and the gun functions for the most part, occasionally failing to lock fully forward in the action slide can still be manipulated. One of the numbers in the receiver serial number was restamped post-polishing as the buffing mostly removed it, but both barrel assembly and receiver are clearly matching and in factory fonts otherwise. (3A10455-489) (MODERN) (250/450) Est. 250 - 450
12	Winchester Model 12 Trap Slide Action Shotgun serial #Y2013800, 12 ga., 30" ventilated rib barrel choked full with a bright excellent bore. The metal surfaces retain about 97% original blue with light operational wear, scratches and handling marks, showing some surface oxidation on the lower right front of receiver and magazine support. The bolt and carrier show bold engine turning and light operational wear, the carrier with a bit of light oxidation speckling. The custom checkered pistolgrip Monte Carlo stock with semi-roller comb and extended semi-beavertail style forend rate very fine, the forend showing a couple flakes. There is a very generous rosewood pistolgrip cap with maple spacer and a KickEez recoil pad fitted with a damaged toe giving a 14 5/8" length of pull. Rib features white target beads and the barrel has been ported 2" from the muzzle and there is a small hole drilled through the magazine tube about 1" ahead of the forend nut. The gun will need mechanical attention as the trigger cannot be pulled rearward to drop the hammer. (3A10455-440) (MODERN) (500/700) Est. 500 - 700

Lot	Title/Description
13	Winchester Model 12 Trap Slide Action Shotgun serial #1297013, 12 ga., 30" Simmons ventilated rib barrel choked full with a bright excellent bore. The metal surfaces retain about 97% Simmons Gun Specialties blue, showing some light operational wear and handling marks, with rub wear left and right at the front edge of the receiver. Both the bolt and carrier are a pewter patina and show light wear with oxidation staining. The checkered walnut capped pistolgrip buttstock is a non-Winchester replacement and rates very good with a re-affixed chip at left junction of the receiver. It features a hard rubber pistolgrip cap, flared left side cheekpiece and a 14 1/2" length of pull to the added recoil pad. The extended checkered semi-beavertail style forend would rate otherwise very good were it not for a 2" square chip missing from its left rear, a small crack at the upward flare on the same side. The barrel mounts solidly and the gun seems to function properly mechanically. (3A10455-186) (C&R) (350/550) Est. 350 - 550
14	Winchester Model 12 Trap Slide Action Shotgun serial #335643, 12 ga., 30" custom ventilated rib barrel choked full with a bright excellent bore. The metal surfaces retain about 98% later lightly buffed blue which has left some of the edges slightly soft, showing a few very minor abrasions in the matted top surface. The bolt and carrier are a pewter patina and show some remnants of light oxidation staining. The custom buttstock and forend are maple or myrtle wood and rate very fine to excellent. The buttstock features a rounded cheekpiece with rollover Monte Carlo comb and the smooth wide beavertail forend is sharply flared along its bottom edge. The pistolgrip features a rosewood gripcap with maple spacer and right side palm flare and the length of pull to the ventilated recoil pad is 14 3/4". The barrel mounts solidly and the action functions somewhat stiffly when fired, the slide release will not operate to release the action tube and it is likely the trigger group is from a different Model 12 as its fit is slightly less-than-perfect. (3A10455-144) (MODERN) (350/550) Est. 350 - 550
15	Winchester Model 1912 Trap Slide Action Shotgun serial #48068, 12 ga., 30" custom ventilated rib barrel choked full with a bright excellent bore. The metal surfaces retain about 97% later good-quality buffed blue. The bolt and carrier show nice quality engine turning with a bit of operational wear and a few very light freckles of oxidation. The metal surfaces show some light scratches here and there, most prominent on the left side of the receiver, where there are also some light reassembly marks. The smooth birdseye walnut Monte Carlo stock features a generous left side cheekpiece and semi-roller comb with a somewhat rudimentary walnut gripcap. It shows repaired cracks left and right and a small repaired chip to the left of the trigger group tang. The extended smooth semi-beavertail birdseye maple forend rates very fine. The length of pull to the added adjustable recoil pad is 14". The barrel mounts solidly and the action seems to function properly. (3A10455-485) (MODERN) (300/500) Est. 300 - 500
16	Winchester Model 12 Trap Slide Action Shotgun serial #941729, 12 ga., 30" Simmons ventilated rib barrel choked full with a bright excellent bore. The metal surfaces retain about 95-97% Simmons Gun Specialties blue with some sparse light handling marks and operational wear. The bolt and carrier show light operational wear with a bit of surface oxidation on the carrier. The checkered walnut pistolgrip scant Monte Carlo buttstock and extended semi-beavertail style forend rate about fine with numerous light handling marks. The stock features a large contrasting gripcap and a 14 1/4" length of pull to the added recoil pad. The barrel mounts solidly and the gun seems to function properly mechanically. (3A10455-223) (MODERN) (350/550) Est. 350 - 550
17	Winchester Model 12 Trap Slide Action Shotgun serial #1246726, 12 ga., 30" Simmons ventilated rib barrel choked full with an otherwise bright excellent bore which shows some obvious tool marks on the interior in the area of the choke, it still however gauges at "full". The metal surfaces retain about 97% Simmons Gun Specialties blue with overall very light and superficial scratches and handling marks on the receiver and along the surface of the rib, with some light operational wear elsewhere. The bolt shows operational wear with stronger jewelings remaining, the carrier is similar showing some very light pinprick pitting. The rifle is stocked with a smooth pistolgrip stock of very generous proportions with a semi-roller Monte Carlo stock with a walnut pistolgrip cap and right side palmwell. It rates very good with some light dings and handling marks, a few scratches a bit more prominent on the left side. The smooth extended semi-beavertail forend is similar with wide fingergrooves, showing a 1" crack at its rear edge on right. Both are a bit loose and could stand to be tightened up, the length of pull to the curved trap pad is 14". The arm is equipped with a release trigger and the safety button has been removed and a blank installed in its place. The gun seems to otherwise function properly and the barrel seems to mount solidly. (3A10455-299) (MODERN) (250/450) Est. 250 - 450

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
18	Winchester Model 1912 Trap Slide Action Shotgun serial #50008, 12 ga., 30" custom ventilated rib barrel choked full with a bright very fine bore which shows some minor length-wise scratches here and there and a small area of light pitting about halfway down its length. The metal surfaces retain about 85-90% later buffed blue which has left the right side barrel markings light. Both the bolt and the lifter show operational wear and some light oxidation staining. The arm is stocked Monte Carlo style in a nice grade of American black walnut with some lovely figure. The stock features a very generous rounded cheekpiece with rollover Monte Carlo and contrasting pigsfoot rosewood gripcap with maple spacers in a teardrop-style, the right of the stock with a palmswell. The length of pull to the curved trap face recoil pad is 14 1/2" and the stock rates very good with light scratches, dings or handling marks. The extended semi-beavertail forend is similar showing crackling of the varnish and is loose on the action bar tube. The rib is unmarked and has a somewhat herringbone pattern and there is a white bead front and silver midrib installed. The barrel mounts solidly to the frame and the action seems to function properly mechanically. (3A10455-288) {MODERN} (200/400) Est. 200 - 400
19	Winchester Model 12 Slide Action Shotgun serial #1378525, 12 ga., 30" plain barrel choked full with a bright excellent bore. The metal surfaces retain about 90% original blue showing fading, light operational wear, and numerous minor scratches and handling marks, with more prominent scratches at the very rear of the receiver. Both bolt and carrier show light operational wear and light oxidation staining. The smooth walnut aftermarket pistolgrip stock rates very fine to excellent showing a bit of dust in the finish. The length of pull to the inexpertly fitted sporting clays Decelerator pad is 14 1/4"; there is no forend. Barrel and receiver match and the action seems to function properly mechanically. (3A10455-184) {MODERN} (200/400) Est. 200 - 400
20	Winchester Model 12 Slide Action Shotgun serial #330496, 12 ga., 30" plain barrel choked full with a bright excellent bore. The metal surfaces retain about 99% later satin-finish blue, the nickel steel barrel and mag support toning to plum. Both bolt and carrier show light operational wear and light oxidation staining. The smooth walnut pistolgrip buttstock rates very good with light handling marks and dings or small chips, a drying crack at the butt with a replacement Winchester plate; the grooved forend is similar. Barrel is cleaned of its number yet seems to mount well, the magazine tube somewhat sluggish and the action seems to function properly mechanically. (3A10455-154) {C&R} (200/400) Est. 200 - 400
21	Winchester Model 12 Slide Action Shotgun serial #878822, 12 ga., 28" plain barrel choked modified with a bright excellent bore. The barrel action retains about 97% original factory blue, the receiver perhaps 92% with overall light handling marks, scratches, high edge wear and some light scoring from improper reassembly. Both bolt and carrier show light operational wear and light oxidation staining. The smooth walnut pistolgrip buttstock rates very good with light handling marks and dings, a few more moderate, with some nice figure in the butt; the grooved forend is similar. The barrel and receiver are numbered differently yet mount up is excellent and the action seems to function properly mechanically. (3A10455-541) {C&R} (250/400) Est. 250 - 400
22	Winchester Model 12 Slide Action Shotgun serial #892062, 12 ga., 30" plain barrel choked full with a bright excellent bore. The barrel action retains about 97% original factory blue with some light handling marks and a few scattered speckles of light surface oxidation. The receiver retains 92% later polished blue with light handling marks, scratches, and a bit of reassembly scratching. The right side adjacent to the serial number is neatly engraved from the period of use "JW/Tilley/Alta". Both bolt and carrier show light operational wear but remained mostly bright and the trigger group is a plum patina and likely from a different Model 12 as its fit is not perfect. The deluxe checkered walnut pistolgrip buttstock rates very good to perhaps fine with light handling marks and dings, a few more moderate along the toeline, with some stunning figure in the butt and with a Winchester patent date recoil pad shows a bit of toe damage and blued steel pistolgrip cap; the grooved flat bottom forend is similar. The barrel and receiver are numbered differently yet mount up is excellent and the action seems to function properly mechanically however the barrel is too tight to take down readily. A bit of further diligent research may prove the location of "Alta" and the true identity of Mr. Tilley. (3A10455-64) {C&R} (250/400) Est. 250 - 400

Lot	Title/Description
23	Winchester Model 12 Slide Action Shotgun serial #1123360, 12 ga., 30" plain barrel choked full with a bright excellent bore. The metal surfaces retain about 95% later buffed blue showing light operational wear, and numerous minor scratches and handling marks. Both bolt and carrier show light operational wear and remain bright with remnants of some light staining on the carrier. The smooth walnut pistolgrip stock rates very fine with some minor handling marks and a 14" length of pull to the 1" ventilated recoil pad; the European walnut forend rates excellent. Barrel and receiver match and the action seems to function properly mechanically. (3A10455-308) {C&R} (200/400) Est. 200 - 400
24	Winchester Model 12 Slide Action Shotgun serial #1863116, 12 ga., 30" plain barrel choked full with a bright excellent bore. The metal surfaces retain about 97% original blue showing fading, light operational wear, and minor scratches and handling marks. Both bolt and carrier show light operational wear and remain bright with light oxidation staining on the carrier. The smooth walnut pistolgrip stock rates very good with light handling marks, flaking varnish, two runs of some kind of paint and no buttplate, the periphery of the butt showing light sanding marks; the grooved forend rates closer to fine. Barrel and receiver match and the action seems to function properly mechanically. (3A10455-332) {C&R} (250/400) Est. 250 - 400
25	Winchester Model 12 Slide Action Shotgun serial #429930, 12 ga., 28" plain barrel choked improved cylinder (marked mod) with a bright excellent bore. The metal surfaces retain about 97% later buffed blue which has left most of the markings light, the magazine tube support number only partially present. Both bolt and carrier show light operational wear and remain bright with light oxidation staining on the carrier. The smooth walnut pistolgrip stock rates otherwise very good as refinished with light handling marks, but with a 2" crack to the rear of the triggerguard tang at bottom. The length of pull to the inexpertly added recoil pad is 13 5/8"; the grooved forend rates very good as refinished. Barrel and receiver match although barrel mounts loosely to the receiver and the action seems to function properly mechanically. (3A10455-201) {C&R} (200/300) Est. 200 - 300
26	Winchester Model 12 Slide Action Shotgun serial #1124029, 12 ga., 30" plain barrel choked full with a bright excellent bore. The metal surfaces retain about 92-95% original blue showing fading, light operational wear, and minor scratches and handling marks, a few scars on the left from improper reassembly. Both bolt and carrier show light operational wear and remain bright with light oxidation staining on the carrier. The smooth walnut pistolgrip stock rates about very good with light handling marks and flaking varnish; the grooved flat bottom forend is similar. The length of pull to the added ventilated recoil pad is 13 1/2". Barrel and receiver match and the action seems to function properly mechanically. (3A10455-465) {C&R} (250/400) Est. 250 - 400
27	Winchester Model 12 Slide Action Shotgun serial #1537219, 12 ga., 30" plain barrel choked full with a bright excellent bore. The barrel assembly retains 92% original blue showing fading, light operational wear, and minor scratches and handling marks while the receiver is closer to 97% original blue with some light wear or handling marks. Both bolt and carrier show light operational wear and remain bright with very light oxidation staining on the carrier. The smooth walnut pistolgrip stock rates very good with light handling marks, more prominent near the toe, with the original buttplate intact; the grooved flat bottom forend rates very good as refinished with heavy varnish and some flakes. Barrel and receiver do not match and the barrel mounts loosely to the frame with a small gap and the mag tube does not rotate, otherwise the action seems to function properly mechanically; the draw collar no doubt needs some attention for proper barrel mounting. (3A10455-483) {C&R} (200/400) Est. 200 - 400

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
28	<p>Unmarked Single Barrel Percussion Fowler with Ashmore Lock About 20 bore, 37" part round part octagon barrel with an oxidized bore. All of the iron surfaces are a dull plum brown patina with a bit of wear to pewter on some of the high edges or contact points, also with scattered surface oxidation. The hammer shows some minor pitting and a bit of cleaning, its retaining screw is a replacement and the back action lockplate shows some very light foliate engraving and is marked "Richd Ashmore & Son". The stock may be cherry or some manner of maple and rates perhaps very good with numerous length-wise cracks here and there and a replaced chip to the right of the tang above the lock, a small divot missing at the toe. The pewter or lead noseclip is a later replacement which was poured at some point after the nose of the stock had cracked, the pewter or lead running down into the crack which extends to the wedge escutcheon. The lock functions mechanically, the half cock notch is worn, the tang of the buttplate sits proud and an antique ramrod is included. (3A10635-8) (ANTIQUÉ) (150/250) Est. 150 - 250</p>
29	<p>Unmarked Belgian Percussion Fusil-Fowler About 20 bore, 41 3/4 part octagon part round barrel with an oxidized bore. The Belgian proved barrel is a plum and dark gray patina showing some streaks of pewter and sparsely scattered light oxidation, with pitting prominent in the area of the nipple barrel. The percussion converted lock shows light engraving at its rear and some moderate pitting beneath the nipple barrel, the hammer completely unadorned; the lock may be marked "Adams" but it is difficult to read. Contemporary restocked in walnut, the balance of the hardware is an oxidized plum brown patina with some areas cleaned bright and the walnut stock has very generous proportions and was stocked by someone learning their craft. There is a scant left side cheekpiece and the barrel is retained with simple pins, the stock rating perhaps very good. There is some synthetic filler around the triggerguard front extension, a crack atop the comb and a large 5" area of synthetic filler on the right of the buttplate tang. The lock functions mechanically but the half cock is worn. A great over-the-mantle candidate. (3A10635-9) (ANTIQUÉ) (150/250) Est. 150 - 250</p>
30	<p>Unmarked German Zimmerstutzen Rifle About 5.6mm, 7" rifled bore rating very fine to excellent with a 28" octagon "barrel". The metal surfaces on this unmarked Zimmerstutzen retain perhaps 95% later buffed hot immersion blue. The barrel shows remnants of scattered pinprick pitting beneath the new finish with a filled hole here or there on its underside. The European walnut buttstock and forend rate very good to fine with light handling marks and dings from the years. The stock shows checkering at wrist and palm area with very light incise accents and a right-side thumbrest with deeply scooped cheekpiece. The forearm shows a bit of checkering and a diamond-shaped maple patch or inlay along its bottom 3 1/2" long. There is a Lyman bead front sight replacing the original German front and an adjustable diopter style rear without aperture is present in the rear seat. The arm features double set triggers and seems to function properly mechanically, the pivoting breech is captive and not removable so it cannot be lost. There is a knurled cleaning rod present under the barrel. (3A6520-1078) (C&R) [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300</p>
31	<p>U.S. Maynard Primer Converted Model 1816 Rifle-Musket by Frankford Arsenal .69 cal., 42" rifled barrel with an oxidized bore. The metal surfaces of this 1858-dated rifle-musket are primarily a soft plum brown patina with pewter undertones, the muzzle in some areas of the lock a dull pewter gray patina, with scattered surface oxidation. The barrel and tang markings are slightly obscured by oxidation, the Remington Arms lock markings are present and readable. The walnut stock remains very good to perhaps near fine with overall light dings and handling marks from the years, the edges of the stock flats slightly softened and a thin lengthy sliver missing the front of the ramrod channel. The lock functions properly mechanically and the parts are present for the internal tape priming mechanism which seems to function also; what is likely the original ramrod is present. (3A6520-3518) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900</p>

Lot	Title/Description
32	<p>Unmarked Heavy Barrel Percussion Target Rifle About .54 cal., 28" heavy octagon barrel 1.580" across the flats, with a bright about excellent bore which shows a couple spots of very light pitting. Strangely unmarked, but of quality construction, the arm was fitted with a false muzzle which is no longer present and shows a bit of light pitting right at the muzzle. The barrel is a pewter patina with some sparsely scattered oxidation staining and a heavy patent breech at rear with lightly sculpted nipple bolster. The barrel and breech do not mate up precisely, the barrel "turned by" just slightly as the flats and corners do not match up; the barrel also shows numerous very well-camouflage plugged holes from scope mounts or other sighting systems over the years. The back action lock is completely unmarked and there is a bit of light engraving on the hammer. There is a brass single spur triggerguard and faceted buttplate which show remnants of some silver wash. The stock appears to be English walnut with a nice flared left side cheekpiece. It was lightly cleaned years ago but retains minor dings and handling marks and rates very fine. Rifle features double set triggers and the back action lock does not hold at full cock. The rifle is currently sighted with a modern Navy Arms 4x15 brass tube telescopic sight in modern mounts with crosshair reticle and serviceable optics. (3A6520-1835) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700</p>
33	<p>J.P. McCoy Fullstock Flintlock Sporting Rifle About .45 cal., 33 1/2" octagon barrel with a bright excellent bore. This 90-era muzzleloader remains in very fine condition showing little careful use. The barrel retains nearly all of its slightly rough plum brown finish with the original maker-supplied sights in place. The lock features a waterproof pan with bridled frizzen and serpentine cock. Has a simple brass ramrod thimbles, faceted buttplate and single spur triggerguard; this is somewhat plainer-example made without a noseclip. The maple stock rates very fine to excellent showing a few very sparsely scattered very light dings here or there. Equipped with double set triggers, the rifle seems to function properly mechanically. (3A9100-1023) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600</p>
34	<p>Pittsburgh Percussion Fullstock Target Rifle by Johnston About 50 cal., 38" heavy octagon barrel, 1 1/4" across the flats, with an about very good to perhaps near fine lightly oxidized bore showing strong rifling. The barrel retains an older overall plum brown finish with a bit of wear to pewter on the sharp edges, with a Lyman globe front sight, original flattop step-adjustable rear sight and a Redfield target sight mounted to the tang by a modern steel mount. The barrel is marked on the left diagonal flat "Pittsburgh/JH Johnston" and the arm features a Lehman-marked lock; the lock is a similar patina as the barrel. Has brass noseclip, faceted thimbles and tailpiece, dual spur triggerguard with simple toeplate and faceted buttplate. There is a somewhat ornate pierced sideplate with dual hearts and a pendulum-shaped patchbox present. The maple stock rates otherwise very good showing a light cleaning years ago, with the expected overall dings and handling mark from the years, showing a lengthy crack from the toeplate along the left of wrist forward and a crack from the left of the triggerplate through the wrist to the left of the tang, showing old pinned and screwed repairs, no adhesive is present and the crack will still flex. The arm is equipped with double set triggers and a single-acting lock without any half-cock notch, and a small brass flash plate has been fitted beneath the nipple barrel to protect the stock. An antique candy-striped ramrod is present. Please note that if you are bidding on this arm remotely, the integrity of the wrist repair cannot be guaranteed and may vibrate apart during shipping; by bidding on this arm you assume all risk for the wrist crack if the arm is to be shipped. (3A6520-1850) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600</p>

Lot	Title/Description
35	<p>Remington Gutta Percha Rifle Cane .38 cal percussion, 10" rifled barrel with a very good bore showing light oxidation and some light pitting, and an overall shaft length to the breech of 28". The gutta-percha cane body rates very fine to perhaps near excellent with scattered minor handling marks or light scuffs about the surfaces. The body itself is very straight showing only a very slight curvature. The iron ferrule tip and front sight ring are a soft plum patina with numerous dings and tool marks overall, the Remington and patent marking somewhat obscured. The body of the cocking mechanism is covered in sheet silver, whether this is factory or a repair to the original gutta percha section is unknown, however it appears very factory. It shows nice purple-tone tarnishing and the silver ferrule at its rear shows light borderline engraving. The original gutta percha head has been replaced by a forked piece of horn in the form of a deer antler, it shows a bit of light play but seems to be well-affixed. The mechanism is crisp and mechanically functional however the rear sight v-notch does not line up perfectly with the silver front sight bead, the body having turned slightly "by" with wear from the years. An interesting and pleasing example overall. (3B9100-1411) {ANTIQUE} [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500</p>
36	<p>French Shot Cane By Dumonthier About 11 mm CF shot, 26" barrel with a lightly oxidized bore. French gunsmith Joseph Celestin Dumonthier moved to Paris in 1844 and among other things, produced quality walking stick-cane guns with his patented quarter-turn breech (patented around 1870). The exterior wood shaft remains about very fine with one near full-length drying split and numerous smaller drying splits in the bottom 9" of the cane's shaft. A number of these show some synthetic repair, but the cracks are generally due to drying and shrinkage from the years. The lower half of the cane proper is a more russet finish while the upper portion more of a burnt orange, the wooden mechanism covering also showing a drying split. The conical friction-fit brass tip is in place on this example and the quarter-turn breechloading mechanism seems to function properly as-designed. The cane features a hooked buffalo horn handle, also with the normally seen drying crack from the years and the knurled metal ferrule between it and the mechanism body rotates properly and houses the spring-loaded flip-down trigger which trips the mechanism, which seems to function properly. Interestingly there is an old IRS-applied serial number on the interior of the action, perhaps from an earlier era when it was not realized Dumonthier arms are antique (he died in 1881). The breech mechanism is indeed marked "Dumonthier" with the small "TL" intertwined monogram trademark often seen right next to his name between small brackets. The overall length from tip of the muzzle cover to outer crook of the cane is 35 3/4" and the body is lightly warped in an upward fashion, precluding any thought of ever firing the arm. A very nice example from this ingenious and inventive French maker, known for his high quality novelty and combination arms. (3B9100-1513) {ANTIQUE} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900</p>
37	<p>French Shot Cane By Dumonthier About .44 cal CF shot, 27 3/8" barrel with a dark oxidized bore. Another quality walking stick-cane gun from French gunsmith Joseph Celestin Dumonthier of Paris. The arm features his patented quarter-turn breech (patented circa 1870), the bore measuring about .440", the body of the mechanism stamped "44" next to "Dumonthier" with the small "TL" intertwined monogram trademark seen adjacent his name. The exterior wood shaft remains about very fine with one near full-length drying split and one smaller drying split near the breech, the shaft showing shrinkage from the years, the brass color insert at the breech now sitting slightly proud of the wood. The cane body proper is an orange-caramel color, the varnish showing light flaking and overall very small scratches and handling marks from the years, some scuffing at the muzzle. The wooden cover over the mechanism portion is a lighter caramel hue and shows three small drying cracks and flaking of the finish. The conical friction-fit brass tip is not present the quarter-turn breechloading mechanism seems to open as-designed but it cannot be fired and the button-shaped trigger will not budge. The cane features a hooked stag horn handle with a drying crack right at the trigger mechanism which travels rearward for about 1", the nickel silver metal ferrule between it and the mechanism body rates fine. The overall length from tip of the muzzle to outer crook of the cane is 34 1/4" and the body is mostly straight showing a bit of wavy warping throughout its length. A rather nice example from this high-quality French maker, a professional gunsmith versed in antique arms repair could no doubt resurrect the mechanism in short order. (3B9100-566) {ANTIQUE} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500</p>

Lot	Title/Description
38	<p>Unmarked Austrian Double Hammer Buchsflinte Combination Gun serial #8116, 9.3R by 16 ga., 27" barrels with fine bores, the right mostly bright showing sharp rifling, the left with some scattered remnants of light pitting nearer the muzzle, choked extra full. The barrels are an overall dull gray and pewter patina with very sparsely scattered light oxidation here or there, the left side above the forearm showing wear to pewter and a few light pinprick pits. The underside of the barrels show Fertlach proofs for both black and smokeless powder, the left barrel marked "nicht fur kugel". There is light geometric engraving at the breeches, the rib neatly matted in a semicircular pattern with light engraving on the doll's head extension. The frame and back action lockplates are a tarnished pewter patina, the frame showing remnants of some very light pinprick pitting in the carry area. There is light open flowing scroll and geometric border decoration, the top of the frame neatly matted and the hammers with high sharply recurving "rabbit ear" spurs. The checkered capped pistolgrip European walnut buttstock rates very good as lightly cleaned years ago, the checkering somewhat worn, and the stock with light dings and handling marks. There is a rounded left side cheekpiece with shadowline and the gripcap shows some light insect damage, the length of pull from the front single set trigger to the smooth steel buttplate is 13 5/8". The fully checkered splinter forend rates very good with underlever release. The arm is sighted with a simple bead front, two leaf rear, one standing, one folding, has dual claw bases and a flip-up lollipop tang sight within the upper tang. The right lock will not hold on cock, the rebounding feature does not work on the left lock, and the firing pins have been removed (they are included and were stored in the shotgun barrel). The barrels exhibit the slightest lateral play with a tiny sliver of light visible. The underside of the rifle barrel is marked "9.3" however a 9.3 x 72 cartridge will not fit, sitting proud of the breech by roughly 1/4"; as with all arms of unknown caliber a competent gunsmith must make a chamber cast and determine caliber as well as determine the fitness of the arm for use or not. (3A9100-792) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700</p>
39	<p>JP Sauer & Son Double Hammer Buchsflinte Combination Gun serial #81330, 9.5R (.373" bore diameter) by 16 ga., 26 3/4" Krupp Flusstahl barrels with a good to perhaps near very good rifle bore which shows frosting in the grooves and light pitting its full length, the shotgun barrel rating fair to perhaps poor showing scattered pitting, scoring and heavier pitting in the front half nearer the muzzles. The barrels are a dark gray-blue patina with scattered oxidation and some very sparse light pitting. The frame and lockplates are a dull pewter patina with overall remnants of oxidation staining and light pinprick pitting. They show sparse open flowing scroll with matting atop the fences and each lockplate is maker marked. The checkered capped pistolgrip European walnut buttstock rates about very good as lightly cleaned years ago, the metal proud overall. It features a rounded left side cheekpiece, steel gripcap and a grooved aluminum Remington buttplate, the head of the stock rather dark from oil soaking. The splinter forend is similar showing more wear with the checkering chased and oxidation leaching around the forend release. There are European sling swivels installed and the arm is sighted with a simple bead front and two leaf rear, one standing one folding. The rebounding locks seem to function properly and the length of pull from the single set trigger is 14". The arm seems to lock up on-face with dual underbites and Greener crossbolt. As with all arms of unknown caliber a competent gunsmith must make a chamber cast and determine caliber as well as determine the fitness of the arm for use or not. (3A6520-3647) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600</p>
40	<p>Belgian Double Hammergun Marked W.H. Hamilton serial #38162, 12 ga., 30" twist steel barrels choked about improved cylinder and modified, with good to perhaps near very good bores which show pitting their full length. All of the metal surfaces are primarily a deep gunmetal gray and plum brown patina with scattered oxidation and light pitting about the surfaces. The checkered round knob European walnut buttstock rates good to perhaps very good with overall flaking varnish and handling marks from the years, there are dual 2" cracks on the left side of wrist and a smaller one at right. The rebounding locks seem to function, the barrels exhibit moderate play in all directions and are off-face considerably, the left hammer screw is a non-gun replacement. (3A6520-1692) {C&R} [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
41	W.W. Greener British Boxlock Double Shotgun serial #31836, 12 ga. (2 1/2"), 29 3/4" damascus twist barrels showing good to perhaps very good bores with pitting their full length and a shallow ding in the right tube. All of the metal surfaces are a deep tarnished pewter gray patina showing overall scattered oxidation staining and sparsely scattered light pitting. The frame is unadorned other than maker's name on left and right flats. The checkered round knob English walnut buttstock rates good to perhaps very good with overall dings and handling marks with the checkering worn to flattop and a 14" length of pull to the checkered horn buttplate. The forend rates about good and is worn nearly smooth with small chips and dings and no tip insert. The arm locks up tight on face and seems to function properly mechanically and may be a good restoration project. (3A6520-3456) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
42	Sharps Borchard Model 1878 Military Rifle serial #16066, 45-70 Govt, 32 1/4" barrel with an about very good bore which shows sharp rifling but with light pitting its full length. The metal surfaces retain a fading later polished blue, the barrel with overall oxidation staining and perhaps some sparsely scattered light pinprick pits here and there, showing tool marks from a vise midway down its length. The blue on the frame is strongest, the polish has left some of the left-side markings light. The straight grip walnut buttstock rates perhaps good, devoid of varnish, showing a few chips at its rear which is now without a buttplate, a couple drying cracks nearer the frame and near the heel with overall handling marks. The forearm has been shortened to just ahead of the rear band, the remaining portion rates very good. The action seems to function properly mechanically and the original sights are intact, there are two additional drilled holes just ahead of the frame which have been neatly plugged. (3A6520-2679) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
43	Belgian Underlever Double Hammer Parts Shotgun 12 ga., 30" barrels with poor bores. The metal surfaces are an overall oxidized brown patina with the lockplates marked "W Richards". The hammers are missing and it is likely other parts are as well. The barrels mount very loosely to the frame, the lever no longer locks up and a large hardware bolt holds barrels to frame. The straight grip European walnut buttstock rates good, now devoid of varnish, the checkering flat-topped and with light oxidation leaching in. (3A10768-28) {ANTIQUÉ} (40/80) Est. 40 - 80
44	Springfield Armory Model 1922M2 Sporter-Converted Rifle serial #11118, 22 LR, 24 1/2" Springfield Armory barrel with a bright excellent bore. The metal surfaces retain about 95% later buffed hot immersion blue, the barrel with scattered oxidation staining, the receiver drifting to plum. The bolt body and handle remain bright as chrome-plated, the front portion of the bolt is gray steel showing remnants of light pitting. The smooth pistolgrip American walnut Bishop stock has very generous dimensions with a high Monte Carlo and a rather large left-side cheekpiece with typical checkered plastic butt, pistolgrip cap and forend tip. There is a banded Redfield sporting front ramp with brass bead and hood in place and a Lyman 48C receiver sight is affixed at the rear. The stock itself rates about very good with a lengthy 3" crack at the rear of the tang and the area beneath the current receiver sight deeply inletted for a previous receiver sight with long-range staff, a bit of synthetic filler in this area. Interestingly, serial #11119 dual-shipped to the New Jersey National Guard in June 1932 and September 1934. (3A9100-1502) {MODERN} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
45	Winchester Model 52 Bolt Action Rifle serial #16779, 22 LR, 28" barrel with a bright very fine to excellent bore. The barreled action retains perhaps 70% original blue, the balance toned to a dark gray-blue, the receiver more of a plum, with overall very light surface oxidation and the requisite handling marks. The bottom metal is now a soft plum brown with toning to pewter on the high edges, the screws showing some slot damage. The smooth pistolgrip American walnut buttstock rates about very good with overall light dings and handling marks with a 5" crack on the underside of forearm ahead of the action screw, some plastic wood filler stuck in the crack, and a 1" chip missing at right of receiver to the rear of the bolt handle cut. There is a Lyman globe front sight in place with factory rear, the barrel has been drilled and tapped for steel target blocks (they are not present); no magazine is present. There is a small glob of soft solder on the magazine release button and the rear bolt lug has been removed. (3A6520-2675) {C&R} [Richard "Stretch" Kennedy Collection] (350/500) Est. 350 - 500

Lot	Title/Description
46	German Scalloped Boxlock Drilling by Miller and Val Greiss serial #3604, 16 ga. x 8x57R, 26 5/8" Prima Krupp Stahl barrels with bright excellent bores. The barrels retain 97% original blue with only light even fading and a few minor handling marks. The frame is primarily a silvery case-hardened patina with generous colors atop the action flanking the top lever. It features tight Germanic scroll and geometric bordering in perhaps 70% coverage. The checkered round knob pistolgrip French walnut buttstock rates excellent as very neatly refinished, the splinter forend with scant Schnabel tip is identical. The checkering remains crisp on both and the buttstock features a neat little pinched comb and rounded left side cheekpiece showing a 13 15/16 length of pull over the neatly fitted solid rubber Ruger pad. Amenities include a single set front trigger, pin-style cocking indicators, auxiliary tang-mounted lever for selection of the rifle barrel and a nice flip-up tang sight which raises neatly between the split checkered safety. The arm is sighted with a simple silver bead front sight and automatic flip-up rear when the rifle barrel is selected. The neatly matted rib is maker marked "Miller & Val Greiss Munchen" and shows light engraving at the breaches with Prussian Eagle surmounting the Krupp steel markings. The arm locks up tight on face and seems to function well mechanically and is equipped with extractors, dual underbites and Greener crossbolt. A few of the screws show some slot damage. A classic drilling with very nice amenities. (3B9100-897) {C&R} [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500
47	Imman Meffert Boxlock Drilling serial #37421, 16 ga. over your choice of re-barreled chambering. 26 3/4" Flusstahl barrels choked a light full and a tight full, with about very good bores which show scattered pitting, more prominent in the right tube. The bottom rifle barrel shows a moderate bulge about one third of the way down its length and two very prominent drilled holes which go right into the bore, from an incompetent craftsman installing a sling swivel base, the barrel obviously will require replacement. The barrels are an overall dull gray-blue faded patina with some scattered light oxidation and light handling marks. The rib is maker marked and there are light bands of engraving at the rear. The frame is a dull pewter gunmetal patina showing some speckles of silvery case-hardening here and there and loose open flowing scroll with geometric borderline engraving in perhaps 20% coverage. The checkered capped pistolgrip European walnut buttstock features a rounded left side cheekpiece and will need to be replaced as it was broken through the wrist, currently repaired with steel crossbolts. The splinter style forend rates about good and is worn smooth, remnants of the checkering lightly visible. The arm features pin-style cocking indicators and single set front trigger and top tang barrel selector with a left-side Greener-style safety. It would appear as though the rifle barrel selector has been disabled and its firing pin removed, the shotgun barrels will fire in either position, regardless of how the barrel selector is manipulated. The gun seems to lock up on face with dual underbites and Greener crossbolt which is at the end of its travel. Has simple silver front bead and manual flip-up rear sight which is slightly bent. (3A6520-3794) {C&R} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
48	J.P. Sauer Prussian Charles Daly Side Lever Double Hammer Drilling serial #44910, 10 ga. x 45-70 Govt, 30" star-pattern damascus and steel barrels, rating good to about very good with scattered pitting their full length, the rifle barrel rating fine with light frosting and sparse light pinprick pitting. The barrels are a two-tone brown and pewter patina showing some nice star pattern, with scattered oxidation staining about the surfaces, some light pitting at the muzzles, the rifle barrel a smooth plum brown. The frame and back action locks are a pewter and plum patina with some very light engraving around the hinge pin, each lockplate is maker marked. The checkered round knob pistolgrip buttstock rates fair to good, showing an old sanding and refinishing years ago which has left the checkering smooth and the metal slightly proud, the head of the stock dark and a small chip missing from the left of the long tang triggerguard. The splinter forend is similar with some dings and remnants of the checkering. There is a period-fitted redhead recoil pad giving a 13 1/2" length of pull. The locks are not functional and will not hold at cock, the root of the triggerguard shows an old brazed repair, the tang mounted flip-up sight is no longer present, its hole filled with lead and the tang itself showing an old welded repair, the barrels locking up loosely with play in all directions and off-face. There is a simple blade front sight and a replacement Savage 99 step-elevator rear fitted to the rib. The under barrel is indeed marked "Patr 45-70. 3SB. 28, 8 BL" and the Sauer standing hunter can be seen on both of the shotguns barrel flats. (3A6520-3099) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600

Lot	Title/Description
49	<p>U.S. Model 1816 Flintlock Musket by Springfield Armory .69 cal., 42" barrel with a moderately oxidized bore. The barrel on this Type II musket is primarily a plum brown patina showing light oxidation its full length with the bands a pewter gray, the two rear bands each with a peened-over slightly rolled rear edge from impact marks, no doubt from removal over the years. The barrel shows appropriate Eagle Head and P firing proofs with the tang dated 1830 and is in the process of being reconverted to flint, there is currently no touchhole drilled. The lockplate is a dull pewter gray and correctly marked and with an 1830 date, and the pan and frizzen spring appear original, while the cock and its component parts and the frizzen appear to be antiqued modern replacements. The balance of the iron surfaces are pewter with the buttplate being slightly oxidized. The walnut stock rates very fine with good left side cartouches, one a circled "A/3" marking, an additional small cartouche to the rear of the triggerguard tang. Unfortunately, there is a lengthy crack from the front of the right stock flat to the triggerguard with a sliver of that missing and the lock plate fitting slightly askew in the inletting, the hammer will not budge. There are three neatly stamped "G.A.McFadden" stampings, using a one-piece stamp, one each at left and right of butt and another on the stock flat beneath the inspectors markings; what is likely the original ramrod is present. An attractive model 1816 that needs just a bit of attention. (3A9100-1221) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700</p>
50	<p>U.S. Model 1868 Rifle by Springfield Armory serial #2258, 50-70 Govt., 32 1/2" barrel with a fine bore which shows sharp rifling but with a few scattered speckles of oxidation or light pitting. Very nicely refinished, the barrel, frame, bands, triggerguard and buttplate are a bright silvery "Armory bright" finish showing some remnants of light oxidation staining here were there, very sparsely scattered about the surfaces. The breechblock is a mottled hot immersion blue, showing a purple-tone on the areas which retain case-hardening, it is dated 1869 above the eaglehead and U.S. markings. The 1863-dated lockplate and its hammer show vibrant restored color case-hardening, the Eagle somewhat light as well as the U.S. Springfield marking, numerous sources mention however that the arms were finished Armory bright, with no bluing (also clearly with no color case-hardening). The smooth walnut stock rates very fine to perhaps excellent, also as refinished, retaining some minor dings and handling marks beneath, with a few since the refinish, the left side cartouches very light. The lock seems to function properly mechanically and the appropriate cleaning rod is included. (3A9100-1027) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800</p>
51	<p>Lefever Arms G-Grade Sidelock Double Shotgun serial #61617, 12 ga., 30" damascus barrels choked about improved cylinder and modified, the left tube with a number of small dings. The barrels show only scant remnants of their star and foliate damascus pattern, the balance a soft oxidized brown patina with some scattered active surface oxidation. The frame and lockplates are a primarily smooth plum and pewter with a few spots of light oxidation scattered about the surfaces, more prominent at the rounded carry point at the front of the frame. The checkered capped English walnut buttstock rates good, worn nearly smooth and devoid of varnish with light dings and handling marks and a 13 1/4" length of pull to a grooved hard rubber buttplate. The splinter forend rates fair-good and is fitted to the iron with some manner of plastic compound. The barrels seem to be on face however the top lever spring is broken or missing as it has no tension, the locks however seem to function properly. An about very good medium grade Lefever that might be worth some restoration work. (3A10635-17) {C&R} (250/500) Est. 250 - 500</p>
52	<p>British Pattern 1853 Enfield Rifle by Tower .577 cal., 39" barrel with a heavily oxidized bore. The barrel is an overall plum brown patina which shows scattered oxidation, a bit more moderate in the flash area at the nipple, the left side proofs slightly obscured from the years and showing some tool marks as well, likely from a vise. The front sight is indeed intact however the rear sight has been removed. The Tower-marked and 1862 dated lock is a soft brown oxidized patina with oxidation and light pitting, the markings light but evident. The bands show some minor oxidation as well with the brass furniture toned to a tarnished ocher patina, the sling swivels are no longer present. The English walnut stock rates about very good with overall minor dings and handling marks, showing some soot, and scattered paint splatter here and there from the years, it retains good edges with a few minor chips or slivers missing here and there, primarily along the vacant ramrod channel; a drying check through a knot at the butt has obscured the stock makers marking. The lock seems to function properly mechanically. (3A10635-2) {ANTIQUÉ} (600/800) Est. 600 - 800</p>

Lot	Title/Description
53	<p>Rare Winchester Model 40 Deluxe Skeet Semi-Automatic Shotgun serial #339, 12 ga., 23 1/4" plain barrel to the end of the factory installed Lyman Cutts compensator, currently fitted with a spreader choke, with a bright excellent bore which shows a bit of stubborn wad residue nearer the breech. The metal surfaces retain perhaps 40% original blue, the barrel toned primarily to a smooth plum with some remnants of light pitting about midway down its length, the receiver showing wear to pewter with the minor handling marks that come from the years. The deluxe checkered capped pistolgrip buttstock rates perhaps very good with some lovely grain figure and much original varnish, with the expected overall light dings and handling marks from the years, the original Winchester buttplate and gripcap intact. The checkered semi beavertail style forend is similar showing perhaps a bit more wear and a few more dings. The barrel is correctly un-marked for choke as it is fitted with a factory Cutts, the mechanism seems to work properly although very sluggish, occasionally the bolt hanging up. George Madis states that only 37 of these checkered wood Deluxe Skeets were ever made. (3A10574-51) {C&R} (800/1200) Est. 800 - 1,200</p>
54	<p>Remington Model 1893 Side Cocking Shotgun serial #70004, 12 ga., 30" plain barrel choked full with a good to perhaps near very good bore which shows pitting its full length. The metal surfaces are a mottled dark gray-blue cold-applied blue patina showing some remnants of light oxidation staining and perhaps a scattered pinprick pit beneath. The smooth walnut pistolgrip buttstock and splinter style forend rate about very good as lightly refinished years ago, showing remnants of light dings, scratches or handling marks, the toe of the stock with a sanded-over chip which has also affected the buttplate. The gun exhibits lateral barrel play and otherwise seems to function properly mechanically. (3A10574-90) {C&R} (50/100) Est. 50 - 100</p>
55	<p>British Percussion Double by W Richards 12 ga., 26" twist steel barrels with about very good bores which are mostly bright but show light pitting their full length. The barrels are a pleasing plum brown twist showing light remnants of the pattern their full length, the concave rib maker marked. The lockplates and tang show light open English scroll which continues onto the hammer flats, each plate maker marked "W Richards", all a pewter gray patina. The balance of the iron hardware is a similar pewter patina with engraving on the long tang of the butt, bow of the guard and the triggerplate with a pineapple finial front extension. The checkered straight grip English walnut buttstock rates very good as lightly cleaned years ago, the checkering is flat-top, there is a small chip at the toe and the buttplate sits slightly proud. There is an octagonal brass plate atop the wrist engraved with a capital letter "P". The hammers seem to be in time although the nipples are later replacements and the locks seem to function mechanically; there is an antique ramrod included. (3A10574-58) {ANTIQUÉ} (300/500) Est. 300 - 500</p>
56	<p>British Percussion Double by W&C Scott & Son 12 ga., 29 1/2" barrels with lightly oxidized good to perhaps very good plus bores. All of the metal surfaces are a dull pewter patina and are generally smooth, the barrels showing scant damascus twist pattern their full length, also with scattered oxidation staining and perhaps a scattered pit here or there. The back-action locks, hammer flats, tang and balance of metal surfaces show some light, loose open scroll engraving, each lockplate maker marked. The straight grip English walnut buttstock rates very good as refinished many years ago, the checkering now flat-top, with overall light dings and handling marks, the buttplate sitting proud. The hammers are slightly out of time at half cock, in time at full cock, and the locks seem to operate properly. The nipples show damage and there is an antique replacement ramrod included. (3A10574-59) {ANTIQUÉ} (200/300) Est. 200 - 300</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
57	Rare Winchester Match Gun Double Hammer Shotgun serial #28470, 12 ga., 25" inexpertly shortened barrels, unchoked, showing about good bores with light and moderate pitting their full length. All of the metal surfaces are a dull pewter gray patina with overall remnants of light oxidation staining, light pitting, a few areas which may be a bit more moderate. The barrels show some scant damascus pattern and are maker marked on the rib "Winchester Repeating Arms Co. Match Gun New Haven Conn USA" and are of course British proved on their underside. The fences, lockplates, hammers, frame and bow of the guard all show light open flowing scroll engraving, the plates maker marked similarly to the barrel rib, some of the engraving obscured by the pitting. The checkered round knob English walnut buttstock rates good plus to perhaps near very good, showing a repair to a break through the wrist behind the upper tang, the crack extending from left to right lockplates. The checkering is worn, there are overall light dings and handling marks and the original checkered hard rubber buttplate remains in place with a small chip at the toe. The forend shows more wear and is worn nearly smooth with its ebony insert intact. The hammers are slightly out of time, the right hammer with the tip of its spur broken off, the locks seem to however function properly mechanically, the right hammer hanging up slightly. The barrels are off face and exhibit play in all directions, a few of the screws show slot damage. A rare shotgun that may be worthy of some conservation efforts. (3B10574-42) {ANTIQUÉ} (700/900) Est. 700 - 900
58	Winchester Model 63 Semi-Auto Rifle serial #7053, 22 LR, 20" barrel, threaded at the muzzle, with a bright very fine bore. The metal surfaces are an even mix of pewter gray and dark gray-blue fading original blue patina with overall scattered light oxidation staining. The smooth walnut pistolgrip buttstock and forend rate good to perhaps very good with overall scratches, handling marks and flaked varnish, a bit more prominent on left of butt and at buttplate. What are likely the original open sights are intact, the barrel is drilled and tapped just ahead of the rear sight for a scope base (not present) and the receiver has been neatly drilled and tapped for a Bausch & Lomb quick-detach ring set which mounts a Balvar 2.5-8 telescopic sight with tapered crosshair reticle and bright excellent optics, the scope itself rating fine with some light wear. The gun seems to function properly mechanically and is an interesting vintage scoped rig. (3AS10574-187) {C&R} (400/600) Est. 400 - 600
59	British Double Hammergun By W&C Scott & Son serial #28457, 12 ga. (2 5/8"), 30" damascus steel barrels choked about a light full in both, showing fine bores which show remnants of some light pinprick pitting, a few a bit more moderate near the muzzles. The barrels show a fading plum brown and contrasting gray star damascus pattern for most of their lengths, the concave rib marked "W & C Scott & Son Makers & Patentees London", with some scattered oxidation staining or a light handling mark here or there. The bar action locks and frame are a pleasing smooth plum case-hardened patina with some generous trace colors in the hidden areas around the hammers and beneath the top lever. They show light tight English scroll front and rear, the hammers unadorned, the triggerplate scroll engraved as well, each lockplate maker marked. The checkered round knob English walnut buttstock rates about very good with overall light dings and handling marks, the silver oval monogram plate along the toeline is un-engraved. The forend rates good with slivers missing at the nose left and right, the checkering showing more wear and the patent Scott lever release metal showing the same tight flowing scroll. The length of pull to the grooved horn buttplate is 13 3/4" showing drops of 1 7/8" and 3" and the gun locks up tightly on face with the top lever about dead center; there is the very beginning of a tight 1/2" crack beneath the right lockplate, it will not flex. The lockplates function as designed and the hammers appear to be in time, the barrel hinge screw itself shows some moderate slot damage and is slightly rotated counterclockwise. Still a handsome W&C Scott & Son hammer double which no doubt still has field time left. (3B10574-60) {ANTIQUÉ} (700/900) Est. 700 - 900

Lot	Title/Description
60	Custom Ithaca Lefever Nitro Special Boxlock Double Shotgun serial #117093, 12 ga., 28" barrels choked modified and full with bright very fine to near excellent bores, the right tube showing a small ding about 5" from the muzzles. All of the metal surfaces on this interesting Ithaca Gun LeFever are a smooth pewter gunmetal gray patina, the barrels showing remnants of some oxidation staining here and there with a few very minor pinprick pits. The rear chamber area has been engraved with some very light flowing open scroll with two very long thin ribbons, this all accented by light stippling for about 11". The frame has had sideplates added at its rear and shows the same very wide open flowing scroll with background punch dot shading setting off waterfowl scenes of flying ducks left, right and on belly of frame, the top lever and triggerguard bow similarly embellished. The round knob pistolgrip buttstock and splinter style forend rate otherwise excellent as very neatly refinished years ago, the butt with a 3/4" crack at left upper edge of the head, which is tight. The grip and forearm have been embellished with carved open flowing scroll with the same fine background punch-dot stippling as gripping surface. The barrels lock up tightly on-face, the gun seems to operate properly mechanically and the length of pull to the added Uncle Mike's recoil pad is 14 1/2" showing drops of 1 7/8" and 3". An interesting old Nitro Special that was embellished by some fledgling gunsmith, that likely would still do very well afield. (3B10574-68) {C&R} (300/500) Est. 300 - 500
61	Winchester Model 12 Barreled Action serial #1650933, 12 ga., 30" plain barrel choked full with a bright excellent bore. The metal surfaces retain 75% fading original blue, strongest on the barrel assembly. The bolt shows light operational wear and the carrier shows remnants of some jewelry with light oxidation, the trigger group is from a different Model 12 and has been chrome plated. There is no wood present, no safety nor its attendant parts, and no trigger assembly screw. The action seems to function properly but is not guaranteed. Barrel and receiver are numbered alike. (3A10454-50) {FIREARM} (100/200) Est. 100 - 200
62	Winchester Model 12 Barreled Action serial #1485560, 12 ga., 30" plain barrel choked full with a bright excellent bore. The metal surfaces retain 70% fading original blue, strongest on the barrel. The bolt shows light operational wear and was polished bright and the carrier shows light oxidation staining; the trigger assembly does not fit perfectly and is likely from another Model 12. There is no wood present and no safety nor its attendant parts. The action seems to function properly but is not guaranteed. Barrel and receiver are numbered alike. (3A10454-69) {FIREARM} (100/200) Est. 100 - 200
63	Winchester Model 12 Barreled Action serial #770644, 12 ga., 30" plain barrel choked full with a bright excellent bore. The metal surfaces retain 60% fading original blue, the barrel shows light oxidation staining overall. The bolt shows light operational wear and the carrier shows light oxidation staining; the trigger assembly does not fit perfectly and is likely from another Model 12. There is no wood present and no safety nor its attendant parts. The action seems to function properly but is not guaranteed. Barrel and receiver are not numbered alike. (3A10454-70) {FIREARM} (100/200) Est. 100 - 200
64	Winchester Model 12 Barreled Action serial #788208, 12 ga., 30" plain barrel choked full with a bright fine bore showing some oxidation and a couple light wrinkles. The metal surfaces are a fading original gray blue and pewter patina, the receiver devoid of finish with oxidation staining. The bolt and the carrier show light operational wear and light oxidation staining; the trigger assembly does not fit perfectly and is likely from another Model 12. There is no wood present and no safety nor its attendant parts. The action seems to function properly but is not guaranteed. Barrel and receiver are numbered alike. (3A10454-55) {FIREARM} (100/200) Est. 100 - 200
65	Winchester Model 12 Barreled Action serial #694364, 12 ga., 30" plain barrel choked full with a bright excellent bore. The barreled action is a fading original gray blue and pewter patina, the receiver devoid of finish showing the beginning of some dressing or polishing, with surface oxidation. The bolt shows light operational wear and light oxidation staining, the carrier polished mirror-bright; the trigger assembly does not fit perfectly and is likely from another Model 12. There is no wood present and no safety nor its attendant parts. The action seems to function properly but is not guaranteed. Barrel and receiver are numbered alike. (3A10454-98) {FIREARM} (100/200) Est. 100 - 200

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
66	French Model 1935A Semi-Auto Pistol by SACM serial #J3292A, 7.65 French Long, 4 1/4" barrel with a good bore showing some oxidation and frosting in the grooves and otherwise strong rifling throughout. The metal surfaces of this pistol are a mix of deep gray arsenal Parkerized finish and streaks of black enamel finish along the slide showing silvering along the high edges and light handling marks. The police-added lanyard ring along the left side heel has been removed and the markings remain mostly intact and strong. The black checkered Bakelite grips remain in about very good condition showing some moderate scuffs and dings. One original magazine is included and the action seems to function well mechanically. (13A9100-359) {C&R} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
67	Remington Model 51 Semi-Auto Pistol serial #PA39247, 380 ACP, 3 1/2" barrel with a bright excellent bore. The metal surfaces of this pistol retain about 95% original blue that is taking on the familiar deep plum tone under bright light showing some scattered light handling marks, subtle edge wear and some spots of light oxidation mostly along the top of the slide. The barrel remains mostly bright showing a little mild oxidation staining at the breech while the small parts show fine fire blue and the magazine release retains nice case-hardened colors. All markings are intact and the black checkered hard rubber grips remain in near excellent condition showing some scattered light handling marks and minor ingrained soiling. The pistol includes one original magazine though it is mismatched and for a 32 ACP-chambered Model 51. The action otherwise seems to function well mechanically. A nice example of these popular and attractive vintage pocket pistols. (13B9100-651) {C&R} [Richard "Stretch" Kennedy Collection] (400/500) Est. 400 - 500
68	Colt Model 1908 Pocket Hammerless Semi-Auto Pistol with Northampton Police Department Marking serial #27758, 380 ACP, 3 3/4" barrel with a bright very fine to near excellent bore showing a few scattered light freckles and otherwise crisp rifling. The metal surfaces of this 1916-made pistol have mostly toned to a mix of deep pewter gunmetal and gray-brown patina showing some scattered light oxidation staining and handling marks with some remnants of original bright blue lurking about the protected areas. The trigger and safety lever retain strong original blue and all markings remain intact and strong including the factory roll-marked "N.P.D." on the right side of the frame consistent with other Northampton Police Department examples purchased in 1916. The black checkered hard rubber grips remain in about very good plus condition showing some light handling marks and the right panel with some moderate smoothing along the base. The pistol includes one reproduction "MEXICO"-marked magazine and the action seems to function well mechanically. A somewhat salty example for the police firearms collector. (13B9100-1100) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
69	Pieper Bayard Model 1908 Semi-Auto Pistol serial #76253, 380 ACP, 2 1/4" barrel with a fair bore showing light oxidation and moderate frosting throughout the grooves and otherwise good rifling. The metal surfaces of this pistol retain perhaps 50% original blue with the balance thinning and toning to pewter gunmetal patina along with some scattered fine pinprick pitting and mild oxidation staining. All markings remain intact and strong and the checkered horn grips remain in good condition showing a number of thin cracks around the screw holes and overall fine crackling from the years, otherwise retaining nice "BAYARD" markings. One original 5-round magazine in very good condition is included. The action will require mechanical attention as safety appears to be non-functional and there is no firing pin present. (13A9100-167) {C&R} [Richard "Stretch" Kennedy Collection] (150/250) Est. 150 - 250
70	Walther Model 8 Semi-Auto Pistol with Richter Retailer Markings serial #730323, 25 ACP, 3" barrel with a very good bore showing some moderate frosting in the grooves and otherwise strong rifling throughout. The metal surfaces of this pistol retain about 65-70% original bright blue showing some overall thinning and light handling marks with most of the loss along the slide which shows light oxidation staining and some pinprick pitting along the sides, more prominent along the left. All markings remain intact and strong showing commercial "(Crown) / N" proofs and the left side slide is stamped with period German retailer marking "O. Richter Cottbus". The checkered black hard rubber grips with Walther banners and blue enameled medallions remain in very good plus condition right and about good condition left showing some scattered light dings and some chipping along the top edge of the left panel. Both grip panels are slightly warped and loosely fitted. One original magazine in very good plus condition is included and the action seems to function well mechanically. (13A9100-212) {C&R} [Richard "Stretch" Kennedy Collection] (250/350) Est. 250 - 350

Lot	Title/Description
71	Walther Model 9 Semi-Auto Pistol serial #566917, 25 ACP, 2" barrel with a mostly bright good bore showing some scattered fine pinprick pitting and freckling with otherwise strong rifling throughout. The metal surfaces of this pistol retain about 80% original bright blue showing moderate edge wear, some areas thinning to mild gray-brown patina and light handling marks. All markings remain intact and strong showing commercial "(Crown) / N" proofs and the black checkered hard rubber grips with Walther banner on the left panel and blued steel escutcheons remain in very fine condition showing some light handling marks. One original magazine in very good condition is included and the action seems to function well mechanically. (13A9100-316) {C&R} [Richard "Stretch" Kennedy Collection] (300/400) Est. 300 - 400
72	Deutsche Werke Orgies Semi-Auto Pistol serial #68850, 32 ACP, 3 1/2" barrel with a mostly bright very good bore showing some light oxidation in the grooves and otherwise strong rifling throughout. The metal surfaces retain about 90% original blue showing a little mild pitting and oxidation along the left side slide, scattered thinning and handling marks. The barrel remains mostly bright and the extractor shows some good fire blue while all markings remain intact and strong showing "GERMANY" mark on the frame. The smooth walnut grips with gold lion medallions remain in very fine condition showing a few light handling marks and the right panel exhibiting some minor play. One original nickel-plated magazine is included that shows some cracks and bends around the feed lips. The action otherwise seems to function well mechanically. (13A9100-737) {C&R} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
73	Mauser Model 1910 Semi-Auto Pistol serial #205589, 25 ACP, 3 1/8" barrel with a bright very fine bore showing a few hints of faint frosting and strong rifling throughout. The metal surfaces of this pistol retain about 95% older reapplied polished blue showing some scattered light handling marks and some areas taking on a slight plum-brown tone under bright light. The original markings remain mostly intact and strong showing "(Crown) / (Crown) / U" commercial proofs and the black checkered Bakelite grip remains in near excellent condition. The action will require a little mechanical attention as the safety catch button has lost its tension, though it can still be engaged with some careful fine manipulation. The action otherwise seems to function normally and one original magazine in very good plus condition is included. (13A9100-735) {C&R} [Richard "Stretch" Kennedy Collection] (150/250) Est. 150 - 250
74	Colt Model 1908 Pocket Hammerless Semi-Auto Pistol serial #34357, 380 ACP, 3 3/4" barrel with a bright excellent bore. The metal surfaces of this 1920-made pistol retain perhaps 50% original bright blue with the balance thinning and toning to a medium pewter gunmetal patina along with scattered handling marks and a few patches of moderate oxidation and light pitting mostly along the right side slide near the extractor. All markings remain intact and strong and the black checkered hard rubber grips remain in very good plus condition showing some light handling marks and mild smoothing. One original two-tone magazine in nice condition is included and the action seems to function well mechanically. This pistol may make for a fine shooter. (13A9100-221) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
75	Colt Model 1908 Pocket Hammerless Semi-Auto Pistol serial #51483, 380 ACP, 3 3/4" barrel with a bright very fine to perhaps near excellent bore showing a little faint oxidation in some areas of the grooves and otherwise crisp rifling. The metal surfaces of this 1921-made pistol retain about 60% original bright blue showing scattered thin scratches and some patches of cleaned light pitting toning to pewter here and there, a few small light dings also present along the slide. All markings are otherwise intact and strong and the black checkered hard rubber grips remain in very good condition showing overall mild smoothing and a small crack on the right panel behind the escutcheon. One original full-blued magazine in nice condition is included and the action seems to function well mechanically. This example may make for a fine shooter. (13B9100-1287) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
76	Savage Model 1917 Semi-Auto Pistol serial #237015, 32 ACP, 3 3/4" barrel with a bright excellent bore showing a couple tiny freckles and crisp rifling throughout. The metal surfaces of this pistol retain about 92-94% original blue showing some scattered mild thinning, handling marks and some very light oxidation staining along the gripstraps. The barrel remains mostly bright and the trigger shows nice case-hardened colors. The black checkered hard rubber grips remain in very fine condition showing some scattered light dings and handling marks. The trigger block safety bar is missing, a strangely common occurrence, and the manual safety lever is otherwise intact and functional. The action seems to function well mechanically and one original magazine is included. (13A9100-149) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
77	Mauser Model 1914 Semi-Auto Pistol serial #196023, 32 ACP, 3 1/2" barrel with a bright excellent bore. The metal surfaces of this pistol retain about 95% original blue showing some scattered mild thinning and high edge wear. The small parts retain a healthy amount of nice fire blue and all markings remain intact and crisp showing "(Crown) / (Crown) / U" commercial proofs. The checkered walnut grip remains in very good plus condition retaining strong original varnish with scattered light dings and handling marks. The serialized parts are matching, one original magazine is included and the action seems to function well mechanically. A very good Mauser pistol. (13A9100-140) {C&R} [Richard "Stretch" Kennedy Collection] (350/550) Est. 350 - 550
78	Belgian Double Action Pinfire Pocket Revolver serial #100, 7.65mm Pinfire, 3 3/8" octagon barrel with a partially bright about good bore showing scattered areas of light pitting and oxidation with strong rifling. The frame and barrel of this Lefauchaux-style revolver retain perhaps 40% original bright blue flaking to a pleasant gray-brown patina overall while the cylinder retains about 75% original bright blue showing lighter flaking. The small parts remain partially bright showing some mild oxidation staining and the cylinder shows an antique Belgian proof mark. The smooth walnut grips remain in very fine condition showing some scattered light handling marks and a small crack near a knot on the right panel. The action seems to function well mechanically in both single and double action with very good timing and lock-up. (13A9100-740) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (150/250) Est. 150 - 250
79	Smith & Wesson Victory Model Double Action Revolver with Australian Markings serial #V453000, 38 S&W, 5" barrel with a bright excellent bore. This revolver shows Australian military property markings and 1955 FTR refurbishment mark. The metal surfaces retain about 95% arsenal refurbished dark gray-green Parkerized finish showing some mild high edge and operational wear, minor thinning and some small areas of light pitting beneath the finish. The ejector rod retains good blue finish while the hammer and trigger retain a healthy amount of good case-hardened colors. The original markings remain mostly intact and strong and the left side frame shows a small Vega import mark. The checkered walnut grips with silver S&W medallions remain in about very good plus condition showing scattered light chipped points and handling marks, the right panel stamp-numbered to a different gun. The remaining numbered parts are matching and the action seems to function well mechanically. (13A9100-354) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
80	Manurhin P1 Semi-Auto Pistol serial #226059, 9mm, 5" barrel with a bright excellent bore. The metal surfaces of this French-made pistol retain about 97% original matte blue and black anodized finishes showing some scattered high edge and operational wear. All markings remain intact and strong, the right side frame showing a small AE Co. import mark and the left side frame with West German police rosette property mark. The right side frame shows a later-stamped spurious German Third Reich eagle firing proof stamp, some sort of later stamped crossed cannon stamp and the original St. Etienne proof mark. The black checkered plastic grips remain in very good condition showing some scattered light dings and handling marks. One original magazine is included and the action seems to function well mechanically. (13A9100-M39) {C&R} [Richard "Stretch" Kennedy Collection] (350/550) Est. 350 - 550

Lot	Title/Description
81	Colt Model 1903 Pocket Hammerless Semi-Auto Pistol serial #342710, 32 ACP, 3 3/4" barrel with a bright excellent bore. The metal surfaces of this 1920-made pistol retain about 95-96% original blue showing some scattered mild edge wear and light handling marks with a few small areas of pinprick pitting or light oxidation scattered about some of the high edges. All markings remain intact and strong and the black checkered hard rubber grips remain in near excellent condition showing just a few minor handling marks. One excellent condition two-tone magazine is included and the action seems to function well mechanically. (13B9100-190) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
82	Colt Model 1908 Vest Pocket Hammerless Semi-Auto Pistol serial #150139, 25 ACP, 2 1/8" barrel with a mostly bright very good bore showing some scattered fine oxidation and strong rifling throughout. The metal surfaces of this 1916-made pistol retain about 90% plus original blue showing some overall high edge wear, light handling marks and some sparsely scattered light oxidation speckling. The small parts retain generous vibrant case-hardened colors throughout, the back surface of the grip safety toned to a pleasant pewter gunmetal patina. All markings are intact and crisp and the checkered black hard rubber grips remain in near excellent condition showing some scattered light handling marks. This pistol includes its original dark purple paper-covered box, a pair of two-tone magazines, original "New Safety Device" pamphlet and instruction sheet. The box appears to be very faintly pencil-numbered matching the pistol along the base and remains in very good plus condition showing some light scuffing and edge wear and the blue end label is intact showing just a few light flakes. The paperwork is in similar condition showing a few small tears, minor flakes and light soiling. A very attractive ensemble for the Colt collector. (13B9100-M10) {C&R} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
83	Attractive Colt Model 1908 Vest Pocket Hammerless Semi-Auto Pistol serial #46007, 25 ACP, 2 1/8" barrel with a mostly bright very good bore showing some light oxidation and pinprick pitting in the grooves and otherwise strong rifling throughout. The metal surfaces of this 1911-made pistol retain about 96-97% original rich bright blue showing some very mild sharp edge wear, a few tiny dings and sparse oxidation speckles. There is one small area of light pinprick pitting along the front edge bow of the triggerguard and a few small areas of subtle imperfections in the polishing but the blue is undoubtedly original. The small parts retain generous fading case-hardened colors with the backstrap muting to pewter and the extractor, grip screw and magazine release show nice bright fire blue. All markings remain crisp and clear and the black checkered hard rubber grips remain in excellent condition showing just a couple tiny handling marks. One original two-tone magazine in excellent condition is included and the action seems to function well mechanically. Also included is a period purse holster showing some mild soiling and handling marks. A fine little 1908. (13B9100-327) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
84	Erma KGP68 Semi-Auto Pistol serial #00289, 32 ACP, 4" barrel with a bright excellent bore. The barrel and receiver of this early production 1968 proof-dated pistol retain about 95% original blue showing some scattered light handling marks and mild thinning. The alloy frame retains perhaps 75-80% original black finish thinning and flaking to gray with some scattered light dings and handling marks. The checkered walnut grips remain in very fine condition showing a few minor handling marks, one original magazine is included and the action seems to function well mechanically. (13A9100-1004) {C&R} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
85	Mauser Model 1914 Semi-Auto Pistol serial #346852, 32 ACP, 3 1/2" barrel with a bright excellent bore. The metal surfaces of this pistol retain about 85-90% original blue showing some overall thinning to mild gray-brown patina under bright light and scattered light handling marks while the small parts retain a healthy amount of nice bright fire blue. All markings are intact and strong showing "(Crown) / (Crown) / U" commercial proofs and the checkered walnut grip remains in about very good plus condition showing some flaking original varnish, scattered light dings and handling marks; the fit of the grip screws is a bit proud. One original magazine is included and the action seems to function well mechanically. (13A9100-1170) {C&R} [Richard "Stretch" Kennedy Collection] (300/400) Est. 300 - 400

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
86	Marble's Model 1908 Game Getter Gun Frame serial #9017. This is a complete frame assembly with no barrels present. The metal surfaces retain about 92% original blue showing some mild high edge wear, light handling marks and areas thinning to a pleasant plum-brown patina under bright light. The triggerguard and tang peep sight retain strong original bright blue and the hammer shows nice case-hardened colors with a little bit of mild oxidation speckling. The black checkered hard rubber grips remain in very fine condition showing some scattered light handling marks. The stock appears to be bent in "cast-on" slightly and retains about 96-97% original nickel finish and it locks up and secures well. The action seems to function well mechanically and the Game Getter website factory card scans show this serial number originally sold on March 29, 1917 to "New York Sptg. Gas Co." and the eventual owner actually did return to card to Marbles in 1919 and is listed as Frank S. Crane of Kingston, PA. (13B9100-1519) {FIREARM} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
87	Walther PP Super Semi-Auto Pistol serial #14787, 9x18 Ultra, 3 3/4" barrel with a bright excellent bore. The metal surfaces of this 1977 date-coded pistol retain about 96% original blue showing some scattered mild edge wear, light handling marks and a few areas of loss from some minor oxidation speckling that is very unobtrusive. All markings remain crisp and clear, the left side frame showing a small Interarms import mark and the right side shows what appears to be a canceled German State of Baden-Wurtemberg police marking. The checkered black plastic grips remain in good condition showing a few moderate scuffs, dings and mild smoothing. The pistol includes a factory case, manual, two original magazines and cleaning rod. A nice example of these interesting PP variants. (13A9100-M57) {MODERN} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
88	Smith & Wesson Victory Model Double Action Revolver serial #V468017, 38 Special, 4" barrel with a bright excellent bore. The metal surfaces of this revolver retain about 95% original Parkerized finish showing some scattered light handling marks, some operational wear along the cylinder and a few areas toning to a deep plum-brown patina under bright light. The ejector rod retains strong original blue while the hammer shows lovely vibrant case-hardened colors throughout. The colors on the trigger are a bit more mottled though still strong overall. All markings remain intact and strong showing small "P" stamp at the top left frame, underside barrel and rear cylinder and a small ordnance bomb on the base of the frame. The smooth walnut grips remain in very fine condition retaining strong oil finish with a few light scuffs and minor dings scattered about. The right panel is appropriately stamp-numbered matching and their fit is excellent. The remaining numbered parts are matching, the lanyard ring has been removed, and the action seems to function well mechanically with solid timing and lock-up. A solid Victory model for the martial collector. (13B9100-551) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
89	Colt Detective Special Double Action Revolver serial #M26248, 32 Colt New Police, 2" barrel with a bright excellent bore. The metal surfaces of this 1975-made revolver retain about 95% original blue showing some scattered high edge wear and light handling marks with a bit of oxidation freckling along the backstrap and bow of the triggerguard. The sides of the hammer are partially bright showing some mild gray oxidation staining. The checkered walnut grips remain in very good condition showing some scattered light dings and handling marks, the finish on the left grip is a bit darker and shows some flaking. The action seems to function well mechanically with solid timing and lock-up. (13B9100-193) {MODERN} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
90	Smith & Wesson 38 Safety Hammerless Revolver with Police Markings serial #212236, 38 S&W, 3 1/4" ribbed round barrel with a bright excellent bore. The metal surfaces of this revolver retain about 80% original bright blue with most of the loss due to some overall pleasant flaking to a mild plum-brown patina, more noticeable along the frame, also with some scattered light handling marks and a few errant freckles. The trigger retains some nice smoky case-hardened colors and all markings remain intact and crisp with the frontstrap very nicely engraved in bold letters "M.P.D.", no doubt a period police department marking. The black checkered hard rubber grips remain in very fine condition showing a few scattered very light dings and handling marks. The right panel is appropriately stamp-numbered matching the frame and their fit is excellent. The remaining serialized parts are matching, barrel-to-frame fit is solid and the action seems to function well mechanically with solid timing and lock-up. A nice example for the police firearms collector. (13B9100-176) {C&R} [Richard "Stretch" Kennedy Collection] (400/500) Est. 400 - 500

Lot	Title/Description
91	Smith & Wesson 38 Perfected Double Action Revolver serial #54715, 38 S&W, 4" ribbed round barrel with a mostly bright very good bore showing two small patches of old oxidation or light pitting and otherwise strong rifling throughout. This revolver shows factory star rework mark and April 1926 refurbishment date on the frame beneath the grip panel. The metal surfaces retain about 95% factory restored blue showing some scattered light handling marks, mild high edge wear and a few errant freckles. There is one more moderate small ding along the backstrap but it is unobtrusive. The hammer retains nice vibrant case-hardened colors throughout while the trigger is a bit more muted still with some nice colors. The markings remain unmolested and are completely intact and strong throughout. The black checkered hard rubber grips remain in very fine condition showing some scattered light handling marks and the number on the right panel is very faded and appears to be mismatched though the grips otherwise fit the frame quite well. The remaining serialized parts are matching, barrel-to-frame fit is solid and the action seems to function well mechanically with very good timing and lock-up. (13A9100-1069) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
92	Smith & Wesson 38/32 Terrier Double Action Revolver serial #55168, 38 S&W, 2" barrel with a bright excellent bore. The metal surfaces of this five-screw revolver retain about 95% original blue showing some mild high edge and operational wear, a few minor handling marks and some subtle thinning under bright light. The hammer and trigger retain strong vibrant case-hardened colors, the trigger with a bit of muting or subtle speckling. All markings remain crisp and clear and the checkered walnut grips with silver S&W medallions remain in very good condition showing a few light chipped points and a small crack along the top edge of each panel above the medallions. The right panel and other numbered parts are matching and the action seems to function well mechanically with very good timing and lock-up. (13B9100-374) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
93	Colt Police Positive Double Action Revolver serial #350799, 38 Special, 4" barrel with a bright excellent bore. The metal surfaces of this 1928-made revolver retain about 97% original blue showing some very mild operational wear and a few scattered light handling marks mostly along the backstrap, and the cylinder assembly retainer screw head shows some slot wear. The polished sides of the hammer remain mostly brilliant showing a few minor freckles and the ejector rod head retains vibrant case-hardened colors. All markings remain crisp and clear and the checkered walnut grips with silver Colt medallions remain in excellent condition showing a couple of tiny dings. They are un-numbered and their fit is excellent. The action seems to function well mechanically with very good timing and lock-up. (13A9100-110) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
94	Colt Official Police Double Action Revolver serial #543210, 32-20, 6" barrel with a bright near excellent bore. The metal surfaces of this 1929-made revolver retain about 85% original blue showing some overall high edge wear, light handling marks and operational wear, most of the loss due to some areas of loss and light oxidation staining along the sides of the barrel nearer the muzzle. The polished sides of the hammer remain mostly bright and all markings are crisp and clear. The revolver wears a set of later factory checkered walnut target grips with silver Colt medallions that remain in very good condition showing some scattered lightly chipped points, minor dings, and some small gaps in the fit. The action seems to function well mechanically with very good timing and lock-up. (13A9100-625) {MODERN} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
95	Smith & Wesson 38 Safety Hammerless Revolver serial #191339, 38 S&W, 6" ribbed round barrel with a mostly bright very good bore showing some light oxidation its full-length, a few areas of old light pitting and otherwise strong rifling throughout. The metal surfaces of this revolver retain about 94% original nickel finish showing some overall mild clouding and most of the loss due to some flaking and edge wear predominantly along the cylinder and a small area on the left side barrel, these areas also with a little minor oxidation staining. The triggerguard retains strong bright blue along the sides while the bow of the guard and the top latch are thinning and toning to gunmetal gray and the trigger shows some generous vibrant colors. The black checkered hard rubber grips remain in very good plus to very fine condition showing a few minor handling marks and the base of the left panel with showing some thin cracks. The right panel is mismatched numbered "333413" and their fit is otherwise very nice. There is a small ding on the front sight blade. The remaining serialized parts are matching, barrel-to-frame fit is solid and the action seems to function well mechanically with solid timing and lock-up. A nice example with the longer barrel. (13B9100-445) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
96	Smith & Wesson 38 Safety Hammerless Revolver serial #72372, 38 S&W, 3 1/4" ribbed round barrel with a partially bright fair bore showing patches of oxidation and light pitting its full-length and some good rifling. The metal surfaces of this revolver retain about 94% original nickel showing some scattered small flakes along the high edges, some light scratches and minor dings here and there. The triggerguard and small parts retain a healthy amount of original bright blue with the bow of the guard flaking to a pleasant mild gray-brown patina and the trigger shows generous case-hardened colors. All markings remain crisp and clear and the checkered black hard rubber grips remain in very fine condition showing some scattered light dings and handling marks. The left panel shows a faded patent date along the bottom edge and the right panel is scratch-numbered "77014", both otherwise fit the frame very nicely. The remaining serialized parts are matching, barrel-to-frame fit is solid and the action seems to function well mechanically with solid timing and lock-up. (13A9100-302) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (350/550) Est. 350 - 550
97	Smith & Wesson 38 Safety Hammerless Revolver serial #197353, 38 S&W, 3 1/4" ribbed round barrel with a bright excellent bore. This revolver shows factory star refurbishment mark and August 1944 date on the frame beneath the left grip panel. The metal surfaces retain about 99% factory restored bright blue showing just some sparsely scattered light handling marks and perhaps some remnants of fine pinprick pitting beneath the blue along the bow of the triggerguard that is very unobtrusive. The markings remain completely intact and strong and the trigger retains some attractive case-hardened colors muting somewhat overall to a pleasant smooth pewter. The checkered black hard rubber grips remain in very fine condition showing some scattered light dings and handling marks retaining nice fit and the right panel is appropriately stamp-numbered to the gun. The remaining serialized parts are matching, barrel-to-frame fit is solid and the action seems to function well mechanically with nice timing and lock-up. A nicely factory refurbished example that may make for a fine shooter. (13A9100-1070) {C&R} [Richard "Stretch" Kennedy Collection] (400/500) Est. 400 - 500
98	Remington New Model Pocket Percussion Revolver serial #4146, .31 cal, 3" octagon barrel with a fair-good bore showing light pitting and oxidation its full-length, some bright areas and good rifling. The metal surfaces have mostly toned to a pewter gunmetal patina no doubt lightly cleaned long ago showing some remnants of old oxidation staining and light pitting scattered about. The loading lever retains a few flakes of bright blue and the barrel markings remain mostly intact and strong, the "NEW MODEL" stamp mostly worn away. The smooth rosewood grips remain in about very good plus condition retaining remnants of original varnish with a crack along the base of the left panel and some chipping around the escutcheon of the right. The barrel is matching the frame and the action seems to function well mechanically with very good timing and lock-up. (13A9100-484) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (350/550) Est. 350 - 550

Lot	Title/Description
99	Smith & Wesson Third Model Ladysmith Revolver serial #15432, 22 RF, 3 1/2" barrel with a fair bore showing some light pitting and evident rifling, showing a noticeable crack in the breech end along the forcing cone. The metal surfaces are mostly a mild gray-brown and pewter gunmetal patina showing scattered old light pitting and oxidation staining with otherwise generous original bright blue here and there. The hammer and trigger show some remnants of smoky gray case-hardening and the markings remain mostly intact and strong. The smooth walnut grips with gold medallions remain in very good condition showing worn finish and darkening from the years along with some scattered light handling marks. The cylinder release head is a common hardware nut replacement and the action is generally functional though the trigger needs a little manual help resetting; in any event no thought should be given to its loading or firing considering the current state of the barrel. (13A9100-424) {C&R} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
100	Colt Model 1896 New Army Double Action Revolver serial #123130, 38 Long Colt, 6" barrel with a bright near excellent bore showing one very small spot of mild oxidation and otherwise crisp rifling throughout. The metal surfaces of this 1899-made commercial revolver retain about 85-90% original bright blue showing some scattered areas of mottled loss toning to gray-brown from oxidation staining, areas thinning under bright light and a patch of old oxidation on the sideplate. The sides of the hammer remain mostly brilliant showing a few mild oxidation speckles while the back surface, trigger, cylinder release and other small parts show lovely brilliant fire blue. All markings remain intact and strong and the black checkered hard rubber grips remain in near excellent condition showing a few minor handling marks. The grips are scratch-numbered to the gun by assembly number and retain excellent fit with nice Rampant Colt motifs. There is some sort of inventory number stamped along the bottom of the frame "29", the cylinder is numbered "238" beneath the extractor and the remaining numbered parts are matching by assembly number. The action seems to function well mechanically with solid timing and lock-up. A rather nice example of these early Colt double action revolvers that may make for a good shooter. (13B9100-272) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
101	Smith & Wesson Model 1903 32 Hand Ejector Revolver serial #143915, 32 S&W Long, 4 1/4" barrel with a bright near excellent bore. The metal surfaces of this fifth change revolver retain about 90% original bright blue with most of the loss due to an area of lightly cleaned oxidation and pinprick pitting along the rear left edge of the frame, some smaller scattered areas of light pitting and high edge wear. The hammer and trigger retain attractive case-hardened colors throughout and all markings are intact and crisp. The black checkered hard rubber grips remain in near excellent condition showing a few light scuffs, the right panel is properly stamp-numbered matching the frame and their fit is perfect. The remaining numbered parts are matching and the action seems to function well mechanically with solid timing and lock-up. (13A9100-253) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
102	Mauser HSc Super Semi-Auto Pistol serial #02559, 380 ACP, 3 1/2" barrel with a bright excellent bore. The metal surfaces of this Renato Gamba Italian-made pistol retain about 95% original blue showing some mild high edge wear and scattered light handling marks, the slide with three small dings along the right side. All markings remain intact and strong showing a very small "NA" import mark along the right side frame. The checkered walnut grips remain in very fine condition left and about good condition right, the right panel showing a partially repaired full-length crack. One original 15-round magazine is included, it shows some tool and grind marks near the catch cutout and the follower hold-open tab on the plastic follower is broken off. The action otherwise seems to function normally. (13A9100-120) {C&R} [Richard "Stretch" Kennedy Collection] (300/400) Est. 300 - 400

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
103	Smith & Wesson Model 1905 32-20 Hand Ejector Revolver serial #41150, 32-20 WCF, 6 1/2" barrel with a bright near excellent bore showing a hint of fine frosting and otherwise crisp rifling throughout. The metal surfaces of this revolver retain perhaps 80% original bright blue with most of the loss along the cylinder, sides of the barrel and gripstraps flaking to a mix of mild pewter and pleasant gray-brown patina, also showing some expected light handling marks and minor freckling. The hammer and trigger retain fine vibrant case-hardened colors and all markings remain crisp. The checkered walnut grips remain in near excellent condition left and about very good condition right, the right panel showing some dings and a moderate chip at the toe. The grips appear to be un-numbered and their fit is excellent. The remaining numbered parts are matching and the action seems to function well mechanically with very good timing and lock-up. (13A9100-113) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
104	Smith & Wesson Model 1905 38 Hand Ejector Revolver serial #269302, 38 Special, 6" barrel with a bright excellent bore. The barrel of this revolver retains a healthy amount of original blue in the more protected areas having mostly toned to a mottled deep gray and gray-brown patina along with some light handling marks. The frame and cylinder retain about 92% original blue showing some pleasant flaking along the topstrap and backstrap with some minor handling marks. The hammer and trigger show wonderful vibrant case-hardened colors and all markings remain intact and crisp. The checkered walnut grips with gold Smith & Wesson medallions remain in very fine to near excellent condition showing some scattered lightly chipped points and minor handling marks. The right grip is appropriately pencil-numbered to the gun and both retain perfect fit. The remaining numbered parts are matching and the action seems to function well mechanically with solid timing and lock-up. This revolver may make for a fine shooter. (13A9100-1093) {C&R} [Richard "Stretch" Kennedy Collection] (400/500) Est. 400 - 500
105	U.S. Army Model 1899 Double Action Revolver by Smith & Wesson serial #13433, 38 Long Colt, 6" barrel with a fair-good bore showing light pitting and oxidation its full-length and good rifling. The metal surfaces of this 1901-accepted revolver retain perhaps 30% original bright blue remaining strong in the protected areas and left side frame with the balance toned to a mix of deep gunmetal and gray-brown patina showing some old oxidation staining and smoothed-over minor pitting here and there. The hammer and trigger show remnants of case-hardened colors toning to pewter and all markings remain intact and strong showing proper military markings on the various components. The checkered walnut grips remain in about very good plus condition showing some areas darkened from the years, light dings and somewhat worn checkering otherwise retaining nice markings with "J.T.T. / 1901" on the left panel and "K.S.M." on the right; the right panel is appropriately pencil-numbered matching and both panels fit well. The ejector rod head has been lost to the years and the lanyard ring is intact. The remaining serialized parts are matching and the action seems to function well mechanically with solid timing and lock-up. A good representative example of these early Smith & Wesson military contract revolvers. (13B9100-648) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
106	Interarms Walther TPH Semi-Auto Pistol serial #T015758, 22 LR, 2 3/4" barrel with a bright near excellent bore. The stainless steel surfaces of this USA-made pistol remain in very good plus condition showing some scattered light handling marks and a few more noticeable dings at the rear edge of the ejection port and extractor. The right side slide shows typical Interarms marking on the right side slide and Walther markings on the left. The smooth rosewood replacement grips are slightly oversized and remain in near excellent condition showing a couple of tiny dings. One original 6-round magazine is included and the action seems to function well mechanically. (13A9100-M46) {MODERN} [Richard "Stretch" Kennedy Collection] (300/400) Est. 300 - 400
107	Interarms Walther PPK Semi-Auto Pistol serial #K013700, 380 ACP, 3 1/4" barrel with a bright excellent bore. The metal surfaces of this Interarms-marked and USA Ranger Arms-made pistol retain about 97% original blue showing some scattered light handling marks, some mild silvering at the muzzle and the frame taking on a deep plum tone under bright light. The barrel remains bright and all markings are crisp and clear. The black checkered plastic grips with Walther banners remain in very fine condition showing some scattered mild scuffs. One original 6-round nickel-bodied magazine with black plastic extension floorplate is included and the action seems to function well mechanically. (13B9100-M45) {MODERN} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600

Lot	Title/Description
108	Walther PP Dural Frame Semi-Auto Pistol serial #302875p, 32 ACP, 3 7/8" barrel with a bright excellent bore. The metal surfaces of this late-war commercial pistol retain about 90-92% original blue and anodized finishes that are taking on the often seen deep plum tone under bright light overall along with some thinning along the gripstraps and high edges, light operational wear and handling marks. All markings remain intact and strong showing "(Eagle) / N" commercial proofs, standard Walther etched markings on the left side slide and some factory errors in the serial number on the frame which have been stamped-over and otherwise match the slide. The checkered walnut grips are more modern replacements in excellent condition right and good condition left, the left panel with a small chip along the top edge. One original flush base magazine in very fine condition is included and the action seems to function well mechanically. (13B9100-M38) {MODERN} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
109	Smith & Wesson 32 Hand Ejector Revolver serial #554788, 32 S&W Long, 2" pinned barrel with a bright excellent bore. The metal surfaces of this five-screw pre-Model 30 revolver retain about 90-92% original blue showing some high edge and operational wear mostly along the cylinder, some other light handling marks and a small area of mild oxidation speckling along the sideplate. The hammer and trigger show lovely vibrant case-hardened colors throughout and all markings remain intact and strong. The checkered walnut grips with silver S&W medallions remain in very good condition showing some scattered light dings and handling marks, the left panel with a few more moderate scuffs and some darkening. The right panel and all other numbered parts are appropriately matching the frame and the action seems to function well mechanically with solid timing and lock-up. (13A9100-589) {C&R} [Richard "Stretch" Kennedy Collection] (400/500) Est. 400 - 500
110	Royal Hong Kong Police Smith & Wesson Model 10-9 Double Action Revolver serial #BBH4279, 38 Special, 4" barrel with a bright excellent bore. The metal surfaces of this revolver retain about 96-97% original blue showing some scattered very light handling marks and some light operational wear with a bit of subtle thinning along the gripstraps. The hammer and trigger retain nice case-hardened colors throughout, muting somewhat, and all markings remain intact and strong. The backstrap shows "RHKP 10261" and the lanyard ring is intact. The checkered walnut grips with silver S&W medallions remain in very fine condition showing rather worn finish and just some light handling marks. The action seems to function well mechanically with solid timing and lock-up. (13A9100-107) {MODERN} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
111	Early Colt Police Positive Double Action Revolver serial #12617, 38 Colt New Police, 4" barrel with a mostly bright very good plus bore showing a few small patches of old oxidation, some light pitting and otherwise strong rifling. This 1907-made revolver retains an earlier "COLT'S / NEW POLICE" stamped sideplate, coupled with the new Police Positive-marked barrel and is indeed equipped with the hammer block positive safety. The metal surfaces retain about 60-70% original bright blue showing overall flaking to gray-brown patina, scattered patches of old oxidation and some minor pinprick pitting. The polished sides of the hammer remain mostly bright showing a little mild speckling while the back surface and the remaining small parts retain a healthy amount of brilliant fire blue. The black checkered hard rubber grips are scratch-numbered to the gun and remain in very fine condition showing just some scattered light handling marks retaining excellent fit. The action seems to function well mechanically with solid timing and lock-up. A good example of an early Police Positive with "transitional" markings. (13A9100-276) {C&R} [Richard "Stretch" Kennedy Collection] (350/550) Est. 350 - 550

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
112	Walther Model 1 Bolt Action & Semi-Auto Rifle serial #35287K, 22 LR, 24 1/2" barrel with a bright excellent bore. The metal surfaces of this attractive rifle retain about 96% original blue showing a little oxidation speckling around the front sling swivel, a few light handling marks and areas taking on the familiar deep plum-brown tone under bright light. All markings remain crisp and clear and the checkered pistolgrip walnut buttstock remains in very good plus to about very fine condition retaining a healthy amount of original finish showing a small imperfection in the wood and a tiny flake forming behind the upper tang and some scattered light dings and dents. The checkered black synthetic buttplate with Walther banner is warping very slightly along the edges and the checkering along the pistolgrip remains mostly crisp. There is a small chip at the toe of the stock and crack on the buttplate. The sling swivels, original military-style rear sight and generous blade front sight are intact, one original magazine is included and the action seems to function well mechanically. A fine example of these interesting Walther rifles. (13B10768-8) {C&R} (700/900) Est. 700 - 900
113	Winchester Model 69A Bolt Action Rifle 22 S,L,LR, 25" barrel with a bright near excellent bore. The metal surfaces of this rifle retain about 90% original blue with most of the loss due to some even fading to mild gray-brown patina under bright light, a few sparse oxidation speckles, and some flaking along the triggerguard and magazine well. The bolt knob has toned to pewter and all markings remain intact and strong. The smooth pistolgrip walnut stock remains in very good condition, the finish with some areas of crazing and bubbling mostly along the right side along with the expected scattered dings. The stock is equipped with period sling swivels and the original buttplate is intact. The front and rear sight dovetailed have been blanked and the rifle is fitted with a Weaver side base and mount that hold a Weaver B4 riflescope that remains in nice condition featuring crosshair reticle and somewhat yellowed but likely still serviceable optics. One original magazine is included and the action seems to function well mechanically. (13A10768-3) {C&R} (200/400) Est. 200 - 400
114	Crescent Firearms New Victor Single Barrel Shotgun serial #65648, 12 ga, 30" barrel with a lightly oxidized bore showing some areas of old pitting. The metal surfaces have mostly toned to a pewter gunmetal patina having been cleaned some time ago and showing remnants of old oxidation staining and light pitting overall. There is an old brass rivet atop the breech and no firing pin is present, the original markings otherwise remain mostly strong. The smooth pistolgrip walnut buttstock and forend remain in fair condition, the buttstock with some moderate cracks and chips around the tangs and there are no buttplate or buttplate screws present. Barrel-to-frame fit exhibits play and the action otherwise seems to function normally. (13A10768-26) {C&R} (20/40) Est. 20 - 40
115	Portuguese Model 1886 Kropatschek Bolt Action Short Rifle by Steyr serial #D276, 8x60mmR, 26" barrel bore showing a heavy coating of old cosmoline and evident rifling. The metal surfaces of this 1886-dated rifle are a mix of deep plum-brown and gray patina showing some overall old oxidation and staining. The receiver retains a healthy amount of arsenal blue and the bolt is a mix of gunmetal and lightly oxidized brown, again showing areas of heavy grease or cosmoline. The markings remain mostly intact and strong and the smooth walnut stock remains in about very good condition showing a moderate drying crack ahead of the triggerguard, a few smaller scattered cracks, light dings and small chips at the toe. The stock cartouches has softened from the years and it appears to be stamp-numbered matching on the left side butt. The bolt is mismatched, the cleaning rod is intact and the action is a little sluggish due to the old grease but otherwise seems to function normally and will no doubt benefit from a thorough cleaning. (13A10768-24) {ANTIQUÉ} (250/450) Est. 250 - 450

Lot	Title/Description
116	Unmarked American Cane Gun-Style Underhammer Percussion Pistol .38 cal, 25" part round part hexadecagonal barrel with turned medial at the point of transition and an oxidized bore. This is an interesting arm in classic American underhammer form with very long barrel lending it a cane gun-like appearance, though it is rather short to be a proper cane and rather long to be a sensible handgun; there do not appear to be any built-in provisions for a stock attachment. The barrel has toned to a pleasant plum-brown and deep gray patina showing some areas of old light pitting and mild oxidation. The frame is a slightly lighter gunmetal in otherwise similar condition and the screw heads show some light slot wear, the mainspring tension screw perhaps an older replacement. The smooth walnut grips remain in very good condition showing a couple of minor drying cracks and light dings, exhibiting some rather handsome grain figure throughout. The action will require a little mechanical attention as the trigger spring is weak and it does not catch the hammer reliably. The arm is sighted with a thin German silver blade front sight. An interesting example for the American antique arms collector. (13A10768-63) {ANTIQUÉ} (300/500) Est. 300 - 500
117	British Percussion Halfstock Fowler by J. Williams 10 bore, 32 3/8" part round part octagon damascus barrel with a lightly oxidized bore. The barrel and under-rib are primarily a deep gray and plum-brown patina showing overall light pitting that follows the damascus patterns. The patent breech retains a few wisps of case-hardened colors and features a platinum band at the rear and platinum blowout plug. The lockplate and other small parts are a similar patina as the barrel showing softened embellishments consisting of light detailed foliate scrollwork. Both lockplate and barrel are maker-marked, the barrel showing London address. The arm features dual ramrod thimbles, tailpipe, silver barrel wedge escutcheons and silver monogram plate atop the wrist that is engraved with a pair of script initials that have softened somewhat from the years and a rather difficult to discern though the word "TO" is between them, naturally suggesting this arm was a gift. The checkered walnut stock remains in about very good plus condition showing scattered light dings and scuffs, the checkering remaining quite nice and the wood maintaining a nice appearance overall. The left half of the horn noseceap has broken off and the piece lost to the years and there is a thin 2" crack emanating from the pineapple triggerguard finial. The original brass-tipped hickory ramrod with worm end is present and the lock seems to function well mechanically. Suffering a bit of poor storage through the years, the arm otherwise appears to have little actual use. (13A10768-31) {ANTIQUÉ} (350/550) Est. 350 - 550
118	Remington Vest Pocket Pistol serial #2370, 30 RF, 4" barrel with a good bore showing a few bright areas with spots of oxidation, old pitting and strong rifling. The metal surfaces of this pistol show remnants of an old plum-brown lacquer finish flaking to deep gray and showing some scattered light handling marks. The Remingtons Iion address atop the breech was stamped rather lightly while the patent date is crisp and the number "141" was also struck with non-serifed stamps on the left side breech flat and along the bottom of the frame. The proper serial number "2370" is beneath the left grip on the frame and the underside of the barrel is stamped only with a "0". The smooth rosewood grips remain in very good condition having darkened from the years showing a couple thin cracks along the bases and some other light handling marks. The grips fit nicely and the action seems to function well mechanically. A good example in the rare 30 RF chambering. (13A9100-367) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
119	Colt Pocket Positive Double Action Revolver serial #98550, 32 Colt New Police, 2 1/2" barrel with a bright excellent bore. The metal surfaces of this 1920-made revolver are toning to a mottled gray and plum-brown patina overall with generous blue in the protected areas along with some scattered oxidation staining. The trigger and back surface of the hammer show strong blue throughout and there are a few dings along the barrel and front sight blade. All markings are intact and strong and the black checkered hard rubber grips remain in about very good condition with small chips at the toes. Both panels are scratch-numbered to different guns though their fit is otherwise quite good. Timing is a little bit off and the action otherwise seems to function normally. (13A9100-379) {C&R} [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
120	Colt Pocket Positive Double Action Revolver serial #112739, 32 Colt New Police, 2 1/2" barrel with a bright excellent bore. The metal surfaces of this 1923-made revolver retain about 95% original blue showing some scattered fine flaking and mild freckling with most of the loss due to a few small spots of pinprick pitting along the cylinder, one area more noticeable due to some thin scratches from an old cleaning attempt. The polished sides of the hammer shows a little mild oxidation speckling while the ejector rod head shows nice case-hardened colors and all markings remain intact and strong. The black checkered hard rubber grips are scratch-numbered to the gun and remain in near excellent condition. The action seems to function well mechanically with solid timing and lock-up. (13A9100-204) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
121	Colt Pocket Positive Double Action Revolver serial #151037, 32 Colt New Police, 2 1/2" barrel with a bright excellent bore. The metal surfaces of this 1933-made revolver retain about 90% original blue showing some scattered mild edge wear and fine freckling with most of the loss due to the gripstraps toning to plum-brown patina and a mottled area of loss along the right side frame. The polished sides of the hammer remain brilliant, the ejector rod head shows nice case-hardened colors and all markings are crisp and clear. The black checkered hard rubber grips remain in near excellent condition showing a couple of light handling marks. The grips are scratch-numbered to a different gun but otherwise fit very well. The action seems to function well mechanically with very good timing and lock-up. (13A9100-209) {C&R} [Richard "Stretch" Kennedy Collection] (250/350) Est. 250 - 350
122	Czech CZ-52 Semi-Auto Pistol serial #A6391, 7.62x25mm Tokarev, 4 3/4" barrel with a mostly bright very good plus bore showing a little mild oxidation in the grooves and otherwise strong rifling. The metal surfaces of this pistol retain about 95% arsenal-refurbished dull blue showing a little light pitting or rough surface finishing beneath the blue, some light handling marks and toning to a deep plum patina. All markings remain intact and strong showing a discreet Century import mark on the right side frame along with the original 1953 acceptance date and both 1975 and 1991 refurbishment dates. The grooved dark brown Bakelite grips remain in near excellent condition exhibiting some evident play in their fit. The serialized parts are matching and the action seems to function well mechanically. Included is an original brown leather flap holster, two original magazines and steel cleaning rod. (13A9100-361) {C&R} [Richard "Stretch" Kennedy Collection] (300/400) Est. 300 - 400
123	Smith & Wesson 32 Double Action Revolver with Box serial #231686, 32 S&W, 3" ribbed round barrel with a partially bright good bore showing some areas of light pitting and oxidation with otherwise strong rifling. The metal surfaces of this revolver retain about 90-92% original nickel finish showing some small areas flaking to brown along the cylinder and right side frame and some other areas of fine bubbling mostly along the cylinder. The latch and triggerguard retain a similar amount of original bright blue toning to mild gray-brown and showing some light freckling while the hammer and trigger show somewhat muted case-hardening with wisps of vibrant colors. All markings are crisp and clear and the black checkered hard rubber grips remain in near excellent condition. The left panel retains a nice patent date along the bottom edge and the right panel is properly scratch-numbered matching the frame. The remaining serialized parts are matching, barrel-to-frame fit is solid and the action seems to function well mechanically with very good timing and lock-up. An original deep purple paper-covered box is included that remains in very good condition showing a few small tears and scuffing along the edges. The proper end label is mostly intact and there is no visible number along the bottom. (13A9100-1400) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500

Lot	Title/Description
124	Smith & Wesson 32 Double Action Revolver with Box serial #97965, 32 S&W, 3" ribbed round barrel with a fair-good bore showing scattered light pitting and oxidation with good rifling. The metal surfaces retain about 85% original nickel finish showing some areas flaking to gray-brown patina mostly along the right side, a few smaller flakes and light handling marks. This example also has the nickel-plated triggerguard seen on some other examples within the 96000-98000 serial number range. The latch shows flaking bright blue, the hammer and trigger retain a healthy amount of case-hardened colors and all markings are crisp and clear. The black checkered hard rubber grips remain in near excellent condition showing a few small dings and light handling marks, the left panel with a softened and partially legible patent date along the bottom edge. The right panel is properly scratch-numbered matching the frame and the other serialized parts are matching. Barrel-to-frame fit is solid, timing is just a little bit off and the action otherwise seems to function normally. An original deep purple paper-covered box is included that remains in about very good plus condition showing some light scuffing and some separation along the back end flap. The proper orange end label remains mostly intact and there are a few small cracks along the inside lid. There are faded pencil markings along the base that are no longer legible. (13A9100-1381) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
125	Interarms Mauser Parabellum Semi-Auto Pistol serial #11.008636, 9mm, 6" barrel with a bright excellent bore. The metal surfaces of this "American Eagle Luger" pistol retain about 95% original blue showing a little silvering at the muzzle, some mild operational wear and freckling along the grip safety. The blue is taking on a deep plum tone under bright light and the small parts retain a healthy amount of nice straw color with some silvering and freckling along the edges. The markings remain intact and mostly strong, the Federal Eagle atop the chamber rather lightly struck. The checkered walnut grips remain in very fine condition showing some scattered light handling marks and their fit is excellent. One original magazine is included and the action seems to function well mechanically. The pistol also includes its original Interarms brown leather belt holster with cleaning rod in very fine condition showing some scattered light scuffs and some verdigris around the brass snaps that will likely clean up. An attractive Interarms Luger pistol. (13B9100-296) {MODERN} [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200
126	Colt Cobra Double Action Revolver serial #251486-LW, 38 Special, 2" barrel with a bright excellent bore. The metal surfaces of this 1968-made revolver retain perhaps 90% original blue and anodized finishes showing some overall high edge wear, light handling marks and some mottled gray-brown areas along the barrel. The sides of the hammer show some mild oxidation staining and all markings are crisp and clear. The checkered walnut grips with silver Colt medallions are grease pencil-numbered to the gun and remain in very good condition showing some scattered handling marks and edge wear. The action seems to function well mechanically with solid timing and lock-up. (13B9100-322) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
127	Colt Police Positive Double Action Revolver serial #130451, 32 Colt New Police, 6" barrel with a bright excellent bore. The metal surfaces of this 1916-made revolver retain about 75-80% original blue showing moderate flaking and thinning under bright light with some scattered oxidation speckling, a bit more moderate along the gripstraps and one area on the sideplate. The polished sides of the hammer show some mild oxidation staining and all markings are intact and strong. The black checkered hard rubber grips are scratch-numbered to the gun and remain in very good condition left and very fine condition right, the left panel with a thin 3/4" chip at the heel and both showing some scattered light handling marks. Timing is a little bit off and the action otherwise seems to function well mechanically. (13A9100-96) {C&R} [Richard "Stretch" Kennedy Collection] (250/350) Est. 250 - 350

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
128	<p>Early Remington Vest Pocket Pistol serial #572, 22 RF, 3 1/4" barrel with a moderately oxidized bore showing evident rifling. This early production example is unmarked beyond the serial number and remains a rather attractive example. The frame is a smoky gray case-hardened patina showing some scattered light dings, a few spots of mild oxidation staining and a patch of old light pitting along the right side barrel. The sides of the frame retain some healthy wisps of good original case-hardened colors. The rear frame screw does not seem to be seating properly leaving a gap between the frame proper and backstrap. The hammer and trigger also retain a healthy amount of brilliant fire blue showing some operational wear. The smooth walnut grips remain in very good plus condition retaining strong original varnish with scattered light dings and a small crack along the base of the left panel. The grips are stamp-numbered matching the frame by assembly number "76", the original small brass cone front sight is intact and the action seems to function well mechanically. A nice example for the Remington collector. (13B9100-62) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700</p>
129	<p>British Percussion-Converted Muff Pistol by Nock .45 cal, 1 5/8" screw barrel with an oxidized bore. This pistol was period-converted into percussion with re-shaped brass frame to accept the nipple and the original lock retained which holds the hammer nose in the jaws. The barrel and lock parts are a deep gray and plum-brown patina showing some scattered old oxidation staining while the frame is a pale ocher and goldenrod patina showing scattered dings and old tarnishing. There are some gaps along the top cover plate and against the grip and the markings along the sides have softened somewhat showing simple panoply of arms embellishments with "H. NOCK" on the left and "LONDON" on the right, the arm shows Birmingham proof marks. The smooth walnut grips remains in very fine condition showing a little older added finish and scattered light dings. The pistol features a folding trigger and sliding half-cock safety, and the lock seems to function well mechanically. (13A9100-739) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500</p>
130	<p>Irish Flintlock Coat Pistol by Wisdom .70 cal, 4 3/8" octagon barrel with a lightly oxidized bore. The metal surfaces have mostly toned to a deep plum-brown and gray patina showing overall light pitting and oxidation. There are some simple light foliate embellishments and a pineapple finial ahead of the triggerguard. The cock appears to be an old replacement and the lock features waterproof pan with bridled frizzen and the frizzen spring actually retains some good straw color. The lock is maker-marked "WISDOM" while the top of the barrel shows slightly softened "DROGHEDA". The checkered walnut stock remains in about good condition showing a thin crack through the left side wrist, a number of cracks along the tip, other light dings and handling marks. A simple brass-tipped ramrod is present, the arm is sighted with a simple v-notch rear and medium bead front sight and the lock seems to function well mechanically. Obadiah Wisdom is believed to have traded in Drogheda, County Louth from around 1795-1824 and firearms with his markings appear to be rather scarce. (13A9100-225) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (400/500) Est. 400 - 500</p>
131	<p>Colt New Line 41 Pocket Revolver serial #3606, 41 RF, 2 1/4" round barrel with a mostly bright very good bore showing some scattered mild oxidation and otherwise strong rifling. The metal surfaces of this revolver retain perhaps 50-60% original nickel finish with most of the loss along the frame which is blending in rather nicely with the surrounding nickel to a silvery gunmetal patina, also showing some scattered areas of old oxidation staining and minor pitting. There are some old tool marks along the base pin head and the "COLT NEW 41" etched panel on the left side barrel is rather soft however the remaining markings are crisp and clear. The back surface of the hammer and protected sides of the trigger retain a healthy amount of brilliant fire blue and the smooth rosewood grips remain in very fine condition retaining perhaps 90% original varnish with some scattered light handling marks. The right panel is pencil-numbered to the gun, the number on the left is very faint, and their fit is excellent. Strangely the cylinder appears to be numbered "868" and the action seems to otherwise function well mechanically with very good timing and lock-up. (13A9100-1215) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500</p>

Lot	Title/Description
132	<p>Colt Bankers Special Double Action Revolver serial #398805, 38 Colt New Police, 2" barrel with a bright excellent bore. The metal surfaces of this 1941-made revolver retain about 92% older reapplied nickel finish showing some scattered small areas flaking to gunmetal gray patina mostly along the cylinder and sideplate, some other light freckles and handling marks. The markings remain completely intact and mostly unmolested, the Rampant Colt perhaps with some very subtle softening but otherwise strong. The checkered walnut grips with silver Colt medallions remain in very good plus condition having darkened somewhat from the years showing a few light dings and handling marks. The grips appear to be un-numbered and their fit is excellent. The action seems to function well mechanically with solid timing and lock-up. This desirable revolver may make for a fine shooter. (13A9100-469) (C&R) [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800</p>
133	<p>Colt New Pocket Double Action Revolver serial #20520, 32 Colt, 3 1/2" barrel with a mostly bright near excellent bore showing a few scattered oxidation speckles throughout and otherwise crisp rifling. The metal surfaces of this 1903-made revolver retain about 85% original bright blue showing overall thinning and flaking to gray-brown patina under bright light along with a few small areas of oxidation or pinprick pitting that show some scratches from cleaning. The polished sides of the hammer show some scattered oxidation staining while its back surface, the sides of the trigger, and screw heads retain a healthy amount of brilliant fire blue. All markings remain intact and strong with the ejector rod head showing nice case-hardened colors. The black checkered hard rubber grips are scratch-numbered to the gun by assembly number and remain in near excellent condition left and very good plus condition right, the right panel with a small chip at the toe. Timing is a hair off in single action and it otherwise seems to function well mechanically. (13A9100-470) (C&R) [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500</p>
134	<p>Unmarked Pair of European Percussion Muff Pistols .52 cal, 2 3/8" screw barrels with moderately oxidized bores showing deep straight rifling. The metal surfaces have been lightly cleaned to a smooth pewter gunmetal patina showing a little sparse pinprick pitting. The actions are neatly embellished with good quality foliate scrollwork, crosshatching and bordering. The pistols are assembly-numbered "IO" and "OIX", the first pistol shows a moderate crack in the hammer neck and the folding trigger is somewhat loose and not seating flush with the frame while "OIX" shows a replacement common grip screw. The walnut grip of "IO" remains in near excellent condition and shows nice crisp floral carving, while the grip of "OIX" is about good having been cleaned and showing some added finish with the foliate embellishments softened somewhat. The locks seem to function well mechanically. (13A9100-51A,B) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500</p>
135	<p>Colt New Police Transitional Target Revolver serial #51465, 32 Colt New Police, 6" barrel with a bright near excellent bore showing what appear to be a few subtle imperfections in the bore and otherwise crisp rifling. This 1907-made revolver is technically in Police Positive configuration but was assembled utilizing a New Police-marked sideplate and is indeed equipped with the hammer block. The barrel shows "COLT NEW POLICE 32" marking on the left side and "POLICE-POSITIVE" marking on the right with last patent date on the top July 4, 1905. The metal surfaces retain about 80% original bright blue showing some overall thinning and toning to mild gray-brown patina under bright light, some handling marks and scattered small dings along the edges. The gripstraps account for most of the loss and appear to have been lightly cleaned to a smooth pewter gunmetal patina. The sides of the hammer remain mostly bright while its back surface and the sides of the trigger retain good fire blue. All markings are intact and strong and the black checkered hard rubber grips remain in very good plus condition showing some light handling marks. The grips appear to be scratch-numbered "61486" and fit rather well and the fine bead target front sight is slightly bent. The action will require some mechanical attention as timing is off and, in single action, the hammer can be pulled back beyond the full cock notch. (13A9100-465) (C&R) [Richard "Stretch" Kennedy Collection] (250/350) Est. 250 - 350</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
136	Smith & Wesson Victory Model Double Action Revolver serial #V232447, 38 S&W, 5" barrel with a bright excellent bore. The metal surfaces of this revolver retain about 80-85% original Parkerized finish showing moderate edge wear and areas toning to a smooth plum-brown patina under bright light mostly along the gripstraps and sides of the frame. The topstrap shows some light grind marks where the U.S. property markings were removed and the forward sideplate screw shows some slot wear and circumferential marks. The other markings remain intact and strong showing flaming bomb proof and "GHD" on the bottom of the grip frame. The hammer and trigger retain a healthy amount of strong case-hardened colors and the smooth walnut grips remain in about very good plus condition showing some scattered light dings and handling marks, along with some slivers along the bottom edge of the right panel. The right panel is properly stamp-numbered to the gun and the remaining numbered parts are matching. The lanyard ring is present and the action seems to function well mechanically. (13A9100-357) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
137	Smith & Wesson New Model No. 3 Revolver serial #35519, 44 S&W Russian, 6" ribbed round barrel with a partially bright fair-good bore showing light pitting and some moderate oxidation its full-length and otherwise strong rifling throughout. This revolver is equipped with desirable factory ivory grips though it will require mechanical attention as it is missing its hammer, hand and mainspring. The metal surfaces retain about 40% original bright blue with the balance flaked and toning to a mix of deep gunmetal gray and gray-brown patina and showing some scattered oxidation speckling, scratches and tool marks, the screw slots and holes with evident wear. The sides of the trigger retain a hint of straw color while the triggerguard is a smoky gray-brown retaining some wisps of colors in the protected areas. The cylinder is the 1 9/16" variant and all markings remain intact and strong showing the expected later barrel address marking without patent dates. The smooth original antique ivory grips with gold S&W medallions remain in very fine condition having taken on an attractive patina and show just some scattered light handling marks with a very tiny flake missing near the heel of both panels, and some honest crackling along the bases. There are some faded pencil markings on the insides with a "3" visible on the right panel and their fit is quite nice overall. Barrel-to-frame fit exhibits a little bit of play and the barrel itself is un-numbered while the latch, cylinder and extractor are matching the frame. This revolver may make for a good, if ambitious, restoration project. (13B9100-433) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (1200/1800) Est. 1,200 - 1,800
138	British Tap Action Flintlock Muff Pistol by Blair about .31 cal, 1 1/2" screw barrels with moderately oxidized bores. The metal surfaces of this little pistol have mostly toned to a mix of deep gray and plum-brown patina showing scattered old oxidation and some light pinprick pitting. There are some light foliate motif embellishments that have softened somewhat from the years and the left side of the frame is nicely maker-marked in script "Blair" with "London" on the right. The bottom of the frame shows a pre-1813 Tower private proof mark. The smooth walnut grip remains in very good plus to very fine condition showing some scattered small dings and light handling marks. The top jaw and its screw appear to be older replacements as the jaw is slightly oversized and the frizzen is a little loose. The pistol features a sliding half cock safety and the lock seems to function normally. A very good tap action flintlock pistol. (13B9100-415) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
139	Remington Model 95 Double Deringer serial #168, 41 RF, 3" barrels with bright near excellent bores. The metal surfaces of this Type II pistol are a relatively even mix of original bright blue and plum-brown patina showing scattered old oxidation staining and light freckling with a few minor handling marks. The extractor retains strong fire blue while the Remington Arms Co. barrel address remains crisp. The black checkered hard rubber grips remain in very good plus to very fine condition, the right panel showing some more noticeable scuffs or handling marks; both panels otherwise retain excellent fit. Barrel-to-frame fit is solid and the hinge remains in fine condition. The action seems to function well mechanically and aside from cosmetic wear, the arm appears to have seen little actual use. (13A9100-478) {C&R} [Richard "Stretch" Kennedy Collection] (400/500) Est. 400 - 500

Lot	Title/Description
140	Smith & Wesson Model 37 Chiefs Special Airweight Revolver serial #20J978, 38 Special, 3" pinned barrel with a bright excellent bore. The metal surfaces of this revolver retain about 99% original blue and anodized finishes showing two small thin scratches on the left side barrel and a few other sparsely scattered tiny handling marks. The hammer and grooved combat trigger show lovely case-hardened colors throughout, muting very slightly in some areas. The checkered walnut square butt grips with silver S&W medallions remain in excellent condition and the right panel is stamp-numbered to the gun. The action seems to function well mechanically with solid timing and lock-up. The revolver includes its original blue box with metal-reinforced corners and properly end-labeled and numbered to the gun. The box rates very fine showing some lights scuffs or handling marks and contains the manual and cleaning kit. (13A9100-975) {MODERN} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
141	Rollin White Arms Co. Single Action Pocket Revolver serial #9342, 22 RF, 3" octagon barrel with a partially bright bore showing some moderate oxidation and pitting nearer the breech and strong rifling. The barrel, cylinder and hammer are a deep gray and plum-brown patina showing some areas of old oxidation and mild pitting, the head of the base pin showing some rough tool marks. The barrel markings remain intact and mostly crisp showing the Smith & Wesson marking while the patent dates along the cylinder are rather soft. The brass frame is a pleasant ocher patina showing some thinning streaks of silver with a few light handling marks and the smooth rosewood grips remain in about very fine condition showing a couple of small flakes and a very thin drying crack along the left panel. The grip fit remains very nice, the mainspring strain screw is missing and the action otherwise seems to function well mechanically with very good timing and lock-up. A good example of these interesting revolvers. (13A9100-962) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
142	Smith & Wesson No. 1 1/2 First Issue Revolver serial #2954, 32 RF, 3 1/2" ribbed octagon barrel with a moderately oxidized bore showing some bright areas and good rifling. The metal surfaces of this revolver are mostly a pewter gunmetal and mild gray-brown patina showing some remnants of older lightly cleaned oxidation staining and pinprick pitting along with a few scattered light dings. The barrel markings remain unmolested and strong. The smooth rosewood grips remain in very fine condition, the varnish of the left panel having taken on a slightly cloudy appearance and showing some scattered handling marks. The right panel is properly stamp-numbered matching by serial number while the barrel and cylinder are matching the frame by assembly number. Barrel-to-frame fit is quite good exhibiting only a little side-to-side play and the action will require some mechanical attention as the bolt and hand are unreliable, likely a spring issue, the hammer otherwise cocks normally. (13A9100-413) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
143	Colt Police Positive Target Revolver serial #78509, 32 Colt New Police, 6" barrel with a partially bright about good bore showing some scattered oxidation speckling, one more moderate ring of oxidation about mid-bore, and strong rifling. The metal surfaces of this 1910-made revolver retain about 65-70% original bright blue showing overall flaking to gunmetal and gray-brown patina under bright light, a few areas of light pitting along the edges, handling marks and some dings along the underside barrel. One area along the cylinder shows some more moderate oxidation. The polished sides of the hammer remain mostly bright while its back surface, the trigger, and other small parts retain most of their lovely brilliant fire blue. All markings remain intact and strong and the black checkered hard rubber grips are scratch-numbered to the gun and remain in very good plus condition showing some scattered light dings and retaining excellent fit. The original target sights are intact, timing is off in single action though the action times and locks up well in double action and upon trigger pull in single. (13A9100-M23) {C&R} [Richard "Stretch" Kennedy Collection] (250/350) Est. 250 - 350

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
144	Colt Model 1908 Vest Pocket Hammerless Semi-Auto Pistol serial #303631, 25 ACP, 2 1/8" barrel with an oxidized bore. The metal surfaces of this 1921-made pistol retain about 85% original blue showing mild flaking and toning to gray-brown patina under bright light, overall light oxidation freckling and a few small areas of more noticeable oxidation. The barrel is partially bright with some areas of mild gray-brown and the remaining small parts retain a healthy amount of vibrant case-hard colors. All markings remain intact and crisp and the black checkered hard rubber grips remain in very fine condition showing some minor handling marks. One original two-tone magazine is included that shows some moderate oxidation staining overall but otherwise seems to be serviceable and will likely clean up well. The action seems to function well mechanically. (13A9100-M78) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
145	Wesson & Harrington No. 3 Single Action Revolver serial #195, 32 RF, 2 3/4" octagon barrel with a partially bright three-groove bore showing some areas of light oxidation or pitting mostly nearer the breech and otherwise strong rifling. The metal surfaces of this third type revolver retain about 95% original nickel finish showing some light flaking along some of the edges and cylinder flats toning to medium gray-brown patina. There are some light handling marks and a number of small dings along the left barrel flat. The hammer retains some nice case-hardened colors while the bottom surface of the bolt shows a hint of fire blue. The barrel markings remain crisp and clear and the smooth rosewood grips are stamp-numbered to the gun and remain in very fine condition retaining about 95% original varnish showing some edge wear and a small scuff along the left grip. The action seems to function well mechanically with solid timing and lock-up. (13A9100-46) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (250/350) Est. 250 - 350
146	Smith & Wesson No. 1 1/2 First Issue Revolver serial #9229, 32 RF, 3 1/2" ribbed octagon barrel with a good bore showing light oxidation its full-length, with bright areas and otherwise strong rifling. The metal surfaces of this revolver retain about 90% original nickel finish with most of the loss due to flaking along the ejector rod, barrel rib and cylinder that is toning to a mild gray-brown patina, along with some scattered light handling marks and honest clouding of the nickel. The barrel address and patent dates remain crisp and clear, the hammer is also nickel-plated and the trigger is a smooth gunmetal gray patina. The smooth rosewood grips remain in very fine condition showing somewhat worn finish with a tiny chip at the heel of the left panel and some scratches along the right. The right panel is properly stamp-numbered matching the frame by serial number while the barrel and cylinder are matching by assembly number. Barrel-to-frame fit is very good and the action seems to function well mechanically with very good timing and lock-up. A nice example in full nickel. (13B9100-245) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
147	Czech CZ-52 Cutaway Semi-Auto Pistol serial #CUT232, 7.62x25mm Tokarev, 4 3/4" barrel with an excellent bore. This is a comprehensive factory cutaway pistol as-imported by Century with their added "CUT" serial number. The metal surfaces retain about 95% original Parkerized finish showing some silvering along the high edges and some light scuffs or handling marks scattered about. The right side slide shows a Century import mark and the top shows original markings "VH LB 5462". Most of the color-coded cuts are along the right side of the pistol revealing the complete working mechanisms of the arm with a single circular cut on the left side slide showing the breech face to barrel breech interface. The grooved Bakelite grips are very fine, the right obviously cutaway, and a stock configuration magazine is included. The action seems to function well mechanically and the tip of the firing pin is clipped. An interesting addition to any martial collection. (13A9100-745) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500

Lot	Title/Description
148	Harrington & Richardson Sportsman Single Action Revolver serial #S14277, 22 LR, 6" barrel with a bright near excellent bore. The metal surfaces of this revolver retain about 95% original bright blue showing mild operational wear, some light handling marks and small areas of slight thinning under bright light. The polished sides of the hammer and grooved trigger remain mostly brilliant showing a little mild oxidation speckling, the back surface of the hammer with some smoky remnants of case-hardening. All markings remain intact and strong showing nice etched model designation on the left side barrel and stamped patent number on the cylinder. The checkered walnut No. 4 target grip remains in very fine condition showing a light scratch and a few lightly chipped points nearer the forward edge of the right side and some other more mild handling marks. The wood shows some subtle hints of grain figure and all of the serialized parts are matching. The original adjustable sights are intact, the rear a generous square notch and the front a Patridge with brass insert. This example is equipped with the frame-mounted bronze firing pin, barrel-to-frame fit is solid and the action seems to function well mechanically with solid timing and lock-up. An attractive example of these fine H&R target revolvers. (13B9100-350) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
149	Harrington & Richardson Sportsman Single Action Revolver serial #S11034, 22 LR, 6" barrel with a bright excellent bore. The metal surfaces of this revolver retain about 94% original blue with most of the loss due to scattered high edge wear, a few errant freckles and some light dings and scuffs mostly along the sides of the barrel. The polished sides of the hammer and grooved trigger remain brilliant, the back surface of the hammer a pale gray patina. All markings remain intact and strong showing nice etched model designation on the left side barrel and etched patent number on the cylinder. The checkered walnut No. 4 grip remains in very fine condition showing a few lightly chipped points and some dings nearer the heel. All of the serialized parts are matching, the original adjustable sights are intact, the rear a generous square notch and the front a Patridge with brass insert. This example is equipped with the frame-mounted bronze firing pin, barrel-to-frame fit is solid and the action seems to function well mechanically with very good timing and lock-up. (13B9100-552) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
150	Smith & Wesson Model 12-2 Airweight Revolver serial #D474687, 38 Special, 4" pinned barrel with a bright excellent bore. The metal surfaces retain about 90% original blue and anodized finishes with most of the loss due to silvering along the high edges and what appears to be a shallow 1 1/2" grind mark along the top strap that has left the surface a bit uneven. The hammer and trigger show strong case-hardened colors with a bit of minor freckling and all markings are crisp and clear. The checkered walnut Magna grips with silver S&W medallions are replacements for a different model as there is a moderate gap along the top portion against the frame due to the medallion escutcheons being too wide. The grips rate very good showing lightly chipped points and the right panel with a bit more wear showing some slivers lost along the checkering border. The action seems to function well mechanically with solid timing and lock-up. (13A9100-4) {MODERN} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
151	Smith & Wesson No. 1 1/2 Single Action Revolver serial #16931, 32 S&W, 3" ribbed round barrel with a bright near excellent bore showing a few minor freckles and strong rifling. The metal surfaces retain about 98% original nickel finish showing a few scattered minor flakes, freckles and handling marks. The trigger and latch show strong oil-quenched case-hardening while the hammer retains vibrant case-hardened colors. A few of the screws show some slot wear and all markings are crisp and clear. The black checkered hard rubber grips remain in excellent condition showing some scattered light handling marks and the right panel is properly pencil-numbered to the gun, both retaining excellent fit. The serialized parts are matching, barrel-to-frame fit is solid and the action seems to function well mechanically with nice timing and lock-up. (13A9100-444) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600

Lot	Title/Description
152	Smith & Wesson First Model 38 Single Action Revolver serial #22351, 38 S&W, 3 1/4" ribbed round barrel with a bright very fine bore showing a few small areas of light oxidation and a couple minor pits with otherwise strong rifling. The metal surfaces of this rifle retain about 90-92% original nickel with some flaked areas toning to gray-brown in the cylinder flutes and scattered about some of the high edges along with some scattered light dings and handling marks. The hammer retains a healthy amount of vibrant case-hardened colors while the remaining small parts show good dark gray oil-quenched case-hardening mixing with smooth pewter gunmetal patina. The barrel address and patent dates remain crisp and clear and the black checkered hard rubber grips remain in very fine to near excellent condition showing some minor handling marks. Strangely the grips appear to be pencil-numbered to a different gun and also show some other faded pencil scribbles inside, though their fit is perfect. The remaining numbered parts are matching and the cylinder retainer plate is missing causing the cylinder to start coming out when the barrel is opened. The action otherwise seems to function well with good timing and lock-up and barrel-to-frame fit is solid. (13A9100-318) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
153	Smith & Wesson 38/22 Terrier Double Action Revolver serial #57100, 38 S&W, 2" pinned barrel with a bright near excellent bore. The metal surfaces of this five-screw revolver retain about 96% original blue showing some scattered mild edge wear, a few errant freckles and minor handling marks. The hammer and trigger retain bold case-hardened colors and all markings remain crisp and clear. The checkered walnut grips with silver S&W medallions remain in very fine condition showing a few lightly chipped points and the right panel is properly stamp-numbered matching the frame. The remaining numbered parts are also matching and the action seems to function well mechanically with very good timing and lock-up. A nice example of these popular little Smith & Wesson revolvers. (13B9100-952) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
154	Colt Junior Semi-Auto Pistol serial #60748CC, 22 RF Short, 2 1/4" barrel with a bright excellent bore. The metal surfaces of this Spanish-made pistol retain about 96-97% original blue showing some very mild edge wear, some freckling along the gripstraps and areas taking on a deep plum-brown tone under bright light. The small parts remain bright and all markings remain intact and strong. The checkered walnut grips with silver Colt medallions remain in excellent condition showing a few minor handling marks. One original nickel-plated magazine in very good plus condition is included and the action seems to function well mechanically. (13A9100-951) {C&R} [Richard "Stretch" Kennedy Collection] (250/350) Est. 250 - 350
155	High Standard G.380 Semi-Auto Pistol serial #2561, 380 ACP, 5" barrel with a bright excellent bore. The metal surfaces retain about 90-92% original blue showing some scattered areas of light oxidation and freckling mostly along the frontstrap and left edges of the barrel along with some thin scratches and handling marks scattered about. All markings remain crisp and clear and the black checkered Bakelite grips remain in near excellent condition showing some scattered minor scuffs and light handling marks. One original magazine is included and the action seems to function well mechanically. A very good example of these interesting and low-production pistols. (13A9100-355) {C&R} [Richard "Stretch" Kennedy Collection] (400/500) Est. 400 - 500
156	Smith & Wesson Model 1905 32-20 Hand Ejector Target Revolver serial #47455, 32-20 WCF, 6 1/2" pinned barrel with a bright excellent bore. The metal surfaces of this five-screw revolver retain about 75-80% original bright blue with overall flaking to gray-brown patina, scattered handling marks and some oxidation speckles. The hammer and trigger retain bold case-hardened colors and all markings remain intact and strong. The checkered walnut grips with gold S&W medallions remain in very good condition showing lightly chipped points and dings with somewhat worn finish. The right panel appears to be pencil-numbered to a different gun and its fit is a little bit proud but generally quite good. The remaining serialized parts are matching and the revolver retains its proper target sights with adjustable u-notch blade rear and a Lyman ivory bead front. The action seems to function well mechanically with solid timing and lock-up. (13A9100-71) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700

Lot	Title/Description
157	Colt Official Police Double Action Revolver serial #746088, 38 Special, 4" barrel with a bright excellent bore. The metal surfaces of this 1948-made revolver retain about 90% original blue showing some high edge and holster wear along with some sparsely scattered oxidation speckles and the gripstraps toning to mild gray-brown patina. The base of the frame shows large "RM-X3" roughly scratched into it and the polished sides of the hammer show some old oxidation staining. The markings otherwise remain crisp and clear. The revolver wears a set of replacement smooth laminated hardwood grips that show some light handling marks and are rather proud along the edges. Timing is a hair off on a few chambers in single action, the arm otherwise seems to function well. (13A9100-76) {MODERN} [Richard "Stretch" Kennedy Collection] (250/350) Est. 250 - 350
158	Smith & Wesson No. 1 1/2 Single Action Revolver serial #17383, 32 S&W, 3 1/2" ribbed round barrel with a fair-good bore showing some areas of light pitting and oxidation with good rifling. The metal surfaces retain about 70% original nickel finish showing moderate flaking and some areas of oxidation with overall dings, scuffs and scratches, some a bit more moderate. Some of the screw heads show slot wear and the latch and trigger show fading dark gray oil-quenched case-hardening. The hammer is a smoky gray patina and the barrel markings remain mostly legible. The black checkered hard rubber grips remain in good condition showing the same overall dings and scuffs, the left panel with a minor crack at the base. The serialized parts are matching, barrel-to-frame fit is solid and the action seems to function well mechanically with very good timing and lock-up. (13A9100-310) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200
159	Smith & Wesson No. 1 Third Issue Revolver serial #31698, 22 RF, 3 3/16" ribbed round barrel with a fair-good bore showing light pitting and oxidation with otherwise strong rifling. The barrel and cylinder have mostly flaked to a pleasant gray-brown patina showing some scattered tiny dings and streaks of original bright blue. The frame has surprisingly retained much of its rich original bright blue, perhaps 95%, with more mild flaking and handling marks. The hammer retains some wisps of case-hardened colors while the trigger and ejector rod are a medium gray case-hardened patina. The barrel markings remain crisp and the smooth rosewood grips remain in very fine condition retaining about 96% original varnish showing some light flaking and handling marks. Their fit is excellent, the right panel is properly stamp-numbered matching and the other numbered parts are matching by assembly number. Barrel-to-frame fit is also excellent and the action will require some mechanical attention as the bolt is loose, its spring no doubt broken, so the cylinder will not lock up properly though the hammer cocks normally. (13A9100-447) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
160	Smith & Wesson Model 32-1 Double Action Revolver serial #92349, 38 S&W, 2" pinned barrel with a bright excellent bore. The metal surfaces of this improved flat latch revolver retain about 97% original blue showing some very minor operational wear and sparsely scattered light handling marks mostly noticeable under bright light. The hammer and trigger retain vibrant case-hardened colors throughout and the checkered walnut grips with silver S&W medallions remain in near excellent condition showing a couple tiny handling marks and one thin sliver missing along the checkering border of the right panel. The right panel is properly stamp-numbered to the gun and the action seems to function well mechanically with solid timing and lock-up. (13A9100-214) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
161	Smith & Wesson Model 37 Double Action Revolver serial #308711, 38 Special, 1 7/8" pinned barrel with a bright excellent bore. The metal surfaces of this improved flat latch Chiefs Special Airweight revolver retain about 98-99% original blue and anodized finishes showing just a little sharp edge wear and a small scratch along the left side edges of the frame. The hammer and trigger retain all of their vibrant case-hardened colors and the checkered walnut grips with silver S&W medallions remain in excellent condition with a couple minor handling marks. The right panel is properly stamp-numbered to the gun and the action seems to function well mechanically with solid timing and lock-up. A fine example. (13B9100-1076) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
162	Colt Detective Special Double Action Revolver serial #797861, 38 Special, 2" barrel with a bright excellent bore. The metal surfaces of this 1962-made revolver retain nearly 90% original blue that shows subtle thinning overall under bright light with most of the loss due to silvering along the high edges, holster wear and some light handling marks. The polished sides of the hammer remain mostly bright showing a little mild gray speckling and all markings are crisp and clear. The checkered walnut grips with silver Colt medallions are grease pencil-numbered matching the frame and remain in very good condition showing some lightly chipped points and an area of moderate smoothing along the bottom edge of the right panel. The action seems to function well mechanically with solid timing and lock-up. (13B9100-234) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
163	Colt Third Model Thuer Deringer serial #2439, 41 RF, 2 1/2" barrel with a partially bright about very good bore showing some scattered mild oxidation and pinprick pitting with otherwise strong rifling. The barrel retains about 50% original bright blue with the balance flaked to a mild gray-brown patina also showing some scattered thin scratches and areas of old oxidation. There are a few dings from the hammer nose along the back left edge of the barrel as is often seen. The frame retains about 90% original nickel finish with some flaking to pale ocher brass along the high edges, fine freckling and handling marks. The hammer shows good smoky case-hardened colors while the remaining small parts retain a healthy amount of bright fire blue. All markings remain crisp and clear and the smooth walnut grips remain in very fine condition showing strong varnish and some light dings and handling marks. The action seems to function well mechanically. (13A9100-63) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
164	Smith & Wesson No. 1 1/2 Second Issue Revolver serial #80647, 32 RF, 3 1/2" ribbed round barrel with a mostly bright very good bore showing what appears to be a couple small dings or tool marks along the lands, some lighter oxidation and otherwise strong rifling. The metal surfaces retain about 95-96% original nickel finish showing some fine flaking to mild gray-brown patina mostly along the forward edges of the cylinder along with some other small flakes and handling marks scattered about. The barrel hinge screw head shows some slight damage. The hammer shows good smoky case-hardened colors while the trigger is a smooth gray and the barrel markings remain crisp and clear. The smooth rosewood grips remain in near excellent condition retaining about 95% original varnish that shows some light flaking and handling marks. The right panel is properly stamp-numbered matching by serial number and the remaining numbered parts are matching by assembly number. Barrel-to-frame fit exhibits a little minor play and the action seems to function well mechanically with nice timing and lock-up. (13B9100-304) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
165	Smith & Wesson No. 1 Third Issue Revolver serial #86844, 22 RF, 3 3/16" ribbed round barrel with a partially bright about good bore showing some patches of light pitting and oxidation with good rifling. The metal surfaces of this revolver retain about 65% original thinning bright blue flaking to gray-brown with wear along the high edges and an area of cleaned light pitting on the right side frame and left topstrap. The hammer retains some wisps of case-hardened colors and the barrel markings remain crisp and clear. There are a few faintly scratched marks along the backstrap that are difficult to discern. The smooth rosewood grips remain in near excellent condition retaining about 95% original varnish showing some light handling marks. The right panel is properly stamp-numbered matching by serial number and the remaining numbered parts are matching by assembly number. Barrel-to-frame fit exhibits some play and the action seems to function well mechanically with good timing and lock-up. (13A9100-196) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400

Lot	Title/Description
166	Smith & Wesson No. 1 Second Issue Revolver serial #101823, 22 RF, 3 3/16" ribbed round with a mostly bright good bore showing some scattered areas of light pitting and oxidation with good rifling. The barrel and cylinder have been cleaned to a pewter gunmetal patina showing some remnants of pinprick pitting and oxidation staining. The barrel address remains crisp while the patent dates along the cylinder have softened somewhat remaining mostly intact and legible. The frame retains about 95% nicely tarnished silver finish showing some mild edge wear and light handling marks while the hammer shows some smoky remnants of colors. The smooth rosewood grips remain in very fine condition retaining about 92% original varnish that shows a flaked area along the base of the left panel and some other light handling marks. The right panel is properly stamp-numbered matching by serial number and the remaining numbered parts are matching by assembly number. Barrel-to-frame fit is very good and the action seems to function well mechanically with nice timing and lock-up. (13A9100-208) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
167	Smith & Wesson No. 1 1/2 First Issue Revolver serial #6278, 32 RF, 3 1/2" ribbed octagon barrel with a bright very fine bore showing some fine speckling and strong rifling throughout. The metal surfaces retain about 70% original bright blue with most of the loss due to some overall flaking to a pleasant gray-brown patina, some scattered freckling and light handling marks. The hammer retains a healthy amount of vibrant case-hardened colors while the ejector rod and trigger are an attractive silvery case-hardened patina. Some of the screw heads show some light slot or circumferential wear and the barrel markings are crisp and clear. The smooth rosewood grips remain in very fine condition retaining about 95% original varnish and the right panel showing some light scratches and dings nearer the top. The right panel is properly stamp-numbered matching by serial number and the remaining numbered parts are matching by assembly number. Barrel-to-frame fit exhibits moderate play and the action otherwise seems to function well mechanically with very good timing and lock-up. (13B9100-226) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
168	Colt Cobra Double Action Revolver serial #273027-LW, 38 Special, 3" barrel with a bright excellent bore. The metal surfaces of this 1968-made revolver retain about 96% original blue and anodized finishes showing a few thin scratches and most of the loss due to silvering along some of the high edges, more evident on the right side. The sides of the hammer are toning to pewter showing some mild oxidation staining and all markings remain crisp and clear. The replacement Pachmayr Presentation Compac grips remain in very fine condition showing some mild wear. The action seems to function well mechanically with solid timing and lock-up. (13B9100-679) {MODERN} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
169	Colt Agent Double Action Revolver serial #165307-LW, 38 Special, 2" barrel with a bright excellent bore. The barrel and cylinder of this 1965-made revolver retain about 95% original blue showing some scattered light dings and edge wear, the front surface of the front sight blade showing a lightly dressed ding. The frame retains about 85% original anodized finish showing moderate edge wear and the backstrap and rear left side worn to silvery pewter patina. The forward sideplate screw shows slot wear and the revolver is equipped with an unmarked hammer shroud in the factory style, missing its bottom retainer screw. The checkered walnut grips with silver Colt medallions are grease pencil-numbered to the gun and remain in good condition showing moderate edge wear and smoothing. The action seems to function well mechanically with very good timing and lock-up. This revolver has seen a fair amount of carrying and will probably be a good shooter. (13A9100-233) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
170	Rare U.S. T3 Carbine Action by Inland Division serial #00374. This is an original receiver with the arsenal integral scope base, a bolt and fire control group. The receiver appears to have been cut at some point, neatly re-welded and refinished in arsenal-quality Parkerization retaining about 95% showing some silvering along the high edges and scattered light handling marks. The trigger housing group is a darker black color while the trigger is a mild plum tone. The receiver shows proper markings with "U.S. CARBINE / CAL. 30 T3" on the right side and the action is in the correct serial number range. The hammer and flat bolt are Inland-marked components while the trigger housing appears to be unmarked. An interesting piece for the U.S. martial collector. (13B9101-25) {MODERN} [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
171	Colt Pocket Positive Double Action Revolver serial #156807, 32 Colt New Police, 2 1/2" barrel with a bright excellent bore. The metal surfaces of this 1937-made revolver retain about 85% original blue showing scattered high edge wear, freckling and light handling marks with the gripstraps and bow of the guard thinning and toning to a medium gray-brown patina. The polished sides of the hammer show a little mild oxidation staining while its back surface and the trigger retain full blue. The ejector rod head retains some good case-hardened colors and all markings remain crisp. The black checkered hard rubber grips are scratch-numbered to the gun and remain in near excellent condition showing some light handling marks. Timing is a hair off on a few chambers in single action and the action otherwise seems to function well mechanically. (13A9100-30) {C&R} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
172	Colt Pocket Positive Double Action Revolver serial #134098, 32 Colt New Police, 2 1/2" barrel with a bright excellent bore. The metal surfaces of this 1928-made revolver retain about 80-85% original blue showing moderate high edge wear, some scattered oxidation speckling and handling marks. The polished sides of the hammer show some mild staining while its back surface and the trigger retain strong blue. The ejector rod head retains strong case-hardened colors and the Rampant Colt on the sideplate was struck a little light as is sometimes seen though the blue is undoubtedly original and the barrel markings and "VP" proof are strong. The black checkered hard rubber grips are scratch-numbered to the gun and remain in very fine condition showing some light dings and scuffs. The action seems to function well mechanically with very good timing and lock-up. (13A9100-194) {C&R} [Richard "Stretch" Kennedy Collection] (150/250) Est. 150 - 250
173	Smith & Wesson 38 Single Action Second Model Revolver serial #101547, 38 S&W, 5" ribbed round barrel with a fair bore showing areas of light to moderate pitting and good rifling. The metal surfaces retain about 90% non-factory reapplied finish showing some rather rough polishing and buff marks beneath the finish along with areas of light pitting and remnants of oxidation staining. The barrel markings are softened and mostly legible and the hinge pin screw head has broken off, the threaded end still stuck in the hinge pin, and the other screw heads show slot wear. The black checkered hard rubber grips remain in very good plus condition showing some scattered light scuffs and dings retaining nice fit overall. The serialized parts appear to be matching, some numbers rather faint, barrel-to-frame fit is solid and the action seems to function well mechanically with very good timing and lock-up. (13A9100-376) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200
174	Smith & Wesson No. 1 Second Issue Revolver serial #60818, 22 RF, 3 3/16" ribbed octagon barrel with a moderately oxidized bore showing old pitting its full length and otherwise good rifling. The hammer and barrel are mostly a mottled gray patina showing scattered light pitting and a few minor dings, the protected bottom flat of the barrel and the ejector rod with some good original bright blue. The barrel address and patent dates along the cylinder remain mostly strong and the hammer shows smoky case-hardening. The frame retains about 85% silver finish thinning to mild ocher along the high edges and taking on a handsome dark tarnish overall. There are a couple small pits or imperfections along the right edge trigger sheath. The smooth rosewood grips remain in very fine condition retaining about 92% original varnish showing some scattered light handling marks, the right panel is properly stamp-numbered to the gun and their fit is excellent. The other numbered parts are matching by assembly number, barrel-to-frame fit exhibits a little minor play and the action is functional with good timing and lock-up a little loose. (13A9100-378) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400

Lot	Title/Description
175	Engraved Smith & Wesson No. 1 Third Issue Revolver serial #11554, 22 RF, 3 3/16" ribbed round barrel with a ring of heavy pitting about mid-bore, some scattered lighter pitting and evident rifling. The metal surfaces retain about 85% of an older reapplied nickel finish that shows some flaking to mild gray-brown mostly along the high edges of the cylinder and sides of the barrel. The engraving along the sides of the barrel and cylinder flats have softened somewhat from the refinishing though the embellishments along the frame remain intact and largely crisp. The engraving is quite handsome antique period embellishment with nicely detailed flowing foliate scrollwork with fine punch-dot shading and light geometric bordering. The screw heads show some slot wear, namely the cylinder stop screw which shows some damage, and the barrel markings remain intact and mostly strong. The smooth rosewood grips remain in very good condition left and about good condition right, the right panel with a 1" crack at the base and both panels are mostly devoid of varnish. The right panel is properly stamp-numbered matching by serial number and the other numbered parts appear to be matching by assembly number. Barrel-to-frame fit is quite loose and the action will require mechanical attention as the stop springs are broken so the cylinder does not time or lock up properly though the hammer cocks and holds normally. (13A9100-362) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (350/550) Est. 350 - 550
176	National Arms Co. Front-Loading Revolver serial #25110, 32 Teat-fire, 3 1/4" barrel with a fair bore showing moderate oxidation and good rifling. This example is equipped with a hooked extractor mounted to the right side of the frame. The barrel retains perhaps 40% of its flaking and deeply tarnished original silver finish, the balance toning to a mix of gunmetal and oxidized brown patina. The cylinder is also a mix of gunmetal and gray-brown showing areas of old oxidation, the hammer and extractor similar with the hammer retaining a few subtle streaks of fire blue. The barrel and cylinder markings are rather soft and partially legible and the frame is a mild ocher patina showing some overall light dings and handling marks retaining strong factory foliate embellishments. The smooth walnut grips are stamp-numbered matching by assembly number and remain in about good condition showing worn finish and moderate dings. A small tension detent for the extractor appears to be missing and barrel-to-frame fit exhibits considerable play; the action is not functional. (13A9100-476) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
177	Colt Third Model Thuer Deringer serial #19817, 41 RF, 2 1/2" barrel with a bright very fine to near excellent bore showing a few sparsely scattered spots of mild oxidation and otherwise crisp rifling. The barrel of this standard production example is mostly a ray-brown patina showing scattered light pitting and oxidation staining with some flakes of original bright blue lurking about the protected areas. The hammer retains a hint of smoky colors in the protected areas and the sides of the trigger show pale fire blue. The barrel markings remain strong and the arm also shows small period Birmingham proof marks. The frame has toned to a pleasant ocher patina showing a few minor handling marks. The smooth walnut grips remain in very fine condition retaining about 85% original varnish that shows some overall flaking along with some light handling marks. Grip fit is excellent and the left panel is ink-numbered matching the frame. The half cock notch is worn and the action otherwise seems to function normally. (13A9100-366) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
178	U.S. Navy Remington Model 1867 Rolling Block Pistol serial #2887, 50 CF, 7" barrel with a fair-good bore showing old pitting its full-length, some areas more moderate, and good rifling. The barrel is a deep gray-brown patina showing overall light pitting and oxidation staining, the frame similar showing some scattered flakes of silvery case-hardened patina. The sides of the breechblock also retain some generous straw color and all markings are otherwise intact and quite strong showing Remington information on the left side frame, "P / F.C.W" on the right and "I / W.D.W / (Anchor)" atop the barrel. The smooth walnut grip and forend remain in good condition showing some scattered shallow small chips, abrasions and dings, the forend with a bit more wear and the bottom left side grip retaining a softened inspector cartouche. All numbered parts are matching by assembly number "42" and the action seems to function well mechanically. A good example piece of these U.S. Navy pistols for the Remington or martial collector. (13B9100-501) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
179	Remington-Rider Pocket Cartridge Revolver serial #386, 32 RF, 2" octagon barrel with a mostly bright very good bore showing some areas of mild oxidation and otherwise strong rifling. The metal surfaces of this revolver retains about 90% original full nickel finish showing scattered light flaking to gray-brown patina along the high edges, these areas also with a little pinprick pitting, and some scattered light handling marks. The scarce 2" barrel shows the simplified marking "REMINGTON'S ILION.N.Y." The black checkered gutta-percha grips are stamp-numbered to the gun and remain in very good condition showing moderate smoothing overall and some light handling marks. The barrel and frame are matching by serial number and the cylinder and back cover plate show matching assembly number "390". The half cock notch is a little worn and the action otherwise seems to function normally with good timing and lock-up. An attractive example with the desirable short barrel length. (13B9100-437) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
180	Smith & Wesson No. 1 1/2 Second Issue Revolver serial #104895, 32 RF, 3 1/2" ribbed round barrel with a moderately oxidized bore showing evident rifling throughout. The metal surfaces retain about 80-85% original nickel finish with most of the flaking along the cylinder toning to gray-brown patina, some scattered smaller flakes, light dings and freckling. The barrel markings remain mostly intact and strong with a few small areas obscured by old oxidation. The smooth rosewood grips remain in very fine condition showing somewhat worn finish and otherwise retain excellent fit. The right panel is properly stamp-numbered matching by serial number and the other numbered parts are matching by assembly number. Barrel-to-frame fit exhibits moderate play and the action will require some mechanical attention as the hand appears to have lost its spring tension and does not engage the cylinder to turn. The hammer and cylinder stop otherwise appear to function normally. (13A9100-259) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (250/450) Est. 250 - 450
181	Colt Model 1849 Pocket Percussion Revolver serial #189502, .31 cal, 4" octagon barrel with a moderately oxidized bore showing strong rifling. The metal surfaces of this 1861-made revolver have mostly toned to a mix of gunmetal and mild gray-brown patina showing scattered old light pitting, dings and oxidation staining. Most of the screw head slots show wear that has been lightly dressed, the rammer screw an old replacement, and the markings remain mostly intact and strong, the barrel showing New York address. The scene along the five-shot cylinder remains quite good showing some areas of mild softening to be expected. The gripstraps show some scattered light dings and retain a healthy amount of original silver finish, perhaps 85%, which has taken on a very attractive tarnish. The smooth walnut grip is ink-numbered to the gun and remains in very good plus condition retaining strong original varnish showing some light dings and dents, more noticeable along the left side. One of the barrel locator pins on the frame has been lost to the years and the wedge is rather loose. All of the serialized parts are otherwise matching including the wedge and timing is a bit off but the action otherwise remains functional. (13B9100-98) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
182	Stevens No. 43 Diamond Second Issue Pistol serial #42942, 22 RF, 6" barrel with a moderately oxidized bore showing evident rifling throughout. The barrel retains generous original blue thinning and toning to gray-brown patina and showing some areas of old mild oxidation. The frame retains about 95% original nickel finish showing some scattered fine flaking and light handling marks while the small parts show some nice fire blue. The top edge of the barrel release button screw head has broken off. The smooth walnut grips remain in very fine condition showing some scattered light handling marks. The pistol is equipped with standard target-style sights and the barrel is matching the frame. Barrel-to-frame fit exhibits a little bit of play and the action otherwise seems to function well mechanically. (13A9100-495) (C&R) [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200

Lot	Title/Description
183	Stevens No. 43 Diamond Second Issue Pistol serial #54357, 22 RF, 6" barrel with a mostly bright very good bore showing some scattered areas of fine oxidation and strong rifling. The barrel retains about 60% original blue thinning and toning to a mild gray-brown patina and showing a few areas of old light pitting nearer the muzzle. The frame retains about 95% original nickel finish with most of the loss due to a flaked area on the left side that is toning to a deep brown. The small parts retain strong blue and the smooth walnut grips remain in near excellent condition showing some mild handling marks. The pistol is equipped with standard target-style sights and the barrel is mismatched from the frame numbered "54901". Barrel-to-frame fit exhibits some minor play and the action otherwise seems to function well mechanically. (13A9100-399) (C&R) [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200
184	Sharps Model 1A Pepperbox Pistol serial #46258, 22 RF, 2 1/2" four-barrel cluster with oxidized bores showing rather strong rifling. The barrels, hammer and trigger are a deep gray and gray-brown patina showing some areas of old moderate oxidation while the brass frame is a nice ocher patina showing some scattered tiny pits and light handling marks. The frame retains very nice markings and the black floral pattern gutta-percha grips remain in very fine condition, the left panel with a thin sliver missing along the bottom edge. Barrel-to-frame fit exhibits a little minor play, the hammer nose rotates intermittently and the hammer otherwise seems to function normally. (13A9100-481) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
185	Engraved Smith & Wesson No. 1 1/2 Second Issue Revolver serial #82596, 32 RF, 3 1/2" ribbed round barrel with a moderately oxidized bore showing some good rifling. This is an attractive revolver with handsome New York engraving and factory mother-of-pearl grips that has sadly suffered from a bit of poor storage particularly along its left side, but it remains a good example overall. The metal surfaces retain about 70% period nickel finish with most of the loss along the left side frame and sideplate that have toned to gunmetal and oxidized brown and show some patches of rather heavy pitting and corrosion. Otherwise there are just some light dings along the left bottom strap of the frame, some scattered more minor flakes and handling marks. The engraving is fine quality featuring nicely detailed wide flowing foliate scroll with punch-dot shading, some light geometric bordering and crosshatched panels flanked by scroll along either side of the barrel. The hinge screw head shows some slot wear and the barrel markings remain quite crisp. The smooth mother-of-pearl grips are both scratch-numbered to the gun and remain in very fine condition showing a few thin scratches and some slight discoloration retaining excellent fit. The barrel and cylinder are matching the frame by assembly number and one of the thin cylinder stop springs is broken but this is relatively minor. Barrel-to-frame fit is very good and the action does not always cycle as a few of the ratchet teeth appear to be worn, the hammer otherwise cocks normally. A nice engraved No. 1 1/2 revolver. (13B9100-431) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
186	Hopkins & Allen XL Single Action Pocket Revolver serial #2122, 30 RF Long, 2 1/2" barrel with a moderately oxidized bore showing some good rifling. The metal surfaces retain about 60% original nickel finish showing some scattered flakes and lightly cleaned areas that are toning to a mild gunmetal patina and blending in with the surrounding nickel along with some areas of cleaned pinprick pitting and old oxidation staining. The barrel and topstrap markings remain intact and crisp and the revolver wears a set of what very much appears to be smooth polished genuine stag grips that remain in very fine condition showing a nice patina and retaining very good fit. The grips are numbered to the gun, appearing to have been numbered more recently with a blue ballpoint pen, though the right panel also shows an older pencil-marked "No. 2122". The front sight is missing and the action will require some attention as the hand is also missing so the cylinder does not rotate. The hammer otherwise remains crisp. (13A9100-1068) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
187	Engraved Smith & Wesson 38 Safety Hammerless Revolver serial #159609, 38 S&W, 3 1/4" ribbed round barrel with a partially bright fair bore showing areas of moderate oxidation and light pitting with good rifling. The metal surfaces of this revolver are extensively embellished with very good quality period engraving, the fine line bordering on the sides of the frame and circle around the right-side S&W monogram were executed a little unevenly, but it is otherwise quite nice consisting of finely detailed foliate scrollwork with punch-dot shading. The metal surfaces retain perhaps 65-70% nickel finish with some more noticeable loss along the left side frame and barrel, and along the cylinder, these areas toning to a mix of pewter gunmetal and mild gray-brown that are blending in rather well with the surrounding nickel. There are some other areas of fine pitting and oxidation staining again and the latch and triggerguard are a relatively even mix of original bright blue and gray-brown patina. The factory markings remain intact and strong and the trigger shows good case-hardened colors. The smooth mother-of-pearl grips are un-numbered period replacements that remain in good condition showing some scattered dings, light flakes and minor discoloration. The remaining serialized parts are matching, barrel-to-frame fit is very good and the action seems to function well mechanically with very good timing and lock-up. (13B9100-689) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
188	Engraved Smith & Wesson No. 1 1/2 Single Action Revolver serial #23715, 32 S&W, 3" ribbed round barrel with a fair bore showing light oxidation its full-length and otherwise strong rifling. The metal surfaces of this revolver retain about 30-35% nickel finish strongest along the right side with the balance flaked to medium gray-brown patina showing some old light pitting and oxidation staining, more moderate along the cylinder. The arm is extensively embellished with nice quality period engraving featuring nice detailed foliate scrollwork and punch-dot shading. The serial number has been mostly ground off of the frame and back of the cylinder but the barrel and latch retain their full number listed above. The barrel markings remain intact and strong and the black checkered hard rubber grips remain in very fine condition showing some scattered light handling marks. Barrel-to-frame fit is solid, the bolt will require a little attention as it does not lock the cylinder when the action is at rest, and it otherwise seems to function normally at full cock. (13B9100-M74) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
189	Rollin White Arms Co. Single Action Pocket Revolver serial #7974, 22 RF, 3" ribbed octagon barrel with a partially bright about very good bore showing a few patches of moderate oxidation and light pitting, the rifling otherwise quite crisp. The barrel retains perhaps 70% original bright blue showing some scattered flaking to mild gray-brown patina and some light dings along the bottom flat. The base pin head shows some moderate tool marks while the cylinder has mostly flaked to gray-brown patina showing a few small dings. The barrel address shows the Smith & Wesson marking and remains crisp and the cylinder patent dates are a little soft and mostly legible. The frame retains a healthy amount of nicely tarnished silver finish mixing with mild ocher brass and showing some light handling marks. The hammer shows a small chip along the right edge of the spur and otherwise retains generous smoky case-hardened colors. The smooth rosewood grips remain in very good plus condition, the original varnish showing moderate flaking overall, and they otherwise retain perfect fit. The grips and cylinder are matching the frame by assembly number and the action seems to function well mechanically with very good timing and lock-up. A very respectable example of these important revolvers. (13A9100-303) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (350/550) Est. 350 - 550

Lot	Title/Description
190	Smith & Wesson 38 Single Action Second Model Revolver Converted to Rimfire serial #29733, 22 RF, 4" sleeved barrel with a fair bore showing light pitting and oxidation its full-length and otherwise good rifling. The metal surfaces retain about 75% original nickel finish with most of the flaking along the sides of the barrel and high edges of the cylinder toning to gray-brown and showing some mild oxidation staining with some other light handling marks and smaller flakes, the nickel with some areas of honest clouding. The front surfaces of the trigger sheath have been ground back somewhat by a previous owner to better expose the trigger and some of the screws show slot wear. The original cylinder was utilized and modified with chamber sleeves and the original ejector also expanded upon to support the smaller cartridges. The black checkered hard rubber grips remain in very good condition showing some mild smoothing, light handling marks and toning to brown. Grip fit is very nice and the grip screw appears to be an old replacement. The barrel and cylinder are matching the frame and the latch is numbered "76490". Barrel-to-frame fit exhibits a hint of minor play and the action generally seems to function well mechanically with timing just a bit off on one chamber. An interesting example. (13A9100-313) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (250/450) Est. 250 - 450
191	Stevens No. 43 Diamond Second Issue Pistol serial #32553, 22 RF, 6" barrel with a moderately oxidized bore showing evident rifling throughout. The barrel retains about 70% original thinning blue showing scattered light handling marks and some freckling while the frame retains about 95% of a reapplied bright chrome finish showing a few light flakes around the hinge screw and other mild handling marks. The small parts retain good blue finish and the hinge screw and barrel release button are older replacements. The smooth walnut grips remain in about very good condition showing remnants of a thinning black varnish and some other light handling marks. The barrel is matching the frame and the sights appear to have been polished bright, the front sight a target globe and the rear with a v-notch rear. Barrel-to-frame fit is very good and the hammer seems to function well mechanically. (13A10759-33) {C&R} (75/150) Est. 75 - 150
192	Smith & Wesson No. 1 1/2 First Issue Revolver with Interesting Modified Trigger serial #18552, 32 RF, 3 1/2" ribbed octagon barrel with a moderately oxidized bore showing good rifling throughout. This revolver shows an interesting modification to its trigger that appears to have been done during the period of use. The bottom edges of the trigger sheath have been relieved on either side and now have a pinned-in articulating thin trigger fly that is a separate component from the sear itself. When cocked, this trigger flips forward and pushes back on the sear to release the hammer. The work is rather elaborate and obviously not something undertaken by an amateur, consultation with Smith & Wesson historians indicate it is not a known factory modification. The metal surfaces retain about 95% reapplied nickel finish showing some lightly flaking areas mostly at the muzzle and sharp edges of the cylinder along with some other light handling marks. There are some peen marks along the barrel near the hinge point to tighten its fit and the markings are rather faded from the refinishing. The smooth rosewood grips may be old replacements as they show no numbers and seem to be a little wider than usual, otherwise remaining in very good condition showing some light dings and handling marks. The barrel and cylinder are matching the frame by assembly number and the front sight blade has also been slightly modified. Barrel-to-frame fit is very good and the action seems to function well mechanically with good timing and lock-up. An interesting example for the antique arms collector. (13B9100-372) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
193	Colt Model 1878 Double Action Revolver serial #16330, 45 Colt, 7 1/2" barrel with a moderately oxidized bore showing some good rifling. The metal surfaces of this 1886-made revolver are mostly a dark oxidized brown patina showing old oxidation and light pitting, the barrel with thin moderate scratches its full-length. The screw heads show light to moderate slot and circumferential wear and there is a small added screw on the sideplate. The single line barrel address remains mostly legible and the ejector rod assembly is no longer present. The black checkered hard rubber grips rate fair-good showing significant smoothing overall and the right panel with a thin chip at the heel. The action will require mechanical attention as the cylinder does not lock and both double and single action are non-functional. A salty old Model 1878. (13B10759-20) {ANTIQUÉ} (300/500) Est. 300 - 500

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
194	Smith & Wesson 32 Regulation Police Revolver serial #266794, 32 S&W Long, 3 1/4" barrel with a bright excellent bore. The metal surfaces of this pre-war five-screw revolver retain about 94-95% original blue with most of the loss due to some high edge wear mostly along the cylinder, and scattered oxidation speckling, a small ding also present along the topstrap and front sight blade. The hammer and trigger show lovely case-hardened colors and all markings remain intact and crisp. The checkered walnut extended grips with gold S&W medallions remain in very fine condition showing some scattered lightly chipped points and minor handling marks. The right panel is properly pencil-numbered to the gun and the base of the left retains a crisp patent date stamp. There is a period lanyard ring installed which is held in by the grips only, and does not affix to or contact with the inside of the frame. Trigger reset is a little sluggish and require some assistance on a few chambers, the mechanism perhaps needing a good cleaning, it otherwise seems to function normally. (13A9100-764) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
195	Swedish M40 Lahti Semi-Auto Pistol by Husqvarna serial #19010, 9mm, 4 3/4" barrel with a bright very fine bore showing some light frosting and strong rifling. The metal surfaces of this pistol retain about 85% arsenal blue showing some moderate high edge wear, scattered handling marks and small dings here and there. All markings remain intact and strong with the typical maker and inspector stamps along with "F12 / 458" at the rear left receiver. The top of the receiver shows arsenal removed and filled-in loaded chamber indicator. The black checkered Bakelite grips remain in very fine condition showing a couple shallow chips and dings. There are a couple of very fine hairline cracks forming above the left receiver rail near the accelerator, this model is notorious for developing cracks around the accelerator so this should always be kept in mind. The action otherwise seems to function normally and one original magazine is included. (13A9100-499) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
196	Finnish L-35 Lahti Semi-Auto Pistol by Valmet serial #9212, 9mm, 4 3/4" barrel with a mostly bright very good bore showing some fine oxidation in the grooves and otherwise strong rifling. The metal surfaces retain about 80% original blue showing moderate high edge wear and most of the loss along the gripstraps which have toned to pewter gunmetal patina along with some other light handling marks and areas taking on a plum tone. The ejector shows some good fire blue and the receiver was made without the loaded chamber indicator. The reddish brown checkered Bakelite grips remain in near excellent condition. The rear sight notch has been slightly modified to a square notch and the front sight is a large replacement brass blade. There is an evident crack in the receiver near the accelerator and no firing pin is present. The action otherwise seems to function normally and one Swedish Husqvarna-made M40 magazine is included. (13B9100-69) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
197	Unmarked American Single Shot Deringer Pistol serial #1109, 30 RF, 3 3/4" octagon barrel with an oxidized bore showing some evident rifling. This is a pivot breech pistol in the familiar form of the Bacon or Merwin & Bray but appears to be completely unmarked beyond the serial number. The shape of the sides of the frame are in fact more similar to the Cowles & Son pistol, though this example is square butt and with a full octagon barrel. The barrel is mostly a gray-brown patina showing some scattered old oxidation and handling marks with some sparse flakes or streaks of original bright blue here and there. The frame is a pleasant ocher patina retaining some strong tarnished silver finish. The smooth rosewood grips remain in very good plus condition showing a small crack along the base of the left panel, somewhat worn finish and light handling marks. The right panel is stamp-numbered matching the frame and the barrel is also matching. Barrel-to-frame fit exhibits a little play and the hammer seems to function well mechanically. (13A9100-47) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200

Lot	Title/Description
198	Colt New Line 22 Pocket Revolver serial #4240, 22 RF, 2 1/4" barrel with a mostly bright very good plus bore showing a few small spots of mild oxidation and strong rifling throughout. The metal surfaces retain about 95% original nickel finish with most of the loss due to some flaked areas along two cylinder flutes and flats toning to gray-brown, and some other tinier flakes and light handling marks. The markings remain strong and the small parts retain a healthy amount of bright fire blue, the hammer spur with a little oxidation speckling. The smooth rosewood grips remain in very fine condition retaining strong original varnish showing some scattered light handling marks. The left panel is pencil-numbered to the gun, the right is un-numbered and their fit is very fine. The action seems to function well mechanically with very good timing and lock-up. (13B9100-45) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
199	Harrington & Richardson No. 777 Ultra Sportsman Single Action Revolver serial #U25, 22 LR, 6 1/4" barrel with a bright near excellent bore. The metal surfaces of this revolver retain about 94% original blue with the frontstrap toning to gray-brown, some scattered light oxidation speckling or flaking and two small areas of pinprick pitting along the right side barrel and topstrap edge. All markings remain intact and strong, the left side barrel with nice etched model designation and the cylinder showing dual stamped patent numbers. The sides of the hammer and grooved trigger remain mostly bright showing a little fine oxidation speckling while the back surface of the hammer shows lovely vibrant case-hardened colors. The checkered walnut target grip remains in about very good plus condition showing a few shallow minor chips along the right bottom edge, a couple light scratches and dings. The grip shows some attractive grain figure throughout, befitting the premier nature of this model, and the original target sights are intact. Barrel-to-frame fit is very good, the serialized parts are matching and the action seems to function well mechanically with very good timing and lock-up. An attractive and very early example of these fine target revolvers. (13B9100-160) {C&R} [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200
200	Remington Vest Pocket Pistol serial #14140, 22 RF, 3 1/4" barrel with an oxidized bore showing evident rifling. The metal surfaces retain perhaps 40% original bright blue with the balance flaking and toning to gray-brown and pewter gunmetal patina showing some overall oxidation speckling and some old light pitting. The hammer and trigger show fading fire blue and the maker markings and patent date over the breech are crisp and clear. The smooth rosewood grips remain in very fine condition. The brass pin front sight is a little bent and the rear frame screw is an old slightly ill-fitting replacement that does not seat all of the way causing the grip frame to exhibit some play. The action otherwise seems to function normally. (13A9100-154) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
201	Remington Vest Pocket Pistol serial #3819, 22 RF, 3 1/4" barrel with an oxidized bore. The metal surfaces have mostly toned to gunmetal and gray-brown patina showing scattered old pinprick pitting and some light to moderate dings or old tool marks. The Remington address and patent date atop the breech have softened somewhat and remain mostly legible while the smooth walnut grips are good showing worn finish and scattered dings. The front sight is a modified brass square post and the action seems to function normally. (13A9100-155) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200
202	Colt New Line 41 Pocket Revolver serial #4697, 41 CF, 2 1/4" barrel with a partially bright good bore showing some scattered mild oxidation and strong rifling throughout. The metal surfaces are mostly a mix of deep gunmetal and gray-brown patina showing some scattered partially smoothed-over old pitting, light dings and tool marks, these more moderate along the edges of the cylinder. The barrel address and cartridge marking on the left side frame remain completely intact and strong. The smooth rosewood grips remain in very fine condition retaining a healthy amount of original varnish with some scattered light dings and handling marks. The grips appear to be pencil-numbered to a different gun though their fit is very nice. The mainspring appears to be a more modern replacement and the action remains functional with timing and lock-up a little off. (13A9100-260) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (150/250) Est. 150 - 250

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
203	Smith & Wesson 32 Double Action Revolver serial #163997, 32 S&W, 3 1/2" ribbed round barrel with a fair-good bore showing light oxidation its full-length and good rifling. The metal surfaces retain about 85% original nickel finish showing some overall light flaking to gray-brown patina, some more moderate flaking along the frontstrap and other light handling marks. The latch and triggerguard retain a healthy amount of original bright blue while the hammer and trigger show nice case-hardened colors. The barrel markings remain mostly strong and the black checkered hard rubber grips remain in very fine condition showing some mild handling marks. The right panel is properly scratch-numbered to the gun and the remaining numbered parts are matching. Barrel-to-frame fit is solid and the action seems to function well mechanically with very good timing and lock-up. (13A9100-58) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (150/250) Est. 150 - 250
204	Smith & Wesson No. 1 Third Issue Revolver serial #91116, 22 RF, 3 3/16" ribbed round barrel with an oxidized bore showing evident rifling. The metal surfaces retain about 65% of an older reapplied nickel finish with heavy flaking along the cylinder and right side barrel toning to oxidized brown, some areas of bubbling finish and light handling marks. The hammer is a deep smoky gray patina and the barrel markings remain mostly crisp. The smooth rosewood grips remain in very good plus condition now mostly devoid of finish and showing a few minor handling marks. The right panel is stamp-numbered matching the frame and the assembly numbers on the barrel and cylinder are difficult to discern. Barrel-to-frame fit shows moderate play and the action is functional with good timing and lock-up a little loose. (13A9100-243) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200
205	Cased Reproduction Colt Model 1847 Walker Percussion Revolver .44 cal, 9" barrel with a bright excellent bore. The barrel retains about 95% original blue with most of the loss due to the bottom flat and underside worn to gray-brown patina where a serial number and likely Italian proofs were removed. The cylinder remains in-the-white and shows a nice rolled scene while the frame and loading lever show attractive dark case-hardened colors, again the underside flat of the frame is a mottled patina where the serial number was intentionally removed. The hammer is a mottled pewter patina while the backstrap retains about 98% original blue and the triggerguard a similar amount of silver finish that is beginning to tarnish. The smooth walnut grip rates very fine showing some finish wear along the edges. The action seems to function well mechanically with very good timing and lock-up. The included modern wooden case shows some moderate scuffing along the exterior lid and the interior is lined in red velvet that shows some staining and scuffing. There is a facsimile antique instruction sheet affixed to the inside lid and the case holds a reproduction "COLTS PATENT"-marked powder flask, single cavity bullet mould and empty cap tin with facsimile Eley label. (13A9100-1183) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
206	Beretta Model 1934 Semi-Auto Pistol serial #652347, 380 ACP, 3 1/2" barrel with a bright near excellent bore showing a hint of minor frosting and strong rifling throughout. The metal surfaces of this 1937-dated pistol retain about 90% original blue showing some high edge and holster wear, light oxidation speckling along the gripstraps and some fine pinprick pitting along the left side edges of the slide. As is commonly seen on these pistols, the slide is taking on a deep plum tone while the frame is a slight plum-brown under bright light. The hammer is a deep gray case-hardened patina and all markings are intact and strong with the left rear of frame showing "(Crown) / RE" stamp. The metal-backed black Bakelite grips with "PB" monograms remain in very fine condition showing a few minor dings or handling marks. The serialized parts are matching and the action seems to function well mechanically. The pistol includes two original magazines in very fine condition, both with slightly different styles of finger extension floorplate, and an original green leather flap holster that rates very about good plus showing some light staining, scuffs and some areas of white mildew that will probably clean up with some careful attention. All stitching and hardware are otherwise intact. (13B10762-20) {C&R} (500/700) Est. 500 - 700

Lot	Title/Description
207	Smith & Wesson Victory Model Double Action Revolver with Identified USN Holster serial #V248556, 38 Special, 4" barrel with a bright excellent bore. The metal surfaces of this revolver retain about 60% original Parkerized finish showing moderate edge wear, areas toning to gray-brown patina and some overall light oxidation staining. The hammer and trigger show fading remnants of smoky case-hardening along with some old oxidation staining. All markings remain intact and strong, the topstrap with a flaming bomb and "U.S. PROPERTY G.H.D." and the bottom of the frame also showing a flaming bomb stamp. The smooth walnut grips remain in good condition having darkened from the years and showing a few shallow smoothed-over light chips and dings. The right panel is stamp-numbered to a different gun and the remaining numbered parts are matching. The lanyard ring is present and the action will require mechanical attention as timing and lock-up start to get rather off as the arm is cycled in double action though single action seems to function normally. The revolver includes a rather nice Boyt 43-dated leather shoulder holster with embossed "US" on the front and "USN" stamp on the back. The holster shows some mild scuffing and creasing with all stitching intact and strong, the brass hardware with moderate verdigris forming overall. The front of the holster is also scratched with the sailor's name, rating and unit: "VT" designating a torpedo squadron, "Brunson, C.W.", and what appears to be "A.O.M. 2/c". The "A" is a little peculiar looking but is the most sensible possibility denoting Aviation Ordnanceman Second Class. U.S. Navy torpedo squadrons flew Douglas TBD Devastator and Grumman TBF Avenger aircraft extensively in the Pacific Theater. (13A9100-960) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
208	Colt New Line 32 Pocket Revolver serial #14048, 32 RF, 2 1/4" barrel with a partially bright very good bore showing a few patches of oxidation and light pitting with otherwise strong rifling. The metal surfaces retain about 70% original nickel finish showing moderate flaking to gray-brown patina along the right side barrel and throughout the cylinder, these areas also with some freckling and oxidation staining. The nickel along the frame has taken on some honest clouding and the base pin head shows some heavy tool marks along the sides. The markings remain mostly strong with the left side barrel retaining a rather nice etched marking. The back surface of the hammer and sides of the trigger retain a healthy amount of fire blue. The smooth rosewood grips remain in very fine condition showing some good original varnish with scattered minor handling marks. The right panel is pencil-numbered to the gun and their fit is very nice. The action will require mechanical attention as it gets hung up on most of the chambers. (13A9100-38) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
209	Fine Remington Model 95 Double Deringer serial #797, 41 RF, 3" barrels with good bores showing light pitting and oxidation their full-length and otherwise strong rifling. This is an attractive antique deringer retaining about 96-97% original nickel finish showing a few sparsely scattered light flakes and freckles, the left edge gripstrap on the frame showing the most evident thinning of the finish. The nickel exhibits some slight honest clouding and there appear to be a some slight imperfections in the metal near the hinge manifesting as what appear to be tiny pits beneath the finish but the finish appears original in every respect. The barrel rib shows strong markings with E. Remington & Sons address and the extractor and barrel catch have mostly toned to gray showing a little oxidation speckling. The hammer and sides of the trigger otherwise show lovely brilliant fire blue and the smooth rosewood grips remain in very fine condition showing lightly flaking original varnish and some light handling marks. The hinge is intact and solid, barrel lockup is very nice and the action seems to function well mechanically with a crisp hammer. A lovely example for the Remington or American antique arms collector. (13B9100-203) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
210	Colt Pocket Positive Double Action Revolver serial #152496, 32 Colt New Police, 2 1/2" barrel with a mostly bright very good plus bore showing a few small areas of oxidation and light pitting with otherwise strong rifling. The metal surfaces of this 1934-made revolver retain about 65% original nickel finish with most of the loss due to large flaked areas along the right side frame that are now mostly a mild gray and pewter gunmetal patina, along with some scattered smaller flaked areas along some of the edges and other light handling marks. There are a few small dings along the front sight and one minor dent at the muzzle at the 6 o'clock position that does not impinge upon the bore. The nickel exhibits some nice honest clouding overall and the markings remain intact and strong. The revolver wears a set of non-factory period mother-of-pearl grips that remain in good condition showing some flaking along the edges, more moderate along the top of the right panel, and there are some small synthetic repairs at the toe of each panel. The grips are un-numbered and fit rather well. The firing pin shows an old repair and the action otherwise seems to function well mechanically with solid timing and lock-up. (13A9100-191) {C&R} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
211	Continental Arms Co. Pepperbox Pistol serial #263, 22 RF, 2 1/2" five-barrel cluster with about very good bores showing bright areas and small patches of light oxidation and pitting with otherwise strong rifling. The barrel flutes retain some generous original bright blue with the balance of the metal surfaces flaked and toning to a mix of gray-brown patina along with some oxidation staining and speckling. The barrel markings remain crisp and clear while the hammer retains some nice case-hardened colors. The rosewood grips have darkened from the years and remain in very fine condition showing a few dings and handling marks. The right panel is pencil-numbered to the gun and the barrels are also matching. The barrel retainer collar has been lost to the years and a small steel block used in its stead. It is just small slightly curved rectangular piece that has been fitted into the original collar dovetail and affixed with a screw. This quick fix does its job retaining the barrels though it does impinge upon the action timing coming up short. The barrels do otherwise cycle and the hammer functions normally. (13A9100-229) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
212	Colt Army Special Double Action Revolver serial #518365, 38 Special, 6" barrel with a bright excellent bore. The metal surfaces of this 1925-made revolver retain about 94-95% original blue with most of the loss due to some light high edge wear, a few cleaned pinprick pits along the sides of the barrel, and the cylinder with a couple light scuffs and mild circumferential marks. The polished sides of the hammer are mostly bright showing a little mild oxidation speckling and the ejector rod head shows vibrant case-hardened colors. The markings remain intact and strong. The checkered walnut grips with silver Colt medallions remains in very good plus condition showing some lightly chipped points and light handling marks. The grips are un-numbered and not quite fitted perfectly but are serviceable. The action seems to function well mechanically with solid timing and lock-up. (13B9100-132) {C&R} [Richard "Stretch" Kennedy Collection] (400/500) Est. 400 - 500
213	Colt Model 1862 Police Percussion Revolver serial #226, .36 cal, 5 1/2" round barrel with an oxidized bore showing evident rifling. This is something of a "composed" revolver with modified brass blade front sight, newer replacement reproduction loading lever assembly and completely restamped serial number on the barrel, frame and backstrap, with the cylinder partially restamped and the triggerguard with just the "6" restamped. The backstrap indeed appears to be a more modern replacement as well and the wedge and arbor are un-numbered. The metal surfaces are mostly a dark brown patina showing overall dings, light pitting and oxidation staining. The barrel address, "COLTS PATENT" on the frame and patent date within the cylinder flute remain mostly intact and the gripstraps are a mild goldenrod patina showing scattered light dings. The smooth walnut grip remains in very good plus condition showing scattered light dings, again possibly a more modern replacement, and is pencil-numbered "26241". The action seems to function normally. (13A9100-117) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400

Lot	Title/Description
214	J.P. Sauer & Sohn 38H Semi-Auto Pistol with German Army Markings serial #440776, 32 ACP, 3 1/2" barrel with a bright excellent bore. The metal surfaces of this pistol retain about 92% original blue showing some mild high edge wear, some light handling marks and a spot of minor oxidation on the backstrap. The edges of the barrel breech end show a few dings and dents and the alloy trigger is a mild gray tone. All markings remain intact and crisp showing proper "(Eagle) / N" commercial proofs, German Army "(Eagle) / 37" Waffenamt on the left side frame and the left side slide marked only with the caliber designation though still retaining the manual safety lever. The original black checkered Bakelite grips remain in good condition right and poor condition left. The right shows a thin crack above the screw and the left shows a chip missing adjacent the screw and partially repaired moderate cracks throughout. The slide is matching the frame and the action will require some mechanical attention as double action is not dropping the hammer and the recoil spring is a rather weak replacement. Single action and the cocking/de-cocking lever seem to function normally. (13B9100-446) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
215	Very Late J.P. Sauer & Sohn 38H Semi-Auto Pistol serial #511217, 32 ACP, 3 1/2" barrel with a bright near excellent bore showing a hint of minor frosting and strong rifling. This is an extremely late production pistol that is not stamped with any proof marks, just showing the serial number on the left side frame and simple caliber designation on the non-safety lever slide, the bottom front edge of the slide is off by a couple numbers "215". The metal surfaces retain about 85% original blue showing some high edge wear, gripstraps thinning to gray and scattered mild oxidation speckling along the slide. The alloy trigger is the familiar gray tone and this pistol is equipped with a somewhat crude and enlarged cocking/de-cocking lever. The lever does not fit the style of typical pistols but appears to be of older period make. The original black checkered Bakelite grips remain in about good condition, the right panel showing a thin crack above the screw and the left with some thin chips mostly along the upper edge. The lever spring tension is rather loose though it does function and the action is functional in double action though single action will require attention as it does not drop the hammer. Included with this pistol are two original magazines that show some scratches and light operational wear, one with a noticeable dent on the spine near the bottom. Also included is a brown leather flap holster with the inside flap coded "RBN / 0/1272/0002" and showing some light scuffing and flaking with intact stitching. (13B9100-94) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
216	Colt Officers Model Double Action Revolver serial #560409, 38 Special, 6" barrel with a bright excellent bore. The metal surfaces of this 1927-made revolver retain about 90% original blue showing light high edge wear and scattered mild oxidation speckling, with most of the loss along the cylinder that shows some more moderate thinning along the flats and scattered handling marks. The screw heads show light slot wear and the polished sides of the hammer are mostly bright with a little minor freckling. The ejector rod head is a smoky gray patina and the barrel markings are crisp. The Rampant Colt was a little lightly struck as is sometimes seen while the factory proof mark is crisp. The checkered walnut grips with deeply recessed Colt medallions remain in very good condition showing mostly worn finish, scattered light dings and handling marks. The grips are ink-numbered to different guns and otherwise fit quite well. The original adjustable plain Patridge blade front sight and square-notch rear sights are intact and the action seems to function well mechanically with solid timing and lock-up. A very good example of these fine Colt target revolvers that will probably be an excellent shooter. (13B9100-139) {C&R} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
217	Colt Cobra Double Action Revolver serial #18482LW, 38 Special, 2" barrel with a bright excellent bore. The barrel and cylinder of this 1952-made revolver retain about 90% original blue showing some mild thinning and scattered oxidation speckling while the frame retains about 70% original black anodized finish showing moderate edge wear and the gripstraps worn to silvery pewter patina. The sides of the hammer show some mild oxidation staining and the markings remain intact and strong. There are three filled holes on the frame where a hammer shroud was once affixed. The checkered brown Coltwood grips remain in fair condition showing moderate smoothing and are quite a bit shy of the frame and rather loose. The action is generally functional though the trigger reset is very sluggish and needs manual assistance, perhaps a thorough cleaning will alleviate the issue. (13A9100-1511) {C&R} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
218	Colt Police Positive Special Revolver serial #635800, 38 Colt New Police, 4" barrel with a bright excellent bore. The metal surfaces of this 1953-made revolver retain about 80-85% original blue showing high edge wear, some mottled areas of loss from some sort of contaminant and the cylinder with a light grind mark along one of the flats. The rear sight groove and front sight show an added heavy red enamel patina and the sides of the hammer show some old oxidation staining. All markings remain intact and crisp and the revolver wears a set of period replacement smooth mother-of-pearl grips that are rather thin in construction and remain in very good plus condition showing some areas of mild discoloration and light handling marks. The base pin head is missing and the action otherwise seems to function well mechanically with solid timing and lock-up. (13A9100-54) {C&R} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
219	Smith & Wesson No. 1 1/2 First Issue Revolver serial #15117, 32 RF, 3 1/2" ribbed octagon barrel with a good bore showing some areas of mild oxidation or fine pitting and otherwise strong rifling. The metal surfaces retain about 80% of what very much appears to be the original silver finish that shows some light flaking overall, handling marks and areas taking on the familiar dark silver tarnish. There are some scattered light dings, a few more noticeable thin tool marks along the topstrap but they are very small. The barrel address with two patent dates and the serial number on the frame remain completely intact and strong. The smooth rosewood grips remain in near excellent condition retaining about 95% original varnish showing a few scattered minor dings or light handling marks. The right panel is properly stamp-numbered matching by serial number and the remaining numbered parts are matching by assembly number. Barrel-to-frame fit exhibits a little minor play and the action is functional with good timing and lock-up. An attractive revolver for the Smith & Wesson collector. (13B9100-33) {ANTIQUE} [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200
220	Remington Vest Pocket Pistol serial #644, 22 RF, 3 1/4" barrel with a moderately oxidized bore showing some good rifling. The metal surfaces retain about 75% original nickel finish showing moderate edge wear, scattered handling marks and fine oxidation staining. The gripstrap assembly is a little shy of the frame at the back and shows some old grind marks along its edges and a brazed repair at the heel. The hammer and trigger are a mild gray patina, the edges of the hammer nearer the frame retaining a hint of fire blue. This example shows no external markings and the grips are more modern replacements that appear to be maple and rate very good showing light handling marks. The brass pin front sight is present and the action seems to function well mechanically. (13A9100-1509) {ANTIQUE} [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200
221	Dardick Corporation Model 1100 Double Action Pistol serial #1074, 38 Special Tround, 6" barrel with a mostly bright very good bore showing some fine oxidation and frosting with strong rifling throughout. The barrel retains about 90% original blue showing some scattered handling marks and mild thinning under bright light while the frame panels retain about 80-85% black enamel finish that shows some moderate overall flaking and light handling marks. There is a cutout along the left side partially through the model markings offering a view of the distinctive rotary chamber. The checkered brown synthetic grip panels remain in very fine condition. This pistol will require mechanical attention as all of the frame panel screws are missing, the rear sight assembly is missing and the action is not functional, no doubt some other small parts are missing as well. The barrel exhibits some play when installed and is mismatched numbered "1002". Perhaps a good display piece of these peculiar firearms or a very ambitious restoration project for one familiar with these pieces of arms curiosa. (13B6519-579) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800

Lot	Title/Description
222	Colt Model 1849 L-Suffix Pocket Percussion Revolver serial #226353L, .31 cal, 4" octagon barrel with an oxidized bore showing evident rifling throughout. The barrel and cylinder of this 1863-made revolver are a mix of pewter gunmetal and oxidized brown patina, the barrel and loading lever showing some more moderate old oxidation with heavier encrusted patches along the right side loading lever and along the muzzle; the New York barrel address otherwise remains intact and strong. The loading lever retainer catch is an old replacement and the left side of loading lever retains some good case-hardened colors. The scene along the five-shot cylinder remains quite good with some spots obscured by oxidation and a few small linear tool marks and the "COLTS PATENT" and serial number remain strong. The frame and hammer show similar overall oxidation and some light pitting with generous remnants of colors throughout. The gripstraps are a pleasant pale ocher patina and the smooth walnut grip is ink-numbered to the gun and remains in very fine condition retaining about 95% original varnish showing just a small chip along the left heel. The bottom backstrap screw and the wedge retainer screw are more modern replacements and one of the nipples has broken off with its remnants stuck in the threads. Four of the cylinder safety pins remain largely intact, all of the serialized parts are matching including the wedge and the action seems to function well mechanically with a crisp hammer and solid timing and lock-up. It is believed these L-suffix guns were originally intended for export sales to England. (13B9100-323) {ANTIQUE} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
223	Henry Deringer Percussion Pocket Pistol .44 cal, 2" barrel with an oxidized bore. The barrel and lockplate of this pistol are mostly a deep gray and gray-brown patina showing a few scattered old dings and sparse oxidation staining. The lockplate retains a few subtle hints of silvery case-hardened patina while the very protected edges of the barrel shows subtle streaks of the original brown finish. The arm is embellished with the expected light tasteful foliate scrollwork and the left side breech with "P" proof stamp flanked by zigzags. The top of the breech and the lockplate retain strong maker markings "DERINGER / PHILADELA". The nipple shows a little bit of damage and sadly the hammer nose has broken off and been lost to the years. The pistol is equipped with the typical German silver hardware consisting of the foliate wedge escutcheon, triangular nose inlay, flash plate, triggerguard with little pineapple finial, long decorative lock screw escutcheon, foliate-embellished shield monogram plate and teardrop buttcap. The left wedge escutcheon is no longer present and the buttcap has lost its pins and detached but is included. The checkered walnut stock remains in good condition showing a few thin cracks and handling marks with some more moderate dings or scuffs scattered about the left side. The tip shows a repaired break with the left side showing a patch of synthetic filler. The lock otherwise seems to function normally. A rather salty example of these iconic Deringer pistols, that may benefit from some more careful restoration. (13B9100-61) {ANTIQUE} [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200
224	Colt Model 1849 Pocket Percussion Revolver serial #266759, .31 cal, 4" octagon barrel with an oxidized bore showing evident rifling. This 1864-made revolver has been refinished with the barrel and cylinder retaining about 90% good quality bright blue showing light high edge and operational wear and some areas thinning under bright light. There are some remnants of pinprick pitting beneath the finish along the six-shot cylinder and the scene is rather faded with some visible portions. The New York barrel address is also rather soft and the loading lever and frame retain about 90-92% attractive restored case-hardened colors showing some very fine pinprick pitting along the frame and a small void on the right side loading lever. The "COLTS PATENT" on the frame remains strong and many of the screw heads show restored bright blue, the bottom backstrap screw a bit long and not seating flush. The smooth walnut grip remains in very good condition as cleaned and refinished showing some scattered light dings. The grip appears to be un-numbered and is a little shy of the metal along the edges. The serial numbers show a "P" prefix, the loading lever is un-numbered and the tip of the arbor has been shortened and the wedge cutout reinforced. The remaining serialized parts are matching including the wedge and the action seems to function well mechanically with very good timing and lock-up. (13B9100-288) {ANTIQUE} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700

Lot	Title/Description	Lot	Title/Description
225	<p>W. Ketland & Co. Brass-Barreled Flintlock Holster Pistol .68 cal, 7 5/8" brass barrel with a good bore showing scattered old verdigris. The barrel and other hardware have taken on a handsome ocher patina showing some scattered honest tarnishing and light handling marks. There is a simple border motif around "LONDON" on the barrel and a single oval proof mark also present atop the breech which was intentionally struck out, one might hazard a guess that it was a Belgian proof mark. The brass fittings are in the usual simple utilitarian form seen on these arms and the lockplate has a simple line border with beveled edges and teat at the rear. The lock is also of rather simple construction with unbridled frizzen and frizzen spring with pointed extension. The lock is a mix of gray gunmetal and gray-brown patina showing some old oxidation speckling and the top jaw and its screw likely later replacements. The remaining parts are original with the lockplate retaining nice maker markings and the arm in the original flint. The smooth walnut stock remains in very good plus condition as lightly cleaned long ago and perhaps showing a bit of older added oil finish with some scattered light dings, handling marks and a crack at the tip. A simple hickory ramrod is present and the lock is crisp and seems to function well mechanically. (13B9100-1109) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700</p>	229	<p>Colt 4 1/2" Octagon Barrel Cartridge Revolver serial #18938, 38 RF, 4 1/2" octagon barrel with a fair-good bore showing light pitting and oxidation its full-length and otherwise good rifling. The metal surfaces of this revolver are mostly a mix of deep gray and mild plum-brown patina showing scattered areas of light pitting and oxidation staining. A section of the loading lever plug in the barrel has broken out and been lost to the years and the cylinder scene remains quite good overall. The New York barrel address and dual patent dates along the left side frame also remain intact and strong. The hammer retains a few hints of case-hardened colors and the firing pin shows nice fire blue. A few screws are more modern replacements, the trigger may be an older replacement and the backstrap and triggerguard are a mild goldenrod patina showing some scattered light dings and handling marks. The smooth walnut grip remains in very good plus condition retaining about 90% original varnish showing some scattered light handling marks and some moderate dings along the bases. The wedge is mismatched numbered "8114" and the remaining numbered parts are matching. The mainspring seems a little weak and the half cock notch is worn, though the action otherwise remains functional at full cock with good timing and lock-up. A good example of these early Colt cartridge revolvers that were made in very limited numbers. (13B9100-158) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800</p>
226	<p>Colt Police Positive Target Revolver serial #38087, 22 LR, 6" barrel with a bright excellent bore. The metal surfaces of this 1930-made revolver retain nearly 92% original blue showing scattered mild high edge and operational wear, some sparse light oxidation speckling and minor handling marks. There is one area along the right side barrel that shows some old fine pitting and the forward sideplate screw shows some slot wear. The polished sides of the hammer remain mostly bright while its back surface and the checkered trigger retain full blue. The ejector rod head retains some good case-hardened colors and all markings are crisp and clear. The checkered walnut grips with silver Colt medallions remain in near excellent condition showing a few minor handling marks. The grips are un-numbered and their fit is excellent. The original adjustable target sights are present and the action seems to function well mechanically with fine timing and lock-up. A nice example of these quality revolvers that will probably be a fine shooter. (13B9100-1403) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800</p>	230	<p>Cased Pair of Colt Fourth Model Thuer Deringer Pistols serial #43414D & 43415D, 22 Short RF, 2 1/2" barrels with bright excellent bores. The metal surfaces of these pistols retain about 98-99% deep gray enamel and nickel finishes showing a few scattered light handling marks. The hardwood grips are very fine showing a few tiny dings, their fit not quite perfect. The actions seem to function well mechanically and the red leatherette case remains in very fine condition showing some mild handling marks. (13A9100-524, 525) {MODERN} [Richard "Stretch" Kennedy Collection] (150/250) Est. 150 - 250</p>
227	<p>Colt New Line 41 Pocket Revolver serial #7673, 41 CF, 2 1/4" barrel with a partially bright very good bore showing some light oxidation and minor pitting scattered about and otherwise strong rifling. The metal surfaces retain about 50% original nickel finish with the balance flaking and blending with pewter gunmetal and deep gray patina, along with some areas of mild oxidation staining and fine pinprick pitting. The hammer appears to have been re-polished bright and all markings remain intact and strong, the "COLT NEW 41" etched panel on the left side barrel also quite good. The smooth rosewood grips remain in very fine condition left and very good condition right retaining strong original varnish with some light dings and the right panel with a minor chip along the leading edge. The grips are un-numbered and fit very well and the cylinder and barrel are matching the frame. The action seems to function well mechanically with very good timing and lock-up. (13A9100-1216) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (250/450) Est. 250 - 450</p>	231	<p>Smith & Wesson No. 1 1/2 Second Issue Revolver serial #49330, 32 RF, 2 1/2" ribbed round barrel with a mostly bright very good plus bore showing some mild oxidation and strong rifling. This revolver is equipped with the scarce 2 1/2" barrel though strangely it does not bear any Smith & Wesson markings or assembly numbers, and was perhaps very neatly shortened during the period of use. The metal surfaces retain about 20% original bright blue strongest in the protected areas with the balance flaked to a mix of plum-brown and gray patina and showing old oxidation staining and light pitting throughout. There is an old repair to a crack at the hinge point and the hinge screw and cylinder stop screw are replacements. The hammer and ejector rod retain some generous case-hardened colors, the ejector rod with some pleasant smoky gray and silvery case-hardened patina. The smooth rosewood grips remain in very good condition now mostly devoid of varnish with a few light handling marks. The right panel is properly stamp-numbered matching by serial number and the cylinder and frame show matching assembly numbers. Barrel-to-frame fit is somewhat loose and timing and lock-up are a little off though the action is otherwise functional. An interesting example. (13A9100-48) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300</p>
228	<p>Colt New Line 32 Pocket Revolver serial #8263, 32 RF, 2 1/4" barrel with a good bore showing light pitting and oxidation with good rifling. The metal surfaces are a mottled plum-brown and deep gray patina showing some scattered areas of light pitting and old oxidation speckling. The barrel address is somewhat soft but mostly legible while the etched panel marking on the left side barrel is very faint. The smooth rosewood grips remain in very good plus condition retaining a healthy amount of original varnish with some scattered light dings and handling marks. The action is a little stiff but functional with good timing and lock-up. (13A9100-1218) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200</p>	232	<p>Bacon Percussion Pocket Revolver serial #743, .31 cal, 5" octagon barrel with a fair-good bore showing light pitting and old oxidation its full-length and good rifling. The metal surfaces of this First Model revolver have mostly toned to pewter-gunmetal and gray-brown patina showing some sparsely scattered areas of old oxidation and some light pitting. A number of the screw heads show light to moderate slot wear and the wedge retainer screw is missing. There are some flakes of original bright blue lurking about the protected areas of the triggerguard and quite strong along the underside barrel flat, and the loading lever retains some good smoky case-hardened colors. The barrel retains strong markings "BACON MFG.CO.NORWICH.CONN." and the five panel scenes along the cylinder have softened somewhat remaining mostly visible. The sides of the frame are also embellished with some light foliate scrolls. The smooth walnut grips remain in very good condition now mostly devoid of finish showing some scattered light handling marks. The serialized parts are matching and the action is functional with good timing and lock-up. (13A9100-418) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
233	Smith & Wesson No. 1 1/2 Single Action Revolver serial #67895, 32 S&W, 6" ribbed round barrel with a partially bright about very good bore showing some areas of light pitting and oxidation with strong rifling. The metal surfaces retain about 97-98% factory-refurbished nickel finish showing a few scattered light dings and handling marks, the latch with 99% refurbished blue that is toning to plum. The hammer is a smoky pewter patina and the barrel markings remain strong. The back of the cylinder shows strong factory refurbishment star stamp and the frame shows a rather late rework date of March 1976. The smooth rosewood grips are rather wide non-factory replacements showing some light handling and fitting marks. The remaining numbered parts are matching and barrel-to-frame fit is solid. The action will require mechanical attention as the bolt does not engage properly when the hammer is at rest though it is functional at full cock. (13A9100-1172) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
234	Smith & Wesson 38 Single Action Second Model Revolver serial #94365, 38 S&W, 5" ribbed round barrel with a partially bright good bore showing some scattered light oxidation or fine pinprick pitting and otherwise good rifling. The metal surfaces retain about 60% original nickel finish showing moderate flaking to gray-brown patina, some oxidation staining and scattered light dings. The latch has mostly flaked to plum-brown patina while the trigger shows strong oil-quenched case-hardening and the hammer retains vibrant colors along the right side. The barrel markings remain mostly crisp and the mottled red and black hard rubber grips remain in very fine condition right and very good condition left showing some mild smoothing and handling marks, the left panel with a small chip at the base. The right panel appears to be scratch-numbered "135463" and they fit the frame quite well otherwise. The remaining numbered parts are matching, barrel-to-frame fit is solid and the action seems to function well mechanically with solid timing and lock-up. (13A10574-134) {ANTIQUÉ} (400/600) Est. 400 - 600
235	Colt Model 1849 Pocket Percussion Revolver serial #133414, .31 cal, 4" octagon barrel with a fair bore showing old oxidation and light pitting its full-length and good rifling. The metal surfaces of this 1857-made revolver have mostly toned to a deep gray and gray-brown patina showing some scattered old fine pitting and oxidation staining. There are patches of moderate dings or old tool marks scattered along the cylinder and sides of the barrel near the wedge. The two-line New York address with brackets remains intact and strong and only small portions of the scene along the five-shot cylinder are visible. The backstrap and triggerguard retain a healthy amount of silver finish flaking to a deep ocher patina and showing some light dings and handling marks, the silver taking on a pleasant tarnish overall. The smooth walnut grip remains in very good condition retaining a healthy amount of original varnish showing some edge wear and handling marks. The ink number on the inside of the grip is no longer legible and the wedge is an old un-numbered period replacement that serves its purpose very well. The wedge screw is a more modern replacement, the cylinder is mismatched numbered "4604" and the remaining numbered parts are matching. The mainspring is rather weak and the action is otherwise functional with good timing and lock-up. (13B10574-176) {ANTIQUÉ} (500/700) Est. 500 - 700
236	Colt Police Positive Target Revolver serial #33453, 22 LR, 6" barrel with a bright very fine bore showing a few sparse oxidation speckles and strong rifling throughout. The metal surfaces of this 1927-made revolver retain about 85-90% original blue showing some overall high edge wear and areas thinning to gray under bright light along with some scattered light handling marks and operational wear. The polished sides of the hammer show some mild gray oxidation speckling and the small sight set screws show nice fire blue. The ejector rods head is blue and the smooth trigger shows full blue as well and all markings are intact and strong. The checkered walnut grips with silver Rampant Colt medallions remain in very good condition showing lightly chipped points and scattered dings, they are un-numbered and a little bit shy of the frame in some areas. The original adjustable target sights are intact and the action remains functional with a crisp hammer, timing a little bit off in single action, but otherwise serviceable. (13B10574-181) {C&R} (500/700) Est. 500 - 700

Lot	Title/Description
237	Mauser WTP Semi-Auto Pistol serial #35362, 25 ACP, 2 1/2" barrel with a bright near excellent bore. The metal surfaces of this Model I pistol retain about 80% of an older reapplied deep gray-blue finish thinning and toning to a deep plum-brown patina and showing some other mild handling marks. There are a few sparsely scattered pinprick pits and the firing pin retainer retains a few flakes of bright fire blue. The barrel remains mostly bright and the original markings are strong showing "(Crown) / (Crown) / U" commercial proofs and "MADE IN GERMANY" stamp. The black checkered hard rubber grip remains in very good condition showing a small chip at the toe on the right side. One original magazine is included and the action seems to function well mechanically. This example may make for a good little shooter. (13A10762-1) {C&R} (200/400) Est. 200 - 400
238	A. Fornasari Rome Vest Pocket Hammerless Pistol serial #24, 25 ACP, 2" barrel with an oxidized bore showing faint rifling. The metal surfaces of this European pistol show generous original blue along the frame with overall toning to pewter gunmetal patina showing scattered cleaned light pitting and oxidation staining. The checkered horn grips remain in good condition showing a few areas of moderate insect damage on both panels. One original magazine is included. The action will require mechanical attention as the manual safety lever is non-functional and there is no firing pin present. (13A10762-70) {C&R} (50/100) Est. 50 - 100
239	Fabrique Nationale Model 1910/22 Semi-Auto Pistol serial #36409, 32 ACP, 4 1/2" barrel with a bright excellent bore. The metal surfaces of this commercial pistol retain about 90% original blue showing some moderate high edge wear, scattered handling marks and some areas taking on a slight plum tone under bright light. The barrel remains mostly bright and all markings are intact and strong. The original checkered black Bakelite grips remain in very fine condition showing some scattered lightly chipped points and minor dings, both panels exhibiting some play in their fit. The serialized parts are matching, one original magazine in very fine condition is included and the action seems to function well mechanically. A very good and rather early example. (13A10762-56) {C&R} (400/500) Est. 400 - 500
240	Iver Johnson 32 Safety Hammerless Revolver serial #122205, 32 S&W, 3" ribbed round barrel with a bright near excellent bore. The barrel retains about 60% original bright blue with the balance of the gun toning to gray and pewter gunmetal patina with overall oxidation speckling and some pinprick pitting. The latch and trigger retain hints of case-hardened colors and the black checkered hard rubber grips remain in very good condition showing some mild smoothing, a couple tiny flakes and thin crack forming along the base of the right panel. Barrel-to-frame fit is very good and the action functional with lock-up a little loose. (13A10762-52) {C&R} (50/100) Est. 50 - 100
241	Forehand & Wadsworth British Bull-Dog Double Action Revolver serial #96490, 32 S&W, 2 1/2" barrel with a good bore showing some light pitting and oxidation, with one heavier pit or tool mark about 1/2" back from the muzzle. The metal surfaces retain about 95% original nickel finish showing some fine flaking to oxidized brown along some of the edges and some other scattered light handling marks. The "BRITISH" marking on the topstrap was struck rather light though the other markings are crisp. The black checkered hard rubber grips remain in excellent condition. The action is functional with very good timing and lock-up, though the trigger reset is very sluggish and needs manual assistance, perhaps a thorough cleaning will alleviate this. An attractive example of the 7-shot 32 caliber variant, these revolvers were popular hideaway guns in the late 1800s. (13A10762-62) {ANTIQUÉ} (300/500) Est. 300 - 500
242	Spaulding & Fisher Double Barrel Percussion Pistol serial #91, .36 cal, 3 1/2" barrels with oxidized bores. The metal surfaces have been cleaned to a deep gray and gunmetal patina showing scattered and partially smoothed-over light to moderate pitting. The markings along the barrel rib are extremely faded with only ghostly remnants of the lettering and the smooth walnut grips remain in good condition showing some darkening from the years, light dings and a thin crack near the base of the left panel. There is some chipping around the right screw escutcheon which may be an old replacement. The action with double hammers and single trigger seems to function normally. A good example piece of these rather scarce percussion pistols. (13A10762-66) {ANTIQUÉ} (250/350) Est. 250 - 350

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
243	Unmarked American Single Shot Percussion Pistol serial #451, .36 cal, 3 1/2" round barrel with an oxidized bore. This pistol is in rather familiar styling for its time period though of a rather large and bulkier format. The metal surfaces are a mix of medium gunmetal and gray-brown patina showing scattered old oxidation and partially smoothed-over light pitting. The smooth walnut grips remain in very fine condition showing some scattered light dings and handling marks. The pistol is sighted with a fine v-notch rear sight, medium brass bead front, and the action seems to function normally. (13A10762-67) (ANTIQUÉ) (75/125) Est. 75 - 125
244	German Gecado Double Action Revolver serial #360, 22 LR, 2 5/8" barrel with a bright excellent bore. The metal surfaces of this 1967 proof-dated revolver retain about 95% original blue showing some mild high edge wear, thinning along the gripstraps and sparse oxidation speckling. The brown checkered Bakelite grips remain in very fine condition and the action seems to function well mechanically with very good timing and lock-up. This model features a top-break action with simple extractor, 8-shot cylinder, generous square notch rear sight and large plain blade front. (13A10762-49) (C&R) (100/200) Est. 100 - 200
245	Sharps Model 1C Pepperbox Pistol serial #25518, 22 RF, 2 1/2" four-barrel cluster with partially bright bores showing patches of old oxidation, light pitting and evident rifling. The barrels are mostly pewter gunmetal patina with areas of darker gray-brown, old dings and pinprick pitting. The frame is a mild ocher patina showing scattered old dings and some remnants of tarnished silver in the protected areas. The right side frame markings are partially worn away and faded while the left side markings are strong. The trigger and hammer are a similar patina as the barrels while the hammer back spring shows nice fire blue. The smooth rosewood grips rate very fine left and about very good right, the right panel with some thin cracks and chips along the base. The barrel catch / release button is missing so the barrels will come right off the frame though the hammer otherwise seems to function normally with properly rotating nose. (13A10762-60) (ANTIQUÉ) (100/200) Est. 100 - 200
246	Stevens No. 43 Diamond Second Issue Pistol serial #99610, 22 RF, 10" barrel with a bright near excellent bore showing a few sparsely scattered tiny oxidation speckles and otherwise crisp rifling. The barrel of this pistol retains about 92% original blue showing some mild thinning under bright light while the frame retains about 90% original nickel finish with most of the loss due to some mild flaking along the high edges that is toning to pewter gunmetal and blending in rather nicely with the surrounding nickel. The remaining small parts retain about 95% original blue and the smooth walnut grips remain in near excellent condition. The rear sight is missing its tiny elevation screw and is a very large aperture and the target globe front sight is present. The barrel is matching the frame, barrel-to-frame fit exhibits some play and the action seems to function well mechanically; no stock is present. (13A10762-36) (C&R) (150/250) Est. 150 - 250
247	Stevens No. 40 New Model Pocket Rifle serial #19912, 22 RF, 12" barrel with a partially bright about good bore showing some scattered spots of light oxidation and pinprick pitting with good rifling. The barrel retains about 85% original blue showing some overall thinning and toning to a mild gray-brown patina under bright light along with some old oxidation speckling. The frame retains about 90% original nickel that shows some mild flaking along the high edges toning to gray-brown patina and some fine overall bubbling of the finish. The sides of the hammer show strong bright blue, some of the screw heads show slot wear and the barrel catch release head appears to be an old replacement. The smooth walnut grips remain in very good plus condition retaining strong original varnish with some light dings and handling marks. The original target sights are intact and the barrel is matching the frame. Barrel-to-frame fit is very good showing just a hint of play, the half cock notch is somewhat worn and the hammer functions well at full cock. No stock is present. (13A10762-13) (C&R) (200/400) Est. 200 - 400

Lot	Title/Description
248	Winchester Model 12 Slide Action Shotgun serial #1467187, 12 ga, 30" plain barrel choked full with a bright near excellent bore. The metal surfaces of this 1952-made shotgun retain about 85% original blue that shows some overall high edge wear and areas thinning to gray-brown patina under bright light, a few small areas of mild oxidation speckling and light handling marks. The bolt and lifter remain mostly bright showing some mild gray oxidation staining and all markings are intact and strong. The smooth pistolgrip walnut buttstock and grooved forend remain in good condition showing moderately flaking finish, scattered dings and scuffs. There is no buttplate present, the barrel is matching the action and the arm is sighted with a single silver bead. The action seems to function well mechanically. (13A10455-377) (C&R) (200/400) Est. 200 - 400
249	Winchester Model 12 Slide Action Shotgun serial #1431347, 12 ga, 28" plain barrel marked modified and measuring improved cylinder with a bright very fine bore. The metal surfaces of this 1952-made shotgun retain about 60% original blue showing scattered handling and assembly marks, areas toning to gray-brown and moderate oxidation staining overall. The bolt is partially bright showing some gray speckling and the lifter is toning to brown. The markings remain mostly legible and the trigger group fit is a little proud of the frame. The smooth pistolgrip walnut buttstock and grooved forend remain in very good condition showing moderately flaking varnish, scattered dings and handling marks with the forend showing two shallow chips along the right rear edge. The original buttplate is intact showing some scattered discoloration and scuffs. The barrel is matching the action and the arm is sighted with a single silver bead. The slide release is rather stiff and the action otherwise seems to function normally. (13A10455-189) (C&R) (150/250) Est. 150 - 250
250	Winchester Model 12 Slide Action Shotgun serial #1746091, 12 ga, 30" plain barrel choked full with a bright excellent bore. The metal surfaces of this 1957-made shotgun retain about 92% original blue showing some scattered thin scratches, mild edge wear and a few errant freckles. The bolt and lifter remain mostly bright and all markings are crisp. The smooth pistolgrip walnut buttstock and grooved forend remain in very good condition showing somewhat worn finish overall, scattered light scuffs, dings and a few small shallow chips along the edges of the buttstock. The factory buttplate is a little shy of the stock and shows some light scuffs and dings. The barrel is matching the action, the arm is sighted with a single brass bead and the action seems to function well mechanically. A rather nice example. (13A10455-345) (C&R) (300/500) Est. 300 - 500
251	Winchester Model 12 Slide Action Shotgun serial #1122428, 12 ga, 30" plain barrel choked full with a bright near excellent bore. The barrel and magazine of this 1947-made shotgun retain about 90% original blue showing some scattered mild thinning under bright light, some light handling marks and errant freckles. The action retains about 75% original blue showing some more moderate edge wear and toning to gray-brown patina, a few spots of pinprick pitting along the edges and a scarring along the forward edge from improper assembly. The bolt and lifter are pewter gunmetal with some mild gray-brown speckling and all markings remain intact and strong. The smooth pistolgrip walnut buttstock and grooved forend remain in very good condition showing a little older added varnish and the buttstock with some more noticeable scuffs and dings. The butt is fitted with a commercial ventilated red rubber pad that is a little proud along the edges and provides a 13 1/8" length-of-pull. The barrel is matching the action, the arm is sighted with a single silver bead and the action seems to function well mechanically. (13A10455-471) (C&R) (200/400) Est. 200 - 400
252	Winchester Model 12 Slide Action Shotgun serial #1254826, 12 ga, 30" plain barrel choked full with a bright excellent bore. The metal surfaces of this 1949-made shotgun retain about 85% original blue showing scattered high edge wear, light handling marks and some areas of old pitting along the slide arm. There are some moderate scars along the left edge of the frame from improper assembly. The bolt remains mostly bright and the lifter shows some old oxidation staining while the markings remain crisp. The grooved walnut forend remains in very fine condition while the smooth pistolgrip buttstock rates poor showing a large 2" chip on the right side wrist exposing the action, thin cracks also along the wrist and some other light dings. There is a sling swivel stud installed along the toe line and no buttplate is present. The barrel is matching the action, the arm is sighted with a single silver bead and the action seems to function well mechanically. (13A10455-331) (C&R) (150/250) Est. 150 - 250

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
253	Winchester Model 12 Slide Action Shotgun serial #1553887, 12 ga, 30" plain barrel choked full with a bright very fine bore showing some light stubborn fouling. The metal surfaces of this 1953-made shotgun retain about 90% original blue showing some scattered mild handling marks, subtle edge wear and areas taking on a slight plum tone under bright light. The trigger group shows the most loss as it is a replacement with moderate oxidation and some erosion of the metal. The bolt remains mostly bright while the lifter shows some oxidation staining and the markings remain crisp. The grooved walnut forend remains in about very good plus condition showing some scattered light dings while the smooth pistolgrip buttstock is about very good showing moderate scuffs and dings. There is no buttplate present and the trigger group is not fitted quite perfectly. The barrel is matching the action, the arm is sighted with a single silver bead and slide release will require mechanical attention as it is jammed and does not release the slide though the action otherwise seems to function normally. (13A10455-337) {C&R} (150/250) Est. 150 - 250
254	Winchester Model 25 Slide Action Shotgun serial #80888, 12 ga, 28" plain barrel choked full with a bright near excellent bore showing a little stubborn wad residue. The metal surfaces retain about 75-80% original blue showing moderate high edge and operational wear, overall handling marks and areas thinning to gray-brown patina. The bolt remains mostly bright, the lifter is toning to gray, some screw heads show slot wear and all markings are intact and strong. The trigger group is likely a replacement as its fit is rather proud of the action particularly along the right edge. The grooved walnut forend remains in very fine condition showing slightly worn finish while the checkered pistolgrip buttstock is a Sile replacement that shows some lightly flaking finish and minor handling marks. The arm is sighted with a single silver bead and the action seems to function well mechanically. (13A10455-88) {C&R} (150/250) Est. 150 - 250
255	Winchester Model 12 Heavy Duck Slide Action Shotgun serial #1499652, 12 ga (3"), 30" plain barrel choked full with a bright near excellent bore showing a little minor fouling. The metal surfaces of this 1953-made shotgun retain about 85-90% original blue with most of the loss due to some scattered small patches of oxidation, some light handling marks and thinning under bright light, the barrel taking on a deep plum tone. The bolt and lifter are partially bright showing some gray-brown oxidation speckling and all markings remain crisp and clear showing proper "SUPER SPEED & SUPER-X" marking. The smooth pistolgrip walnut buttstock and grooved forend remain in very good condition showing moderate finish wear overall with scattered dings, scuffs and a very thin hairline crack behind the triggerguard. Length-of-pull to the solid red rubber Winchester factory pad is 13 3/4", the barrel is matching the action and the arm is sighted with a single silver bead. The barrel mounts solidly to the frame and the action seems to function well mechanically. A very good Heavy Duck. (13A10455-296) {C&R} (400/600) Est. 400 - 600
256	Winchester Model 12 Slide Action Shotgun serial #350842, 12 ga, 30" plain barrel choked full with a lightly frosted bore showing a few tiny dents. The metal surfaces of this 1923-made shotgun have mostly toned to a mottled gray and gray-brown patina showing some scattered oxidation staining and perhaps some sparse pinprick pitting here and there. The bolt remains partially bright and all markings are intact and strong. The trigger group may be a replacement as its fit is a little proud of the frame and stock. The smooth semi-pistolgrip walnut buttstock and 18-groove forend remain in about very good condition now mostly devoid of finish showing a few thin cracks where the buttstock meets the frame, scattered dings and light handling marks. The buttstock is fitted with a replacement non-factory grooved hard rubber buttplate that is not fitted perfectly and shows moderate dings providing a 13 1/8" length-of-pull. The magazine is equipped with a plug and the arm is sighted with a single silver bead. The barrel is matching the action and the arm seems to function well mechanically. (13A10455-267) {C&R} (150/250) Est. 150 - 250

Lot	Title/Description
257	Winchester Model 12 Slide Action Shotgun serial #1941811, 12 ga, 26 1/2" ventilated rib barrel with LymanCHOKE and a bright very fine bore. This 1962-made shotgun appears to be a custom-made trap gun that shows no visible factory proof marks. The metal surfaces retain about 90% commercial reapplied polished blue showing some mild edge wear along the action and other scattered light handling marks. The bolt and carrier are mostly bright showing a little gray freckling. The smooth pistolgrip walnut buttstock and checkered forend remain in very good condition now mostly devoid of finish and showing some scattered light dings, handling marks and a few small thin cracks around where the buttstock meets the frame. The Pachmayr ventilated red rubber pad has hardened from the years and provides a 14" length-of-pull. The barrel is matching the frame though barrel-to-frame fit exhibits some play. The rib is sighted with a small ivory mid-bead and larger bead front sight that has lost its actual bead insert. The action otherwise seems to function well mechanically. (13A10455-158) {C&R} (200/400) Est. 200 - 400
258	Winchester Model 12 Trap Shotgun serial #Y2023521, 12 ga, 30" ventilated rib barrel choked full with a bright near excellent bore. The metal surfaces retain about 95% original blue showing some scattered light handling marks and some very fine flaking or oxidation speckling along the sides of the action mostly only noticeable under bright light. The bolt and lifter are mostly bright showing nice engine-turning, the lifter with some gray-brown staining and all markings remain crisp with properly offset proofs. The smooth pistolgrip walnut buttstock and smooth forend and replacements and remain in good condition as cleaned and refinished showing a couple of thin cracks where the buttstock meets the frame, lightly flaking finish and handling marks. The buttstock fit is a little shy and no buttplate is present. The barrel is matching the action and the arm is sighted with a small steel mid-bead and red bead front sight and the action seems to function well mechanically. (13A10455-355) (MODERN) (300/500) Est. 300 - 500
259	Custom Winchester Model 12 Slide Action Shotgun serial #1907706, 12 ga, 27" ventilated rib barrel including Cutt's compensator with spreader choke and a bright near excellent bore. The metal surfaces of this 1960-made shotgun retain about 85% original blue showing some light operational wear, a few areas of splotchy loss toning to gray along the barrel and the magazine tube showing some light to moderate oxidation staining. The bolt and lifter remain mostly bright showing a little gray speckling. There is no visible proof mark on the action and the barrel is mismatched numbered "1834259" showing offset factory proof mark and its original "WS-1" skeet choke mark. The Sile checkered pistolgrip walnut buttstock and replacement checkered and finger-grooved forend remain in very fine condition showing a few light dings and handling marks. The arm is sighted with dual silver beads and there are some gaps in the barrel fit to the frame. The action otherwise seems to function normally. (13A10455-433) {C&R} (150/250) Est. 150 - 250
260	Custom Winchester Model 12 Trap Shotgun serial #465481, 12 ga, 30" ventilated rib barrel with wide "broadway" rib, choked full with a mostly bright bore showing some moderate partially raised dents about mid-bore along with some scattered subtle rippling. The metal surfaces of this 1926-made shotgun retain about 90% older reapplied polished blue showing some thinning to gray along the high edges of the action, operational wear and scattered oxidation speckling. The action also shows some light pitting beneath the blue and the bolt and lifter are pewter gunmetal showing some mild gray staining. The Winchester factory proofs are not visible on either the action or barrel and the other markings remain mostly intact with slight softening, there is an "H" stamped on the right side of the frame. The smooth pistolgrip deluxe walnut Monte Carlo buttstock with left-side cheekpiece remains in very good condition as-refinished showing a shallow chip on the right side where it meets the action, scattered light dings and handling marks, exhibiting attractive grain figure throughout. The ventilated black rubber "White Line" pad is a little proud overall and provides a 14" length-of-pull. The long finger-groove forend remains in near excellent condition. There is a slight gap where the ribs meet between barrel and action, though the barrel is indeed matching the action, and the arm is sighted with dual white beads. The action seems to function well mechanically. (13B10455-152) {C&R} (200/400) Est. 200 - 400

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
261	Colt Model 1849 Pocket Percussion Revolver serial #330734, .31 cal, 4" octagon barrel with an oxidized bore. The metal surfaces of this 1872-made revolver show a heavily polished later reapplied commercial blue retaining about 90% with areas of loss due to oxidation staining and thinning to gray. The edges are softened with remnants of partially smoothed-over light to moderate pitting. The New York barrel address remains mostly legible while there are no markings remaining on the cylinder. The backstrap and triggerguard are a mild goldenrod patina showing some light handling marks while the smooth walnut grip remains in good condition as-cleaned showing some scattered light dings and edges rather shy of the frame. The wedge, arbor, loading lever, cylinder and grip show no evident numbers and the remaining parts are matching. The action is not functional as the hand is missing though the hammer cocks normally. (13A9100-284) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
262	Colt Model 1862 Police Percussion Revolver serial #10310, .36 cal, 5 1/2" round barrel with a fair bore showing light to moderate pitting and oxidation with good rifling. The metal surfaces of this 1862-made revolver are a mottled deep gray and blue-gray patina showing remnants of an older reapplied blue with scattered light to moderate pitting and old dings. The frame and loading lever are a slightly lighter pewter gunmetal patina and the principal markings remain mostly intact and legible, the barrel with New York address. The backstrap and triggerguard are a mild goldenrod patina showing an old cleaning and scattered light dings. The smooth walnut grip remains in very good condition showing some remnants of original varnish, light dings and handling marks. The wedge is a rather loose older unmarked replacement, its retainer screw a somewhat ill-fitting modern replacement, and the tip of the arbor appears to have been shortened slightly. The serial number on the cylinder is no longer visible and the remaining numbered parts are matching. Barrel-to-frame fit exhibits moderate play and the action gets hung up and does not time correctly, requiring manual assistance to cycle properly, though the hammer does hold at full cock. (13B9100-292) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
263	German EL-24 Sub-Caliber Rifle Insert by Erma serial #5685, 22 LR, 26 1/2" barrel with a bright very fine bore showing a little pinprick pitting nearer the muzzle and otherwise strong rifling. The barrel of this insert does not appear to be perfectly straight showing a very slight bend or warp and the exterior is a pewter gunmetal patina showing scattered areas of cleaned oxidation staining and mild pinprick pitting. The bolt and receiver retain about 75% original blue showing moderate thinning, small areas of mild oxidation speckling and a few thin moderate scratches. The bolt handle and extractor shows some areas of light pitting and the edges of the extractor retain good fire blue. The arm shows "E.L.24." model designation and droop wing eagle proofs. There appears to be just a single "(Eagle) / 280" Waffenamnt on the safety which also shows a circled "EE" stamp. The serialized parts are matching and there is no magazine or magazine well insert present. (13A9100-1523) (C&R) [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
264	Colt Police Positive Double Action Revolver serial #166358, 32 Colt New Police (S&W Long), 4" barrel showing one small spot of oxidized pitting near muzzle, the remaining bore is crisp and clean. The metal surfaces of this fine 1920-manufactured revolver retain about 98% original blue, the backstrap has light freckling blending to a mix of brown and pewter toward the heel, other minor edge wear, and insignificant handling marks. The trigger and hammer spur retain full nitre blue while the bright sides of the hammer show light operational wear and staining. The checkered hard rubber factory grips are numbered to the gun and they feature a stylized "C" around the escutcheons, "COLT" in an oval and fleur-de-lis borders. The revolver features a half-moon front sight, fixed rear sight, and functions mechanically with correct timing and lockup. A delightful example of an early Police Positive. (8A10740-31) (C&R) (600/800) Est. 600 - 800

Lot	Title/Description
265	Clement Arms Co. Percussion Revolver serial #117852, .36 cal., 4 3/4" octagon barrel with an oxidized and pitted bore still showing strong rifling. The metal surfaces of this Colt Model 1851 Navy clone have toned to predominately gray with scattered light stains from oxidation heaviest on the barrel, areas of light to moderate pitting, and handling marks. The barrel and loading lever assembly have traces of original blue, heaviest on the lever assembly. The smooth walnut factory grips rate very good to excellent showing light handling marks, a few dings, and later added varnish. The barrel and straps are numbered to the frame, there are Belgian proofs on the appropriate parts, the cylinder scene is strong with a few areas showing wear, and it functions mechanically with correctly timing and lockup, although the half cock notch will need attention. The top of the barrel is marked "CAP SYSTEM MANUFACTURED BY C. CLEMENTS", the cylinder is marked "CLEMENT ARMS CO.", and the butt and left side of the barrel are marked with the retailers name and address "J. NIKITITS.ERBEN.CONTANTINOPLÉ" and the right side of the barrel is marked "VERO CLEMENT A PISTONS". An interesting Belgian copy of the Colts revolver. (8A10740-27) (ANTIQUÉ) (600/800) Est. 600 - 800
266	Smith & Wesson Model 4506-1 Semi-Auto Pistol serial #THF8327, 45 ACP, 5" barrel with an excellent bore. This big bore pistol remains in excellent condition showing only light use. The stainless steel surfaces rate excellent with a few trivial handling marks. The smooth combat trigger and standard hammer retain full hard chrome finish. The one-piece checkered wrap around Xenoy grip features a S&W monogram and rate excellent. This gun features three dot Novak's style sights, serrated frontstrap, front of the triggerguard is checkered, it appears to function mechanically, and has ambidextrous slide mounted safeties / de-cockers. The pistol includes a single eight-round factory magazine. An excellent example for the upstart collector or shooter. (8A10798-53) (MODERN) (500/700) Est. 500 - 700
267	Smith & Wesson First Model .32 Hand Ejector Revolver with Newark PD Markings serial #5200, 32 S&W Long, 3 1/4" barrel with a lightly oxidized and pitted bore. This Model of 1896 has seen honest use serving the citizens of Newark N.J. and after being decommissioned. The metal surfaces retain about 80% original nickel plate with most of the loss on the sideplate and parts of the right side frame, additional wear and flaking on the left side of the frame, the barrel, and cylinder, and scattered light pitting, limited bubbling, and handling marks. The trigger and hammer retain strong case-hardened colors with portions toning to gray and operational wear. The diamond checkered hard rubber factory grips have a S&W monogram on each panel and the numbers are no longer visible, the checkering shows moderate to heavy wear although the monograms remain crisp. The patent dates on the cylinder remains crisp with a slightly subdued S&W logo on the side plate from wear. This gun has the later hammer, three screws on the sideplate, and functions mechanically with correct timing and lockup. The backstrap is marked "Newark Police No. 233" the number slightly obscured from pitting. A desirable find for the collector. (8B10870-1) (ANTIQUÉ) (600/800) Est. 600 - 800
268	Custom Colt Lightweight Agent Revolver serial #252190LW, 38 Special, 2" tapered barrel with an excellent bore. This 1968-manufactured gun has been custom refinished by an unknown gunsmith. The aluminum frame has been bead blasted to a pleasing satin in-the-white finish with few minor handling marks. The cylinder, crane, thumb latch, trigger, hammer, sideplate screws have been hard chromed leaving a light satin sheen. The barrel is a dull gray and appears to be simply bead blasted to a satin finish showing a few very light stains from oxidation for an overall rating of excellent. The grips are replacement checkered walnut factory extension grips (from Detective Special and Cobra) with gold Rampant Colt medallions. Other than the grips and new finish this gun is pure Agent, and it functions mechanically with correct timing and lockup. This handsome gun features a six-shot cylinder and feathery weight ideal for concealed carry or even home defense. (8A9100-1208) (MODERN) [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
269	Rare Smith & Wesson Model 66-1 Double Action Revolver with Scituate PD Markings serial #45K5103, 357 Magnum, 6 1/8" pinned heavy barrel with an excellent bore. In the 1970's Smith & Wesson equipped a small number of their Combat Magnum revolvers with 6 1/8" long barrels, the standard "6 inch" barrel nominally measuring 5 7/8" in length. Of course, this gun has the added benefit of police department markings which will attract a wider sect of collectors. This gun has seen honest use over the years the stainless steel surfaces rate good to very good showing light to sometimes moderate wear on the barrel and recessed cylinder, scattered light handling marks, and few spots of oxidation on the lanyard loop. The service trigger and hammer retain full hard chrome finish. The checkered walnut factory target grips feature silver S&W medallions, speed loader cut on the left panel, and rate about excellent showing light handling marks. This gun features a red ramp front sight, black blade micro adjustable rear sight, lanyard loop, it functions mechanically with correct timing and lockup. The lanyard loop is mounted on an extension with factory relief cuts in the butt of the stocks allowing it to protrude out the bottom and properly swivel. The left side of the frame below the window is marked "SCITUATE 3". We cannot determine if it is Scituate Rhode Island or Massachusetts police that issued this gun, however the Rhode Island State Police did issue a similarly equipped Combat Magnum revolver to its troopers for a short period of time. The police collectors will like the unusual features of this issue revolver and the S&W collector will love it for the rare barrel. (8B9100-126) (MODERN) [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
270	Custom Smith & Wesson Model 1905 Military & Police Hand Ejector by King Gun Sight Company serial #667195, 38 Special, 5" tapered barrel with an excellent bore. This lovely 4th Change revolver has been revamped by the famed Kings Gunsight Company. The metal surfaces retain about 97% original blue finish with the backstrap a mottled mix of blue, pewter, and plum, light muzzle and edge wear, and a few handling marks. The service trigger and factory humpback hammer retain robust case-hardened colors with operational wear. The un-numbered diamond checkered walnut factory Magna grips feature silver S&W medallions and rate about excellent with light handling marks. This revolver has several custom features expertly installed by King Gunsight. It includes a red bead Patridge King "reflector" front sight, King white outline adjustable rear sight, overtravel stop in triggerguard, action work (retains the standard long action), all appropriate parts are correctly numbered to the gun, and it functions as good as the day it left their shop. King Gunsight Co. were a premier shop with many innovative features backed by superb craftsmanship. A desirable revolver for the collector and highly coveted by revolver enthusiast. (8A9100-459) (C&R) [Richard "Stretch" Kennedy Collection] (1200/1800) Est. 1,200 - 1,800
271	Smith & Wesson Model 19-3 Double Action Revolver serial #2K69920, 357 Magnum, 4" pinned heavy barrel with an excellent bore. This lovely Combat Magnum revolver shows light use and remains in excellent condition. The metal surfaces retain about 98% original blue showing a small lightly cleaned oxidation stain on the S&W logo on the sideplate, and a few minor handling marks. The .500" target trigger and .500" target hammer retain wonderful case-hardened colors. The smooth factory rosewood grips feature nicely figured woodgrain, silver S&W medallions, extractor cutout on the left panel, and rate excellent overall showing a few light handling marks. The revolver features a red ramp front sight, white outline micro adjustable rear sight, and correctly times and locks up. An excellent example of these highly popular revolvers. (8A9100-143) (MODERN) [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200
272	Smith & Wesson Model 14-4 Double Action Revolver serial #31K2974, 38 Special, 6" pinned heavy barrel with an excellent bore. This K-38 Masterpiece Target remains in excellent condition with about 99% original blue showing light edge wear and few handling marks. The .500" target trigger and .500" target hammer retain beautiful swirls of case-hardened colors. The grips are replacement checkered rubber Pachmayr finger groove "Gripper" stocks with Pachmayr medallions that rate excellent. This gun features a Patridge front sight, white outline micro adjustable rear sight, and it correctly times and locks up. An excellent example of the K-38 Masterpiece Target. (8A9100-275) (MODERN) [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900

Lot	Title/Description
273	Smith & Wesson K-38 Masterpiece Target Hand Ejector Revolver serial #K93301, 38 Special, 6" heavy barrel with an excellent bore. This early (1950) Hand Ejector has seen light honest use but remains in excellent condition overall. The metal surfaces retain about 99% original blue showing light high edge wear and handling marks, the backstrap and a small portion of the sideplate under strong light show thinning to a plum-blue mix. The service trigger and hammer retain wonderful case-hardened colors with very light operational wear. The diamond checkered walnut factory Magna grips are numbered to the gun and feature silver S&W medallions, they rate about good showing light wear to the diamond points, handling marks, and a small chip missing on the heel of the right panel along the border of the field of checkering. This revolver features a Patridge front sight, black blade micro adjustable rear sight, and it correctly times and locks up. An outstanding example of the K-38 Masterpiece Hand Ejector revolver. (8A9100-511) (C&R) [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200
274	Smith & Wesson 22/32 Heavy Frame Target Hand Ejector Revolver serial #360257, 22 LR, 6" barrel with an excellent bore. The metal surfaces of this excellent condition revolver retain about 97% original blue showing high edge wear, wear marks on the cylinder behind the flutes, and minor handling marks. The service trigger and hammer retain bold case-hardened colors. The diamond checkered factory walnut extended target grips are not numbered and rate very good with light handling marks most notable on the butt. The revolver features a Paine bead front sight, "U" notch adjustable rear sight, all the appropriate parts are correctly numbered to the gun, and it functions as good as the day it left Springfield. This gun has seen light honest use and would be a fine addition to any collection. (8A9100-959) (C&R) [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500
275	Smith & Wesson Model 14-3 Double Action Revolver serial #8K3070, 38 Special, 8 3/8" pinned heavy barrel with an excellent bore. This K-38 Masterpiece Target has seen honest use but remains in very good condition with about 92-94% original blue showing edge wear, handling marks, and very light oxidation staining that displays minimal cleaning on the barrel accounting for most of the loss. The .500" target trigger and .500" target hammer retain robust case-hardened colors. The factory walnut target grips feature silver S&W medallions and an extractor cut on the left panel. They rate very good with scattered lightly compressed diamond points and handling marks. This gun features a Patridge front sight, black blade micro adjustable rear sight, and it functions mechanically with correct timing and lock up. It should make a good upstart collectible or a fine shooter. (8A9100-125) (MODERN) [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
276	Scarce Smith & Wesson Model 36-6 Double Action Revolver serial #BEA2431, 38 Special, 3" full lug heavy barrel with an excellent bright bore. Only 615 of these scarce 3" Chiefs Special Target revolvers were made in 1989 succeeded the following year by the Model 60-4 and later variants. This beautiful revolver appears to have seen little if any use and retains about 99% original blue finish showing only a light rotational mark on the cylinder. The smooth combat trigger and standard hammer retain bold case-hardened colors. The factory pebble grain rubber Hogue Monogrips rate about excellent showing light handling marks and slight slot damage on the screw. This gun has aftermarket added Trijicon three dot night sights that no longer glow but still provides a decent daytime sight picture. The gun functions as good as the day it left the factory with correct timing and lockup. This variant made a fine trail gun or defensive firearm and finding high condition samples can be difficult. An excellent opportunity for the collector. (8A9100-527) (MODERN) [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
277	Smith & Wesson Model 317-1 Air Lite Double Action Revolver serial #CEC8387, 22 LR, 3" barrel with an excellent bore. This lovely little Chiefs Special Air Lite 22/32 Kit Gun remains in wonderful condition the metal surfaces retain about 99% original factory Clear Cote showing only a faint turn ring on the cylinder. The smooth combat trigger and standard Bodyguard style hammer retain strong case-hardened colors. This Kit Gun features a Baughman ramp front sight, black blade micro adjustable rear sight, no internal safety lock, and it functions mechanically with correct timing and lockup. This gun shows very little use and remains in superb condition. These are great little trail guns, but the collectors will love this early version without the lock and excellent condition. (8A9100-410) (MODERN) [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
278	High Standard Supermatic Citation Semi-Auto Pistol serial #1633212, 22 LR, 5 1/2" heavy barrel with an excellent bore. This Model 104 slant grip Hamden, Connecticut, made pistol retains about 97% original blue showing light high edge wear, light thinning of the finish visible under strong light, and handling marks. The checkered walnut factory thumb rest grips feature gold High Standard medallions and rate excellent. This pistol features a Patridge front sight, slide mounted black blade adjustable rear sight, muzzle stabilizer, it is factory drilled and tapped for barrel weights (non-provided), overtravel stop on the trigger, and serrated grip straps. The gun appears to function mechanically although no magazine is provided. This gun has seen honest use but remains in excellent condition overall. (8A9100-723) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
279	U.S. Model 1911A1 Semi-Auto Pistol by Remington Rand serial #2072146, 45 ACP, 5" Flannery barrel with a very good plus bore showing light frosting on the front half of the grooves. This 1944-manufactured pistol has an Ithaca slide and the metal surfaces retain about 95% arsenal reapplied Parkerized finish showing light high edge wear, the front strap and portions of the slide toning to brown under strong light, plus assembly and handling marks. The checkered Keyes Fibre grips feature reinforced screw holes, reinforcing ribs on the back, and rate about excellent showing a few lightly compressed diamond points. This pistol appears to have the correct features for the period of manufacture with exception of the previously mentioned Ithaca slide, it functions mechanically, and the markings remain crisp with the ordnance wheel typically struck off center. The pistol includes a single post war military issue seven-round magazine with assembly and manufacturing numbers stamped on the floorplate. A fine example of a late war gun with arsenal grade refit. (8A9100-219) {C&R} [Richard "Stretch" Kennedy Collection] (1200/1800) Est. 1,200 - 1,800
280	Colt Detective Special Double Action Revolver serial #912819, 38 Special, 2" tapered barrel with an excellent bore. This lovely mid-1960s second issue revolver remains in excellent condition overall. The revolver retains about 98% original blue showing light edge wear, and handling marks. The standard trigger and hammer retain full blue finish with bright sides on the hammer. The fully checkered walnut factory extension grips feature silver Rampant Colt medallions and rate excellent. This gun features a serrated ramp front sight, fixed rear sight, it functions mechanically with correct timing and lockup. A fine example of a "Dick Special" for the collector. (8A9100-109) {C&R} [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200
281	Colt Officers Model Target Revolver serial #16691, 22 LR, 6" heavy barrel with an excellent bore. This 1937-manufactured Third Issue revolver has seen honest use over the years and retains about 96% original blue showing high edge wear, a tiny spot of lightly cleaned oxidized pitting on the lower left side of the frame, thinning finish on the frontstrap extending onto the triggerguard, and handling marks. The standard trigger and hammer retain a strong blue finish showing light handling wear on the trigger face with a few light stains on the bright sides of the hammer. The grips are unmarked replacement smooth mother-of-pearl stocks with separate removable cushion fiber liners that rate about excellent. This gun features an orange bead elevation adjustable front sight, windage adjustable rear sight, it functions mechanically, and correctly times and locks up. A very nice example of the Officers Model Target revolver retaining excellent condition. (8A9100-647) {MODERN} [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200
282	Colt Model 1908 Vest Pocket Hammerless Semi-Auto Pistol serial #95471, 25 ACP, 2 1/8" barrel with an about excellent bore showing light frosting. The metal surfaces of this 1913-manufactured pistol retains about 94-95% of the original blue finish showing high edge wear, pinprick pitting around the muzzle, and handling marks. The case-hardened colors on the grip safety, trigger, and safety lever have lightly faded. The grips are smooth factory mother-of-pearl stocks with silver Rampant Colt medallions that rate excellent overall. This tiny pistol features fixed sights in a trough on the slide, grip safety, and manual safety. The pistol includes a six-round all-blue factory marked magazine, and the floorplate is marked "CAL. 25 / COLT". A nice little Vest Pocket with scarce and desirable factory mother-of-pearl grips. (8A9100-1284) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800

Lot	Title/Description
283	Colt Mustang Nitelite Semi-Auto Pistol serial #PL26559, 380 ACP, 2 3/4" barrel with an excellent bore. This fly weight variation of the Government Model has seen use and remains in about very good condition. The stainless steel surfaces of the slide show edge wear and scattered handling marks, the hard chrome finish of the aluminum frame also shows edge wear and handling marks. The checkered synthetic factory grips feature silver Rampant Colt medallions and rate near excellent with limited diamond point wear, mostly on the right panel. This pistol features a single factory night sight insert in the front sight that no longer glows, drift adjustable black rear sight, thumb safety that does not lock the slide closed, and it appears to function mechanically. The pistol includes a single six-round magazine. This should make a great concealed carry gun for those that prefer the Government Model style pistols. (8A9100-207) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
284	Smith & Wesson K-38 Combat Masterpiece Hand Ejector Revolver serial #K222357, 38 Special, 4" tapered barrel with an excellent bore. This mid-1950's five-screw Hand Ejector remains in excellent condition and retains about 98-99% original blue finish showing light muzzle wear, and handling marks. The .500" target trigger and .500" target hammer retain beautiful case-hardened colors. The diamond checkered walnut factory Magna grips are numbered to the gun and feature silver S&W medallions they rate about very good to excellent showing a small area of light scuffing on the left panel and small chip missing on the border of the right panel. This revolver features a Baughman ramp front sight, black blade micro adjustable rear sight, all appropriate parts are correctly numbered to the gun, and it functions mechanically with correct timing and lockup. An excellent example of a Pre-Model 15 Hand Ejector set up for target work. (8A9100-169) {C&R} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
285	Factory Error Smith & Wesson Military & Police Hand Ejector Revolver serial #C431428, 38 Special, 6" barrel with an excellent bore. This interesting four-screw revolver falls into the 1960 serial number blocks, several years after the change over to the Model 10 designation for this gun. The metal surfaces retain perhaps 95-96% original blue, the greatest loss is the backstrap toning to a mix of brown and pewter in addition to high edge wear and handling marks. The standard trigger and hammer retain bold case-hardened colors. The diamond checkered walnut factory Magna grips are numbered to the gun they feature silver S&W medallions, and they rate excellent overall. This gun features a serrated ramp front sight, fixed rear sight, the major parts normally numbered on a Hand Ejector are not apart from the extractor, and it functions mechanically with correct timing and lockup. It is anyone's guess why the frame was not stamped with the Model number, but it would make an interesting niche collectible. (8A9100-271) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
286	Colt Woodsman Sport Semi-Auto Pistol serial #8705-S, 22 LR, 4 1/2" barrel with an excellent bore. This nice 1949-produced Second Series Woodsman Sport retains about 96-97% original blue exhibiting high edge wear, thinning finish on the frontstrap, and handling marks. The checkered synthetic "Coltwood" factory grips are a mottled mix of brown, tan, and black with a few splashes of red, they feature a Rampant Colt in a circle on the right panel and rate excellent. It also features the small size brown synthetic factory grip adapter in excellent condition. The pistol features a serrated ramp front sight, Coltmaster adjustable rear sight, hidden factory lanyard loop, and appears to function mechanically. The front sight appears to be a later replacement as it does not fit the front sight base slot precisely. This pistol includes a single factory marked ten-round magazine. An excellent example of a Woodsman Sport Model showing honest use. (8A9100-1058) {C&R} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
287	Colt Woodsman Match Target Semi-Auto Pistol serial #38536-S, 22 LR, 6" full lug heavy barrel with an excellent bore. This 1950 Second Series Match Target has seen honest use and retains about 93% original blue with the frontstrap fading to a gray pewter, lighter fading on the backstrap and triggerguard area, high edge wear, and scattered handling marks. The checkered synthetic "Coltwood" factory grips are a mottled mix of brown, tan, and black with a few splashes of red, featuring a Rampant Colt in a circle on the right panel and rate excellent. This pistol also features the large size synthetic factory grip adapter in excellent condition featuring the same mottled mix of colors as the grip. This pistol features an undercut Patridge front sight, Coltmaster adjustable rear sight, hidden factory lanyard loop, and appears to function mechanically. This pistol includes a single factory marked ten-round magazine. A nice example of the Match Target that should make a great shooter or upstart collectible. (8A9100-1295) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
288	Colt Woodsman Target Semi-Auto Pistol serial #44805-S, 22 LR, 6" barrel with an excellent bore. This 1950-manufactured Second Series Target Model has seen light use and remains in excellent condition. The pistol retains about 97% original blue displaying high edge wear, handling marks, and a few spots of lightly cleaned oxidation on the barrel. The checkered synthetic "Coltwood" factory grips are a mottled mix of brown, tan, and black with a freckling of red, they feature a Rampant Colt in a circle on the right panel and rate excellent overall. This pistol also features a small size synthetic factory grip adapter in excellent condition featuring the same mottled mix of colors as the stocks. This pistol features an undercut Patridge front sight, Coltmaster adjustable rear sight, hidden factory lanyard loop, and appears to function mechanically. This pistol includes a single factory marked ten-round magazine. A nice upstart collectible that could stand a light amount of use. (8A9100-1059) {C&R} [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200
289	Custom Colt Woodsman Match Target Semi-Auto Pistol serial #MT8797, 22 LR, 6 1/2" heavy barrel with an excellent bore. This early war (1940) pistol has several period custom features which would still be desirable today. The metal surfaces retain about 97% original blue most of the loss to scattered light oxidized pitting, heaviest on the rear sight, lighter freckling, and handling marks. The grips are a beautiful set of period Sanderson target stocks constructed of walnut featuring a large thumb rest, the coarser style checkering that were one of his signature traits, and they extend below the frame for a more hand filling purchase on the gun. The gun features an undercut serrated pinned front sight, later added Micro adjustable rear sight, barrel turned back to the front of the front sight base and a 1 1/4" long three-vent muzzle stabilizer (compensator) added. The gun appears to function mechanically and includes a single factory marked ten-round magazine. A nice custom bullseye gun from the golden age of bullseye. (8A9100-620) {MODERN} [Richard "Stretch" Kennedy Collection] (1200/1800) Est. 1,200 - 1,800
290	Colt Cobra Double Action Revolver serial #46211-LW, 38 Special, 4" barrel with an excellent bore. This lovely Cobra remains in excellent condition showing only light use. The metal surfaces retain about 97-98% original blue and anodized finishes showing high edge wear, and handling marks. The service trigger and hammer retain full blue finish, the bright sides of the hammer showing scattered light staining from oxidation. The fully checkered walnut factory square butt grips feature silver Rampant Colt medallions and rate very good to excellent showing scattered handling marks and a small ding on the edge of the right panels butt. This first issue revolver features a serrated ramp front sight, fixed rear sight, functions mechanically, and correctly times and locks up. A nice example of a 1956-manufactured Cobra. (8A9100-492) {C&R} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
291	Colt New Service Double Action Revolver serial #353980, 45 Colt, 5 1/2" later replacement Colt barrel with an excellent bore. This late model New Service remains in excellent condition as refurbished, the metal surfaces retaining about 98% original blue finish with light high edge wear, the front sight a smoky gray, and a few handling marks. The service trigger and hammer retain full blue, and the bright sides of the hammer show a few insignificant stains. The grips are replacement checkered rubber Pachmayr Presentation stocks with Pachmayr medallions that rate about very good showing minimal wear and the butt has been relieved to allow the lanyard loop to protrude. The revolver functions mechanically with correct timing and lockup, and the front sight appears to have been lightly regulated with the sides show light tooling. This gun should make a fine shooter with potential as an upstart collectible. (8A9100-1161) {MODERN} [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200

Lot	Title/Description
292	Custom Engraved Smith & Wesson Model 39 Semi-Auto Pistol serial #14476, 9mm, 4" barrel with an excellent bore. This lovely Model 39 has about 35% later added scroll engraving with punch dot shading accenting the frame and triggerguard. The slide and backstrap retain about 99% original nickel plate showing a few minor handling marks. The blue finished trigger, hammer, and other controls retain about 90% finish showing high edge wear most notable on the safety / de-cocker. The frame retains 99% later added chrome finish that remains in excellent condition which gives the gun a subtle three tone finish. The checkered walnut factory grip with silver S&W medallions rate very good to excellent showing light handling marks and light wear to the finish. This pistol features serrated ramp front sight, windage adjustable rear sight, short extractor, and appears to function mechanically. The pistol includes a single eight-round magazine. If you like a pistol with a little elegance to it, this should fill the bill nicely. (8A9100-1091) {MODERN} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
293	Custom Etched Smith & Wesson Third Model Perfected Single Shot Pistol serial #4631, 22 LR, 7 3/4" barrel with an excellent bore. This pistol has been etched with a foliate pattern on the frame and sides of the barrel. The left side of the frame shows a saddled horse with rifle scabbard gazing off into the distance, the right side shows a cowboy mounting his steed. The pistol retains about 98-99% reapplied blue finish with light high edge wear, slight thinning on the frontstrap, and the finish has a slight grayish hue under strong light. The service style trigger and hammer retain bold case-hardened colors with light operational wear. The diamond checkered factory walnut extended target grips are numbered to the gun and feature gold S&W medallions that rate very good showing light handling marks. This pistol is equipped with a custom gold bead front sight, factory windage adjustable rear sight, and the barrel latch, barrel, and extractor are numbered to the gun. The mechanism works mechanically, and the barrel to frame fit has slight play. A nicely reworked Third Model. (8A9100-1087) {MODERN} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
294	U.S. Model 1911 Semi-Auto Pistol by Colt serial #419588, 45 ACP, 5" replacement Colt barrel with an excellent bore. This pistol has been arsenal reworked by Augusta Arsenal, with a few replacement parts including the slide, and bears the "AA" remark on the left side of the frame. The metal surfaces retain about 25% reapplied arsenal grade Parkerized finish with the majority found on the frame and to lesser extent on the slide, the remaining surfaces have toned to brown in addition to high edge wear, and handling marks. The grips are unmarked commercial fully checkered walnut replacement stocks that rate about very good showing scattered lightly compressed diamond points. This pistol features a Remington UMC slide, the slide to frame fit has been tightened and shows very little play, the barrel bushing is a later commercial replacement, the remaining parts appear correct for the period. It includes a single seven-round M.S. Little magazine. A typical Arsenal reworked 1911 showing honest use over the years. (8A9100-222) {C&R} [Richard "Stretch" Kennedy Collection] (1200/1800) Est. 1,200 - 1,800
295	Smith & Wesson Model 41 Semi-Auto Pistol serial #A138385, 22 LR, 7 3/8" barrel with an excellent bore. This lovely early 1970's pistol retains about 99% original blue and anodized finishes (false muzzle) showing minor edge wear and handling marks. The grips are replacement Herrett's wrap around right-handed target stocks that feature checkered panels, thumb rest, and finger rest. They rate good showing handling wear at the top of the right panel, and repaired chips on the front of each panel below the triggerguard. The pistol features a Patridge front sight, adjustable black blade rear sight, overtravel stop on the trigger, cocking indicator, it includes a factory false muzzle, and internal barrel weight. Included with the pistol is a single factory ten-round magazine. An excellent pistol for formal or informal bullseye competition. (8A9100-1084) {C&R} [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
296	Colt Second Generation Model 1862 Pocket Navy Percussion Revolver serial #52622, .36 cal., 5 1/2" octagon barrel with an excellent bore. This lovely "second genny" revolver retains about 99% original blue finish showing a few light handling marks, and a tiny spot of oxidation on the barrel. The frame, hammer, and loading lever retain bold case-hardened colors with a few insignificant handling marks. The silver finish on the grip frame rates excellent with a few handling marks and has started to mellow to a soft gray hue. The smooth one-piece walnut factory grips rate very good to excellent showing scattered light dings. All the appropriate parts are numbered to the gun and it times and locks up as good as the day it left Colt. This fine cap-n-ball appears to be unfired and is a fine representation of the late twentieth century run of its famed percussion revolvers by Colt. (8A9100-223) {ANTIQUE}[Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
297	Manurhin Model PP Sport Semi-Auto Pistol serial #55603L, 22 LR, 8 1/4" barrel with an excellent bore. The metal surfaces of this pistol retain about 96-97% original blue finish showing wear marks on the barrel, high edge wear, and handling marks. The right-hand factory checkered synthetic thumb rest grips feature a Manurhin logo and show very light wear although there is a single small check forming on the back of each panel where it meets the backstrap. This pistol is equipped with an elevation adjustable Patridge front sight, windage adjustable rear sight, and slide mounted de-cocker / safety. The de-cocker / safety functions as designed but will need attention as it sometimes functions with difficulty. The pistol includes a single factory ten-round magazine with extended finger rest floorplate. A nice addition to the Walther collection with scarce longer barrel. (8A9100-326) {MODERN} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
298	Smith & Wesson Model 58 Double Action Revolver serial #S257188, 41 Magnum, 4" pinned heavy barrel with an excellent bore. This Military & Police revolver has seen honest use over the years but retains about 95% original blue with light to sometimes moderate edge wear, thinning finish on the topstrap, and handling marks. The service trigger and hammer retain bold case-hardened colors with operational wear, and the sides of the trigger toning to gray. The grips are replacement checkered rubber Pachmayr "Gripper" stocks with Pachmayr medallions and rate excellent. The Baughman ramp front sight has a later added red insert, fixed rear sight, plus timing and lock up are correct. There is a provision for a lanyard loop on the grip frame that was later non-factory plugged. The 41 Magnum and big bore aficionados will love this revolver for a variety of defensive and shooting needs plus it will make a great upstart collectible. (8A9100-452) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
299	Custom Smith & Wesson Model 58 Double Action Only Revolver serial #S260360, 44 Magnum, 4" pinned heavy barrel with an excellent bore. This interesting revolver has been converted from the usual 41 Magnum chambering to 44 Magnum and converted to fire double action only by an unknown gunsmith. The metal surfaces retain perhaps 99% professionally reapplied satin Parkerized finish displaying a few wear marks on the right side of the barrel plus a few scattered very light spots of oxidation, and the occasional handling mark. The service trigger and hammer retain bold case-hardened colors with light operational wear. The revolver sports a set of checkered rubber Pachmayr Presentation grips that rate excellent. This gun was configured to resemble its base gun the Model 58 Military & Police revolver featuring a Model 29 heavy barrel with the original fine ribbing removed leaving a few traces of it toward the frame, the original ramped base was removed and replaced with simple Baughman serrated blade front sight, the frame retains the original fixed rear sight, and it correctly times and locks up. If you are a big bore revolver fan this gun offers a more commonly available cartridge with tremendous versatility. (8A9100-347) {MODERN} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900

Lot	Title/Description
300	Smith & Wesson K-22 Outdoorsman Hand Ejector Revolver serial #646717, 22 LR, 6" barrel with an excellent bore. This fine K-22 1st Model revolver remains in about very good condition retaining about 90-92% original blue finish with the straps, sideplate and portions of the rear frame a mottled mix of brown, plum, and blue, some handling marks, edge wear, and a small ding on the outer edge of the muzzle. Although the service trigger and hammer show light wearing to gray, limited freckling, and operational wear there remains beautiful swirls of case-hardened colors. The diamond checkered walnut factory grips feature silver S&W medallions and rate about very good showing light wear and shallow 3/8" wide chip on the butt of the left panel. An interesting aside, the grips are numbered "646727" but the fit is precise and is obviously a factory error. This revolver features a Call silver bead front sight, adjustable rear sight, all appropriate parts are correctly numbered to the gun, it functions mechanically, and correctly times and locks up. A fine upstart collectible that can stand the occasional trip to the range. (8A9100-451) {C&R} [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500
301	Colt Woodsman Target Semi-Auto Pistol serial #95728, 22 LR, 6 5/8" correct straight taper barrel with an excellent bore. This pre-war (1935) First Series Woodsman remains in excellent condition. The metal surfaces retain about 99% original blue finish showing light scattered edge wear, handling marks, and few random minute oxidation stains. The grips are custom unmarked diamond checkered walnut thumb rest target with a flared butt. The thumb rest has light serrations, and they are reminiscent of the Roper style but lack the jig holes in the back of the panels but do bear a scribed number on the back of each panel like the Sandersons, but the checkering is finer. Whoever the artisan was they were quality crafted and remain in excellent condition. This gun features an elevation adjustable Patridge front sight, windage adjustable rear sight, and functions mechanically. This pistol includes a single Woodsman marked ten-round dual tone magazine. An excellent example of a pre-war Woodsman with vintage target grips. (8A9100-M52) {MODERN} [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500
302	Early Custom Colt Woodsman Second Series Match Target Semi-Auto Pistol serial #351-S, 22 LR, 6" full lug heavy barrel with an excellent bore. This gun shows honest use since it left the factory in 1949 and has been lightly customized. The metal surfaces retain about 97% original blue finish showing high edge wear, and handling marks. The checkered synthetic "Coltwood" grips feature a thumb rest, single Rampant Colt monogram, and they remain in excellent condition. This pistol features an undercut Patridge front sight, Coltmaster adjustable rear sight, and functions mechanically. An unknown gunsmith has bored-out the lug on the barrel to allow the use of barrel weights (lead shot or slug) or for the opposite effect of making the gun less muzzle heavy and installed a Hex-screw stopper. The hole is approximately .400" wide x 3 5/8" deep (without plug). No weights were included with the gun. The pistol includes a single factory marked ten-round magazine. A nice example of the Match Target pistol. (8A9100-1066) {C&R} [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200
303	Smith & Wesson Model 42 Airweight Double Action Revolver serial #20061, 38 Special, 1 7/8" pinned barrel with an excellent bore. This excellent little Airweight Centennial revolver shows light use and features an improved flat latch. The metal surfaces retain about 98% original blue and anodized finishes showing limited high edge wear, scattered light oxidation stains, and handling marks. The smooth walnut factory Magna grips feature silver S&W medallions, they are numbered to the gun, and rate very good overall with dispersed light handling marks. This revolver features serrated ramp front sight, fixed rear sight, grip safety, and it correctly times and locks up. An excellent example of the earlier Centennials for the collector or as a personal defense firearm. (8A9100-946) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
304	Colt New Service Double Action Revolver serial #316876, 45 Colt, 5 1/2" barrel with a very good bore showing strong rifling and scattered light pitting. This New Service has been non-factory professionally refinished. The metal surfaces retain about 97% reapplied blue finish showing high edge wear, handling marks, old pitting under the new finish, and handling marks. The front sight has light marks on the sides and appears to have been "regulated" for windage. The checkered hard rubber factory grips are numbered to another gun and features "COLT" in an oval showing light handling marks for an overall rating of about excellent. This later gun features a shark fin style front sight, fixed rear sight, lanyard loop, and it correctly times and locks up. This should make a good shooter. (8A9100-215) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
305	Colt Second Generation U.S. Cavalry Cased Commemorative 1860 Army Percussion Revolvers serial #'s US1103 & 1103US U.S. Cavalry Cased Commemorative Set serial #'s US1103 & 1103US, .44 cal., 8" barrels with excellent bores. These beautiful revolvers are cased in a wonderful walnut presentation case with accessories and were appointed to commemorate the 200th anniversary of the U.S. Cavalry. The revolvers and accessories are as new. Both revolvers retain about 99% original blue finish on the barrels and stepped cylinders, with no visible turn ring present. The loading lever, hammer, and frame retain beautiful swirls of case-hardened colors. The brass triggerguard straps rate excellent and the cylinder scenes are crisp. Both revolvers feature smooth one-piece walnut factory grips with a single cartouche on each side, they rate excellent with a few insignificant handling marks. They work mechanically with correct timing and lockup. One outstanding accessory is a single shoulder stock that is serial numbered to the first gun (US1103). The straight grip wooden buttstock rates excellent and features a brass buttplate and brass mounting bracket, both rate excellent. The blue finish on the steel mounting hardware and lanyard loop also rates excellent. Also included are a black finished powder flask, blue finished two-cavity bullet mould (conical and round ball), combination nipple wrench /screwdriver, and a key for the presentation case. All of these are housed in a wonderful walnut case with a brass plate showing a galloping Cavalryman with dates "1777 - 1977". The front of the case has a pair of flush mounted brass locks. The case rates excellent with a few minor handling and storage marks. A magnificent set commemorating the U.S. Cavalry. (8A9100-1103) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500
306	Smith & Wesson Model 51 Double Action Revolver serial #76633, 22 Winchester Magnum R.F., 3 1/2" pinned barrel with an excellent bore. This lovely flat latch 22/32 Magnum Kit Gun shows light honest use and remains in excellent condition. The metal surfaces retain about 98% original blue showing high edge wear, scattered light freckling on the grip frame, and a few handling marks. The service trigger and semi-target hammer retain beautiful case-hardened colors with light operational wear. The diamond checkered walnut factory Magna square butt grips feature silver S&W medallions and are numbered to the gun. The grips rate very good to excellent showing a series of tiny dents along the backstrap and a few other handling marks. This revolver features a Baughman ramp front sight, micro adjustable rear sight, improved flat latch, and it correctly times and locks up. The Magnum Kit Guns are one of those delights that are sought after by collectors and sportsman alike. (8A9100-1077) (C&R) [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200
307	Smith & Wesson 22/32 Kit Gun Hand Ejector Revolver serial #19522, 22 LR, 4" barrel with an excellent bore. This little I-frame four-screw flat latch has seen light use and remains in excellent condition overall. The metal surfaces retain about 98% original blue showing light high edge wear, and handling marks. The service trigger and semi-target hammer retain bold case-hardened colors with minor operational wear. The diamond checkered walnut round butt factory Magna grips are numbered to the gun and feature silver S&W medallions, they rate very good to excellent showing light handling marks along the backstrap. This revolver features a Baughman ramp front sight, micro adjustable rear sight, improved flat latch, and it correctly times and locks up. The Kit Gun Hand Ejectors are always a collectible favorite. (8A9100-261) (C&R) [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
308	Smith & Wesson 22/32 Heavy Frame Target Revolver serial #390942, 22 LR, 6" barrel with an excellent bore. This Hand Ejector remains in very good condition with about 95% original blue showing high edge wear, slight thinning on the grip frame, handling marks, and a cleaned area on the left side of the barrel that appears to have been applied to smooth a moderate ding. The smooth service trigger and service hammer retain strong to bold case-hardened colors with operational wear, the face of the trigger and the hammer spur have toned to a mild gray. The un-numbered diamond checkered walnut factory stepped extension grips rate about good showing light handling marks, there is a chip missing off the left panel on the backstrap where it abuts the shoulder, and it has a crisp patent date on the butt. The little revolver features a Patridge front sight, adjustable rear sight, all appropriate parts are correctly numbered to the gun, it functions mechanically, and it correctly times and locks up. A very good example of the Heavy Frame Target that could stand the occasional trip to the range. (8A9100-599) (C&R) [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900

Lot	Title/Description
309	Colt Second Generation U.S. Cavalry Cased Commemorative 1860 Army Percussion Revolvers serial #'s US2241 & 2241US U.S. Cavalry Cased Commemorative Set serial #'s US2241 & 2241US, .44 cal., 8" barrels with excellent bores showing a few minor factory tool marks. These beautiful revolvers are cased in a delightful walnut presentation case with accessories and were commissioned to commemorate the 200th anniversary of the U.S. Cavalry and remain as new. Both revolvers retain about 99% original blue finish on the barrels and stepped cylinders, with no visible turn ring present. The loading lever, hammer, and frame retain stunning case-hardened colors. The brass triggerguard straps rate excellent and the cylinder scenes remain crisp. Both revolvers feature smooth one-piece walnut factory grips with a single cartouche on each side, they rate excellent. They work mechanically with correct timing and lockup. They include an outstanding single shoulder stock as an accessory that is serial numbered to the first gun (US2241). The straight grip wooden buttstock rates excellent and features a brass buttplate and brass mounting bracket, that also rate excellent. The steel mounting hardware and lanyard loop retain about 99% original blue finish. Also included are a black finished powder flask, blue finished two-cavity bullet mould (conical and round ball), combination nipple wrench /screwdriver, and a key for the presentation case. All of these are housed in a lovely walnut case with a brass plate showing a galloping Cavalryman with dates "1777 - 1977". The front of the case has a pair of flush mounted brass locks that function. The case rates about excellent with a few minor handling showing a minor check on the cover where two pieces of wood are joined. This beautiful set is fine tribute to the U.S. Cavalry. (8A9100-1049) (ANTIQUÉ) [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500
310	Smith & Wesson Military & Police Hand Ejector Revolver serial #S819792, 38 Special, 6" barrel with an excellent bore. This lovely 1945-manufactured five-screw revolver shows very light use over the years and remains in excellent condition. The metal surfaces retain about 98% original blue finish most of the loss to light edge wear also showing a few light handling marks. The service trigger and hammer retain the beautiful swirls of case-hardened colors of the era with operational wear. The diamond checkered walnut factory Magna grips feature silver S&W medallions, they are numbered to the gun, and rate very good to excellent showing light handling marks. All the appropriate parts are correctly numbered to the gun, it features the half-moon front sight, fixed rear sight, and it times and locks up as good as the day it left Roosevelt Ave. An excellent example of these very early Pre-Model 10 revolvers. (8A9100-493) (C&R) [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
311	Smith & Wesson 22/32 Heavy Frame Target Hand Ejector Revolver serial #408826, 22 LR, 6" barrel with an excellent bore. This revolver has seen honest use and remains in excellent condition. The metal surfaces retain about 96% of the original blue finish showing high edge wear and handling marks. The service trigger and hammer retain strong case-hardened colors toning to gray with operational and handling wear. The diamond checkered factory walnut extended target grips are numbered to the gun and rate very good with light handling marks showing a scuff on the edge of the right panels butt. All appropriate parts are correctly numbered to the gun, it correctly times and locks up, it features a McGivern ivory bead front sight, and adjustable rear sight. A very nice example of a mid-production Heavy Frame revolver. (8A9100-598) (C&R) [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
312	Custom Walther Model 1936 Olympia Jagerschafts Semi-Auto Pistol serial #64600, 22 LR, 4 5/8" barrel with an excellent bore. This Olympia pistol remains in very good condition with about 95% original blue most of the loss to edge wear, in addition to handling marks, and lightly thinning finish. The two frame mounted weights have toned to a mottled mix of brown, pewter, and blue with perhaps 60% remaining. The checkered walnut factory wrap around thumb rest grips rate very good with light handling marks. This pistol features an elevation adjustable Patridge front sight, windage adjustable rear sight, frame mounted swinging thumb safety, and custom compensator. It includes a single ten-round magazine with wooden extension floorplate that is correctly numbered to the gun. It also includes a large main frame mounted weight and smaller secondary weight along with their respective mounting screws. Overall, a very good example of the Jagerschafts pistol. (8A9100-1155) (C&R) [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
313	Harrington & Richardson Model 199 Single Action Sportsman Revolver serial #J490, 22 LR, 6" oval shaped barrel with an excellent bore. This post war (1949) revolver has seen light use over the years and remains in excellent condition with about 97% original blue, the edges show light wear with the toe area of the front strap toned to brown, scattered very light freckling, and handling marks. The bright sides of the hammer and right side of the trigger show light staining. The checkered walnut one-piece factory target grips rate very good to excellent showing scattered light handling marks. The barrel to frame fit is tight, it correctly times and locks up, and features an elevation adjustable front sight, plus a windage adjustable black blade rear sight. The barrel, cylinder, and ejector are numbered to the gun. A lovely Model 199 large frame top-break revolver. (8A9100-92) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
314	Harrington & Richardson Model 199 Single Action Sportsman Revolver serial #S16370, 22 LR, 6" oval shaped barrel with an excellent bore. This lovely 1956-manufactured revolver remains in excellent condition with about 98% original blue, showing high edge wear, very light freckling, and handling marks. The bright sides of the hammer and trigger show minor oxidation staining. The checkered walnut one-piece factory target grips rates about excellent, showing a few handling marks. The barrel to frame fit is tight, it correctly times and locks up, it features a factory elevation adjustable Patridge front sight with small round brass insert, windage adjustable black blade rear sight, and patent date on the cylinder. The barrel, top latch, cylinder, and ejector are correctly numbered to the gun. An excellent example of the Model 199. (8A9100-711) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
315	U.S. Model 1871 Army Rolling Block Pistol by Remington serial #4754, 50 Centerfire, 8" plain barrel with a very good to excellent bore showing strong rifling and shallow scattered pinprick pitting. The metal surfaces show signs of previous light cleaning having toned to a mix of mild gray and pewter with scattered light pinprick pitting, oxidation stains, and handling marks. The smooth walnut factory one-piece grips are numbered to the gun, Curtis R. Stickney's cartouche remains strong, and the grips rate about good to very good showing scattered handling marks, a small scuff on the bottom edge of the right side butt, and other moderate to light dings and dents. The un-numbered forend rates about the same as the pistol grip with similar handling marks. The left side of the frame has a crisp factory address and "P S" proof / inspection stamps, the grip straps have matching assembly numbers and the pistol functions mechanically. A very good example of the Model 1871 Army. (8A9100-384) {ANTIQUE} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
316	Walther Model 1936 "Schnellfeuer" Olympia Semi-Auto Pistol serial #6224, 22 Short, 7 7/16" plain barrel with an excellent bore. This Rapid Fire version of the Olympia pistol retains about 95% original blue and anodized finishes showing high edge wear, handling marks, a couple of small areas of oxidation stains, and one tiny spot of cleaned oxidized pinprick pitting. The aluminum slide retains most of its finish although it has started to tone to a coppery-black hue with several strong areas of color in the more protected regions in addition to the previously noted edge wear and handling marks. The checkered walnut factory target grips with wide thumb rest rate very good with light handling marks and wear. This pistol features an elevation adjustable smooth semi-ramp front sight, windage adjustable rear sight although one side of the "opposing screws" adjustment system shows slot damage, the gun functions mechanically, and it is factory drilled, tapped, and slotted to accept frame mounted weights (not included). The pistol includes a single six-round magazine with wooden extension floorplate that is numbered to another gun. This is a nice example of a seldom seen pistol. (8B9100-1148) {C&R} [Richard "Stretch" Kennedy Collection] (1200/1800) Est. 1,200 - 1,800
317	Colt Diamondback Double Action Revolver serial #D67657, 38 Special, 2 1/2" ventilated rib barrel with an excellent bore. This 1975-manufactured revolver retains about 99% professionally reapplied blue showing a few minor handling marks and scattered old pitting under the finish. The service trigger and target hammer retain a full blue finish with bright sides on the hammer. The checkered walnut factory extension service style grips feature silver Rampant Colt medallions and rate about very good showing light wear and handling marks. This gun features a serrated ramp front sight, black blade Colt Accro adjustable rear sight, and it times and locks up as good as the day it left the factory. A great example of the Diamondback for the upstart collector, a great defensive revolver, or a fine shooter. (8B9100-297) {MODERN} [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500

Lot	Title/Description
318	Scarce Smith & Wesson Model 36 Double Action Revolver serial #J580227, 38 Special, 1 7/8" pinned barrel with an excellent bore. In 1977 the U.S. Government bought 2000 Chiefs Special revolvers equipped with a lanyard ring, "U.S." stamped on the backstrap, and the serial numbered moved to the yoke cut on the frame. There was an overrun of about 112 revolvers that retained the lanyard ring although the backstrap was marked "MADE IN U.S.A." creating its own set of collectibles. This gun appears to have seen little if any use and retains about 98% original blue finish most of the loss to a series of very small spots of pinprick pitting on the left side of the frame along with a few minor handling marks. The service trigger and hammer retain beautiful swirls of case-hardened colors. The checkered walnut factory Magna grips are numbered to another gun, they feature silver S&W medallions, and remain in excellent condition. This gun has the standard features of a Chiefs Special, in addition to a lanyard loop, and the backstrap is marked "MADE IN U.S.A." and it times and locks up correctly. A great find for the collector and a nice addition to any collection. (8B9100-M26) {MODERN} [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500
319	Smith & Wesson Model 10-7 Double Action Revolver serial #5D16036, 38 Special, 5" pinned tapered barrel with an excellent bore. This revolver shows light honest use and the frame on the left side is marked "WC-37". No firm information could be found on the "WC-37" marking although it is obviously a rack number for a firm or agency. This 1979-manufactured revolver retains about 98% original nickel plate showing light handling marks, lightly oxidized pitting on the right side of the knuckle, and clouding finish, mostly on the grip frame. The service trigger and hammer show light cleaning and are toning to gray and pewter although the trigger has strong but muted case-hardened colors with scattered light oxidation stains. The diamond checkered walnut factory Magna grips are numbered to another gun and rate about good with light to moderate diamond point wear and handling marks. The revolver features a serrated ramp front sight, fixed rear sight, and it correctly times and locks up. This should be a fun research project for the collector of law enforcement or private security firearms. (8B9100-1247) {MODERN} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
320	Smith & Wesson 38 Regulation Police Hand Ejector Revolver serial #13102, 38 S&W, 4" barrel with an excellent bore. This lovely pre-war Regulation Police shows minimal use over the years and remains in grand condition. The revolver retains about 99% original blue finish with light high edge wear and a few handling marks. The service trigger and hammer retain bold case-hardened colors with light operational wear. The diamond checkered walnut factory extension grips have a pencil number but is defaced although the fit of the stocks to the frame indicate they are original and retain near excellent condition with slight edge wear at the butt. The patent date on the butt is crisp overall although it was struck slightly off center and the "1917" is very light on the bottom of the numbers. This early five-screw I-frame revolver features a half-moon front sight, fixed rear sight, all appropriate parts are correctly numbered to the gun, and it correctly times and locks up. This little beauty shows minimal handling wear and appears to have not been shot very much if at all. This is a superb example of this genre of Regulation Police revolvers and would be a terrific addition to any collection. (8A9100-1098) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
321	Smith & Wesson 32 Regulation Police Hand Ejector Revolver serial #489657, 32 S&W Long, 4 1/4" barrel with an excellent bore. This beautiful pre-war Regulation Police shows minimal use over the years and remains in wonderful condition. The revolver retains about 99% original blue finish with a few minor handling marks. The service trigger and hammer retain beautiful swirls of case-hardened colors with light operational wear. The diamond checkered walnut factory extension grips are numbered to another gun and rate excellent with minor handling marks and a crisp patent date on the butt. This early five-screw I-frame revolver features a half-moon front sight, fixed rear sight, all appropriate parts are correctly numbered to the gun, and it correctly times and locks up. This grand little gun show's little if any use over the years. A great addition to any collection. (8A9100-1092) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
322	Smith & Wesson First Model Single Shot Pistol serial #15170, 32 S&W (Short), 10" barrel with an excellent bore. This lovely example of the "Model of '91" marked pistol has been professionally non-factory refurbished retaining about 99% later added nickel plate and blue finish showing a few minor handling marks. The trigger has toned to a pleasing gray, the hammer retains slightly muted case-hardened colors with operational wear. The replacement un-numbered diamond checkered factory walnut extension target grips rate about very good to excellent showing light handling marks. The barrel and top latch are correctly numbered to the gun, and it features a pinned Paine front sight, adjustable "U" notch rear sight, barrel to frame fit is tight, and the mechanism functions. A beautiful example of a professionally restored Model of 1891 for the collector. (8A9100-969) {ANTIQUE} [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500
323	Colt Model 1908 Pocket Hammerless Semi-Auto Pistol serial #94739, 380 ACP, 3 3/4" barrel with an excellent bore. This 1928-manufactured pistol has seen some use over the years although it still retains about 99% original nickel plate showing numerous tiny handling marks and light but limited clouding mostly on the grip safety. The checkered walnut factory grips feature silver Rampant Colt medallions, the left panel rates very good with light wear, the right panel rates fair exhibiting light wear and a half dozen roughly 3/16" diameter shallow holes drilled into the wood in a pattern that suggest some manner of inserts were destined for the holes but were never installed. This type IV pistol features a magazine safety, half-moon front sight, drift adjustable rear sight, and functions mechanically. It includes a single seven-round factory marked nickel plate magazine. An excellent example of the Model M. (8A9100-205) {C&R} [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500
324	Colt Officers Model Match Revolver serial #66419, 22 LR, 6" heavy barrel with an excellent bore. This first year manufactured (1953) Fifth Issue revolver remains in grand condition with about 96% original blue finish much of the loss to muzzle and high edge wear in addition to a few scattered handling marks. The service trigger and spur of the target hammer retain near full blue finish showing minor wear, and the bright sides of the hammer has light scattered stains. The checkered second type factory walnut target grips with gold Rampant Colt medallions rate very good to excellent showing minimal wear to the diamond points, a slight gap at the toe from mild warping, and scattered handling marks. This revolver features a pinned undercut Patridge front sight, Colt Accro black blade rear sight, and it correctly times and locks up. An excellent condition Officers Model that can tolerate the periodic trip to the range. (8A9100-1061) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
325	Harrington & Richardson Model 199 Single Action Sportsman Revolver serial #RS12891, 22 LR, 6" oval shaped barrel with an excellent bore. This lovely 1956-manufactured revolver remains in excellent condition with about 98-99% original blue, showing limited high edge wear, fine pinprick pitting on the frontstrap, and handling marks. The bright sides of the hammer and trigger show minor operational marks. The checkered walnut one-piece factory target grips rates very good to excellent, showing a few handling marks, nice woodgrain, and a small shallow 1/4" chip flaked off below the screw hole. The barrel to frame fit is tight, it correctly times and locks up, it features a factory elevation adjustable Patridge front sight with small round brass insert, windage adjustable black blade rear sight, and patent date on the cylinder. The barrel, top latch, cylinder, and ejector are correctly numbered to the gun. The "R" in the serial number is later added, bears a slightly different font, and it is not clear why it was added, perhaps to differentiate a duplicate but this has not been verified. An excellent example of the Model 199. (8A9100-1199) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
326	Scarce Colt Detective Special Revolver serial #963199, 38 Special, 3" barrel with an excellent bore. This lovely Second Issue revolver left the factory in 1968 with the scarce 3" barrel and has seen very little use in the ensuing years. The metal surfaces retain 99% original blue showing scattered very light high edge wear and a few light handling marks. The service trigger and hammer spur retain full blue finish with lovely bright sides on the hammer. The fully checkered factory walnut service style extension grips are numbered to the gun, they feature silver Rampant Colt medallions and rate excellent. This revolver features fixed rear sight, serrated ramp front sight, short grip frame, and it correctly times and locks up. The Rampant Colt on the frame and barrel markings on the left side have white filler to highlight them although about half of it is missing on the pony. A well-cared for "Dick Special" that has seen light use and features the desirable longer barrel. (8A9100-1238) {C&R} [Richard "Stretch" Kennedy Collection] (1200/1800) Est. 1,200 - 1,800

Lot	Title/Description
327	Colt Police Positive Special Revolver serial #989653, 38 Special, 4" barrel with an excellent bore. This beautiful Third Issue revolver has seen light use since it left the factory in 1968. The metal surfaces retain 99% original blue showing scattered light high edge wear and a few light handling marks. The service trigger and hammer spur retain full blue finish the bright sides of the hammer show slight staining from oxidation. The fully checkered factory walnut service style extension grips are numbered to the gun, they feature silver Rampant Colt medallions and rate about good to very good displaying very light wear although the butt shows a series of moderate denting. This revolver features fixed rear sight, serrated ramp front sight, short grip frame, and it correctly times and locks up. A very nice condition Police Positive Special revolver. (8A9100-1245) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
328	U.S. Model 1917 Double Action Revolver by Smith & Wesson serial #21031, 45 ACP, 5 1/2" barrel with an excellent bore. This February 1918-manufactured revolver remains in very good condition with about 90-92% original blue finish, showing light to moderate edge wear, thinning finish on portions of the grip frame and sideplate, a section of pewter over one chamber on the cylinder and a mottled mix on the topstrap, possibly from blood protein contact, and handling marks. The service trigger and hammer retain bold case-hardened colors with operational wear, the lanyard loop has toned to gray with a tiny sliver of color left on the swivel. The grips are later replacement diamond checkered walnut Magna grips with silver S&W medallions that rate excellent showing light handling marks. This gun features a half-moon front sight, fixed rear sight, Colonel Gilbert H. Stewart's inspection mark remains crisp as do the factory markings, and it correctly times and locks up. A very good example of the Model 1917 that has seen honest use over the years. (8A9100-270) {MODERN} [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200
329	Colt Officers Model Target Revolver serial #560345, 38 Special, 7 1/2" barrel with an excellent bore. This 1927-manufactured revolver retains about 93% original blue finish most of the loss is to scattered fields of oxidation stains, freckling, pitting, light handling marks, and limited edge wear. The service trigger and hammer retain full blue finish, and the bright sides show light staining. The fully checkered walnut service grips feature silver Rampant Colt medallions, they are numbered to the gun, and rate very good showing minimal wear with a small shallow chip missing on the edge of the right panels butt. The grips are correctly numbered to the gun, but the wood is slightly proud of the frame in a few areas. This Third Issue revolver features an elevation adjustable Patridge front sight, windage adjustable black blade rear sight, and it correctly times and locks up. A great start up gun for the aspiring collector and should be a fine shooter for the vintage revolver enthusiast. (8A9100-247) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
330	Hammerli-Walther Model 205 Olympia Semi-Auto Pistol serial #0-5216, 22 LR, 7 1/2" barrel (not including muzzle brake) with an excellent bore. This is a 1958 type Model 205 that is differentiated from the earlier style by the muzzle brake, and adjustable heel style grips, it remains in excellent overall condition showing minimal use. The pistol retains about 98% original blue showing light operational wear on the barrel, and handling marks. The grips are a lovely set of very ergonomic checkered factory walnut Olympic Free style target grips that rate about excellent. These right-handed grips features a prominent thumb and finger rest, large shelf above the trigger finger, and an adjustable palm rest. This gun has many features including a semi-ramp front sight, adjustable rear sight, frame weight with added weight extension, barrel weight, and muzzle brake. It includes a single ten-round factory magazine electric pencil numbered to another gun with extended synthetic floorplate. An excellent condition "Old School" high grade target pistol. (8A9100-1151) {C&R} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
331	Smith & Wesson Model 10-5 Double Action Revolver serial #D480209, 38 Special, 4" pinned tapered barrel with an excellent bore. This lovely early 1970's Military & Police revolver remains in excellent condition and appears to have seen little if any use. The revolver retains about 99% original nickel plate showing a few light handling marks. The service trigger and hammer retain bold case-hardened colors with minor handling marks. The stocks have been replaced with smooth unmarked faux mother-of-pearl service style grips in excellent condition. The revolver features a serrated ramp front sight, fixed rear sight, and it correctly times and locks up. The gun includes a mismatched factory silver two-piece box that has been marked with this guns serial number, the rest of the information was crossed out and a factory cleaning kit. The nickel plate lends a certain panache to the time tested Military & Police revolvers. (8A9100-M30) {MODERN} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
332	Colt Model 1908 Vest Pocket Hammerless Semi-Auto Pistol serial #376089, 25 ACP, 2 1/8" barrel with an excellent bore. This lovely little 1929-manufactured Vest Pocket shows light use and remains in excellent condition. The metal surfaces retain about 97% original blue finish showing light high edge wear, slight thinning on the upper slide, and handling marks. The trigger, safety, and thumb safety retain bold case-hardened colors, although the back of the grip safety is fading from handling. The fully checkered walnut factory grips feature silver Rampant Colt medallions and rate about excellent showing slight flattening of the diamond points. This pistol includes the original factory hinged maroon box that is correctly end labeled and numbered to the gun, a single factory marked two-tone six-round magazine, a single unmarked solid blue finish six-round magazine, and the original instruction manual. The box rates about good showing moderate edge wear, two front corners on the cover are torn, the hinge remains intact although the maroon covering is starting to peel off the fabric hinge, and the label rates very good with edge wear and a very small corner torn away on the left side. The manual rates about fair showing crisp printing overall, soiling in a couple of the sections, and the multi-folded manual is tearing on a multitude of seams. An excellent example of this tiny self-defense pistols. (8A9100-M9) {C&R} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
333	Colt Model 1908 Vest Pocket Hammerless Semi-Auto Pistol serial #393178, 25 ACP, 2 1/8" barrel with an excellent bore. This fine little 1932-manufactured Vest Pocket remains in excellent condition. The metal surfaces retain about 97% original blue finish showing high edge wear, areas of lightly cleaned oxidized pitting mostly on the right front side of slide, a few minor oxidation stains, and handling marks. The trigger, safety, and thumb safety retain bold case-hardened colors although the thumb safety shows a small area of pinprick pitting. The fully checkered walnut factory grips feature silver Rampant Colt medallions and rate about excellent showing slight flattening of the diamond points mainly on the right panel. This pistol includes a factory hinged maroon box that is correctly end labeled to the gun but is un-numbered, and a single factory marked two-tone six-round magazine. The box rates about fair showing moderate edge wear, the two right side corners on the cover are torn, the hinge is detached, and the label rates about very good with edge wear, plus the edges are starting to peel and curl. A very nice example of the Vest Pocket that has seen light honest use. (8A9100-195) {C&R} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900

Lot	Title/Description
334	Colt Frontier Scout Lawman Series Wyatt Earp Buntline Commemorative Single Action Revolver serial #438LWE, 22 LR, 11 3/4" barrel with excellent bore. This 1970 two-tone commemorative remains in wonderful condition. The metal surfaces retain 99% original nickel plate and anodized finishes with a few minor handling marks, plus a tiny wear spot on the left recoil shield. Colt chose to anodize the frame and ejector rod housing, contrasting beautifully with the remaining parts that were given a nickel plate finish. The smooth walnut factory grips with silver Rampant Colt medallions rate excellent, the left panel has two miniscule areas of bubbling that are factory defects during finishing. The revolver has typical fixed sights used on the Frontier Scout series at the time, and it functions mechanically with correct timing and lockup. The right side of the barrel is marked "LAWMAN SERIES - WYATT EARP". This fine commemorative is housed in a factory leatherette covered hinged presentation case. The inside is felt lined and cut out for the revolver with satin lined cover. The exterior and interior cover have a print of Wyatt, his brothers, and Doc Holiday presumably enroute to their famous duel at the O.K. Corral. The exterior of the case rates very good showing several scuffs in the black leatherette in several areas in addition to handling marks. A very nicely presented Commemorative with about 3000 produced. (8A9100-1390) {C&R} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
335	Colt Officers Model Target Revolver serial #596435, 38 Special, 6" barrel with an excellent bore. This 1936-manufactured revolver retains about 95% original blue finish most of the loss is to edge wear on the cylinder and muzzle in addition to a few handling marks. The service trigger and hammer retain a strong blue finish, and the bright sides of the hammer show moderate staining. The un-numbered fully checkered walnut service grips feature silver Rampant Colt medallions, and rate very good to excellent showing minimal wear with a few small dents present. This Third Issue revolver features an elevation adjustable bead front sight, windage adjustable "U" notch black blade rear sight, and it correctly times and locks up. A great start up gun for the aspiring collector that can tolerate the periodic trip to the range. (8A9100-386) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
336	Colt Police Positive Double Action Revolver serial #192457, 32 Colt New Police (S&W Long), 4" with an excellent bore. The metal surfaces of this fine 1929-manufactured revolver retain about 95% original blue, the backstrap has toned to a mix of brown and blue, in addition to high edge wear, scattered very light oxidation stains, and handling marks. The trigger and hammer spur retain full blue while the bright sides of the hammer show light operational wear and minor staining. The checkered hard rubber factory grips are numbered to the gun, they rate excellent, and they feature a stylized "C" around the escutcheons, "COLT" in an oval, and fleur-de-lis borders. The revolver features a half-moon front sight, fixed rear sight, and functions mechanically with correct timing and lockup. A very good example of the Police Positive. (8A9100-368) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
337	Desirable Smith & Wesson Model 41 Semi-Auto Target Pistol serial #19707, 22 LR, 5" lightweight field barrel with an excellent bore. This early style pistol has the lightweight field barrel aimed at the outdoorsman. The metal surfaces retain about 96% original blue finish the frontstrap starting to thin in addition to high edge wear, handling marks, and some slight freckling. The checkered walnut factory grips rate very good to excellent with light handling marks along the edge of the butt. This pistol features the early cocking indicator, red ramp front sight, adjustable rear sight with later added two dot slider (blade) and appears to function mechanically. This pistol includes a single factory marked ten-round magazine. A very nice example of Smith & Wesson's attempt at a "sporting" version of the famed Model 41. (8A9100-1365) {C&R} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
338	Rare Smith & Wesson Model 41 Or 46 .22 Short Conversion Kit This kit includes a total of eight parts. Included is (1) 7 3/8" heavy barrel chambered for 22 Short and features a detachable aluminum muzzle brake, Patridge front sight, black blade adjustable rear sight, and retains about 99% original blue and anodized finishes showing a few minor handling marks. Also included is (1) aluminum factory slide that retains about 99% original anodized finish showing a few minor handling marks. Additionally, (1) recoil spring, (1) recoil spring guide rod, (1) slide stop cut for the 22 Short cartridge, (1) factory marked five-round 22 Short magazine showing light use, and (1) factory conversion kit "flyer" in excellent condition. A must have for the complete Model 41 collection. Also see the excellent spare 22 Short magazine elsewhere in our Timed auction. (8A9100-1365A) {NON-GUN} [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200
339	Early Smith & Wesson Chiefs Special Hand Ejector Revolver serial #20334, 38 Special, 3" factory replacement barrel with an excellent bore. This very good condition Pre-Model 36 revolver is built on the early five-screw J-frame with first style flat latch, featuring the smaller triggerguard and shorter grip frame of the I-frame, although the revolver has a later added 3" barrel. The early J-frames would eventually evolve with longer more oval triggerguard and slightly longer grip frame seen on most of them. The metal surfaces retain about 93% original blue finish the backstrap and portions of the butt toning to brown-pewter mix, along with high edge wear, slight thinning on the cylinder, and handling marks. The service trigger and hammer retain bold case-hardened colors with light operational marks. The diamond checkered walnut round butt grips are numbered to the gun and feature silver S&W medallions, they rate about good to very good with light wear, a very thin 1/2" long sliver missing along the right panel's backstrap, and handling marks. The replacement barrel features a serrated ramp front sight, fixed rear sight, unique features of the early Chiefs Specials outline above, the ejector rod is a later longer replacement to accommodate the longer barrel, and it appears to function mechanically. The barrel is not numbered, all the other appropriate parts are correctly numbered to the gun, and there are no factory rework marks observed. This is a great upstart collectible for the budding S&W collector. (8A9100-166) {C&R} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
340	Colt Pocket Positive Double Action Revolver serial #71599, 32 Colt New Police (S&W Long), 3 1/2" barrel with slight frosting in the bore. This lovely 1914-manufactured Pocket Positive remains in excellent condition with about 98% original nickel plate showing scattered fine freckling, limited light bubbling, and a few handling marks. The service trigger and hammer retain full nickel plate with slight operational wear. The checkered hard rubber factory round butt grips are numbered to another gun but display good fit, the right panel rates excellent with a tiny ding on the butt, the left rates fair showing little wear but there is a 3/8" chip missing on the toe of the left panel. The little gun functions mechanically with correct timing and lockup. It includes an unlabeled and un-numbered hinged factory maroon box and a factory bore brush. The box rates good to very good, the two back corners of the cover are torn, there is light edge wear mostly on the hinge edge, on small section of the cloth hinge is starting to fail and it has scattered very light soiling. The brush and original kraft paper cover rate excellent. An excellent example of an early Pocket Positive. (8A9100-M4) {C&R} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
341	High Standard Model HB Semi-Auto Pistol serial #280872, 22 LR, 4 1/2" barrel with an excellent bore. The pistol retains about 98% original blue finish showing light edge wear, backstraps display slight thinning to brown, and a few light handling marks. The checkered hard rubber factory grips feature the High Standard logo and rate excellent. This pistol features a serrated ramp front sight, drift adjustable rear sight, and functions mechanically. It includes the original hinged factory black leatherette covered box that is correctly end labeled and numbered to the gun, a single two-tone ten-round magazine, and original instruction manual. The box rates very good showing light corner wear, handling marks, and the left front corner of the cover has failed. The instruction manual rates good to very good, the edges are folded up and lightly tattered with limited tearing, but the print remains crisp. A remarkable example of the Model HB. (8A9100-717) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700

Lot	Title/Description
342	Auto Ordnance Commander Cut-Away Semi-Auto Pistol serial #AOC34506, 40 S&W, 4 1/4" barrel with an excellent bore. This unique pistol is sure to pique the interest of every 1911 fan. The factory has skillfully and precisely cut away portions of the slide, frame, grips, and magazine to expose the inner workings of the pistol for educational purposes. The metal surfaces retain 99% plus original blue finish. The cut away sections have been highlighted in red enamel paint and that rates excellent. The checkered synthetic factory grips with Auto Ordnance medallions rate excellent as cut away. It includes a single nine-round Metalform magazine that has been cut away also. There is a tiny ding on the front edge of the front sight and the gun functions mechanically. A must have for the dedicated 1911 collector. (8A9100-743) {MODERN} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
343	Hammerli Model 100 Single Shot Free Pistol serial #1952, 22 LR, 11 1/4" octagon barrel with an excellent bore. This precision pistol has seen honest use over the years but remains in near excellent condition, retaining about 97% original blue showing scattered light edge wear, handling marks, and few light dings. The smooth factory walnut "Free Style" grips rate very good with scattered handling marks. They feature heavily sculptured finger rest (right handed grips), adjustable palm rest, and deep thumb rest. This pistol features a removable Patridge front sight, fully adjustable black blade rear sight with light oxidation stains, a hole in the rear of the frame and grips to allow cleaning from the breech end of the Martini action, cocking lever on the left side of the frame, and fully adjustable trigger that is very, very light. A good start up gun for the aspiring Olympic competitor. (8A9100-705) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
344	Colt Woodsman Sport Semi-Auto Pistol serial #148172, 22 LR, 4 1/2" barrel with an excellent bore. This nice 1941-produced First Series Woodsman Sport retains about 98% original blue exhibiting high edge wear, slight thinning of the finish on the straps, and handling marks. The checkered walnut factory grips rate excellent showing minor handling marks. The pistol features a serrated ramp front sight, windage adjustable rear sight, and appears to function mechanically. This pistol includes a single factory marked ten-round magazine. An excellent example of a pre-war Woodsman Sport Model. (8A9100-388) {C&R} [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500
345	Colt Woodsman Sport Semi-Auto Pistol serial #153392, 22 LR, 4 1/2" barrel with an excellent bore. This 1942-produced First Series Woodsman Sport remains in very good condition showing honest use over the years. It retains about 95% original blue exhibiting high edge wear, slight thinning of the finish on the straps, and handling marks. The checkered walnut factory grips rate very good showing light handling marks and compressed diamond points. The pistol features a serrated ramp front sight, windage adjustable rear sight, and appears to function mechanically. This pistol includes a single two-tone factory marked ten-round magazine. A very nice pre-war Woodsman Sport Model that can tolerate range or field use. (8A9100-22) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
346	Colt Pocket Positive Double Action Revolver serial #103391, 32 Colt New Police (S&W Long), 3 1/2" barrel with a near excellent bore showing a few traces of frosting. This 1921-manufactured Pocket Positive remains in very good condition with about 94% original blue finish showing high edge wear, the heel of the backstrap and butt are toning to brown, scattered fields of oxidized pitting mostly on the cylinder, and scattered handling marks. The service trigger and hammer retain strong blue showing light wear on the face of the trigger and operational marks on the hammer. The checkered hard rubber factory round butt grips with "COLT [in an oval]" are numbered to the gun, the right panel rates excellent with a few handling marks on the butt, the left rates fair showing little wear but there is a 1/4" chip missing on the toe of the left panel. The little gun functions mechanically with correct timing and lockup. It includes an un-numbered hinged factory maroon box with the label is mostly worn away and unreadable. The box rates poor with a tear across the base and thinning material in addition to a failing hinge, moderate edge wear, the front and right side lip of the lid is missing, and the inner "frame" of the box is torn and no longer adhered to the base. An excellent example of an early Pocket Positive. (8A9100-1384) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
347	Colt Woodsman Sport Semi-Auto Pistol serial #46365-S, 22 LR, 4 1/2" barrel with an excellent bore. This 1950-produced Second Series Woodsman Sport remains in very good condition showing honest use over the years. It retains about 93-94% original blue exhibiting high edge wear, thinning of the finish on the straps, and handling marks. The checkered factory "Coltwood" grips feature a Rampant Colt on the right panel and rate near excellent showing a few small handling marks on the edge of the butt. This pistol also includes a large factory grip adaptor constructed of "Coltwood" and rates excellent. The pistol features a serrated ramp front sight, fully adjustable rear sight, and appears to function mechanically. This pistol includes a single factory marked ten-round magazine. A very nice Woodsman Sport Model for the upstart collector and it would be a nice range or field gun. (8A9100-129) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
348	Remington New Model Navy Cartridge Conversion Single Action Revolver serial #25282, 38 CF, 7 3/8" barrel with scattered oxidized pitting. This factory conversion has been professionally refurbished and remains in excellent condition. The metal surfaces retain about 99% factory quality reapplied blue finish, showing several old pits under the new finish with a heavy and prominent pit on the left side of the frame and several lesser ones in the loading trough. The brass triggerguard rates about excellent showing light tarnish. The hammer has beautiful swirls of case-hardened colors. No grips are provided with the revolver. The conversion number 757 appears on the grip frame, barrel, and triggerguard although there are no numbers observed on the cylinder. The barrel and brass triggerguard are also serial numbered to the gun. The revolver functions mechanically and correctly times and locks up. An excellent example of a nicely refurbished conversion revolver. (8A9100-699) {ANTIQUE} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
349	Colt Woodsman Target Semi-Auto Pistol serial #78397, 22 LR, 4 1/2" medium barrel with an excellent bore. This 1931-produced First Series Woodsman Target remains in very good condition showing honest use over the years. It retains about 97-98% original blue displaying light edge wear, scattered very light freckling, and handling marks. The checkered walnut factory grips rate near excellent as later altered showing light handling marks and a few compressed diamond points. The center of both grip panels have a later added 3/4" long oval of mother-of-pearl, a pair of small 3/16" diameter mother-of-pearl inserts, and finally a single 3/16" diameter mother-of-pearl insert at the top. The workmanship rates fair to good. The inserts are not highly polished, but the rainbow of colors usually associated with this material are still visible in proper lighting. The pistol features an elevation adjustable Patridge front sight, windage adjustable rear sight, and appears to function mechanically. This pistol includes a single two-tone factory marked ten-round magazine. This would make a good upstart collectible after replacing the grips with curious decorations, although it should make a fine shooter as is. (8A9100-1171) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
350	Smith & Wesson Brazilian Contract Model 1937 Hand Ejector Revolver serial #200580, 45 ACP, 5 1/2" barrel with an excellent bore. This revolver has seen use over the years but has survived its service in South America better than most. The metal surfaces retain about 75-80% original blue finish, the grip frame toned to pewter, with scattered thinning finish, high edge wear, handling marks, and pitting. The service trigger and hammer retain slightly subdued case-hardened colors with operational wear and the lanyard loop has toned to gray. The diamond checkered walnut factory grips are numbered to the gun and feature silver S&W medallions, they rate about good to very good showing light diamond point wear and handling marks. All the appropriate parts are correctly numbered to the gun, it functions mechanically, and correctly times and locks up. The Brazilian crest and other markings remain crisp. A good example of the Model 1937. (8A9100-235) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700

Lot	Title/Description
351	Colt Cobra Lightweight Double Action Revolver serial #69931-LW, 38 Special, 4" barrel with an excellent bore. This lightweight Cobra has seen honest use since it left the factory in 1957 but remains in excellent condition. The metal surfaces retain about 95-96% original blue and anodized finishes showing high edge wear, handling marks, and the backstrap is starting to thin slightly. The hammer and trigger retain full blue, the bright sides of the hammer show light staining. The fully checkered walnut factory grips feature silver Rampant Colt medallions, they are numbered to another gun but exhibit good overall fit and rate about very good showing light wear, mostly on the right panel. The revolver feature a serrated ramp front sight, fixed rear sight, functions mechanically, and it correctly times and locks up. A great gun for the upstart collector or a variety of defensive carry and shooting needs. (8A9100-448) {C&R} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
352	Colt Officers Model Target Revolver serial #54258, 22 LR, 6" barrel with an excellent bore. This 1949-manufactured revolver remains in very good condition. It retains about 94% original blue finish showing light to moderate edge wear, light handling marks, a few minor oxidation blemishes, and a tiny spot of pinprick pitting on the sideplate. The trigger and hammer retain strong blue with bright sides on the hammer. The checkered factory "Coltwood" grips feature a Rampant Colt on both panels and rate excellent overall. This gun is equipped with an elevation adjustable Patridge front sight, windage adjustable rear sight, and it correctly times and locks up. This fine example should make a great shooter or upstart collectible. (8A9100-103) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
353	Walther Standard Model GSP Target Semi-Auto Pistol serial #200564, 22 LR, 4 1/2 heavy barrel with a bright excellent bore. The metal surfaces of this 1985 proof dated pistol retain about 98% original blue and anodized finishes showing light high edge wear and handling marks. The factory target style walnut grips rate excellent and feature a finger groove, thumb groove, palm swell, and adjustable palm rest. The pistol appears to function mechanically, and the front and rear sights have been removed and are not provided. This pistol includes a single five-round factory magazine. A precision pistol for formal or informal bullseye competition. (8A9100-1152) {C&R} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
354	Lefever Arms Co. DS Grade Sideplate Double Shotgun serial #72710, 12 ga, 28" barrels choked improved modified and full, with a few stubborn spots of wad residue in an otherwise bright excellent bore. The barrels retain about 99% excellent quality reapplied blue finish with slight silvering at the muzzles, a few light handling marks, and traces of previous pinprick to light pitting and previous light scratches beneath the finish. The frame retains about 97% vibrant casehardened color with an added clear protective lacquer showing light wear on high edges, light flaking of the lacquer on the right-side plate, and a few hints of previous pinprick to light pitting beneath the protective lacquer; the triggerguard retains 98% later added blue with some previous pinprick pitting beneath the finish. The checkered round knob pistolgrip walnut stock is in very good condition as lightly cleaned and with an older refinish, showing a few lightly repaired cracks at the rear of the sideplates, a tight curling crack on the left side of the upper tang reaching the checkering, and the remnants of the older light handling marks; the upper tang, triggerguard tang, and original hardrubber buttplate are slightly proud of the stock. The splinter-style forend is in near excellent condition also showing an older refinish with a few minor handling marks. The maker's marks on the sideplates remain crisp, the barrels, forend, and triggerguard are numbered to the gun, and the barrels are otherwise completely unmarked. The shotgun locks up tight with the right barrel slightly off-face showing a bare sliver of light between the breech and standing breech, the lever comes to rest just left of center, and the shotgun features double triggers, an automatic safety, extractors, 2 3/4" chambers, and a 14" length of pull with drops of about 1 1/2" and 2 3/8"; the shotgun appears to function well mechanically. An attractive lightly refurbished Lefever double shotgun. (14A10574-87) {C&R} (600/800) Est. 600 - 800

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
355	<p>East German Reworked P.08 Luger Pistol serial #4825q, 9mm, 4" East German barrel with a bright excellent bore. The metal surfaces retain about 96-97% arsenal reapplied blue finish with the barrel thinning and toning brown under direct light, a few spots toning brown on the frame, and previous light pitting beneath the finish. The extractor has toned to plum, the ejector has toned to a silvery patina with hints of fire blue, and the sear has toned to a blue-gray. The receiver is 1916-dated and shows clear Imperial German proofs, the left side renumbered to the frame but with a "g" suffix, the middle toggle shows a clear "DWM" logo, a cancelled marking is present on the side of the triggerguard, and the numbered parts largely match the pistol using a combination of electro-pencil and stamp renumbering, including the grooved firing pin; the rear toggle pin and breech show lined-out numbers, and the interior of the sideplate is numbered to a different pistol. The checkered walnut grips are un-numbered and in very good plus condition with a few light handling marks, and the right panel is fit somewhat loose. Included is a single blued-bodied aluminum-base East German magazine, numbered to the pistol. A reworked Luger pistol that should perform well at the range. (14A9100-994) {C&R} [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200</p>
356	<p>German P.08 Luger Pistol by DWM serial #2265n, 9mm, 4" barrel with a good bore showing light pitting in the grooves and lightly worn rifling throughout. The frame retains about 85% blue finish with light wear on the high edges and contact points, light thinning, scattered fine oxidation and staining, and a few light dings and handling marks. The receiver, barrel, and toggles have toned to an even gray-brown patina with light wear on high edges and contact points, scattered pinprick pitting, and moderate vice and tool marks on the barrel; the ejector shows light pitting throughout. The checkered walnut grips are in about very good condition with softening of the checkering and scattered light dings and handling marks, greater on the right panel, and the right panel is numbered "87". The receiver is double-dated coded "1920 / 1916", the top date somewhat poorly struck, the DWM logo on the toggle remains intact, the receiver and barrel show softened Imperial German proofs, the safety is numbered to the pistol with the remaining numbered parts mismatched, the parts appearing to be from only two other pistols. The magazine hold-open is missing from the frame but the pistol otherwise appears to function well mechanically. Included is a bright-bodied wood-base magazine, numbered "8755f", showing a moderate chip on the right side of the base. A salty mixed parts Luger pistol, good for the upstart collector. (14A9100-1131) {C&R} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900</p>
357	<p>Finnish M23 Luger Pistol by DWM serial #6711q, 30 Luger, 3 7/8" barrel with a mostly bright very good bore with scattered light oxidation but strong rifling throughout. The metal surfaces retain about 98% arsenal reapplied matte blue finish with scattered high edge wear, some light handling marks, and scattered previous light pitting beneath the finish, the concentration of which is on the barrel. The trigger, safety tab, and ejector have toned to a silvery patina with some traces of pinprick pitting on the trigger. The checkered walnut grips are un-numbered and in very good condition with a small chip at the top rear of the left panel, light handling marks and softened spots of checkering, the left panel showing a few small spots of added finish and the right showing added finish throughout. The DWM logo on the middle toggle is intact and clear, softened German commercial proofs are present on the breech, receiver, and barrel, multiple boxed "SA" property marks are stamped on the frame and receiver, the sideplate and barrel are numbered to the pistol, and the remaining numbered parts are mismatched; the barrel is import marked. The sights show the typical squared front sight blade and wider u-notch rear, and the pistol appears to function well mechanically. Included is a bright-bodied wood-base magazine, numbered "43", showing an older abrasion to the side of the wood base and minor handling marks on the body. A solid example of the Finnish used Luger pistol. (14A9100-1140) {C&R} [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200</p>

Lot	Title/Description
358	<p>German P.08 Luger Pistol by DWM serial #7793a, 9mm, 4" barrel with a very good bore showing light pitting in the grooves but strong rifling throughout. The metal surfaces of this 1917-dated pistol retain about 97-98% excellent quality British reapplied rust blue with scattered light high edge wear, a touch of thinning on the receiver, and scattered previous light pitting beneath the finish. The small parts retain strong restored straw color with some scattered pinprick pitting and the face of the trigger, takedown lever, safety lever, and right grip screw wearing lightly to a silvery patina. The checkered walnut grips are in very good condition with some minor handling marks and light softening at the edges, and the grips are entirely unmarked. Imperial German proofs remain intact on the side of the receiver with light softening of the firing proof, British commercial proofs are stamped on the right side of the barrel, the side of the frame is marked "NOT ENGLISH MAKE", softened and illegible proofs are present on the middle toggle and extractor, and the trigger, takedown lever, and side plate are mismatched with the remaining numbered parts matching the pistol, including the ungrooved firing pin. The takedown lever is stiff but the pistol otherwise appears to function well mechanically. Included is a bright-bodied wood-base magazine, numbered "3126g", in very good condition with scattered oxidation staining and light operational wear. A nicely British-restored Luger pistol. (14A9100-1128) {C&R} [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200</p>
359	<p>German P.08 Luger byf-coded Pistol by Mauser serial #5128d, 9mm, 4" barrel with a very good bore showing scattered light surface oxidation but strong rifling throughout. The metal surfaces have worn to a gunmetal gray patina with remnants of blue in the protected areas, the strongest remnants on the toggles, side of the trigger, and safety lever, with scattered pinprick to perhaps light pitting and a few light dings and handling marks; the takedown lever retains nearly all its later applied blue finish and the replacement sideplate has toned lightly to brown under direct light. The checkered walnut grips are in about very good condition with a small chip at the corner of the left panel, a small crack above the right grip screw, areas of more moderate softening of the checkering, some light handling marks, and the left panel is slightly loose; neither panel is numbered to the pistol but both are marked with small "655" waffenamts, and the left panel is incise carved "R". The trigger and safety are numbered to the pistol, the sideplate is un-numbered, and the entire upper assembly is numbered to a different pistol, including the barrel and grooved firing pin. The byf-coding on the toggle remains clear and legible, the receiver is "41" dated, and "655" waffenamts and Reichsadler firing proofs are present on the receiver and barrel. No magazine hold-open is present in the frame, but the pistol otherwise appears to function well mechanically. Included is a bright-bodied wood-base magazine, numbered "2529n", with fine oxidation staining and pinprick pitting. A salty WWII Luger pistol that should still perform at the range. (14A9100-987) {C&R} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900</p>
360	<p>German P.08 Luger Code-42 Pistol by Mauser serial #5143w, 9mm, 4" barrel with a good bore showing light pitting but evident rifling throughout. The metal surfaces of this 42-coded and 1939-dated pistol retain about 55% original blue with light wear on the high edges and contact points, moderate wear on the gripstraps, light pitting scattered throughout, and some light striations and abrasions on the barrel; the ejector shows light wear and toning to plum, and the remaining small parts are blued. The checkered walnut grips are in fair condition with spots of softened checkering, light handling marks, and a few light dings; the grips remain un-numbered and are loosely fit to the frame. The original metal markings remain intact and clear, the right side of the receiver and the barrel marked with "63" waffenamts and a Reichsadler firing proof, all numbered parts are matching to the pistol, including the grooved firing pin, and the left side of the frame appears to be scratch marked "RL 784". Included is a blued-bodied aluminum-base magazine, numbered to the gun and marked with a "63" waffenamt, in very good condition showing light operational wear. The pistol appears to function well mechanically with a notably heavy trigger pull. An all-matching 42-code Mauser Luger pistol that shows its years. (14C9100-1147) {C&R} [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500</p>

Lot	Title/Description
361	<p>German P.08 Luger Pistol by DWM serial #5204a, 9mm, 4" barrel with an about very good bore with light pitting but evident rifling throughout. The metal surfaces retain about 70% arsenal blue finish with light wear on the high edges and contact points, wear and oxidation staining on the gripstraps, the barrel worn to gray, and scattered pinprick to light pitting. The trigger, reverse face of the magazine release, and ejector retain strong straw color with wear on the face of the trigger and scattered freckling, the safety lever shows a hint of straw color primarily worn to pewter with light pitting, and the sear and rear toggle pin retains vibrant fire blue. The checkered walnut grip panels are un-numbered and in very good condition with a few scattered light handling marks and spots of softened checkering. The 1914-date and DWM logo on the toggle remain crisp, the Imperial German proofs on the side of the receiver are slightly softened, the barrel shows a small "RC" depot rework mark, and the front gripstrap is unit marked "38. R. 4. 1.". The barrel and receiver are numbered to a different pistol but match each other, and all other numbered parts are matching to the frame. The frame is from an earlier pistol than the receiver and barrel, manufactured without the stock lug and showing a depot installed and inspect-marked hold-open, the middle toggle showing cracks where it links to the breech, and the nose is broken off the firing pin. Included is a bright-bodied wood-base magazine, numbered "4295", showing a few specks of verdigris. A solid example piece needing a few replaced parts before returning to the range. (14A9100-1268) {C&R} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900</p>
362	<p>DWM 1920 Commercial Luger Pistol serial #850m, 30 Luger, 3 7/8" barrel with a good bore with light pitting and evident rifling throughout. The metal surfaces retain about 75-80% original blue with light wear on high edges and contact points, thinning and light wear on the gripstraps and receiver, and some scattered light handling marks the concentration of which are present on the barrel. The safety, magazine release, trigger, ejector, and takedown lever retain strong straw color with light silvering and scattered spots of light oxidation staining on the trigger, and the sear and toggle pins retain strong fire blue with light wear. The checkered walnut grips are in very good condition with some scattered light handling marks and spots of softening of the checkering, and both panels are un-numbered. The DWM logo on the middle toggle is intact and clear, the pistol is undated, clear German commercial proofs are present on the barrel, receiver, and breech, the right side of the receiver is stamped "GERMANY", and the numbered parts are matching to pistol; the ungrooved firing pin is un-numbered. The magazine sits slightly low causing the hold-open to inconsistently engage, but the pistol otherwise appears to function well mechanically. Included is a bright bodied wood base magazine, un-numbered, in very good plus condition with minor operational marks. A solid 1920 Commercial Luger appearing to have all matching parts. (14A9100-1126) {C&R} [Richard "Stretch" Kennedy Collection] (800/1000) Est. 800 - 1,000</p>
363	<p>DWM 1920 Commercial Luger Pistol serial #8015, 30 Luger, 3 7/8" barrel with an about very good bore with light frosting but strong rifling throughout. The metal surfaces retain about 85% original blue with light wear on high edges and contact points, spots of wear and light oxidation staining on the gripstraps, an area toning to gray on the barrel, and light abrasions on the sideplate. The ejector, magazine release, and safety show strong straw color and the trigger and takedown lever retain generous remnants of straw color with light oxidation staining and moderate silvering, the sear showing vibrant fire blue with remnants on the toggle pins. The checkered walnut grip panels are in very good condition with softening of the checkering at the edges and scattered light handling marks, both panels are un-numbered. The DWM logo on the toggle and German commercial proofs the barrel, receiver, and breech remain crisp, the Navy contract frame the pistol is built upon is 1917-dated, and the numbered parts are a mix of matching parts (the trigger, takedown lever, sideplate, hold-open latch, and safety), parts numbered "04" (the rear toggle and barrel), and un-numbered parts. The pistol appears to function well mechanically. Included is an unmarked modern-production bright-bodied wood-base magazine. A solid 1920 Commercial Luger for the beginning collector. (14A9100-997) {C&R} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900</p>

Lot	Title/Description
364	<p>Beretta 92 FS INOX Semi-Auto Pistol serial #BER453268, 9mm, 4 7/8" barrel with bright excellent bore. The stainless surfaces rate excellent with a few very minor light handling marks. The pistol has three dot sights, ambidextrous safety / decocker, and is fitted with a set of Crimson Trace laser grips. This Accokeek, MD made pistol has seen little if any use and comes with a single 15 round factory magazine and factory hard case that is not labeled to the gun and remains in excellent condition. (10A10813-119) {MODERN} (600/800) Est. 600 - 800</p>
365	<p>Walther / Interarms PPK/S Semi-Auto Pistol serial #W005049, 32 ACP, 3 1/4" barrel with bright excellent bore. The stainless surfaces of this made in the U.S.A pistol rate excellent showing a few very light minor handling marks. The pistol has standard features and the checkered hard plastic grips with banner logos rate excellent. Include with this pistol are two 8 round factory magazines with fingertip extensions, factory hard case missing its end label and a manual. (10A10813-49) {MODERN} (500/700) Est. 500 - 700</p>
366	<p>Smith & Wesson Model 37 Airweight Chiefs Special Revolver serial #J624484, 38 Special, 1 7/8" pinned barrel with pristine bore. The metal surfaces of this handsome revolver retain 98% of their original blue and black anodized finishes with the hammer and trigger exhibiting smokey case-colors with splashes of vibrant blues. The checkered walnut Magna grips with S&W medallions rate near excellent with a small spot of finish loss on the left side panel and mostly crisp points in the checkering. Included with this revolver are a partial factory cleaning kit, manual, warranty card and factory two-piece box end labeled and numbered to the gun. (10A10813-113) {MODERN} (600/800) Est. 600 - 800</p>
367	<p>M1891 Mosin Nagant Dragoon Bolt Action Rifle by Tula serial #94958, 7.62x54r, 28 3/4" barrel with an oxidized bore. The metal surfaces have faded to a lightly oxidized brown patina when viewed under direct light, and the bolt has scattered oxidation staining with an area of moderate oxidation on the bolt handle. The hardwood straight grip stock rates about very good overall as cleaned of finish with scattered light dings and scuffs; the handguard is a later M91/30 style replacement. The barrel is marked clearly with the Tula star and is dated "1930". The bolt is numbered to a different rifle, but the magazine floorplate and buttplate are both serialized to the rifle. The rifle is sighted with inverted-V front sight and Konovalov rear sight, no cleaning rod is present, and the action appears to function well mechanically. A somewhat salty example of a mostly correct dragoon. (27A10768-21) {C&R} (400/600) Est. 400 - 600</p>
368	<p>German K98k Bolt Action Rifle by Berlin-Lubecker serial #5875b, 8mm Mauser, 24" counter-bored barrel with an about good bore showing oxidation but evident rifling. The metal surfaces of this "duv/41" coded rifle have toned to gray, with some areas showing plum patina and scattered light pitting. The laminated hardwood stock is in overall good condition showing lamination cracks, a lengthy u-shaped crack at the wrist, and handling marks consistent with military service. The stock is numbered "4878" and has an unmarked correct steel buttplate, and there are crisp "214" Waffenamts present on the receiver. The rifle retains the standard hooded barleycorn front sight and tangent rear sight, and the action and three position safety function well mechanically. The rifle shows a Century import mark at the muzzle; no cleaning rod is present. Both action locking screws are missing, and all of the serialized parts are mismatched. A salty wartime K98k good for the upstart collector. (26A10855-56) {C&R} (800/1200) Est. 800 - 1,200</p>
369	<p>German 1919 Commercial Luger Pistol by DWM serial #85400, 30 Luger, 3 7/8" barrel with a bright excellent bore showing strong rifling. The metal surfaces of this pistol retain about 96% fading original blue finish with some areas toning to plum patina and high edge wear. The small parts retain nice straw color with high edge silvering present. The checkered walnut grips are un-numbered and remain in good condition, with both grips showing some flattening of the checkered points. The pistol is export marked "GERMANY" on the side plate, which caused a dent due to poor stamping, and all of the numbered parts are matching. One original aluminum body, wood base magazine also marked "GERMANY", is included. A fine piece of Weimar-era history for the interested collector. (26B9100-996) {C&R} [Richard "Stretch" Kennedy Collection] (1200/1800) Est. 1,200 - 1,800</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
370	Scarce DWM "Safe & Loaded" 1923 Commercial Model Luger Pistol serial #90593, 30 Luger, 3 7/8" barrel with a good, oxidized bore showing rifling throughout. The metal surfaces of this pistol retain 85% non-arsenal reapplied polished blue finish, with mixed areas of oxidation. The small parts have been reblued and show some pitting. The pistol has been export marked "GERMANY" on the front of the frame, is marked "SAFE" on the frame, "LOADED" on the extractor, and a partial commercial proof remains on the receiver. The rear toggle pin, ungrooved firing pin, receiver, and checkered grips are all un-numbered. The numbered parts are all matching, and all other parts appear to be factory original with the exception of the beaded front site, likely a period customization. The left grip has a 3/16" silver missing just under the bottom of the safety lever. Included is one wood based, bright body magazine marked "922a" with some pitting and oxidation. The action requires some attention as the trigger does not reset properly. A solid example of these seldom-seen interwar pistols intended for sale in America. (26B9100-1270) {C&R} [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200
371	German P.08 Luger Pistol By Simson & Co serial #6151, 9mm, 4" replacement barrel with a bright near excellent bore showing limited spots of light pitting near the muzzle. The barrel retains 98-99% original commercial blue with some very thin silvering along the edges and is marked "MADE IN GERMANY" on the underside. The frame and slide retain about 92% of a hastily applied blue finish over scattered pitting and grinds marks, loss along the high edges and contact points with a large area of gray and brown where the top of the chamber was welded. The checkered wood grips remain in good condition showing modest wear and flattened points. All numbers are matching including the grooved firing pin. A single non-matching magazine is included but is a bit hesitant upon removal and there is no front sight present. (5.26B9100-1269) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
372	German Lp.08 Artillery Luger Pistol by DWM serial #5485a, 9mm, 8" barrel with a very good bore showing light pitting but strong rifling throughout. The metal surfaces of this 1917-dated pistol retain about 60% original blue with pitting on the barrel and toggle knobs, and oxidation scattered throughout. The front grip strap has softened to a mottled gray, and the rear strap shows a mix of original finish, oxidation, and pitting. The pistol still retains the fine adjustable rear and front sight assemblies, with pitting on the rear sight ramp and leaf. All numbered parts including the ungrooved firing pin are matching, with the exception of the checkered walnut grips numbered "69", and the sideplate which is an un-numbered replacement. The safety lever, takedown lever, and trigger retain a moderate amount of straw color. The wood grips show moderate wear, with some softening of the points of the checkering, and some overall darkening in finish. The action seems to function well mechanically, and the pistol includes one aluminum based and bright bodied magazine that is unmarked. An honest example of an artillery Luger that would make an excellent addition for the budding Luger collector. (26B9100-1145) {C&R} [Richard "Stretch" Kennedy Collection] (1200/1800) Est. 1,200 - 1,800
373	German P.08 Luger Pistol by DWM serial #8436e, 9mm, 4" barrel with a bright very good bore showing some pinprick pitting but strong rifling throughout. The metal surfaces of this 1918-dated military Luger retain about 80% original blue finish, with spots of oxidation scattered across the barrel, receiver and frame, and some pitting along the right side of the frame. The correct proofs and military acceptance marks are present. All numbered parts are matching, and the trigger, safety lever, and takedown lever have softened to a flat silver color. The replacement, smooth-bordered, wood grips retain a strong checkered pattern with light handling marks. The action functions well mechanically, and included is one aluminum bodied magazine with a Bakelite base showing markings "P08", "XO" and "(eagle)/37" Waffenamts. An honest example of a wartime produced Luger for the upstart collector (26B9100-998) {C&R} [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500

Lot	Title/Description
374	DWM 1920 Commercial Luger Pistol serial #4111k, 30 Luger, 3 7/8" barrel with a very good frosted bore with strong rifling throughout. The metal surfaces show 80% original bluing with areas toning to a plum-patina and high edge wear. All numbered parts are matching, and Commercial proofs are present on the receiver and toggle. The chamber is unmarked, and the left side of the frame shows some dings above the grip. The trigger, takedown lever, and safety lever show some straw color with heavy silvering present. The un-numbered wood grips show some softening in their checkering pattern as well as light scrapes, but are otherwise in good condition. One bright bodied, Bakelite base magazine bearing markings "P08", "fxo", and "(eagle) / 37" Waffenamts. An honest example of a Weimar-era commercial Luger. (26B9100-1117) {C&R} [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500
375	German P.08 Luger Pistol by DWM serial #5100a, 9mm, 4" barrel with a very good bore with evident frosting and strong rifling. The metal surfaces of this 1915-dated pistol retain 80% original blue with spots of oxidation and the receiver toning to a plum-patina. The receiver bears the correct firing proofs and military acceptance marks, which have softened but are still legible. The takedown lever and trigger have silvered, and the safety lever has been reblued. All numbered parts of the pistol including the ungrooved firing pin are matching, with the exception of the left wood grip which is a replacement marked "57" and with a "(eagle) / 155" waffenamts. The left grip has cracked beneath the safety lever, but otherwise the grips rate very good. The action seems to function well mechanically, and included is one wood-based, bright bodied magazine that appears to be marked "7180". An honest early war Luger for the martial collector. (26B9100-1116) {C&R} [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500
376	DWM 1920 Commercial Luger Pistol serial #9552k, 30 Luger, 4" barrel with a very good bore with frosting and strong rifling. The metal surfaces of this pistol retain about 95% original blue with spots of oxidation, some toning to plum-patina, and high edge wear. The receiver and barrel bear the proper "(Crown)/N" proof and the front of the receiver is export marked "GERMANY". The numbered parts are all matching, and the inside of the wood grips are signed, likely by the original owner. The checkered wood grips rate excellent, with some overall softening of the texture. The stock lug has been ground off, as has the lanyard loop. The front sight has been upgraded with a likely period-installed beaded front sight, and the rear sight notch shows a touch of period added lighter paint. Included is one aluminum bodied magazine, with the wood base marked "GERMANY". An honest example of these commercial Lugers. (26B9100-1138) {C&R} [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500
377	DWM Model 1906 American Eagle Luger Pistol serial #30191, 30 Luger, 4 3/4" barrel with a very good bore with light pitting throughout and the muzzle appears to show impact marks at the crown. The metal surfaces retain about 60% blue with scattered light oxidation and light pitting, light high edge wear, and toning to plum-patina under bright light. The receiver bears the original export mark "GERMANY" on the front and a crisp Federal Eagle above the chamber. All numbered parts are matching, including the checkered walnut grips which remain in very good condition, showing some dark staining on the entire left and a majority of the right grip. The retaining screw for the right grip has been applied at an odd angle, and as a result the right grip exhibits some play. The action and grip safety function well mechanically. Included is one aluminum based magazine, marked "7101y" with a "(eagle) / 655" Waffenamts. A rather salty example of these scarce American Eagle pistols. (26C9100-992) {C&R} [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500
378	German P.08 Luger Pistol by DWM serial #9991a, 30 Luger, 3 3/4" period replacement barrel with a very good lightly frosted bore. This 1915-dated pistol is in P.08 configuration aside from the period replaced barrel in 30 Luger, and the lack of any acceptance marks or proofs. The metal surfaces show about 95% factory quality rust blue, with some high edge wear present and toning to plum-patina showing under bright light, and some pitting present on the side plate and left side of receiver. All numbered parts are matching including the ungrooved firing pin, and the takedown lever, trigger, and safety lever retain very good straw color. The action seems to function well mechanically, and one wood based bright bodied, un-marked magazine that is missing the magazine follower button is included. A fine example of a mostly P.08 configured wartime Luger. (26B9100-1273) {C&R} [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
379	<p>German P.08 Luger Pistol by DWM serial #1904h, 9mm, 4" barrel with a good bore showing significant oxidation with good rifling throughout. The metal surfaces of this 1918-dated pistol retain approximately 30% factory quality rust blue, with significant oxidation and pitting across the barrel and much of the receiver. It bears the correct Imperial acceptance proofs, and all numbered parts are matching including the ungrooved firing pin. The takedown lever, trigger, and safety lever have all darkened to an oxidized patina with significant pitting present on all of them, as well as on the toggle. The wood grips are in very good condition with some overall darkening in color but retaining a strong checkering pattern. Included is one un-marked, aluminum body plastic base magazine. The action is somewhat stiff but seems to function well mechanically. A salty wartime Luger for the upstart collector. (26B9100-1129) {C&R} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900</p>
380	<p>Rare Early German Kriegsmarine S/42 P.08 Luger Pistol serial #3009d, 9mm, 4" barrel with a fair-good bore showing heavy pitting and oxidation nearer the muzzle, and otherwise evident rifling. The breech bears a "G" which was used to secretly represent the year 1935 during Germany's rearmament in violation of the Versailles Treaty. The metal surfaces of this pistol have a mottled blue-gray patina with remnants of reapplied blue, light to more moderate pitting, and areas of wear to gun metal. All numbered parts, including the grooved firing pin, are matching. The right side of the receiver bears proper droop wing eagle numbered "211", I beam "S/92", and firing proofs. The front grip strap is marked "O.2005", signifying it was issued at the Baltic Sea Naval Command Station, one of only approximately 700 P.08's of these pistols procured by the Kriegsmarine. The extractor spring is missing, but otherwise the pistol seems to function mechanically. No magazine is present, and the wood grips are reproductions. A salty example of these desirable variant Lugers. (26C9100-989) {C&R} [Richard "Stretch" Kennedy Collection] (1200/1800) Est. 1,200 - 1,800</p>
381	<p>Mitchell Arms American Eagle P.08 Luger Pistol serial #3352, 9mm, 4" barrel with a bright excellent bore. The stainless steel surfaces of this 1993-dated pistol rate near excellent showing minor handling marks. All markings remain crisp including the Federal Eagle stamped above the chamber. The checkered walnut grips remain in excellent condition, included is one bright-bodied wood base magazine, and the action seems to function well mechanically. (26A9100-1260) {MODERN} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900</p>
382	<p>Interarms Mauser Parabellum American Eagle Luger Pistol serial #11.00.2336, 9mm, 4" barrel with a bright excellent bore. The metal surfaces of this pistol retain about 98% original blue with some toning to plum-patina visible under bright light on the barrel and receiver. The trigger, takedown lever and safety lever retain strong straw color. The checkered walnut grips remain in excellent condition showing some light verdigris in the checkering. The action appears to function well mechanically and included is one plastic base, bright body magazine. (26A9100-1130) {MODERN} [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200</p>
383	<p>German P.08 Luger S/42 Pistol by Mauser serial #9080l, 9mm, 4" barrel with a bright excellent bore. The metal surfaces of this 1938-dated pistol retain about 95% original blue, with some light high edge wear, toning to plum-patina on the receiver visible under bright light, and some scattered spots of oxidation. The entire toggle train is numbered "06", including the grooved firing pin, while the rest of the numbered parts to include the very good condition checkered wood grips are numbered "80". Markings on the receiver remain crisp, including the dual "(eagle) / 63" Waffenamts and a somewhat softened but still legible fire proof. The pistol appears to function well mechanically, and included is one matching bright body and base magazine marked with "9080l" and one "(eagle) / 63" Waffenamts. A fine early war Luger well suited to a martial collection. (26C9100-299) {C&R} [Richard "Stretch" Kennedy Collection] (1200/1800) Est. 1,200 - 1,800</p>

Lot	Title/Description
384	<p>German 1920 Commercial Luger Pistol by DWM serial #8872m, 30 Luger, 3 7/8" barrel with a very good bore showing oxidation and strong rifling. The metal surfaces of this pistol retain about 85% factory quality rust blue with light wear on high edges and contact points, and scattered light oxidation. Commercial "(crown) / n" proofs have softened but are still legible on the left side of the receiver, left side of the toggle train, and underside of the barrel, and the right side of the receiver bears a softened but legible "GERMANY" export mark. The numbered components are matching and the firing pin is ungrooved. The trigger shows some remaining straw color, and the takedown and safety levers have toned to gray with the latter showing pitting present. A period upgrade beaded front sight blade has been installed, and the action seems to function well mechanically. One bright body magazine is included, with significant oxidation on the body and the wood base marked "173l". (26A9100-90) {C&R} [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200</p>
385	<p>German 1920 Commercial Luger Pistol by DWM serial #9985i, 30 Luger, 3 7/8" barrel with a very good frosted bore showing strong rifling. The metal surfaces of this pistol show about 95% factory quality blue finish, with the receiver toning to a plum-patina and some light high edge wear. Crisp "(crown) / N" commercial proofs are present on the left side of the receiver, left side of the toggle train, and on the underside of the barrel, and the "GERMANY" export mark is present underneath the serial number on the front of the receiver. The takedown lever, trigger, and safety lever retain very good straw finish, with silvering present on contact points. The principal components are matching and the ungrooved firing pin is un-numbered. The checkered wood grips are in very good condition with a sliver missing from the left grip underneath the safety lever, and a 1/2" diameter spot on the right grip behind the trigger where the checkering has been flattened. The action seems to function well mechanically. One Bakelite based, bright bodied magazine is included, with the markings "122" and two "(eagle)/37" Waffenamts. (26A9100-1134) {C&R} [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200</p>
386	<p>German P.08 Luger Pistol by DWM serial #2123a, 9mm, 4" barrel with a good bore showing pitting and light rifling. The metal surfaces of this 1918-dated pistol show about 80% original blue with the barrel toning to a deep gray and receiver toning to a plum-patina under bright light, as well as some scattered spots of oxidation. The appropriate Imperial proof marks are present on the right side of the receiver, as well as the top of the barrel. The toggle and sear are marked "31", the barrel is marked "6131d", the left side of the receiver is marked "6131", the side plate, takedown lever and safety lever are marked "23", the front of the frame is marked "2123a", and the ungrooved firing pin is un-numbered. The trigger and safety lever have had a dark blue finish reapplied, with a small bit of straw and silvering showing on the takedown lever. The checkered wood grips are in very good condition and are marked "23" and "D", and the action seems to function well mechanically. Included is one aluminum body and base magazine marked "8969". A wartime Luger that may make a fine shooter. (26A9100-1259) {C&R} [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200</p>
387	<p>Engraved Smith & Wesson 38 Double Action First Model Revolver serial #17057, 38 S&W, 3 1/4" ribbed round barrel with bright near excellent bore with light oxidation near the breech but strong rifling throughout. The metal surfaces of this revolver show lovely New York-style engraving in about 90% coverage with lovely line detailing and punch-dot shading, extending down the backstrap with bordering, scrollwork along the cylinder flats and the sides of the barrel with foliate scrollwork surrounding an ornate starburst-like motif. The metal surfaces show approximately 90% period applied nickel finish with some silvering along the high edges and light oxidation. The latch, ejector, and trigger guard show excellent original bluing with scattered oxidation. The color case-hardened hammer and trigger show very good color, with some toning to gray and plum-patina. All serialized parts, including the pencil-numbered ivory grips, are numbered to the gun. The grips are in excellent condition, bearing only light dings and abrasions. Factory research will show shipment on January 31, 1881 to M.W. Robinson, and the revolver was likely engraved by one of the many independent engravers in New York known to have done work for him. The trigger sometimes does not reset fully and the timing does not always line up correctly, but the action otherwise functions well with solid lock-up. A fine engraved and early example for the advanced Smith & Wesson collector. (26B9100-940) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (1200/1800) Est. 1,200 - 1,800</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
388	Smith & Wesson Terrier Revolver serial #54302, 38 S&W, 2" barrel with a bright excellent bore. The metal surfaces of this approximately 1940-made revolver show 98% original nickel finish with light abrasions on the frame and small spots of oxidation, and bears crisp Smith & Wesson trademarks. The color case-hardened trigger and hammer show good original finish, toning to a mottled gray and brown color. All numbered components match, and this five-screw, pre-war revolver features excellent un-numbered period mother-of-pearl grips that are slightly proud of the frame. The action seems to function well mechanically with solid timing and lock-up. A desirable example of these early Smith & Wesson revolvers for the advanced collector. (26B9100-1407) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800
389	Smith & Wesson Model 10-7 Double Action Revolver with Detroit Police Markings serial #4D07245, 38 Special, 2" pinned barrel with an about excellent bore showing strong rifling. The metal surfaces show 98% original nickel finish with light abrasions on the frame and crisp Smith & Wesson trademarks. The color case-hardened trigger and hammer are in very good condition with good color showing and spots of light pitting. All numbered parts match, including the very good condition checkered walnut grips with silver S&W medallions, the left panel of which has a chip at the bottom left. The backstrap features the markings "DETROIT POLICE 22079". The action seems to function well mechanically with very good timing and lock-up. (26A10873-208) {MODERN} (600/800) Est. 600 - 800
390	Smith & Wesson Model 19-3 Double Action Revolver serial #5K41970, 357 Magnum, 2 1/2" pinned barrel with a bright excellent bore showing strong rifling. The metal surfaces show 98% original blue finish with only light handling marks. All markings including the Smith & Wesson trademark remain very crisp, and the trigger and hammer retain very good color case-hardening. All numbered parts are matching, including the excellent condition checkered walnut factory Magna grips with silver S&W medallions. The rear sight is adjustable, and the action seems to function well mechanically with very good timing and lock-up. (26A10873-230) {MODERN} (600/800) Est. 600 - 800
391	Smith & Wesson Model 60-9 Chiefs Special Revolver serial #CDS8157, 357 Magnum, 2 1/4" barrel with a bright excellent bore showing strong rifling. The stainless steel surfaces rate very good with some clouding and surface wear present, and crisp Smith & Wesson trademarks. This 1996 version of the Chiefs Special features excellent condition rosewood grips marked "256" on the inside. The front sight post has been marked on the top of the ramp with red paint to aid in target acquisition, and the action seems to function well mechanically with very good timing and lock-up. A Chiefs Special in a seldom seen barrel length. (26A10873-142) {MODERN} (500/700) Est. 500 - 700
392	Smith & Wesson Model 13-3 Military & Police Revolver serial #9D27708, 357 Magnum, 4" barrel with a bright excellent bore showing strong rifling. The metal surfaces show about 98% original nickel finish, with some light handling marks and crisp Smith & Wesson trademarks, and a matte finish on the top surface and sights. The trigger and hammer show very good case-hardened colors, and all numbered parts are matching, including the excellent condition checkered walnut grips with silver S&W medallions. The action seems to function well mechanically with very good timing and lock-up. (26A10873-239) {MODERN} (500/700) Est. 500 - 700
393	Smith & Wesson Model 10-8 Military & Police Revolver serial #5D90950, 38 Special, 4" pinned barrel with a bright excellent bore showing strong rifling. The metal surfaces show about 98% original nickel finish with a matte finish on the top surface and sights, and some light handling marks and crisp Smith & Wesson trademarks. The trigger and hammer show good case-hardened color on the left side of the hammer, with the rest of the surfaces toned to a mottled gray and silver. The excellent checkered hardwood grips are numbered "2" inside and bear crisp S&W medallions, with a slight gap in the fit at the front of the base. The action seems to function well mechanically with very good timing and lock-up. (26A10873-227) {MODERN} (500/700) Est. 500 - 700

Lot	Title/Description
394	Winchester Model 12 Slide Action Shotgun serial #377710, 12 ga., 30" Simmons ventilated rib barrel choked full with a bright excellent bore. The metal surfaces retain about 98% reapplied blue finish with light handling marks. The very good condition hardwood stock has been refinished and shows scattered dings and scrapes, with the finish on the heel having worn off, and a sling swivel installed near the butt. The factory buttpad is present and shows what appears to be white paint covering 80% of it. The shotgun is sighted with a simple white bead, and the action seems to function well mechanically. An honest example of a classic American shotgun. (26A10455-475) {C&R} (300/500) Est. 300 - 500
395	Forehand & Wadsworth Terror Single Action Pocket Revolver serial #538, 32 RF, 2 5/8" octagon barrel with a fair bore showing pitting, oxidation and good rifling. The metal surfaces of this revolver retain about 95% original nickel finish showing some spots of light flaking to gray-brown, minor oxidation and handling marks. The hammer is a smoky case-hardened patina and all markings remain crisp. The base pin is an old period replacement, and the spring-loaded retaining pin is not present. The very good condition hardwood grips are numbered "13", with the cylinder serial number matching the revolver. The action seems to function well mechanically with good timing and lock-up. (26A10762-43) {C&R} (200/300) Est. 200 - 300
396	Thames Arms Company Double Action Revolver serial #19B546, 38 S&W, 3 1/4" barrel with a fair bore showing significant oxidation, pitting, and shallow rifling. The metal surfaces show approximately 30% original nickel finish, with pitting, flaking to brown, bubbling, and oxidation across the frame and barrel. The trigger, triggerguard, latch, and hammer all show significant oxidation, having toned almost completely to a mottled brown and worn silver. The retaining device for the cylinder is missing, and the numbered components are marked "1158". The original mother-of-pearl grips are in very good condition, showing impact marks on the left grip. The action seems to function well mechanically, with good timing and lock-up. (26A10762-48) {C&R} (50/100) Est. 50 - 100
397	National Arms Company Hammerless Revolver serial #142483, 32 S&W, 3" barrel with a bright excellent bore showing scattered pitting and strong rifling throughout. The metal surfaces show 20% original nickel finish, with heavy oxidation present, the rear of the frame flaking to brown, and significant pitting. The internal parts of the cylinder are heavily oxidized, the cylinder and ejector marked "79" and the barrel and latch numbered to the gun. The black checkered hard rubber grips remain in excellent condition, and the action seems to function well mechanically, with good timing and lock-up. (26A10833-7) {C&R} (100/200) Est. 100 - 200
398	Marlin No. 32 Standard 1875 Single Action Pocket Revolver serial #5018, 32 S&W, 3" barrel with a poor bore showing frosting, oxidation, and pitting with strong rifling throughout. The metal surfaces show 30% original nickel finish with flaking to brown, oxidation, and what appears to be some sort of adhesive residue. The cylinder is almost devoid of finish with heavy oxidation present, and the hammer and trigger have toned to a mottled brown and gray color. The cylinder and barrel are numbered to the gun, and the un-numbered black checkered hard rubber grips are in excellent condition. The barrel-to-frame fit is loose, and the action will require mechanical attention as the hammer does not cock. (26A10759-37) {C&R} (100/200) Est. 100 - 200
399	Smith & Wesson Model No. 1 Third Issue Revolver serial #107469, 22 RF, 3 3/16" ribbed round barrel with a good bore showing pitting and oxidation with strong rifling. The metal surfaces show 30% original nickel finish with significant pitting and heavy oxidation present on the cylinder. The sideplate retaining screw is missing, and the hinge screw appears to have been damaged. The barrel is marked with assembly number "81", and the assembly number on the cylinder is not legible. The very good condition hardwood grips are also numbered to the gun, and the action seems to function well mechanically, with good timing and lock-up. (26A10833-11) {ANTIQUE} (100/200) Est. 100 - 200

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
400	Smith & Wesson 38 Safety Hammerless serial #226004, 38 S&W, 4" ribbed round barrel with a bright excellent bore showing minor spots of pitting and strong rifling throughout. The metal surfaces of this fifth model double action revolver show about 75% original blue, with the barrel and cylinder devoid of finish in places, and pitting and abrasions present. The case-hardened trigger has toned to a mostly brown gray with some remnants of color, and the trigger guard and latch still show very good original blue with only light pitting. The numbered parts of this revolver are matching, to include the very good black checkered hard rubber grips. The action seems to function well mechanically, with good timing and lock-up. (26A10574-211) (C&R) (200/300) Est. 200 - 300
401	Smith & Wesson 38 Safety Hammerless serial #204473, 38 S&W, 3 1/4" ribbed round barrel with a bright excellent bore showing minor spots of pitting and strong rifling throughout. The metal surfaces of this fourth model double action revolver show about 98% original nickel, with scattered pinprick pitting, bubbling, and clouding. The markings remain crisp, and all numbered parts are matching, to include the very good condition black checkered hard rubber grips which have toned to brown. The action seems to function well mechanically, with good timing and lock-up. (26A10574-143) (C&R) (300/500) Est. 300 - 500
402	Smith & Wesson 32 Safety Hammerless serial #141318, 32 S&W, 3" ribbed round barrel with a bright excellent bore showing strong rifling. The metal surfaces of this second model double action revolver retains about 95% original nickel finish with some light handling marks and spots of very fine bubbling. The trigger retains very good case-hardened colors, and the trigger guard and latch retain very good original blue. The numbered parts are all matching to include the excellent condition black checkered hard rubber grips. All markings remain crisp, and the action seems to function well mechanically with good timing and lock-up. (26A10574-126) (C&R) (300/500) Est. 300 - 500
403	Smith & Wesson 32 Safety Hammerless serial #224953, 32 S&W, 3" ribbed round barrel with a bright excellent bore showing strong rifling. The metal surfaces of this third model double action revolver retains about 98% original blue with scattered spots of flaking to oxidized brown and light handling marks. The trigger retains very good case-hardened colors, and the trigger guard and latch retain very good original blue. The numbered parts are all matching to include the very good condition black checkered hard rubber grips. All markings remain crisp, and the action seems to function well mechanically with good timing and lock-up. (26A10574-129) (C&R) (300/500) Est. 300 - 500
404	Smith & Wesson No. 1 1/2 Single Action Revolver serial #18465, 32 S&W, 3" ribbed round barrel with a bright excellent bore showing limited oxidation and strong rifling. The metal surfaces retain about 90% original nickel finish with scattered spots of pitting and oxidation. The hammer retains very good case-hardened color, and the trigger and latch retain very good original blue finish. All numbered parts are matching, including the very good condition black checkered hard rubber grips. The butt of the revolver bears impact marks, and the action seems to function well mechanically with good timing and lock-up. (26A10574-115) (ANTIQUÉ) (300/500) Est. 300 - 500
405	Smith & Wesson Model 1903 Hand Ejector Revolver serial #235928, 32 S&W Long, 3 1/4" ribbed round barrel with a bright excellent bore with scattered pitting and strong rifling. The metal surfaces of this fifth change revolver show about 95% original blue finish with limited spots of pitting, and some toning to gray and plum patina at the muzzle and some light wear with the backstrap toned to gray. The hammer and trigger retain very good case-hardened color with slight toning to brown. All numbered parts are matching, and the black checkered hard rubber grips are in very good condition with light dings on the base. The action seems to function well mechanically with good timing and lock-up. (26A10574-122) (C&R) (300/500) Est. 300 - 500
406	Smith & Wesson 38 Single Action First Model Revolver serial #6317, 38 S&W, 4" ribbed round barrel with a good bore showing significant pitting and oxidation with strong rifling. The metal surfaces of this Baby Russian revolver retain about 85% original nickel finish, with flaking in spots showing heavy oxidation, and scattered spots of pitting and wear. The hammer retains good case-hardened color, and the trigger and latch retain good original blue with toning to gray. The good condition custom pearl grips sit slightly proud of the frame and show signs of use, with a chip in the left grip and abrasions present. The action seems to function well mechanically with good timing and lock-up. (26B10574-132) (ANTIQUÉ) (600/800) Est. 600 - 800

Lot	Title/Description
407	Engraved Smith & Wesson No. 1 Third Issue Revolver serial #90225, 22 Short, 3 3/16" ribbed round barrel with a good bore showing significant pitting and oxidation with strong rifling. The metal surfaces show 95% original nickel finish, with scattered pitting, some clouding present, and significant oxidation on the cylinder, inside of the frame, and chamber. This revolver is beautifully New York-style engraved across the frame, barrel and cylinder with line detailing and punch-dot shading. There are no legible numbers on the component parts of the revolver or on the very good condition mother-of-pearl grips, and the patent markings on top of the barrel remain crisp. The barrel-to-frame fit has a slight amount of play in it, and the cylinder does not lock-up when the hammer is cocked, but otherwise the action functions well mechanically. An honest example of a finely engraved No. 1. (26C10574-103) (ANTIQUÉ) (600/800) Est. 600 - 800
408	Smith & Wesson Model 1905 Hand Ejector Revolver serial #143983, 32-20 W.C.F., 5" barrel with a bright excellent bore showing only the lightest of pinprick pitting and strong rifling. The metal surfaces of this fourth change revolver show 98% original blue finish with light spots of pitting and toning to plum-patina on the backstrap. The trigger and hammer show very good case-hardened color, and all numbered parts are matching. The very good condition mother-of-pearl grips were period additions, and they sit slightly proud of the frame with slight abrasions present on the bottom rear of the butt. The action functions well mechanically with good timing and lock-up. (26B10574-123) (C&R) (700/900) Est. 700 - 900
409	Iver Johnson Safety Automatic Hammer Revolver serial #91466, 32 S&W, 5" ribbed round barrel with a good bore showing significant pitting and oxidation throughout showing evident rifling. The metal surfaces show about 50% original nickel finish, with the finish flaking to oxidized gray and brown. The trigger and hammer retain slight case-hardened color, mostly toned to a mottled gray and brown. The latch and trigger guard have toned to gray with significant oxidation, and no parts of the gun are numbered. The black checkered hard rubber grips are in good condition, and the action has slight play in the lock-up and good timing. (26A10860-86) (C&R) (75/150) Est. 75 - 150
410	Iver Johnson American Bull Dog Double Action Revolver serial #8153, 32 S&W, 2 1/2" octagonal barrel with a very good bore showing oxidation and pitting with strong rifling. The metal surfaces show about 95% original nickel finish with some spots of flaking to brown oxidation and some light handling marks. The front sight blade is not present, and the hammer has toned to a mottled brown and gray with the trigger toned to silver. The hammer does not cock for single action function, and the hammer fails to fall often in double action, but otherwise functions. (26A10860-71) (ANTIQUÉ) (50/100) Est. 50 - 100
411	Smith & Wesson 32 Hand Ejector Revolver serial #9412, 32 S&W, 4 1/4" round ribbed barrel with a very good bore showing significant pitting and oxidation with strong rifling throughout. The metal surfaces show about 90% original nickel finish with some pitting, oxidation, and a 3/4" spot stripped of finish on the left side of the frame. The numbered parts of the revolver are matching, with the exception of the very good condition black checkered hard rubber grips which are marked "200376". The action seems to function well mechanically with good timing and lock-up. (26A10574-121) (ANTIQUÉ) (200/400) Est. 200 - 400
412	U.S. Model 1903 New Army Revolver by Colt serial #201863, 38 Long Colt, 6" barrel with a good plus bore showing significant pitting and oxidation with strong rifling. The metal surfaces of this 1903-dated revolver show about 30% original blue, with oxidation, pitting, and high edge wear present, with areas toning to plum-patina. The numbered parts are matching, and the smooth walnut grips are in about good condition showing dings and impact marks from use with some thinning of the finish near the butt. All markings remain clear and the proper inspector markings "RAC" are present across the gun. The action seems to function well mechanically with good timing and lock-up. An honest example of these Army issue revolvers for the martial collector. (26A10574-215) (C&R) (300/500) Est. 300 - 500
413	Smith & Wesson No. 1 Third Issue Revolver serial #20042, 22 Short, 3 3/16" round ribbed barrel with a very good bore showing pitting and oxidation with strong rifling. The metal surfaces show about 85% original nickel finish with heavy pitting focused around the cylinder and chamber and light abrasions on the frame. The barrel appears to be marked "90" above the chamber, and the very good condition hardwood grips are numbered to the gun. The action seems to function well with good barrel-to-frame fit, timing and lock-up. (26A10574-102) (ANTIQUÉ) (300/500) Est. 300 - 500

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
414	Chever & Burchard Single Action Revolver serial #188, 32 Rimfire, 2 11/16" barrel with a bright excellent bore showing some rough machine marks and strong rifling. The metal surfaces show about 60% original nickel finish, with mottled oxidation present across the gun. The trigger and hammer retain good case-hardened color and significant toning to a deep brown. All numbered parts are matching, including the very good condition ivory grips which are pencil-numbered to the gun. The action seems to function well mechanically with good timing and lock-up. (26A10833-10) {ANTIQUE} (100/200) Est. 100 - 200
415	Harrington & Richardson Safety Hammer Double Action Revolver serial #294, 32 CF, 2 1/2" barrel with a poor oxidized bore showing some rifling. The metal surfaces retain slight original nickel finish, with oxidation covering the gun and the finish mostly toned to a mottled gray and brown. The model and patent markings are legible, and the good condition black checkered hard rubber grips are numbered to the gun. The cylinder spins freely and the hammer cocks and fires when the trigger is pulled but the trigger does not reset. (26A10833-5) {C&R} (50/100) Est. 50 - 100
416	Winchester Model 12 Slide Action Shotgun serial #1375272, 12 ga., 30" plain barrel choked full with a bright excellent bore. The metal surfaces retain about 95% original blue with limited spots of oxidation, the barrel showing toning to plum-patina under bright light. All metal markings remain crisp, and the push-button safety has been replaced with a custom safety switch. The hardwood stock remains in very good condition with only light handling marks and abrasions and no butt pad present, and the grooved forend is in about good plus condition with some abrasions and dents. The sight consists of a single bead and the action appears to function well mechanically. (26A10455-535) {C&R} (200/400) Est. 200 - 400
417	Winchester Model 12 Slide Action Shotgun serial #1866411, 12 ga., 30" plain barrel choked full with a bright excellent bore showing some manufacturing imperfections about 2" from the muzzle. The metal surfaces retain about 98% original blue finish with scattered spots of oxidation and light abrasions on the magazine tube and all metal markings remain crisp. The hardwood stock remains in good condition with parts chipped off at the wrist where it touches the receiver, and an aftermarket rubber butt pad has been added with a length of pull of 14". The grooved forend remains in good condition, with abrasions and impact marks present and the finish beginning to thin. The sight consists of a single bead and the action appears to function well mechanically. (26A10455-323) {C&R} (200/400) Est. 200 - 400
418	Winchester Model 12 Slide Action Shotgun serial #1907135, 12 ga., 28" plain barrel choked modified with a bright excellent bore. The metal surfaces retain about 90% original blue finish with scattered oxidation and moderate pitting on the receiver and somewhat faded but fully legible markings. The hardwood stock remains in very good condition with a bruise along the bottom edge and the factory butt pad missing a screw, and the grooved forend is in excellent condition. The sight consists of a single bead and the action appears to function well mechanically. (26A10455-542) {C&R} (200/400) Est. 200 - 400
419	Winchester Model 12 Slide Action Shotgun serial #1949932, 12 ga., 30" barrel choked full with a bright excellent bore. The barrel retains 98% polished and re-applied blue finish, with the receiver and tube showing about 30% original blue finish that has mostly toned to gray with spots of pitting. The hardwood stock remains in very good plus condition with only light abrasions, and the grooved forend is in excellent condition with a small bruise at the rear end. An aftermarket rubber butt pad has been added with a length of pull of about 15". The sight consists of a custom bright silver bead and the action appears to function well mechanically. (26A10455-436) {C&R} (200/400) Est. 200 - 400
420	Winchester Model 12 Slide Action Shotgun serial #615975, 12 ga., 32" barrel choked full with a bright excellent bore with a moderate bulge approximately 3" from the muzzle. The metal surfaces retain about 30% original blue finish with most toned to a mottled gray with oxidation and spots of pitting, and the markings remain crisp. The hardwood stock remains in good condition with dings, abrasions, a 3/4" dent in the left side, and the finish on the bottom edge of the stock fading, and the 18-groove forend remains in very good condition with the finish thinning. The sight consists of a single bead and the action seems to function well mechanically. (26A10455-457) {C&R} (100/200) Est. 100 - 200

Lot	Title/Description
421	Smith & Wesson Third Model Perfected Single Shot Pistol serial #9351, 22 LR, 10" round ribbed barrel with a bright excellent bore showing scattered pinprick pitting and strong rifling throughout. The metal surfaces retain 90% original blue finish with significant pitting along the right side of the frame and barrel, oxidation present, and crisp markings. The trigger and hammer show good case-hardened color with toning to gray and brown. All numbered parts are matching, and the diamond checkered walnut factory extension target grips are in excellent condition bearing only light dings. Barrel-to-frame fit is tight, and the double action functions well. An honest Third Model Perfected for the advanced collector. (26A9100-621) {C&R} [Richard "Stretch" Kennedy Collection] (800/1200) Est. 800 - 1,200
422	Smith & Wesson No.1 Third Issue Revolver serial #101582, 22 Short, 3 3/16" round ribbed barrel with a good bore showing pitting, oxidation, and strong rifling. The metal surfaces show about 85% original nickel finish, with scattered pitting and heavy oxidation present on the cylinder and bore. The excellent condition wood grips are numbered to the gun, and the action seems to function well mechanically with slight play in the barrel-to-frame fit and good timing and lock-up. (26A9100-49) {ANTIQUE} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
423	Smith & Wesson Third Model Perfected Single Shot Pistol serial #10264, 22 LR, 10" round ribbed barrel with a bright excellent bore showing minor pitting with strong rifling. The metal surfaces show about 90% original blue with scattered pitting, oxidation, and a spot of toning to plum-patina on the left side of the frame. The trigger and hammer retain very good case-hardened color, with slight toning to brown, silvering, and pitting present, and the front sight has been upgraded to a beaded blade sight. All numbered parts are matching, including the excellent condition diamond checkered walnut factory extension target grips. There is slight play in the barrel-to-frame fit, and the double action functions well. (26A9100-1083) {C&R} [Richard "Stretch" Kennedy Collection] (1000/1500) Est. 1,000 - 1,500
424	Belgian Double Percussion Pistol .45 cal., 3" smooth Damascus barrels with lightly oxidized and pitted bores. There is light scroll engraving on the frame and triggerguard with a simple pattern on the grip cap. The metal surfaces have been toned to brown and pewter with oxidation and pitting. The brass grip cap has a small spring loaded door for caps. The smooth walnut one-piece bag grips rate near excellent showing light handling wear. The pistol features dual hammers and triggers, functions mechanically although the half cock notch will need attention. (8A10740-32) {ANTIQUE} (150/250) Est. 150 - 250
425	American Arms Double Deringer serial #5156, 32 R.F., 3" double smooth bore barrels with oxidized and pitted bores. The metal surfaces of the barrels are gray with scattered pitting and handling marks. The brass frame shows old cleaning and handling marks. The grips are home crafted smooth walnut stocks that rate excellent as constructed. The mechanism does not function, the hammer does not hold on half or full cock, although the barrels rotate correctly. Each barrel has its own blade front sight although no real rear sight exist. (8A10740-30) {ANTIQUE} (200/400) Est. 200 - 400
426	Fabico "Shorty" Double Action Revolver serial #591645, 22 Short, 1 3/4" barrel showing moderate oxidation. The metal surfaces retain about 99% original chrome finish on the frame showing scattered handling marks. The cylinder is in-the-white and appears it was left that way by the factory with crisp proof marks for an overall rating of excellent. The grips are checkered faux ivory plastic with a "Shorty" medallion on each panel, they rate about excellent showing light soiling. The gun functions mechanically but is very stiff. Cocking and trigger return need assistance and a thorough cleaning and lubrication would be in order. (8A10740-11) {C&R} (20/40) Est. 20 - 40
427	Colt Civil War Centennial Single Shot Pistol serial #22723W, 22 Short, 6" barrel showing light scattered pitting at the breech end of the bore but very good overall. This gun is configured to resemble a scaled down Model 1860 Army. The metal surfaces of the barrel and faux cylinder retain about 97% original black enamel paint the loss primarily to scattered scratches. The frame retains about 99% gold colored plate showing a few very light handling marks. The smooth two-piece walnut grips rate about excellent with minor handling marks. The pistol functions mechanically and requires the barrel wedge to be pulled, barrel removed, and faux cylinder removed to load and unload (the center pin doubles as an ejector). An interesting little commemorative that should be fun to shoot, least wise it will conserve ammunition. (8A10851-14) {C&R} (75/150) Est. 75 - 150

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
428	Walther P38 Semi-Auto Pistol serial #018084E, 9mm, 5" barrel with an excellent bore. This pistol remains in excellent condition with about 99% original blue and anodized finishes showing light edge wear and handling marks. The checkered synthetic factory grips rate about very good with little wear although there is some light scuffing on the left panel and light handling marks. The pistol has standard P38 features, the slide is dated "11/62", the proof mark is dated 1963, and it functions mechanically. The gun has not been updated with the frame recoil lug. The pistol includes a pair of factory marked eight-round magazines. A nice shooter for the P38 enthusiast. (8A10851-16) {C&R} (400/600) Est. 400 - 600
429	Iver Johnson Second Model Safety Automatic Hammer Revolver serial #78728, 32 S&W (Short), 5" barrel with an oxidized and pitted bore. The metal surfaces retain about 55-60% original nickel plate the barrel primarily worn to pewter with other areas of flaking finish on the frame and cylinder in addition to oxidation stains, and handling marks. The blue finish on the trigger guard rates good with about 50% present. The case-hardened colors on the trigger and hammer are strong with operational and handling wear. The checkered hard rubber factory grips feature the owl head logo and rosette around the escutcheons, the right panel rates about excellent, the left panel is poor showing a repair at the butt with a large chip missing at the butt along the frame. The barrel is numbered to the gun, this gun has two pins, it features the hammer action, and barrel to frame fit is loose. The mechanism does not fully function the trigger reset, and lockup will need attention. (8A10851-18) {C&R} (50/150) Est. 50 - 150
430	Browning Buck Mark Micro Field Target Semi-Auto Pistol serial #BRUS09106YM515, 22 LR, 4" bull barrel with an excellent bore. This lovely pistol shows light use, the metal surfaces retaining about 99% original blue and anodized finishes with full gold colored plate on the trigger. This gun comes equipped with factory textured rubber and synthetic "URX" grips that rate excellent. This pistol features a full length Picatinny style sight rail incorporating a Patridge front sight, fully adjustable black blade rear sight, manual thumb safety, and frame mounted magazine catch. It includes a single factory ten-round magazine. Add an optic to this pistol and optimize it for a variety of field and range uses. (8A10856-15) {MODERN} (350/550) Est. 350 - 550
431	High Standard H-D Military Semi-Auto Pistol serial #182184, 22 LR, 4 1/2" heavy barrel with an excellent bore. The metal surfaces retain about 96-97% original blue showing high edge wear, heaviest on the barrel, with slight thinning in a few locales on the grip frame, and minor handling marks. The fully checkered walnut factory grips rate excellent. This pistol features a serrated Patridge front sight, adjustable black blade rear sight, type II takedown, and appears to function mechanically. It includes factory two-tone ten-round magazine. An excellent example of the H-D Military. (8A10777-88) {C&R} (350/550) Est. 350 - 550
432	High Standard Sentinel Double Action Revolver serial #S73347, 22 LR, 4" full lug barrel with an excellent bore. This is the successor to the MK I Sentinel, and it remains in excellent condition. The metal surfaces retain about 99% original blue finish showing slight edge wear and a few handling marks. The checkered wrap around factory wood grips rate excellent. This gun features a full barrel length ramp front sight with serrations on the last two-thirds, fully adjustable black blade rear sight, ambidextrous under the barrel cylinder release, and it functions mechanically with correct timing and lockup. This should be a great collectible for the High Standard collector and a fine field gun. (8A10843-3) {MODERN} (300/500) Est. 300 - 500
433	Czechoslovakian Model 52 Semi-Auto Pistol by BRNO serial #Y8442, 7.62x25MM Tokarev, 4 5/8" barrel with an excellent bore. The metal surfaces retain about 99% arsenal grade reapplied blue finish showing minor handling and wear marks plus very small patches of pinprick pitting under the new finish. The serrated brown Phenolic resin grips rate about excellent. The barrel and slide are correctly numbered to the gun, it has a 1954 acceptance mark, 1982 rework mark and date, is import marked by CAI, and appears to function mechanically. The pistol includes a single eight-round magazine. (8A10851-10) {C&R} (200/400) Est. 200 - 400

Lot	Title/Description
434	Llama Comanche III Double Action Revolver serial #S907931, 357 Magnum, 6" heavy barrel with a ventilated rib showing an excellent bore. This importer marked revolver shows very little use and remains in excellent condition. The metal surfaces retain about 99% original blue showing a few minor handling marks. The hammer and trigger are in-the-white and remain bright. The checkered hardwood factory target grips feature silver Llama medallions, extractor cut on the left panel, and rate excellent. Llama stamps the serial number and "Made in Spain" on the butt of the stocks in addition to the necessary identical markings on the frame. This revolver features a ramp front sight, adjustable black blade rear sight, it is proof dated 1985, and functions mechanically with correct timing and lockup. It should make a good shooter. (8A10851-26) {MODERN} (200/400) Est. 200 - 400
435	Magnum Research Lone Eagle SSP-91 Single Shot Pistol by Ordnance Tech serial #MR3744, 308 Winchester, 14" heavy barrel with an excellent bore. The metal surfaces retain about 99% original blue finish with a few minor handling marks. The one-piece Valox synthetic right-hand pistol grip stock is finished smooth with a single finger groove and a thumb rest, the stock rates excellent. The front of the barrel is factory drilled and tapped for mounting a sight, and the rear currently sports a Weaver scope base. In use the rotating artillery style breech is rotated clockwise, cartridge inserted, it is rotated counterclockwise, cocking lever on the stock is pulled to rear, apply the safety, and it is ready to fire. It features an ejector, manual cross bolt safety, and appears to function mechanically. Manufactured for Magnum Research this would be a fine pistol for long range hunting, I.H.M.S.A. and other shooting activities. (8A9100-414) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
436	Custom Smith & Wesson Model 1905 Military & Police Hand Ejector Revolver serial #352479, 38 Special, 2" barrel with an excellent bore. This Fourth Change M&P has been customized by an unknown gunsmith in the guise of the eras "Fitz Special". The metal surfaces retain about 98% non-factory reapplied blue finish showing light handling marks, a few oxidation stains, and high edge wear. The service trigger and hammer were blued and then the sides polished to in-the-white, they remain bright overall with light oxidation stains on the hammer. The grips are later unmarked replacement factory walnut Magna grips with silver S&W medallions, they rate excellent but the fit to the frame is slightly loose. The ejector rod was cut down to fit the factory 2" barrel and lacks the knurling of a factory rod, the front of the triggerguard was removed in the style popularized by Colt employee John Henry Fitzgerald, the front sight is the eras half-moon style, fixed rear sight, and it functions mechanically although the cylinder comes up late. (8A9100-231) {MODERN} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
437	Smith & Wesson 38 Single Action First Model Revolver serial #21093, 38 S&W, 4" barrel showing very light scattered oxidized pitting with strong rifling throughout. The metal surfaces of this "Baby Russian" revolver retain about 95-96% original nickel plate, showing scattered light oxidation stains, limited areas of bubbling, handling marks, and limited flaking. The trigger and hammer retain strong case-hardened colors showing operational wear and areas toning to brown. The diamond checkered hard rubber factory grips with S&W monograms rate very good showing light diamond point wear, but they are numbered to the gun. All the appropriate parts are correctly numbered to the gun, barrel to frame fit is tight, it mostly functions mechanically with correct timing and lockup. The ejector return spring will need attention. A nice upstart collectible (8A9100-381) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
438	Smith & Wesson No. 1 1/2 Second Issue Revolver serial #90406, 32 RF, 3 1/2" barrel with a lightly oxidized and pitted bore. The metal surfaces retain about 96% original nickel plate showing scattered light oxidation and pitting, a few areas of flaking finish, limited bubbling, and handling marks. The trigger is light gray, the hammer is a mix of brown and gray with some strong swirls of case-hardened colors still visible. The smooth rosewood factory grips rate very good showing light scratches, dings, and other handling marks. The grips are serial numbered to the gun, the appropriate parts are correctly assembly numbered to the gun, barrel to frame fit is tight, and it correctly times and locks up. A nice example of a Second Issue. (8A9100-382) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
439	Llama Deluxe Martial Revolver serial #705237, 22 LR, 6" ventilated rib barrel with an excellent bore. This revolver closely resembles the Smith & Wesson five-screw I-frame revolver and features factory engraving. The metal surfaces have about 75% factory applied scroll and foliate engraving. It retains about 97% original factory blue finish showing edge wear, a few oxidation stains, one area on the frame of cleaned oxidized pitting, and a few handling marks. The service trigger and semi-target hammer are chrome plated and rate excellent showing light operational wear. The smooth factory faux mother-of-pearl grips feature Llama medallions and rate about excellent. This gun features a serrated ramp front sight, Colt Accro style adjustable white outline rear sight, it still times and locks up correctly and the proof date is 1967. (8A9100-482) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
440	Smith & Wesson First Model Single Shot Pistol serial #13947, 32 S&W (Short), 6" barrel with a lightly oxidized and pitted bore. This "Model of '91" marked pistol has been non-factory refinished retaining about 99% later added satin blue finish showing a few minor handling marks, plus old handling marks and pits under the finish. The trigger and hammer were blued during the refinishing process and rate excellent. The replacement diamond checkered factory hard rubber grips are a mottled mix of red and black, they are numbered to another gun, and they feature a S&W monogram on each panel. They rate about fair to good showing light to sometimes moderate wear although there is a small chip missing on the butt of the left panel extending from the grip retention pin to strap on the butt. The barrel and top latch are correctly numbered to the gun, and it features a pinned blade front sight, adjustable "U" notch rear sight, barrel to frame fit is tight, and the mechanism functions. (8A9100-201) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
441	Remington Model 1895 Double Deringer serial #197, 41 RF, 3" double barrels both showing light to moderate oxidized and pitted bores in both. The metal surfaces of this "REMINGTON ARMS CO." marked pistol retain about 99% later applied satin nickel finish showing numerous scattered old pinprick pits and a few light handling marks. The reapplied blue finish on the trigger, hammer, and a few other small parts and screws rate excellent overall with light freckling on the hammer. The checkered hard rubber factory grips rate good to very good showing light wear overall with several areas of moderate to heavy wear to the diamond points with the occasional handling mark. The barrel-frame hinge remains intact, barrel to frame fit has slight play, and it functions mechanically. (8A9100-1282) {C&R} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
442	Smith & Wesson 38/32 Terrier Hand Ejector Revolver serial #67386, 38 S&W, 2" barrel with an excellent bore. This postwar five-screw I-frame revolver has seen honest use and it retains about 80-85% original blue, the grip frame has toned to a brown patina with additional light to moderate edge wear, and handling marks. The service trigger and hammer retain beautiful swirls of case-hardened colors with light operational wear. The un-numbered diamond checkered walnut factory Magna grips feature silver S&W medallions and based on the fit are probably replacements. They rate about good showing light to moderate wear, a few shallow chips on the bottom of the left panel along the border of the checkering, a tiny "U" shaped check in the butt of the right panel, in addition to other scattered handling marks. The little revolver features a half-moon front sight, fixed rear sight, all the appropriate parts are correctly numbered to the gun, and it functions mechanically with correct timing and lock up. It includes the original factory two-piece red box that is correctly end labeled and numbered to the gun although the grease pencil serial number is very faint, and a cleaning kit. It should make a fine little shooter for the enthusiast. (8A9100-1383) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500

Lot	Title/Description
443	Colt Model 1908 Pocket Hammerless Semi-Auto Pistol serial #81663, .380 ACP, 3 3/4" barrel with a near excellent bore showing fine pitting and frosting. This 1926-manufactured pistol has been professionally refurbished retaining about 98% reapplied nickel plate showing limited bubbling, scattered handling marks, a few minor dings around the muzzle end of the slide, old micro pitting on the slide, and waviness on the frame from the metal preparation. The checkered hard rubber factory grips rate excellent overall with faint wear. The marking remain crisp overall, and the gun appears to function mechanically. It includes a factory hinged maroon box that appears to be numbered to another gun (very faint) and there is no end label. Also included are a manual and factory marked seven-round magazine. The box rates fair the corners showing period repairs, moderate to heavy edge wear, handling marks, and the cloth hinge is starting to fail. The folding manual also rates fair having torn into two pieces along the fold with addition tearing of the individual sheets. A nice shootable example of the Model M. (8A9100-1398) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
444	Colt Police Positive Double Action Revolver serial #177046, 38 Colt New Police (S&W), 4" barrel showing scattered light oxidized pinprick pitting. The metal surfaces of this fine 1928-manufactured revolver retain about 90% original blue, showing light to sometimes moderate edge wear most prominent on the cylinder, in addition to handling marks. The trigger and hammer spur retain full blue while the bright sides of the hammer show light operational wear and staining. The un-numbered checkered walnut factory grips feature silver Rampant Colt medallions and rate very good plus showing light scattered wear and handling marks. The revolver features a half-moon front sight, fixed rear sight, and functions mechanically with correct timing and lockup. A very good example of a Second Issue Police Positive. (8A9100-471) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
445	Smith & Wesson No. 1 1/2 Second Issue Single Action Revolver serial #52756, 32 RF, 3 1/2" barrel with a very good bore showing scattered very light oxidized pinprick pitting. The metal surfaces retain perhaps 20% original blue strongest in the protected areas of the gun, the remaining surfaces have thinned to a plum hue with the backstraps brown in addition to high edge wear and handling marks. The hammer and trigger have faded to gray with light operational wear. The smooth rosewood grips are numbered to the gun and rate very good to excellent showing light scattered handling marks. The revolver functions mechanically with correct timing and lockup. All the appropriate parts are correctly assembly numbered to the gun and the barrel address remains crisp. The revolver includes a period walnut presentation case with a key for the functioning lock. The interior of the case is separated into four compartments and purple felt lined, it rates about excellent showing light soiling. The exterior rates very good plus showing light handling and storage marks. The wood grain of the cover has risen over time leaving a wavy texture with added crazing of the varnish, the remainder rates excellent. The cover has an inlaid silver wire set about 5/8" in from the edge, the lower piece is loose but should be easily fixed. The center has a small silver plate that is not engraved. A very good example of a No. 1 1/2 with a fine period display case. (8A9100-1099) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
446	North American Arms NAA .22 LR "Mini" Revolver serial #B74248, 22 LR, 1 1/8" barrel with an excellent bore. This lilliputian revolver remains in excellent condition, the stainless steel surfaces rate excellent showing scattered light handling marks. The smooth laminated wood grips rate excellent. This single action only revolver features a five-shot removable cylinder with safety notches between each chamber, spring loaded basepin head with locking detent the basepin doubles as an ejector, and fixed sights. The revolver functions mechanically, and it correctly times and locks up. Should make a great last ditch defensive revolver. (8A9100-738) {MODERN} [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200
447	High Standard Flite King Semi-Auto Pistol serial #1513524, 22 Short, 6 3/4" barrel with an excellent bore. This pistol has seen light honest use and retains about 98% original blue and anodized finishes showing light high edge wear, and handling marks. The trigger and magazine catch retain full case-hardened colors. The checkered synthetic factory grips feature gold High Standard medallions and rate excellent. The pistol features a serrated ramp front sight, drift adjustable rear sight, and appears to function mechanically. The pistol includes a single factory marked ten-round magazine. It should be a fun gun to shoot. (8A9100-402) {C&R} [Richard "Stretch" Kennedy Collection] (250/450) Est. 250 - 450

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
448	Colt Pocket Positive Double Action Revolver serial #135109, 32 Colt New Police (S&W Long), 3 1/2" barrel with a near excellent bore showing scattered light oxidation stains. This 1928-manufactured Pocket Positive remains in very good condition with about 90% original blue finish showing high edge wear that is moderate on the cylinder, the heel of the backstrap and toe of the frontstrap are toning to brown, oxidation staining on the right side of the frame with smaller sections of pitting, and handling marks. The service trigger and hammer retain strong nitre blue showing stains and light operational marks on the bright sides of the hammer. The contemporary replacement Colt-marked checkered hard rubber round butt grips rate excellent. The little gun functions mechanically with correct timing and lockup. (8A9100-136) {C&R} [Richard "Stretch" Kennedy Collection] (250/450) Est. 250 - 450
449	Colt Pocket Positive Double Action Revolver serial #70774, 32 Colt New Police (S&W Long), 3 1/2" barrel showing a light bulge in the bore about an inch from the breech end of the barrel plus a few minor scattered oxidation stains. This 1914-manufactured Pocket Positive retains about 25% original blue finish most of the surfaces toned to purple and brown in addition to high edge wear, handling marks and oxidation stains. The service trigger and hammer retain fading nitre blue with stains and light operational marks on both. The factory checkered hard rubber round butt grips rate good showing very little wear however both have a small chip missing at the toe. The little gun functions mechanically with correct timing and lockup. (8A9100-114) {C&R} [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200
450	Colt New Police Double Action Revolver serial #22250, 32 Long Colt, 6" barrel with an excellent bore showing a few minor and scattered oxidation stains. The metal surfaces of this turn of the century (1904) revolver have toned to a mottled mix of brown and blue with about 25% original blue finish remaining in addition to high edge wear, a few oxidation stains, the occasional pit, and handling marks. The hammer and trigger are mainly gray with some pockets of nitre blue on the back of the hammer and trigger, with moderate staining on the bright sides of the hammer. The factory checkered hard rubber square butt grips are numbered to another gun and rate excellent with a few light handling marks. The revolver features a half-moon front sight blade, fixed rear sight, it functions mechanically, and correctly times and locks up. The ejector rod head is a later added ad-hoc replacement and there is a factory rework number on cylinder under the extractor star. (8A9100-393) {C&R} [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200
451	Smith & Wesson Model 640 Centennial Revolver serial #BKZ6264, 38 Special, 3" stainless steel barrel with a bright excellent bore. The stainless steel surfaces rate very good plus with some scattered light handling marks and the trigger retains nearly all its hard chrome plate. The replacement Pachmayr Presentation Compact checkered rubber grips rate very good with some areas worn smooth and a few light handling marks. Some red enamel has been added to the front sight blade, timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-602) {MODERN} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
452	As-New Walther P22 Semi-Auto Pistol with Laser Sight serial #L092734, 22 LR, 4" barrel including threaded muzzle adapter with a bright excellent bore. This pistol is in as-new-in-box condition and features a threaded muzzle, ambidextrous safety levers and magazine releases and white three-dot sights. The pistol includes an extra backstrap, factory laser sight which needs fresh batteries, two factory 10-round magazines, laser sight instructions, extra front sight blades and the original plastic hard case. The action appears to function well mechanically. (23A9100-M77) {MODERN} [Richard "Stretch" Kennedy Collection] (250/450) Est. 250 - 450
453	High Standard Model DM-101 Deringer serial #1822357, 22 Magnum, 3 1/2" barrels with bright excellent bores. The barrels retain about 60% original blue with the left sides cleaned to gray with scattered spots of light oxidation while the frame retains about 95% original black anodized finish with scattered light handling marks and high edge silvering. The grip panels are missing, the barrels lock up loosely with light visible at the breeches and the action appears to function well mechanically. (23A9100-713) {MODERN} [Richard "Stretch" Kennedy Collection] (50/100) Est. 50 - 100

Lot	Title/Description
454	High Standard Model DM-101 Deringer Pistol serial #D51611, 22 Magnum, 3 1/2" barrels with bright excellent bores. The barrels of this late model deringer retain about 95% original nickel finish showing overall light cloudiness and areas of hardened lubricant. The alloy frame rates near excellent with a light handling mark or two and the black synthetic grip panels rate excellent. The barrels lock up tightly and on-face and the action appears to function well mechanically. (23A9100-487) {MODERN} [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200
455	Excellent Beretta Model EL 950 BS Semi-Auto Pistol serial #DAA036871, 25 ACP, 2 1/2" barrel with a bright excellent bore. The metal surfaces of this handsome pistol retain about 99% original polished blue and black anodized finishes with a faint handling mark on the top of the barrel and the trigger, hammer and small parts including the magazine baseplate retain 99% original gold coloring. The blonde-toned smooth European hardwood grips rate excellent and feature an inlaid "PB" medallion on the left panel and Beretta "trident" logo on the right panel. One original magazine is included and the action appears to function well mechanically. (23A9100-479) {MODERN} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
456	Charter Arms Bulldog Double Action Revolver serial #1086429, 44 Special, 2 1/2" barrel with a bright excellent bore. The metal surfaces of this Stratford, CT produced gun retain about 97% original nickel finish showing scattered light handling marks. The checkered hardwood grips with silver Charter Arms medallions rate excellent with a light handling mark or two. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-491) {MODERN} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
457	North American Arms Mini Revolver serial #B41027, 22 LR, 1 1/8" barrel with a bright excellent bore. The stainless steel surfaces rate very good plus with a few scattered light handling marks. The smooth black synthetic grips rate perhaps good with both cracked completely through at the grip screw escutcheon. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-1517) {MODERN} [Richard "Stretch" Kennedy Collection] (75/150) Est. 75 - 150
458	Smith & Wesson Model 65-3 Double Action Revolver serial #7D77460, 357 Magnum, 3" stainless steel barrel with a bright excellent bore. The stainless steel surfaces rate near excellent with a few scattered light handling marks. The hammer and smooth trigger retain about 95% original hard chrome plate with some light operational silvering on both sides of the trigger. The un-numbered checkered walnut grips with S&W medallions rate very good plus with a few light handling marks and a thin sliver missing from the front checkering border of the left panel. Timing and lock-up are excellent, the action appears to function well mechanically. (23A9100-257) {MODERN} [Richard "Stretch" Kennedy Collection] (350/550) Est. 350 - 550
459	Smith & Wesson Model 64-2 Double Action Revolver serial #7D18825, 38 Special, 2" pinned stainless steel barrel with a bright excellent bore. The stainless steel surfaces rate about excellent with a few light handling marks. The hammer and grooved trigger retain 99% original hard chrome plate. The Pachmayr Presentation Compact checkered rubber grip rates excellent. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-419) {MODERN} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
460	Llama Model XV Semi-Auto Pistol serial #A47958, 22 LR, 3 3/4" barrel with a bright excellent bore. The metal surfaces retain about 98% original blue with the grip safety toning to plum, a few scattered light handling marks and some tiny impact marks on the right rear of the slide while the barrel is bright. The factory checkered synthetic grips rate near excellent with a few light handling marks. The original sights are intact and one factory magazine is included. The action appears to function well mechanically. (23A9100-949) {MODERN} [Richard "Stretch" Kennedy Collection] (250/450) Est. 250 - 450
461	High Standard Model DM-101 Deringer serial #2492022, 22 Magnum, 3 1/2" barrels with bright excellent bores. The metal surfaces retain about 97% original nickel finish with some scattered speckles of light oxidation on the backstrap. The smooth black synthetic grips rate near excellent with a few light handling marks. The barrels lock up tightly and on-face and the action appears to function well mechanically. (23A9100-385) {MODERN} [Richard "Stretch" Kennedy Collection] (150/250) Est. 150 - 250

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
462	Smith & Wesson Model 10-5 Double Action Revolver serial #D544624, 38 Special, 2" pinned barrel with a bright excellent bore. The metal surfaces retain about 98% original blue with a thin streak of wear near the heel of the backstrap toning to gray and some scattered light handling marks. The hammer and trigger retain 99% original case-hardened finish. The Pachmayr Presentation Compac checkered rubber grip rates near excellent with a few light handling marks. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-294) {MODERN} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
463	Beretta Model 1934 Semi-Auto Pistol serial #D72283, 380 ACP, 3 3/8" barrel with a bright about excellent bore. The metal surfaces of this 1952-dated pistol retain about 97% original blue with touch of light operational wear on the barrel, a few scattered light handling marks and the slide is toning to plum under bright direct light. The metal-backed mother-of-pearl grips rate near excellent with a narrow chip at the upper right edge of the left panel. One original magazine is included and the action appears to function well mechanically. (23A9100-M72) {MODERN} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
464	North American Arms Mini Revolver with Holster serial #L015549, 22 LR, 1 1/8" barrel with a bright near excellent bore. The stainless steel surfaces retain about good with a few light handling marks and there are grind marks around the front sight which has been regulated and the tip of the hammer also appears to have been dressed. The smooth American hardwood grips rate excellent. Timing is excellent, lock-up shows a touch of play and the action appears to function well mechanically. Included is a North American Arms-branded natural leather right-hand inside-the-waistband holster. (23A9100-712) {MODERN} [Richard "Stretch" Kennedy Collection] (75/150) Est. 75 - 150
465	Smith & Wesson Model 638-2 Bodyguard Airweight Revolver serial #CDS9507, 38 Special, 1 7/8" barrel with a bright excellent bore. The stainless steel barrel and cylinder rate near excellent with a few light handling marks. The frame retains about 99% original silver anodized finish and the trigger retains about 97% original case-hardened finish with a few speckles of light oxidation staining. The unmarked checkered rubber grips rates very good with some softened points and a touch of ingrained soiling. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-183) {MODERN} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
466	Smith & Wesson Model 37 Chiefs Special Airweight Revolver serial #1J29835, 38 Special, 3" barrel with a bright excellent bore. The metal surfaces retain about 99% original blue and black anodized finishes with perhaps a light handling mark or two while the hammer and trigger retain about 95% original case-hardened finish with a few spots of light oxidation on the trigger. The un-numbered factory checkered walnut Magna grips rate very good plus with a few scattered light handling marks and a tiny streak of red marker on the rear of the left panel. The crane moves sluggishly, likely needing a just a little oil, timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-593) {MODERN} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
467	Ruger Super Bearcat Single Action Revolver serial #91-01618, 22 LR, 4" pre-warming barrel with a bright excellent bore. The metal surfaces of this 1971 first-year-production revolver retain about 97% original blue and gold anodized finishes with very light muzzle and high edge silvering, a tiny spot of pinprick pitting toning to gray on the left side of the frame, "P.P.B" is scratched on the bottom of the grip frame and there are a couple small impact marks to the left of the serial number. There are a few speckles of light oxidation on the polished sides of the hammer. The smooth walnut grips with silver Phoenix medallions rate about very good with a worn finish, scattered light handling marks and "P.B." is written in punch-dots on the bottom of the left panel. All metal markings are crisp, the transfer-bar upgrade has not been performed, timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-398) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500

Lot	Title/Description
468	Ruger New Model Bearcat Single Action Revolver serial #93-01600, 22 LR, 4" barrel with a bright excellent bore. The metal surfaces of this 1994-production revolver retain about 99% original blue and black enamel finishes with a few scattered light handling marks. The polished sides of the hammer and trigger are bright and all metal markings are crisp. The factory smooth rosewood grips with silver Phoenix medallions rate excellent. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-730) {MODERN} [Richard "Stretch" Kennedy Collection] (350/550) Est. 350 - 550
469	Smith & Wesson Model 649-3 Bodyguard Double Action Revolver serial #CBB8731, 357 Magnum, 2 1/8" stainless steel barrel with a bright excellent bore. The stainless steel surfaces rate excellent with perhaps a light handling mark or two while the shrouded hammer and trigger retain nearly all their original case-hardened color with a small spot of light oxidation on the top of the hammer. The checkered rubber Uncle Mikes Combat grip rates excellent. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-306) {MODERN} [Richard "Stretch" Kennedy Collection] (350/550) Est. 350 - 550
470	Smith & Wesson Model 32-1 Terrier Double Action Revolver serial #R45853, 38 S&W, 2" pinned barrel with a bright excellent bore. The metal surfaces retain about 90-93% original blue with the backstrap and bottom of the triggerguard thinning to a gray patina, light high edge silvering, and scattered speckles of pinprick pitting and light handling marks. The hammer and trigger retain about 98% original case-hardened finish. The Uncle Mike's checkered rubber boot grip rates about excellent. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-57) {MODERN} [Richard "Stretch" Kennedy Collection] (350/550) Est. 350 - 550
471	Polish PW wz. 33 Tokarev Factory Cutaway Semi-Auto Pistol serial #W0578, 7.62 Tokarev, 4 1/2" barrel. The metal surfaces retain about 98% arsenal-refurbished blue with scattered pinprick pitting beneath the finish and some light handling marks. The black Bakelite grips rate about excellent. The slide is dated 1953 and is serialized to the frame and the pistol is not import-marked. The pistol and included magazine feature numerous nicely-done factory cutaways lined with red enamel that show the mechanical operation of the parts. There are a couple moderate dents on the right edge of the front sight blade and while the pistol obviously cannot be fired, the action does appear in all other ways to function well mechanically. This will make a great addition to your communist firearms collection. (23A9100-744) {C&R} [Richard "Stretch" Kennedy Collection] (350/550) Est. 350 - 550
472	Forehand Arms Co. 38 Double Action Revolver serial #226467, 38 S&W, 3 1/4" ribbed round barrel with a bright fine bore with a few scattered spots of very light oxidation and pinprick pitting in the otherwise strong rifling. The barrel, frame and cylinder retain about 95% original nickel finish with overall scattered speckles of light oxidation and fine flaking to a pleasant brown patina. The hammer and barrel latch are toning to gray with remnants of original case-hardened colors and the trigger and triggerguard retain about 75% original blue with the bottom of the triggerguard toning to a brown patina with some scattered speckles of light oxidation. All metal markings are crisp and all the numbered parts are serialized to the frame. The un-numbered checkered hard rubber grips rate excellent with a light handling mark or two and fit the frame very well. They feature a stylized "F&W" in ribband over a Federal shield along with an eight-pointed star around the grip screw escutcheon. Barrel-to-frame fit along with timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-43) {C&R} [Richard "Stretch" Kennedy Collection] (75/150) Est. 75 - 150
473	Excellent Smith & Wesson Model 12-2 Airweight Double Action Revolver serial #C952620, 38 Special, 2" pinned barrel with a bright near excellent bore. The metal surfaces retain about 99% original blue and black anodized finishes with a scattered light handling mark or two. The hammer and trigger retain about 98% original case-hardened finish with a few fine speckles of light oxidation. The factory checkered walnut Magna grips rate near excellent with a few scattered light handling marks and the left panel is properly stamp-numbered to the frame. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-174) {C&R} [Richard "Stretch" Kennedy Collection] (450/650) Est. 450 - 650

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
474	Charter Arms Bulldog Double Action Revolver serial #939766, 44 Special, 3" barrel with a bright about excellent bore. The metal surfaces of this Stratford CT-produced gun retains about 95% original blue and black anodized finishes with some scattered small spots of light oxidation, a few spots of wear toning to gray and a few light handling marks. The hammer retains about 99% original case-hardened finishes and the checkered walnut factory grips rate very good with a few light handling marks. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-317) {MODERN} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
475	Excellent Smith & Wesson Model 49 Bodyguard Double Action Revolver serial #J61864, 38 Special, 1 7/8" pinned barrel with a bright excellent bore. The metal surfaces retain about 98% original blue with some fine speckles of light oxidation on the backstrap and a light handling mark or two. The trigger and shrouded hammer retain about 99% original case-hardened finish and the factory checkered walnut Magna grips rate about excellent with a few spots of light finish wear and the right panel is properly stamped-numbered to the frame. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-450) {MODERN} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
476	Smith & Wesson Model 10-5 Double Action Revolver serial #2D80370, 38 Special, 4 1/8" barrel with a bright excellent bore. The metal surfaces of this 1978-vintage revolver retain about 98% original nickel finish with a few scattered very fine speckles of light oxidation and a few light handling marks. The trigger and hammer retain about 99% original case-hardened finish with a hint of light oxidation on the trigger. The factory checkered walnut Magna grips rate near excellent with a few very light handling marks and the right panel is correctly stamp-numbered to the gun. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-395) {MODERN} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
477	Smith & Wesson 38 Double Action Revolver serial #528916, 38 S&W, 3 1/4" ribbed round barrel with a bright fine bore showing a few scattered spots of light oxidation in the otherwise strong rifling. The barrel, frame and cylinder of this Fourth Model revolver retain about 97% original nickel finish with some scattered speckles of light oxidation and some small spots of wear on the front strap muting to gray patina. The trigger and hammer retain strong original case-hardened finish with a small spot of light oxidation on the rear of the hammer and the triggerguard retains about 97% original blue with a few speckles of light oxidation. All metal markings are crisp and all the numbered parts are serialized to the frame. The factory checkered hard rubber grips rate perhaps very good with much of the checkering worn smooth and a few light handling marks; the right panel is properly stamp-numbered to the frame. Barrel-to-frame fit and timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-596) {C&R} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
478	Smith & Wesson 32 Double Action Revolver serial #324926, 32 S&W, 3" ribbed round barrel with a mostly bright about very good bore showing patches of light oxidation and light pinprick pitting throughout the strong rifling. The barrel, frame and cylinder of this Fifth Model revolver retain about 90% original nickel finish with some light wear and light oxidation on the left side of the barrel toning to a dark gray patina, circumferential scratches around the cylinder, a few areas of mild cloudiness and a few light handling marks. The face of the trigger is toning to gray while the sides retain a nice smoky case-hardened patina and the hammer shows an added blue finish which is flaking to gray. The triggerguard retains about 85% original blue with speckles of light oxidation. All the visibly-numbered parts are serialized to the frame and the replacement factory checkered hard rubber grips rate about very good plus with a few softened points in the checkering the fit is slightly imperfect at the top of the grips with a sliver of light visible; the right grip panel is numbered to another revolver. Barrel-to-frame fit is very good, timing and lock-up are excellent, the extractor operates roughly and the action otherwise appears to function well mechanically. (23A9100-427) {C&R} [Richard "Stretch" Kennedy] (150/250) Est. 150 - 250

Lot	Title/Description
479	Smith & Wesson 32 Double Action Revolver serial #195583, 32 S&W, 3" ribbed round barrel with a mostly bright about very good bore showing patches of light oxidation and light pitting in the otherwise strong rifling. The metal surfaces of this Fourth Model revolver retain about 93% original nickel finish showing some mild flaking to brown patina on the top of the latch, along the edges of the backstrap and the left side of the front sight along with overall speckles of light oxidation. The triggerguard and latch retain about 40% original blue in the protected areas with the balance toning to gray and the hammer and trigger are also toning to gray with remnants of original case-hardened colors in the protected areas. All the numbered parts are serialized to the frame. The factory checkered hard rubber grips rate very good showing patches of worn checkering; the right panel is scratch-numbered 195383 which may be a factory oversight as they fit the frame perfectly. Barrel-to-frame fit shows a bit of play, timing needs attention while lockup is very good and the action appears to otherwise function well mechanically. (23A9100-436) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (150/250) Est. 150 - 250
480	Smith & Wesson 32 Safety Hammerless Revolver serial #16576, 32 S&W, 3" ribbed round barrel with a mostly bright about very good bore showing a few patches of light oxidation and fine pitting in the otherwise strong rifling. The metal surfaces of this First Model revolver retain about 75% original nickel finish with the right side of the frame, areas of the cylinder and the sideplate cleaned to bright along with scattered light cloudiness and speckles of light oxidation. The triggerguard retains about 85% original blue with the bottom toning to gray along with speckles of light oxidation and the case-hardened trigger is also toning to gray. The factory hard rubber grips rate very fine showing some slight softening of the checkering and the right panel along with the other numbered parts of the gun are serialized to the receiver. Barrel-to-frame fit, timing and lock-up are all excellent and the action appears to function well mechanically. (23A9100-429) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
481	Beretta Model 70S Semi-Auto Pistol serial #B52982U, 22 LR, 3 1/2" barrel with a bright excellent bore. The metal surfaces of this 1982-production pistol retain about 98% original blue with a small spot on the top of the barrel toning to dark gray under bright direct light and a light handling mark or two. The checkered synthetic factory grips with right hand thumb rest rate about excellent also with a light handling mark or two. The pistol features a barrel-mounted front sight blade and a fully-adjustable rear sight, one factory 9-round magazine is included and the action appears to function well mechanically. (23A9100-485) {MODERN} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
482	Harrington & Richardson Young America Bulldog Double Action Revolver serial #148416, 32 RF, 2" octagon barrel with a mostly bright about very good bore showing patches of light oxidation and light pitting in the otherwise strong rifling. The barrel, frame and cylinder retain about 97% original nickel finish with loss due to some scattered light oxidation along the edges of the top strap and cylinder and a few scattered speckles of light flaking. The triggerguard retains a similar amount of original blue with some speckles of light oxidation and the hammer and trigger retain most of their original case-hardened finish with the face of the trigger toning to gray and some light operational silvering. The factory checkered hard rubber grips with crown motif rate excellent with the right panel correctly scratch-numbered to the frame. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-742) {C&R} [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200
483	Smith & Wesson 32 Double Action Revolver serial #88940, 32 S&W, 3" ribbed round barrel with a partially bright perhaps very good bore showing areas of light oxidation and light pitting in the otherwise strong rifling. The metal surfaces of this Fourth Model revolver retain about 85% original blue with the cylinder flats, backstrap and front strap toning to lightly-oxidized gray patina, light high edge silvering, some light handling marks toning to gray on both sides of the barrel and overall scattered spots of light oxidation. The trigger and hammer a good amount of original case-hardened finish with some nice colors remaining on the hammer. All visibly numbered parts are serialized to the frame. The right panel of the factory hard rubber grips rates fine with some areas of softened checkering near the backstrap and it is numbered to another gun while the left panel rates good with sharper checkering and a 7/8" chip at the base. Barrel-to-frame fit shows a touch of vertical play while timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-363) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
484	Smith & Wesson Model 12-2 Airweight Double Action Revolver serial #D677275, 38 Special, 2" pinned barrel with a mostly bright about very good plus bore showing some stubborn fouling which will likely clean to excellent. The metal surfaces retain about 80% original blue and black anodized finishes with overall high edge and operational silvering, spots of wear toning to gray behind each cylinder flute and some scattered light handling marks. The hammer and trigger retain about 98% original case-hardened finish and the factory checkered walnut Manga grips rate about good with a couple narrow chips missing from the checkering borders and a worn finish on the left panel, overall light handling marks and the S&W medallion on the right panel is a little crooked; the right panel is stamped-numbered to the frame. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-339) {MODERN} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
485	Smith & Wesson Model 40 Centennial Revolver serial #25845, 38 Special, 1 7/8" pinned barrel with a bright excellent bore. The metal surfaces retain about 98% original nickel finish with a couple small spots of light cloudiness and a few light handling marks while the trigger retains a similar amount of original case-hardened finish. The factory smooth walnut Magna grips rate near excellent with touch of thinning finish on the wear points and a very light handling mark or two; the right panel is correctly stamp-numbered to the frame. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-346) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
486	Excellent Browning Baby Model Semi-Auto Pistol serial #419084, 25 ACP, 2" barrel with a bright about excellent bore. The metal surfaces of this Belgium-produced pistol retain about 98% original blue with a couple tiny spots of pinprick pitting on the underside of the dustcover and a scattered light handling mark or two. The barrel is bright and the checkered synthetic factory grips rate very good plus with a few scattered light handling marks. The slide is marked "Browning Arms Company," one FN-marked magazine is included and the action appears to function well mechanically. (23A9100-477) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
487	Harrington & Richardson Automatic Ejecting Double Action Revolver serial #23074, 38 S&W, 3 1/4" ribbed round barrel with a mostly bright fine bore showing a few scattered spots of light oxidation and light pitting in the otherwise strong rifling. The metal surfaces of this Second Model fifth variation revolver retain about 97% original nickel finish with some slight cloudiness around the front strap, operational wear around the cylinder and scattered speckles of light oxidation. The triggerguard retains about 95% original blue with some light handling marks and high edge wear toning to gray. The hammer, trigger and barrel latch retain about 50% original case-hardened finish with the balance toning to gray, some speckles of light oxidation and whips of case-hardened colors here and there. The checkered walnut saw-handle grips are numbered to another gun and rate about excellent with a few light handling marks. All the other numbered parts of the gun are serialized to the frame, barrel-to-frame fit is very good and the action will need mechanical attention as the cylinder does not reliably rotate in either single or double action. (23A9100-295) {C&R} [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200
488	Smith & Wesson Model 10 Double Action Revolver serial #C495752, 38 Special, 4" pinned barrel with a bright excellent bore. The metal surfaces retain about 98% original nickel finish with a few scattered speckles of light oxidation and a few light handling marks. The trigger and hammer retain about 99% original case-hardened finish. The factory diamond checkered walnut Magna grips rate about very good with some finish wear along the backstrap, a small dent near the heel of the right panel and some scattered light handling marks; the right panel is correctly numbered to the frame. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-72) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
489	Smith & Wesson Model 38 Bodyguard Airweight Revolver serial #J809344, 38 Special, 1 7/8" pinned barrel with a bright excellent bore. The metal surfaces of this 1981-vintage revolver retain about 95% original nickel finish showing some overall very light cloudiness and fine speckles of very light surface oxidation. The trigger and shrouded hammer retain about 98% original case-hardened finish and the un-numbered checkered walnut combat-style grips with S&W medallions rate very good plus with some scattered small spots of finish wear primarily along the high edges. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-1) {MODERN} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600

Lot	Title/Description
490	Smith & Wesson Model 12-3 Airweight Double Action Revolver serial #8D17748, 38 Special, 4" pinned barrel with a bright excellent bore. The metal surfaces of this 1981-production revolver retain about 95-96% original blue with a streak of wear toning to gray on either side of the barrel and a small spot on one cylinder flat, a small grind or impact mark on either side of the rear sight notch exposing the natural alloy beneath and scattered high edge silvering. The hammer and trigger retain about 97% original case-hardened finish with a few fine speckles of light oxidation. The factory checkered walnut Magna grips rate about very good with a narrow sliver missing from the rear checkering border on the left panel, light finish wear on the high edges and a few scattered light handling marks; curiously the right panel is numbered "17745". Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-403) {MODERN} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
491	Smith & Wesson 32 Safety Hammerless Revolver serial #189033, 32 S&W, 3 1/2" ribbed round barrel with a bright excellent bore. The metal surfaces of this Third Model revolver retain about 98% original nickel finish with a few small spots of flaking to brown patina on the cylinder and a small spot of light oxidation near the top of the left grip panel showing some fine cleaning striations. The barrel latch and triggerguard retain about 95% original blue with some light oxidation on the inside of the triggerguard and some scattered areas of light wear toning to gray. The trigger is a smoky case-hardened patina with some scattered speckles of light oxidation and whips of original case-hardened colors in the protected areas. All metal markings are crisp and the correct parts are serialized to the frame. The factory checkered hard rubber grips rate very good plus with a streak of softened checkering on the left panel and some scattered light handling marks; the right panel is properly numbered to the gun. Barrel-to-frame fit, timing and lock-up are all excellent and the action appears to function well mechanically. (23A9100-246) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
492	Smith & Wesson 32 Double Action Revolver serial #244403, 32 S&W, 3" ribbed round barrel with a mostly bright very good plus bore showing a couple small patches of light oxidation and very light pitting in the otherwise strong rifling. The metal surfaces of this Fourth Model revolver retain about 90% original nickel finish with areas of flaking to brown patina on the cylinder, bubbling along the top strap and overall speckles of light oxidation primarily concentrated on the right side of the frame. The triggerguard and barrel latch retain about 96-97% original blue with speckles of light oxidation and the trigger and hammer retain most of their original case-hardened finish with some nice colors remaining throughout. Metal markings are crisp and all the correct parts are serialized to the frame. The left panel of the factory checkered hard rubber grips rates about excellent while the right panel rates closer to good with a 5/16" chip in the base and a few light handling marks; the right panel is properly-numbered to the frame. Barrel-to-frame fit along with timing and lock-up are all excellent and the action appears to function well mechanically. (23A9100-406) {C&R} [Richard "Stretch" Kennedy Collection] (150/300) Est. 150 - 300
493	Harrington & Richardson American Double Action Revolver serial #7929, 38 S&W, 2 1/2" octagon barrel with a bright fine bore showing a patch of light oxidation in the strong rifling. The metal surfaces of this First Model fourth variation revolver retain perhaps 50% original clouding nickel finish with the balance cleaned to a gunmetal gray patina with scattered areas of cleaned light pitting and spots of light oxidation. The triggerguard retains about 90% original blue with speckles of wear and pinprick pitting toning to gray and the trigger and hammer retain most of their original case-hardened finish with a few speckles of light oxidation and modest colors overall. The factory checkered hard rubber grips with crown motif rate very good with a few moderate scratches on the right panel and some scattered light handling marks; both panels are properly scratch-numbered to the gun. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-19) {C&R} [Richard "Stretch" Kennedy Collection] (50/100) Est. 50 - 100

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
494	Smith & Wesson 32 Double Action Revolver serial #118848, 32 S&W, 3" ribbed round barrel with a bright near very fine bore showing a few scattered spots of light oxidation and light pitting in the otherwise strong rifling. The metal surfaces of this Fourth Model revolver retain about 98% original nickel finish with a few spots of mild flaking to brown patina on the cylinder and at the muzzle and some scattered areas of light cloudiness. The triggerguard and barrel latch retain perhaps 80% original blue with the bottom of the triggerguard toning to gray and the trigger and hammer retain about 90% original case-hardened finish with the colors remaining particularly strong on the left side of both. The left panel of the factory checkered hard rubber grips rates near excellent with perhaps a light handling mark or two and a softened patent date may still be seen at the base and the right panel rates very good plus with a scratch near the top and a few light handling marks. The right panel of the grips along with the other numbered parts of the gun are serialized to the frame. Barrel-to-frame fit and lock-up are excellent, timing will need attention as a few cylinders come up slightly late in both double and single action and while the action is sluggish and will need a good cleaning it does appear to function well mechanically. (23A9100-588) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
495	Excellent Smith & Wesson 32 Safety Hammerless Revolver serial #24852, 32 S&W, 3 1/2" ribbed round barrel with a bright very fine bore showing a few spots of very light oxidation and light pitting in the otherwise strong rifling. The metal surfaces of this First Model revolver retain about 98-99% original nickel finish with loss due to a few tiny speckles of light oxidation in the cylinder flutes and some slightly cloudiness of the finish here and there. The triggerguard retains about 75% original blue with the balance flaking to a pleasant mottled blue-gray patina and the trigger retains a strong original case-hardened finish with nice colors remaining on the sides. The factory checkered hard rubber grips rate near excellent with a light handling mark or two and a crisp patent date on the bottom of the left panel. The right panel is scratch-numbered to the gun and all the other numbered parts are serialized to the frame. Barrel-to-frame fit and timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-587) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
496	Early Smith & Wesson 32 Safety Hammerless Revolver serial #2138, 32 S&W, 3 1/2" ribbed round barrel with a mostly bright about very good bore showing areas of light oxidation and light pitting throughout the otherwise strong rifling. The metal surfaces of this early First Model revolver retain about 90-92% original nickel finish showing some overall mild cloudiness and scattered speckles of light oxidation and pinprick pitting primarily on the cylinder and right side of the frame. The triggerguard retains a similar amount of original blue showing some mild flaking to a pleasant blue-gray patina and the trigger retains most of its original case-hardened finish with speckles of light oxidation on the face of the trigger and whisks of original colors in the protected areas. The factory hard rubber grips rate very good showing some worn areas in the checkering, a tiny dent in the toe of the left panel and a few other light handling marks; the right panel is correctly scratch-numbered to the frame and all the other numbered parts are also serialized to the gun. The slide plate screws show very light slot wear, barrel-to-frame fit and lock-up are excellent, timing will need attention as two chambers come up slightly late and the action appears to otherwise function well mechanically. (23A9100-307) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
497	Smith & Wesson 32 Safety Hammerless Revolver serial #40065, 32 S&W, 3" ribbed round barrel with a partially-bright perhaps good bore showing areas of light pitting and light oxidation in the otherwise strong rifling. The metal surfaces of this First Model revolver retain about 98% later added blue with scattered areas of pinprick pitting beneath the finish and fine speckles of light oxidation. The trigger retains most of it is original case-hardened finish with some nice colors remaining on the left side and underside. The factory checkered hard rubber grips rate about very good showing areas of worn checkering and a few light handling marks. The barrel and cylinder and numbered to the frame, the right grip panel is not numbered, "38" is stamped on the front of the left panel above the grip screw escutcheon and "947" is stamped near the butt of the matte blue grip safety. A pin is missing from the triggerguard, barrel-to-frame fit and timing and lock-up are very good and the action appears to function well mechanically. (23A9100-438) {ANTIQUÉ} [Richard "Stretch" Kennedy Collection] (150/250) Est. 150 - 250

Lot	Title/Description
498	Colt Junior Pocket Model Semi-Auto Pistol serial #56094CC, 22 Short, 2 1/4" barrel with a bright excellent bore. The metal surfaces of this Spanish-made pistol retain about 99% original blue with a few light handling marks while the trigger and barrel are bright with a few speckles of very light oxidation. The checkered European hardwood grips with silver Rampant Colt medallions rate excellent. The slide is numbered to the frame, one original Colt-marked magazine is included and the action appears to function well mechanically. (23A9100-672) {C&R} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
499	Ruger Standard Model Semi-Auto Pistol serial #62609, 22 LR, 4 3/4" barrel with a bright excellent bore. The metal surfaces of this 1953-production pistol retain about 80% original blue with the front and back straps toning to a gray patina, high edge and muzzle silvering, thinning finish along the barrel to a blue-gray patina and overall scattered speckles of light oxidation. The bolt is toning to a light gray patina and the trigger remains bright. The factory black checkered Delrin grips rate very good with scattered light handling marks and a few areas of worn checkering; only remnants of the original black enamel remains in the Phoenix on the silver medallion on the left panel. The original sights are intact, one original aluminum-based magazine is included and the action appears to function well mechanically. (23A9100-133) {C&R} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
500	Excellent Smith & Wesson 32 Safety Hammerless Revolver serial #113846, 32 S&W, 3 1/2" ribbed round barrel with a bright excellent bore. The metal surfaces of this gorgeous Second Model revolver retain about 99% original nickel finish with a hint of light cloudiness along the right side of the barrel and a few scattered speckles of light oxidation. The trigger and barrel latch retain about 98% original blue with a touch of light high edge silvering and fine flaking to brown patina on the latch while the trigger retains nearly all its original smoky case-hardened finish. The un-numbered factory mother-of-pearl grips rate fine with an unobtrusive small chip in the upper right edge of the right panel and a few minor drying cracks from the years. The right panel is not numbered and the grips are just a bit proud at the front and back straps. The extractor appears to be numbered to another gun and all the other proper parts are numbered to the frame. Barrel-to-frame fit, timing and lock-up are all excellent and the action of this lovely pistol appears to function well mechanically. (23A9100-586) {C&R} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
501	Excellent Smith & Wesson 32 Safety Hammerless Revolver serial #231230, 32 S&W, 3" ribbed round barrel with a bright excellent bore. The metal surfaces of this Third Model revolver retain about 97% original blue with some light silvering on either side of the muzzle and some scattered mild flaking to a pleasant brown patina. The trigger retains a similar amount of original case-hardened finish. All metal markings are crisp and all the numbered parts are serialized to the receiver. The un-numbered checkered hard rubber factory grips rate near excellent with a few light handling marks. Barrel-to-frame fit and timing and lock-up are excellent and the action of this high-condition revolver appears to function well mechanically. (23A9100-1071) {C&R} [Richard "Stretch" Kennedy Collection] (550/750) Est. 550 - 750
502	Smith & Wesson 38 Double Action Revolver serial #434567, 38 S&W, 3 1/4" ribbed round barrel with a bright very good plus bore showing a few small spots of light oxidation and very light pitting in the strong rifling. The metal surfaces of this Fourth Model revolver are a relatively even blend of thinning original blue and gray patina with the finish strongest in the protected areas along with areas of cleaned very light pitting and scattered speckles of light oxidation and mild flaking to a brown patina. The trigger and hammer retain most of their original case-hardened finish with a modest amount of original case-hardened colors remaining in the protected areas. The checkered hard rubber factory grips rate very good with some areas in the checkering worn smooth and a few light handling marks; the right panel is properly scratch-numbered to the frame. All the correct parts are numbered to the gun, barrel-to-frame fit and timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-341) {C&R} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
503	High Standard Sentinel MK IV Double Action Revolver serial #S27873, 22 Magnum, 3" barrel with a bright excellent bore. The metal surfaces retain about 95% original blue and black anodized finishes with the frame toning to plum along with some scattered light handling marks and minor high edge silvering. The polished sides of the hammer and trigger are mostly bright with some speckles of light oxidation and the smooth hardwood grips very good with a thin crack in the top of the left panel and a tiny dent at the heel of the right panel. The original sights are intact including the micro-adjustable rear, timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-105) {MODERN} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
504	Smith & Wesson Model 36 Chiefs Special Revolver serial #AEU1728, 38 Special, 1 7/8" barrel with a bright excellent bore. The metal surfaces retain about 98-99% original nickel finish and the trigger and hammer retain nearly all their original smoky case-hardened finish. The Ajax smooth faux ivory grips rate excellent. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-228) {MODERN} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
505	Smith & Wesson 38 Double Action Revolver serial #114111, 38 S&W, 3 1/4" ribbed round barrel with a mostly bright about very good bore showing scattered patches of light oxidation and light pitting in the otherwise strong rifling. The metal surfaces of this Second Model revolver retain about 90% original nickel finish with spots of minor flaking on the cylinder, light cloudiness on the grip straps and left side of the barrel and overall spots of light oxidation toning to brown. The triggerguard retains about 85-90% original blue with scattered speckles of light oxidation and the hammer and trigger retain about nearly all their original case-hardened finish with strong original colors remaining on the hammer. The factory checkered hard rubber grips rate very fine with a few scattered light handling marks including a tiny impact mark to the left of the S&W emblem on the right panel; the patent date on the base of the left panel is clear and the right panel is properly scratch-numbered to the frame. All the numbered parts are serialized to the revolver, barrel-to-frame fit and timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-305) {ANTIQUE} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
506	Smith & Wesson 32 Safety Hammerless Revolver serial #155249, 32 S&W, 3" ribbed round barrel with a mostly bright about very good bore showing a few spots of light pitting and light oxidation in the otherwise strong rifling. The metal surfaces of this Second Model revolver retain about 85% original blue with the bottom of the triggerguard, cylinder flats and sides of the barrel toning to gray along minor high edge wear and overall light handling marks and speckles of light oxidation also toning to a gray patina. The trigger is toning to a pewter-gray case-hardened patina. The factory right side mother-of-pearl grip panel rates excellent while the replacement left side panel rates very good with a repaired chip near the screw escutcheon and a tiny chip in the right edge by the grip safety. The numbered parts of the revolver are serialized to the frame, barrel-to-frame fit and timing and lock-up are all very good and the action appears to function well mechanically. (23A9100-18) {C&R} [Richard "Stretch" Kennedy Collection] (250/350) Est. 250 - 350
507	Scarce Smith & Wesson 38 Safety Hammerless Bicycle Revolver serial #260270, 38 S&W, 2" ribbed round barrel with a bright about excellent bore. The metal surfaces of this Fifth Model revolver retain about 80% of what appears to be it factory blue finish with overall high edge wear and light handling marks toning to gray and speckles of light oxidation. There is a small area behind the triggerguard toning to gray and the triggerguard itself retains about 98% original blue; the triggerguard may be a factory replacement as the left side of front strap bears factory refurbishment dates of both September and October 1943 with the star symbol on the bottom of the butt. The triggerguard retains most of its original case-hardened finish with some minor operational silvering and speckles of light oxidation along with nice case-hardened colors on the right side. The factory mother-of-pearl grips rate about excellent and while the right panel is not numbered to the frame the fit of the panels are both near excellent. All the correct parts are numbered to the gun, barrel-to-frame fit and timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-942) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800

Lot	Title/Description
508	Smith & Wesson 38 Safety Hammerless Revolver serial #257427, 38 S&W, 3 1/4" ribbed round barrel with a bright about fine bore showing a few tiny spots of light pitting in the otherwise strong rifling. The metal surfaces of this Fifth Model revolver retain about 92% original blue with the finish on the grip safety thinning to a blue-gray patina along with scattered light high edge and muzzle silvering along with a few scattered light handling marks and speckles of light oxidation. The trigger retains about 98% original case-hardened finish with the colors remaining particularly vibrant on the sides. All metal markings are crisp, "4648" is stamped on the left side of the barrel just above the hinge and all the correct parts are numbered to the frame. The left panel of the aftermarket smooth mother-of-pearl grips rates about excellent while the right panel rates closer to very good with a couple small and unobtrusive chips at the upper right edge where it meets the top of the front strap. Barrel-to-frame fit and timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-175) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
509	Smith & Wesson 38 Safety Hammerless Revolver serial #141921, 38 S&W, 5" ribbed round barrel with a bright very good plus bore showing a few scattered spots of light oxidation and light pitting in the otherwise strong rifling. The metal surfaces of Fourth Model revolver retain about 75% original blue with the flats of the cylinder and grip safety toning to a gray patina, mild flaking on the sideplate and along both sides of the barrel also toning to gray along with streaks of wear, a small areas of cleaned light pitting on the right side of the frame near the grip and on the corners of the top strap above the action. The trigger retains most of its original case-hardened finish with strong original colors remain on the left side. The aftermarket smooth mother-of-pearl grips rate excellent and all the numbered parts of the revolver are serialized to the frame. Barrel-to-frame fit and timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-356) {C&R} [Richard "Stretch" Kennedy Collection] (250/350) Est. 250 - 350
510	Bauer Firearms 25 Automatic Semi-Auto Pistol serial #112355, 25 ACP, 2 1/8" barrel with a bright excellent bore. The stainless steel surfaces rate about very good showing some tiny impact marks on the rear of the slide and frame along with some scattered light handling marks and a few speckles of light oxidation. The smooth pearlite grips rate about good with 1" missing chips at the top of both panels and a few cracks around each of the grip screw escutcheons. One factory 6-round magazine is included and the action appears to function well mechanically. (23A9100-210) {MODERN} [Richard "Stretch" Kennedy Collection] (75/150) Est. 75 - 150
511	High Standard Sentinel Model R-101 Double Action Revolver serial #771006, 22 LR, 6" barrel with a bright excellent bore. The metal surfaces are toning to a dull gray patina with overall cleaned light pitting, speckles of light oxidation and remnants of original blue along the barrel. The checkered plastic factory grips rate about very good with blackened bubbling from possible heat damage at the heel of each panel. The original sights are intact, timing and lock-up are very good and the action appears to function well mechanically. (23A9100-353) {C&R} [Richard "Stretch" Kennedy Collection] (50/100) Est. 50 - 100
512	Colt Model 1908 Vest Pocket Hammerless Semi-Auto Pistol serial #397824, 25 ACP, 2 1/8" barrel with a bright excellent bore. The slide and frame of this 1933-vintage pistol retain about 80% original blue with most of the loss along the top of the slide and on the high edges which show wear toning to gray along with some slight thinning to blue-gray patina along the triggerguard and front strap. The face of the trigger and grip safety are toning to gray while the sides of both the trigger and grip safety along with the safety lever retain strong case-hardened colors. The checkered walnut factory grips rate about very good plus with a few softened points in the checkering. Two Colt-marked magazines are included (one is two-tone) and the action appears to function well mechanically. (23A9100-M54) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
513	Browning Baby Model Semi-Auto Pistol serial #253748, 25 ACP, 2" barrel with a bright excellent bore. The metal surfaces of this Belgium-produced pistol retain about 97% original blue with a few scattered speckles of light oxidation and a touch of high edge silvering. The barrel is bright and the checkered synthetic grips rate about excellent with a touch of light ingrained soiling. The slide is marked "Browning Arms Company," one FN-marked magazine is included and the action appears to function well mechanically. (23A9100-486) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
514	Smith & Wesson Model 36 Chiefs Special Airweight Revolver serial #AYA2317, 38 Special, 1 7/8" barrel with a bright excellent bore. The metal surfaces retain about 98% original blue and black anodized finishes with the barrel and cylinder toning to plum under bright direct light and overall light high edge silvering. The trigger and hammer retain 99% original smoky case-hardened colors and the factory checkered walnut Magna grips rate very good with a few scattered light handling marks; the right panel is numbered to another revolver. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-594) {MODERN} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
515	Harrington & Richardson Model 199 Sportsman Single Action Revolver serial #S10478, 22 LR, 6" oval-shaped barrel with a bright excellent bore. The metal surfaces of this second variation revolver retain about 90-93% original blue with some minor wear to gray patina on the front strap, light high edge and muzzle silvering and some mild flaking to brown patina on the cylinder. The hammer and trigger are mostly bright showing some speckles of light oxidation. The checkered walnut one-piece factory grip rates very good plus with a few light handling marks. All metal markings are clear, the cylinder is numbered to the frame, barrel-to-frame fit and timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-93) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
516	Thompson/Center Contender Single Shot Pistol serial #S15214, 7x30 Waters, 16" stainless steel barrel with a bright excellent bore. The stainless steel surfaces of this Super 16 pistol rate about very good plus with scattered spots of light oxidation and some light handling marks. The black Rynite pistolgrip and forend rate about excellent. The pistol features the third variation hammer, the original sights are intact though the forward front sight base screw is missing and mounted to the breech is a silver anodized Weaver base and pair of matching 1" rings. Barrel-to-frame fit is excellent and the action appears to function well mechanically. (23A9100-M21) {MODERN} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
517	Colt Model 1908 Vest Pocket Hammerless Semi-Auto Pistol serial #364684, 25 ACP, 2 1/8" barrel with a bright about very good bore showing some light frosting throughout the strong rifling. The metal surfaces of this 1927-vintage pistol have aged to dull gray patina with overall high edge silvering, speckles of light oxidation staining and remnants of original blue along the slide. The smooth distressed walnut grips with concave silver Rampant Colt medallions rate about very good with a short crack in the base of the right panel and what appears to be vise "bite" marks at the top and bottom of each. One Colt-marked two-tone magazine is included and the action appears to function well mechanically. (23A9100-M41) {C&R} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
518	Excellent Smith & Wesson 32 Double Action Revolver serial #245168, 32 S&W, 6" ribbed round barrel with a bright excellent bore. The metal surfaces of this Fourth Model revolver retain about 97% factory-refurbished blue with a few spots of light oxidation on the right side of the barrel and some scattered softened pinprick pitting beneath the finish. The hammer and trigger retain strong original case-hardened colors which are muting to pewter-gray on the face of the trigger along with a couple speckles of light oxidation on the spur of the hammer. The factory checkered hard rubber grips rate near excellent with a tiny spot of softened checkering on the left panel and a scattered light handling mark or two. The patent date on the bottom of the left panel is softened but legible, the right panel is scratch-numbered to the frame, there is a small factory refurbishment mark on the left side of the back strap and all the correct parts are serialized to the gun. Barrel-to-frame fit and timing and lock-up are excellent and the action of this attractive revolver appears to function well mechanically. (23A9100-309) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
519	Smith & Wesson Military & Police Hand Ejector Revolver serial #C354069, 38 Special, 2" barrel with a bright excellent bore. The metal surfaces retain about 95-97% original blue with scattered speckles of light oxidation and fine pinprick pitting while the hammer and trigger retain most of their original case-hardened finish showing fine speckles of light oxidation and a generous amount of original colors throughout. The diamond checkered walnut Magna grips rate about excellent with a few very light handling marks; the right panel is numbered to the frame as are all the other appropriate parts of the revolver. Timing and lock-up are excellent and the action of this fine revolver appears to function well mechanically. (23A9100-269) {C&R} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800

Lot	Title/Description
520	Smith & Wesson K-38 Hand Ejector Revolver serial #K158074, 38 Special, 6" barrel with a bright excellent bore. The barrel of this K-38 Masterpiece revolver retains about 50% factory-refurbished blue with the balance toning to gray with light silvering at the muzzle and speckles of light oxidation. The remaining metal surfaces retain about 85% factory-refurbished blue with the fronts of the cylinder flats showing wear to gray patina, high edge silvering, a few spots of light oxidation and small spots of loss toning to gray and some fine cleaning striations. The hammer and trigger retain most of their case-hardened finish with speckles of light oxidation and generous remnants of original case-hardened colors. There is a "5 76" refurbishment date with boxed "R-S" symbol on the left side of the backstrap along with a "S (diamond)" mark on both the underside of the barrel and on the face of the cylinder and all the correct parts are numbered to the frame. The un-numbered diamond checkered walnut factory grips rate about very good with perhaps a touch of added finish, a chip at the heel of the right panel and overall light handling marks. The revolver features a red ramp front sight blade and micro-adjustable rear, timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-1508) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
521	Smith & Wesson Model 45 Military Hand Ejector Revolver serial #S93147, 45 ACP, 5 1/2" barrel with a bright about good bore showing very fine pitting throughout the softened rifling. The metal surfaces retain about 95% later added blue with scattered softened pitting evident beneath the finish, light thinning to blue-gray patina along the grip frame and a few scattered light handling marks. The hammer and trigger retain a strong original case-hardened finish with nice colors throughout and all the correct parts of the revolver are serialized to the frame. The diamond checkered walnut factory grip rate about very good with the S&W medallion on the right panel having been installed sideways and overall light handling marks; the right panel is stamp-numbered to the frame. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-622) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
522	Smith & Wesson Model 12-2 Airweight Double Action Revolver serial #D417710, 38 Special, 4" barrel with a bright excellent bore. The metal surfaces of this Military & Police revolver retain about 85% original blue and black anodized finishes with overall high edge and operational silvering, the ejector rod is toning to gray, spots of wear toning to gray and scattered light handling marks. The hammer and trigger retain strong original case-hardened finish with nice colors throughout and there is a small import-mark on the underside of the muzzle. The checkered walnut Magna grips rate about good as devoid of finish, a short hairline crack in the upper right edge of the right panel, a 1/2" bruise near the toe of the left panel, a smaller spot of wear near the base of the right panel and overall light handling marks; the right panel is numbered to another gun and both panels are stamped "KAR" on the interior. Timing will need attention, lock-up is excellent and the action otherwise appears to function well mechanically. (23A9100-457) {MODERN} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
523	Smith & Wesson Model 12-2 Airweight Double Action Revolver serial #D237870, 38 Special, 4" barrel with a bright excellent bore. The metal surfaces of this Military & Police revolver retain about 90% original blue and black anodized finishes with light high edge and muzzle silvering, a small scuff by the right edge of the triggerguard and small spot of wear on the left side of the frame both exposing the natural alloy beneath the finish and scattered light handling marks and speckles of light oxidation. The hammer retains about 98% original case-hardened finish which has muted a bit on the trigger and the underside of the muzzle is import marked. The factory checkered walnut Magna grips rate very good with overall minor handling marks, a few spots of finish wear and a tiny chip in the rear edge of the checkering border on the left panel; the right panel is numbered to another gun and both panels are stamped "KAR" on the interior. The front sight blade has been fitted with a small Tritium night sight insert which no longer glows, timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-206) {C&R} [Richard "Stretch" Kennedy Collection] (250/450) Est. 250 - 450
524	Excellent Smith & Wesson Model SW9F Semi-Auto Pistol serial #PAE0496, 9mm, 4 1/2" barrel with a bright excellent bore. The slide retains about 99% original matte blue and the barrel is bright with just a touch of light operational wear around the chamber. The black polymer grip frame rates excellent. The pistol features white three-dot sights and includes two factory 17-round magazines, factory plastic hard case and paperwork. The action appears to function well mechanically. (23A10718-15) {MODERN} (200/300) Est. 200 - 300

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
525	High Standard Griswold & Gunnison Percussion Revolver serial #02369, .36 cal., 7 1/2" part round part octagon barrel with a bright excellent bore. The barrel, cylinder and small parts of this handsome reproduction retain about 99% original blue while the brass frame and grip frame have aged to a lightly-tarnished warm goldenrod patina. The smooth hardwood grip rates near excellent. The barrel and cylinder are numbered to the frame and the left side of the barrel is marked "GRISWOLD & GUNNISON / C.S.A." Timing and lock-up are excellent, the original Styrofoam two-piece box, outer sleeve, paperwork and a spare nipple are included and the action appears to function well mechanically. (23A10718-52) {ANTIQUE} (300/400) Est. 300 - 400
526	Ruger Standard Model Semi-Auto Pistol serial #14-22590, 22 LR, 4 3/4" barrel with a bright excellent bore. The metal surfaces of this 1977-vintage pistol retain about 99% original blue with a few scattered very light handling marks and the bolt and trigger are bright. The checkered Delrin grips with silver Phoenix medallion on the right panel rate about excellent with a light handling mark or two. Included is one original magazine, the original hinged red box grease pencil-numbered to the gun, manual and paperwork and the action appears to function well mechanically. (23A10718-46) {MODERN} (300/500) Est. 300 - 500
527	Excellent Ruger Old Army Percussion Revolver serial #140-40192, .44 cal., 7 1/2" barrel with a bright excellent bore. The metal surfaces retain about 99% with a thin scratch on the left side of the frame near the base pin retaining pin and the polished sides of the hammer are bright. The smooth walnut grips rate excellent with the silver Phoenix medallions showing a bit of light wear. The pistol includes the original hinged red box grease pencil-numbered to the gun, manual and paperwork. Timing and lock-up are excellent and the action appears to function well mechanically. (23A10718-29) {ANTIQUE} (400/600) Est. 400 - 600
528	Custom Ruger Mark II Government Target Model Semi-Auto Pistol serial #210-43118, 22 LR, shortened 6" bull barrel with a bright excellent bore. The metal surfaces retain about 98% added matte blue finish with a few scattered spots of softened light pitting beneath the finish, a few spots of light oxidation and a few light handling marks. The trigger has had an action job and remains bright and the barrel has been professionally-shortened and crowned. The replacement factory checkered walnut grips with right hand thumb rest rate about excellent with a coat of added finish and perhaps a light handling mark or two. The barrel is sighted with the original front sight and a Bo-Mar adjustable rear sight, the original black Delrin grips and a Pachmayr Signature model rubber grip with backstrap are included along with a factory magazine, manual and box end labeled to the gun and the action appears to function well mechanically. (23A10718-26) {MODERN} (600/800) Est. 600 - 800
529	Ruger New Model Super Single Six Convertible Revolver serial #62-26128, 22 LR/22 Magnum, 5 1/2" barrel with a bright excellent bore. The metal surfaces of this 1973-vintage revolver retain about 96-97% original blue with some minor silvering on the left side of the muzzle and left side of the recoil shield, very light high edge silvering, and a scattered light handling mark or two. The polished sides of the hammer are bright and the smooth walnut grips with silver Phoenix medallions rate very good plus with a few very light handling marks. The spare cylinder is properly-numbered to the frame, timing and lock-up are excellent and the action appears to function well mechanically. Included is a Ruger yellow and black Blackhawk box with correct Super Single Six surcharge sticker that has a heavily worn grease pencil number that appears to match along with the extra cylinder box and paperwork. (23A10718-33) {MODERN} (400/600) Est. 400 - 600
530	Smith & Wesson Model 37 Chiefs Special Airweight Revolver serial #J646289, 38 Special, 3" pinned barrel with a bright excellent bore. The metal surfaces retain about 98% original blue and black anodized finishes with a very light muzzle and high edge silvering. The hammer and trigger retain a similar amount of original case-hardened finish with nice colors throughout. The checkered walnut Magna grips rate about very good plus with some scattered light handling marks; the right panel is properly-numbered to the frame. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-939) {MODERN} [Richard "Stretch" Kennedy Collection] (600/800) Est. 600 - 800

Lot	Title/Description
531	Jennings Model 25 Semi-Auto Pistol serial #005875, 25 ACP, 2 1/2" barrel with a bright excellent bore. The metal surfaces retain about 99% original chrome plate with a few scattered light handling marks. The black synthetic grips rate excellent. Included is one factory magazine, the original box and manual. The action appears to function well mechanically. (23A9100-720) {MODERN} [Richard "Stretch" Kennedy Collection] (75/150) Est. 75 - 150
532	As-New Beretta Model 21EL Semi-Auto Pistol serial #BAS51555U, 22 LR, 2 7/16" barrel with a bright excellent bore. This handsome pistol is in as-new-in-box condition retaining all its original blue, black anodized and gold-colored finishes. The lovely smooth European walnut grips with "PB" medallions rate as new. The pistol includes three original magazines, one of which has a gold-colored floorplate, the original box, chamber, manual and paperwork. (23A9100-719) {MODERN} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
533	Excellent Factory-Engraved Llama Model III-A Semi-Auto Pistol serial #583901, 380 ACP, 3 3/4" barrel with a bright excellent bore. The metal surfaces of this 1973-production pistol retain about 98% original blue, the barrel is bright and the faux mother-of-pearl grips rate excellent. The slide and select areas of the frame feature lovely detailed scroll engraving carved in relief with punch-dot shading; there is a ventilated rib along the top of the slide and the right side of the slide is import-marked by Stoeger. Included is the original box, manual, one factory 7-round magazine, and cleaning kit. The action appears to function well mechanically. (23A9100-M1) {MODERN} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
534	Lovely Factory-Engraved Llama Model XV Semi-Auto Pistol serial #581240, 22 LR, 3 3/4" barrel with a bright excellent bore. The metal surfaces of this 1973-vintage pistol retain about 98% original blue with a touch of high edge silvering. The machine-turned barrel is bright and the faux mother-of-pearl grips rate excellent. The slide and select areas of the frame feature lovely detailed scroll engraving carved in relief with punch-dot shading; there is a ventilated rib along the top of the slide and the right side is import-marked by Stoeger. Included is the original box with a tear in one corner of the lid, once factory 8-round magazine, and cleaning kit. The action appears to function well mechanically. (23A9100-M2) {MODERN} [Richard "Stretch" Kennedy Collection] (700/900) Est. 700 - 900
535	Astra Cub Semi-Auto Pistol serial #153218, 22 Short, 2 1/4" barrel with a bright excellent bore. The metal surfaces retain about 95% original blue showing minor high edge and muzzle silvering and a touch of thinning along the front and backstraps to blue-gray patina under bright direct light. The barrel is bright and checkered Bakelite grips rate excellent. The slide is numbered to the frame, and included is an original 6-round magazine, factory box with a few tears in the corners, manual, and cleaning brush. The action appears to function well mechanically. (23A9100-53) {C&R} [Richard "Stretch" Kennedy Collection] (150/300) Est. 150 - 300
536	Colt Junior Model Semi-Auto Pistol serial #55886CC, 22 Short, 2 1/4" barrel with a bright excellent bore. The metal surfaces of this Spanish-produced pistol retain about 99% original blue with a touch of high edge silvering and the barrel, trigger and hammer are bright. The checkered European hardwood grips with silver Rampant Colt medallions rate excellent. The slide is numbered to the frame, one original Colt-marked magazine is included along with the original box and the action appears to function well mechanically. (23A9100-540) {C&R} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
537	Seecamp Model LWS 32 Semi-Auto Pistol serial #16484, 32 ACP, 2" barrel with a bright about excellent bore. The stainless steel surface rate very good plus with some scattered light handling marks while the checkered synthetic grips rate very good with a few scattered light handling marks and softened points in the checkering. Included are two factory 6-round magazine and one unmarked 6-round magazine and the action appears to function well mechanically. (23A9100-377) {MODERN} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
538	Smith & Wesson 32 Double Action Revolver with Original Box serial #226483, 32 S&W, 3 1/2" ribbed round barrel with a mostly bright about very good plus bore showing a few areas of light oxidation and light pitting in the otherwise strong rifling. The metal surfaces of this Fourth Model revolver retain about 85% original nickel finish with scattered areas of light oxidation and light flaking to brown patina primarily on the cylinder and the left side of the barrel and frame. The triggerguard retains about 95% original blue with a few spots of light oxidation and the hammer and trigger retain most of their original smoky case-hardened patina also with some spots of light oxidation and modest case-hardened color throughout. The factory checkered hard rubber grips rate excellent with the patent date crisply-stamped on the bottom of the left panel and the right panel is scratch-numbered to the frame. All the correct parts are numbered to the frame, barrel-to-frame fit and timing and lock-up are all excellent and the action appears to function well mechanically. Also included is the original hinged maroon fabric-covered box properly end-labeled and pencil-numbered to the gun in excellent condition showing a touch of corner wear. The interior of the box rates near excellent with a bit of wear and an excellent "DIRECTIONS FOR USE" lid sticker. (23A9100-1372) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
539	As-New Ruger Old Model Super Bearcat Revolver serial #91-59776, 22 LR, 4" barrel with a bright excellent bore. This 1973-vintage revolver is in as-new-in-box condition with perhaps a hint of light oxidation staining on the left side of the hammer and the smooth walnut factory grips rate excellent. Timing and lock-up are excellent and the action appears to function well mechanically. Included is the original black and red two piece box grease pencil-numbered to the gun, manual and paperwork and outer cardboard shipping sleeve. (23A9100-1252) {MODERN} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
540	Thompson/Center Contender Single Shot Pistol serial #355932, 45-70, 12 1/2" barrel including muzzle brake with a bright excellent bore. The metal surfaces retain about 98% original blue with a few scattered light handling marks. The smooth walnut pistolgrip with nonslip rubber insert rates near excellent with a light handling mark or two while the forend rates very good plus with a few more light handling marks. The pistol features the third variation hammer and includes a Redfield mount and three 1" rings. The action appears to function well mechanically. (23A9100-475) {MODERN} [Richard "Stretch" Kennedy Collection] (250/450) Est. 250 - 450
541	Smith & Wesson 32 Hand Ejector Revolver serial #258722, 32 S&W Long, 3 1/4" barrel with a bright excellent bore. The metal surfaces of this fifth change Model of 1903 retain about 75-80% original blue with the backstrap and area around the hammer and top strap toning to a gray patina, light muzzle and high edge silvering and scattered spots of pinprick pitting toning to gray. The hammer and trigger are toning to a smoky case-hardened patina with remnants of original colors here and there and all the correct parts are numbered to the frame. All metal markings are crisp and this revolver is curiously without a S&W logo on either the frame or sideplate. The un-numbered diamond checkered walnut factory grips rate about very good with a light coat of added finish, a small chip in the upper left edge of the left panel where it meets the frame, a smoothed over dent at the heel of the left panel, along with some scattered spots of softened checkering. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-430) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
542	Bernadelli Baby Model Semi-Auto Pistol serial #9697, 22 Short, 2 1/8" barrel with a bright excellent bore. The metal surface of this 1964 date-coded pistol retain about 98% original blue which is slightly toning to a plum patina under bright direct light with a couple short scratches on the right side of the slide while the trigger remains bright with a few tiny speckles of light oxidation. The checkered synthetic grips rate about excellent. Two original 6-round magazines are included and the action appears to function well mechanically. (23A9100-1290) {C&R} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
543	Excellent Smith & Wesson Model 40 Centennial Revolver serial #L2536, 38 Special, 1 7/8" pinned barrel with a bright excellent bore. The metal surfaces retain about 99% original nickel finish while the trigger retains a similar amount of original case-hardened finish with nice colors throughout. The smooth American hardwood factory grips rate near excellent with a few light handling marks including a small ding in the toe of the right panel which is properly numbered to the gun. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-963) {MODERN} [Richard "Stretch" Kennedy Collection] (550/750) Est. 550 - 750

Lot	Title/Description
544	Smith & Wesson Model 37 Chiefs Special Airweight Revolver serial #141368, 38 Special, 1 7/8" pinned barrel with a bright excellent bore. The metal surfaces of this improved flat latch revolver retain about 97% original blue and black anodized finishes with light high edge and operational wear and scattered light handling marks exposing the natural alloy beneath. The hammer and trigger retain a similar amount of original smoky case-hardened colors with a few speckles of light oxidation staining. The factory diamond checkered walnut Magna grips rate about very good plus with a touch of added finish on the top of the left panel where it has been relieved for use with a speed loader; the right panel is properly stamp-numbered to the frame. A bit of red enamel has been added to the front sight blade, timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-66) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
545	Smith & Wesson Model 33-1 Double Action Revolver serial #R42836, 38 S&W, 4" pinned barrel with a bright excellent bore. The metal surfaces of the Regulation Police revolver retain about 99% original blue with a few scattered speckles of very light oxidation and the hammer and trigger retain a similar amount of original case-hardened finish with nice colors throughout. The checkered walnut factory Magna grips rate about excellent with a small area of finish wear on the right panel near the top of the front strap and the right panel is properly-numbered to the frame. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-592) {MODERN} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
546	Smith & Wesson Model 42 Centennial Airweight Revolver serial #13264, 38 Special, 1 7/8" pinned barrel with a mostly bright about very good bore with a few spots of light pitting near the muzzle and otherwise strong rifling. The metal surfaces retain about 98% added satin chrome plate with some very light silvering on either side of the muzzle and a few light handling marks. The face of the trigger has been polished bright and the balance retains strong original case-hardened colors. The barrel markings are softened but legible and only remnants remain of the frame markings. The smooth walnut factory Magna grips rate about very good with some light finish wear and a small sliver at the top of the right panel at the knuckle. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-15) {MODERN} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
547	Smith & Wesson M&P Airweight Hand Ejector Revolver serial #C318149, 38 Special, 2" barrel with a mostly bright about very good bore showing a few tiny spots of light oxidation and pinprick pitting near the muzzle and otherwise strong rifling. The barrel and cylinder of this pre-Model 12 revolver retain about 75% original blue which is strongest in the protected areas with overall light wear to gray patina. The alloy frame retains about 70% original black anodized finish which is worn to gray patina on the high edges, triggerguard and grip straps and thinning to burnished bronze patina elsewhere. All metal markings remain crisp and the numbered parts are serialized to the gun. The checkered walnut factory Magna grips rate about very good plus with a small spot of worn checkering on the left panel and a few light handling marks; the right panel is numbered to another gun and the fit of the panels at the top of the grip is imperfect. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-442) {C&R} [Richard "Stretch" Kennedy Collection] (250/450) Est. 250 - 450
548	Smith & Wesson Model 37 Chiefs Special Airweight Revolver serial #216954, 38 Special, 3" pinned barrel with a bright about excellent bore. The frame retains about 97% original black anodized finish with a few spots of high edge silvering while the barrel and cylinder retain a similar amount of factory-refurbished blue showing a few small areas of pinprick pitting beneath the finish and a few scattered speckles of light oxidation. The hammer and trigger retain most of their original case-hardened finish with some fine brown speckling on the trigger and vibrant case-hardened colors on the hammer. The diamond checkered walnut factory Magna grips rate about very good plus with a touch of added finish over a few chipped points in the checkering along with a few light handling marks; the right panel is properly stamp-numbered to the frame. All the correct parts of the gun are serialized to the frame, the left side of the front strap is dated "7 79" and the face of the cylinder and the underside of the barrel bear factory refurbishment marks. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-633) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
549	Smith & Wesson 32 Double Action Revolver serial #53289, 32 S&W, 3" ribbed round barrel with a mostly bright about very good bore showing some patches of very light pitting throughout the rifling. The metal surfaces of this Fourth model revolver retain about 97% factory-refurbished nickel plate and blue finishes with a few scattered spots of light pitting beneath the finish and some areas of light cloudiness. The hammer and trigger retain about 95% original case-hardened finish with a touch of operational silvering and nice colors remaining throughout. The un-marked smooth mother-of-pearl grips rate about very good plus with a very small chip in the upper left edge of the left panel and the fit the frame very well. The left side of the front strap bears a "4 79" refurbishment date, the face of the cylinder shows a (star) refurbishment mark and all the correct parts of the revolver are serialized to the frame. Barrel-to-frame fit and lock-up are excellent, timing will need attention and the action appears to otherwise function well mechanically. (23A9100-1067) (ANTIQUE) [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
550	Smith & Wesson Model 12-2 Airweight Double Action Revolver serial #D853420, 38 Special, 2" pinned barrel with a bright excellent bore. The metal surfaces of this Military & Police revolver retain about 96-97% original blue and black anodized finishes with scattered spots of high edge wear exposing the natural alloy beneath, a few scattered speckles of light oxidation on the cylinder and perhaps a small area of cold blue on the right side of the barrel. The hammer and trigger retain about 98% original case-hardened finish with attractive colors throughout. The checkered walnut factory Magna grips rate near excellent with some overall minor finish wear and a few light handling marks and the right panel is properly-numbered to the frame. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-263) (MODERN) [Richard "Stretch" Kennedy Collection] (300/400) Est. 300 - 400
551	Smith & Wesson Model 638 Bodyguard Airweight Revolver serial #BEK7999, 38 Special, 1 7/8" barrel with a bright excellent bore. The stainless steel barrel and cylinder rate about very good plus with a few light handling marks and the frame retains about 99% original silver anodized finish. The unmarked smooth walnut grip panels with Smith & Wesson medallions rate about very good plus with a few light handling marks near the butt and a streak of dried finish along the front of the left panel. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-227) (MODERN) [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
552	Smith & Wesson Model 37 Chiefs Special Airweight Revolver serial #J807011, 38 Special, 3" pinned barrel with a bright excellent bore. The barrel and cylinder retain about 95% original blue with some light oxidation and pinprick pitting around the muzzle while the frame retains about 98% original black anodized finish with some light high edge silvering and a few scattered light handling marks. The trigger and hammer retain most of their original case-hardened finish with some light oxidation speckling on the trigger and nice original colors remaining overall. The checkered walnut factory Magna grips are numbered to another revolver and rate about very good with some light finish wear and light handling marks from honest use. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-24) (MODERN) [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
553	High Standard Model A Semi-Auto Pistol serial #81575, 22 LR, 4 1/2" barrel with a bright excellent bore. The metal surfaces of this Type II takedown-equipped pistol retain about 97% original blue with a some very light thinning on the grip straps and a few light handling marks. The checkered walnut grips rate near excellent with a couple compressed points in the checkering. The original sights are intact, an unmarked magazine is included and the action appears to function well mechanically. (23A9100-624) (C&R) [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
554	High Standard Model G-380 Semi-Auto Pistol serial #461, 380 ACP, 5" barrel with a bright excellent bore. The metal surfaces retain about 95% original blue with an area toning to gray on the left side of the muzzle showing a touch of worn cold blue and a few scattered light handling marks. The checkered hard rubber grips rate about excellent with a couple small dings on the bottom of the panels. One unmarked two-tone magazine is included and the action appears to function well mechanically. (23A9100-682) (C&R) [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500

Lot	Title/Description
555	Smith & Wesson 38 Safety Hammerless Revolver serial #202400, 38 S&W, 5" ribbed round barrel with a bright about excellent bore. The metal surfaces of this Fourth model revolver retain about 80% original blue with areas toning to gray on the sides of the barrel, knuckle, grip safety and front strap, while the cylinder flats show evidence of an old light cleaning toning to gray and there is overall scattered fine flaking and speckles of light oxidation. The trigger retains most of its case-hardened finish with the face muting to a smooth pewter-gray patina. The checkered hard rubber factory grips rate about very good plus with a few scattered light handling marks; the remnant of the patent dates remains visible at the base of the left panel and the right panel is numbered to another gun. All the correct parts of the revolver are serialized to the frame, barrel-to-frame fit shows a touch of play, timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-M83) (C&R) [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
556	Smith & Wesson Centennial Hand Ejector Revolver serial #5876, 38 Special, 1 7/8" barrel with a bright excellent bore. The metal surfaces retain about 85-90% original blue with wear to gray patina on the sides of the muzzle, knuckle and bottom of the triggerguard, light toning to plum on the grip straps and scattered light handling marks and speckles of pinprick pitting. The trigger retains most of its original case-hardened finish with some fine brown speckling and all the correct parts of the revolver are numbered to the frame. The smooth walnut factory Magna grips rate very good with a light coat of added finish over some scattered dings and light handling marks including a short hairline crack in the left edge of the right grip panel at the rear of the frame; the right panel is stamp-numbered to the gun. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-200) (C&R) [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
557	Smith & Wesson Centennial Hand Ejector Revolver serial #5537, 38 Special, 1 7/8" barrel with a bright excellent bore. The metal surfaces retain about 97-98% original blue with light high edge silvering and a few scattered light handling marks and speckles of light oxidation. The trigger has been polished bright and the smooth walnut factory Magna grips are numbered to the gun and rate about very good plus with a few scattered light handling marks. All the correct parts are numbered to the frame, timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-188) (C&R) [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
558	Smith & Wesson 38 Double Action Revolver serial #421747, 38 S&W, 6" ribbed round barrel with a bright near excellent bore showing some light oxidation in the rifling at the breech. The metal surfaces of this Fourth model revolver retain about 75-80% original blue with the grip straps and areas along the barrel toning to gray, high edge silvering, light handling marks and fine flaking to gray patina on the cylinder flats and scattered speckles of light oxidation. The hammer and trigger retain about 90% original case-hardened finish with the face of the trigger toning to a pewter-gray patina and all the correct parts of the gun are serialized to the frame. The factory checkered hard rubber grips rate about fine with a small spot worn smooth in the checkering on the right panel; the patent date on the left panel is lightly worn and the right panel is numbered to another gun. Barrel-to-frame fit along with timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-75) (C&R) [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
559	Excellent Smith & Wesson 32 Regulation Police Hand Ejector Revolver serial #267513, 32 S&W Long, 3 1/4" barrel with a bright excellent bore. The metal surfaces of this handsome pre-war revolver retain about 98% original blue with a few scattered speckles of light oxidation and a hint of light silvering at the muzzle. The hammer and trigger retain a similar amount of original case-hardened finish with strong colors throughout. The diamond checkered factory grips rate near excellent with a few light handling marks; the patent date on the bottom of the left panel is very crisp and the right panel is pencil-numbered to the frame. All the correct parts are serialized to the gun, timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-74) (C&R) [Richard "Stretch" Kennedy Collection] (650/850) Est. 650 - 850

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
560	Smith & Wesson 32 Double Action Revolver serial #221660, 32 S&W, 6" ribbed round barrel with a bright about very good bore showing a few patches of light pitting and oxidation in the otherwise strong rifling. The metal surfaces of this Fourth Model revolver with scarce 6" barrel retain about 80-85% original blue with the bow of the triggerguard grip straps toning to gray, overall flaking to pleasant gray-brown patina particularly along the barrel and cylinder flats and a small area of fine cleaning striations and a spot of light oxidation on the right side of the frame. The hammer and trigger retains most of its original case-hardened finish with scattered fine brown speckling and modest colors remaining throughout. The factory diamond checkered hard rubber grips rate very fine with a light handling mark or two; the patent date is softened but legible on the bottom of the left panel and the right panel is properly scratch-numbered to the frame. All the correct parts are serialized to the gun. Barrel-to-frame fit and lock-up are excellent, a couple chambers come up a little late and the action otherwise appears to function well mechanically. (23A9100-128) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
561	Scarce Harrington & Richardson First Model Small Frame Double Action Revolver serial #8847, 22 LR, 6" ribbed round barrel with a mostly bright about very good bore with a few scattered patches of light pitting and light oxidation in the otherwise strong rifling. The metal surfaces of this Third Variation revolver retain about 97% original blue with some small spots of light oxidation on the cylinder, a touch of high edge silvering at the muzzle and a few light handling marks. The hammer and trigger retain most of their original case-hardened finish with the face of the trigger toning to light gray and some light operational silvering. The checkered hard rubber target logo grips rate about excellent with a few very light handling marks and the right panel is properly scratch-numbered to the frame. The top of the barrel shows the correct patent dates for this variation, all the correct parts are numbered to the gun and the full serial number of "068847" is stamped on the underside of the top strap. Barrel-to-frame fit shows a hint of play, timing and lock-up are very good and the action appears to function well mechanically. (23A9100-950) {C&R} [Richard "Stretch" Kennedy Collection] (300/400) Est. 300 - 400
562	U.S. Contract High Standard U.S.A. Model H-D Semi-Auto Pistol serial #130650, 22 LR, 4 1/2" heavy barrel with a bright excellent bore. The metal surfaces retain about 95% original gray Parkerized finish with some light wear to gray and light handling marks along the barrel and high edges. The factory checkered hard rubber grips rate about very good with some overall light handling marks with the right panel appearing black and the left panel plum. The right side of the frame is marked "PROPERTY OF / U.S. / (ordnance wheel)" and the top of the barrel bears "PROPERTY OF U.S.A." One unmarked two-tone magazine is included and the action appears to function well mechanically. (23A9100-331) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
563	Smith & Wesson 32 Hand Ejector Revolver serial #398869, 32 S&W Long, 3 1/4" barrel with a bright about very good bore showing some scattered patches of light oxidation and very light pitting in the otherwise strong rifling. The metal surfaces of this Third Model revolver retain about 90% later added blue finish with some scattered spots of softened light pitting primarily on the cylinder, some thinning to gray patina on the backstrap and some spots of light oxidation. The hammer and trigger also show later added blue which is toning to a plum patina. The diamond checkered walnut factory grips rate very good plus showing some light handling marks on the bottom of each; the right panel is numbered to another revolver. All the correct parts of the gun are serialized to the frame, timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-360) {C&R} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300

Lot	Title/Description
564	Smith & Wesson 32 Hand Ejector Revolver with Police Markings serial #526573, 32 S&W Long, 3 1/4" barrel with a bright very good plus bore showing a few small spots of light oxidation and pinprick pitting in the otherwise strong rifling. The metal surfaces of this Third Model "K.P.D." marked revolver retain about 75-80% original blue with the backstrap and knuckle toning to a gray patina along with wear on the left edge of the top strap, cylinder flats and sides of muzzle toning to gray and scattered light handling marks. The hammer and trigger retain about most of their original case-hardened finish with scattered fine brown speckling and modest colors remaining throughout. The factory diamond checkered walnut grips rate perhaps very good with a small chip in both panels at the top of the front strap, a smoothed over chip near the toe of the left panel and some scattered light handling marks; the right panel is numbered to another revolver. All the correct parts of the revolver are serialized to the frame, the backstrap is stamped "K.P.D. 15", timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-293) {C&R} [Richard "Stretch" Kennedy Collection] (300/400) Est. 300 - 400
565	Excellent Smith & Wesson 32 Hand Ejector Revolver serial #514908, 32 S&W Long, 3 1/4" barrel with a bright excellent bore. The metal surfaces of this handsome Third Model revolver retain about 98-99% original blue with a few scattered speckles of light oxidation and the hammer and trigger retain 99% original case-hardened finish with strong colors throughout. All the correct parts of the gun are serialized to the frame. The factory checkered hard rubber grips rate about excellent with an unobtrusive light handling mark on the base of the left panel; the right panel is numbered to another revolver. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-142) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
566	Smith & Wesson Model 30 Double Action Revolver serial #705106, 32 S&W Long, 2" pinned barrel with a bright excellent bore. The metal surfaces retain about 99% original blue with a scattered very light handling mark or two and the trigger and hammer retain a similar amount of original case-hardened finish with strong colors throughout. The diamond checkered walnut factory grips rate about very good to perhaps very good plus with a small repaired chip in the upper right edge of the right panel at the frame and a small sliver missing from the rear checkering border of the left panel; the right panel is properly stamp-numbered to the frame. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-286) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
567	Smith & Wesson 38/32 Terrier Hand Ejector Revolver serial #70223, 38 S&W, 2" barrel with a bright excellent bore. The metal surfaces of this five-screw I-frame revolver retain about 85% original blue with the grip straps and areas inside the triggerguard toning to a blue-gray patina, a few scattered areas of pinprick pitting, most notably on one cylinder flat, and a few areas of wear to gray patina. The trigger and hammer retain nearly all their original case-hardened finish with some nice colors throughout. The diamond checkered walnut factory grips rate about very good with some tiny dents on the bases of both panels and a few scattered light handling marks; the right panel is properly stamp-numbered to the frame. All the correct parts are serialized to the revolver, timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-148) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
568	Smith & Wesson Model 1903 32 Hand Ejector Revolver serial #262095, 32 S&W Long, 3 1/4" barrel with a partially bright about good bore showing areas of light pitting and oxidation in the otherwise strong rifling. The metal surfaces of this Fifth Change revolver retain about 99% later-added blue with scattered softened light pitting and fine cleaning striations. The sides of the hammer and trigger have been polished bright. The barrel markings are clear, there are no visible markings on the frame and all the correct parts are serialized to the frame. The left factory checkered hard rubber grip panel rates near excellent with a few compressed points while the right panel, which is stamp-numbered to the frame, rates perhaps good with a sizeable chip in the base and a few thin cracks. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-401) {C&R} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
569	Smith & Wesson 38 Regulation Police Hand Ejector Revolver serial #24531, 38 S&W, 4" barrel with a mostly bright about good bore showing light pitting throughout the otherwise strong rifling. The metal surfaces of this pre-war revolver retain about 90-93% original blue with a small area of cleaned moderate pitting on the cylinder and cleaned light pitting on either side of the muzzle, some fine scratches on the sideplate and right side of frame and overall scattered light pitting. The trigger and hammer retain a similar amount of original case-hardened finish with scattered fine speckles of light oxidation. All the correct parts are serialized to the frame. The factory checkered walnut grips rate about excellent; the patent date on the underside of the left panel is very crisp and the right panel is properly pencil-numbered to the gun. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-108) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
570	Smith & Wesson 22/32 Heavy Frame Target Hand Ejector Revolver serial #525880, 22 LR, 6" barrel with a bright excellent bore. The metal surfaces retain about 95% factory-refurbished blue with some fine flaking and light handling marks on the frame and triggerguard toning to a brown patina, a couple tiny dings on the underside of the barrel and light high edge silvering. The hammer and trigger retain most of their original case-hardened finish with some very light operational wear toning to gray. All the correct parts of the revolver are serialized to the frame. There is a factory refurbishment symbol ahead of the serial number on the front strap and "3.43" date on the left side of the front strap. The diamond checkered walnut factory grips rate about very good plus with some light handling marks around the bottom edge of each along with a fine and unobtrusive hairline crack in the rear of both parallel with the backstrap; the right panel is properly-numbered to the gun. The gun features a Patridge front sight blade and an adjustable square-notch rear sight. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-198) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
571	Smith & Wesson U.S. Navy Contract Victory Model Revolver serial #V194406, 38 Special, 4" barrel with a bright very good plus bore showing a few spots of fine pinprick pitting in the otherwise strong rifling. The metal surfaces retain about 90% original Parkerized finish with the backstrap and bottom of the triggerguard toning to a gray-brown patina, scattered speckles of light oxidation and light operational silvering. The hammer and trigger retain about 60-70% original case-hardened finish with light operational wear toning to gray. All the correct parts of the revolver are serialized to the frame and the top strap shows a crisp "U.S. NAVY". The replacement diamond checkered walnut factory Magna grips rate about very good with a thick coat of added finish, softened checkering, a small spot of finish wear on the rear of the left panel and some scattered light handling marks; the right panel is numbered to another gun. The lanyard loop is missing, timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-590) {MODERN} [Richard "Stretch" Kennedy] (600/800) Est. 600 - 800
572	U.S. Contract High Standard U.S.A. Model H-D Semi-Auto Pistol serial #137800, 22 LR, 4 1/2" heavy barrel with a bright excellent bore. The metal surfaces retain about 97% original Parkerized finish with a few spots of high edge silvering and a few spots of light oxidation. The factory checkered hard rubber grips rate about very good with a few scattered light handling marks and a touch of light ingrained soiling. The right side of the frame is marked "PROPERTY OF / U.S. / (ordnance wheel)" and the barrel bears "PROPERTY OF U.S.A.". One unmarked two-tone magazine is included and the action appears to function well mechanically. (23A9100-1201) {C&R} [Richard "Stretch" Kennedy Collection] (500/700) Est. 500 - 700
573	High Standard Model B Semi-Auto Pistol serial #73813, 22 LR, 4 1/2" barrel with a bright excellent bore. The metal surfaces retain about 70% original blue with the grip straps and underside of the triggerguard toning to a gray patina, light high edge silvering and scattered light handling marks and speckles of light oxidation. The checkered hard rubber grips with High Standard monogram rate about excellent. One aftermarket blued magazine with "HS.B" scratched on the floorplate is included and the action appears to function well mechanically. (23A9100-394) {C&R} [Richard "Stretch" Kennedy Collection] (150/300) Est. 150 - 300

Lot	Title/Description
574	AMT Automag II Semi-Auto Pistol serial #M13581, 22 Magnum, 6" stainless steel barrel with a bright excellent bore. The brushed and matte stainless steel surfaces of this Irwindale CA-produced pistol rate about very good plus with some scattered light handling marks and some light operational silvering. The grooved Lexan grips rate excellent. The original Millett sights are intact, one factory 9-round magazine is included and the action appears to function well mechanically. (23A9100-324) {MODERN} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
575	High Standard Model GB Semi-Auto Pistol serial #314886, 22 LR, 4 1/2" barrel with a bright excellent bore. The metal surfaces retain about 97% original blue with a few speckles of light oxidation near the heel of the backstrap, some light wear to gray on the triggerguard and some scattered light handling marks. The checkered brown synthetic grips with High Standard monograms rate near excellent with a few spots of lightly-worn checkering on the right panel. One original two-tone magazine is included and the action appears to function well mechanically. (23A9100-171) {C&R} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
576	Smith & Wesson Model 1903 32 Hand Ejector Revolver serial #111522, 32 S&W Long, 4 1/4" barrel with a mostly bright about very good plus bore showing some scattered patches of light oxidation and fine pitting in the otherwise strong rifling. The metal surfaces of this Fifth Change revolver retain about 90% original nickel finish with most of the loss due to areas flaking toning to a gray patina on the cylinder, sideplate and sides of the muzzle and some light cloudiness on the backstrap. The trigger and hammer retain most of their original case-hardened finish showing some fine brown speckling. All the correct parts are serialized to the receiver. The right panel of the replacement factory checkered walnut extension grips rates very good plus while the left panel rates very good with scattered dings and a thin scratch and short crack at the base. Timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-173) {C&R} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
577	Smith & Wesson Model 1905 Military & Police Hand Ejector Revolver serial #253564, 38 Special, 6" barrel with a bright excellent bore. The metal surfaces of this Fourth Change revolver retain about 85% original blue with the grip straps and streaks on both sides of the barrel toning to gray, high edge silvering and overall light handling marks. The trigger and hammer retain most of their original case-hardened finish with the face of the trigger toning to a pewter-gray patina and some fine brown speckling. The diamond checkered walnut factory grips rate about very good with perhaps a coat of added finish, softened checkering along the backstrap of the right panel and scattered light handling marks; the right panel is properly pencil-numbered to the frame. All the correct parts are serialized to the revolver, timing and lock-up are excellent and the action appears to function well mechanically. (23A9100-165) {C&R} [Richard "Stretch" Kennedy Collection] (300/500) Est. 300 - 500
578	Smith & Wesson Model 36 Chiefs Special Revolver serial #AFH9699, 38 Special, 1 7/8" barrel with a bright excellent bore. The metal surfaces retain about 98% original blue with a scattered speckle or two of light oxidation and a few light handling marks. The hammer spur has been very neatly shortened leaving a few rows of checkering for a secure purchase and together with the trigger they retain about 95% original case-hardened finish with some very light oxidation on the back of the trigger. The un-numbered factory checkered walnut Magna grips rate very good with some finish wear on the high edges and scattered light handling marks. Timing and lock-up are excellent and the action appears to function well mechanically. (23A10574-207) {MODERN} (400/600) Est. 400 - 600
579	Excellent Smith & Wesson Model 36 Chiefs Special Revolver serial #378266, 38 Special, 3" pinned barrel with a bright excellent bore. The metal surfaces retain about 97% original blue with a touch of thinning on the left side of the frame, a few speckles of pinprick pitting on the cylinder, very light silvering at the muzzle and a few speckles of light oxidation on the front strap. The hammer and trigger retain 99% original case-hardened finish with strong colors throughout. The diamond checkered walnut factory Magna grips rate about excellent with a bit of thinning finish near the backstrap; the right panel is properly stamp-numbered to the frame. The ejector is numbered to the gun, timing and lock-up are excellent and the action appears to function well mechanically. (23A10574-197) {C&R} (450/650) Est. 450 - 650

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
580	Smith & Wesson Military & Police Hand Ejector Revolver serial #C134132, 38 Special, 4" barrel with a bright excellent bore. The metal surfaces retain about 90% original blue with some wear to gray on the top strap and at the heel of the backstrap, mild thinning to blue-gray patina on the bottom of the grip and backstrap, some light oxidation on the cylinder and light high edge silvering. The hammer and trigger retain about 95% original case-hardened finish with some fine brown speckling. All the correct parts of the revolver are numbered to the frame. The diamond checkered walnut factory grips rate very good to perhaps very good plus with a chip near the heel of the left panel and some scattered light handling marks; the right panel is properly stamp-numbered to the gun. Timing and lock-up are excellent and the action appears to function well mechanically. (23A10574-149) {C&R} (300/500) Est. 300 - 500
581	Smith & Wesson 32 Double Action Revolver serial #144895, 32 S&W, 3 1/2" ribbed round barrel with an about fair-good bore showing areas of light pitting and light oxidation throughout the rifling. The metal surfaces of this Fourth Model revolver retain about 95-97% original nickel finish showing overall light cloudiness, some light flaking to brown patina on the cylinder flats and some scattered speckles of light oxidation. The triggerguard and barrel latch retain about 50% original blue with the balance toning to a gray patina and the trigger and hammer retain a strong original case-hardened finish with some toning to pewter-gray patina on the spur and face of the trigger. The factory checkered hard rubber grips rate about very good plus with some slight wear to the checkering and a few light handling marks; the faint remnant of the patent date remains visible at the heel of the left panel and the right panel is properly scratch-numbered to the frame. All the numbered parts are serialized to the gun, barrel-to-frame fit and lock-up are excellent, timing in single action will need attention and the action otherwise appears to function well mechanically. (23A10574-118) {ANTIQUÉ} (200/300) Est. 200 - 300
582	Smith & Wesson 32 Double Action Revolver serial #21437, 32 S&W, 3 1/2" ribbed round barrel with a bright fine bore with a couple tiny spots of very light oxidation in the otherwise strong rifling. The metal surfaces of this Second Model revolver retain about 90-93% original nickel finish with scattered areas of mild flaking to pleasant brown patina along with overall speckles of light oxidation, light bubbling and slight cloudiness. The triggerguard has aged to a mottled gray-brown patina with softened pinprick pitting and remnants of original blue in the protected areas. The hammer and trigger are toning to a smoky-gray case-hardened patina with a modest amount of original colors in the protected areas. The un-numbered factory checkered hard rubber grips rate about very good plus with a thin scratch in the checkering and a tiny bruise on the bottom of the right panel and the remnant of the patent date is visible on the bottom of the left panel. Barrel-to-frame fit and timing and lock-up are excellent and the action appears to function well mechanically. (23A10574-212) {ANTIQUÉ} (150/300) Est. 150 - 300
583	Smith & Wesson 32 Double Action Revolver serial #184609, 32 S&W, 3 1/2" ribbed round barrel with a bright excellent bore. The metal surfaces of this Fourth Model revolver retain about 90% original blue with some light-moderate oxidation on the bottom and heel of the backstrap, streaks of wear toning to gray on the sides of the barrel and a few areas toning to gray along with a small area of cleaned light pitting on the cylinder flats and some very mild flaking to brown patina on the top of the backstrap and knuckle. The hammer and trigger retain about 98% original case-hardened finish and all the numbered parts of the revolver are serialized to the frame. The smooth mother-of-pearl grips rate about excellent. Barrel-to-frame fit and timing and lock-up are excellent and the action appears to function well mechanically. (23A10574-119) {ANTIQUÉ} (250/450) Est. 250 - 450
584	Iver Johnson First Model Safety Automatic Hammer Revolver serial #89478, 32 S&W, 3" ribbed round barrel with a bright about good bore showing patches of light pitting and light oxidation in the softened rifling. The metal surfaces retain about 96-97% later-added nickel finish showing scattered softened pitting beneath the finish, areas of fine cleaning striations and light cloudiness and streaks of wear toning to gray. The barrel rib appears to have been thinned from the cleaning process and the barrel markings are no longer present. The factory checkered hard rubber grips with owl head logos rate near excellent with a few small areas of softened checkering. Barrel-to-frame fit is excellent and the action is functional with somewhat loose timing and lock-up. (23A10574-208) {ANTIQUÉ} (50/100) Est. 50 - 100

Lot	Title/Description
585	U.S. Model 1873/84 Trapdoor Rifle by Springfield Armory with Bayonet serial #69344, 45-70, 32 5/8" barrel with a bright poor bore showing two large pieces of metal missing from the bottom of the chamber where it meets the receiver. This rifle is, based on its serial number, a Model 1873 and was upgraded at some point to Model 1884 specifications. The metal surfaces have aged to an attractive blend of dark gray and plum-brown patina with some scattered spots of old light oxidation and a few thin but moderate tool marks around the breech of the barrel and just ahead of the upper barrel band. The lockplate is toning to gray with an area toward the front cleaned bright and there are remnants of original blue on the thumb piece and along the wood line of the receiver. The 1873-dated breechblock is a lightly-mottled gray and brown patina with fine pinprick pitting and a nice amount of original oil-quenched blackened finish on the underside. All metal markings are correct and crisp. The American black walnut stock rates very fine with nice raised grain throughout perhaps beneath a touch of added finish and a few expected scattered light handling marks. The stock markings have been softened showing the remnant of a boxed inspection cartouche on the left side of the action and a circled "P" firing proof behind the triggerguard. The shell deflector is missing and the cleaning rod and sights are intact including the Model 1884 rifle rear. Included is a U.S.-marked Model 1873 socket bayonet with metal scabbard and leather throat and belt loop with brass "N.G.P." escutcheon plate toning to a warm mustard patina. The bayonet is toning to a mottled gray patina with scattered areas of later added blue and spots of light oxidation. The scabbard is a dark antique-brown patina with some remnants of original black enamel here and there. The leather throat shows much crazing with a tear about half way through on the base of the belt loop; these accessories compliment the rifle nicely. (23A10737-28) {ANTIQUÉ} (500/700) Est. 500 - 700
586	Smith & Wesson 38 Safety Hammerless Revolver serial #47472, 38 S&W, 3 1/4" ribbed round barrel with a bright very good bore showing fine pitting throughout the slightly softened rifling. The metal surfaces of this Third Model revolver retain about 90% original nickel finish with an area of flaking to brown patina on one cylinder flat, scattered speckles of light oxidation and some fine pinprick pitting on the left side of the barrel above the hinge toning to gray. The triggerguard and barrel latch retain about 75% original blue with some light oxidation on the bottom of the triggerguard and the trigger retains most of its original smoky-gray case-hardened finish with some wear to pewter-gray patina on the face. The factory checkered hard rubber grips rate about excellent with a very light handling mark or two; a strong patent date remains on the base of the left panel and the right panel is properly scratch-numbered to the frame. All the correct parts are serialized to the gun. Barrel-to-frame fit and timing and lock-up are excellent and the action appears to function well mechanically. (23A10574-142) {ANTIQUÉ} (200/400) Est. 200 - 400
587	Colt Model 1908 Vest Pocket Hammerless Semi-Auto Pistol serial #387464, 25 ACP, 2 1/8" barrel with a mostly bright about good bore showing very light pitting throughout the otherwise strong rifling. The metal surfaces of this 1930-vintage pistol retain about 80% original blue with most of the loss on the slide which shows areas of light oxidation and cleaned light pitting toning to gray. The trigger and safeties retain a strong original case-hardened finish with the colors slightly muted on the face of the grip safety. The factory checkered walnut grips rate very good plus with some compressed points in the checkering. One Colt-marked two-tone magazine is included and the action appears to function well mechanically. (23A10574-217) {C&R} (250/350) Est. 250 - 350
588	Smith & Wesson 38 Single Action Third Model Revolver serial #4994, 38 S&W, 4" ribbed round barrel with a bright fine bore showing a few small patches of light oxidation in the otherwise strong rifling. The metal surfaces retain perhaps 60% original blue with the balance toning to a gray patina with overall light wear from the years, scattered light handling marks and speckles of light oxidation. The hammer, trigger and triggerguard are toning to a smoky-gray case-hardened patina also showing speckles of light oxidation. The factory checkered hard rubber grips rate about fine with areas of softened checkering; the right panel is properly scratch-numbered to the frame. The barrel is marked "MODEL OF 91", the barrel, latch and extractor are not numbered, and the cylinder is serialized to the receiver. Barrel-to-frame fit and timing and lock-up are all excellent and the action appears to function well mechanically. (23A10574-135) {ANTIQUÉ} (500/700) Est. 500 - 700

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
589	Smith & Wesson 38 Double Action Revolver serial #417497, 38 S&W, 3 1/4" ribbed round barrel with a bright about very good bore showing some scattered patches of light pitting in the otherwise strong rifling. The metal surfaces of this Fourth Model revolver retain about 70% original blue with the grip straps and cylinder flats toning to a gray patina along with some scattered fine flaking to a brown patina and minor high edge and operational silvering. The hammer and trigger retain most of their original smoky-gray case-hardened finish with the a few speckles of light oxidation on the face of the trigger and strong colors remaining throughout. The checkered hard rubber factory grips rate about excellent with a few light handling marks; the patent date remains mostly legible on the bottom of the left panel and the right panel is scratch-numbered to the frame. All the numbered parts are serialized to the gun, barrel-to-frame fit is excellent and timing and lock-up need attention. (23A10574-137) {C&R} (200/300) Est. 200 - 300
590	Smith & Wesson 38 Safety Hammerless Revolver serial #11895, 38 S&W, 3 1/4" ribbed round barrel with bright near excellent bore with a few spots of light oxidation in the otherwise strong rifling. The metal surfaces of this Second Model revolver retain about 65-70% original blue with the sides of the barrel, triggerguard, front strap, grip safety and bottom of the triggerguard toning to gray, a few scattered spots of light oxidation and scattered fine flaking to a pleasant brown patina. The trigger retains most of its original case-hardened finish with the face muting to gray and strong original colors remaining on the sides. The checkered hard rubber factory grips rate about excellent with a few light handling marks; the bottom of the left panel shows a crisp patent date and the right panel is correctly scratch-numbered to the frame. Barrel-to-frame fit and timing and lock-up are excellent, the cylinder resists removal, all the numbered parts are serialized to the frame and the action appears to function well mechanically. (23A10574-141) {ANTIQUE} (200/400) Est. 200 - 400
591	Smith & Wesson Model 48 Double Action Revolver serial #K361525, 22 Magnum, 6" pinned barrel with a bright excellent bore. The metal surfaces of this K-22 Masterpiece Magnum Rimfire revolver retain about 87-90% original blue with areas of wear toning to a gray patina on the sides of the barrel, knuckle, high edges and behind the triggerguard, scattered light handling marks and some speckles of light oxidation. The hammer and trigger retain nearly all their original case-hardened finish with some scattered spots of light oxidation. The factory diamond checkered walnut Magna grips rate about very good plus with some scattered light handling marks including a short hairline crack in the upper left edge of the left panel where it meets the front strap. The right grip panel is properly stamp-numbered to the frame, the original sights are intact, timing and lock-up are excellent and the action appears to function well mechanically. (23A10574-111) {C&R} (600/800) Est. 600 - 800
592	Smith & Wesson Military & Police Hand Ejector Revolver with Police Markings serial #C312175, 38 Special, 5" barrel with a bright excellent bore. The metal surfaces of this post-war revolver retain about 93-95% original blue with some scattered spots of light oxidation and light pitting along the barrel and on the top strap, light silvering on the high edges and some scattered light handling marks. The trigger and hammer retain a similar amount of original case-hardened finish with a bit of light muting to pewter-gray patina on the spur of the hammer and otherwise strong colors throughout. All the correct parts of the revolver are serialized to the frame. The diamond checkered walnut factory grips rate about very good with some scattered light handling marks including a small bruise at the heel of the right panel and a small sliver missing from the rear of the checkering border on the left panel; the right panel is properly stamp-numbered to the gun. The backstrap of the revolver is stamped "UPD 173". Timing and lock-up are excellent and the action appears to function well mechanically. (23A10574-156) {C&R} (300/500) Est. 300 - 500
593	Smith & Wesson No. 1 1/2 Single Action Revolver serial #50454, 32 S&W, 3" ribbed round barrel with a mostly bright about very good bore showing a few scattered areas of light pitting in the otherwise strong rifling. The metal surfaces retain about 90% original nickel finish with overall speckles of light oxidation, areas of light cloudiness and some spots of flaking to brown patina. The trigger is toning to gray, the barrel latch retains most of its original blue and the hammer retains most of its original case-hardened finish with some spots of light oxidation and some muting to pewter-gray patina on the spur. The checkered hard rubber factory grips rate about very good with a very tiny chip in the toe of the left panel and a few areas of softened checkering; the pencil number on the right panel is very faint and appears to be numbered to another revolver. Barrel-to-frame fit and timing and lock-up are excellent and the action appears to function well mechanically. (23A10574-116) {ANTIQUE} (300/500) Est. 300 - 500

Lot	Title/Description
594	Harrington & Richardson Young American Double Action Revolver serial #126040, 22 RF, 2" octagon barrel with a partially bright about good bore showing areas of light pitting and oxidation in the otherwise strong rifling. The metal surfaces retain about 95% original nickel finish showing overall mild cloudiness, light oxidation in the recesses of the cylinder and some light handling marks. The triggerguard retains about 50% original blue with light wear to gray patina and speckles of light oxidation. The trigger and hammer are toning to a light gray patina with speckles of light oxidation and trace original colors remaining on the right side of the hammer. The factory checkered hard rubber grips with crown motif rate about excellent. Timing and lock-up are excellent and the action appears to function well mechanically. (23A10762-47) {C&R} (75/150) Est. 75 - 150
595	Hopkins & Allen No. 6 Double Action Revolver serial #899, 38 S&W, 2 1/2" octagon barrel with a mostly bright about very good bore showing patches of light oxidation and light pitting in the otherwise strong rifling. The metal surfaces retain perhaps 95% original nickel finish showing scattered spots of cloudiness, some speckles of light oxidation on the cylinder and overall light handling marks. The trigger and hammer retain a similar amount of original case-hardened finish with the face of the trigger toning to gray and scattered speckles of light oxidation. The factory checkered hard rubber grips rate about excellent. The base pin retainer is missing its spring leaving the base pin uncaptured, timing and lock-up are excellent and the action appears to function well mechanically. (23A10762-44) {C&R} (75/150) Est. 75 - 150
596	Harrington & Richardson Automatic Ejecting Third Model Double Action Revolver serial #158311, 32 S&W, 3 1/4" ribbed round barrel with a mostly bright perhaps very good bore showing light pitting and scattered light oxidation throughout the otherwise strong rifling. The metal surfaces of this First Variation revolver retain about 70% original nickel finish which is showing overall minor cloudiness with the left side and bottom of the barrel along with the front strap showing wear to brown patina, scattered spots of light oxidation and a small area of cleaned light pitting on the right side of the barrel. The triggerguard retains about 90% original blue with scattered light oxidation. The checkered hard rubber factory grips with target logos rate very good with scattered light handling marks; the right panel is properly scratch-numbered to the frame. All the numbered parts are serialized to the frame and the hammer and potentially other parts are missing. (23A10762-54) {C&R} (50/100) Est. 50 - 100
597	Harrington & Richardson Vest Pocket First Model Double Action Revolver serial #691, 32 S&W, 1 1/8" round barrel with mostly bright about very good bore showing a few patches of light pitting and light oxidation in the otherwise strong rifling. The metal surfaces of this double action only revolver retain about 93-95% reapplied nickel finish showing some areas of light cloudiness with loss due to scattered speckles of pinprick pitting and light oxidation. The hammer retains most of its original case-hardened finish with some nice colors remaining in the protected areas. The checkered hard rubber factory grips with crown motif rate about excellent and the right panel is properly scratch-numbered to the frame. The top strap is marked "VEST-POCKET / SELF-COCKER", timing and lock-up are excellent and while the trigger return spring is broken, the action otherwise appears to function well mechanically. (23A10762-63) {C&R} (100/200) Est. 100 - 200
598	Ruger Standard Model Semi-Auto Pistol serial #200893, 22 LR, 4 3/4" barrel with a bright excellent bore. The metal surfaces of this 1961-vintage pistol retain about 98% original blue with loss due to a touch of high edge wear toning to gray on the front strap. The factory checkered Delrin grips with black and silver Phoenix medallion on the left panel rate about excellent. One original magazine is included and the action appears to function well mechanically. (23A10762-21) {C&R} (300/400) Est. 300 - 400
599	Hopkins & Allen XL Double Action Revolver serial #367, 32 RF, 2 1/4" octagon barrel with an oxidized bore. The metal surfaces retain about 90-93% original nickel finish with overall spots of wear toning to a brown patina and speckles of light oxidation. The unmarked checkered hard rubber grips rate about very good with a few light handling marks. The cylinder and base pin are missing and the action otherwise appears to function. (23A10762-55) {C&R} (25/75) Est. 25 - 75

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
600	Harrington & Richardson Automatic Ejecting Double Action Revolver serial #1558, 22 RF, 5" ribbed round barrel with a dark fair bore with scattered light pitting and oxidation throughout the rifling. The metal surfaces retain about 40-50% original nickel finish with the barrel toning to a lightly-oxidized brown patina along with scattered speckles of the same. The triggerguard is also toning to a lightly-oxidized brown patina with remnants of original blue in the protected areas. The factory checkered hard rubber grips with target logos rate about very good with areas of softened checkering and a few light handling marks; the grips appear to be scratch-numbered to another gun. The cylinder and barrel are numbered to the frame and the action is not functioning as various small parts are missing. (23A10762-69) {C&R} (25/75) Est. 25 - 75
601	Winchester Model 12 Slide Action Shotgun serial #1739686, 12 ga., 28" plain barrel choked full with a mostly bright about very good bore showing some stubborn wad fouling near the muzzle. The metal surfaces retain about 15% original blue located on the action slide while the balance has been cleaned to a gunmetal gray patina with scattered spots of light oxidation, areas of softened light pitting and scattered light handling marks. The forend is missing, the smooth walnut pistolgrip stock rates about good with a thick coat of added finish, a hairline crack behind the lower tang and overall minor dings and light handling marks. The checkered hard rubber buttplate rates perhaps good with a small chip at the toe and overall softened checkering and light handling marks; the attachment screws may be later replacements. The Winchester proofs are clear, the magazine tube support is serialized to the frame and the action appears to function well mechanically. (23A10455-510) {MODERN} (150/300) Est. 150 - 300
602	Winchester Model 12 Slide Action Shotgun serial #618481, 12 ga., 30" plain nickel steel barrel choked full with a bright very good plus bore showing a few very shallow dings visible in the bore near the muzzle. The metal surfaces retain about 70% original blue which is lightly thinning to blue-gray patina under bright direct light along the barrel, the magazine tube support and triggerguard are toning to gray and spots of light oxidation and high edge silvering throughout. The 18-groove forend and pistolgrip stock rate about very good with overall flaking finish on the forend and scattered short scratches and light handling marks throughout; the added Hawkins recoil pad provides a 13 3/4" length of pull. The Winchester proofs are clear, the magazine tube support is serialized to the receiver and the action appears to function well mechanically. (23A10455-468) {C&R} (200/400) Est. 200 - 400
603	Winchester Model 12 Slide Action Shotgun serial #1698748, 12 ga., 28" plain barrel choked modified with a bright excellent bore. The metal surfaces retain about 90-93% original blue with the triggerguard and area around the loading port toning to gray, scattered spots of cleaned light pitting on the receiver and overall speckles of light oxidation and light handling marks. The grooved walnut forend rates about very good with the finish worn toward the rear and a small chip in the rear edge. The smooth pistolgrip stock is structurally excellent but rates closer to very good with the finish worn along the toeline and front of the grip and scattered light handling marks. The Winchester proofs are crisp, the magazine tube support is serialized to the receiver and the action appears to function well mechanically. (23A10455-188) {C&R} (300/500) Est. 300 - 500
604	Winchester Model 12 Slide Action Shotgun serial #1107976, 12 ga., 30" plain barrel choked full with a bright near excellent bore. The metal surfaces retain about 75% original blue which is thinning along the barrel to a blue-gray patina, the breech of the barrel, the magazine tube support and the edges of the receiver are toning to gray and there are scattered light handling marks and speckles of light oxidation. The unfinished smooth walnut Monte Carlo pistolgrip stock with right hand palm swell rates about excellent, is proud around the receiver and needs only to be sanded and finished to provide excellent service; there is no buttplate. The grooved forend rates good to perhaps very good with a worn finish and some scattered dings and light handling marks. The Winchester proofs are clear, the magazine tube support is numbered to another shotgun and the action appears to function well mechanically. (23A10455-539) {MODERN} (200/400) Est. 200 - 400

Lot	Title/Description
605	Winchester Model 12 Slide Action Shotgun serial #1891388, 12 ga., 30" plain barrel choked full with a bright excellent bore. The metal surfaces retain about 97% original blue with the triggerguard toning to gray, light high edge and operational silvering and some scattered spots of light oxidation. The forend is missing and the smooth walnut pistolgrip stock rates about good with the buttplate missing, a small smoothed-over chip in the toe of the grip, a worn original finish and scattered light handling marks. The Winchester proofs are crisp, the magazine tube support is numbered to the receiver and the action appears to function well mechanically. (23A10455-378) {MODERN} (300/400) Est. 300 - 400
606	Winchester Model 12 Slide Action Shotgun serial #1332852, 12 ga., 30" plain barrel choked full with a bright very good plus bore with a very shallow dent in the right side of the barrel just visible in the bore. The metal surfaces retain about 50% original blue strongest along the barrel and action slide with the breech of the barrel, triggerguard, magazine tube and edges of the receiver toning to a dull gray patina along with overall spots of light oxidation and light handling marks. The forend is missing and the smooth walnut pistolgrip stock rates about very good as cleaned with an added finish and some scattered smoothed-over dings and light handling marks. The Winchester recoil pad has been shortened and the stock provides a 13" length of pull. The Winchester proofs are clear, the magazine tube support is numbered to the receiver and the action appears to function well mechanically. (23A10455-155) {MODERN} (150/300) Est. 150 - 300
607	Winchester Model 12 Slide Action Shotgun serial #1163723, 12 ga., 30" plain barrel choked full with a bright excellent bore. The metal surfaces retain about 85% original blue which is strongest along the barrel and magazine tube with the triggerguard and bottom of the magazine tube support and receiver toning to a gray patina, some light thinning to gray on the top of the receiver and breech of the barrel and scattered spots of light pitting and light oxidation. The forend is missing and the smooth walnut pistolgrip stock rates about very good with a coat of added finish, a thin 1 3/4" crack behind the lower tang running into the left side of the grip, a narrow dent in the toeline and a small chip in the toe of the grip. The added Pachmayr White Line pad provides a 13 3/4" length of pull. The Winchester proofs are crisp, the magazine tube support is numbered to the receiver and the action appears to function well mechanically. (23A10455-176) {MODERN} (200/400) Est. 200 - 400
608	Winchester Model 12 Slide Action Shotgun serial #1862226, 12 ga., 30" plain barrel choked full with a bright about excellent bore. The metal surfaces retain about 90% original blue which is lightly thinning along the barrel with the breech toning to a gray patina, some minor flaking to gray on the magazine band, a few areas of cleaned light pitting toning to gray on the left side of the barrel and above the ejection port and some scattered light handling marks. The checkered walnut forend rates about very good with a 1" abrasion on the underside and some dings around the front as the action slide sleeve screw cap is undersized for the forend. The factory checkered synthetic Hydro-Coil pistolgrip stock is missing the outer sliding part leaving the length of pull at 11 3/4". The Winchester proofs are crisp, the magazine tube support is matching the receiver and the shotgun will need mechanical attention as the action will not unlock. (23A10455-365) {MODERN} (200/400) Est. 200 - 400
609	Winchester Model 12 Slide Action Shotgun serial #1367470, 12 ga., 30" plain barrel choked full with a bright excellent bore. The metal surfaces retain about 85-90% original blue with the bottom of the triggerguard, receiver and magazine tube support toning to gray, a few spots toning to gray on the top of the receiver and some scattered spots of light oxidation, thin streaks of wear and handling marks along the barrel. The checkered walnut forend rates about very good plus with a worn finish and a few light handling marks while the pistolgrip stock rates good with a worn finish, the wood is shy around the lower tang and the gripcap and buttplate are missing. The Winchester proofs are crisp, the magazine tube support is numbered to the receiver and the action appears to function well mechanically. (23A10455-540) {C&R} (300/500) Est. 300 - 500

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
610	Winchester Model 12 Slide Action Shotgun serial #1662140, 12 ga., 30" plain barrel choked full with a bright excellent bore. The metal surfaces retain about 90% original blue with the underside of the receiver and magazine tube support toning to gray, areas of wear toning to gray and fine pinprick pitting on the front of the magazine tube and magazine clamp and scattered light handling marks. The triggerguard and shell lifter retain about 99% later added gray Parkerized finish with speckles of pinprick pitting beneath the finish and a spot of light oxidation above the safety. The replacement checkered hardwood forend rates about excellent. The smooth walnut pistolgrip stock is missing its buttplate and rates about very good showing overall moderate crazing and flaking of the finish and some light handling marks; the length of pull is 12 5/8". The Winchester proofs are crisp, the magazine tube support is numbered to the receiver and the action is stiff but appears to function well mechanically. (23A10455-364) {MODERN} (200/400) Est. 200 - 400
611	Winchester Model 12 Slide Action Shotgun serial #1853999, 12 ga., 30" plain barrel choked full with a bright excellent bore. The metal surfaces retain about 97% original blue with scattered speckles of light oxidation and light handling marks. The grooved walnut forend rates very good with some scattered light handling marks. The smooth walnut pistolgrip buttstock rates perhaps good the buttplate missing, a 5" chip missing from the end of the toe line and a 1 1/2" crack in the left side of the toe, a few scratches along the left side of the grip and a dent in the left side of the comb. "LARRY MEYER / RT 7 FL" is scratched on the left side of the buttstock, the Winchester proofs are clear, the magazine tube support is numbered to the gun and the action appears to function well mechanically. (23A10455-396) {MODERN} (200/400) Est. 200 - 400
612	Winchester Model 12 Slide Action Shotgun serial #954271, 12 ga., 30" plain barrel choked full with a bright about very good bore with a shallow dent in the left side of the barrel which is visible in the bore about 2 1/2" from the muzzle. The barrel, magazine tube support and receiver retain about 95% original gray Parkerized finish with scattered spots and streaks of lighter discoloration primarily along the right side of the barrel and some short scratches on the forward left edge of the receiver. The magazine tube and triggerguard retain about 75% original blue with loss due to operational silvering, light handling marks and some speckles of light oxidation and pinprick pitting on the triggerguard. The smooth walnut pistolgrip stock and grooved forend rate about very good with some scattered light handling marks from the field; the factory buttplate provides a 14" length of pull. The Winchester proofs are crisp, the magazine tube support is numbered to the gun, the brass bead sight is a replacement and the action appears to function well mechanically. (23A10455-466) {C&R} (300/500) Est. 300 - 500
613	Winchester Model 12 Slide Action Shotgun serial #610423, 12 ga., 32" plain nickel steel barrel with a bright excellent bore. The metal surfaces have aged to a blend of light and dark gray patina with overall minor operational and high edge silvering, scattered light handling marks and speckles of light oxidation and remnant streaks of original blue in the protected areas. The 18-groove walnut forend rates about very good with areas of finish wear and some scattered dings and light handling marks. The smooth walnut pistolgrip stock rates very good plus as cleaned and devoid of finish, it is shy of the metal at the receiver and has a light handling mark or two; the factory buttplate provides a 13 1/2" length of pull. The Winchester proofs are clear, the magazine tube support is numbered to the receiver and the action appears to function well mechanically. (23A10455-157) {C&R} (200/300) Est. 200 - 300
614	Winchester Model 12 Trap Slide Action Shotgun serial #405711, 12 ga., 28" ventilated rib nickel steel barrel choked full with a few small raised dents in the bottom of the barrel which are visible in the bore about 1 3/8" from the muzzle. The metal surfaces retain about 97% later-added gray Parkerized finish with pinprick pitting beneath the finish scattered throughout and a small area on both sides of the rear of the rib where a previous brazed repair tempered the metal an iridescent bronze patina. The repair has since failed and the rib shows a touch of play at both the muzzle and breech. The bolt and shell lifter remain bright and the offset Winchester proofs and other markings remain crisp. The checkered walnut forend and capped pistolgrip stock rate about very good with scattered light scratches and handling marks and a coat of added finish on the buttstock showing a slight orange peel texture. The furniture features rather striking grain figure throughout and the factory buttplate provides a 14" length of pull. The notches on the action slide sleeve screw cap shows some minor slot damage, the barrel is sighted with a silver bead at the muzzle and mid-rib and the action appears to function well mechanically. (23A10455-300) {C&R} (500/700) Est. 500 - 700

Lot	Title/Description
615	Winchester Model 12 Slide Action Shotgun serial #305748, 12 ga., shortened 24" solid rib barrel including the added Cutts compensator with a bright about very good bore showing a few small raised dings. The barrel retains about 98% later-added blue with some unobtrusive softened pinprick pitting beneath the finish and some streaks of operational wear near the receiver. The balance of metal surfaces retain about 65-70% original blue with the magazine tube, magazine tube support, triggerguard and top of the receiver toning to a gray patina with some light pitting on the top of the magazine tube support, and overall light handling marks and speckles of light oxidation on the sides of the receiver. The checkered walnut forend and capped pistolgrip buttstock rate about very good with some light dings along the toeline and the right side of the forend shows a small bruise in the checkering and a few light handling marks. The imperfectly-fit Remington recoil pad provides a 14" length of pull. The barrel is marked "CYL", there is no Winchester "WP" proof on the barrel and the magazine tube support is numbered to another shotgun. A Crowe safety lever has been added, the original bead at mid-rib is intact, a Lyman spreader choke tube is included and the action appears to function well mechanically. (23A10455-490) {C&R} (200/400) Est. 200 - 400
616	Winchester Model 12 Slide Action Shotgun serial #1312841, 12 ga., shortened 25 1/2" ventilated rib barrel including the added Cutts compensator with a bright about excellent bore. The metal surfaces retain about 85% original blue with the barrel near the compensator and the rear of the triggerguard toning to a gray patina, fine pinprick pitting along the sides of the barrel and scattered speckles of light oxidation. The top of the receiver is matted all the way to the buttstock, the barrel is marked "WS-1" and shows proper "WP" proofs which are crisp and the magazine tube support is numbered to the receiver. The 18-groove walnut forend rates very good with some scattered minor handling marks and a bit of finish wear on the sides. The smooth walnut pistolgrip stock rates very good with a missing buttplate (length of pull is 13"), scattered light handling marks and small spots of finish wear. The silver bead at mid-rib is intact, one Lyman spreader choke is included and the action appears to function well mechanically. (23A10455-373) {C&R} (300/500) Est. 300 - 500
617	Winchester Model 12 Slide Action Shotgun serial #1779994, 12 ga., 30" Simmons ventilated rib barrel choked full with a bright about excellent bore. The metal surfaces retain about 97% original blue with a small streak of wear toning to gray on the right edge of the triggerguard, some short scratches on the upper right side of the magazine tube support and some scattered light handling marks and speckles of light oxidation. The engine turned bolt and shell lifter are bright. The left side of the breech shows both Winchester "WP" and mail order proofs and the receiver is without a proof mark. The smooth walnut forend rates very good plus with a few scattered light handling marks. The smooth Monte Carlo pistolgrip buttstock with right hand palm swell and semi-rollover cheekpiece rates about very good with a few small bruises on the cheekpiece and scattered light handling marks. The buttstock features a contrasting wooden grip cap and the Decelerator pad provides a 14" length of pull. The barrel is sighted with a high-visibility red bead at the muzzle and a silver bead mid-rib, the magazine tube support is numbered to the receiver and the action appears to function well mechanically. (23A10455-313) {C&R} (500/700) Est. 500 - 700
618	Charter Arms AR-7 Explorer Semi-Auto Carbine serial #A229405, 22 LR, 16" barrel with a bright excellent bore. The metal surfaces retain about 99% original crinkle-coat black enamel finish with a light handling mark or two and the smooth black Cyaloc synthetic stock rates very good with some overall light handling marks. One original 8-round magazine is included and the action appears to function well mechanically. (23A10912-17) {MODERN} (100/200) Est. 100 - 200
619	Rogue Rifle Co. Chipmunk Bolt Action Youth Rifle serial #2387, 22 Magnum, 16 1/2" heavy barrel with a bright excellent bore. The barreled action retains about 99% original blue with a tiny spot of loss on the barrel toning to gray. The bolt is mostly bright showing some speckles of light oxidation. The smooth American black walnut Monte Carlo pistolgrip stock rates excellent with a few scattered and unobtrusive light handling marks; the length of pull is 11 1/2". This diminutive rifle is sighted with a Marbles No.8 white beaded blade and a receiver-mounted adjustable peep rear sight and the action appears to function well mechanically. (23A10912-13) {MODERN} (150/300) Est. 150 - 300

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
620	Thompson/Center Renegade Percussion Muzzleloading Rifle serial #6438, .54 cal., 30" octagon barrel with a 1:66" twist and a bright excellent bore. The metal surfaces of this excellent condition rifle retain about 99% original blue and case-hardened finishes with a few scattered very light handling marks. The smooth walnut straight grip halfstock rates near excellent with a few scattered light handling marks primarily near the toe. The barrel is marked on the right quarter-flat in riband "ROUND BALL-TWIST 1:66," the original sights and hardwood ramrod are intact, the double set triggers are functional and the action is strong and crisp. (23A10912-12) (ANTIQUÉ) (300/500) Est. 300 - 500
621	Savage-Stevens Model 620 Slide Action Shotgun 16 ga., 26" plain barrel including added PolyChoke with a bright excellent bore. The metal surfaces retain about 70% original blue which is lightly thinning along the barrel to a blue-gray patina with the triggerguard, magazine tube, area around the loading port and lower sides of the receiver toning to gray and scattered spots of light oxidation and light handling marks. The checkered walnut pistolgrip stock and forend rate about very good with a coat of added finish and some scattered light handling marks including a short crack in the left rear edge of the forend. The barrel is sighted with a brass bead mounted on the PolyChoke and while stiff the action appears to function well mechanically. (23A10912-9) (C&R) (150/300) Est. 150 - 300
622	Remington Model 870 Wingmaster Slide Action Shotgun with St. Clair Shores Police Markings serial #S100658V, 12 ga., 20" rifle-sighted barrel with a bright smooth bore. The metal surfaces retain about 75-80% original blue and black anodized finishes with overall minor operational and high edge silvering, some areas of wear toning to gray on the top and bottom of the receiver and on the underside of the barrel, and scattered spots of light oxidation and light handling mark from duty use. The bolt and shell lifter are bright and the checkered synthetic pistolgrip rates about very good plus with scattered light handling marks. The skeletonized folding stock locks up solidly in both positions with just a bit of play and is marked on the right side "FOR LAW ENFORCEMENT ONLY". The left side of the receiver is stamped "ST. CLAIR SHORES P.D. / CAR #69". The grooved walnut forend rates about good with a couple small but moderate chips around the rear edge and some other minor handling marks from use. The bottom of the forend features a bold incise-carved "69". There is a small chip in the top edge of the front sight blade which does not affect the sight picture and the action appears to function well mechanically. (23A10912-6) (MODERN) (300/500) Est. 300 - 500
623	Winchester Model 94 Lever Action Carbine serial #2741154, 30-30 Win, 20" barrel with full magazine and a bright excellent bore. The barrel and magazine tube of this 1964-production carbine retain about 97% original blue with a few spots of light oxidation on the magazine tube and a few light handling marks. The receiver has aged to a pewter gray-blue patina with some areas of mild flaking to brown patina and wear to gray around the carry point. The lever retains about 95-97% original blue with some speckles of light oxidation. The smooth walnut forend rates about very good plus with a few scattered light handling marks and the straight grip buttstock with shotgun buttplate rates very good with scattered light handling marks and areas of finish wear. The hooded front sight is intact, the rear sight dovetail has been filled with a slot blank and a Williams receiver sight with aperture has been installed. The action appears to function well mechanically. (23A10912-10) (C&R) (300/500) Est. 300 - 500
624	Sig Sauer P938 Semi-Auto Pistol serial #52B059114, 9mm, 3" barrel with a bright excellent bore. The metal surfaces retain about 99% original black Nitron finish and the added Hogue black rubber finger groove grips rate excellent. The pistol features ambidextrous safety levers, Siglite tritium night sights which continue to glow, factory plastic hard case, two factory stainless steel magazines (one 6-round, one 7-round), one Sig Sauer minimalist polymer triggerguard holster and cable lock with keys. The action appears to function well mechanically. (23A10912-3) (MODERN) (500/700) Est. 500 - 700

Lot	Title/Description
625	Ithaca NID Field Grade Boxlock Double Shotgun serial #434278, 20 ga, 26" barrels choked a tight modified and full, with bright very good bores with scattered light oxidation and a light ding in the left barrel about 8" from the muzzle. The barrels retain about 60% original blue with more moderate thinning and light wear scattered throughout, scattered light oxidation and spots of light pitting, and a few light handling marks. The case-hardened frame largely toned to a gray patina with overall light oxidation staining, retaining strong case-hardened colors in the protected areas around the fences, trigger, and lever, and shows some scattered light handling marks. The checkered pistolgrip walnut stock and splinter-style forend very good condition with a light impact mark on the toeline and a more moderate impact mark on the underside of the forend, a small circular repair on the side of the forend, a few scattered light dings and some handling marks. The metal markings are intact and clear, and the forend and barrels are numbered to the gun. The shotgun locks up tight and on-face, the lever coming to rest right of center, and features double triggers, an automatic safety, cocking indicators, 2 3/4" chambers, extractors, is sighted with a lone brass bead, and a 14" length of pull with drops of about 1 3/4" and 3". The shotgun appears to function well mechanically. (14A10574-62) (C&R) (400/600) Est. 400 - 600
626	Winchester Model 1912 Slide Action Shotgun serial #172262, 20 ga, 25 1/4" solid rib Poly-choked barrel with a very good plus bore with a few patches of light pitting. The receiver retains about 80% original blue toning lightly to plum with light wear on high edges and contact points, more moderate in the grasping area, and the barrel and magazine tube retain about 95% professionally reapplied blue with light operational wear, scattered previous light pitting beneath the finish, and a light handling mark or two. The checkered capped pistolgrip walnut stock is in very good to very good plus condition with an about 1 1/2" drying crack at the rear of the butt on the right side, a natural imperfection behind the pistolgrip, and a few minor handling marks; the long forend is in very good plus condition with some flattened points in the added diamond checkering, and the stock is fit with a Herter's ventilated recoil pad giving a 14" length of pull. The factory metal markings remain mostly clear and legible, softened in spots on the barrel and on the receiver extension, the barrel original choke marked "FULL", and the receiver extension is numbered to the gun. The shotgun is sighted with a ramped brass bead mounted to the Poly-Choke, which adjusts easily by hand, and the shotgun appears to function well mechanically. A solid small-bore Model 12 with years in the field ahead of it. (14A10593-3) (C&R) (250/450) Est. 250 - 450
627	Ithaca NID Field Grade Boxlock Double Shotgun serial #434071, 12 ga, 28" barrels choked a tight modified and full, with bright very good bores with scattered patches of light pitting, a raised ding about 9" from the right muzzle, and a light ding about 6" from the left muzzle. The barrels retain about 80% original thinning blue toning lightly to brown with light wear at the muzzles and spots along the sides, and a few light handling marks. The case-hardened frame has toned to gray patina with mottled overtones of brown, some of the high edges worn to pewter, and some light pitting on the edges of the fences. The custom checkered capped pistolgrip walnut stock and wrap-around beavertail forend are in very good plus condition with a repaired 1 1/4" crack on the right side of the forend, a 1 1/4" chip at the rear of the forend, and a minor handling mark or two; the Noshoc recoil pad shows a small chip at the toe and give a 14 1/2" length of pull with drops of about 1 3/8" and 2". Both forend and stock display wonderful grain figure throughout. The Ithaca hunting dog on the sides of the frame is lightened but still present, the barrel flat has been later stamped "3 INCH CHAMBERS", and the barrels and forend are numbered to the shotgun. The shotgun locks up with the left barrel off-face showing light between the breech and standing breech, the lever comes to rest at center, the chambers have been later lengthened to 3", and the shotgun features double triggers, a nonautomatic safety, cocking indicators, extractors, and is sighted with a brass bead front and small white bead mid rib; the shotgun appears to function well mechanically. A nicely stocked NID that should perform well on the trap range. (14A10574-65) (C&R) (400/600) Est. 400 - 600

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
628	Winchester Model 12 Slide Action Shotgun serial #1120749, 12 ga, 28" solid rib barrel choked modified but gauging improved modified, with a bright excellent bore showing stubborn wad residue at the muzzle. The metal surfaces retain about 85% original blue finish with light wear on the barrel, receiver, and magazine tube, fine striations on the both barrel and receiver, and a few light handling marks; the bolt and shell lifter are mostly bright with scattered gray freckling. The smooth pistolgrip walnut stock and grooved forend are in very good plus condition with some light finish flaking on the toeline and a few light handling marks, and the original Winchester buttplate is intact. The factory metal marking are intact and remain mostly clear, softened lightly in spots, and the receiver extension is numbered to the gun. The shotgun is sighted with a lone steel bead and appears to function well mechanically. (14A10574-48) (C&R) (300/500) Est. 300 - 500
629	Winchester Model 1897 Black Diamond Trap Slide Action Shotgun serial #607773, 12 ga, 30" plain barrel choked full, with a bright near excellent bore with patches of pinprick pitting and one or two light pits. The barrel retains about 45% original streaking blue with overall wear and toning to brown, light operational wear, and light handling marks, the remaining metal surfaces worn to a silvery gunmetal patina with generous remnants of blue in protected areas and light oxidation staining. The straight grip walnut stock and forend are in very good condition as cleaned with a light divot on the underside of forend, scattered light dings and handling marks, softened checkering on the forend, and bare remnants of checkering on the wrist; the Winchester buttplate is intact and a small black diamond is inlaid in the wrist. The factory metal markings are intact and clear, Winchester proofs present on both barrel and receiver, and the takedown extension is numbered to the gun; the bolt is unmarked. The shotgun is sighted with a flat brass bead and appears to function well mechanically. (14A10574-46) (C&R) (300/500) Est. 300 - 500
630	Custom Winchester Model 94 Lever Action Rifle serial #1079542, 30 W.C.F., 24" replacement Model 64 barrel with a few small spots of light pitting in an otherwise bright excellent bore. The barrel and half magazine retain about 96% original blue finish with a spot of light wear near the breech, light muzzle wear, and scattered light handling marks, and the 1931-manufactured receiver retains about 98% reapplied blue finish with a spot of light finish flaking on the right and a few specks of oxidation. The straight grip walnut stock and forend are in excellent condition as lightly refinish with a remnant of a light abrasion on the left side of the toeline, and a minor handling mark or two, the grooved steel buttplate retaining about 98-99% reapplied blue with light handling marks and some previous light pitting beneath the finish. The Winchester barrel markings remain crisp, no mail order "P" proof is present, and the receiver markings are slightly softened due to polishing. The rifle is sighted with a hooded ramped bead front sight and a "Climbing Lyman" receiver mounted rear sight, also showing a reapplied blue finish, and the rear sight dovetail filled with a slot blank; the rifle appears to function well mechanically. An attractive custom configured rifle, likely to perform well in the deer woods. (14A10777-30) (C&R) (400/600) Est. 400 - 600
631	Winchester Model 55 Lever Action Rifle serial #1072058, 30 W.C.F., 24" barrel with a button magazine and a very good bore with scattered light oxidation, a few light pits, but clear rifling throughout. The metal surfaces of this 1931-manufactured rifle retain about 98-99% reapplied blue finish with a light handling mark or two and scattered patches of previous light pitting beneath the finish. The smooth straight grip walnut stock and forend are in excellent condition as perhaps lightly refinished with a light handling mark on the underside of the forend, and the forend fits somewhat loosely between the receiver and forend cap. The factory metal markings remain largely intact with only light softening in spots, primarily the Winchester "WP" proofs which is now only partially visible on the barrel. The rifle is sighted with a tall bead-on-blade front sight and a sporting-style v-notch rear sight, and appears to function well mechanically. A refinished Model 55 that should still serve well. (14A10777-31) (C&R) (400/600) Est. 400 - 600

Lot	Title/Description
632	Custom DWM Model 1891 Bolt Action Sporter serial #U2269, 7.65 Argentine, 22" shortened barrel with a very good bore with scattered light oxidation but strong rifling throughout. The metal surfaces retain about 90% original blue finish with light wear on high edges and contact points, an area on the receiver ring cleaned to gun metal, and scattered old oxidation and handling marks throughout. The straight grip hardwood stock is in very good condition as shortened at the forend and showing an older refinish, with some scattered light dings and handling marks and the rear of the receiver slightly proud of the stock; a faint Argentine proof is present on the toeline and the stock is fit with sling swivels. The original factory markings are mostly intact, the Argentine crest obliterated and the caliber lightly stamped in its place but with no other import mark evident, the barrel and bolt are numbered to the rifle, and the magazine floorplate is numbered to another gun. The original rear sight is retained and the rifle is fit with a ramped bead front sight, and appears to function well mechanically. (14A10885-1) (MODERN) (200/300) Est. 200 - 300
633	Custom Steyr K98k Bolt Action Sporter serial #5386b, 8mm Mauser, 24" barrel with a very good bore showing scattered light oxidation but strong rifling throughout. The barreled action has largely toned to a gray-brown patina with some strong blue remaining on the left side of the receiver, light wear on high edges, scattered oxidation, and some light handling marks, and the bottom metal retains about 97% professionally reapplied blue finish with speckled light oxidation. The pistolgrip hardwood stock is in very good condition as shortened at the forend, with a thumbnail-size chip at the heel of the recontoured butt, a few hairline cracks at the rear of the receiver, and scattered light dings and handling marks; the stock has no buttplate giving a 13" length of pull and features a subtle left-side cheekpiece, reshaped pistolgrip, and added QD sling studs. The "bnz. / 4" coding remains intact, the "77" waffenamts are softened in spots and clear in others, and the numbered parts are matching to the rifle. The original rear sight is intact, as is the front sight base, and a bead front sight has been added; two added wholes are present on the side of the rear receiver ring, filled with synthetic filler. The rifle appears to function well mechanically. (14A10885-2) (MODERN) (250/450) Est. 250 - 450
634	Winchester Model 12 Slide Action Shotgun serial #1420451, 12 ga, 30" plain barrel choked full with a bright very good plus bore with a few very light dings about 3" from the muzzle. The metal surfaces of this 1952-manufactured shotgun retain about 60% original blue, the balanced toned to a silvery gunmetal patina, with thinning on the barrel, a spot or two of old oxidation, and some light handling marks. The smooth pistolgrip walnut stock and grooved forend are in very good condition with moderate finish loss and scattered light dings and abrasions, the concentration being on the butt, and the stock is fit with a Pachmayr ventilated recoil pad giving an about 14 3/4" length of pull. The original metal markings are intact and crisp, and the receiver extension is numbered to the shotgun. Th shotgun is sighted with a lone steel bead and appears to function well mechanically. (14A10455-134) (C&R) (200/300) Est. 200 - 300
635	Winchester Model 12 Slide Action Shotgun serial #736679, 12 ga, 30" plain barrel choked full with a bright excellent bore. The metal surfaces of this 1936-manufactured shotgun retain about 75-80% original blue with moderate wear and light thinning of the finish primarily on the top and bottom of the receiver and the breech area of the barrel, light muzzle wear, and scattered light handling marks along the barrel; the bolt and shell lifter are mostly bright with light oxidation staining. The smooth pistolgrip walnut stock and grooved forend are in very good condition moderate finish loss on the forend, scattered spots of fabric patterning in the added finish on the butt, and some scattered light dings and handling marks; the stock is fit with a Hawkins ventilated recoil pad giving a 13 5/8" length of pull. The factory markings are intact and clear, and the receiver extension is numbered to the gun. The shotgun is sighted with a lone steel bead and appears to function well mechanically. A solid rainy-day shotgun. (14A10455-160) (C&R) (200/300) Est. 200 - 300

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
636	Winchester Model 12 Slide Action Shotgun serial #1109132, 12 ga, 30" plain barrel choked full with a bright very good bore with a light to perhaps more moderate ding about 10 1/2" from the muzzle, a few other smaller light dings, and some small spots of pinprick pitting. The metal surfaces retain about 60% original blue with moderate wear to gunmetal on the receiver, receiver extension, and breech area of the barrel, light muzzle wear, and light handling marks scattered along the barrel; both bolt and shell carrier show light gray freckling. The smooth pistolgrip walnut stock is in good condition with lightly repaired long cracks in the wrist, the longest measuring 6", a repaired chip to the toe of the buttplate, some added finish on the wrist, and scattered light handling marks; the grooved forend is in very good condition with moderate finish wear, a small chip at the right rear, and some light dings and handling marks. The Winchester barrel address remains clear, the "WP" Winchester proofs are softened and near illegible on the receiver, and the receiver extension is numbered to the shotgun. The shotgun is sighted with a lone steel bead and appears to function well mechanically. (14A10455-501) (C&R) (150/300) Est. 150 - 300
637	Winchester Model 12 Slide Action Shotgun serial #1338912, 12 ga, 30" Simmons ventilated rib barrel choked full with a very good plus bore with a very light ding on the underside about 7" from the muzzle and some light oxidation near the muzzle. The metal surfaces of this 1950-vintage shotgun retain about 70% reapplied blue finish with light to more moderate in spots wear on high edges and contact points, old light oxidation and oxidation staining, scattered light handling marks, and previous light pitting beneath the finish. The bolt and shell carrier shows light oxidation staining and scattered light pitting. The smooth pistolgrip walnut stock is in about very good condition with three tight cracks in the wrist, each measuring between 2" and 3", an about 1/2" chip behind the triggerguard, scattered light handling marks, and an added Monte Carlo-style raised comb; no buttplate is present leaving an about 13 1/4" length of pull. The grooved forend is in very good condition with light wear on the finish and a few light handling marks. The factory barrel address remains clear, no "WP" Winchester proofs are visible on the barrel and receiver, and the receiver extension is numbered to the gun with both serial numbers softened but legible. The shotgun is sighted with a red bead and appears to function well mechanically. (14A104555-360) (C&R) (150/250) Est. 150 - 250
638	Winchester Model 12 Slide Action Trap Shotgun serial #Y2007418, 12 ga, 30" ventilated rib barrel choke marked full but gauging a tight modified, with a bright excellent bore. The barrel and magazine retain 98-99% original blue finish with a light handling mark or two, the reapplied blue of the receiver has toned to plum with a few remnants of blue tone in the protected areas, a minor handling mark or two, and a few very small spots of previous light pitting beneath the finish; the bolt and shell carrier are nicely jeweled. The checkered pistolgrip hardwood stock is in very good condition with scattered light dings and abrasions, primarily on the right side, and the checkered long forend is in excellent condition; the checkered hardrubber Winchester buttplate is slightly shy of the stock at the sides and proud at the toe. The Winchester barrel address remains crisp, the shotgun showing correctly offset "WP" proofs with the receiver proof softened but legible, and the receiver extension is numbered to the gun. The shotgun is sighted with a white bead front and a small steel bead midrib, and appears to function well mechanically. A restored Model 12 that should perform well at the range or in the field. (14A10455-283) (MODERN) (300/500) Est. 300 - 500
639	Custom Winchester Model 12 Trap Slide Action Shotgun serial #1338175, 12 ga, 30" Simmons ventilated rib barrel choked full with a bright very good plus bore with scattered patches of light pitting. The metal surfaces retain about 98-99% professionally reapplied blue finish with some minor operational wear, a few minor handling marks, and some previous pinprick pitting beneath the finish; the bolt and shell carrier are bright with a spot or two of light pitting. The custom thumbhole stock and long forend are in near excellent condition with a light handling mark or two and some spots of very light fabric patterning in the glossy finish. The stock is fit with a ventilated recoil pad giving an about 14 1/8" length of pull and features a left-side cheekpiece and wonderful grain figure throughout. The Winchester barrel address remains intact, no Winchester "WP" proofs are present, and the receiver extension is numbered to the gun. The shotgun is sighted with dual white beads and appears to function well mechanically. A customized Model 12 that should perform as well as it looks. (14A10455-294) (MODERN) (400/600) Est. 400 - 600

Lot	Title/Description
640	Winchester Model 12 Slide Action Shotgun serial #1053209, 12 ga, 32" ventilated rib barrel choked full with a bright excellent bore. The metal surfaces retain about 98-99% professionally reapplied blue with a few remnants of light handling marks and hints of previous light pitting beneath the finish, and the bolt and shell carrier are bright with pinprick pitting and gray freckling. The smooth pistolgrip Monte Carlo-style walnut stock and long forend are in very good plus condition with scattered remnants of light handling marks and is fit with a Morgan adjustable buttplate giving an about 14 1/4" length of pull. The barrel address remains easily legible with only minor softening, no "WP" proofs are visible, and the receiver extension is numbered to the gun; the wide rib appears unmarked. The shotgun is sighted with white bead front and a small steel bead mid rib, and appears to function well mechanically. (14A10455-502) (C&R) (350/550) Est. 350 - 550
641	Winchester Model 12 Slide Action Shotgun serial #1470854, 12 ga, 30" Simmons ventilated rib barrel choked a loose full with stubborn wad residue at the muzzle in an otherwise bright excellent bore. The metal surfaces retain about 99% professionally reapplied blue with a few scattered light handling marks and some hints of previous light pitting beneath the finish, the bolt and shell carrier remain bright with a few light pits. The custom pistolgrip walnut stock and long forend are in very good plus condition with a light nick on the underside of the pistolgrip, scattered light handling marks, and a spot of paint transfer on the forend. The stock features an adjustable comb, flared left-side cheekpiece, and is fit with a Pachmayr ventilated recoil pad giving a 14 1/4" length of pull, and the forend features a red-bordered yellow sticker reading "RELEASE / TRIGGER / ALLEN TIMNEY / (phone number)"; both show attractive grain figure. The barrel address is intact with only slight softening, no Winchester "WP" proofs are visible, and the receiver extension is numbered to the gun. The shotgun is sighted with a fiber optic front, the fiber optic partially broken and loose in its threading, and a small white mid rib. The release trigger appears to function well mechanically and the safety has been removed. A solid shotgun for the trap shooting enthusiast. (14A10455-492) (C&R) (300/500) Est. 300 - 500
642	Winchester Model 12 Slide Action Shotgun serial #1853959, 12 ga, 30" Simmons ventilated rib barrel choked full with a very good bore showing minor oxidation the second half of the bore. The metal surfaces retain about 90% reapplied blue with areas of light oxidation and oxidation staining, primarily around the ventilated rib, previous light pitting beneath the finish, and light handling marks; the bolt and shell carrier are bright with some light pitting. The smooth pistolgrip Monte Carlo-style walnut stock and long forend are in very good condition as cleaned with remnants of grain cracking on the face of the pistolgrip, a few light handling marks, the receiver proud of the wrist, and an added finish. The barrel address is only partially visible, no Winchester "WP" proofs are visible, and the receiver extension is numbered to the gun. The shotgun is sighted with a lone bead front sight, the safety has been reversed and enlarged for left-hand use, and appears to function well mechanically. (14A10455-192) (C&R) (150/300) Est. 150 - 300
643	Winchester Model 12 Slide Action Shotgun serial #1701331, 12 ga, 29" plain barrel including the adjustable Poly-Choke, with a bright excellent bore. The metal surfaces retain about 95% original blue with light wear on high edges and contact points, scattered light wear marks on the barrel, and some scattered light handling marks and hints of pinprick pitting; the bolt and shell carrier remain bright. The smooth pistolgrip walnut stock and grooved forend are in very good plus condition with a couple fine cracks in the pistolgrip, some scattered light finish wear, and a few light handling marks; the stock is fit with a Pachmayr ventilated recoil pad giving an about 14 7/8" length of pull. The Winchester barrel address and "WP" proofs are intact and crisp, and the receiver is numbered to the gun. The shotgun is sighted with a lone brass bead, the Poly-Choke adjusts easily by hand, and the shotgun appears to function well mechanically with the safety somewhat stiff. A solid all-around Winchester shotgun. (14A10455-137) (C&R) (200/400) Est. 200 - 400

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
644	Winchester Model 12 Slide Action Shotgun serial #1908005, 12 ga, 30" plain barrel choked full with a bright excellent bore. The metal surfaces retain about 92% original blue with light wear on high edges and contact points, the receiver extension thinning and toning to brown under direct light with generous remnants of blue in the protected areas, some fine pitting on the triggerguard bow, scattered small spots of light oxidation, and fine freckling and light handling marks. The smooth pistolgrip walnut stock and grooved long forend are in very good condition with an about 1/2" tight crack on the underside of the pistolgrip, scattered light abrasions and light dings, and an added glossy finish; the stock is fit with a White Line ventilated recoil pad in about very good condition showing some drying cracks and flaking, giving an about 13 1/4" length of pull. The Winchester barrel address and Winchester proofs remain crisp, and the receiver extension is numbered to the gun. The shotgun is sighted with a lone steel bead and appears to function well mechanically. (14A10455-292) (C&R) (200/400) Est. 200 - 400
645	Winchester Model 12 Slide Action Shotgun serial #1228336, 12 ga, 30" plain barrel choked full with a bright excellent bore. The metal surfaces retain about 97-98% original blue with some very light wear on high edges and contact points, a few light handling marks, and a few minor hints of oxidation staining. The smooth pistolgrip walnut stock and grooved forend are in very good plus condition with a light abrasion on the underside of the forend, scattered light handling marks, and an added finish on the buttstock; the stock is fit with a ventilated recoil pad giving an about 13 1/8" length of pull. The Winchester barrel address and "WP" proofs are intact and crisp, and the receiver extension is numbered to the gun. The shotgun is sighted with a lone steel bead and appears to function well mechanically. A solid 1950's vintage shotgun. (14A10455-522) (C&R) (200/400) Est. 200 - 400
646	Winchester Model 12 Slide Action Shotgun serial #1579939, 12 ga, 27" ventilated rib barrel including 4 3/4" Cutts compensator, with a bright excellent bore. The metal surfaces retain about 96% original blue with light wear on high edges and contact points, scattered small spots of oxidation loss and pinprick pitting, and some light oxidation staining; the bolt and shell carrier are bright with a few touches of freckling. The checkered pistolgrip walnut stock and long forend are in very good plus condition with a few light abrasions on the butt, spots of light finish wear, and some light handling marks and softening of the checkering; the stock is fit with a ventilated recoil pad giving a 14" length of pull. The barrel address remains crisp, the shotgun originally choke marked "WS-1", the correctly offset "WP" proofs are intact and clear, and the receiver extension is numbered to the gun. The shotgun is sighted with a white bead front and small steel bead mid rib, and appears to function well mechanically. (14A10455-290) (C&R) (200/400) Est. 200 - 400
647	Winchester Model 12 Slide Action Shotgun serial #1369714, 12 ga, 20" shortened barrel choke marked full but now gauging improved cylinder with a bright excellent bore. The barrel retains about 97% original blue toning to plum with some scattered light finish wear and specks of oxidation, the magazine tube, hanger, and action bar have worn to a gray-brown patina, the triggerguard has toned largely to a bronze patina with strong remnants of blue inside the bow and hints of pinprick pitting, and the receiver retains about 90% original blue with high edge wear, freckling, speckled hardened oil on the left, and some light handling marks and specks of cleaned oxidation; four drilled and tapped holes have been added to the left-top side of the receiver. The smooth pistolgrip walnut stock and grooved forend are in very good condition as lightly cleaned with a few light handling marks and is shy of the receiver at the wrist, and a White Line ventilated recoil pad is amateurly fit to the stock, giving an about 13 3/8" length of pull. The factory markings remain clear and legible, the receiver extension is numbered to another gun, and the shotgun is sighted with a lone steel bead and is equipped with a rotary safety; the shotgun appears to function well mechanically. (14A10455-133) (C&R) (200/300) Est. 200 - 300

Lot	Title/Description
648	Winchester Model 12 Slide Action Shotgun serial #571708, 12 ga, 30" nickel steel plain barrel choked full with a bright excellent bore. The barrel retains about 92% original blue finish showing overall thinning, greater nearer the muzzle, scattered light oxidation, and some light wear and handling marks; the magazine tube shows moderate operational wear and the receiver extension light handling marks and finish flaking. The receiver has worn to a pewter gray patina with spots of old oxidation and oxidation staining, remnants of original blue, and some fine striations visible on closer inspection; the bolt and shell carrier are mostly bright with scattered gray freckling. The checkered pistolgrip Monte Carlo stock, likely a later replacement, is in very good plus condition with a few scattered light dings and handling marks and no buttplate is present, and the grooved forend is in very good plus condition with a few light handling marks and an older added finish; the stock features an about 13 1/8" length of pull. The factory markings remain intact and clear, and the receiver extension is numbered to the gun. The shotgun is sighted with a lone steel bead and appears to function well mechanically. (14A10455-148) (C&R) (200/300) Est. 200 - 300
649	Custom Winchester Model 12 Slide Action Trap Shotgun serial #844845, 12 ga, 30" Simmons ventilated rib barrel choked full with a bright excellent bore. The metal surfaces of this 1939-manufactured shotgun retain about 97% professionally reapplied blue with light operational wear on the barrel, a touch of muzzle wear, and areas of previous light pitting beneath the finish, primarily at the carry point; the bolt and shell carrier are bright with very light oxidation staining and hints of pinprick pitting. The checkered straight grip walnut stock is in very good condition with a pair of very small chips at the bottom edge of the wrist where it meets the receiver, a few light handling marks, and some fabric patterning in the added glossy finish; a 1" Pachmayr recoil pad is mounted to the stock, not yet fit and remaining quite proud at the heel and toe, giving an about 13 1/8" length of pull. The smooth long forend is in very good plus condition with a light abrasion on the left side of the forend nose and a more subdued added finish. The factory markings are softened but intact, the Winchester "WP" proof concealed beneath the added Simmons rib, a "W" is stamped at the head of the loading port, and the receiver extension is numbered to the gun. The shotgun is sighted with a white bead front and small steel bead mid rib, and appears to function well mechanically. A customized Model 12 that should still serve well at the range or in the field. (14A10455-520) (C&R) (300/500) Est. 300 - 500
650	Custom Winchester Model 12 Slide Action Shotgun serial #166136, 12 ga, 30" plain barrel choked full with a bright excellent bore. The metal surfaces of this 1917-manufactured shotgun retain about 95% professionally reapplied blue finish with speckled finish loss on the high edges and top of the receiver, the blue of which is toning slightly plum, a spot or two of freckling, some light handling marks, and some easily missed previous light pitting beneath the finish; the bolt and shell carrier are mostly bright with light operational wear and gray freckling. The custom pistolgrip laminate hardwood Monte Carlo stock and smooth long forend are in very good condition with a 3" crack in the underside of the forend, a fine 3/4" crack on the underside of the wrist, a ding on the edge of the flared pistolgrip cap, an about 1" neatly added triangular patch at the top of the wrist and a few light handling marks; no buttplate is present giving an about 12 3/4" length of pull. The stock features a semi-rollover left side cheekpiece and shows an attractive alternating light and dark coloring to the laminate stock. The factory markings are intact and clear, the receiver extension neatly renumbered to match the gun, and the top of the receiver has been drilled and tapped twice. The shotgun is sighted with a lone steel bead and appears to function well mechanically. (14A10455-247) (C&R) (200/400) Est. 200 - 400
651	Winchester Model 12 Slide Action Trap Shotgun serial #441726, 12 ga, 30" ventilated rib barrel choked a loose full with a bright near excellent bore with a spot or two of very light oxidation. The metal surfaces retains about 80% reapplied blue with the right side of the receiver worn to a gunmetal gray, light wear on high edges and contact points, thinning along the barrels, scattered oxidation staining, and previous light pitting beneath the finish; the bolt is bright with light operational wear and the shell carrier is lightly jeweled with light oxidation staining. The custom smooth pistolgrip walnut stock is in very good condition as lightly cleaned with a few tight cracks in the wrist, a few light handling marks, and some minor flaking of the added glossy finish; the stock is amateurly fit with a Jenkins recoil pad with yellow spacer, giving an about 14 1/2" length of pull, and shows some attractive grain figure on the right side of the butt. The factory markings are softened but largely intact, no Winchester "WP" proofs are visible, and the receiver extension is numbered to the gun. The shotgun is sighted with dual white beads and appears to function well mechanically. (14A10455-506) (C&R) (250/450) Est. 250 - 450

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
652	Winchester Model 12 Slide Action Shotgun serial #1118474, 12 ga, 30" plain barrel choked full with numerous light dings scattered about and a bulge about midbore. The barrel, magazine tube, and receiver extension retain about 97-98% professionally reapplied blue with light oxidation staining on the magazine tube, a few light handling marks, and some easily missed previous pinprick pitting beneath the finish, and the receiver retains about 85% original blue with light wear on high edges and contact points, light handling marks, and a few spots of light oxidation staining; the bolt and shell carrier show light oxidation staining but otherwise remain mostly bright. The checkered capped pistolgrip walnut Monte Carlo stock is in very good condition with a light abrasion at the toe, two light impact marks on the wrist, some light finish wear, and light handling marks; the stock is fit with a Pachmayr ventilated recoil pad giving an about 14 1/4" length of pull. No forend wood is present. The factory markings are intact and largely crisp, the receiver extension perhaps having been renumbered to the gun. The shotgun is sighted with a lone steel bead and appears to function well mechanically. A solid Model 12 needing only a replacement forend. (14A10455-460) {MODERN} (150/300) Est. 150 - 300
653	Winchester Model 12 Slide Action Shotgun serial #1318683, 12 ga, 30" plain barrel choked full with a ding about 11" from the muzzle in an otherwise bright excellent bore. The metal surfaces of this 1950's shotgun retain about 97% reapplied blue with light muzzle wear, light oxidation on the barrel, a few spots of light pitting on the barrel, some light handling marks, and previous pinprick pitting beneath the finish throughout; the bolt and shell carrier are bright with traces of oil staining and pinprick pitting. The smooth pistolgrip walnut stock is in very good condition with a 1" tight crack on the underside of the wrist, a few light handling marks, and scattered small spots of flaking of the glossy finish, and no buttplate is present giving a 13 1/4" length of pull; no forend wood is present. The factory markings are intact and crisp, the matching serial numbers on the receiver extension and receiver curiously done with two different factory fonts. The shotgun is sighted with a lone steel bead, the safety is stiff but functional, and the shotgun appears to function well mechanically. (14A10455-329) {MODERN} (150/300) Est. 150 - 300
654	Winchester Model 12 Slide Action Shotgun serial #890096, 12 ga, 30" plain barrel choked full with a bright very good plus bore with a light ding about 3" from the muzzle and some stubborn wad residue. The barrel has toned lightly to plum retaining about 75-80% original blue with scattered light wear and light handling marks throughout, the receiver retains about 80-85% original blue with wear on the high edges and contact points, light thinning, and scattered light handling marks, and the triggerguard has worn to pewter gunmetal patina with remnants of blue in the triggerguard bow; the bolt and shell carrier are bright with light oxidation staining. The smooth pistolgrip walnut stock is in about very good condition with some cracks in the wrist, one more moderate crack measuring 2 3/4", a tiny chip at the toe, a few spots of fabric patterning in the added finish, and light dings and handling marks throughout; no forend wood or buttplate are present, giving an about 13 1/4" length of pull. The factory markings remain intact and easily legible, and the receiver extension is numbered to the gun. The shotgun is sighted with a lone steel bead and appears to function well mechanically. (14A10455-138) {MODERN} (150/300) Est. 150 - 300
655	Custom Winchester Model 12 Trap Slide Action Shotgun serial #930176, 12 ga, 30" raised ventilated barrel choked full with a bright excellent bore. The metal surfaces retain about 95% professionally reapplied blue, the loss due to the triggerguard which has worn to gunmetal gray with oxidation staining, the remaining surfaces showing fine polishing marks and the magazine hanger has toned to plum. The custom checkered capped pistolgrip walnut stock and forend are in very good condition with an about 2" crack on the side of the wrist, a small abrasion at the rear edge of the forend, and some light handling marks; the stock is fit with a White Line ventilated recoil pad giving a 14 1/4" length of pull. The stock features an adjustable comb, a fancy gripcap with jade insert, and fine grain figure on both forend and stock with attractive feathercrotch figure at the heel. The factory markings are softened but intact, no Winchester "WP" proofs are visible, and the receiver extension is numbered to the gun. The ventilated rib slopes up to about 3/4" high about 4" from the receiver and is sighted with a red fiber optic front and small white bead mid rib, and the shotgun appears to function well mechanically. An interesting trap-configured Model 12. (14A10455-89) {C&R} (300/500) Est. 300 - 500

Lot	Title/Description
656	Winchester Model 12 Slide Action Shotgun serial #1447869, 12 ga, 30" plain barrel choked full with a bright excellent bore. The metal surfaces of this 1950s-made shotgun retain about 92% original blue with light wear on the high edges and contact points, some scattered spots of cleaned oxidation, and scattered light handling marks; the bolt and shell carrier are mostly bright with spots of light oxidation staining. The smooth pistolgrip walnut stock and grooved forend are in very good condition with a light abrasion on the wrist, a shallow chip at the toe, spots of light finish wear, and scattered light handling marks; no buttplate is present, giving a 13 3/4" length of pull. The factory markings are intact and crisp, and the receiver extension is numbered to the gun. The shotgun is sighted with a lone steel bead and appears to function well mechanically. A solid shotgun needing only your choice of buttplate or recoil pad. (14A10455-499) {C&R} (200/400) Est. 200 - 400
657	Winchester Model 12 Slide Action Shotgun serial #638418, 12 ga, 32" solid rib barrel choked full with a bright very good plus bore with a patch or two of light oxidation. The metal surfaces of this 1930-manufactured shotgun retain about 92-95% original blue with spots of flaking finish loss on the receiver and receiver extension showing minor oxidation staining, thinning on the barrel, operational wear on the magazine tube, and scattered light handling marks and specks of lightly cleaned oxidation; the bolt and shell carrier remain largely bright with minor gray freckling. The smooth pistolgrip walnut stock and long forend are in very good plus condition as refinished with a light abrasion on the underside of the pistolgrip, a lightly flexing 3/4" crack on the left rear of the forend, scattered minor dings and light handling marks, and a spot or two of light finish wear on the forend. The stock is fit with a Morgan-style adjustable buttplate with Pachmayr White Line ventilated recoil pad, giving an about 14 1/4" length of pull. The factory markings are intact, the barrel showing a correctly offset Winchester "WP" proof, and the receiver extension is numbered to the gun. The solid rib is nicely matted, the shotgun is sighted with a lone white bead, and appears to function well mechanically. A lightly customized Model 12 that should still perform well today. (14A10455-124) {C&R} (300/500) Est. 300 - 500
658	Winchester Model 12 Slide Action Shotgun serial #1549499, 12 ga, 30" plain barrel choked full with a bright very good plus bore with some scattered light pitting nearer the muzzle. The metal surfaces of this 1953-manufactured shotgun retain about 97% reapplied blue finish with light wear on high edges and contact points, a few scattered spots of wear, a light handling mark or two, and a few spots of previous light pitting beneath the finish; the bolt and shell carrier are bright with light operational wear and light pitting on the bolt, and a few specks of gray freckling on the carrier. The smooth pistolgrip walnut stock and grooved forend are in very good condition with a 1 3/4" and 3 1/2" cracks in the wrist, light abrasions on the underside of the pistolgrip and along the toeline, and some shallow chips and a crack on the forend; the original Winchester buttplate is intact showing overall light wear. The factory markings are softened but largely still visible, except for the Winchester "WP" proofs which have been nearly polished off, and the receiver extension is numbered to the gun. The shotgun is sighted with a lone steel bead and appears to function well mechanically. (14A10455-473) {C&R} (150/300) Est. 150 - 300
659	Custom Winchester Model 12 Skeet Slide Action Shotgun serial #1206518, 12 ga, 26 1/2" overall ventilated rib barrel with 4 5/8" Cutts Compensator and a bright excellent bore. The metal surfaces of this 1948-manufactured shotgun retain about 95% original blue with light wear on high edges and contact points, light thinning in the grasping area, and scattered light wear on the barrel, and some scattered minor handling marks. The checkered capped pistolgrip walnut stock and long forend are in very good to perhaps very good plus condition with a light linear ding on the right side checkering of the pistolgrip, a few scattered flattened points of checkering, and some minor dings and light handling marks scattered along the butt; the original Winchester hardrubber buttplate is intact with a very small divot at the toe and some overall light wear. The factory markings are intact and easily legible, showing correctly offset Winchester "WP" proofs and a clear "VS-1" choke marking, and the receiver extension is numbered to the gun. The shotgun is sighted with dual steel beads, the matted pattern of the rib continuing to the rear of the receiver, and the shotgun appears to function well mechanically. The Cutts compensator includes a single spreader choke. An attractive Winchester Model 12 Skeet, lightly modified with a Cutts compensator. (14A10455-486) {C&R} (300/500) Est. 300 - 500

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
660	<p>Custom Winchester Model 12 "Trap" Slide Action Shotgun serial #1382115, 12 ga, 30" Simmons ventilated rib barrel choked full with a bright very good plus bore with scattered patches of light pitting. The barrel and receiver retain about 97% professionally reapplied blue with some light wear on high edges and contact points, scattered light oxidation, and some minor handling marks, the magazine tube appears to have toned largely to gunmetal gray, and the triggerguard has worn to gray with perhaps more moderate oxidation staining; the bolt is polished bright with a touch of operational wear. The custom pistolgrip walnut Monte Carlo stock is in very good condition as likely lightly cleaned and refinished with a neatly repaired crack through the middle of the forend, a few light abrasions primarily on the raised edges, and the triggerguard tang is quite proud of the wrist. The stock is fit with a Pachmayr White Line ventilated recoil pad, proud at the heel and the spacer showing a few drying cracks, giving an about 14 3/8" length of pull, a gripcap with two white line spacers, features a roll-over left side cheekpiece, and both forend and stock display lovely grain figure especially on the right side of the butt. The barrel address is intact, the Simmons maker mark on the rib is inconsistent, no Winchester "WP" proofs are visible, and the receiver extension is numbered to another gun. The shotgun is sighted a green fiber optic front and a small white bead mid rib, and appears to function well mechanically. An attractive Model 12 for the trap range. (14A10455-116) {C&R} (300/500) Est. 300 - 500</p>
661	<p>Winchester Model 12 Slide Action Shotgun serial #829565, 12 ga, 30" plain barrel choked full with a bright very good bore with scattered patches of light pitting. The metal surfaces of this 1939-made shotgun retain about 75-80% original blue with light wear on high edges and contact points, the grasping area perhaps worn more moderate, light to more moderate thinning, and scattered light handling marks; the bolt and shell carrier show scattered light gray freckling. The smooth pistolgrip walnut stock and grooved forend are in very good condition with a 2" crack on the left side of the wrist, adhesive residue on the toe, scattered light dings and handling marks, and scattered wear to the added finish; the stock is fit with a White Line ventilated recoil pad, lightly proud of the stock in spots, giving an about 14 3/8" length of pull. The factory markings remain intact and largely clear, the receiver extension serialized to the shotgun with the numbers lightly struck. The shotgun is sighted with a lone steel bead and appears to function well mechanically. (14A10455-293) {C&R} (200/300) Est. 200 - 300</p>
662	<p>Winchester Model 12 Slide Action Shotgun serial #1326839, 12 ga, 30" plain barrel choked full with a bright excellent boring showing only some stubborn wad residue. The metal surfaces retain about 96% original blue with light wear on high edges and contact points, speckled oxidation and staining on the receiver, and a few light handling marks; the bolt shows some light operational wear and both bolt and carrier show spots of light oxidation staining. The smooth pistolgrip walnut stock and grooved forend are in very good to very good plus condition with some small shallow flakes at the rear of the buttstock, some minor abrasions on the pistolgrip and toeline, and some light handling marks; the stock fits loosely to the receiver and features a Red Head ventilated recoil pad giving an about 13 1/4" length of pull. The factory markings are intact and crisp and the receiver extension is numbered to the gun. The shotgun is sighted with a lone steel bead and appears to function well mechanically. (14A10455-142) {C&R} (200/400) Est. 200 - 400</p>
663	<p>Custom Winchester Model 12 "Trap" Slide Action Shotgun serial #860135, 12 ga, 30" Simmons ventilated rib barrel choked full with an excellent bore. The metal surfaces retain about 98% professionally reapplied blue finish with a few spots of light wear, some minor handling marks, and a spot or two of previous light pitting beneath the finish; the bolt and shell carrier remain bright. The pistolgrip Monte Carlo walnut stock is in about very good condition as lightly cleaned with multiple cracks in the wrist, some softening of the amateurish checkering on the pistolgrip, and remnants of old light dings, and the long forend is in very good condition with a 1/2" chip on the left rear, a drip of finish below it, scattered light handling marks, and some fine diamond-pattern checkering on the bottom. The stock features a black gripcap with white spacer and laurel patterning, and a Morgan adjustable buttplate with recoil pad giving a 14 1/4" length of pull; the forend shows some attractive grain figure. The barrel address remains intact and easily legible, no Winchester "WP" proofs are visible, and the receiver extension numbers are light but match the gun. The shotgun is sighted with dual white beads and appears to function well mechanically. A solid custom job that should perform well on the range. (14A10455-257) {C&R} (300/500) Est. 300 - 500</p>

Lot	Title/Description
664	<p>Custom Winchester Model 12 "Trap" Slide Action Shotgun serial #926232, 12 ga, 30" Simmons ventilated rib barrel choked full with a bright very good bore with scattered spots of light pitting and perhaps a raised light ding or two. The metal surfaces retain about 97% professionally reapplied blue with some light muzzle wear, scattered light handling marks, spots of previous light pitting beneath the finish, and the barrel toning lightly to brown; the bolt and shell carrier are mostly bright with traces of pinprick pitting and specks of gray freckling. The custom capped pistolgrip Monte Carlo-style walnut stock is in very good condition with a 1 3/8" extension grafted to the rear of the stock and scattered light handling marks and spots of flaking of the added finish, and the grooved forend is in very good plus condition with moderate finish wear. The stock features a hardwood gripcap with spacer, large rollover left-side cheekpiece, right side palm swell, and Morgan-style adjustable buttplate with recoil pad, giving an about 14" length of pull. The barrel address and Simmons makers mark remain intact and clear, no Winchester "WP" proofs are visible, and the matching receiver extension is lightly marked. The shotgun is sighted with a green fiber optic front and small brass bead mid rib, and appears to function well mechanically. A solid Model 12 with a custom stock. (14A10455-259) {C&R} (300/500) Est. 300 - 500</p>
665	<p>Winchester Model 12 Slide Action Shotgun serial #593628, 12 ga, 30" nickel steel plain barrel choked full with a mostly bright very good bore, a patch of light oxidation beginning about 4" from the muzzle. The metal surfaces of this 1927-manufactured shotgun retain about 40% original blue with light to moderate wear and oxidation staining on the receiver, the barrel toned to a gray-brown patina, and scattered light handling marks and spots of light pitting; the bolt is bright with some pinprick pitting and the shell carrier shows light oxidation staining. The smooth pistolgrip walnut stock and grooved forend are in very good condition with a 2" tight crack on the underside of the wrist, some scattered light handling marks, and light wear of the added finish; no buttplate is present, giving an about 13 1/2" length of pull. The factory markings are intact and crisp, and the receiver extension is numbered to the gun. The shotgun is sighted with a lone brass bead and appears to function well mechanically. A salty 95-year-old shotgun that should down birds today. (14A10455-470) {C&R} (200/300) Est. 200 - 300</p>
666	<p>Winchester Model 12 Slide Action Shotgun serial #882311, 12 ga, 30" plain barrel choked full with a bright excellent bore. The metal surfaces retain about 97-98% original blue with speckled finish loss on the receiver extension, light muzzle wear, and a few light handling marks and touches of freckling; the triggerguard and shell carrier the exception to this as worn largely to gray with oxidation staining, and are likely from a different shotgun. The bolt remains bright. The smooth pistolgrip walnut stock and grooved forend are in very good plus condition with a few light abrasions and handling marks, primarily along the toeline, and a few small spots of fabric patterning in the finish on the underside of the forend; the stock is fit with a White Line ventilated recoil pad in good condition with drying cracks and flaking, giving a 14 3/4" length of pull. The factory markings are intact and crisp, and the receiver extension is numbered to the gun. The shotgun is sighted with a lone steel bead and appears to function well mechanically. An attractive 1939-made Model 12 shotgun. (14A10455-164) {C&R} (400/600) Est. 400 - 600</p>
667	<p>Custom Winchester Model 12 Slide Action Shotgun serial #1872345, 12 ga, 28" Simmons ventilated rib barrel choked modified with a touch of fine oxidation near the muzzle and some stubborn streaks of wad residue. The metal surfaces retain about 97% professionally reapplied blue with a spot of light wear at the left rear of the receiver, finish loss and some light pitting around the muzzle, and remnants of previous light pitting beneath the finish; the bolt and shell carrier are bright with a freckle and pinprick pit or two. The smooth custom Monte Carlo walnut stock and long forend are in near excellent condition a few light handling marks, a small filler-repair to a natural defect on the underside of the forend, and a few spot of light flaking of the glossy finish; no buttplate is present giving a 11 7/8" length of pull. Both forend and stock show quite attractive grain figure, and the stock features a left-side cheekpiece with a rollover comb. The barrel address and Simmons makers mark are intact and crisp, the barrel is correctly choke marked, no Winchester "WP" proofs are evident, and the receiver extension is numbered to the gun. The shotgun is sighted with dual white beads and appears to function well mechanically. An attractive Model 12 well suited to a smaller-statured shooter. (14A10455-481) {C&R} (350/550) Est. 350 - 550</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
668	Winchester Model 12 Slide Action Shotgun serial #1351977, 12 ga, 30" plain barrel choked full with an excellent bore. The metal surfaces of this 1950-made shotgun retain about 95% original blue with light wear on high edges and contact points, wear in the grasping area, and some scattered light handling marks and specks of oxidation; the bolt and shell carrier are bright with some light operational wear. The smooth pistolgrip walnut stock and grooved forend are in very good plus condition with light to moderate finish wear, some light bubbling and minor crazing of the finish on the stock, a light scuff on the right side of the butt, a scratch on the underside of the forend, and some minor handling marks; the original buttplate is intact. The factory metal markings are intact and crisp, and the receiver extension is numbered to the gun, the fonts of the numbers just slightly different but not appearing to have been restamped. The shotgun is sighted with a lone steel bead and appears to function well mechanically. (14A10455-427) {C&R} (300/500) Est. 300 - 500
669	Custom Winchester Model 12 Left Hand Slide Action Shotgun serial #1950098, 12 ga, 30" Simmons ventilated rib barrel choked full with a bright very good plus bore with a very light ding about 4" from the muzzle, a few patches of light oxidation, and some stubborn wad residue. The metal surfaces retain about 96% reapplied blue finish with a light abrasion on the left front of the receiver, fine surfaces oxidation on the receiver and scattered specks on the barrel, a few minor handling marks, and previous light pitting beneath the finish throughout; the bolt is polished bright with light pitting, and the shell carrier shows light oxidation staining. The custom checkered Monte Carlo-style walnut stock and long forend are in very good plus condition with some light softening of the likely-added checkering and a few light handling marks, and feature lovely grain figure, a black plastic gripcap with white spacer, adjustable comb with 1" x 3" black inlay configured for left-hand use, and an adjustable buttplate with Limb Saver recoil pad, currently giving a 14 5/8" length of pull; the Limb Saver recoil pad shows some light wear and adhesive residue around the sides. The Simmons maker mark on the rib remains crisp, the Winchester factory markings are somewhat softened but still legible, no Winchester "WP" proofs are visible, and the receiver extension is numbered to the gun. The shotgun is sighted with an orange bead front and a small brass bead mid rib, a small gap is present between the ventilated rib and the rib extension on the receiver, and the shotgun appears to function well mechanically. An attractive custom left-hand Model 12 "Trap" shotgun. (14A10455-295) {MODERN} (400/600) Est. 400 - 600
670	Winchester Model 12 Trap Slide Action Shotgun serial #1909022, 12 ga, 30" ventilated rib barrel choked full with a bright excellent bore, some stubborn traces of wad residue present. The metal surfaces retain about 97% original blue with some light wear at the right rear of the receiver, some light high edge wear, and a few light handling marks; the barrel is toning very slightly brown when viewed under direct light. The shell carrier is nicely jeweled with a touch of gray freckling, and the jewelry on the bolt is partially obscured by light operational wear. The custom capped pig's foot pistolgrip Curly Maple Monte Carlo stock with semi-roller left-side cheekpiece is in very good condition with a lightly repaired v-shaped crack on the right side, two thin cracks at the rear of the triggerguard tang, and a few light dings and some light handling marks; the stock is fit with an adjustable buttplate with KICKEEZ recoil pad, giving an about 14" length of pull. The elongated semi-beavertail Curly Maple forend is in very good condition with a very shallow chip at the front edge of the forend, a few small cracks in the same area, and scattered light handling marks. The factory markings are intact and crisp, the Winchester "WP" proofs are correctly offset, and the receiver extension is numbered to the gun. The shotgun is sighted with a white bead front and small ivory bead midrib, and appears to function well mechanically. A solid Model 12 Trap with custom stock and forend. (14A10455-153) {C&R} (400/600) Est. 400 - 600

Lot	Title/Description
671	Winchester Model 12 Slide Action Shotgun serial #1118233, 12 ga, 30" plain barrel choked full with a bright excellent bore with some stubborn wad residue. The metal surfaces retain about 80-85% original blue with thinning and light to more moderate wear to gray, more pronounced on the high edge, grasping area, and breech section of the barrel, some spots of light oxidation, and a few light handling marks; the bolt and shell carrier show some light oxidation staining. The custom capped pistolgrip walnut stock with semi-roller comb is in very good condition with light abrasions on the left side, a few light dings to the spliced-in large gripcap, and scattered spots of light finish wear and flaking; the stock is fit with a Pachmayr ventilated recoil pad giving a 14 1/4" length of pull. The grooved forend is in very good plus condition with a few minor dings and light handling marks, and perhaps an older added finish. The factory markings are intact and clear, and the receiver extension is numbered to the gun. The shotgun is sighted with a lone steel bead and appears to function well mechanically. (14A10455-516) {C&R} (200/400) Est. 200 - 400
672	Winchester Model 12 "Trap" Slide Action Shotgun serial #1155967, 12 ga, 30" Simmons ventilated rib barrel choked full with a bright very good bore with scattered patches of light pitting and stubborn wad residue. The metal surfaces retain about 98% professionally reapplied blue with some freckling on the barrel, a few spots beneath the rib toning to brown, light handling marks, and previous light pitting beneath the finish. The custom pig's foot pistolgrip walnut stock with semi-roller left side cheekpiece and elongated semi-beavertail forend are in very good plus condition with a neatly repaired about 1 1/2" crack on the left side of the wrist and some scattered minor handling marks; the Pachmayr White Line ventilated recoil pad is proud at the toe and shy at the toe, mounted with only one screw at the heel, and gives a 13 7/8" length of pull. The markings are clear and intact, no Winchester "WP" proofs are present, and the receiver extension is numbered to the gun, the font being slightly different. The shotgun is sighted with a red bead front and small steel bead mid rib, and appears to function well mechanically. (14A10455-217) {C&R} (350/550) Est. 350 - 550
673	Smith & Wesson M&P 45 Semi-Auto Pistol serial #DXV2863, 45 ACP, 4" barrel with bright excellent bore. The slide retains 95% of its Melonite finish with scattered light handling marks and very minor high edge wear. The pistol has standard features and the polymer frame rates very good with spots of wear and has light scuffing along the triggerguard. (10A10551-49) {MODERN} (250/450) Est. 250 - 450
674	Savage Model 1907 Semi-Auto Pistol serial #60028, 32 ACP, 3 3/16" barrel with an about very good frosted bore with light pitting near the chamber end. The metal surfaces retain 95% re-applied blue with overall light scratches and some tiny specks of fine oxidation staining. The pistol has standard features and is missing the right grip panel and has a moderate repair to the left panel. This would make a fine restoration project. (10A10650-2) {C&R} (200/400) Est. 200 - 400
675	Ruger New Model Single Six Convertible Revolver serial #66-80063, 22 LR, 6 1/2" barrel with bright excellent bore. The metal surfaces retain 95% original blue and anodized finishes showing scattered light handling marks with light high edge and muzzle wear. The revolver has standard features and the smooth walnut grips with black phoenix medallions rate very good and it comes with only the 22 LR cylinder. This 1979 manufactured revolver remains in fine condition. (10A10804-3) {MODERN} (300/500) Est. 300 - 500
676	Smith & Wesson M&P 45 Semi-Auto Pistol serial #DXV3070, 45 ACP, 4" barrel with bright excellent bore. This slide retains 95% of its Melonite finish with high edge and light holster wear. The Pistol features factory three-dot Night sights with cocking ledge that still illuminate. The polymer frame rates excellent with light handling marks and included is a single ten round factory magazine. (10A10551-46) {MODERN} (300/500) Est. 300 - 500
677	Smith & Wesson M&P 45 Semi-Auto Pistol serial #HUK9455, 45 ACP, 4" barrel with bright excellent bore. The slide retains perhaps 95% of its Melonite finish with holster and edge ears throughout. The pistol features factory three-dot night sights with cocking ledge that still illuminate and the polymer frame rates excellent. Included is a single ten round factory magazine. (10A10551-54) {MODERN} (300/500) Est. 300 - 500

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
678	Ruger New Model Blackhawk Convertible Revolver serial #46-81334, 45 Colt / 45 ACP, 7 1/2" barrel with bright excellent bore. The metal surfaces retain 98% of their original blue and anodized finishes showing light handling marks and specks of fine oxidation staining. The cylinders are scratch-numbered and the revolver has standard serrated ramp front sight and adjustable black blade rear sight. The smooth walnut grips with black phoenix medallions rate excellent with a few minor light handling marks. Included is an extra cylinder in 45 ACP, factory box, and related papers. (10A9100-558) {MODERN} [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600
679	Ruger New Model Blackhawk Convertible Revolver serial #36-44575, .357 Mag / 9mm, 4 3/4" barrel with bright excellent bore. The metal surfaces retain 98% of their original blue and anodized finishes with some scattered light handling marks and specks of fine oxidation staining. The revolver has a serrated ramp front sight and adjustable blade rear sight and both cylinders are scratch-numbered to the gun. The smooth walnut grips with black phoenix medallions rate excellent. Included is a hinge top factory box, manual and 9mm cylinder. A fine example of these well-built single action revolvers. (10A9100-937) {MODERN} [Richard "Stretch" Kennedy Collection] (350/550) Est. 350 - 550
680	Ruger Old Model Blackhawk Revolver serial #125836, 357 Mag., 6 1/2" barrel with bright excellent bore. The revolver retains 95% of its original blue and anodized finishes with scattered handling marks, flakes, light high edge and muzzle wear. This revolver has standard features and the Transfer Bar safety update has not been performed. The smooth walnut grips with black phoenix medallions rate very good with light handling marks and thinning varnish. The action seems to function well mechanically and this 1968 production revolver remains in fine condition. (10A10804-1) {C&R} (350/550) Est. 350 - 550
681	Colt Junior Semi-Auto Pistol serial #17812cc, 22 Short, 2 1/4" barrel with bright excellent bore. The metal surfaces retain 95% original evenly thinning blue that tones brown under bright light. This pistol has standard features and the checkered walnut grips with silver Rampant Colt medallions rate excellent. Included are a factory box, two stainless 6 round factory magazines with related papers all in very good condition. (10A10760-8) {C&R} (250/450) Est. 250 - 450
682	Walther P99 Semi-Auto Pistol serial #025235, 9mm, 4" barrel with bright excellent bore. The metal surfaces retain 98% of their matte black finish with the textured polymer frame rating excellent. The pistol has standard features and is equipped with a Walther Laser Device that has ambidextrous activation triggers. The pistol comes with two ten round magazines, 2 interchangeable back straps, sight tool and inserts, and a factory hard case that is numbered to the gun. The foam lining in the case is partially deteriorated and all other items remain in fine condition. (10A9100-M76) {MODERN} [Richard "Stretch" Kennedy Collection] (350/550) Est. 350 - 550
683	High Standard Model R-101 Sentinel Revolver serial #1019304, 22 LR, 2 3/8" barrel with bright excellent bore. The metal surfaces retain 97% of their original matte blue with scattered scratches and minor high edge wear. The plastic checkered grips rate excellent and included with this double action 9-shot revolver are the original two-piece factory box and additional bobbed hammer with vibrant case-hardened colors. (10A9100-1393) {MODERN} [Richard "Stretch" Kennedy Collection] (200/400) Est. 200 - 400
684	Armi San Marco Model 1851 Navy Percussion Revolver serial #D99481, 36 cal., 7 1/2" octagon barrel with bright excellent bore. The barrel, cylinder, and trigger retain 98% original blue with the hammer and loading lever exhibiting vibrant case-hardened colors. The brass frame and grip frame are a nice ochre patina with scattered light tarnish throughout. The smooth walnut grip rates near excellent and the revolver seems to function well mechanically. (10A10804-10) {Antique} (200/400) Est. 200 - 400
685	San Marco Model 1860 Army Percussion Revolver serial #30692, 44 cal., 8" round barrel with bright excellent bore. The metal surfaces retain 98% of their original blue and case-hardened colors with the brass a deep honey brown patina showing specks of light tarnish throughout. The one-piece walnut grip rates excellent and the action seems to function well mechanically. (10A10804-8) {ANTIQUE} (200/400) Est. 200 - 400

Lot	Title/Description
686	Henry Repeating Arms AR-7 U.S. Survival Rifle serial #US02355, 22 LR, 16 1/8" barrel with bright excellent bore. The metal surfaces retain 85-90% of their weather resistant silver finish with the majority of loss along the barrel due to flaking. The rifle has standard features and the stock has U.S. Survival across the butt. This take down semi-auto comes with a single 8 round magazine and remains in very good plus condition. (10A9100-1305) {MODERN} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
687	Charter Arms AR-7 Explorer Semi-Auto Rifle serial #A169454, 22 LR, 16" barrel with bright excellent bore. The metal surfaces retain 98% of their black finish with a few light handling marks. The black plastic stock rates very good with scattered light handling marks throughout. The action seems to function well mechanically and it comes with a single 8 round magazine. (10A9100-1386) {MODERN} [Richard "Stretch" Kennedy Collection] (150/250) Est. 150 - 250

The metal surfaces retain 98% of their original matte black finish and the textured polymer frame rates excellent. The pistol has standard features and comes with a factory hard case numbered to the gun, interchangeable backstrap, two ten round magazines, sight inserts and tool, cable lock and related papers. A fine example of these small caliber pistols. (10A9100-M75) {MODERN} [Richard "Stretch" Kennedy Collection] (250/450) Est. 250 - 450
690	Glock Model 19 M.O.S. Semi-Auto Pistol serial #BRYL429, 9mm, 4" barrel with bright excellent bore. The slide retains 98% of its original matte black finish and this Gen 5 pistol features an RTF polymer frame with extended beaver tail backstrap and M.O.S. platform with additional plates for mounting various style optics to the slide. Included with this pistol are three 15 round factory magazines, loading tool, (4) additional plates with mounting screws and tool, bore mop, factory hard case numbered to the gun and manual. Please see the Leupold DP-Pro in the optics section as it would make a nice pairing with this pistol. (10A10813-102) {MODERN} (450/650) Est. 450 - 650
691	Smith & Wesson M&P 22 Semi-Auto Pistol serial #MP004724, 22 LR, 4" threaded barrel with bright excellent bore. The metal surfaces of this Walther-produced pistol retain 98% of their original matte black finish and the textured polymer frame with integral lower rail rates excellent. The pistol has standard features and comes with a factory hard case, manual, barrel adapter and wrench, and two ten round factory magazines. This pistol is in as-near-new condition (10A10813-125) {MODERN} (300/500) Est. 300 - 500
692	Cimarron Model P Single-Action Revolver by Uberti serial #P14882, 45 Colt, 7 1/2" barrel with bright excellent bore. The barrel, cylinder, grip frame, and triggerguard retain 98% original blue with a few light handling marks. The frame and hammer show vibrant case-hardened colors and the smooth walnut grips rate excellent. Included is the original factory box end labeled to the gun with related papers. (10A10813-88) {MODERN} (300/500) Est. 300 - 500
693	Smith & Wesson Model 30-1 Double Action Revolver serial #822351, 32 S&W Long, 3" pinned barrel with bright excellent bore. The metal surfaces retain 98% original blue with some very minor light handling marks, and the hammer and trigger show vibrant case-hardened colors. The revolver has standard features and the checkered walnut Magna grips with S&W medallions rate excellent. Included are two 32 cal., H.K.S. speed loaders and a factory two-piece box with added label identifying it to the gun. (10A10813-63) {C&R} (300/500) Est. 300 - 500

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
694	Harrington & Richardson "22 Special" Revolver serial #602325, 22 LR, 6" barrel with bright very good bore. The metal surfaces retain 90% original flaking blue finish with spots toning plum, light scattered oxidation staining and wear showing at the muzzle. The cylinder has some light oxidation in the flutes and several light scratches that show old light oxidation. The hammer and barrel latch show strong case-hardened colors and this nine shot revolver has standard features. The one-piece checkered walnut grips rates very good with scattered light handling marks, a small hair line crack at the top of the grip and slightly worn points. The action seems to function well mechanically. (109100-1198) {C&R} [Richard "Stretch" Kennedy Collection] (150/250) Est. 150 - 250
695	Cumberland Mountain Arms Inc., High Wall Action This in-the-white action only serial # CMA305K, comes with action kit including; trigger group, lower tang, springs, pin, and mounting screws, wooden shipping box and schematic drawing. This is an as-new receiver with internal parts included in fine condition. (10A10724-159) {FIREARM} [Andrew Zahornacky Collection] (150/250) Est. 150 - 250
696	Winchester 1885 Highwall Action serial #13618, the metal surfaces on this action only retain mostly a plum color patina with spots of fine oxidation staining scattered about. The action should be checked by a qualified gunsmith prior to attempting to build as it is uncertain if all internal parts are present. (10A10724-161) {ANTIQUÉ} [Andrew Zahornacky Collection] (150/250) Est. 150 - 250
697	Remington 03-A3 Action serial #4106186, the metal surfaces on this action only retain a mottled gray patina with remnants of an applied cold-blue finish. There are light tooling marks around the breech and the receiver has been drilled and taped for scope mounts. The bolt and handle remain bright and the bolt sleeve is "R" marked. The safety lever shows vibrant case-colors and the action is smooth. A fine starting point for a custom sporting rifle build. (10A10724-103) {FIREARM} [Andrew Zahornacky Collection] (100/200) Est. 100 - 200
698	Charles Daly Percussion Muzzleloading Rifle serial #211475, .50 Caliber, 29" octagon barrel with a partially bright pitted bore. The blued barrel of this Italian made Hawkins style rifle retains 97% finish with a 1" scratch on the left barrel flat. The brass furniture has toned to a mellow goldenrod patina, the well fitted lockplate retaining excellent fading casehardening. The walnut stock rates very good showing a few handling marks and a small chip adjacent to the rear sling stud. The rifle features a right side cheekpiece, wood ramrod, brass patchbox, adjustable rear sight and functioning double set triggers. (25A10882-5) {ANTIQUÉ} (100/300) Est. 100 - 300
699	Winchester Model 67 Bolt Action Rifle 22 S, L, LR 20" barrel with a bright very good bore. The blued metal surfaces have toned to an overall brown patina, the bolt and trigger showing moderate oxidation staining. The walnut pistolgrip stock rates good with a 2" tight crack at the tip of the forend, a 3/4" chip on the top of the comb with scattered dings and scratches. The original Winchester logo plastic buttplate is in very good condition and the rifle functions well mechanically. (25A10759-85) {C&R} (75/150) Est. 75 - 150
700	Winchester Model 54 Bolt Action Rifle serial #43495A, 22 Hornet, 25" barrel with a bright near excellent bore. The metal surfaces retain about 90% original blue with most of the loss on the floorplate and triggerguard, scattered abrasions along the barrel and left side of the receiver with moderate oxidation staining on the well fitted original buttplate. The left side of the receiver has three screw filled holes drilled and tapped for installation of a Griffin & Howe type scope mount. The rifle is currently sighted with the Lyman 48W aperture sight, the barrel sight dovetail filled with a blank and a ramped brass bead front sight with no sight hood. The checkered pistolgrip stock rates very good with no cracks, showing the typical scattered small handling marks one would expect from a 1930's vintage rifle. The rifle features the original swivels, excellent remaining bolt jewelry and functions well mechanically. A classic vintage rifle in a terrific chambering. (25A10759-59) {C&R} (600/800) Est. 600 - 800

Lot	Title/Description
701	10-Ring Precision Muzzleloading Target Rifle 50 Caliber, 34" octagon barrel with a bright excellent bore. This early San Antonio TX produced inline target rifle remains in excellent condition retaining 97% professionally applied deep blue finish showing a bit of loss on the crown of the muzzle with a few small scratches in the nipple recess. The smooth pistolgrip custom walnut stock rates excellent displaying beautiful feather crotch figure on both sides of the butt, scattered small handling or impact marks, well executed semi rollover cheekpiece and a perfectly fitted Herters neoprene buttpad. The rifle features a very light target trigger, two sight dovetails milled into to the top barrel flat, two tapped holes at the front of the barrel for a globe sight with a rear mounted custom sight base likely for an aperture target sight. The rifle is currently sighted with a Micro adjustable U notch rear and German silver blade front sight. An attractive custom made precision muzzleloader. (25A10648-44) {ANTIQUÉ} (300/500) Est. 300 - 500
702	10-Ring Precision Custom Muzzleloading Target Rifle 45 Caliber, 31" K.R. Bresian octagon barrel with a bright excellent bore and false muzzle. The blued custom barrel retains 96% professionally applied finish with light high edge wear. The quality made barrel is marked "K.R. Bresian/ Warsaw NY/ 1979" with a 1 1/4" long four pin false muzzle. The triggerguard is in-the-white with mild oxidation staining, the stock screw displaying an attractive diamond shaped brass escutcheon. The custom pistol grip stock rates excellent showing a small impact mark on the tip of the pistolgrip, thin scratch along the top of the cheekpiece with scattered tiny handling marks. The maple stock features wonderful tiger striping, nicely sculpted semi rollover check piece and is well fitted with a Morgan adjustable buttplate, the rubber buttpad showing some age cracking. The rifle is sighted with the excellent Redfield Olympic micrometer sights with circle insert. A very attractive and no doubt accurate precision muzzleloader. (25A10648-54) {ANTIQUÉ} (400/600) Est. 400 - 600
703	Custom Percussion Halfstock Sporting Rifle .45 Caliber, 31" octagon barrel with a bright excellent bore. The barrel and triggerguard retain about 95% professionally applied browning with a few spots of abrasion loss on the top flat at the breech. The bottom flat at the breech is marked "SHARON", the top flat showing two screw filled holes for mounting a tang sight, the rifle fitted with a well-executed drum and nipple ignition system. The lock shows nice acid casehardening with the blued noseclip, wedge escutcheons and buttplate retaining excellent polished blue. The checkered round knob walnut stock rates near excellent with scattered light handling or impact marks, the stock channel is stamped "R. Winter" in neat block lettering, displaying a perfectly fitted steel buttplate. The rifle is sighted with a U notch rear and German silver front blade sight. A well-made custom halfstock muzzleloader. (25A10648-42) {ANTIQUÉ} (300/500) Est. 300 - 500
704	Armi Sport C. S. Richmond Type III Musket serial #R2384, .58 Caliber, 40" barrel with a bright excellent bore. The bright metal surfaces of this Italian made reproduction rifle remain in very good condition showing light cleaning marks along the barrel and lock with a few scattered small spots of discoloration. The high hump lock is faux marked "C.S. Richmond/1862", the barrel "V / P / (eagle head)". The bright brass buttplate and noseclip appear to be plated steel and rate very good. The nicely finished walnut stock is in excellent condition showing attractive straight grain figure, three small impact marks on top of the comb and small scattered handling marks. The rifle features a functional lock with strong springs, threaded steel ramrod and moderately soiled reproduction cloth sling. An attractive reproduction musket that has seen minimal use. (25A10882-4) {ANTIQUÉ} (400/600) Est. 400 - 600
705	Traditions Lightning In-Line Muzzleloading Rifle serial #14-13-055987-96, .54 caliber, 24" round barrel with a bright excellent bore. The blued metal surfaces of this Spanish made bolt action inline muzzleloader rate excellent with some fine scratches from cleaning, the bolt remaining bright with a 1-48" twist rate. The pistolgrip hardwood stock also rates excellent with a few tiny impact marks and features right side cheekpiece, a nice satin finish, rubber buttpad and sling swivel studs. The rifle is sighted with an adjustable U notch rear and ramped blade front sight, is drilled and tapped for scope bases and includes a synthetic ramrod. (25A10882-3) {ANTIQUÉ} (100/300) Est. 100 - 300

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
706	Traditions Flintlock Pennsylvania Rifle serial #278846, 50 Caliber, 40" octagon barrel with a bright very good bore. This Spanish made rifle is somewhat unique to the Traditions product line as it has a one piece stock and 40" barrel. The blued barrel rates excellent with a touch of high edge wear, the lock showing ample casehardening, the brass components mellowed to an attractive dull patina. The one piece walnut oil finished stock rates excellent and features an elaborate brass patchbox, heart inlays around the wrist, star inlays along the forearm and cheekpiece and pierced inlay on the left stock flat. The rifle features functioning double set triggers, elevation adjustable U notch rear sight, 1-66" twist for patched roundballs, wooden ramrod and includes spare flints, patches and leathers stored in the patchbox. (25A10882-2) {ANTIQUE} (300/500) Est. 300 - 500
707	Scarce Feinwerkbau 300S Running Boar Match Air Rifle serial #364416, .177 caliber, 20" barrel with a bright excellent bore. Considered the gold standard of vintage Olympic 10 meter air rifles, this Beeman imported rifle retains 97% polished blue original finish and remains in excellent conditions and functions well. The thumbhole pistolgrip match stock rates very good with no cracks showing several thin scratches on the left side of the butt and a few spots of flaking finish. The rifle is original and unmodified featuring the RB adjustable comb and buttplate, single stage trigger, the blue breech seal in very good condition indicating replacement at some point. The rifle is sighted with a vintage Beeman Blue Ribbon 68R 4-12 X 40 scope in excellent condition with clear optics. A lightly used vintage match air rifle in the scarce and desirable Running Target configuration. (25A10882-6) {NON GUN} (600/800) Est. 600 - 800
708	Excellent Thompson Center New Englander Percussion Muzzleloading Shotgun serial #01077, 12 Ga., 28" round barrel with a bright excellent bore choked cylinder. The blued surfaces retain 98% original finish with a bit of thinning around the muzzle, the smooth steel buttplate showing minor oxidation staining at the heel with the lock retaining wonderful acid process casehardening. The straight grip walnut stock rates excellent featuring attractive vertical stripe over straight grain figure with a small impact mark below the lock and one on the left side of the forearm. The lock functions well and the rifle includes a fiberglass ramrod. An excellent black powder shotgun, not often seen in this condition. (25A10891-27) {ANTIQUE} (200/400) Est. 200 - 400
709	BSA Martini ISU International Single Shot Rifle serial #FG1252, 22 LR, 28" barrel with a bright excellent bore. The metal surfaces of this DGR imported rifle retain about 85% original blue that is toning to brown under light showing some high edge wear, areas of thinning blue on the top of the barrel, small spots of abrasion loss on the left side with two thin scratches on the right side of the receiver. The block remains mostly bright with a small area of oxidation staining, the rifle displaying strong proof and metal markings. The pistolgrip walnut stock with semi rollover cheekpiece and forend rate very good with reapplied varnish showing scattered small dings and impact marks. The rifle features an adjustable hand stop with swivel, adjustable BSA logo buttplate, compact rail mounted bipod and is sighted with the excellent Parker Hale PH25 aperture sight and aftermarket Tucker tunnel sight with circle insert. A wonderful target small bore rifle that likely shoots as well as it did the day it left the factory. (25A10774-4) {MODERN} (600/800) Est. 600 - 800
710	Excellent Remington Model 513T Bolt Action Rifle serial #3934, 22 S, L, LR, 27" target barrel with a bright very good bore. This first year of production, 1940 manufactured Matchmaster rifle remains in wonderful condition. The metal surfaces retain about 95% original blue finish that is starting to tone to brown under bright light with a bit of oxidation loss on the triggerguard and sling swivel rail. The beehive bolt retains 90% brilliant acid process casehardening with the expected operational loss on the bearing surfaces, the bolt knob faded to gray, the cocking indicator displaying most of the red enamel paint. The pistolgrip target stock rates excellent with a few small handling marks on the tip of the forend, toe line of the butt and displays an attractive rich dark oil finish. The rifle retains the original Redfield model 75 micrometer rear sight and Model 69 globe front with circle insert in excellent condition. The rifle features the original Remington marked buttplate, factory drilled and tapped for micrometer style scope mounts and includes one six round magazine. A very nice vintage 513-T, not often seen in this condition as most saw hard use in smallbore competition. (25A10699-50) {C&R} (500/700) Est. 500 - 700

Lot	Title/Description
711	Pedersoli Brown Bess Flintlock Musket serial #BB15711, 75 Caliber, 42" smoothbore barrel with a very good clean bore. The metal surfaces of this Italian reproduction Short Land Pattern rifle remain in very good condition, the barrel showing a few areas of gently cleaned oxidation staining. The lock remains bright with faux "Grice / 1762" and "Crown / GR" markings. The brass furniture has toned to a mellow goldenrod patina, the tailpipe and two of the ramrod thimbles showing some discoloration, the lower sling swivel being moderately oxidized. The European hardwood stock rates very good with a few scattered small handling marks. The rifle features a steel threaded ramrod with tight fit, functional lock with strong springs, reproduction white leather sling with a pitted brass plated buckle. A quality reproduction Brown Bess ideal for reenactment purposes or producing clouds of smoke at the range. (25A10882-1) {ANTIQUE} (600/800) Est. 600 - 800
712	Sporterized Long Branch No. 4 Mk 1* Bolt Action Rifle serial #65L8624, 303 British, 25" barrel with a bright very good bore with 2 spots of isolated pitting approximately 3" from the throat. The 1944-dated barreled action retains about 92% arsenal re-applied blue with light wear on high edges and contact points. The magazine shows a mottled finish ranging from factory blue to plum patina with light wear on the high edges. The new production stock has had the forearm shortened and shaped, and does not have a buttplate present. The action has not been drilled, tapped or otherwise modified, and it is export but not import marked, making it a good candidate for restoration to military configuration with a few parts. The rifle functions well mechanically and includes one ten round magazine. A rifle that could clean up nicely to its WW2 configuration, and should perform well at the range. (26A10740-4) {MODERN} (100/300) Est. 100 - 300
713	Hopkins & Allen No. 822 Falling Block Rifle 22 LR, 21 1/2" barrel with good bore showing light pitting throughout. The metal surfaces retain about 80% original finish, with the receiver showing very good color casehardening, the barrel toning to a plum-patina, and pinprick pitting and oxidation present across the frame, lever, and hammer. The smooth walnut stocks are good, with some dings and impact marks and a sliver missing from the right side of the handguard where it meets the frame. The rifle is sighted with a steel blade front sight and a small fixed rear sight. The trigger will drop the hammer while at half-cock, but otherwise the action functions well mechanically. (26A10768-72) {C&R} (50/100) Est. 50 - 100
714	Ithaca M-49 Lever Action Single Shot Rifle serial #226791, 22 LR, 18" barrel with a bright excellent bore showing strong rifling. The barrel and faux magazine tube retain about 80% original blue showing spots of oxidation, while the frame and lever retain about 95% black enamel finish flaking in spots to gray. The smooth walnut buttstock and forend remain in good very good condition with some overall light dings. The original sights are intact and the action seems to function well mechanically. (26A10860-14) {MODERN} (50/100) Est. 50 - 100
715	Winchester Model 12 Trap Slide Action Shotgun serial #1433849, 12 ga, 28" Simmons ventilated rib barrel marked modified but choked improved cylinder. The receiver retains about 80% original finish with oxidation on the receiver and light wear, the barrel refinished with a black enamel paint, and the magazine tube showing light operational wear. The smooth pistolgrip walnut stock and 14-groove forend are in very good condition showing scattered light dings and handling marks, light finish flaking, and no buttplate is present. The shotgun is sighted in with a white rear bead and a faded orange translucent front bead, and the rib seems to be canted slightly to the left. The shotgun appears to function well mechanically. (26A10455-343) {C&R} (100/200) Est. 100 - 200
716	Custom Smith & Wesson 38 Safety Hammerless serial #252214, 38 S&W, 1 1/2" barrel with a bright excellent bore showing limited pitting and strong rifling. This revolver remains in excellent condition with the professionally re-applied nickel finish showing light handling marks, with pitting on the pinned front sight blade. The barrel appears to have been shortened by a previous owner some abrasion marks on the crown. The case-hardened trigger retains some color on the left side, with spots of oxidation present. The triggerguard retains about 98% original blue with a spot toning to gray, and all numbered parts match the frame. The unmarked mother-of-pearl grips rate very good plus with gold Smith & Wesson medallions inlaid on both sides. The trigger requires manual assistance to reset, and barrel-to-frame fit are solid as well as timing and lock-up and the action appears to function well mechanically. (26A9100-1075) {C&R} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
717	Smith & Wesson 32 Safety Hammerless Revolver serial #29305, 32 S&W, 3 1/2" barrel with a bright excellent bore. The metal surfaces of this revolver retain about 98% original nickel finish with light handling marks and scattered pitting. Aside from the patent information on top of the barrel, there are otherwise no markings on the barrel or frame. The cylinder, barrel, and frame are all matching. The replacement ivory grips are marked "19" in pencil on the underside. The revolver seems to function well mechanically with solid timing and lock-up. A desirable example of the First Model of these Smith & Wesson revolvers. (26A9100-289) {ANTIQUE} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
718	Smith & Wesson 32 Safety Hammerless Revolver serial #280457, 32 S&W, 3" barrel with a bright excellent bore. The metal surfaces of this fourth model revolver retain about 98% re-applied nickel finish with light handling marks and pitting under the finish. The latch and rear sight retain 98% dull blue, the trigger and hammer retain very good color case-hardened finish, and the trigger guard retains very good original blue with some oxidation. The markings remain crisp, and all numbered parts, including the latch and extractor are matching. The checkered black hard rubber grips remain in very good condition, with the right grip stamp-numbered matching. The action seems to function well mechanically with solid timing and lock-up. (26A9100-39) {C&R} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300
719	Savage No. 4 Mk 1* Enfield Bolt Action Rifle serial #30C5575, 303 British, 25" barrel with an about good bore with oxidation and pitting present but strong two-groove rifling throughout. The metal surfaces of this 1942-dated rifle have toned to a mix of plum-patina and gray with age, showing silvering on the nose cap and high edges. The left side of the wrist bears the small "(flaming ordnance bomb)", Savage "S", and "1942" markings, while the nose cap and some other minor parts bear the British "(broad arrow)" service marking, and all serialized parts are numbered to different rifles including the electro-pencil labeled bolt. The rear sight is the fully-adjustable aperture type, and the very good condition magazine bears the markings "UCF" on the follower and "B" on the rear of the body. The hardwood stock remains in good condition showing significant signs of wear including what appears to be graffiti from a prior owner and later applied finish. The brass buttplate is in good condition with significant wear, and includes the oiler inside the stock. The underside of the barrel is import marked and the rifle appears to function well mechanically. A salty example of these American made British wartime rifles. (26A10913-1) {C&R} (400/600) Est. 400 - 600
720	Smith & Wesson 32 Double Action Third Model Revolver serial #44934, 32 S&W, 3" ribbed barrel with a good bore showing oxidation and pitting with strong rifling throughout. The metal surfaces of this revolver retain about 90% original nickel finish, with scattered pitting and oxidation. The latch and trigger guard maintain very good original bluing with some silvering present on the high edges, and the hammer and trigger retain very good color case-hardening with some toning to brown. All serialized parts are matching, to include the excellent condition black checkered hard rubber grips, and the action seems to function well mechanically with good timing and lock-up. (26A9100-240) {ANTIQUE} [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200
721	Smith & Wesson No. 1 1/2 Single Action Revolver serial #38001, 32 S&W, 3 1/2" ribbed barrel with a good bore showing scattered pitting with strong rifling throughout. The metal surfaces retain about 60% original nickel finish, with pitting and oxidation present including spots on the frame and cylinder completely devoid of finish. All numbered parts are matching, including the very good diamond checkered hard rubber grips showing "S&W" logo. The action seems to function well mechanically with solid timing and lock-up. (26A9100-392) {ANTIQUE} [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200
722	Smith & Wesson No. 1 1/2 Second Issue Single Action Revolver serial #95968, 32 RF, 3 1/2" ribbed barrel with a bright excellent bore showing scattered oxidation and strong rifling throughout. The metal surfaces on the frame and barrel show about 70% original blue with some scattered dings, oxidation, and toning to plum patina. The cylinder is devoid of finish, and the color case-hardening on the hammer and trigger has toned to gray. The assembly numbers match, and the smooth rosewood factory grips are numbered to the gun and rate very good with some dings and abrasions. The gun appears to function well mechanically, with slight play in the cylinder and the barrel but otherwise solid lock-up and timing. (26A9100-397) {ANTIQUE} [Richard "Stretch" Kennedy Collection] (200/300) Est. 200 - 300

Lot	Title/Description
723	Smith & Wesson 32 Safety Hammerless Revolver serial #6048, 32 S&W, 3 1/2" ribbed barrel with a bright excellent bore showing isolated spots of pitting and strong rifling throughout. The metal surfaces on this first model revolver retain 95% original nickel finish showing scattered spots of oxidation and light clouding. All numbered parts are matching, including the excellent condition black checkered hard rubber grips. The action seems to function well mechanically, and the barrel-to-frame fit, timing, and lock-up are solid. (26A10483-380) {ANTIQUE} [Perry White Collection] (200/300) Est. 200 - 300
724	Smith & Wesson 32 Double Action Third Model Revolver serial #84735, 32 S&W, 3 1/2" ribbed barrel with a bright excellent bore showing strong rifling throughout. The metal surfaces show 95% original nickel finish with scattered pitting and oxidation. The latch and trigger guard show very good original blue, with the trigger guard toning to a plum-patina under bright light. The hammer and trigger show good case-hardened finish toning to a mottled brown and gray. All numbered components are matching, including the excellent condition black checkered hard rubber grips. The action seems to function well mechanically, and the barrel-to-frame fit, timing, and lock-up are solid. (26A10483-379) {ANTIQUE} [Perry White Collection] (100/200) Est. 100 - 200
725	Winchester Model 12 Slide Action Shotgun serial #1186968, 12 ga., 30" plain barrel choked full with a bright excellent bore. The metal surfaces retain about 98% re-applied blue with light operational wear and some light oxidation on the receiver extension. The excellent condition hardwood stock has been refinished, and the grooved forearm maintains about 60% finish with spots of flaking. A recoil pad has been added, with a length of pull just over 14 1/4". The shotgun is sighted with a simple silver bead, and the action seems to function well mechanically. A refurbished example of a classic American shotgun. (26A10454-97) {C&R} (200/300) Est. 200 - 300
726	Lefever Arms Co HE Grade Sideplate Double Ejectorgun serial #70971, 12 ga, 28" barrels choked modified and full, with bright very good plus bores with a few very light dings, one about 9" from the right muzzle and a few more about 2" from the left muzzle. The barrels retain about 40% thinning original blue toning to brown, strongest in the protected areas along the rib, with moderate wear to gunmetal gray on the sides of the barrels, some light handling marks, and 3" of the under rib has come unsoldered near the lug. The frame retains about 50% muted casehardened color at the rear and top of the fences and on the lever, the belly and part of the sides having toned to a silvery casehardened patina. The checkered capped pistolgrip walnut stock and splinter-style forend are in very good to very good plus condition with a repaired chip at the toe, two neat repairs on either side of the lower tang where it meets the frame, a short crack at the rear of the upper tang, and a few minor handling marks. The stock shows some attractive grain figure and features a 14 1/8" length of pull with drops of about 1 3/4" and 2 5/8". The sideplates are decorated with small wedges of scroll engraving and simple wavy line borders, the maker's mark on each side remain crisp, and the barrels and forend are numbered to the shotgun. The shotgun locks up with the right barrel off-face and the lever coming to rest at center, and features cocking indicators, double triggers, robust ejectors, and a pinned safety; the firing pins have been removed but are included. The shotgun is sighted with a small steel bead and appears to function well mechanically. An attractive Lefever HE grade for the shotgunning enthusiast. (1X14A10453-1) {C&R} [Sherwood "Skip" Chapman Collection] (400/600) Est. 400 - 600

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
727	<p>Parker GH Grade Boxlock Double Shotgun serial #112798, 12 ga on a No. 2 frame, 30" damascus steel barrels choked cylinder and full, with bright excellent bores showing only a speck of light oxidation in the left bore just after the chamber, the bores perhaps lightly polished. The barrels have a gray-brown patina showing a lovely damascus pattern the full length, with some minor abrasions in the breech area, a spot of light wear about 7" from the left muzzle, and light silvering at the muzzles. The remaining metal surfaces have been polished to an attractive coin finish with hints of pinprick pitting, a spot or two of perhaps more light pitting, small spots of oxidation staining, and strong remnants of casehardened colors in the protected areas beneath the lever; the G-grade engraving remains very nice with small game bird scenes left and right, and on the trigger plate. The checkered capped pistolgrip walnut stock and splinter-style forend are in very good plus condition with two short hairline cracks at the rear of the upper tang, two short hairline cracks on the left side of the lower tang, light softening of the checkering, and some scattered light handling marks. The stock retains the original hard rubber Parker Bros gripcap and dog's head buttplate, has an unengraved monogram plate on the toeline, and shows some attractive grain figure along the buttstock. The Parker Bros address on the matted rib remains crisp and the forend iron and barrels are numbered to the shotgun. The shotgun locks up tight with the barrels on-face, the lever coming to rest just left of center, and features double triggers, an automatic safety, extractors, 2 5/8" chambers, a 14 1/8" length of pull with drops of about 2" and 3 1/8" and is sighted with a lone steel bead; the shotgun appears to function well mechanically. Consulting of Parker Gun Identification & Serialization lists this shotgun by serial number, with features as previously described. An attractive GH Grade Parker shotgun. (1X14A10636-87) {C&R} (600/800) Est. 600 - 800</p>
728	<p>Winchester Model 90 Slide Action Rifle serial #707259, 22 Short, 24" octagon barrel with bright excellent bore. The metal surfaces have toned to a brown patina with remnants of original blue in protected areas. There is light oxidation and some spots of very fine pitting along the right side of the frame with silvering along most of the high edges. The rifle has standard sights and matching proofs on the barrel and frame. The straight grip walnut stock and grooved forend rate very good with scattered light handling marks, shallow bruises, and flaking finish. The action seems to function well mechanically, and this gallery-style rifle remains in fine condition. (10A10528-7) {C&R} (500/700) Est. 500 - 700</p>
729	<p>Springfield Model 1795 Percussion-Converted Musket-Fowler .72 cal, 40" barrel with a moderately oxidized bore. This 1809-dated musket has been converted to percussion by drum and nipple method and also into fowler configuration. The metal surfaces are mostly are dark plum-brown patina showing scattered old oxidation and light pitting, the antique commercial-looking hammer and the sideplate more of a pewter gunmetal. The lockplate markings have been partially obscured by old pitting while the breech proofs remain mostly intact and strong also showing a large "No. 16" atop the breech. Two iron ramrod thimbles have been affixed to the underside barrel and the walnut stock has been cut-down into a halfstock otherwise remaining in very good plus condition showing a few minor drying cracks, light dings and handling marks from the years. Both the buttplate and lockplate show "1809" dates, an antique iron ramrod is present and a simple brass starburst has been set atop the wrist. One screw behind the triggerguard is missing along with the sling swivel and the arm is sighted with a small brass bead. The lock remains strong and seems to function well mechanically. A rustic arm for over the mantel. (1X13A10635-6) {ANTIQUÉ} (200/400) Est. 200 - 400</p>
730	<p>Central Arms Co. Boxlock Double Shotgun serial #T49645, .410 bore, 24 1/2" shortened barrels choked improved cylinder in both with mostly bright about very good bores showing some scattered patches of light oxidation. The barrels are toning to a relatively even blend of gray patina and old light oxidation with scattered areas of light pitting and the under rib is separating from the barrels at the muzzles. The frame is also toning to gray with overall high edge wear and spots of light oxidation and light pitting with some remnants of original blue here and there, and the triggerguard and double triggers are an oxidized brown patina. The smooth American hardwood pistolgrip stock and splinter forend rate about very good with a flexing 2 1/4" crack in the right side of the grip, a couple shorter cracks behind the upper tang and overall moderate bubbling and crazing of the finish. The added Winchester ventilated recoil pad provides a 14 5/8" length of pull. The shotgun features an automatic safety, brass bead sight, and the barrels are numbered to another gun but lock up tightly and on-face with the top lever right of center. The action appears to function well mechanically. The Central Arms Co. was a trade name owned by Shapleigh Hardware Co. of St. Louis, MO. (2X23A10647-39) {C&R} (400/600) Est. 400 - 600</p>

Lot	Title/Description
731	<p>Mossberg Model 185 D-A Bolt Action Shotgun 20 Ga., 26" barrel choked full with a bright excellent bore. The metal surfaces of this 1950 produced shotgun have toned to an overall brown patina, the bolt remaining in the white. The walnut stock remains in good condition showing no cracks retaining the original buttplate with no chips. The plastic triggerguard has a slight warp with a crack at the rear retaining screw, a hardware store replacement screw securing the magazine shroud and is missing the green plastic fire indicator. The shotgun functions well mechanically with an excellent bore, not often seen on Mossberg utilitarian shotguns of this vintage. (1X25A10803-23) {C&R} (25/75) Est. 25 - 75</p>
732	<p>Savage Model 3C Bolt Action Rifle 22 LR, 24" barrel with bright excellent bore. The metal surfaces retain 95% original evenly thinning blue with light freckling throughout. The triggerguard is mostly a dull pewter gray patina and the rifle has standard sporting style sights and an added Weaver B4 scope with crosshair reticle and crisp slightly hazed optics. The smooth pistolgrip hardwood stock rates near excellent with scattered handling marks and a couple of small bruises. The grooved buttplate shows some scattered light nicks along its edges and the rifle will need mechanical attention as the bolt has been partially disassembled and it is uncertain if all parts are present but it is included. This would make a great project or parts gun. (1X10A10660-7) {MODERN} (25/75) Est. 25 - 75</p>
733	<p>U.S. Marked 1795-Style Flintlock Musket .69 cal., 44 1/2" barrel with an oxidized bore. The metal surfaces have aged to a lightly-oxidized dull gray patina with some softened light pitting around the breech and some evidence of an old light cleaning along the top of the barrel. The top of the breech shows a softened "US" with the first half of the "U" lost to pitting. The lock with intefred rounded iron pan is a period replacement marked "WARRANTED" ahead of the convex goose-neck cock and there is a small lily-shaped inspection mark on the base of the cock and on the lockplate forward of the teat. There are no other visible markings on this musket which appears to be in original flint. The triggerguard features pointed-end extensions like those found on a Model 1795 Type I musket and there is no sideplate as the left stock flat is not inletted; the lockplate is secured only with one contemporary lock screw in the rear hole. The parts of the lock do appear old and the frizzen is unbridled. The walnut stock rates about very good for its age with a worn finish and scattered dings and handling marks from the years including a couple chips, some scattered thin cracks and a worn finish. The tang of the buttplate sits proud of the comb and the middle barrel band retaining spring is missing leaving the middle band a simple friction fit. The sling swivels are missing with the rear sling swivel hole ahead of the triggerguard filled with a screw, a period button-head ramrod whose end is broken leaving it undersized is included, the bayonet stud and brass front sight blade are intact and the action is strong and crisp. (1X23B10570-46) {ANTIQUÉ} (500/700) Est. 500 - 700</p>
734	<p>Enders Royal Pigeon Single Barrel Shotgun serial #C2768, 16 ga., 30" plain barrel choked cylinder and with a good, moderately pitted bore. The metal surfaces are an overall mottled brown and gray with areas of light surface oxidation, pitting, and staining and some minor tool or impact marks throughout. The splinter style forearm rates about very good and has added finish over light dings, handling marks, and small chips. The pistolgrip buttstock rates about good with added finish with small dings and more grievous chipping and some minor cracks. The wrist has a wire repair and the butt is fitted with a newer Herfers hard rubber buttplate. The top lever sits loose but still functions, the firing pin assembly is missing but the action's lock-up remains tight. An overall good example that should be appreciated on a wall or above a mantel. (1X4A10759-7) {C&R} (25/75) Est. 25 - 75</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
735	Ithaca NID Field Grade Boxlock Double Shotgun serial #431076, 12 ga, 28" barrels choked a tight modified and full, with very good bores showing scattered light pitting and spots of oxidation, and a light ding about 10" from the right muzzle. The barrels retain about 90% original blue toning lightly brown with scattered handling marks, spots of old oxidation, and light wear at the muzzles and sides of the breech. The frame has toned to a silvery casehardened patina with scattered light oxidation staining and a few spots of pinprick and light pitting. The checkered pistolgrip walnut stock is in about good condition as lightly refinished with two repaired large chips on either side of the upper tang, a more moderate crack nearly through the wrist, and the Red Head ventilated recoil pad is proud on the sides, the splinter-style forend is in excellent condition as refinished; the checkering on both stock and forend appears likely refreshed. The metal markings are intact, the hunting dogs on the sides of the frame light but visible, and the barrels and forend are numbered to the gun. The shotgun locks up with the barrels slightly off-face, a sliver of light visible between the breech and breech faces, the lever comes to rest just right of center, and the shotgun features double triggers, a nonautomatic safety, a 14 3/4" length of pull, cocking indicators, and is sighted with a lone brass bead. A good candidate for a restoration project. (1X14A10453-54) {C&R} (100/200) Est. 100 - 200
736	WM Enders Oak Leaf Shotgun Action serial #745ES, single barrel shotgun action only. The metal surfaces are mostly a rich brown patina with spots of oxidation staining and light pitting scattered throughout. There was an attempt at cleaning the action leaving the makers brand somewhat washed out along the left side of the frame. The firing pin is no longer present and the smooth walnut pistolgrip stock rates about very good as cleaned with added finish and the metal is slightly proud to the wood. There is no longer a buttplate present and this item will transfer as a Firearm. (2X10A10577-4) {FIREARM} (5/20) Est. 5 - 20
737	Custom Auto Ordnance Government Model Semi-Auto Pistol serial #A0C3442, 45 ACP, 5" barrel with an excellent bore. The metal surfaces retain about 99% original dull blue finish showing light high edge wear, slight operational wear, and handling marks. The grips are checkered rubber Pachmayr stocks featuring the Pachmayr logo and finger / thumb swells on each panel and they remain in excellent condition. Some of the added and standard features include a Patridge front sight, Millett black blade adjustable rear sight, accuracy bushing, long trigger with overtravel stop, checkered arched mainspring housing, and accurizer link and recoil spring guide to name a few. The pistol includes a single unmarked seven-round magazine. The gun shows only light use and should be a good upstart target pistol. (1X8A10814-20) {MODERN} (400/600) Est. 400 - 600
738	Remington Model 1894 Grade BE Double Ejectorgun serial #P138724, 12 ga, 30" damascus barrels choked full with bright bores, the right very fine and the left barrel about good with some light pitting just ahead of the chamber and showing a rather prominent dent at 6 o'clock about 3" back from the muzzle. The barrels retain about 92-94% nice dark plum and gray original swirling damascus showing some scattered mild thinning and handling marks, a few small areas on either barrel showing some more noticeable thin scratches. The action has mostly toned to a mild gray smoky case-hardened patina showing a little bit of mild gray-brown speckling and some generous colors in the more protected areas. The action shows "REMINGTON ARMS CO" on both sides and is embellished with the light tasteful Grade B engraving consisting of simple bordering and a few small foliate flourishes. The top lever and triggerguard show thinning original blue mostly toning to plum-brown. The checkered round knob pistolgrip walnut buttstock and forend remain in very fine condition showing a very light cleaning and added finish long ago and some scattered light dings and handling marks. Length of pull to the added black basketweave Pachmayr pad is about 13 5/8" with drops of 1 3/4" and 2 3/4". The shotgun is equipped with an automatic safety and silver bead front sight and lock-up is solid on-face with the top lever well right of center. The action seems to function well mechanically with strong ejectors. A rather nice BE grade Remington hammerless shotgun. (13A10887-4) {C&R} (600/800) Est. 600 - 800

Lot	Title/Description
739	As-New Windham Weaponry WW-15 SRC-MA Semi-Auto Carbine serial #WW101557, 5.56 NATO, 16" chrome-lined M4-profile barrel with a 1:9" twist and a bright excellent bore. The barrel, railed gas block, receiver extension and small parts retain about 99% plus original Parkerized and black hard coat anodized finishes with the muzzle brake showing two spots where it has been permanently-attached to the barrel. The balance of metal surfaces and the polymer handguards, A2 pistolgrip and fixed M4 buttstock retain 99% plus original Muddy Girl Moonshine camouflage finish. The carbine includes the factory hangtag and one factory-packaged 10-round magazine with sling and manual and the action appears to function well mechanically. (23A10887-3) {MODERN} (600/800) Est. 600 - 800
740	Glock Model 20 Semi-Auto Pistol serial #G1724US, 10mm, 4 5/8" barrel with bright excellent bore. The metal surfaces retain 95% of their lightly faded Tenifer with loss at the muzzle and along the high edges. The polymer frame rates very good with textured grips and checkered front and back straps. The pistol is sighted with Trijicon night sights however they no longer illuminate and this first generation Glock seems to function well mechanically. Included are three ten round factory magazines. (10A10887-5) {MODERN} (300/500) Est. 300 - 500
741	Japanese 1886 Pattern Officers Parade Saber 29" single curved unstopped fuller blade, 34" overall length. The blade features an acid-etched temper line and retains about 95% original polished finish with light scratches and staining along the edges of the fullers and on the ricassos. The hilt consists of a pierced cherry blossom guard with downward quillon, a stippled spine decorated with leaf and cherry blossoms also on the ears and a turned stippledommel with plain lock nut, and a Buffalo horn grip wrapped in double bordered brass wire, the leather buffer washer remains present and intact. The brass has mellowed to a pleasing goldenrod with some tiny impact marks along the edges. The horn grip remains in near excellent condition with a couple tiny marks and some of the thin border wire starting to loosen with time. The tubular steel scabbard retains 95-97% original blue with scattered light scratches and spots of light flaking. The mounts retain about 80% nickel flaking to brown and gray patina mainly along the drag. An example of an 1886 pattern General Officer's saber. (5B10708-6) (1000/1500) Est. 1,000 - 1,500
742	Japanese Type 30 Arisaka Bayonet by Nagoya serial #18217, 15 3/4" blade, 20 1/8" overall with hooked quillon. The blade retains about 92% original blue showing some mild silvering from the scabbard and areas of thinning under bright light. The guard andommel retain about 70% original blue showing some mild oxidation overall and the smooth hardwood grips remain in very good plus condition showing some scattered light dings and handling marks. The scabbard shows a couple of small shallow dents and a few minor oxidation speckles otherwise retaining about 94% original blue. An attractive Arisaka bayonet. (13A10768-54A) (75/150) Est. 75 - 150
743	Japanese Type 30 Arisaka Bayonet by National Denki serial #30475, 15 3/4" blade, 20 1/8" overall with squared-off straight quillon. This bayonet was made under Kokura supervision and the blade is a mottled gray and plum-brown patina showing light pitting and evident of cleaning throughout. The guard andommel are a deep plum-brown lightly oxidized patina and the smooth hardwood grips are very good showing some light dings. The scabbard is a similar patina as theommel showing overall oxidation staining and some light handling marks. (13A10770-2B) (50/100) Est. 50 - 100
744	Japanese Type 30 Bayonet by Hikari Seiki Seisakusho serial #97744, 15 3/4" blade, 20 1/8" overall with hooked quillon. This bayonet was made under Kokura supervision and shows the distinctive "hourglass" logo. The blade remains in-the-white and rates near excellent showing just a few mild speckles or faint scabbard marks. The guard andommel are a dark plum-brown patina showing some old oxidation scattered about and the smooth hardwood grips remain in very good plus condition showing a couple tiny chips, dings and areas of darkening. The scabbard shows generous original blue thinning and toning to plum-brown patina with some mild oxidation and the original leather frog is intact rating very good showing moderate creasing and scuffing. A fine Arisaka bayonet. (13A10770-2) (75/150) Est. 75 - 150

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
745	Austrian Model 1853 Pioneer's Short Sword by Striberny 18 1/8" blade, 24 5/8" overall. The blade of this imposing short sword remains in very good condition showing scattered mild oxidation its full length and a few areas of lightly cleaned old pitting on either side. The blade otherwise remains partially bright with areas of deep gray and gunmetal. The ricasso shows nice markings with "GF", "ANT / STRIBERNY" and an Austrian eagle acceptance stamp. The heavy duty guard is a similar patina as the blade and retains a nice unit marking "27. D.A.R. / 343" likely indicating an artillery regiment. The horn grips with rounded pommel remain in very good plus condition showing some scattered scuffs and crackling from the years. The original leather-covered wooden scabbard with iron hardware is present and remains in very fine condition, showing some light scuffing and flaking and the hardware a mix of gunmetal and mild gray-brown patina. A nice example of these interesting and rather scarce Austrian swords. (13A10770-11) (350/550) Est. 350 - 550
746	Winchester Model 1895 Bayonet 16" blade, 20 1/2" overall. This is a very nice example for the Russian contract Model 1895 rifle, the blade remaining in near excellent condition showing some scattered errant minor freckling and light handling marks. The guard and pommel are similar showing a little more oxidation staining and freckling scattered about, the front face of the guard showing a crisp "WINCHESTER REPEATING ARMS CO." marking. The smooth walnut grips are excellent showing a few minor handling marks. The bayonet includes a mismatched Model 1917 scabbard with green-painted leather body that remains in fine condition. A nice example of a desirable bayonet. (13A10770-4) (200/300) Est. 200 - 300
747	Italian M38 Carcano Bayonet by L. Franchi serial #087402, 7" blade, 11 1/2" overall. The blade retains perhaps 85-90% original blue that is taking on the familiar deep plum tone, the areas of loss due to some areas of light pitting or erosion from some sort of caustic substance nearer the tip. This example is the completely fixed variant and the guard and pommel retain generous original blue showing some scattered oxidation and small areas of light pitting. The spine retains nice markings and shows a "4 / UT" stamp. The smooth hardwood grips remain in very good plus condition showing some light dings and areas of oil soaking. The scabbard remains in nice condition retaining about 90% original thinning blue showing some light handling marks and freckling. A very good Carcano bayonet. (13A10770-47C) (75/125) Est. 75 - 125
748	U.S. MK I Trench Knife by Landers, Frary & Clark 7" blade, 12" overall. This is a very handsome 1918-dated example of these classic and desirable U.S. trench knives. The blade retains about 80% original blackened finish showing some moderate thinning under bright light, light scabbard marks and a few scattered small areas of old oxidation and perhaps a few tiny pinprick pits. The tip and edges of the blade remain unmolested and the brass grip is in very fine condition again retaining much of its original blackened finish with just some light handling marks. The markings remain bold and the original maker-marked and 1918-dated scabbard is included remaining in fine condition with about 85% blackened finish and belt hooks intact. A fine example for the martial collector. (13B10770-3) (700/900) Est. 700 - 900
749	British Pattern 1907 SMLE Bayonet by Wilkinson 17" blade, 22" overall. The blade retains about 85% arsenal-refurbished matte blue showing some silvering along the high edges and mild scabbard wear. There are some remnants of dark green paint along the ricasso and the markings remain mostly strong showing 1907 manufacture date and a 1917 refurbishment date. The guard and pommel are a mix of deep gunmetal and gray-brown patina showing some dings and machine marks along the pommel. The smooth hardwood grips remain in very good condition, one panel with a bit more wear showing some thin cracks and light chips. The 1943-dated scabbard remains in about very good plus condition, the fittings with a heavy green-brown paint and the leather body showing some light scuffing and handling marks. (13A10768-50A) (30/60) Est. 30 - 60

Lot	Title/Description
750	French Model 1831 Artillery Short Sword 19 1/4" blade, 25 1/4" overall. The blade is a dark gray-brown oxidized patina showing some remnants of old paint or applied enamel over moderate pitting and erosion, a few smaller areas perhaps a bit heavier. The edges of the blade show some rough pitted areas and the tip is slightly bent. The ricasso retains a strong pair of French inspector markings though the script manufacturer markings have faded and the manufacture date is only partially legible "Juin 183.". The ribbed brass grip remains in very good condition as lightly cleaned to a mild goldenrod patina showing some scattered light dings and scratches otherwise retaining strong inspector stamps. There is no scabbard present. (13A10770-12) (150/250) Est. 150 - 250
751	Japanese Type 30 Arisaka Bayonet by National Denki serial #28938, 15 3/4" blade, 20 1/8" overall with hooked quillon. The blade has been lightly cleaned to a deep gray and pewter gunmetal patina showing some scattered light pitting and remnants of heavy grease. The main edge shows perhaps only some minor careful sharpening and the Kokura and National Denki markings remain strong. The guard and pommel are a deep plum-brown patina showing some old oxidation and the smooth hardwood grips are very fine showing some darkening and light handling marks. The scabbard is a deep plum-brown patina showing one shallow dent along the back side and the original leather frog is intact remaining in very good condition showing some moderate creasing and light crackling from the years. (13A10770-2A) (75/150) Est. 75 - 150
752	French Model 1886 Lebel Bayonet serial #C98, 20 1/2" blade, 25 1/4" overall. The blade of this "Rosalie" bayonet is mostly a pewter gunmetal patina showing some overall light oxidation staining and small dings along the edges. The guard with intact hooked quillon is a similar patina and retains strong markings while the German silver grip shows some scattered light dings. The scabbard retains most of its black enamel paint showing some small flakes, light dings and one more moderate dent about halfway down. The original leather frog is intact showing some light scuffs and a few areas of loosed stitching, the back surface with a faded ink number that appears to be "8356". (13A10768-33A) (50/100) Est. 50 - 100
753	French Model 1886 Lebel Bayonets 20 1/2" blades, 25 1/4" overall, both without hooked quillons. The first bayonet is un-numbered and without a scabbard, the blade rating about very fine showing some scattered light staining and light handling marks while the guard shows some remnants of pinprick pitting and oxidation staining. The German silver handle rates very fine showing a few light dings and handling marks. The second bayonet is numbered "47879" and the blade rates about very good showing some overall light oxidation staining and areas of gray-brown patina, the guard being similar and the grip is worn to mild other brass showing some overall dings and handling marks. The scabbard remains in very good plus condition. (13A10768-45A) (50/100) Est. 50 - 100
754	Italian M91 Carcano Bayonet by Rocca 11 3/4" blade, 16 3/8" overall. The blade retains a healthy amount of arsenal blue with areas thinning and toning to plum-brown and showing some patches of old oxidation staining and fine pinprick pitting. The guard and pommel are a deep plum-brown showing light oxidation overall, the spine marked "ROCCA". The smooth hardwood grips remain in very good plus condition showing light dings and handling marks. The included leather-bodied scabbard with steel hardware remains in very good plus condition showing light scuffs and some minor flaking along the body, the hardware with some patches of moderate oxidation. The scabbard body retains a very nice "ROCCA-1940" stamp. A very good Carcano bayonet. (13A10770-47A) (50/100) Est. 50 - 100
755	Vintage Oversized Folder This is an interesting large scale folding multi-tool possibly made as a salesman's sample or demonstrator (or indeed just a very big folder!), the main blade does show faded remnants of a maker's mark that were strangely ground away leaving them illegible. The tool measures 6 3/4" long when folded and is about 1 5/16" wide. There are five tools including a 5 1/4" clip point main blade, 2 1/2" can opener, a rather bulky 5 1/2" set of shears, 5 1/2" saw blade and a 2 1/2" hawkbill blade. The tools are all a mix of mild gray-brown and gunmetal patina showing scattered light oxidation staining, and two appear to be missing from either end. The tool is equipped with a large lanyard ring, aluminum bolsters and a set of stag scales secured by three iron pins. There is a thin cutout through each scale and its iron back plate perhaps to offer clearance to grab the tools that were on either end but are no longer present. (13B10770-38) (100/200) Est. 100 - 200

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
756	<p>Vintage Skull & Crossbones Dagger</p> <p>This is an interesting dagger with brass skull pommel and crossbones guard, certainly of vintage or antique construction perhaps for some sort of fraternal society. The dagger measures 15 1/2" overall with a 9 3/4" blade. The blade has toned to a mix of deep gray and plum-brown patina showing some old oxidation, light pitting and mild wear along the tip and edges. There do not appear to be any evident markings along the ricasso. The brass guard with small floral motif collar and the skull pommel are a nice rich ocher patina showing some light dings and handling marks. The pommel is secured is a simple iron rivet and has loosened somewhat, now rotating freely but otherwise remains affixed. The smooth dark-stained hardwood grip is very good showing some flaking, thin shallow chips and a few thin drying cracks that appears to show a couple old pin repairs. No scabbard is present. (13A10770-22) (150/250) Est. 150 - 250</p>
757	<p>French Model 1874 Gras Bayonet by Chatellerault</p> <p>serial #B88393, 20 1/2" blade, 25 3/8" overall. The blade of this September 1877-dated bayonet rates very good plus showing some overall gray-brown oxidation speckling, some minor scabbard wear and subtle grind marks near the tip. The blade retains nice markings and the hooked guard is a darker plum-brown patina showing some old oxidation. The pommel is a lovely deep ocher patina while the smooth walnut grips remains in near excellent condition showing a few small dings. The included matching scabbard retains about 85% original blue showing some mild thinning and oxidation staining scattered about. (13A10770-47D) (50/100) Est. 50 - 100</p>
758	<p>British Pattern 1888 MKI Type II Bayonet by Mole</p> <p>12" blade, 16 3/4" overall. The blade of this 1896-made bayonet remains in very fine condition showing some mild scabbard marks and perhaps some subtle cleaning marks, the edges and tip remaining excellent and unmolested. The ricasso retains excellent crisp markings and the bayonet appears to have undergone at least one refurbishment showing additional inspector stamps and "03" date. The guard and pommel are a pewter gunmetal patina showing some mild gray-brown freckling and a bit of old minor pitting here and there. The pommel shows an out-of-service stamp and "YK M RGA / 360", indicating at least partially the Royal Garrison Artillery. The smooth walnut grips with two brass rivets and oil hole remain in near excellent condition showing a few light dings. The included black leather-bodied scabbard with steel fittings remains in very good plus condition showing some light scuffing or fine flaking along the body which retains softened markings along the back. The hardware is pewter gunmetal showing a little old oxidation staining, the chape with a deeply struck out-of-service stamp and the throat numbered "294". A mismatched brown leather American Rock Island Arsenal frog is also present that shows some flaking and discoloration. (13A10770-8) (75/150) Est. 75 - 150</p>
759	<p>U.S. 1863 Zouave Bayonet</p> <p>20 1/8" blade, 25" overall. The blade remains in fine condition and is mostly bright showing a few small patches of light pitting or old oxidation and some old dings or nicks along the edges. The ricasso is stamped only with a small "H" and the guard and ribbed brass grip have toned to an attractive ocher patina showing some light dings and mild tarnish, a few dings more moderate along the back of the pommel. The grip retains strong inspector marks with "BH" on the spine. The included leather-bodied scabbard with brass hardware rates good, the leather with moderate crackling and the stitched seam has come undone and split its full-length. The brass hardware is otherwise a nice ocher patina. (13A10770-47AA) (75/150) Est. 75 - 150</p>
760	<p>U.S. 1863 Zouave Bayonet</p> <p>20 1/8" blade, 25" overall. The blade remains in fine condition and is mostly bright showing some scattered small areas of minor oxidation staining and perhaps a few tiny pinprick pits. The edge and tip are unmolested and remain in excellent condition and the ricasso is stamped only with what appears to be a small "S" inspector mark. The guard and ribbed brass grip remain in very good plus condition having taken on a nice mellow patina showing some overall light dings and minor tarnishing. The grip retains strong inspector marks with "BH" on the spine. The included leather-bodied scabbard with brass hardware rates very good, its biggest apology the brass tip hardware having detached and is now loosely secured with some old tape; the main seam of the leather body is otherwise intact and secure and the brass is a nice ocher patina. (13A10770-47AB) (75/150) Est. 75 - 150</p>

Lot	Title/Description
761	<p>Unmarked German Model 1871-Style Bayonet</p> <p>18 1/2" blade, 23 1/2" overall with distinctive 4 5/8" S-shaped guard. Appearing to follow the style of the 1871 bayonet in every respect, this example strangely appears to be completely unmarked. The blade is a mix of partially bright pewter gunmetal and mild gray-brown patina rating very good plus showing cleaned oxidation staining, light scratches and dings along the edges. The guard is nickel-plated retaining about 80-85% finish flaking to oxidized brown while the brass grip with prominent birds head pommel is a mellow goldenrod patina showing some light dings and mild tarnish. The guard exhibits a bit of play. The leather-bodied scabbard with brass fittings is similarly unmarked and remains in about good condition, the stitched seam having come mostly undone and the body showing a noticeable bend around its midpoint. The brass fittings are a little loose and otherwise toned to a nice ocher patina. (13A10770-10) (100/200) Est. 100 - 200</p>
762	<p>German Model 1898/05 Bayonet</p> <p>14 1/2" "butcher" blade, 19 3/4" overall with flashguard. The blade remains in very good plus condition remaining partially bright and showing a bit of mild oxidation staining and fine pinprick pitting scattered about, the edges and tip remaining in fine condition. The ricasso is dual-marked "Walter & Co. / Muhlhhausen in Thr." and "GEBR. / HARTKOPF / SOLINGEN". The guard and pommel are a mix of gunmetal and plum-brown patina showing some old oxidation staining while the grooved walnut handles remain in very fine condition showing some scattered light dings. The spine of the blade and the pommel show strong inspector stamps and the included steel scabbard retains about 80% original blue showing some overall oxidation speckling and areas toning to plum-brown patina, the finial with a small inspector stamp. The original leather frog is present and remains in about good condition showing moderate flaking and crackling overall, the stitching and rivets otherwise intact. The back of the frog retains a faded maker marking that is difficult to discern though the "1917" date is visible. An attractive bayonet for the World War One German collector. (13A10770-6) (100/200) Est. 100 - 200</p>
763	<p>German Model 1898/05 Sawback Bayonet by Erfurt</p> <p>14 1/2" sawback "butcher" blade, 19 3/4" overall with flashguard. The blade of this bayonet remains in very good plus condition remaining mostly bright and showing some areas of thin scratches and some lightly cleaned oxidation staining. The main edge has been lightly sharpened and otherwise remains in fine condition while the ricasso retains nice "(Crown) / ERFURT" marking and inspector stamps along the spine. The guard and pommel are mostly gray-brown showing some old oxidation staining and the grooved walnut grips remain in very good plus condition having darkened from the years and showing light handling marks. The included original steel scabbard is mostly a rotted gray-brown patina showing overall old oxidation freckling and mottled good inspector stamps. A nice example of these desirable bayonets. (13A10770-47H) (150/250) Est. 150 - 250</p>
764	<p>Italian M91 TS Carcano Bayonet by Brescia</p> <p>11 3/4" blade, 16 1/2" overall with distinctive transverse push-button locking catch. The blade has toned to a deep gray and plum-brown patina showing some scattered light pitting and oxidation with a few nicks along the edge and some subtle streaks of original blue. The guard and pommel are a dark oxidized brown patina, the serial number now obscured by pitting and oxidation and the spring-loaded catch otherwise remains functional. The smooth hardwood grips show what appears to be fire damage, the left scale with heavy flaking and deterioration, its integrity appears to be compromised. The right scale is in better condition showing a small crack and light dings. The included black leather-bodied scabbard remains in about very good condition showing some light crackling and flaking along the body, the tip a dark ocher-brown, and the frog stud screw is missing. The body retains a strong 1917 date stamp and the included dark green leather frog rates very good showing some moderate scuffing and light flaking. A fair example of a scarce bayonet. (13A10770-47B) (50/100) Est. 50 - 100</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
765	U.S. Surcharge Remington P13/M1917 Bayonet 17 1/8" blade, 22" overall. This interesting bayonet shows "1913 / 9 17 / (Remington)" markings on the ricasso along with the British "(Broad Arrow) / (Crown) / 5 / A" inspector stamp which has been canceled out and a "US" stamped adjacent. The blade remains in very fine condition and is a nice pale matte gray showing some scattered mild oxidation staining and speckling, the edge with a series of small nicks nearer the tip and the ricasso shows strong blue. The guard and pommel retain about 90% original blue thinning and toning to mild gray-brown and the double-grooved walnut grips remain in very fine condition showing a few minor dings. The green-painted leather scabbard with steel fittings and brass hanger remains in very good plus condition showing some light flaking along the body and the metal mostly toned to mild gray-brown patina. The hardware shows a circled "GF" stamp. A fine example for the martial collector. (13B10770-5) (100/200) Est. 100 - 200
766	U.S. Model 1917 Bayonet by Remington 17 1/8" blade, 22" overall. This is a nice 1917-dated bayonet, the blade mostly toned to a pleasant deep gray-brown patina with a few sparsely scattered spots of mild oxidation staining or speckling, the edge and tip in very fine condition. The ricasso retains nice markings and 95% rust blue and retains nice markings with Remington roundel and 1917 date and "(Flaming Bomb) / U.S.", "(Eagle Head) / 28" and "X". The guard and pommel also retain about 95% rust blue showing some mild edge wear and sparse freckling. The double-grooved walnut grips are near excellent showing a few minor dings. The green-painted leather scabbard with steel fittings and brass hanger remains in very good plus condition showing some light flaking along the body and the metal mostly toned to mild gray-brown patina. The hardware shows a circled "GF" stamp. A handsome Remington bayonet. (13A10770-5A) (75/125) Est. 75 - 125
767	U.S. Model 1917 Bayonet by Winchester 17" blade 21 3/4" overall. The blade of this 1917-dated bayonet remains in very good condition retaining much of its original matte gray finish showing some light scabbard wear and some oxidation speckling. There are some fine nicks along the tip and main edge, while the spine shows an about 4" long area of small moderate dings. The ricasso shows strong rust blue and nice "1917 / (W)" markings along with "(Flaming Bomb) / U.S.", eagle head and "X". The guard and pommel are a relatively even mix of original rust blue and mild gray-brown patina while the double-grooved walnut grips remain in very good condition showing some scattered light dings. No scabbard is present. (13A10770-5B) (50/100) Est. 50 - 100
768	U.S. Model 1905 Bayonet by Springfield Armory serial #422036, 16" blade, 20 1/2" overall. The blade of this 1909-dated bayonet retains much of its original bright polish with some scattered areas of darker gray-brown oxidation and pinprick pitting. The ricasso markings remain crisp and it retains the thin band of original blackened finish at the base. The guard and pommel retain about 85% original rust blue showing some high edge wear and light handling marks along the guard. The textured walnut grips remain in very fine condition showing a few light dings and handling marks. The khaki canvas-covered scabbard with leather chape remains in very fine condition showing some light staining and scuffing. (13A10768-4A) (50/100) Est. 50 - 100
769	U.S. Model 1905 Bayonet by Springfield Armory serial #646880, 16" blade, 20 1/2" overall. The blade of this 1916-dated bayonet remains mostly bright showing some scattered areas of old oxidation and light pitting here and there. The ricasso markings remain crisp and it retains the thin band of original blackened finish at the base. The guard and pommel retain about 90% original rust blue showing some mild edge wear and light oxidation staining. The textured walnut grips remain in near excellent condition with a few light handling marks. The khaki canvas-covered scabbard with leather chape remains in very good condition showing some overall light staining along the canvas and some scuffing of the leather. (13A10770-7) (50/100) Est. 50 - 100
770	Spanish Model 1893 Mauser Bayonet by Toledo Arsenal serial #A241, 10 1/8" blade, 15" overall. The blade of this 1902-dated bayonet remains in about very fine condition as lightly cleaned showing some remnants of smoothed-over light pitting and oxidation staining. The ricasso retains strong arsenal marking and the guard and pommel are in-the-white showing scattered mild staining and light oxidation. The smooth walnut grips remain in very fine condition and the black leather scabbard with steel mounts remains in good condition, the leather with some creasing and cracking and the mounts are rather loose. (13A10770-47) (30/60) Est. 30 - 60

Lot	Title/Description
771	Swiss Model 1878 Vetterli Bayonet by S.J.G. Neuhausen serial #203853, 18 3/4" sawback blade, 23 1/2" overall. The blade remains in very fine condition showing some light scabbard marks and a little bit of fine oxidation staining scattered about. The guard and pommel have been lightly cleaned to pewter gunmetal showing some light handling marks and remnants of oxidation staining otherwise retaining strong markings. The checkered black gutta-percha grips are secured by four steel rivets and remain in very fine condition. The black leather body scabbard with steel mounts remains in very good condition showing some light flaking and scuffing, the mounts mostly toned to a mix of pewter gunmetal and gray-brown patina and stamped "49". (13A10770-47AC) (50/100) Est. 50 - 100
772	Swedish Model 1896 Mauser Bayonet by E.J.A.B. serial #192, 8 1/2" blade, 13 1/4" overall. The blade remains in near excellent condition showing some sparse subtle gray freckles. The ricasso retains crisp markings and the steel guard and grip retain about 90% dark matte blue showing some edge wear and handling marks. The steel scabbard retains a similar amount of matte blue and shows numerous markings including "287", "6 / 119", "No. 395" and small E.J.A.B. maker mark. (13A10768-16A) (60/80) Est. 60 - 80
773	U.S. Model 1892 Krag Bayonet 11 3/4" blade, 16 1/4" overall. This 1897-dated bayonet remains in good condition, the metal surfaces mostly a pewter gunmetal patina showing evidence of an old cleaning with some remnants of oxidation staining and pinprick pitting. The edge shows an old amateur sharpening and the tip is somewhat rounded. The ricasso markings are otherwise intact and strong. A previous owner has lightly scratched his name along the pommel and the smooth walnut grips with flush rivets remain in very good condition having darkened from the years and exhibiting some drying and handling marks. There is no scabbard present. (13A10768-40) (60/80) Est. 60 - 80
774	U.S. M5 Bayonet by Imperial 6 3/4" blade, 11 1/2" overall. The metal surfaces retain about 80% arsenal Parkerized finish showing some thinning and areas toning to brown under bright light. The blade shows a little old oxidation nearer the tip and the point shows a couple light chips or notches at either side. The checkered black Bakelite grips remain in very fine condition and there is no scabbard present. (13A10770-13) (15/30) Est. 15 - 30
775	U.S. Model 1873 Trapdoor Bayonet 18" blade, 21" overall. The metal surfaces retain about 92% original blue showing some mild thinning under bright light, a few scattered oxidation speckles and toning to a rich plum patina under bright. The ricasso shows crisp punch dot over "US" stamp. The scabbard retains about 75-80% original blue showing moderate thinning and light handling marks. The black leather frog with brass "US" escutcheon remains in very good plus condition showing some light flaking and scuffing retaining strong "ROCK ISLAND / ARSENAL" stamp. A fine example. (13A10770-47G) (50/100) Est. 50 - 100
776	Lot of Socket Bayonets Two total. One Model 1873 Trapdoor bayonet, 18" blade, 21" overall. The metal surfaces retain perhaps 70% original blue thinning and toning to gray-brown patina with some overall oxidation staining showing punch dot over "US" on the ricasso. There is no scabbard present. The second bayonet is in relic condition with 18" blade and 20 1/2" overall. It is a dark oxidized brown patina showing heavy pitting overall. Part of the locking ring has broken off and there are no longer any markings. Socket measures 2.62" in length and the socket is about 0.70" inside diameter. (13A10770-47F) (30/60) Est. 30 - 60
777	U.S. Model 1873 Trapdoor Bayonet 18" blade, 21" overall. The metal surfaces are a relatively even mix of original blue and gray-brown patina showing some moderate oxidation overall and light dings. The ricasso shows strong "US" marking. The scabbard shows streaks of original blue mostly toned to gray-brown and showing some overall moderate oxidation staining with a moderate dent along the back surface. The leather frog with brass "US" belt hook-escutcheon rates good showing some moderate crackling and flaking throughout the leather which is somewhat tender and the brass is a nice other patina. (13A10770-9) (40/80) Est. 40 - 80

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
778	<p>U.S. Model 1873 Trapdoor Bayonet 18" blade, 21" overall. The metal surfaces are a dark plum-brown patina showing some moderate oxidation staining, the socket with some heavier corrosion and encrustation. The locking ring is missing, there is a 2" crack in the socket body and the muzzle end is out-of-round. The ricasso retains a visible "US" stamp. The scabbard retains generous original blue throughout flaking to gray-brown patina and showing moderate oxidation overall. The leather frog with brass "US" belt hook-escutcheon rates fair-good with the stitching torn and coming undone along the back surface, moderate flaking and the brass taking on a nice ocher patina. (13A10770-9A) (40/80) Est. 40 - 80</p>
779	<p>Vintage Eaglehead Machete 18 5/8" blade, 24" overall. The blade of this older machete shows a faded maker stamp or some other mark on the ricasso but it is difficult to discern due to the oxidation. The blade shows a few sparse bright areas and is an overall dark brown oxidized patina. The dainty brass guard and endearing eagle head pommel are a pleasant ocher patina. The grip is smooth buffalo horn bisected with a section of clear, red and sky blue plastic. (13A10770-47E) (20/40) Est. 20 - 40</p>
780	<p>U.S. Model 1850 Foot Officer's Sword By Clauberg 31 1/4" blade with wide and narrow fullers, 37" overall length. The blade is etched with stand of flags, "US" and floral motifs on the obverse side while the reverse side has Federal Eagle and "E PLURIBUS UNUM" riband with matching floral motifs and Clauberg standing knight Solingen maker mark on the ricasso. The blades bright finish has mellowed slightly showing an older light cleaning with scattered fine pitting, a few freckles and spots of staining. The brass hilt has a pierced guard with round quillon and a Phrygian pommel both decorated with floral and leaf motifs and a shagreen covered handle wrapped in brass wire. The brass has a tarnished patina with light oxidation forming along the edges. The shagreen covering remains about 95% intact with tiny holes and scuffs and the brass wire has separated in spots and loosened with age. The leather buffer washer remains present and intact. The leather scabbard has overall light cracking and handle marks. The brass mounts have a pleasing dark ocher patina with some light impact marks and dents primarily on the tip chape. An overall very good plus imported 1850 Foot Officer's sword. (5A10838-44) (700/900) Est. 700 - 900</p>
781	<p>Rare Case XX Set Of Antler Handle Razor Steak Knives Complete set of antler handle knives in near mint condition made out of Chrome Vanadium steel which predates Case blades from stainless steel which should date these knives from the 1930-40's. The knives measure approximately 9 1/8" overall with 4 3/4" concave ground blades equipped with turned, integral ferrules. The blades remain bright and unsharpened except for one showing light staining along the edges and ferrule. The top of the obverse cheek is marked "CASE XX / CHROMIUM" and "PROCESS PAT. / NO. 2147079". The antler tine handles remain in excellent condition, some having slight curves and others darkening nicely with age. Included is what appears to be an original walnut holder in excellent condition showing minor wear and staining on the brown fabric lining. (5A10708-6A) (150/250) Est. 150 - 250</p>
782	<p>Solingen Stag Handle Carving Set Vintage five piece carving set consisting of a cleaver, game shears, carving knife, sharpening steel and serving fork equipped with stainless steel blades, turned ferrules and pommels and heavy stag handles. The 7 1/2" carving knife and 6" cleaver are etched with three-color elk and stag scenes surrounded by acorn and oak leaf borders and are both marked "SOLINGEN-GERMANY / STAINLESS STEEL". The tools retain all their original bright polish with only light sharpening marks on both sides of the carving knife. The steel retains nearly all its matte finish with a couple thin streaks of silvering from use and is stamped "SOLINGEN" on one side and "GERMANY" on the other. The stag handles remain in excellent condition having nice reddish-brown colors and a thick good hand feel. The ferrules remain bright and some of the pommels have loosened with age. The set is housed in a fair condition green faux reptile skin hinged case with fitted green baize interior. The left side and front of the lower compartment have separated, and the edges and lid show modest scuffing. (5A10708-6B) (200/400) Est. 200 - 400</p>

Lot	Title/Description
783	<p>U.S. Model 1840 Musician's Sword By Ames 28 1/4" straight blade with single stopped fullers, 34 5/8" overall length. The blade is mellowing to bright silver with scattered freckling, spots of oxidation and two small forging dimples in the obverse fuller about 4" in front of the ricasso. The obverse ricasso is marked "U.S. / A.H.C. / 1863" while the reverse ricasso is marked "AMES MANF. Co. / CHICCOPEE / MASS.", the marking is light, the "A" in Ames is almost completely lost to time. The solid brass hilt has a golden ocher patina with spots of light tarnish and verdigris along the edges of the buffer washer. There is no scabbard present. (5A10838-40) (200/300) Est. 200 - 300</p>
784	<p>Unmarked U.S. 1840 Militia Officer's Sword 25 1/2" plain double edged blade, 32" overall length. The blade shows scattered tiny scratches, fine oxidation and scabbard marks, there are no visible maker markings. The hilt consists of a brass "bowtie" crossguard with shield shaped langets, plumed knight's head pommel and a reeded bone grip. The brass is an ocher patina with spots of light tarnish and ingrained dirt along some of the edges. The grip remains in excellent condition acquiring a pleasant cream color with light staining and verdigris within the grooves. There is no scabbard present. (5A10838-38) (300/500) Est. 300 - 500</p>
785	<p>Japanese 1886 Pattern Officers Parade Saber 33 1/4" single curved, unstoppped fuller bade, 38 3/8" overall length. The blade features an acid-etched temper line and retains 98% original polished finish with light scabbard marks, minute nicks along the main edge and a few specks of staining along the edges of the buffer washer. The hilt consists of a pierced cherry blossom guard with downward quillon, a stippled spine with Mon's family crest toward the bottom and cherry blossom and leaf top panel, and a buffalo horn grip wrapped in bordered braided brass wire. The brass has muted to ocher with areas of tarnish and scattered verdigris along the protected edges. The horn grips and wrappings remain in excellent condition showing light ingrained dirt staining along the edges. The tubular steel scabbard retains about 85% flaking original nickel with scattered dents and spots of oxidation. (5A10838-34) (500/700) Est. 500 - 700</p>
786	<p>Indian Tulwar Sword 27 3/4" curved un-fullered blade, 33" overall length. The blade has been ground and sharpened during the period of use still showing a few tiny nicks along the main edge. The blade has toned to bright steel patina with scattered oxidation, staining and scratches, there are remnants of a simple dot and triangle design on the obverse forte. The classic regional tulwar hilt features a pommel spike, curved knucklebow, grooved integral quillons and long langets ending in pointed finials, the disk pommel and locking not are no longer present. The hilt has finish very similar to the blade with a tiny slot and dent on the pommel spike where the disk was once present. There is no scabbard present. (5A10838-37) (100/200) Est. 100 - 200</p>
787	<p>Royal Arch Knights Templar Captain General Fraternal Sword By Roby ceremonial and attractive Templar sword measures 37" overall with a 30 1/4" signed double edged blade equipped with unstoppped fullers. The blade has mellowed to a bright silvery patina with scattered patches of freckling and staining. The obverse side of the blade is etched in Gothic script "Alfred Tate" with floral décor and the ricasso is marked with a light "C. ROBY & Co. / W. CHELMSFORD / MASS.", while the reverse side of the blade is etched "Hugues de Payens Encampment" in serrated riband centered between scroll motifs. The hilt has a plumed knights head pommel, double chain knucklebow, crossguard with dual lobe quillons, pierced static obverse counter guard with equilateral triangles amongst vines and smaller pierced reverse counter guard with cross on a nine pointed star. The curved ebony grip remains in excellent condition. The Ames replacement tubular brass scabbard retains about 95% original gold plate with light flaking along the edges and on the acorn shaped finial. The scabbard is decorated with a red cross starburst shield hanger and is engraved with a small Maltese cross and decorative floral scroll. The rear of the scabbard has Gothic script initials "RYCJ" between the hangers and Ames Mfg. Co. maker mark in front of the throat. Hugues de Payens led the first Christian Crusade and the started the Knights Templar Masonic order. (5B10838-39) (200/400) Est. 200 - 400</p>

Lot	Title/Description
788	<p>U.S. Model 1860 Staff & Field Officers Sword With William Read & Sons Retailer Markings</p> <p>30" light diamond shaped double edged blade, 35 1/4" overall length. The blade has mellowed to bright silver with scattered oxidation, fine pitting and staining. The reverse ricasso has rectangular "WM. READ / & SONS / BOSTON / MASS." retailer mark, the blade is plain and shows no evidence of being etched. The hilt has a brass floral center knucklebow with plain oval quillon, static counterguard with Federal Eagle on panoply of flags on the obverse side and thumb rest on the reverse side, a foliate pommel with eagle and shield on the sides and a leather covered grip wrapped with braided brass wire. The brass has toned to dark ocher, the wrappings show moderate flaking remaining about 50% intact exposing the wood grip and the braided brass wire has loosened with time but remains in place. The leather buffer washer is no longer present. The tubular steel scabbard shows scattered fine staining with spots of flaking and oxidation, the brass mounts have toned to dark ocher with modest oxidation and verdigris forming along the drag. Accompanying the sword is a handwritten note dated 1954 stating this sword belonged to Grandfather Blyes and was a member of the Odd Fellows drill team and was in the U.S. Navy from 1882-1886. (5A10838-42) (100/200) Est. 100 - 200</p>
789	<p>Antique Knights Of Pythias Fraternal Sword</p> <p>24" double edged unstopped fullered blade, maker unknown, 35" overall length. The blade has toned to pale gray patina with scattered light oxidation and staining with much original polish and scabbard scratches along the foible. The reverse fuller is lightly etched with what appears to be "T. B. VAOMAN" centered between loose scroll while the obverse side etched "Lodge No. 17" in between two undecipherable words and similar scroll. The silverplated brass hilt is comprised of a rectangular style crossguard with curved foliate quillons, shield shaped langet on the reverse side, knight on horse below "FCB" in decorative border on the obverse side, double chain knucklebow, a bird resting on a plumed knights head pommel, decorative ferrule and ebony grip. The metal surfaces have a pleasing tarnished patina with tiny specks of exposed brass along some of the high edges and the ebony grip remains in excellent condition showing minimal wear. The nickel plated brass scabbard has a pale gray patina and is decorated with simple engraved geometric shapes, a knights head amongst cross swords, an embossed standing knight between the hangers and crossed axe heads on a triangular finial. The nickel remains intact having mellowed slightly with age and the body shows a couple tiny dings and specks of staining. The throat is loose but present and attached to one of the hangers is a braided ring hanger. Accompanying the sword is an old tattered handwritten note stating that the sword belonged to the previous owners great uncle who fought in the Civil War, was a Knights of Pythias and died in 1915. (5A10838-36) (100/200) Est. 100 - 200</p>
790	<p>Independent Order Of Odd Fellows Fraternal Sword By Ames</p> <p>This is a rather nice sword measuring 34 3/4" with a 28" double edged blade showing etched decorations front and rear. The obverse side is etched "Frank Currier" in starburst centered amongst floral scroll on a gold washed background while the reverse side is etched "Palestine Encampment" amongst similar scroll and "AMES / SWORD / C.: / CHICAGO / Ill." At the beginning of the forte. The blade retains most of its bright polish with thin spots of light staining and the etching retaining perhaps 85% original gold wash. The hilt consists of a decorative open-flap tent shaped pommel, chain knucklebow, crossguard with embossed all-seeing eye and "IOOF" on the obverse side, three pillars with tower and chalice on the reverse side and an ebony cigar shaped grip. The brass surfaces have a dark ocher patina with traces of gold gilt along the protected edges and silverplate on the crossguard. The tubular brass scabbard is engraved with geometric shapes and features an acorn shaped finial, dual hangers, an embossed Odd Fellow shrine with three links and pillars and a partial linked chain. The brass has toned to a dark ocher patina with fine staining and spots of tarnish. The throat is no longer present and the attachment clasp on the upper part of the hanging chain is no longer present. (5A10838-46) (150/250) Est. 150 - 250</p>

Lot	Title/Description
791	<p>Knights of Pythias Uniform Rank Fraternal Sword By M.C. Lilley & Co.</p> <p>29 1/4" diamond shaped double edged blade, 35 5/8" overall length. This is a nice sword, the blade remaining bright with light scabbard marks at the tip. The obverse side of the blade is etched in script "A.C. Reed" centered between floral scroll, "FCB" shield, panoply of arms and knight embracing woman while the reverse side shows knights looking over crowd in front of lodge and sun, Federal shield, similar scroll and prisoner in chains, the ricasso is marked "Made by The / M.C. Lilley & Co. / Columbus O.". The silverplated brass hilt is comprised of a cruciform guard with eagle quillons, a chain knucklebow, resting lion atop a knight's head pommel, and a ribbed leather covered grip wrapped in braided brass wire. The obverse face of the guard features an oval shield counterguard cast-in-relief with the letters "U R" flanking a lily flower; the reverse face bears the letters "FCB". The hilt retains generous amounts of silver finish with a distinguished dark patina; streaks of copper-toned brass can be seen at the edges and higher surfaces. The grip's leather covering shows tiny nicks and scuffing but along with the wire wrapping remains tight and intact. The nickel plated steel scabbard has three plated alloy mounts that depict intertwined "KP" lettering, Samson destroying the pillars of the Dagon temple, a calla lily and other fraternal symbols. The body retains nearly all its bright polish with a few specks of flaking, the mounts have acquired a dark copper-tone patina with generous traces of original plating in the protected areas. (5A9996-1JA) [John Lipski Collection] (100/200) Est. 100 - 200</p>
792	<p>Masonic Knights Templar Fraternal Sword By Ames</p> <p>28" diamond shaped double edged blade, 34 7/8" overall length. This is a lovely sword showing etched decorations on a gilded background front and rear. The obverse side of the blade is etched "William N. Cary" in script centered amongst floral scroll and knight holding pike with flag while the reverse side shows jousting knights defending castle, camp under trees, stand of flags, floral scroll and "AMES / SWORD Co. / CHICOPEE / -MASS-" on the ricasso. The brass knight's head pommel, ferrule, crossguard with pierced Maltese cross quillons and oval langet with pierced standing knight retains much original silver plate with spots of exposed brass along some of the high edges. The double tapered ivory grip remains in excellent condition acquiring a nice cream color with an etched wooden cross on the obverse side and intertwined "WMC" inside of wreath below cross in crown on the reverse side. The chain knucklebow is no longer present, the leather buffer washer remains in place. The tubular steel scabbard retains about 80% flaking nickel, majority of loss along the back side and is engraved "William N. Cary" on the front side between the upper and center mounts. The decorative pierced plated brass mounts retain much original dark silver plate with exposed brass surfaces along the edges and high points. The upper mount shows two standing knights on pedestal below red enamel cross surrounded by "IN HOC SIGNO VINCES", the center mount shows intertwined initials centered between cross and ships wheel while the tip chape shows armor and stand of flags centered between a Maltese cross and scroll decorated drag. (5A9996-1JB) [John Lipski Collection] (100/200) Est. 100 - 200</p>
793	<p>Patriotic Masonic Knights Templar "Worcester Encampment" Fraternal Sword</p> <p>This ornate ceremonial Mason sword measures 34" overall with a 27" flat double edged blade with etched decorations on a frosted background both front and rear. The obverse side of the blade shows "D.A. Richardson" in Gothic script centered floral tendrils, knights head and five columns below royal crown, sword and orb while the reverse side shows flowing "Worcester / Co. / Encampment" in between Maltese crosses, floral scroll, crossed flags and cross centered between scepter and shepherds hook with "Ames Mfg. Co. / Chicopee / Mass." In front of the ricasso. The unetched section of the foible remains bright with light speckles and staining with a little more staining and oxidation on the ricassos. The hilt has a brass knights head pommel, double chain knucklebow and patriotic crossguard with Federal Eagle centers and triangular arranged stars at the ends of the quillons on both sides and a brown enamel hardwood grip with inlaid Victorian cross with red enamel cross center on the obverse side. The metal surfaces have a nicely tarnished patina, and the wood grip remains in very good condition showing handling marks and spots of flaking. There is no scabbard present. (5A9996-1JC) [John Lipski Collection] (50/100) Est. 50 - 100</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
794	<p>Knights Of Golden Eagle Fraternal Sword with Louise Stilz Retailer Markings This imported sword measures 35 1/2" with a plain 28" double edged blade. The bright has mellowed slightly with aged showing scattered light scabbard marks from the years along with patches of light staining. The obverse ricasso is etched "LOUISE / STILZ / & BRO / PHILA / -PA-". The reverse tang is stamped "MADE IN / GERMANY". The hilt consists of a cast nickel perched eagle atop a plated bulbous pommel, turned ferrules and a cruciform crossguard with scroll pattern quillons and shield langets, the obverse side of the crossguard has eight spoke wheel of law, truth and life and a brown leather covered wood grip wrapped in braided brass wire. The nickel plating remains about 95% intact with light scratches and spots of tarnish and the leather covered grip remains in very good plus condition showing light flaking, the wire wrapping tight and intact. The tubular brass scabbard retains 98% original nickel with light scratches, a couple spots of flaking at the throat and features a single hanger and drag with embossed star on side and wings and crossed arrows on the other side. (5A9996-1JD) [John Lipski Collection] (50/100) Est. 50 - 100</p>
795	<p>Ancient and Honorable Artillery Co. Sword By Gibson This attractive sword measures 33 1/8" overall with a 28 1/8" curved unstoppped fuller blade. The obverse side of the blade is beautifully etched "Ancient and Honorable Artillery Co." amongst floral scroll with angled "GEO. H. / GIBSON / BOSTON / MASS." at the beginning of the fuller while the reverse side is etched "A. Cunio" amongst similar scroll, Federal shield and stand of flags. The remainder of the blade remains bright with light staining and cleaned pitting at the tip. The leather buffer shows light wear and remains fully intact. The hilt has a brass triple branch guard, with turned down quillon, pierced counter guard, birds head pommel and a black leather wrapped wood grip. The brass has toned to a nice bright ocher patina with a few tiny impact and handling marks. The leather covering shows some light scuffs and flaking, and the braided wire wrapping remains intact. The leather bodied scabbard is equipped with brass mounts and remains in very good plus condition with scuffing along the edges and light flaking, the brass is a bright goldenrod with some fine staining and minute handling marks. (5A9996-1JE) [John Lipski Collection] (400/600) Est. 400 - 600</p>
796	<p>Patriarchs Militant Fraternal Sword By Pettibone A branch of the IOOF (Independent Order Of Odd Fellows) this sword measures 35 3/4" overall with a 30" diamond shaped double edged blade etched only with what appears to be "H.G. Roby" in a double diamond pointed riband on the obverse side with "THE PETTIBONE / MFG Co. / CINCINNATI, O." in angled flowing riband on the ricasso. The remainder of the blade shows scattered light oxidation, staining and scabbard marks. The hilt has a brass globe-shaped pommel with button cap, crown-like ferrule, solid crossguard with alternating quillons and counter guard and a leather covered wood grip, the crossguard has crossed shepherds crook and sword in crown. The metal surfaces have a dark brass patina with faint traces of original gilt and the black leather covering shows light nicks and scuffs along the high edges, the wire wrapping is no longer present and the pommel has loosened with age. The steel scabbard retains about 75% flaking dull nickel and is decorated with fancy brass mounts showing sheep and lion in shield above "Pax aut Bellum", intertwined "PM" and other decorations. The mounts have a tarnished patina retaining good traces of original gilt, the silverplated "PM" has toned to a dull ocher patina. (5A9996-1JF) [John Lipski Collection] (50/100) Est. 50 - 100</p>
797	<p>U.S. Model 1840 Musician's Sword 31 3/4" straight blade with single stopped fullers, 38" overall length. The blade has been cleaned bright with remnants of fine pitting patches of light staining and scattered fine scratches. The reverse ricasso is marked "U.S. / D.F.M. / 1863", the obverse ricasso is unmarked and the buffer washer is no longer present. The solid brass hilt is bright goldenrod with spots of light tarnish and tiny scratches, the obverse side of the guard is marked with an uneven "D.F.M.". There is no scabbard present. (5A9996-1JG) [John Lipski Collection] (100/200) Est. 100 - 200</p>

Lot	Title/Description
798	<p>Unmarked U.S. Model 1860 Light Cavalry Saber 36" curved blade with wide and narrow fullers, 41 3/8" overall length. The blade has a cloudy finish with scattered light staining, brush marks and spots of light oxidation and pitting on the ricassos. The tip shows a tiny bend squared point and the is a thin 5/8" forging flaw and the end of the fuller on the reverse side. The leather buffer washer shows light wear but remains mostly intact. The hilt has a triple branch guard, Phrygian pommel and a black leather covered wood grip wrapped in braided brass wire. The brass is toning to a nicely darkened patinas with a few light handling marks and the covered grip remains in very good plus condition with light flakes and scuffs to the leather, the wire wrapping tight and intact. The steel scabbard is toning to a gray and brown with light scratches and patches of oxidation still showing good amounts of flaking gray enamel. (5A9996-1JH) [John Lipski Collection] (200/400) Est. 200 - 400</p>
799	<p>Contemporary Prussian Model 1880 Infantry Officers Sword 31 3/4" single-edged blade with double stopped fullers. The blade retains all its polished nickel finish with a couple tiny dings and scabbard marks, the only markings are a small inverted "WJ" on the reverse ricasso. The hilt has a brass three branch guard with pierced Prussian eagle, turned down quillon and counter guard, Phrygian pommel, ferrule and a shagreen covered wood grip wrapped in braided nickel wire. The obverse side of the grip is adorned with a royal cypher. The brass remains bright with a few spots of light tarnish and the grip remains in excellent condition with tight intact wrappings. The tubular steel scabbard retains much original nickel with scattered staining, spots of flaking, oxidation and a couple minor dents. (5A9996-1JI) [John Lipski Collection] (50/100) Est. 50 - 100</p>
800	<p>Imperial German NCO Sword by Wingen Jr. 31 3/8" plain unstoppped fuller blade with Anton Wingen Jr. standing knight maker mark on the reverse ricasso. The blade retains most of its polished finish with scattered light scratches and scabbard marks and the occasional light pit or stain. The hilt has a nickel plated P-shaped guard with dual langets, circular quillon, ferrule, dove head pommel with wraparound ears and a wooden grip overlaid in glossy black resin wrapped in bordered braided aluminum wire. The metal surfaces retain 90% bright nickel, loss due to scattered pinprick flaking becoming more pronounced along some of the edges and butt of the pommel. The grip remains in good condition with a crack along the inside curve of the pommel, the wire wrappings remain tight and intact. The rolled steel scabbard with angled drag retains about 95% applied black enamel over patches of light pitting with scattered fine flaking, runs and tiny dents. (5A9996-1JJ) [John Lipski Collection] (100/200) Est. 100 - 200</p>
801	<p>Contemporary European Army Saber 35 3/4" slightly curved round pipe-back spine blade, 41 3/8" overall length. The blade has been sharpened and retains all its bright polish, the leather buffer washer remains intact. The hilt consists of a vented pierced half-basket guard with recessed thumb rest with slot in quillon as thumb strap provision, partially rectangular spine with checkered pommel, round flat butt cap with domed pommel nut and a bird's head shaped walnut grip. The metal surfaces retain 95-97% original nickel with scattered pinprick flaking along the inside of the basket and along the edges and a couple specks along the edges. The checkering is of contemporary quality and the spine flat is marked "M 136". The grip remains in near excellent condition with a few light handling marks. The tubular steel scabbard retains about 90% original nickel flaking to brown patina with light oxidation staining and is numbered to sword below the flared collar on the obverse side. (5A9996-1JK) (200/400) Est. 200 - 400</p>
802	<p>Reproduction WWII German Luftwaffe Sword 28 1/4" double edged blade with a three flat face and partial unstoppped fullers, 35 1/2" overall length. The steel blade retains nearly all its nickel finish with scattered tiny nicks along the edges and a speck or two of light staining. The blade is etched with the "Sitting King" SMF Solingen maker inside the fuller on the reverse side and the fullers continue well past the thin blue leather washer on both sides of the tang. The tang is marked with a backwards "P" and either an angled "Z" or backwards "N" on the reverse side and a triangle on the obverse side. The hilt has a brass winged guard and round pommel with sun wheel Swastikas on either side and a blue painted thin leather covered soft wood grip wrapped in double strand aluminum wire. The metal surfaces retain 98% white aluminum finish with thin streaks of exposed brass along the edges, easily noticeable when components are removed. The grip remains in very good condition with spots of flaking, the wrapping remaining tight. The scabbard is steel in blue leather with white aluminum mounts and a partial blue leather hanger showing scattered light scuffs, the color retention screws are missing. (5A10460-56C) (50/100) Est. 50 - 100</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
803	<p>Masonic Knights Templar Fraternal Sword By M.C. Lilley 30" diamond shaped double edged blade, 37 1/4" overall length. This is a lovely high ranking sword showing etched decorations on a gilded background front and rear. The obverse side of the blade is etched "W. Scott Neal" in fancy riband centered amongst floral scroll and knight holding pike with flag and "M.C. / LILLEY / & Co. / COLUMBUS / OHIO" shield shaped maker mark on the ricasso while the reverse side shows jousting knights defending castle, camp under trees, stand of flags and floral scroll. The ricasso is stamped with a badger mark, although uncertain is believed to be either Canadian or German in origin. The brass plumed knight's head pommel with cross, fancy ferrule, pierced floral scroll crossguard and spade shaped langet with red enamel cross in crown have a pleasing dark ocher patina, the edges of the ferrule a slightly brighter tarnished silver tone and the lower half of the enamel filled cross is missing. The double tapered ivory grip shows intertwined "WSN" inside of wreath below cross on the obverse side and decorative cross inside of dotted equilateral triangle in starburst on reverse side. The grip remains in near excellent condition with thin horizontal drying cracks on the reverse side. The tubular steel scabbard remains equally fancy retaining about 95% flaking original nickel with scattered fine flaking and staining, the front of the scabbard is etched with mounted knight holding flag and pike with Maltese cross flag on pike behind crossed swords and "IN HOC SIGNO VINCES" shield centered between floral tendrils and scroll between fancy pierced brass mounts. The upper mount shows raised shield, pike and sword above red enamel Maltese cross, while the center mount shows raised chainmail on crossed swords and battle axes above Victorian cross and the lower mount shows red enamel Christian cross on shield on stand of flags. The mounts have a pleasing tarnished patina with traces of original plate in protected areas. (5A10583-2) (100/200) Est. 100 - 200</p>
804	<p>U.S. Model 1862 Merrill Navy Rifle Saber Bayonet This bayonet measures 30 3/16" overall with a 25 3/8" slight yatagan style blade with single unstoppered fullers. The blade has toned to pale gray and brown patina with scattered staining becoming moderate in areas with patches of light pitting, reverse ricasso is dated "1861". The ribbed brass hilt has a pleasing tarnished patina with light staining and tiny impact marks, the spine is numbered "1052" next to an inverted small "G". The pommel stud and spring show modest oxidation and light pitting but remains functional. There is no scabbard present. (5A9996-4H) [John Lipski Collection] (100/200) Est. 100 - 200</p>
805	<p>Scarce Civil War Colt Revolving Rifle Bayonet By S&K This sword bayonet was originally produced to fit the Brazilian Naval Rifle but were diverted to America for the Civil war for the US Model 1855 Colt Revolving Artillery Carbine (of which perhaps no more than 200 of these carbines were made). The bayonet measures 28 3/4" overall with a 24 1/8" blade equipped with wide and narrow fullers. The blade has toned to pale gray patina with scattered freckling and spots of light oxidation and fine pitting. There are patches of more modest oxidation along the obverse fuller and the main edge shows light nicks along the main edge. The reverse ricasso is marked with "BC" in anchor while the obverse side has Schnitzler & Kirschbaum "S&K" maker mark. The iron crossguard with muzzle ring and "cock's comb" upper quillon finial has an appearance similar to the blade with matching "BC" anchor mark on the reverse side. The ribbed brass hilt has a tarnished ocher patina with light staining. The press stud remains strong and is serial numbered "309" on the butt of the pommel. There is no scabbard present. (5A9996-4I) [John Lipski Collection] (200/400) Est. 200 - 400</p>
806	<p>U.S. Model 1892/98 Krag Bayonet This bayonet measures 16 1/4" overall with an 11 3/4" blade equipped with single stopped fullers. This 1899 dated blade retains 98% applied chrome finish over scattered pitting, light impact marks and staining. The metal surfaces of the hilt have been cleaned still showing good amounts of applied chrome over scattered pitting, staining and dried protective grease. The wood grips remain in good condition being slightly oversized having been cleaned and the rivets covered with synthetic wood. The press stud is frozen in place and included is a fading brightly finished steel scabbard with scattered staining and pitting. (5A9996-4J) [John Lipski Collection] (50/100) Est. 50 - 100</p>

Lot	Title/Description
807	<p>Austrian Model 1849 Augustin Jager Carbine Bayonet Designed to be used as either a bayonet or a sword, depending on the requirement at the moment of need. They were manufactured from about 1849 to about 1854 and were used on a carbine or short-rifle, some believed to have been used during the Civil War. This unmarked bayonet has a 23 3/8" spear point equipped with broad fullers and a flat spine. The socket measures 4 1/4" and features a locking ring, L-shaped mortise, .933" inside diameter and a 1 1/4" shank. The bayonet remains overall bright with patches of pitting staining and oxidation. The unmarked leather covered wood scabbard features a leather frog with adjustable strap. Sheet steel frog clip and tip and remains in near excellent condition showing light staining and scuffing on the leather and spots of light oxidation on the clip and tip. (5A9996-4K) (100/200) Est. 100 - 200</p>
808	<p>British Pattern 1907 Bayonet By Wilkinson This non-quillon equipped bayonet measures 21 7/8" overall with a 17 1/8" blade having single unstoppered fullers. The blade has been sharpened and has toned to pale gray with a few specks of fine oxidation, staining and light scabbard marks. The obverse ricasso is marked with crown above 1907 date and light "WILKINSON" and smaller inspector markings while the reverse side has broad arrow, "X" and other inspector markings. The metal surfaces of the hilt and ricasso retain about 90% original blue muting to brown patina with light oxidation along the edges. The smooth walnut scales remain in near excellent condition with minor wear and handling marks. The leather scabbard with steel mounts remains fully intact with scattered light scuffing, handling marks and is marked with broad arrow above crown and "H.G.R. 15 along the rear seam. The mounts have a brown patina with light staining, handling marks and thin silvering along the edges. (5A9996-4L) [John Lipski Collection] (50/100) Est. 50 - 100</p>
809	<p>U.S. Model 1873 Rifle Socket Bayonet The bayonet measures 21" overall with an 18" shallow flute blade that is 3/4" wide and has a 3" socket with a 3/4" inside diameter and a 1 3/16" shank. This is a nice bayonet retaining 95-97% original blue with scattered light storge marks. The "U.S." face marking remains crisp and the locking clasp rotates freely. Included is a second style steel scabbard equipped with drain hole and a leather frog with belt loop and brass Pennsylvania National Guard "N.G.P." brass escutcheon. The body has toned to brown patina with spots of light oxidation and perhaps 30% flaking black enamel. The frog shows scattered scuffing and flaking but remains intact, the brass escutcheon has a tarnished ocher patina. (5A9996-4M) [John Lipski Collection] (75/150) Est. 75 - 150</p>
810	<p>U.S. Model 1873 Rifle Socket Bayonet This bayonet measures 21" overall with an 18" shallow flute blade that is 3/4" wide and has a 3" socket with a 3/4" inside diameter and a 1 3/16" shank. The bayonet retains 90% original blue with light wear along the tip and edges, specks of light oxidation with more modest pitting and oxidation on the socket. The "US" face markings are light with the "S" only partially visible, there is a small "R" on the reverse side of the shank and the locking ring rotates freely. The scabbard is of the third style having a steel body with drain hole and a leather frog brass bely hook and "US" escutcheon. The body has toned to gray and brown patina with scattered light oxidation and pitting, the leather shows modest scuffing and flaking and the brass surfaces have a tarnished reddish brass patina. (5A9996-4N) [John Lipski Collection] (50/100) Est. 50 - 100</p>
811	<p>U.S. Model 1873 Rifle Socket Bayonet The bayonet measures 21" overall with an 18" shallow flute blade that is 3/4" wide and has a 3" socket with a 3/4" inside diameter and a 1 3/16" shank. This is a lovely bayonet retaining 97-98% original blue with only some thin edge wear and minor storge marks. The "U.S." face marking remains quite crisp and the locking clasp rotates freely. Included is a second style steel scabbard equipped with drain hole and a leather frog with belt loop and "MASS" brass escutcheon. The body has toned to brown with scattered light oxidation and pitting with small patches of more modest oxidation here and there. The frog shows moderate scuffing and crackling but remains intact, the brass escutcheon has a tarnished ocher patina with light staining along the edges. (5A9996-4P) [John Lipski Collection] (75/150) Est. 75 - 150</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
812	<p>Scarce U.S. Model 1873 Cadet Rifle Socket Bayonet</p> <p>This bayonet measures 19 1/4" overall with a 16 1/4" shallow flute blade that is 23/32" wide and has 3" socket with a 3/4" inside diameter and a 1 3/16" shank. This is an original bayonet with correct taper and slimmer, narrower blade. The bayonet retains 90% thinning original blue toning to brown with a few specks of fine oxidation, majority of loss on the socket and light edge wear. The "U.S." face marking is deep and clean, and the locking ring rotates freely. The scabbard is a first type rifle scabbard with drain hole and cut-down throat, the rear edge rolled over the rear of the leather frog. The belt loop is fastened by a round brass disk stamped with a large "A". The body has toned to brown patina with scattered light oxidation and tiny dents along the front ridge. The leather shows modest flaking and scuffing and the disk is bright goldenrod with a couple tiny handling marks. A very good original Cadet Trapdoor bayonet. (5A9996-4Q) [John Lipski Collection] (150/250) Est. 150 - 250</p>
813	<p>Japanese Type 30 Arisaka Bayonet</p> <p>This early Kokura arsenal bayonet measures 20" overall with a 15 5/8" single unstopped fuller blade. The blade has toned to pale gray patina with scattered fine staining, spots of fine oxidation and pitting along with a few minute nicks along the main edge. The hooked guard and contoured birds head pommel have a darker brown patina with thin gray undertones and fine oxidation. The contoured Asian Hardwood grips are fastened by screws and remain in very good condition showing wear and handling marks. The scabbard has toned to brown patina with patches of original blue, oxidation and pitting. (5A9996-4R) [John Lipski Collection] (50/100) Est. 50 - 100</p>
814	<p>Swedish M1896 Bayonet</p> <p>This all metal bayonet with conical shape locking stud measures 13" overall with 8 1/4" single spear point blade that shows patches of hardened oil and oxidation staining with rounded tip and evident grind marks along the edge. There is light verdigris staining along the checkered handle and the guard is marked "10 / 16 No. 369" and blade "(crown) / 765" on the obverse and "(crown) / C" on the reverse with slightly tattered leather frog and metal sheath present. (10A9895-2A) (50/100) Est. 50 - 100</p>
815	<p>U.S. Pattern M5 Bayonet by J&D Tool Co.</p> <p>This M1-Garand bayonet measures 11 1/2" overall with 6 3/4" blade spear point blade with 3 1/2" sharpened false edge. The blade retains most of its grey park finish with light wear and specks of oxidation staining throughout and the edge appears to have seen a light sharpening and the two-piece black plastic handles rate excellent. The bayonet is marked "U.S. M5 / J&D Tool Co.", on the face of the guard and included is a sheath marked "USM8A1 / PWH" along the throat. A fine example intended for use only with the M1-Garand as it has the button along the back of the guard intended to seat in the gas cylinder plug on the rifle. (10A9895-2E) (50/100) Est. 50 - 100</p>
816	<p>U.S. Pattern M6 Bayonet by Imperial</p> <p>This M-14 bayonet measures 11 3/8" overall with 6 5/8" spear point blade and 3 1/8" false edge. The blade retains much of its dark colored parkerized finish with spots of scattered oxidation staining and light hone marks along the edges. This bayonet is similar to the M5 with the exception of the guard being reworked to fit over the muzzle of an M14. The guard is marked "U.S. M6 / Imperial" and the checkered black plastic grips rate excellent. Included with is an "USM8A1 / PWH" marked sheath that remains in very good condition. (10A9895-2F) (50/100) Est. 50 - 100</p>
817	<p>Lot of Sporting Knives</p> <p>Two total. First is a G96 Tournament II filet knife serial #2059 measuring 12 1/4" overall with 7" straight back blade that has scattered light oxidation staining and shows moderate honing along its edge. The knife comes with a correct G96 sheath numbered to the knife. Second is a fixed blade sporting knife with sheath measuring 9" overall with 5" drop point blade that shows numerous scratches and honing marks along its edge. The blade is marked "Mora / Sweden" and the one-piece wooden handle remains in very good plus condition. The included leather scabbard has metal reinforced tip and throat and the hanger is partially separated. It is marked "Mora / made in / Sweden" on its face and remains in good overall condition. (10Z9895-2G)</p>
818	<p>Buck Knife</p> <p>This classic model 110 lock blade measures 5" closed with 3 3/4" clip point blade. The brass bolsters are mostly a bright golden rod with some scattered spots of light tarnish. The ebony handles rate excellent and the edge appears untouched. Included are the original box (with scattered ink marks and light scuffing), papers, and black leather sheath with silver snap. All items remain in near excellent condition. (10A9895-2H) (25/50) Est. 25 - 50</p>

Lot	Title/Description
819	<p>Argentine M1909 Bayonet</p> <p>This wooden handled bayonet is serial #N4230 with correct matching number scabbard and frog. The bayonet measures 20 1/2" overall with 15 3/4" spear point blade marked with "Modelo Argentino 1909 / (crest) / N4230" on the reverse and "Weyersberg / Kirschbaum & Co / Solingen" on the obverse. There is a spot of light flaking and pitting inside the fuller along the obverse side and all markings are crisp. The smooth hardwood handles are secured with two bright colored rivets and the pommel stud has a strong spring. The scabbard has a few minor light handling marks and is matching numbered to the blade with a fine condition leather from with what appears to be all of its original stitching intact. This is a fantastic example of these less common wooden handle bayonets. (10A9895-2I) (150/250) Est. 150 - 250</p>
820	<p>French Model 1914 Bayonet by Remington</p> <p>This rolling block bayonet measures 20 1/2" overall with 15 7/8" spear point blade with single fuller showing an older cleaning with scattered pitting and oxidation staining about. The pitting is heaviest along the reverse side near the tip and end of fuller, the obverse is marked with a crisp "Remington Arms Co. Ilion, N.Y." centered in the fuller. Included is a correct scabbard that remains mostly an even brown patina with a few light scratches and has a crazed leather hanger that is intact and remains supple. A fine example overall. (10A9895-2J) (50/100) Est. 50 - 100</p>
821	<p>U.S. Rifle M1892 Bayonet</p> <p>This "knife" style bayonet measures 16 1/4" overall with 11 3/4" spear point blade with single fuller and 4 5/8" false edge. The reverse is marked U.S. and the obverse dated 1899 the wooded handles show overall expected wear and are held in place by two flush, round shaped rivets. The metal surfaces remain mostly bright with scattered oxidation staining and the edge appears untouched. Included is a metal scabbard with swivel hook hanger that remains mostly a dull gray patina with specks of oxidation staining near all over. A fine example overall. (10A9895-2K) (50/100) Est. 50 - 100</p>
822	<p>Russian M1891/30 Bayonets</p> <p>Two total. These Mosin-Nagant spike bayonets measure 19 7/8" over all with 17" blade and have the spring loaded locking piece. They retain nearly all of their original blue finish with scattered specks of oxidation and some minor storage wear. One is serial #6194 the other #P67498 both remain in excellent condition. (10A9895-2L)</p>
823	<p>Argentine Model 1891 Rifle Bayonet with Alloy Grips</p> <p>The bayonet measures 20 1/2" overall with 15 3/4" spear point blade with slightly washed but intact crest. The reverse is marked "Modelo Argentino 1891 / (crest)" and "Weyersberg / Kirschbaum & Co / Solingen" on the obverse. The metal surfaces are mostly bright with scattered oxidation staining and areas of light pitting. The alloy grips show moderate wear and no scabbard is included. (10A9895-2M) (50/75) Est. 50 - 75</p>
824	<p>English P1907 Bayonet Without Quilon</p> <p>This 1907 dated bayonet measures 21 3/4" overall with 17" straight back blade and single fuller. The metal surfaces are a mix of brown and gray patinas with scattered oxidation and has evident grind marks along the edge. The blade markings are slightly washed but mostly visible and the wooden handles are void of varnish and show moderate wear. Included is a leather sheath with metal tip and throat that has an OD green canvas hanger that is unmarked and likely a modern replacement. This bayonet remains in very good condition. (10A9895-2N) (50/75) Est. 50 - 75</p>
825	<p>Swedish M1896 Bayonet</p> <p>This all metal bayonet measures 13" overall with 8 1/4" spear point blade that remains mostly bright with scattered oxidation and hardened oil staining. All markings remain crisp and the blade shows honing marks along its edge. This model has the conical shaped locking pin and comes with a metal sheath and leather hanger that shows overall light staining and scuffs with active verdigris on the rivets. This bayonet is in overall fine condition. (10A9895-2P) (50/100) Est. 50 - 100</p>
826	<p>Unmarked U.S. Saber Bayonet</p> <p>This brass handled saber measures 24 3/8" overall with 19 3/4" Yataghan blade. The blade is unmarked and remains mostly bright showing light oxidation staining throughout and the edge appears untouched. The ribbed brass handle has scattered shallow casting pits and specks of tarnish throughout and the Quilon is marked with a naval anchor on the reverse and U.S. on the obverse sides. The muzzle socket measures .905" and the pommel tip is numbered 14472. Included is a leather scabbard with brass tip and throat that shows moderate wear and tarnish but remains intact with tight stitching along the rear seam. Item is in overall very good condition. (10C9895-2Q) (75/150) Est. 75 - 150</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
827	<p>Reproduction Civil War Era Saber Bayonet</p> <p>This brass handle saber bayonet measures 24 5/8" overall with mostly bright 20" Yataghan blade that remains mostly bright with scattered fine oxidation and hardened oil staining. The ribbed brass handle has casting marks throughout and darkened more to a honey brown and is marked Made in Italy along the top edge flat. The muzzle socket measures .904" and it comes with a leather scabbard with brass throat and tip. The scabbard remains in good condition showing light handling marks with mild tarnish throughout. A fine condition reproduction saber. (10A9895-2R) (50/100) Est. 50 - 100</p>
828	<p>U.S. Ross Rifle M1905/10 Rifle Bayonet</p> <p>This WWI era bayonet was deemed obsolete and unsuitable for trench warfare use. The U.S. government bought roughly 20,000 rifles and bayonets for training purposes and Home Guard use. This bayonet measures 14 5/8" overall with 10" semi-spear point blade that remains mostly a dull gray patina with scattered oxidation staining and heavy grind marks along the edge. The bayonet has all proper markings on the wooden handles, pommel and included scabbard. The handles show expected wear and handling marks and the leather covered scabbard shows moderate crazing and cracks throughout and this item remains in about very good condition overall. (10A9895-2S) (50/100) Est. 50 - 100</p>
829	<p>U.S. Model 1855/70 Socket Bayonet</p> <p>This rifle / musket bayonet remains mostly a bright gray patina with scattered light oxidation and spots of fine pin-prick pitting along the face and back flutes with a crisp U.S. marking remaining. The blade measures 18", has a 3" socket with an "L" shaped mortise and shank length of 1 3/16". The socket measurements are 29/32" O.D. and 25/32" I.D. The lock ring moves freely and the screw is present. A fine example overall. (10A9895-2T) (50/100) Est. 50 - 100</p>
830	<p>U.S. Model 1855/70 Socket Bayonet</p> <p>This rifle / musket bayonet is mostly a dull gray patina with moderate oxidation staining and light pitting scattered about the face and back flutes with a crisp and interesting "U.S." marking slightly off-centered and angled on the face of the blade. The blade measures 18", has a 3" socket with an "L" shaped mortise and shank length of 1 3/16". The socket measurements are 29/32" O.D. and 25/32" I.D. The lock ring moves freely and the screw is present. An interestingly marked bayonet with a definite "been there - done that look" that remains in fine condition. (10B9895-2U) (50/100) Est. 50 - 100</p>
831	<p>U.S. Rifle Model 1873 Bayonet with Scabbard</p> <p>The metal surfaces on this socket bayonet retain perhaps 75% to 80% original flaking blue finish that shows more brown under bright light with scattered specks of fine oxidation staining, silvering and a scratched letter M on the face of the blade. The blade is U.S. marked measuring 18" overall with 3" socket that has 13/16" O.D. and 47/64" I.D. measurements. The shank is 1 3/16 in length and the lock ring is complete with screw and moves freely. The included metal scabbard with leather and brass U.S. pattern hanger remain in near excellent condition with light verdigris staining. Many of these were converted 1855/70 bayonets for the 45-70 Trapdoors and this one is a fine example. (10A9895-2V) (50/100) Est. 50 - 100</p>
832	<p>Italian Model 87/91/15 Rifle Bayonet</p> <p>This is a standard 91 bayonet with VV70 cross guard intended for use with the Vetterli Model 1871 rifle. The metal surfaces are mostly a dark gray patina with scattered oxidation and light pitting. It measures 16 1/4" overall with 11 13/16" spear point blade that shows light honing marks along the edge. The wooden handles are heavily worn, with cracks and the initials "A.B" in the right side panel and the guard is numbered "PK8591". A well-used and salty example in good overall condition. (10A9895-2W) (25/75) Est. 25 - 75</p>
833	<p>U.S. Model 1942 Bayonet</p> <p>This knife bayonet measures 20 1/2" overall with 15 3/4" spear point blade. The metal surfaces are mostly a dark gray color with silvering at the high edges scattered oxidation and patches of light to moderate pitting throughout. All markings remain crisp and the grooved plastic handles show light wear. The blade is slightly bent with a minor twist and shows several tiny nicks along the edge of the blade. (10Z9895-2X) (15/50) Est. 15 - 50</p>

Lot	Title/Description
834	<p>Unmarked Socket Bayonet</p> <p>This unmarked bayonet is very similar in design to the U.S. M1873 with nearly identical measurements. The metal surfaces are mostly a dull silvery patina with scattered oxidation staining and light pitting along the face and back flutes. The lock ring moves freely and the screw shows light slot damage. A very good unmarked example. (10A9895-2Y) (25/75) Est. 25 - 75</p>
835	<p>Unmarked No.4 MKII Spike Bayonet</p> <p>This two-toned spike bayonet measures 9 7/8" overall with 7 7/8" spike that remains mostly bright with the socket retaining nearly all of its reapplied black enamel finish. The scabbard shows a repaired lug and has reapplied finish as well. A fine reconditioned example overall. (10Z9895-2Z) (15/50) Est. 15 - 50</p>
836	<p>Unmarked Socket Bayonets</p> <p>Two total. First is a reproduction British land pattern bayonet measuring 21 3/4" overall that has a 4" socket with about 1" I.D. measurement and "L" shaped mortise. The blade is marked India and all surfaces have been cleaned some showing moderate tooling marks. The blade measures 16 3/4" with a shank length of 1" and it shows scattered patches of light oxidation staining throughout. Second is a reproduction M1871 socket bayonet that is polished bright with moderate tooling marks and scattered oxidation throughout. The socket measures 2 15/16" with 13/16" I.D. and has a shank length of 1 3/16". The blade measure 18" and the lock ring moves stiffly and the screw is present. These bayonets remain in good overall condition. (10Z9895-2AA) (25/75) Est. 25 - 75</p>
837	<p>Cattaraugus Commando Knife</p> <p>This fighting knife measures 10 3/8" overall with 6" straight back blade. The blade remains mostly a bright gray showing scattered light oxidation staining, tooling marks and the tip has been slightly reshaped. The obverse is marked "Cattaraugus / 225Q" near the guard and the stacked leather washer handle remains tight and shows expected wear with an added "S" made of small tacks near the stacked steel washer pommel. Included is a correct leather sheath that shows moderate scuffing, a small wear hole at the tip, areas of crazing with a few popped stitches and it remains in about good condition. (10A9895-2AB) (15/50) Est. 15 - 50</p>
838	<p>Czech M1924/30 Bayonet</p> <p>This bayonet measures 16 3/4" overall with 11 9/16" blade that is mostly a dark gray with scattered oxidation staining and spots of pitting. The edge has several nick and shows grind marks along its length. The reverse is marked with a small Z inside a circle and the wooden handles show expected handling and wear marks. Included is a metal scabbard with repaired stud that is marked in white paint "VZ Czech M1924/30 Export" along its face. The scabbard has several small dings and tooling marks scattered about and both remain in about good condition. (10A9895-2AC) (25/75) Est. 25 - 75</p>
839	<p>Czech VZ24 Bayonet</p> <p>This bayonet measures 17 1/8" overall with 11 13/16" spear point blade that is mostly a dull gray patina showing scattered oxidation staining and drag marks from holstering along the both sides of the blade. The reverse is marked "CSZ / U" near the guard and the wooden handles rate very good with expected light wear and handling marks. Included is a correct metal scabbard with CSZ mark on stud. The scabbard is a mix of plum and brown patinas with a few scattered small dings and light handling marks. Both items remain in very good condition. (10A9895-2AD) (50/100) Est. 50 - 100</p>
840	<p>Turkish M1935 Bayonet</p> <p>This bayonet is numbered 11354 and measures 14 3/4" overall with 9 3/4" spear point blade that remains a dull gray patina with scattered splotches of oxidation staining. The Pommel is marked A.S.F.A. and it has the thick guard. The wooden handles are secured with two flush bolts and it comes with a repaired metal scabbard. The round stud has been crudely re attached and it has been painted a brownish enamel and shows pitting and dings below the finish. It is marked "Turkish M1935" along the face and these items remain in good to very good condition. (10A9895-2AE) (25/75) Est. 25 - 75</p>
841	<p>Israeli M1949 Bayonet</p> <p>This bayonet measures 15 1/8" overall with 9 13/16" spear point blade with 4 7/8" false edge. The blade is mostly a dark gray patina with some light silvering along the contact points and has scattered oxidation staining. There are Israeli markings near the guard on the obverse side and the wooden handles have been replaced with jigged bone handles that are secured by two brass pins. The pommel stud is missing and this bayonet is in fair to good reworked condition. (10A9895-2AF) (15/50) Est. 15 - 50</p>

Lot	Title/Description
842	<p>Nepalese Dress Belt with Bayonet and Ammo Pouch</p> <p>This "Slade-Wallace" style pattern white leather belt with Warwickshire 2nd Regiment buckle comes with an unmarked cartridge pouch and socket bayonet that is British proofed with what appears to be Nepalese markings. The bayonet measures 24 7/8" overall with 21 1/2" triangular shaped blade that is a mix of brown and gray patinas having scattered oxidation staining and areas of light pitting. The flat is marked with "R / (broad arrow) / WD" with several other markings that are faint and hard to decipher. There are Nepalese script markings along both sides of the back flutes and the socket measures 3" with an L shaped mortise and 23/23" I.D. with intact freely moving lock ring. The bayonet has a leather scabbard with brass throat and tip that remains in very good condition. The unmarked cartridge pouch has an added black color finish with the back remaining natural showing very faded and hard to decipher script. The leather is stiff and some of the stitching has been replaced but remains in good overall condition. The section belt joined by brass hardware shows overall light scuffing, ingrained dirt staining and the leather remains relatively supple. The brass hardware and buckle all show varying amounts of light verdigris and this grouping is in overall very good condition. (10C9895-2AG) (50/100) Est. 50 - 100</p>
843	<p>Russian M1891/30 Bayonet</p> <p>This Mosin-Nagant spike bayonet measures 19 7/8" over all with 17" blade and has a spring loaded locking piece. The bayonet retains nearly all of its original blue finish with scattered specks of oxidation and some minor storage wear. It is serial #1389 and remains in excellent condition. (10A9850-2) (15/50) Est. 15 - 50</p>
844	<p>German M1884/98 Pattern Bayonet</p> <p>This second pattern bayonet has had the saw back blade removed and replaced with a 10" spear point blade with 2 5/8" false edge. The blade retains much of its reapplied blue finish with areas of thinning that have toned brown, light silvering to contact wear and some visible tooling marks beneath the finish. The handles remain in very good condition with the balance of the metal surfaces remaining mostly brown. Included is a correct metal sheath that is not matching numbered to the blade and both are in overall good to very good condition. (10A9850-2A) (25/75) Est. 25 - 75</p>
845	<p>Camillus U.S.N. Mark 2 Fighting Knife</p> <p>This customized No. 2 knife measures 11 3/4" overall with 6 13/16" clip point blade. The blade is mostly and oxidized brown patina showing patches of pitting, active oxidation, multiple nicks along its edge and evident honing. The stacked leather washer handle has been converted to a clear synthetic stacked washer with some original leather and metal and plastic spacers added. The shank has been painted red and this interesting fighting knife remains in about good condition. (10A9850-2B) (15/50) Est. 15 - 50</p>
846	<p>Eaglehead Artillery Officer's Sword</p> <p>31 3/4" straight single edged unmarked blade with full-length fullers. The blade is etched with floral motifs and military panoplies. The blade is a dark gray patina with scattered light oxidation and sporadic spots of more modest oxidation. The first half of the blade shows scattered traces of original bright blue and about 80% original gilt on the fine-line etching. The brass hilt features an eagle head pommel, five-ball knucklebow, single branch counter guard ending in a disc-shaped finial, a plain ferrule, and a reeded polished bone grip. The brass surfaces have a dark tarnished patina, and the grip remains in excellent condition having darkened with age and may have shrunken slightly leaving the hilt a bit loose. The leather scabbard with decorative brass mounts has become quite limp with moderate flaking and crazing and two period repairs at the center and tip chape. The brass mounts have a dark tarnished patina with dings and staining. A very good plus 1820-1840's officer's sword. (1X5B10250-86) [Peter Tillou Collection] (300/500) Est. 300 - 500</p>

Lot	Title/Description
847	<p>Eaglehead Artillery Officer's Sword</p> <p>31 3/4" straight single edged unmarked blade with full length fullers. The blade has toned to bright silver with scattered light pitting and oxidation. The beginning of the forte has a much smoother gray patina with some sparse light oxidation and faint but visible traces of original bright blue background. The forte shows two gilded etched foliate motifs with faint remnants of gilded tendrils in the center, the remainder lost to the oxidation. The brass hilt features an eagle head pommel, five-ball knucklebow with tassel ring, five-ball single branch counter guard ending in a disc-shaped finial, a plain ferrule, and a reeded ivory grip. The guard retains much original gold gilt lightly toning to ocher along some of the edges, the pommel retains about 80% original gilt toning to a lightly tarnished brass patina with patches of red patina on the reverse side. The cream colored grip has shrunken and loosened with age and shows a thin horizontal crack along the obverse side. There is no scabbard present. A very good five-ball hilt officer's saber. (1X5B10250-104) [Peter Tillou Collection] (300/500) Est. 300 - 500</p>
848	<p>U.S. 1850-1870 Militia Sword By Horstmann</p> <p>27 1/2" plain un-fullered double edged blade, 33 1/4" overall length. The blade has toned to a dark brown patina with gray undertones, scattered light oxidation and slight bend at the tip. The reverse ricasso is marked "GERMANY" while the obverse ricasso is marked with Horstmann's old English "H" in shield. The hilt has a brass knights head pommel, stippled double brass guard with dual federal shield langets and a fluted bone grip. The brass has a nice dark tarnished patina, the guard has loosened with age and there is a large chip missing at the pommel. There is no sheath present. (1X5A10838-43) (175/275) Est. 175 - 275</p>
849	<p>Indian Tulwar Sword</p> <p>31" curved un-fullered blade, 37" overall length. The blade has been sharpened during the period of use. The blade is a mottled gray and brown patina with scattered fine staining, oxidation and pitting. The classic regional tulwar style hilt features a pommel spike, disk shape pommel, dual hemispherical quillons and long rectangular langets. The finish of the hilt closely matches the blade with more moderate oxidation on the pommel and grip. There are cracks along the bases of the quillons, one side showing an older soldered repair, the pommel spike has a lightly flattened tip. There is no sheath present. (1X5A10838-47) (100/200) Est. 100 - 200</p>
850	<p>British 1796 Pattern Short Saber</p> <p>31 1/2" straight Spadroon blade with wide full length unstoppped fuller. The solid brass hilt features a faceted urn shaped pommel, knucklebow ending in a faceted teardrop shaped finial, early fixed bilobate counter guard and faux wire wrapped grip. The blade is a mottled gray and brown patina with scattered oxidation and pitting, moderate in areas showing light wear along the tip and edges. The hilt has a pleasing tarnished patina. There is no scabbard present. Included is an old George Neuman collection tag describing the saber. A very good British short saber. [Former George C. Neuman Collection] (1X5B10570-20) (500/700) Est. 500 - 700</p>
851	<p>Independent Order Of Odd Fellows Fraternal Sword By Mutell</p> <p>This is a nice sword measuring 34 1/8" overall with a 27" double edged blade showing etched decorations front and rear. The obverse side is etched "Wm H. Coles" centered amongst flowing tendrils, sun burst, moon and stars and floral scroll on a gold washed background while the reverse side shows knights standing amongst tents protecting traveler centered between similar scroll and is marked "C.W. / MUTELL / SPRINGFIELD / MASS." at the beginning of the forte. The hilt consists of a decorative brass lampshade pommel and crossguard with similar embossed shapes and a cigar shaped horn grip, the chain knucklebow is no longer present. The blade remains overall bright with some fine specks of staining and minute nicks in the edges and the gold background remaining 98% intact. The brass surfaces of the hilt retain 98% original gilt wearing lightly along the edges and the grip shows thin drying cracks and handling marks. The gilded tubular brass scabbard is engraved with intertwined battle axe & rings and scroll in between pierced brass mounts decorated with knights, prophets and angels. The brass surfaces retain about 80% original gilt with scattered light staining, the exposed surfaces a mellowed tarnished patina. (1X5A8897-7J) (100/200) Est. 100 - 200</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
852	<p>Western Model W39 Hunting Knife</p> <p>This 1977 Longmont, CO, A-date code hunting knife measures 9 1/8" overall with a 5" split tang stainless steel clip point blade equipped with serrated thumb groove. The blade remains unsharpened and retains much of its original bright finish with some scattered fine staining and a few spots of more define oxidation on the reverse side of the blade. The obverse ricasso is marked "WESTERN / U.S.A. W39 / A". The brass guard and aluminum pommel remain bright with some minor staining on the guard. The rosewood scales remain in excellent condition having a rich deep color, each fastened by two large brass pins and centered between black, white and red spacers. There is no sheath present. (1X5A10213-15M) [Tom Montgomery Collection] (25/75) Est. 25 - 75</p>
853	<p>Massachusetts Industrial Knife By Baxter</p> <p>Made by the Sidney R. Baxter Co. of Boston who made industrial machine and combat knives during WWII, the exact purpose of this knife is unknown but could be for the New England shoe industry. The knife measures 10 5/8" overall with a 5 7/8" single edged spear shaped carbon steel blade. The thin flexible blade is a pale gray patina with scattered light staining, spots of pitting and dried glue where the blade was inserted into the wooden handle. The obverse center of the blade is marked "SIDNEY R. BAXTER Co. / BOSTON". The slightly tapered softwood handle is equipped with a 1 1/2" brass collar, both of which is covered with a clear protective varnish having a few light handling marks and spots of flaking. The obverse side of the handle is marked in ink "E.U. Cooper / 1938" under the varnish. An interesting Boston made knife. (1X5A10213-19U) [Tom Montgomery Collection] (25/75) Est. 25 - 75</p>
854	<p>Antique Remington Model RH4 Hunting Knife</p> <p>This 1924-1933 made hunting/skinning knife measures 7 3/8" overall with a 4" flat ground full tang carbon steel blade with integral double guard. The blade has toned to a smoky gray patina with scattered freckling and evidence of an old cleaning, the obverse ricasso is marked with the underlined Remington logo while the reverse ricasso has circular Remington UMC logo above "RH4". The Rogers jugged bone scales remain in excellent condition each fastened by two small brass pins. Included is an original period leather sheath showing moderate wear and handling marks but remains intact with light partially visible Remington UMC logo on front of sheath. (1X5A10213-15J) [Tom Montgomery Collection] (25/75) Est. 25 - 75</p>
855	<p>Scarce Remington RH-6 Campmaster Knife</p> <p>This seldom encountered knife measures 9 3/4" overall with a 5 1/4" cut-down tang clip point blade. The bright blade has mellowed softly with age showing sparse fine staining and a shadow along the main edge from sharpening with a steel, the obverse ricasso is marked with underlined Remington logo above "RH-6". The oval nickel silver guard remains bright, and the checkered one piece curved rosewood handle remains in excellent condition fastened by two large brass pin on either side. Included is a period Remington DuPont leather sheath with light wear and staining, the stitching beginning to separate in spots and verdigris starting to form on the hardware. (1X5A10213-15T) [Tom Montgomery Collection] (25/75) Est. 25 - 75</p>
856	<p>Early German Boy Scout Knife By Berent Steel Co.</p> <p>This pre-war boy scout knife measures 9 1/2" with a 5" carbon steel clip point blade. The blade has toned to bright silver from being heavily sharpened mainly along the reverse side which also shows some freckling and pitting on the ricasso and rear of the blade. The reverse ricasso is marked "BERENT STEEL Co. / SOLINGEN / GERMANY" while the obverse ricasso is marked simply "SOLINGEN" and the obverse blade flat is etched with a full color Boy Scout camping scene. The crossguard with S-shaped quillons have a lightly tarnished brass patina and the aluminum pommel has lightly mellowed to bright silver. The stag grip remains in excellent condition having darkened nicely with age and is centered between red, black and brass spacers. Included is a lightly worn original leather sheath with handle strap. (1X5A10213-19W) [Tom Montgomery Collection] (50/100) Est. 50 - 100</p>
857	<p>Brooks Knife Co. No. 108 Fighting Knife</p> <p>This Solingen fighter measures 10 1/2" with a 6 1/8" clip point blade equipped with short, stopped fullers. The blade has been cleaned bright with remnants of fine pitting and staining, the obverse ricasso is marked "BROOKS KNIFE Co. / SOLINGEN / GERMANY" while the reverse ricasso is numbered "108". The one piece stag handle remains in near excellent condition with a couple tiny chips and light age and drying cracks. The grip is centered between a tarnished single brass guard and aluminum pommel separated by black, red and black spacers. Included is an original brown leather sheath with handle strap showing moderate wear and staining. (1X5A10213-19R) [Tom Montgomery Collection] (15/50) Est. 15 - 50</p>

Lot	Title/Description
858	<p>Hubertus Brotzeitmesser Hunting Knife</p> <p>This is a mint condition Solingen hunting knife measuring 8 3/8" overall with a 4" tapered full tang stainless steel drop point blade equipped with an integral choil guard and collar. The blade remains bright, unsharpened and is etched with the famous St. Hubertus white stag and cross encompassed by "ORIGINAL HUBERTUS / BROTZEITMESSER" in ribands next to vertical "SOLINGEN / ROSTFREI / GESCHMIEDET". The birds head scales are each fastened by three small bright brass pins. Included is an original dark green leather sheath showing only minor storage marks from the years. (1X5A10213-19K) [Tom Montgomery Collection] (100/200) Est. 100 - 200</p>
859	<p>Unmarked Fixed Blade Hunting Knife</p> <p>This China made knife measures 7" overall with a 2 3/4" full tang stainless steel skinning blade. The blade remains unsharpened and retains all its satin finish. The stainless steel bolster remains bright, and the finger grip maple scales remain in excellent condition each fastened by two bright pins. Included is a black nylon sheath with handle strap. (1X5A10213-15Q) [Tom Montgomery Collection] (15/50) Est. 15 - 50</p>
860	<p>Early Remington RH73 Hunting Knife</p> <p>This pre-war hunting knife measures 8" overall with a 4 1/2" carbon steel trailing point blade. The blade has toned to pale gray patina with scattered spots of darker staining, fine scratches and remnants of pitting and oxidation from an old light cleaning. The etched deer scene of the obverse side of the blade is light but remains visible, the obverse ricasso has underlined Remington logo while the reverse side has round Remington DuPont logo centered between "RH" and "73", part of the DuPont marking is lost to oxidation. The turned staghorn handle remains in near excellent condition having darkened nicely with age, the aluminum guard and buttcap have mellowed with time showing fine staining and handling marks. There is no sheath present. (1X5A10213-15K) [Tom Montgomery Collection] (15/50) Est. 15 - 50</p>
861	<p>Antique Remington Model RH4 Hunting Knife</p> <p>This 1924-1933 made hunting/skinning knife measures 7 3/8" overall with a 4 1/8" flat ground full tang carbon steel blade with integral double guard. The blade has been cleaned bright with light brush marks and remnants of fine pitting, the obverse ricasso is marked with the underlined Remington logo while the reverse ricasso has circular Remington UMC logo above "RH4". The Rogers jugged bone scales remain in excellent condition each fastened by two small brass pins. Included is an original period leather sheath showing moderate wear, handling marks and a Remington UMC logo on front of sheath, the snap stud has separated from the strap but remains present. (1X5A10213-15N) [Tom Montgomery Collection] (25/75) Est. 25 - 75</p>
862	<p>Western Model L39 Hunting Knife</p> <p>This classic skinning knife measures 9 1/8" overall with a 5" split tang upswept carbon steel blade equipped with a serrated thumb rest. The blade remains unsharpened and mostly bright with a couple tiny freckles and sparse thin scratches, the obverse ricasso is marked "WESTERN / BOULDER, COLO. / U.S.A." while the reverse ricasso is marked with model number, the tang showing a little more active oxidation. The brass guard remains bright with a spot or two of sheath staining, the pinned aluminum pommel remains bright with light surface marks. The stacked leather washer grip remains in excellent condition centered between black, white and red spacers. There is no sheath present. (1X5A10213-15U) [Tom Montgomery Collection] (25/75) Est. 25 - 75</p>
863	<p>A. Wright & Son Fixed Blade Hunting Knife</p> <p>This Sheffield bowie style hunter measures 10 1/2" overall with a 6" clip point carbon steel blade. The blade remains unsharpened and overall bright except for scattered light pitting from contact with some type of contaminate. The obverse ricasso is marked "A. WRIGHT & SON / SHEFFIELD ENGLAND" while the reverse ricasso shows intertwined "A W & S" maker mark. The brass guard remains bright with light sheath staining and the aluminum pommel remains bright. The stag grip remains in excellent condition and is centered between brown, red and brass spacers. Included is a Kershaw #4701 replacement leather sheath with handle strap showing in excellent condition with only minor staining. (1X5A10213-19L) [Tom Montgomery Collection] (25/75) Est. 25 - 75</p>

920	<p>Lot of Remington Folding Knives</p> <p>Four total: (1) unknown two blade Teardrop pattern measuring 3 1/2" with a 2 3/4" spear point master blade and a 1 3/4" pen secondary blade. The blades have a pale gray patina and appear unsharpened with perhaps an old light cleaning. The brown and yellow tortoise shell celluloid scales remain in very good condition showing light wear. The nickel silver bolsters and crest shaped shield have mellowed with age; (1) R6785 two blade Office Knife measuring 3 3/4" with 2 1/8" carbon steel spey and spear point blades. The blades remain unsharpened but appear to have been lightly cleaned with remnants of fine staining, the model numbers on the tangs no longer present and the Remington UMC circle logos only partially visible. The cream colored Pyremite scales remain in excellent condition and are marked "The Remington OFFICE KNIFE" in scroll on one side; (1) R675 two blade Dogleg Jack measuring 3" with a carbon steel 2 1/4" spear tip master and 1 5/8" pen secondary blade. The blades have mellowed slightly with spots of fine staining, the master blade etching and tang markings clean and visible. The blue and green swirl Pyremite scales remain in excellent condition and the nickel silver shield and bolsters have mellowed only slightly; (1) R6904 two blade Senator pattern measuring 2 3/8" with a 1 1/2" master and a 1 1/4" secondary pen blade. The blades remain unsharpened, bright and the nickel silver double bolsters remain bright as well. The scales remain in excellent condition and feature a nickel silver bail at one end. (1X5A10213-7H) [Tom Montgomery Collection] (50/100) Est. 50 - 100</p>
921	<p>Pair of Jumbo Folding Fish Knives</p> <p>(1) Imperial two blade Trapper pattern measuring 5" with a 3 3/4" clip point master blade equipped with an extra-long nail pull and a 3 7/8" fish scaler equipped with a hook remover and bottle cap opener. The blades remain bright with spots of light staining and minor operational marks. The nickel silver bolsters remain bright having mellowed only slightly. The black and gold waterfall celluloid scale remain in very good plus condition, each fastened by five bright pins which show tiny thin cracks at the smaller front and rear pins; (1) Colonial two blade Coke Bottle pattern measuring 5 1/8" with a 4 1/8" clip point master blade and a 4" shortened fish scaler secondary blade equipped with a bottle cap opener. The blades have been cleaned nearly bright with a few spots of light staining, the tip of the scaler blade has been rounded removing the hook remover feature. The nickel silver bolsters have mellowed with scattered light staining and impact marks. The mottled blue and ice celluloid scales remain in near excellent condition showing minimal wear, the obverse scale is equipped with a nickel silver bow tie shield. (1X5A10213-26Y) [Tom Montgomery Collection] (25/75) Est. 25 - 75</p>
922	<p>Robeson Shuridge No. 612246, Coke Bottle Lockback</p> <p>This 1922-1940 made Coke bottle pattern measures 5 1/4" with a 4" saber ground clip point blade equipped with extra-long match strike nail pull. The blade remains bright with scattered fine scratches from being lightly sharpened. The obverse tang is marked "ROBESON / SHURIDGE (in script) / ROCHESTER N.Y." while the reverse tang is marked with model number. The medium brown jugged bone scales remain in excellent condition centered between bright nickel silver bolsters, each fastened by four small bright pins, the obverse scale has a nickel silver bowtie shield. The scale has developed light horizontal wobble with age. An attractive early Robeson lockback. (1X5A10213-8AJ) [Tom Montgomery Collection] (200/400) Est. 200 - 400</p>
923	<p>Lot of Robeson Pocketknives</p> <p>Three total: (1) Shuredge No. 333856 three blade Stockman measuring 2 5/8" with a 2" clip point master blade and 1 3/8" sheepfoot and pen secondary blades. The blades appear unsharpened and show scattered freckling and oxidation. The pearl celluloid scales are centered between bright nickel silver double bolsters, each fastened by three small bright pins, the obverse scale has Robeson marked oval shield and are in very good plus condition with a small hole behind the front bolster on the reverse side; (1) Shuredge two blade swell end jack measuring 2 1/8" with 1 5/8" and 1 1/4" pen master and secondary blades. The blades have been cleaned and sharpened and show scattered freckling and staining, the model number no longer decipherable. The genuine mother-of-pearl scales remain in excellent condition each fastened by three small bright pins, the nickel silver bolster has mellowed slightly; (1) No. 722737 two blade Lobster pattern gentleman's knife measuring 2" with a 1 1/2" pen master and 1 5/8" curved manicure blade equipped with extra-long match striker nail pull. The blades have toned to bright silver patina with scattered freckling and staining, tang markings light but mostly visible. The genuine mother-of-pearl scales remain in excellent condition each fastened by a single bright pin and attachment ring. (1X5A10213-26W) [Tom Montgomery Collection] (25/75) Est. 25 - 75</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
924	<p>Ka-Bar No. 1183 Liner Lock Hunter This is a lovely 1950-1960's era single blade swell center liner lock measuring 5 1/8" with a 4" carbon steel clip point blade. The blade remains unsharpened, retains all its original satin finish with light operational scratches. The obverse tang is marked "KA-BAR / 1183 U.S.A.". The light mahogany scales remain in excellent condition, each fastened by the small brass pins and centered between brass bolsters. The bolsters remain in excellent condition as well and have a nice brass patina. (1X5A10213-9G) [Tom Montgomery Collection] (50/100) Est. 50 - 100</p>
925	<p>Lot of Vintage Remington Folding Pocketknives Five total: (1) R6265 two blade Half-Whittler pattern measuring 3 1/4" with heavily ground 2 3/8" master and 1 3/4" secondary carbon steel pen blades having a dark gray patina with light staining. Black and red flake Pyremite scales remain in excellent condition showing light wear and the nickel silver slanted double bolsters and crest shaped shield have mellowed softly; (1) R2065 two blade Regular Jack pattern measuring 3" with a carbon steel 2 1/4" spear tip master blade and 1 5/8" worn pen secondary blade. The blade remains unsharpened but shows evidence of an old light cleaning with specks of light staining. The green swirl Pyremite scales remain in excellent condition and the nickel silver bolster remains bright with minor carry mark; (1) R9505 Barlow pattern measuring 3 1/4" with a carbon steel 2 3/8" clip point master blade and 1 3/4" pen secondary blade. The blades remain mostly bright with scattered tin staining along the top half of the master blade. The nickel silver bolster has mellowed only softly and the green saw-cut Delrin scales remain in excellent condition with a nickel silver Remington logo shield; (1) single blade reproduction advertisement boot knife measuring 3 1/4" with a 2 1/4" clip point blade showing moderate scuffs and scratches from being sharpened. Nickel silver scales in shape of a boot with bottle cap opening heel. Obverse side has "Coca-Cola" logo while the reverse side reads "DRINK / Coke 5¢"; (1) R6465 two blade Senator Pen pattern measuring 3" with a 1 5/8" ground carbon steel pen blade with tiny chips along the main edge and a dark gray patina with scattered light staining, the master blade is no longer present. The yellow and white cracked ice Pyremite scales remain in very good condition showing light wear and the nickel silver double bolsters showing light staining and carry marks. (1X5A10213-7P) [Tom Montgomery Collection] (50/100) Est. 50 - 100</p>
926	<p>Antique Union Cutlery OLCut Folding Hunter This is a fabulous single blade Coke bottle pattern knife measuring 5 1/4" with a 4" carbon steel clip point blade. The blade remains unsharpened and overall bright with light staining and operational marks mainly along the upper reverse edge. The obverse center of the blade is etched "IN CO" while the obverse tang is marked "OLCUT* / UNION CUT. CO. / OLEAN, N.Y.". The yellow pineapple swirl celluloid scales are centered between nickel silver bolsters and are each fastened by five small bright pins. The bolsters remain bright with light staining on the obverse side where the bolsters came in contact with some type of contaminate. Although no one is certain it is believed that Olean Cutlery was absorbed by Union Cutlery sometime between 1911 and 1951, this knife is a marvelous example. (1X5B10213-8AQ) [Tom Montgomery Collection] (100/200) Est. 100 - 200</p>

Lot	Title/Description
927	<p>Lot of Folding Pocketknives Six total: (1) Imperial two blade Easy Open Jack pattern measuring 3 1/4" with 2 1/2" and 1 3/4" carbon steel spear point blades. The blades appear unsharpened and have toned to smoky gray patina with spots of light staining. The dark brown jugged bone scales remain in excellent condition, the steel bolsters and bail have a gray patina resembling the blades; (1) antique Valley Forge two blade Serpentine Jack pattern measuring 3 1/4" with a carbon steel 2 3/8" shortened clip point master blade and 1 3/4" spear point secondary blade. The blades have been heavily ground and sharpened, tang markings remain legible. The steel bolsters have been cleaned to a bright silver patina with fine pitting and carry marks and the cream colored jugged bone scales remain in very good condition with nickel silver crest shield; (1) antique Camillus Streamline two blade Serpentine Jack pattern measuring 3 7/8" with a carbon steel 3" clip point master blade and a 2" spear point secondary blade. The blades show moderate grind and sharpening marks, the obverse side of the master blade is deeply stamped "STREAMLINE" and the tang has four line crossed swords mark. The green waterfall celluloid scales remain in good condition with handling marks and a thin crack across each scale. The nickel silver scales have been cleaned bright with fine pitting and impact marks. The spring of the master blade no longer functions properly; (1) Kutmaster three blade Stockman pattern measuring 3 7/8" with a carbon steel 3" clip point master blade with extra-long nail pull and 2" spey and sheepfoot secondary blades showing scattered fine pitting and spots of oxidation and freckling. 957	Buhl Dagger The overall length is 10 1/2" with a 6" double edge blade with a dagger tip. The handle is wood held in place with three brass pins. Included is a leather sheath, both the blade and sheath are in excellent condition. (2X26A9767-7AU) (5/15) Est. 5 - 15
958	Western Model W36 Hunting Knife This 1980 D-date code knife measures 9 3/4" overall with a 5 1/2" split tang carbon steel clip point blade. The blade has been cleaned and sharpened showing remnants of scattered pitting and freckling. The obverse ricasso is marked "WESTER / U.S.A. W 36 / D". The brass guard has a lightly mellowed patina and the aluminum pommel show light handling marks and staining from the years. The rosewood scales remain in excellent condition, fastened by two large brass pins and centered between black, red and white spacers. There is no sheath present. (1X5A9276-9B) (25/75) Est. 25 - 75

Lot	Title/Description
959	Solingen Original Bowie Knife By Precise International This massive German imported bowie measures 19 1/2" overall with a 10" full tang clip point blade. The blade has been lightly sharpened and shows scattered light scratches and some fine staining. The obverse side of the blade is marked "Original Bowie Knife" on the rear blade flat while the obverse ricasso has mountain importer mark and the reverse ricasso is marked "PIC / SOLINGEN / GERMANY", all writing is crisp and clean. The oval brass guard has a nicely tarnished brass patina and the slab-sided stag grips remain in excellent condition, each fastened by three small brass pins. Included is a thin leather sheath with decorative red and black trim showing light stains and wear, the tip has become unstitched but stable. (1X5B9276-9C) (75/150) Est. 75 - 150
960	Solingen Stag Handled Bowie By Berent Steel Co. This large bowie measures 17 1/2" overall with a 12 1/8" bowie style carbon steel blade equipped with unstopped fullers. The blade shows light scratches overall from being cleaned and sharpened with sparse patches of cleaned fine pitting and light staining. The obverse ricasso is marked "SOLINGEN" while the reverse ricasso is marked "BERENT STELL Co. / SOLINGEN / GERMANY". The stag handle remains in excellent condition and is centered between an aluminum pommel and thin brass half hilt separated between brown, red, brass, and black spacers. There is a tiny chip in one of the spacers just behind the handle on the obverse side. (1X5A10213-23J) [Tom Montgomery Collection] (50/100) Est. 50 - 100
961	Junglee Small Hunter Designed by Tak Fukuta, this custom hunter measures 8 1/4" overall with a tapered full tang AUS-8 stainless steel drop point blade. The blade remains unsharpened, retains all its bright mirror polish with etched "Junglee / Tak Fukuta" in the center of the obverse side. The nickel silver single guard remains bright and the curved rosewood scales remain in excellent condition, each fastened by brass and aluminum rivets and equipped with an aluminum lined thong hole. Included is a Junglee marked leather belt sheath showing some light wear. (1X5A10213-14Q) [Tom Montgomery Collection] (75/150) Est. 75 - 150
962	Custom Sub-Hilt Fighter By Gillespie This handmade fighting knife by Bruce Gillespie of West Union, West Virginia measures 9" overall with a 5" full tang damascus blade equipped with a 3 3/8" unsharpened false edge and Spanish choil. The blade remains unsharpened, retains all its bright ladder damascus pattern and is marked "Gillespie" along the obverse blade flat. The single guard and sub-hilt have a lightly mellowed brass patina and the stained tiger maple scales with fine red liners remain in excellent condition, each side fastened by five small bright brass pins. The scales feature decorative gold mosaic center pins and a brass lined lanyard hole. Included is a hand tooled brown leather sheath with wide handle strap and a plain nickel snap. A very attractive Gillespie sub-hilt fighter. (5A10213-15C) [Tom Montgomery Collection] (400/600) Est. 400 - 600
963	Weidmannsheil Jagdmesser Stag Handle Bowie This newer Solingen bowie measures 10 1/4" overall with a 5 3/4" full tang bowie style blade. The blade remains unsharpened, retains all its bright mirror polish and is etched with a boar centered between "WEIDMANNSSHEIL / STAINLESS" and "SOLINGEN / GERMANY". The brass double guard with ball shaped finials remains bright and the grips are lovely Sambar stag, each scale fastened by three small bright brass pins. Included is a natural colored leather belt sheath with embossed stag on the front and a two piece factory box with green and gold Weidmannsheil 100 years labels. An as-new not so common Solingen bowie. (1X5A10213-29A) [Tom Montgomery Collection] (50/100) Est. 50 - 100
964	NON-XLL Joseph Allen & Sons Sheffield Deer Hoof Knife Joseph Allen & Sons turn of the century Bowie Knife. 7" carbon steel blade in very good shape for its age with a very few light scratches. Knife is still very sharp with a nice point. Blade is marked NON XLL. Has an S shaped guard and nickel silver band right behind the guard. The handle is made from the hoof of a small deer. There is a small plate attached to the bottom of the hoof and also looks to be nickel silver. There is some damage to the hoof probably from horn worms, but everything is there and is tight. (1X2610213-28D) [Tom Montgomery Collection] (15/50) Est. 15 - 50

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
965	<p>Custom Drop Point Hunter By Weinland This lovely knife was crafted by Gerome Weinland when he lived in Lolo Montana and measures 8 1/8" overall with a 3 7/8" full tang damascus drop point blade. The blade remains unsharpened, retains all its waterfall damascus scene and is marked with vertical "WEINLAND / LOLO, MT" mark on the obverse side in front of the ricasso. The hammered stainless steel single guard remains bright and the finger groove wildebeest scales remain in excellent condition, each fastened by five small bright pins and equipped with an aluminum lined lanyard hole. The included open throat leather sheath remains in excellent condition. (1X5A10213-15) [Tom Montgomery Collection] (400/600) Est. 400 - 600</p>

(1X2610213-47A) [Tom Montgomery Collection] (10/30) Est. 10 - 30</p>
975	<p>Knife Lot Three total: (1) 8 1/2" Black Mamba throwing knife made by Edge Brand in Solingen Germany, the blade is a spear point with some of the black finish flaking away but remains in excellent condition, a red leather sheath is included; (1) survival knife made in Taiwan measuring 11 1/2" overall with a 6" clip point blade featuring 2 1/2" of serration on the spine of the blade with a bottle opener near the crossguard. The handle is made of plastic and has a compass in the pommel. The knife remains in very good condition with scattered spots of oxidation and light oxidation staining; (1) U.S. M7 bayonet that measures 11 1/4" with a 6 1/2" spear point blade featuring a 3" double edge, there is moderate oxidation staining on the matte black finish. The muzzle ring on the crossguard has been sawed almost all the way through, the plastic checkered handle is broken near the flat pommel and there are cracks near the securing screws. Overall, the knife remains in good condition. (1X2610214-29AF) [Tom Montgomery Collection] (25/75) Est. 25 - 75</p>
976	<p>American Cutlery Co. Butcher Knife This butcher knife measures 17 1/2" overall and features a 12" drop point blade with 6 1/2" unsharpened bevel. The blade has aged to a dull grey patina with scattered light oxidation and an area of moderate oxidation on the obverse side towards the ricasso. There is a significant chip on the edge towards the handle with a few small warps to either side. The obverse side maker's mark is barely distinguishable and has "(Eagle) American Cutlery Co". The rosewood scales remain in very good condition with a minor warp in the tang causing some separation and the brass rivets have minor oxidation. (1X27A10214-29F) [Tom Montgomery Collection] (10/30) Est. 10 - 30</p>
977	<p>No 4 Mk II Bayonet 10" overall, 8" spike bayonet in factory new condition. This bayonet fits a Lee Enfield No 4 Rifle and was later replaced by the pattern 1907 bayonet. "5153" has been etched into the side of the socket and there are no other distinguishable markings. The included sheath and frog are in excellent condition. (1X26Z10214-29T) [Tom Montgomery Collection] (5/25) Est. 5 - 25</p>
978	<p>Anton Wingen Othello Folding Bowie This near mint folding bowie measures 12" overall with a 8 1/2" folding stainless steel clip point blade. The blade remains unsharpened and retains all its original bright mirror polish with only some light guard wear at the rear of the blade, the obverse blade has Anton Wingen Jr.'s Othello profile maker mark above "SOLINGEN / ROSTFREI / GERMANY". The stainless steel sliding recurve guard, bolster and lever-lock retain all their matching mirror polish. The rosewood scales remain in excellent condition and are each fastened by six small brass pins. Included is a wet-formed open throat leather sheath with handle strap in near excellent condition showing light wear and staining. (1X5A10213-20T) [Tom Montgomery Collection] (300/500) Est. 300 - 500</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
979	<p>Carving Knives Three knives total. First is an Ekco Eterna knife measuring 11 1/2" overall and features a 6 3/4" drop point blade. The blade remains mostly bright with some minor stains throughout. The maker's mark can be clearly seen on the obverse side "Ekco Eterna Stainless U.S.A.". The red hardwood handle has some finish wear, and the two brass rivets have minor tarnish. Second is an Ekco Forge knife measuring 10 1/2" overall and features a 6 1/4" straight blade. The blade has aged to a dull grey patina with scattered light oxidation and retains about 40% blue finish. The maker's mark is clearly seen on the obverse side "Ekco Forge U.S.A.". The brown hardwood scales have some slight stains and very minor warping. The brass rivets have minor tarnish. Lastly is a Lamson & Goodnow Co. knife measuring 11" overall and features a 6 1/2" clip point blade. The blade has aged to a quite nice slightly dull patina with scattered fine oxidation. The maker's mark is clearly seen on the obverse side "Lamson & Goodnow / M.F.S. Co.". The stag handle remains in very good condition with a few fine cracks toward the ricasso. (1X27A10214-29D) [Tom Montgomery Collection] (25/75) Est. 25 - 75</p>
980	<p>Sheffield Stag Steak Knives Three knives are included, all are identical make with varying length handles but all have a 4 1/2" single edged blade with 1" of serrations near the tip, all of the blades are marked "Sheffield / Jordan Marsh Company / England" over "Stainless" on the ricasso and they remain in factory new condition. The handles are made of stag horn with a nickel alloy pommel and are in excellent condition. (1X2610213-14Y) [Tom Montgomery Collection] (15/50) Est. 15 - 50</p>
981	<p>Imperial Diamond Edge Chef's Knives Two knives total. First measures 13 1/2" overall and features an 8" stainless steel drop point blade. The blade remains bright with minor scratches and stains, light chips along the edge, and the point appears to have broken off at some point. The hardwood handle remains in excellent condition. Second measures 12 1/2" in length with a 7 3/4" stainless steel drop point blade. The blade is mostly bright with light oxidation on the obverse side, more moderate oxidation on the reverse side toward the handle, and light chipping along the edge. The hardwood handle remains in mostly very good condition with minor stains. (1X27A10214-29AH) [Tom Montgomery Collection] (5/15) Est. 5 - 15</p>
982	<p>Puma No. 480250R "Rancher" Folding Knife This new-in-box 1980-1990's two blade Hunter pattern measures 5" with a stainless steel 4" saber ground clip point master blade and a 4" Turkish clip secondary blade. Blades remain bright, unsharpened and the nickel silver bolsters remain bright as well. The jugged bone scales have a vibrant reddish pink color and gold colored inlaid logo shield in the obverse scale. The original leather thong remains in place and factory box is included. (1X5A10213-5Y) [Tom Montgomery Collection] (25/75) Est. 25 - 75</p>
983	<p>Staghorn Handled Dagger 11" overall, 7" dagger blade with a few handling marks and the blade remains bright and in near excellent condition; the ricasso has the initials "MH" hand etched into it. The hilt is made of an antler with a gem for a pommel and a large brass crossguard with curved quillons. The included sheath is made of leather and has a tree etched into it near the throat, on the back the same initials are hand carved with the numbers "83". Overall, the knife and sheath remain in excellent condition. (1X2610213-47M) [Tom Montgomery Collection] (25/75) Est. 25 - 75</p>
984	<p>Custom Drop Point Hunter By Goltz This beautiful one-piece hunter by the late Warren Goltz measures 8 1/2" overall with a 4" ATS 34 stainless steel drop point blade. The blade remains unsharpened and bright and the integral guard and pommel remain bright as well. The shaped fiddleback maple handle remains in excellent condition showing lovely grain. Included is a Goltz marked open throat wet-formed leather sheath in equally excellent condition. (1X5A10213-14D) [Tom Montgomery Collection] (100/200) Est. 100 - 200</p>
985	<p>Custom Philippine Punal 9 1/2" overall length with a 6" double edged blade, the handle is wood with sculpted design work in silver overlay near the ornate cross guard, the cross guard has some chips missing. Included is a wood sheath showing more silver overlay with light handling marks. Both pieces are in excellent condition. (1X2610213-13T) [Tom Montgomery Collection] (25/75) Est. 25 - 75</p>

Lot	Title/Description
986	<p>Landers, Frary & Clark Butcher Knife This butcher knife measures 13 1/2" overall with an 8 3/4" drop point blade. The blade is in about very good condition with scattered moderate pitting and toning to a dark grey patina. The maker's mark is no longer visible, and the edge has small chips along its length. The hardwood scales remain in very good condition and the brass pins show light oxidation. (1XD27A10214-29E) [Tom Montgomery Collection] (10/30) Est. 10 - 30</p>
987	<p>Othello Hunting Knife by Anton Wingen Jr 8 3/4" overall, 4 1/2" trailing point blade with a 2 1/2" false edge and some staining from oxidation and a few dull spots on the cutting edge. The ricasso is marked "Anton Wingen Jr / Soligen Germany" the obverse has "(Face) / Othello / Solingen". The handle is made of stage horn and has some red paint transfer with black and red Bakelite spacers finished with a round aluminum pommel. The included leather sheath is in excellent condition and features a metal reinforced tip. (1X2610213-18L) [Tom Montgomery Collection] (25/75) Est. 25 - 75</p>
988	<p>Unmarked Stag Handled Fighter This well-made custom fighting knife has no markings on the blade and is similar in design to a Randall No. 1 All-Purpose Fighter. The knife measures 11 3/8" overall with a 6 1/2" high carbon saber ground clip point blade. The blade remains unsharpened and bright with some pinpoint spots of staining and very light storage marks from the years. The single brass guard has a pleasing tarnished patina and the stag handle remains in excellent condition and is separated from the guard with a black and brass spacer color. Included is an unmarked natural colored leather belt sheath with light handling marks and staining from the years. A nice fighting knife crafted by an unknown knowledgeable knifemith. (1X5A10213-14N) [Tom Montgomery Collection] (100/200) Est. 100 - 200</p>
989	<p>Antique Stage Handled Bowie By Standard Cutlery Co. Although not marked, this is believed to be Sheffield-made and measures 9 1/2" overall with a 5 5/8" full tang carbon steel blade. The blade has toned to a pale gray with scattered light staining and light scratches from being sharpened. The obverse ricasso is marked simply Standard Cutlery Co. The oval German silver guard has a lightly tarnished patina and slab stag scales remain in excellent condition having darkened nicely with age with light ingrained dirt staining, each fastened by two small iron pins. Included is a period hand laced open throat leather sheath with braided fringe, a couple strands and seams have separated. (1X5A10213-20S) [Tom Montgomery Collection] (50/100) Est. 50 - 100</p>
990	<p>Case Fixed Blade Hunting Knife This older knife measures 8 3/8" overall with a 4 3/8" carbon steel drop point blade equipped with thumb serrations. The blade has toned to gray metal with overall scratches and spots of staining from being moderately ground and reshaped, the obverse tang is marked "CASE". The stacked leather washer handle remains in good condition showing modest wear and is centered between an aluminum pommel and single guard separated by black, brass, and red spacers. There is no sheath present. (1X5A10213-16J) [Tom Montgomery Collection] (15/50) Est. 15 - 50</p>
991	<p>Richards RCMP Souvenir Fixed Blade Knife This is a Richards Tent Brand souvenir knife made for Canadian souvenir shops. The overall length is 8". The blade is 4" long and 3/4" wide with a drop point tip. The handles have a pearlized plastic cover on one side and a lithographed plastic portrait of a Royal Canadian Mounted Police constable on a horse. The blade has some minor age discoloration and is marked with the Tent logo. The included leather sheath has some handling marks and oxidation staining near the rivets and securing strap button. (1X2610213-18N) [Tom Montgomery Collection] (15/50) Est. 15 - 50</p>
992	<p>Ka-Bar No. 1224 Fish & Game Knife This is a beautiful little knife that measures 6 1/4" overall with a slim low profile 3" clip point blade. The blade remains unsharpened and bright retaining all its original mirror polish. The obverse ricasso has lowercase maker mark "Kabar / 1224 USA". The brass guard has a mellow bright ocher patina with a spot or two of light tarnish, the aluminum pommel retains all of its satin finish with a tiny blemish or two and a minute spot of staining. The stacked leather washer handle remains in excellent condition and is centered between black, white and red spacers. There is no sheath present. (1X5A10213-16G) [Tom Montgomery Collection] (25/75) Est. 25 - 75</p>

Lot	Title/Description
993	<p>French Sabatier Chef's Knife</p> <p>This chef's knife measures 16" overall and features a 10 3/4" drop point blade. The blade has aged to an attractive dark grey to slightly brownish patina with scattered light oxidation. The obverse side maker's mark is clearly stamped "Medaillé'OR / EXPonUNle1878 / Latrompette / M. Pouzette / France". The dark hardwood scales remain in very good condition with some chips on the butt and the brass rivets are mostly bright with minor tarnish. Overall a very fine example of an antique chef's knife. (1X27A10214-29Z) [Tom Montgomery Collection] (50/100) Est. 50 - 100</p>
994	<p>Antique Sheffield Bowie By Johnson</p> <p>This bowie style hunting knife measures 9 5/8" overall with a 5 3/4" full tang carbon steel bowie blade. The blade has toned to pewter and brown patina with scattered oxidation, a slightly rounded tip and modest grinding from being sharpened. The obverse ricasso is marked "G.JOHNSON & Co. / SHEFFIELD / ENGLAND". The nickel silver oval guard has a mellow tarnished patina and the cream colored jugged bone scales remain in excellent condition having darkened nicely with age and are each fastened by three small iron pins. There is no sheath present. (1X5A10213-20J) [Tom Montgomery Collection] (100/200) Est. 100 - 200</p>
995	<p>Early Case XX No. 62-5 Fixed Blade Knife</p> <p>This is a nice pre-1920 with early tang markings. The knife measures 9 3/8" overall with a 5 1/2" full tang carbon steel clip point blade equipped with an integral double guard. The blade remains bright overall with scuffing along the bevel from being sharpened. The obverse tang has two line "CASE / BRADFORD, PA" marking while the reverse ricasso has three-line "CASE / XX / TESTED" in oval markings. The red jugged bone scales remain in excellent condition and are each fastened by three small iron pins. The included Cases Sportsman deer head brown leather sheath remains in about very good condition showing modest wear and staining, the handle strap has come detached from the rear of the belt loop but remains in place. A very good plus to near excellent 100 year old plus Case hunting knife. (1X5A10213-16K) [Tom Montgomery Collection] (200/400) Est. 200 - 400</p>
996	<p>Western Model 45 Hunting Knife</p> <p>This second style of hunting knives made by Western measures 8 1/2" overall with a 4 1/2" split tang clip point carbon steel blade. The blade shows scattered fine staining and light oxidation along the tang, pinprick pitting at the tip on the reverse side and light scratches from being sharpened. The stacked leather washer handle remains in very good plus condition centered between a streamlined aluminum pommel and a brass single guard separated by black, white and red spacers. Included is a worn leather belt sheath with embossed Boy Scout snap, scattered staining, initials of previous owners incise carved in the front of the sheath and a cracked nearly separating handle strap. (1X5A10213-145) [Tom Montgomery Collection] (25/75) Est. 25 - 75</p>
997	<p>Edward Barnes & Son's Celebrated Dirk</p> <p>This large dirk measures 12 5/8" overall with a 7 7/8" double edge diamond shaped blade. The blade is a gray patina showing light sharpening quite possibly a full 8" when new. The obverse ricasso is marked "EDWARD / BARNES & SONS / CELEBRATED / DIRK KNIFE", reverse ricasso is marked "U"S". The German silver double guard has mellowed lightly with age showing light staining and a few tiny dings and marks. The slab stag grips remain very good having darkened nicely with age showing normal wear and an old 1" resin repaired chip at the tip pin. The left scale has a German silver plaque scratch engraved "T. Donovan". There is no sheath present. A handsome Civil War period stag handled dirk. (1X5A10213-13E) [Tom Montgomery Collection] (400/600) Est. 400 - 600</p>
998	<p>Joseph Rodgers & Sons Trapper Knife</p> <p>9 1/2" overall, 5" with a trailing point blade that has signs of oxidation and handling marks but remains in very good condition, the blade is stamped "Abercrombie & Fitch Co / New York" "Hand Forged / And / Hand Ground" with "Trapper" on the ricasso. The hardwood scales are secured by three pins. The included leather sheath has light handling marks, some oxidation and rates very good. (1X2610213-18H) [Tom Montgomery Collection] (25/75) Est. 25 - 75</p>

Lot	Title/Description
999	<p>Sheffield "The Invicta" Stag Handle Dirk by Dickinson</p> <p>This attractive little dirk by E.M. Dickinson measures 8" overall with a 4 1/8" double edged spear tip blade. The slim blade remains in near excellent condition with virtually no visible sharpening and only some tiny fine scabbard marks and nicks only noticeable when gliding a fingernail along the edges. The blade is nicely mellowing to a bright silvery gray patina with some fine staining and freckling. The obverse ricasso is marked "E.M. DICKINSON / SHEFFIELD / ENGLAND" and the reverse ricasso is marked "THE INVICTA" in riband. The oval German silver guard has mellowed slightly and is a bit loose and the ferrule has nicely tarnished decorative silver plate. The curved stag handle remains in excellent condition having darkened nicely with age and a nice flat German silver buttplate. Accompanying the dirk is the original black leather sheath. (2X5A10213-13G) [Tom Montgomery Collection] (50/100) Est. 50 - 100</p>
1000	<p>Vintage Italian 10.4 Vetterli Rifle Ammunition</p> <p>Nine rds. total. Two items. First is an opened, partial box containing 5 rounds of cartridges. The original box shows "CAPUA / 1891" and "D.G." ink stamps with red label indicating "Mo 1870e" and "Mo 70/87" use. The box shows some staining and the lid with fabric pull-tab is partially torn. The cartridges are otherwise very fine. Next is a full 4-round clip for the Vetterli rifle that rates about very fine showing some slight bends along the metal components and minor chips on the wooden block. The cartridges show mild tarnishing overall and remain in very good plus condition. A fine lot for the Italian martial collector. (13A8351-9)</p>
1001	<p>Italian 7.35 Carcano Ammunition</p> <p>54 rounds total (on nine, 6-round clips). Three 18-round boxes of 1939-dated ammunition, two boxes are opened and one remains sealed. The boxes rate very good showing some light staining and tears while the brass-cased ammunition on blued steel clips remain in very fine condition. (13A8351-9A)</p>
1002	<p>Italian 6.5 & 7.35 Carcano Ammunition</p> <p>72 rounds total, 36 rounds of each. There are two 1943-dated boxes of 6.5 Carcano including four brass clips. The clips and cartridges show varying dates and remain in very good plus condition. Next there are two full sealed boxes of 1939-dated 7.35 no doubt containing three full 6-round blued steel clips each. (13A8351-9D)</p>
1003	<p>Assorted Vintage Ammunition & Shotshells</p> <p>26 rounds of assorted surplus Finnish & German 9mm cartridges showing light to moderate tarnishing in a worn Finnish-marked box. 1 round French-made Beaux 10.4 Italian Ordnance revolver cartridge in very fine condition and 1 round of Focchi 10.4 Italian Ordnance blank cartridge. 8 rounds Remington-UMC 32 ACP cartridges showing moderate tarnishing, some areas rather heavy. Finally one partial 11-round box of Remington Dupont 12 gauge Kleanbore Shure Shot shells. The green, white and red box is rather dilapidated with tears and a missing flap and the green shotshells are good to very good with some light staining and tarnishing. (13Z8351-9B)</p>
1004	<p>Lot of 41 Rim Fire Ammunition</p> <p>This lot has 50 rounds of ammunition. It consists of a single box of 50 rounds of Remington Arms Company 41 Rim Fire Short ammunition in excellent condition. Each cartridge features a pointed lead bullet with a "U" headstamp, and although the grain weight is not provided it was generally 130 grains. The plain white box is marked "50 CARTRIDGES / 41 SHORT RIM FIRE / REMINGTON ARMS COMPANY INC. / BRIDGEPORT, CONN.". The box rates excellent. (8A9100-1282A)</p>
1005	<p>Lot of 41 Rim Fire Ammunition</p> <p>This lot has 50 rounds of ammunition. It consists of a single box of 50 rounds of Brazilian manufactured Navy Arms Company 41 Rim Fire Short ammunition in excellent condition. Each cartridge features a pointed lead bullet with a "V" headstamp, and although the grain weight is not provided it was generally 130 grains. The red, white, and blue box is marked "41 SHORT RIM-FIRE CARTRIDGES / 50 CTGES" with a Navy Arms logo in the upper left corner. The box rates very good to excellent showing dried-on glue and minor scuffing of the label in the upper left corner. (8A9100-1282B)</p>
1006	<p>218 Bee Ammunition</p> <p>One 50-round size box with (43) +/- rounds of Winchester Super Speed brass case ammo loaded with 46 grain hollow point bullets in about very good condition with minor oxidation on some of the cases. The box has minor flaking and edge wear. (27Z6519-398)</p>
1007	<p>218 Bee Ammunition</p> <p>One 50-round size box with (47) +/- rounds of Winchester Super Speed brass case ammo loaded with 46 grain hollow point bullets in very good condition with minor oxidation on some of the cases. The box has minor flaking, edge wear, and the left side flap has become detached but is present. (27Z6519-398A)</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
1008	218 Bee Ammunition 50 rounds total. One box of Winchester Super Speed brass case ammo loaded with 46 grain hollow point bullets in very good condition with minor oxidation on some of the cases. The box has minor flaking, tears, and edge wear. (27Z6519-398B)
1009	218 Bee Ammunition One 50-round size box with (48) +/- rounds of Winchester Super Speed Brass case cartridges loaded with 46 grain hollow point bullets in very good condition with minor oxidation on some of the cases. The box has minor flaking and edge wear. (27Z6519-398C)
1010	7.62x39 Ammunition 80 rounds total. Four 20-round boxes of Wolf Performance Ammunition steel case, Berdan primed cartridges loaded with 123 grain FMJ bullets in excellent as-new condition. (27Z10787-8H)
1011	22 Rem Jet Ammunition 50 rounds total. One box of Remington Hi-Speed brass case cartridges loaded with 40 grain soft point bullets in very good condition with some of the cases having minor oxidation. (27Z6519-398D)
1012	22 Rem Jet Ammunition 50 rounds total. One box of Remington Hi-Speed brass case cartridges loaded with 40 grain soft point bullets in very good condition with some of the cases having minor oxidation. (27Z6519-398E)
1013	Assorted Rimfire Ammunition Three boxes total. First is a full 50-round box of Canuck 32 Short copper cased cartridges loaded with 80-grain copper plated bullets in very good condition with minor oxidation. The box is torn in multiple spots and has minor flaking. Second is a partial (35) +/- round box of Canuck 32 Long copper cased cartridges loaded with 80 grain lead bullets in about good to very good condition with mild staining and oxidation while the box has moderate flaking, tears, and edge wear. Third is a box containing (33) Winchester black powder 22 caliber "Extra Loud" blank cartridges. The condition ranges from good to very good with some cartridges exhibiting mild verdigris. (27Z10723-14A)
1014	Assorted 22 Rem Jet Ammunition Three boxes total each containing a mix of live rounds and previously fired cases. The first partial box contains (36) Remington Kleanbore brass case cartridges loaded with 40 grain soft point bullets in very good condition. Included are (8) fired cases, seven of them being de-primed. The second partial box contains (13) Remington Kleanbore brass case cartridges loaded with 40 grain soft point bullets in very good condition. Included are 34 fired cases all of which are de-primed. The third partial box contains (11) Remington High Velocity brass case cartridges loaded with 40 grain soft point bullets in very good condition. Also included are (39) fired cases. (27Z6519-398F)
1015	45 Automatic 12 rounds with moon clips and pouch. These cupronickel bullets have domed primers with "U.S.C.Co / 17" marks on the head and show light to perhaps moderate tarnish throughout. They come on three round moon clips with four pocket heavy canvas pouch that is marked "R.H. Long 6 18" on the inside flap with "M. Ellis Lt 812 Inf." personal information on the back and all items remain in good condition. (1X10Z9831-19) [Dr. William C. Nugent Collection]
1016	BREN Magazine Lot This L4A1/L1A1 inch pattern BREN gun magazine rates very fine with some light finish wear or scratches but no dings or dents. 30 round capacity with a good spring and follower and larger milled locking lug on the front. Right side of body is marked "Magazine 7.62 MM L4A1 (broad arrow stamping)/9600089 D59". Made for use in the L4A1 squad automatic weapon and also fits the L1A1 rifle. (3A6519-335) [Richard "Stretch" Kennedy Collection]
1017	Lot of CZ 527 .22 Hornet Magazines Two total, blued replacement 5-round factory magazines, used but appearing as-new. Right side slotted for magazine catch, polished follower is stamped "22 Hornet". (3Z6519-335A) [Richard "Stretch" Kennedy Collection]
1018	Lot of Spanish Destroyer Carbine Magazines Four total, 9mm Largo, 6-round blued magazines. Unmarked, blued, original surplus, rating very good plus with some very light scattered surface oxidation. (3A6519-335B) [Richard "Stretch" Kennedy Collection]
1019	Lot of Three Marlin Magazines Three factory 2-round Marlin 50 / 55 / 512 shotgun magazines, 12 ga. Two are very fine to excellent, one is very good with light surface oxidation. Fits Marlin 55, Glenfield 50 and purportedly model 512 as well. Light press checkering at rear. The oxidized mag. may have a replacement follower as it sticks slightly. (3Z6519-335C) [Richard "Stretch" Kennedy Collection]
1020	Rare Remington 788 Magazine This is a Remington factory Model 788 magazine in 44 Rem Mag. Magazine, holds 3 rounds and rates excellent with a tiny oxidation flake on left of body, balance is nearly as-new, right side correctly marked "44 REM/MAGNUM". (3A6519-335D) [Richard "Stretch" Kennedy Collection]

Lot	Title/Description
1021	Savage Magazine Lot A single Savage Model 340/840 .223 Remington 4-round factory magazine. Blued steel, bright follower, as-new, grasping grooves along bottom, "223 Remington Caution" marking on right of body. (3A6519-335G) [Richard "Stretch" Kennedy Collection]
1022	High Standard G380 Magazine A single two-tone magazine for the High Standard G380 pistol. Blued body with bright feed lip area, rating very good plus showing only light surface oxidation and a couple small spots of light pitting at right body and bottom near the floorplate. (3A6519-335R) [Richard "Stretch" Kennedy Collection]
1023	Winchester Rimfire Magazine Lot This lot consists of three magazines for the Winchester Models 52, 56, 57, 69(A), 75 and likely others. One very rare 10-round 22 Short (only) factory Winchester marked on floorplate, rating very good with some finish loss and remnants of light surface oxidation. Floorplate is 22 Short marked and patent dates 1922. One 5-round 22 Short (only) factory Winchester "69" marked on the floorplate rating about very good with finish loss and light oxidation. One 5-round 22 LR mag, is likely aftermarket but rates excellent. (3A6519-335E) [Richard "Stretch" Kennedy Collection]
1024	Winchester Rimfire Magazine Lot This lot consists of three magazines for the Winchester Models 52, 56, 57, 69(A), 75 and likely others. Two 5-round 22 Short (only) factory Winchester "69" marked on the floorplate rating about very good with finish loss and light oxidation. One 5-round 22 LR mag, is likely aftermarket but rates excellent. (3A6519-335F) [Richard "Stretch" Kennedy Collection]
1025	Lot of MAS 45 Magazines Six total, original magazines for MAS45 & KKW Mauser .22 LR rifles. All are parkerized and marked "Mod 45" on the floorplates, overall each is very good. (3Z6519-335S) [Richard "Stretch" Kennedy Collection]
1026	Lot of Remington Magazines 6 total, one 5-round 22LR Remington marked on floorplate for Remington Models 511, 513, 521, overall very good, another nearly identical but Kimber marked, as-new. Two 10-round 22LR Remington magazines, same models, unmarked, possibly factory or possibly aftermarket, both very good plus. One nearly identical but with small cut for mag catch rather than wide groove on the two previous 10-rounders, also unmarked. One plastic 10-rounder for the Remington Nylon 77, 581-S & 541, very fine to excellent. (3A6519-335H) [Richard "Stretch" Kennedy Collection]
1027	Lot of Mossberg Magazines 5 total for the 340 series of rifles. Two are clearly older factory, one with the moveable adapter that allows LR, Long or Short ammunition, the other standard feed lips; these are both very good. The other three are heavy steel and quality made and may or may not be factory, all three are marked "LR-ONLY" on right of body, these rate excellent. Purported to fit a large variety of Mossberg rifles, model nos. 340, 340A, 340B, 340M, 342, 342K, 344, 344K, 346K, 346B, 350, 350K, 351, 352, 352K, and 353, but we cannot guarantee all these models. (3A6519-335J) [Richard "Stretch" Kennedy Collection]
1028	Lot of Rimfire Rifle Magazines Rare 5-round original 22LR magazine for the Mauser Model 201 and Voere-marked model 201 rifles. Rates excellent, bottom of floorplate marked "REP". Two Remington Model 37 Rangemaster magazines, likely 5-round, both very good with a bit of light surface oxidation. Remington Model 591 Rifle 4-round 5mm magazine, used, very good. Winchester single shot adapter for Models 52, 69, 75 etc. used but very good showing light wear and a small file mark on left side top which is unobtrusive. Not rimfire, but Bernardelli VP (Vest Pocket) 8 shot extended 25 ACP magazine, blued steel rates very fine, black plastic extended base adapter very fine to excellent as well. Savage Arms Mark II-style 5-round blued steel magazine with metal follower, excellent overall. 2 wooden extended base adapters for Walther Olympia-style magazines, may or may not be for the Walther pistol, used but very fine to excellent. (3A6519-335K) [Richard "Stretch" Kennedy Collection]
1029	Valmet M78 Magazine This lot includes a single 20-round .308 / 7.62 magazine for the milled receiver guns only. Original factory blued magazine rates very fine to excellent with bright follower. (3A6519-335M) [Richard "Stretch" Kennedy Collection]
1030	Lot of AR-10 magazines Lot of 2 factory Armalite-marked AR-10 magazines. Capacity is 10-round and they feature the contemporary Armalite marking on the baseplate and plastic followers. They rate excellent with some very superficial scuffs about the surfaces, one blued, one parkerized. (3Z6519-335N) [Richard "Stretch" Kennedy Collection]

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
1031	<p>Lot of Webley Magazines</p> <p>Two total for the Webley Automatic pistol in 32 ACP. Both are blued retaining 90-95% original finish with even wear and some scattered light oxidation remnants here and there, showing some light operational wear. They are unmarked and appear factory original. (3Z6519-335P) [Richard "Stretch" Kennedy Collection]</p>
1032	<p>Webley Magazine Lot</p> <p>A single magazine for the Webley Automatic pistol in 380 ACP. An even gray-plum-blue mix of fading original blue with some sparse oxidation remnants and operational wear. There may be some minor pinprick pits present beneath the finish, the floorplate marked "380". (3Z6519-335Q) [Richard "Stretch" Kennedy Collection]</p>
1033	<p>Colt Model 1903 Pocket Hammerless Magazine</p> <p>One original 8-round magazine for the Model 1903 Colt in 32 ACP. The magazine remains in fair condition as mostly toned to pewter and gray-brown patina, the right side and front surface showing patches of heavy oxidation and corrosion. The floorplate is marked "CAL 32 / COLT" and it appears the magazine was a two-tone example, the left side still exhibiting the two-tone appearance. The follower and its spring otherwise seem to be in fine condition. (13Z8351-9C)</p>
1034	<p>SIG P210 Magazine</p> <p>One original unmarked 8-round magazine for the original series heel release P210 pistols. The body retains about 90% original blue showing some high edge wear and silvering from use. The follower remains polished bright and the floorplate is more of a matte blue finish. The spring seems to be serviceable. (13A9100-M39A)</p>
1035	<p>Gatling Gun Magazine</p> <p>This appears to be an original 45-70 gravity feed Gatling Gun magazine measuring about 21" overall, the body retaining about 70% original dark OD green paint that shows some flaking to oxidized brown along with a few small corroded holes or pits along some of the edges, some light dings and dents. The brass fitting and spring catch attachment show visible original soldering, the spring a dark brown patina and the brass a pleasant ocher showing some overall light dings and handling marks. The magazine appears to be unmarked and un-numbered and the follower gets a little hung up here and there. An interesting piece for the U.S. martial collector. (13A10770-23)</p>
1036	<p>Rare Smith & Wesson Model 41-1 22 Short Magazine Lot</p> <p>This lot consists of a single item. Included is a single Smith & Wesson factory marked five-round magazine for the Smith & Wesson Model 41-1 semi-auto pistol or the conversion unit used to convert the Models 41 and 46 to 22 Short. The magazine rates excellent and is still sealed in its original factory packaging. If you are one of the lucky owners of a Model 41-1 or a conversion unit this is an essential accessory. Also see the wonderful Model 41 and 46 22 Short conversion unit elsewhere in this auction. (8A9100-1365B)</p>
1037	<p>Smith & Wesson Model 41 Magazines Lot</p> <p>This lot consists of a pair of items. Included are a pair of Smith & Wesson factory marked ten-round magazines for the Smith & Wesson Model 41 semi-auto pistol chambered in 22 LR. The magazines show use and rate good to very good, displaying operational wear and light stains from oxidation. (8A9100-1365E)</p>
1038	<p>Sig Sauer P938 Magazines</p> <p>Two factory Sig Sauer P938 stainless steel 9mm 6-round magazines in excellent condition. (23Z10911-5A)</p>
1039	<p>Sig Sauer P227 Magazines</p> <p>Two factory Sig Sauer P227 45 ACP 10-round magazines produced by Mec-Gar in Italy. Magazines rate about excellent with one magazine showing a tiny impact mark on the rear of the floor plate and "3" is painted in white enamel on the bottom of the floor plate. (23Z10911-5)</p>
1040	<p>M14/M1A Magazines</p> <p>Four 7.62 NATO magazines for M14 or M1A rifles as follows: One as-new-in-package Springfield Armory Inc. 20-round Parkerized magazine. One excellent condition Springfield Armory Inc. 10-round Parkerized magazine with a few very light handling marks. One HNR 10-round magazine retaining 95% original Parkerized finish with a few light handling marks and spots of operational silvering. One unmarked 10-round magazine retaining 98% original blue with a few light handling marks. (23Z10911-4)</p>
1041	<p>Sig Sauer SSG 3000 Magazine</p> <p>One factory 308 Win 5-round magazine for a Sig Sauer SSG 3000 rifle retaining 98% original Parkerized finish with a touch of light operational silvering. (23Z10911-5B1)</p>
1042	<p>Sig Sauer SSG 3000 Magazine</p> <p>One Sig Sauer SSG 3000 308 Win 5-round magazine retaining 98% original Parkerized finish with a touch of light operational silvering. (23Z10911-5B2)</p>

Lot	Title/Description
1043	<p>Ruger Mini-Thirty Magazines</p> <p>Five 7.62x39mm magazines for Ruger Mini-Thirty rifles as follows: Three Ruger factory 5-round magazines in excellent condition retaining 99% original blue with a light handling mark or two. One Ruger factory 20-round magazine in excellent condition retaining 99% original blue. One unmarked aftermarket 30-round magazine retaining 95% original blue with an area of operational wear toning to gray on the left and right sides, a few scattered light handling marks and a couple small areas of adhesive residue. (23Z10911-3)</p>
1044	<p>Beretta 92 Magazines</p> <p>Three total. These are factory blued finish, 15 round, 9mm magazines in excellent condition. (10Z10813-119A)</p>
1045	<p>Saiga 308 Magazine</p> <p>(1) unmarked 20-round polymer constructed magazine likely for a Saiga 308 rifle with overall light handling marks, robust spring, and remains in excellent condition. (1X10Z10723-5H)</p>
1046	<p>AR-15 Magazines</p> <p>Four Colt marked 20-round 5.56 magazines. All are in about very good condition with minor handling marks and two having minor oxidation staining. (27Z10887-6)</p>
1047	<p>25 ACP Pistol Magazine</p> <p>This blued finish 6-round magazine retains nearly all its blue finish and is marked "Mexico" along the curved front of the floorplate. This is for a small frame pistol and is similar in design to that of a Beretta or Titan pistol magazine with oversized flat floorplate and six viewing holes along each side with no catch and is likely for a bottom release style pistol. (1X10Z10723-5P)</p>
1048	<p>Swedish M/42 Scope by AGA</p> <p>serial #882. The blued metal surfaces of this 3x65 scope retain about 90% original blue showing some scattered high edge wear, light scratches and small tool marks, more noticeable along the ocular bell. The brass adjustment hardware retains strong markings showing Swedish crown proof mark and the brass retains some of its blackened finish with areas worn to a mottled ocher and a few lighter areas with remnants of verdigris. The focus and elevation rings seem to function normally and the optics with German-style reticle are fair showing mild discoloration and moderate occlusions, no doubt a professional cleaning or refurbishment would be in order. A good example of these desirable scopes. (13A6519-645A) [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200</p>
1049	<p>Tasco Red Dot Sight Lot</p> <p>This lot consists of one item. It features a Tasco ProPoint 1X30 red dot sight. The sight retains about 99% original anodized finish on the aluminum tube with a few light handling marks. The unit functions, has clear optics, variable intensity red dot (unknown M.O.A.), and Weaver style mount. (8A10856-15A)</p>
1050	<p>Leupold Scope</p> <p>One Leupold M8 2x20mm extended eye relief scope with duplex reticle and bright, about excellent optics retaining 99% original silver anodized finish with a light handling mark or two. (23A9100-M21A) [Richard "Stretch" Kennedy Collection]</p>
1051	<p>Leupold Scope</p> <p>One Leupold M8 2x20mm extended eye relief scope with duplex reticle and bright about excellent optics retaining about 98% original gloss black anodized finish with light evidence of previous mounting. (23A9100-475A) [Richard "Stretch" Kennedy Collection]</p>
1052	<p>BSA Scope</p> <p>This TMD624x44-30SP rifle scope measures 15 1/4" overall with matte black finish, Mil-Dot reticle and has crisp, clear optics. It features 1/4 MOA turrets and parallax settings of 10 yards to infinity. This scope appears as-new-in-box and comes with factory box, manual, high rise rings, 3" sunshade, bikini-style lens covers and related papers. (10Z10887-1) (75/150) Est. 75 - 150</p>
1053	<p>Lyman Telescopic Sight</p> <p>serial #20336, this 15X Super Target Spot sight measures 24 3/8" overall with calibrated head, fine crosshair reticle and crisp clear optics. The scope retains 90% of its original evenly thinning blue with scattered oxidation throughout. The tube shows wear lines from the target mounts and the adjusters are very stiff. Included is a rubber eyecup that is dried and somewhat crazed, target mounts with blocks, stop, recoil spring and factory metal carry case. (10A10685-2) (200/400) Est. 200 - 400</p>
1054	<p>Leupold Red Dot</p> <p>This DP-Pro features a 6 MOA red dot with motion sensor technology and is water and fog proof with easy access battery compartment that allows for change without having to re-zero. The sight comes with a rubber cover and will need a CR2032 battery. This sight would make a nice addition to any sporting arm. (10A10813-102A) (150/250) Est. 150 - 250</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
1055	Konus Red Dot This Sight Pro 1-2x30 optic remains in its original factory box and comes with mounting hardware, manual, wipe, and Allen wrench. There are a few very minor handling marks and this sight remains in solid working condition. (10Z9850-2C) (50/100) Est. 50 - 100
1056	Crimson Trace LC9 Laser This near-as-new laser is for the Ruger LC9 pistol. It is intended to mount to the triggerguard and lower rail and is complete with all hardware and battery. It includes a pocket holster, factory box, related papers and manual. (10Z9850-2D) (75/150) Est. 75 - 150
1057	Laser Max CF-LC9 Centerfire Laser This lot includes an as-new sealed in factory packaging frame mounted laser for the Ruger LC9 pistol. This sight was designed for ease-of-use operation and installation and is like new. (10Z9850-2E) (50/100) Est. 50 - 100
1058	Laser Max CF-LC9 Centerfire Laser This lot includes an as-new sealed in factory packaging frame mounted laser for the Ruger LC9 pistol. This sight was designed for ease-of-use operation and installation and is like new. (10Z9850-2F) (50/100) Est. 50 - 100
1059	Nc Star Armored Tactical Scope This 3-9x42 scope with Mil-Dot reticle and crisp clear optics measures 8" overall and comes with spring locking rail mount. It has an integrated laser that will require a new Cr2032 battery to determine its individual functionality and all other aspects of this optic work flawlessly. Optic remains in very good condition. (10Z9850-2G) (50/75) Est. 50 - 75
1060	Redfield Fixed Power Scope This 2 3/4x scope with crosshair reticle and crisp clean optics measures 10 1/4" overall and is fitted with a set of 1" rings on a Redfield no.88 one-piece base. This optic remains in near excellent condition and should prove beneficial on your favorite thick cover gun. (10Z9850-2G1) (75/150) Est. 75 - 150
1061	Leupold M8 4x Scope 12" in length, this 4x fixed power scope features clear excellent optics and crosshair and post reticle. The metal surfaces retain about 96% gloss black finish with a few light handling marks and faint ring marks from having been mounted. (27Z10803-60A)
1062	Sig Sauer STS-081 Red Dot 2 3/4" in length, this mini red dot sight features eleven brightness settings which function fully and clear excellent optics. The metal surfaces retain about 98% matte black finish with a few light scuff marks. Attached to the bottom is a Picatinny rail mount. (27Z10813-24A)
1063	Trijicon TA31RCO 4x ACOG Serial #113569, this ACOG features clear excellent optics and Trijicon's BDC reticle with illuminated chevron. Being used by the U.S. military since the 1980s, Trijicon ACOGs have held up their reputation as being an optic that is more than capable of handling any situation in any environment. The metal surfaces retain about 95-97% matte black finish with overall light handling marks, light impact marks, and minor slot damage to the mounting thumbscrews; there are scattered cracks affecting the fiber optic rod possibly from being dropped or impacted but they do not appear to affect the usability of the fiber optic. The right side of the optic is marked with the biblical reference "JN8:12" which caused controversy in 2010; Trijicon has since removed the verse from optics destined for the military market, however, the practice continues for the civilian market. Included with the optic is a Trijicon branded cloth optic cover. (27A10858-5A)
1064	Leupold M8 6x Scope 11 1/2" in length, this 6x fixed power scope features clear excellent optics and duplex reticle. The metal surfaces retain about 96% gloss black finish with loss due to scattered light dings, handling marks, and ring marks from having been mounted. (27Z10803-59A)
1065	Leapers Golden Image 3-9x28 Scope 8" in length, this scope features slightly cloudy but otherwise clear optics with a duplex reticle. The metal surfaces have slight abrasions and impact marks, and the scope comes with a set of flip-cap scope covers with clear plexiglass. (26Z9850-2H)
1066	Rock River Arms Rear Sight This stand alone rear sight (Item #AR3305ASY) is designed to be attached via Picatinny rail and features an A2 style aperture which is fully windage and elevation adjustable. The metal surfaces rate about excellent with only the slightest handling marks, easily missed upon quick inspection. (1X27Z10813-4B)

Lot	Title/Description
1067	Simmons 4x32 22 Mag Scope 12 1/4" in length, this scope features clear excellent optics with a fixed power duplex reticle. The gloss black finish remains in very good condition with only a few light handling marks, and mounted are two scope rings designed to fit a dovetail style scope base. Included is the original box and instruction manual. (1X27Z10657-6A)
1068	Leapers Golden Image 3-9x40 Scope 12" in length, this scope features clear excellent optics with a duplex reticle. This scope features a "rubber armored" sleeve which covers the metal surfaces of the scope and remains in very good condition with a few light handling marks. Included are a set of scope covers and the original box. (1X27Z10657-6B)
1069	Winchester 94 Barrel This is a brand-new, unused Winchester Model 94 carbine barrel in 32 Win Spl., no doubt pre-'64. 20" barrel with about all the original blue. The bore rates otherwise excellent with perhaps a speckle of oxidation here or there from poor storage. Has blank dovetail rear, serrated face front ramp, and has both standard and mail order proofs. The underside shows caliber marking and "52" and the barrel does not appear to have been used. (3Z6519-302H) [Richard "Stretch" Kennedy Collection]
1070	Winchester 94 Barrel This is a very likely slightly used Winchester Model 94 carbine barrel in 32 Win Spl., no doubt pre-'64. 20" barrel with about 99% original blue showing a light handling mark or two. The bore rates bright excellent. Has blank dovetail rear, serrated face front ramp, and no proofs. The underside shows caliber marking and "51" and the barrel does not appear to have been used, but is likely a take-off as there are no mail order proofs. (3Z6519-302J) [Richard "Stretch" Kennedy Collection]
1071	Winchester 94 Barrel This is a brand-new, unused Winchester Model 94 carbine barrel in 30-30 Win, and is likely post-'64. 20" barrel with all the original blue and a bright excellent bore. Has blank dovetail rear, grooved face front ramp, and has both standard and mail order proofs. The underside is unmarked and has a mere slot milled where the rear band screw would fit, rather than the earlier "half-circle" cut, meaning a later barrel. (3Z6519-302K) [Richard "Stretch" Kennedy Collection]
1072	Winchester 94 Barrel This is a slightly used Winchester Model 94 carbine barrel in .30-30 Win, and is likely post-'64. 20" barrel with about 98% original blue showing light handling marks and breech face wear. The bore rates bright excellent and the chamber has a strange "halo" mid-length which appears as a bulge, but it cannot be felt with a tight fitting patch. Has blank dovetail rear, grooved face front ramp, and no proofs. The underside has a mere slot milled where the rear band screw would fit, rather than the earlier "half-circle" cut, meaning a later barrel. Likely a take-off as there is a factory proof and drag mark from the rear sight elevator. (3Z6519-302E) [Richard "Stretch" Kennedy Collection]
1073	Winchester 94 Barrel This appears to be a brand-new, unused Winchester Model 94 rifle barrel in 32 Win Spl., no doubt pre-'64. 26" barrel with all the original blue with a couple tiny handling scratches and a bright excellent bore. Has vacant front and rear dovetails, underside rotary front dovetail, rear noscap tenon dovetail and no proofs. The underside shows caliber marking and "53" and the barrel does not appear to have been used nor installed on a rifle. (3Z6519-302M) [Richard "Stretch" Kennedy Collection]
1074	Winchester Model 92 Barrel A single take-off 20" SRC barrel in 44 WCF with a very good to otherwise near fine bore which shows some scattered light surface oxidation, a few light pits, and a very light ring about 2" from the muzzle. The exposed surfaces are an even mix of pewter gray patina and light brown oxidation speckling, the area beneath the forend with strong blue. The barrel has carbine style block front base for a blade style sight, and open dovetail rear. The underside shows the half-circle cut for the rear band and a small groove for a button magazine tube cap about 2 1/2" ahead of the band cut. Is Winchester proofed, caliber marked on its underside and dates "23". A correct configuration for a Saddlering or perhaps Eastern Carbine. (3A6519-302Q) [Richard "Stretch" Kennedy Collection]
1075	Winchester Model 70 Barrel This is a 26" take-off stainless steel pre-'64 barrel from a 220 Swift standard grade rifle. The barrel retains about 97% factory blue, the loss due to even fading and perhaps a superficial handling mark here or there. The bore rates otherwise bright excellent with a tiny bit of frosting nearer the throat. Has stippled face front ramp and blank dovetail in rear boss, the underside caliber marked and "49" dated with the "ST" designation and Winchester proof at right breech area. The forend screw stud is in place on the underside of the rear sight boss. (3A6519-302C) [Richard "Stretch" Kennedy Collection]

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
1076	<p>Winchester Model 70 Barrel</p> <p>This is a 24" take-off pre-'64 barrel from a 243 Win standard grade rifle. The barrel retains about 98% original factory blue, with a superficial handling mark here or there. There are a number of tool marks on the underside of the barrel, likely from a tool slipping during removal, they are not seen when the rifle is assembled. The bore rates bright excellent. Has grooved face front ramp and blank dovetail in rear boss, the underside shows no markings but the Winchester proof is at top breech area with a mail order proof near the barrel marking. (3A6519-302D) [Richard "Stretch" Kennedy Collection]</p>
1077	<p>Sako Pre-Vixen Barrel</p> <p>This appears to be a pre-Vixen take-off factory barrel in .222 Rem. Barrel is medium weight and "Cal 222" and "Bofors Steel" marked with a bright otherwise excellent bore which shows a couple scattered freckles here or there. The barrel retains about 92-95% original blue with a rub mark to pewter 2/3-way down its length and scattered light handling marks. The original front sight is in place in the front ramp and the barrel is stamped "21" at the underside at breech. (3Z6519-302F) [Richard "Stretch" Kennedy Collection]</p>
1078	<p>Remington Rifle Barrel Lot</p> <p>2 Total. Remington 700 barrel in 300 Weatherby Mag. Factory 24" barrel with 98% later custom satin blue, quality finish and a bright excellent bore. Has two small drilled indentations in the thread shank (one with a set screw) where barrel was turned into a custom takedown; this does not affect its ability to be re-installed on a Remington 700 action. Factory roll-marking is on left side of barrel, barrel is clean, not drilled for sights. Custom 18 3/4" sporter contour barrel for Remington 700-style threads, perhaps for a Model 7 as the taper at the junction of barrel and action is very quick, unlike the long chamber shank of the 700. It is .308 Win stamped, the underside 1-94 dated and with three initials "R.A.N." with an ampersand stamp (perhaps Douglas?). The bore would be otherwise bright excellent were it not for a section of pitting in its second half, but the rifling is crisp and likely still will shoot fine. It retains 98% quality blue. (3Z6519-302G) [Richard "Stretch" Kennedy Collection]</p>
1079	<p>Remington Arms 1903A-3 Barrel</p> <p>This is a Remington Arms produced, 7-43 dated 4-groove barrel that appears new, packaged in its original cosmoline and paper wrapping. The bore appears as-new and the barrel, as-mentioned, remains wrapped with only the breech and muzzle area exposed. The RA/(flaming bomb)/7-43" marking is as-new. (3Z6519-302B) [Richard "Stretch" Kennedy Collection]</p>
1080	<p>Springfield Armory 1903 National Match Barrel</p> <p>This is a stripped 24", 2-38 dated Springfield Armory star-gauged National Match barrel with a bright about excellent bore, showing a bit of softening near the throat. The barrel retains about 98% original parkerizing with only light fading, with two neatly drilled and tapped holes 7" from the breech, for a steel target block which is not present. Correctly marked at the rear of the front sight base with "SA/(ordnance bomb)/2-38" and star gauge stamped at 6 o'clock at the muzzle. The star gauge number is "E 3547". A fine National Match barrel which no doubt still shoots wonderfully. (3B6519-302Q)</p>
1081	<p>Winchester Model 70 Barrel</p> <p>This is a 24" take-off pre-'64 barrel from a 30-06 Sprg. standard grade rifle. The barrel retains about 95% original factory blue above the woodline, with a superficial handling mark here or there and some sparse speckled remnants of light oxidation. The bore rates bright very fine with a couple sparsely scattered pinprick pits. Has stippled face front ramp and blank dovetail in rear boss showing some edge wear, the underside shows "1906" and "50" markings with the Winchester proof at left breech area. (3A6519-302N) [Richard "Stretch" Kennedy Collection]</p>
1082	<p>Winchester Model 70 Barrel</p> <p>This is a slightly shortened 22" take-off pre-'64 barrel from a .300 H&H Mag standard grade rifle. The barrel has a bright excellent bore and retains about 92% original factory blue with a superficial handling mark here and there, the rear sight boss turned down about half its diameter, that area showing cold-applied blue. The barrel has factory markings with Winchester proof to their rear and underside shows only "R" marking. The crown could be a bit prettier, but this would be a great start to a custom Model 70 carbine in this versatile caliber. (3A6519-302P) [Richard "Stretch" Kennedy Collection]</p>

Lot	Title/Description
1083	<p>Winchester Model 70 Barrel</p> <p>This is a slightly shortened 22" take-off pre-'64 barrel from a .257 Roberts standard grade rifle. The barrel has a bright otherwise excellent bore showing one or two fine pinprick pits. It is a pewter and faded deep gray-blue original blue with some scattered remnants of light oxidation and a spot of light pinprick pitting halfway down the right side; an odd dual medial worn area to the rear of the sight boss and some oxidation on the face of the crown. The rear sight dovetail remains intact, the front sight ramp has been replaced with perhaps a Williams streamlined style ramp which is no doubt soldered in place. The barrel has factory markings with Winchester proof at left of breech and underside shows caliber with "37" date marking. (3A6519-302P) [Richard "Stretch" Kennedy Collection]</p>
1084	<p>Ruger No.1 Barrel</p> <p>This is a 22" take-off barrel from a Ruger No. 1 barrel in 45-70 Govt. The bore rates excellent and the barrel retains about 95% original blue with a few freckles of very light surface oxidation here and there and a few light tool marks. It has the "warning" barrel address and features brass bead front sight in factory base, vacant rear dovetail, and four drilled and tapped holes behind dovetail and over chamber. There is a bit of oxidation in the chamber and the chamber rim cut appears a little bit rough, the seat on the barrel shank with some tool marks. (3Z6519-302R)</p>
1085	<p>Winchester Model 12 Parts</p> <p>This lot consists of four barrels and two magazine tubes. The barrels are each stripped for the most part with their draw-collars intact. All 30" plain barrels with primarily bright excellent bores, showing some wad residue, choked full, one with a mail order proof and about 95% original blue, the others with about 90% original blue or so, with some light scattered oxidation, handling marks and wear to pewter, one being refinished. Two stripped magazine tubes which are primarily gray, one showing some prominent grind marks about 2" from the end, each has a forend tube with action bar attached, one has a nut, one does not. (3Z10459-5S,7S)</p>
1086	<p>Winchester Model 12 Parts</p> <p>This lot consists of four barrels and two magazine tubes. The barrels are each stripped for the most part with their draw-collars intact. Three 30" plain barrels with primarily bright excellent bores, showing some wad residue, choked full, with about 90% original blue or so, with some light scattered oxidation, handling marks and wear to pewter, one with a bit more oxidation. One 26" overall length with deluxe cuts polychoke installed. Two magazine tubes which are primarily gray, one refinished to satin blue, one has a forend tube with action bar attached only, one is an assembly which has a nut only along with the magazine band hanger. (3Z10459-5T,7T)</p>
1087	<p>Winchester Model 12 Parts</p> <p>This lot consists of four barrels and two magazine tubes. The barrels are each stripped for the most part with their draw-collars intact. All 30" plain barrels with primarily bright excellent bores, showing some wad residue, choked full, with about 90% original blue or so, with some light scattered oxidation, handling marks and wear to pewter; one is primarily gray and has a mail order proof. One nickel steel barrel is refinished and is a plum patina with the markings very soft and only an about very good bore, showing pitting. Two stripped magazine tubes which are very good, each has a forend tube with action bar attached and nut. (3Z10459-5U,7U)</p>
1088	<p>Winchester Model 12 Parts</p> <p>This lot consists of four barrels and two magazine tubes. The barrels are each stripped for the most part with their draw-collars intact. All 30" plain barrels with primarily bright excellent bores, showing some wad residue, choked full, two with about 92% original blue, one with about 70% original blue or so, one refinished, all with some light scattered oxidation, handling marks and wear to pewter. Two stripped magazine tubes which are very good, each has a forend tube with action bar attached and nut, one has a spot of moderate pitting. (3Z10459-5V,7V)</p>
1089	<p>Winchester Model 12 Parts</p> <p>This lot consists of four barrels and three magazine tubes. The barrels are each stripped for the most part with their draw-collars intact. Three 30" plain barrels with primarily bright excellent bores, showing some wad residue, choked full, one with about 92% original blue, one with about 30% original blue or so, one refinished, all with some light scattered oxidation, handling marks and wear to pewter. One 28 1/4" overall length with deluxe cuts polychoke, with 95% original blue. Three stripped magazine tubes, two are very good, each has a forend tube with action bar attached and no nuts, one with minor and moderate pitting. (3Z10459-5X,7X)</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
1090	<p>Winchester Model 12 Parts</p> <p>This lot consists of four barrels and two magazine tubes. The barrels are each stripped for the most part, three with their draw-collars intact, one is missing. Three 30" plain barrels with primarily bright excellent bores, showing some wad residue, choked full, one with about 95% original blue, one with about 80% original blue or so, one pewter, all with some light scattered oxidation, handling marks and wear to pewter. One 21" overall length with 92% original blue. Two stripped magazine tubes rating very good, each has a forend tube with action bar attached with nuts, one action bar tube with no nut. (3Z10459-5Y,7Y)</p>
1091	<p>Winchester Model 12 Parts</p> <p>This lot consists of three barrels and three magazine tubes. The barrels are each stripped for the most part with their draw-collars intact. Two 30" plain barrels with primarily bright excellent bores, showing some wad residue, choked full, one with about 92% original blue, one with about 90% later blue, all with some light scattered oxidation, handling marks and wear to pewter. One 28" choked Mod. with 95% original blue. Two stripped magazine tubes, each has a forend tube with action bar attached and no nuts, one complete magazine tube assembly, but missing the forend nut. (3Z10459-5Z,7Z)</p>
1092	<p>Winchester Model 12 Parts</p> <p>This lot consists of a mostly stripped receiver serial #1180507. It is a pewter patina with light handling marks. There is a bolt assembly and ejector present, no other parts are within. Also included is a hammer, shell cut-off, spare ejector, and two stripped bolts, both with pitting, one more moderate. (3Z10454;9-162,3Z) [FIREARM]</p>
1093	<p>Winchester Model 12 Barrels</p> <p>This lot consists of 6 completely stripped Model 12 barrels. Four are 30" plain choked full, one of those is completely unmarked. There is a 23 1/4" plain barrel, unchoked, marked Imp Cyl, with a bulge 3" from the muzzle. One solid rib 18 1/4" barrel showing overall oxidation, unchoked, with a bright bore. Two barrels are nickel steel, one bright polished, the other matte blued. The two remaining barrels show 95% original blue. (3Z10459-7W)</p>
1094	<p>Winchester Model 12 Bolts</p> <p>Two total. Complete assemblies, showing light operational wear, one was polished bright, both with remnants of light oxidation staining. (3Z10459-6W)</p>
1095	<p>Winchester Model 12 Bolts</p> <p>Two total. Complete assemblies, showing light operational wear, one neatly jewelled, both with remnants of light oxidation staining. (3Z10459-6X)</p>
1096	<p>Winchester Model 12 Bolts</p> <p>Two total. Complete assemblies, showing light operational wear, both neatly jewelled, one strong, one with only trace jewellery; both with remnants of light oxidation staining. One has a broken breech bolt retaining lever. (3Z10459-6Y)</p>
1097	<p>Zastava M92 Parts Kit</p> <p>serial #70621, 7.62x39mm, 10" barrel with a bright excellent bore. The metal surfaces of this all-matching parts kit retain about 95-97% original Parkerized finish with a few scattered spots of light oxidation and some minor operational silvering and the bolt and bolt carrier are bright. The smooth European hardwood handguards and ribbed black synthetic pistolgrip rate excellent and the underfolding stock locks up securely in both positions. The barrel trunnion is dated 2003 and all the correct parts are serialized to the trunnion. The receiver has been demilled with the underfolding stock and folding mechanism, triggerguard and magazine release intact on the included rear portion and the original barrel, trunnion, and rear sight base with hinged dustcover are intact on the front portion of the receiver. The lower handguard retainer and gas block/front sight are installed on the barrel, a booster is mounted to the 26mm threaded muzzle, the sights are intact and a bolt hold-open safety lever and steel 30-round magazine are included. A trigger and hammer and trigger pins have been welded to the rear receiver remnant, an original fire control group missing a trigger and hammer/trigger pin and potentially other small parts is included along with a correct M92 sling. (23A10837-123) {NON-GUN} [Howard Bearse Collection]</p>
1098	<p>Custom Diemaco/Colt Complete Upper</p> <p>5.56 NATO, 11 1/2" chrome lined Colt barrel with a bright excellent bore. The metal surfaces of the Diemaco upper receiver and BCM free-float keymod handguard retain about 95% anodized finish with loss due to overall light handling marks, high edge wear, and operational wear. The Colt Commando profile barrel rates excellent overall and features a low-profile gas block, and A2 style flash hider. About 3/4" forward of the gas block is a recess in the barrel possibly from having originally had an A2 style gas block installed. Also included is a complete Colt BCG, PRI charging handle, BCM foregrip, and attached to the flat-top receiver and handguard are a set of Magpul MBUS iron sights. (27A10858-5)</p>

Lot	Title/Description
1099	<p>Smith & Wesson Complete Slide</p> <p>This lot includes a complete slide assembly for a Model 39 or 59 series pistol. This first generation slide retains 98% of its original blue finish with scattered superficial tiny scratches. It comes with a complete recoil assembly and barrel with a bright excellent bore. The slide has a left side mounted safety with yellow insert ramp front sight and windage only adjustable rear sight with white line blade insert. It also has the 39 2nd style ejector and remains in excellent condition. (1X10Z10803-19A)</p>
1100	<p>Nice Old European Crossbow</p> <p>Unmarked crossbow that appears as though it was made by a skilled gun maker. The bow features a 26" long barrel with an about 1/2" bore, rather than an arrow groove and is designed for spherical "bullets" or stones. The iron barrel is octagon at the rear with a fixed open sight, ahead of which is a turned medial ring. At the point where the barrel turns round another medial is present, there is a simple bead style front sight and the entire tube is brass lined. A 15" slit is cut in parallel sides of the barrel as provision for the driving string. The European walnut stock is unquestionably French in origin showing the graceful rearward curving pistolgrip with carved, flared swell behind it so often encountered on 18th century French flintlocks. The right side of the butt shows a nice, scant cheek rest with curved swirl toward the rear. The triggerguard is of iron, long tanged and has a minor decorative flare at its front; there is a nice iron buttplate as well. The wrist of the stock is coarsely diamond checkered and well executed, there is a maple and iron hand rest under the forearm area of the stock. The bow itself is of iron and has a newer wire rope "string" in place. There are two hallmarks on the barrel's right side ahead of the string slot but they are not legible. Metal is overall dark plum brown with minor pitting, the wood shows a very old cleaning. Very light, graceful and comfortable. (3A6519-289D)[Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200</p>
1101	<p>1911 Barrel and Stock Attachment Lot</p> <p>This includes two items that would be used with an attachable buttstock for 1911-style pistols. 16 1/8" barrel, 45 ACP, marked on the top of chamber "Colt 45 Auto" with a bright excellent bore. Barrel appears perhaps very lightly used with some wear or handling marks in the phosphate finish. The barrel is stripped with no link or pin. The second item is an arched grooved mainspring housing which is neatly milled for the attachment of a shoulder stock (not included). It is parkerized as well and rates very fine with some scratches. The hammer spring, both plungers and the retaining pin are included. (3A6519-289F) [Richard "Stretch" Kennedy Collection]</p>
1102	<p>Savage Model 99 Shotgun Barrel</p> <p>This is a .410 bore shotgun barrel for the take-down Savage Model 99 rifles. 24" plain barrel choked full with a bright excellent bore. The barrel is "Savage Arms" marked and retains about 95-97% original blue, the loss due primarily to even fading with a minor handling mark here or there. Has a simple bead front sight and the screw tightening collar at mid-barrel; the threads are not "interrupted" style. (3A6519-302) [Richard "Stretch" Kennedy Collection]</p>
1103	<p>Savage Model 99 Shotgun Barrel</p> <p>This is a .410 bore shotgun barrel for the take-down Savage Model 99 rifles. 22" plain barrel choked modified with a bright excellent bore. The barrel is not marked in any way and retains about 98% plus likely later blue, showing a couple of freckles of loss ahead of the collar. Has a simple tall bead front sight and the screw tightening collar at mid-barrel; the threads are not "interrupted" style. (3A6519-302A) [Richard "Stretch" Kennedy Collection]</p>
1104	<p>Winchester Model 12 Barrel Assembly</p> <p>This is a complete barrel assembly for a Winchester Model 12 in 12 ga. This unit is serial numbered 1313579. 26" ventilated rib barrel to the end of the Cutts compensator, currently with an aluminum spreader choke installed, and a bright about excellent bore. Metal surfaces retain about 95% original blue, the loss due to even fading and some light handling marks, it is choke-marked "WS-1". The checkered walnut extended forend rates very good to fine with light handling marks. An excellent accessory barrel for your model 12 Skeet. (3A6519-309G) [Richard "Stretch" Kennedy Collection]</p>
1105	<p>Winchester Model 12 Barrel Assembly</p> <p>This is a complete barrel assembly for a Winchester Model 12 in 12 ga. This unit is serial numbered 1049566. 30" plain barrel choked a light full with a bright about excellent bore. Metal surfaces retain about 90-92% fading original blue, the loss due to even fading, light handling marks and light surface oxidation. The grooved walnut forend rates very good with flaking finish. A usable accessory barrel for your model 12. (3A10454-63)</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
1106	Winchester Model 1912 Barrel Assembly This is a complete barrel assembly for a Winchester Model 12 in 12 ga. This unit is serial numbered 417184. 30" plain nickel steel barrel choked a light full with a bright about excellent bore which shows a wrinkle or raised dent about midway down its length. Metal surfaces retain about 85% fading later blue, the barrel toning to plum. The smooth finger groove walnut extended forend rates very good with flaking finish and handling marks. A usable accessory barrel for your model 12. (3A10454-36)
1107	Winchester Model 12 Barrel Assembly This is a complete barrel assembly for a Winchester Model 12 in 12 ga. This unit is serial numbered 1186968. 30" plain barrel choked a light full with a bright about excellent bore. Metal surfaces retain about 85% fading original blue, the loss due to even fading and light operational wear. The smooth walnut extended forend rates very fine. A very good accessory barrel for your model 12. (3A10454-97A)
1108	Ithaca Model 37 Barrel 20 ga., 26" plain barrel choked improved cylinder with a bright very fine bore with a fleck or two of light oxidation. The barrel retains about 95% original blue showing light fading and scattered splotchy loos in the area to the rear of the barrel hanger; also with some sparsely scattered light oxidation here or there. Has Ithaca Ray-bar front bead. (3Z6519-309B) [Richard "Stretch" Kennedy Collection]
1109	Remington Model 1100 Barrel 12ga., 30" ventilated rib barrel choked full with a bright excellent bore. Metal surfaces of this non-magnum barrel retain about 97% original blue, loss due to even fading and perhaps the oddly scattered handling mark here or there. Equipped with Bradley front and silver mid-rib beads. (3Z9748-2)
1110	Winchester Model 1300 Barrel 12 ga., 28" ventilated rib Winchoke barrel with a bright excellent bore. Metal surfaces retain about 98% original blue with light fading and a few light handling marks and small ding on edge of rib. The included choke tube is modified. (3Z6519-309D) [Richard "Stretch" Kennedy Collection]
1111	Franchi 48AL Barrel 20 ga., 26" ventilated rib barrel choked about cylinder (four star choke-marked on its underside) with a bright excellent chrome-lined bore which shows some stubborn wad residue at forcing cone. Barrel retains about 95% original blue with some light fading, operational wear and handling marks, the chrome breech remains bright. Silver front bead, barrel is numbered "441166" on its underside. (3Z6519-309E) [Richard "Stretch" Kennedy Collection]
1112	Mossberg 500 Barrel 12 ga., 28" overall length ventilated rib c-lect-choke barrel with a bright fine bore which shows a bit of light oxidation here or there. The barrel retains about 97% original blue with fading, a few handling marks and some scattered sparse oxidation. The choke works as-designed. (3Z6519-309) [Richard "Stretch" Kennedy Collection]
1113	Browning Auto-5 Barrel Accessory Lot This lot consists of a barrel and original press-board box. 12 ga., 29 1/2" matted top barrel choked about full with a bright excellent bore. The metal surfaces of this standard model barrel retain about 97% original blue with light even fading and a bright breech extension. There are numerous numbers and proofs scattered about the surfaces. The blue-gray tone press board box is labeled for a 12 ga. grade I lightweight gun with 30" plain barrel choked full, serial no. 8P26019. The box itself rates very fine to excellent with light staining here and there from the years, but a great end label and surcharge on lid mentioning gun is packed in VPI. On the interior we find the original intact warranty card, Browning owner's manual with "St Louis 3, MO" address, manila oversleeve for a manual admonishing "Dealer-Do Not Remove From Gun- Very Important" in red ink., wooden 3-shot migratory waterfowl plug in its original manila envelope and some carboard inserts. A nice accessory lot for the dedicated Browning collector. (3A9748-2)
1114	Thompson Center Arms TCR 83/87 Shotgun Barrel 12 ga. 22" smoothbore "rifled slug" barrel with a bright excellent bore. Barrel retains about 98% original blue with the grooved walnut forend rating near excellent with some light handling marks. Equipped with rifle sights and factory d & t for scope base. (3A6519-482A) [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200
1115	Thompson Center Arms TCR 83/87 Rifle Barrel 32-40 Win cal 26" barrel with an excellent bore. Barrel retains 98% original blue and factory checkered walnut forend rates about excellent with some light handling marks. Includes a Weaver base and 1" rings. (3A6519-482) [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200
1116	Ruger 10-22 Barrel This is a take-off Ruger 10-22 barrel, 18 1/2" long with a bright excellent bore and about 98% original blue. The front and rear sights are present and the barrel has the "warning" roll marking. (3Z6519-302S)

Lot	Title/Description
1117	Lot of H&R Topper Barrels Two total. 20 ga. (3"), 26" plain barrel choked modified with an otherwise bright bore which shows what appears to be a light bulge in the area ahead of the chamber. Retains 97% original blue with some scattered light oxidation, marked "Topper Jr. Model 490". .410 bore, 25" plain barrel choked full with a bright excellent bore. Metal surfaces retain 95% original blue with scattered surface oxidation, marked "Topper Model 88". (3Z6519-309A,F) [Richard "Stretch" Kennedy Collection]
1118	Remington Model 11 Barrel 16 ga, 28" plain barrel choked improved cylinder with a very fine bore. The barrel is an overall faded gray-blue with loss to pewter and even fading, showing some light oxidation here and there, with a few light pinprick pits; the barrel extension shows some staining and light pitting. Numbered on the underside of hanger "201729". (3Z6519-309C) [Richard "Stretch" Kennedy Collection]
1119	Lot of Reamers This lot consists of gunsmithing tooling, four total. The first is a Clymer 20 ga. (3") finishing reamer rating excellent with a minor oxidation flake or two. The next reamer is from Richland Arms and appears to be a piloted long forcing cone reamer in 12 ga. It is used but rates very fine to near excellent. The next is an "S.T. Co." KMO341227-marked left-hand spiral flute hand reamer of about .535" diameter, so-marked "535" on the shank. Rates very good with minor oxidation staining. The last item is a Mittermeier triple ball choke measuring gauge in its original shipping tube. The gauge will measure the chokes of 20, 16 and 12 ga. guns, the scale on the body showing full to cylinder markings for each of the gauges, and rates excellent with some light wear. (3A6519-635B) [Richard "Stretch" Kennedy Collection]
1120	Lot of Obsolete Brass This lot consists of empty 50-70, likely carbine, casings and brass 20 ga. shotshell casings. The brass is "DGW" marked and primed in measures one of 3/4" from the mouth to the base, there are 18 pieces total, 10 are empty and primed, 8 have projectiles but are sold as component use only and should be pulled by the purchaser. 25 Rem-UMC "Best" marked brass 20 ga. shot shell casings, all are primed, the domed primer is not sitting quite flush. They are mostly bright and untarnished, a couple showing some minor freckles perhaps. Most are loaded but these are sold as components only and should be emptied/pulled by the purchaser. (3Z10723-14E)
1121	Antique Walnut European Pistol Case This is an interesting burl veneer case for an unusual, no doubt European, revolver of some sort. The case proper is just under 10" x 7" and 2 1/8" deep, covered in walnut burl veneer. The lid shows a drying crack and flaked loss along the length of the left side for about 1" to 1 1/4". The interior is blue baize lined and appears as though it will accommodate a smaller pocket-sized version or a revolver with some manner of apparatus at front of cylinder and frame, very Galand or Gasser-like, but in a smaller pocket-size. We surmise the barrel would be about 4" in length, diagonally the gun would measure about 10 1/2". There is a small lidded compartment and a few other smaller accessory compartments, with a 24-space cartridge "block" for about .45 or .48 cal cartridges, one of the dividers between two of the recesses has chipped-out. The case was key-lockable but was pried open at some point, the damage is slight and no doubt repairable. The lid has a vacant circular inletted spot where there was a monogram plate of some kind, and overall scratches and dings, certainly repairable by a good wood man who knew his business. An interesting and no doubt very scarce casing. (3B10723-13)
1122	Second World War Holster A 1943-dated U.S. M-3 shoulder holster from "Sears Saddlery Co" and so-marked on its rear. The holster rates near very good with some light flaking but remains mostly supple. The belt loop billet is missing from the rear bottom, the stitching remains tight, and there is moderate flaking on the buckle billet at rear, the attachment point becoming very tender but still intact. The "U.S." on front is readable but faint and the lift-the-dot closure works as-designed. While somewhat dry, this remains a good example piece from a seldom-encountered contractor. (3A9287-8)
1123	Boyt 1911 style Flap Holster This is a somewhat worn U.S. Model 1911A1 WWII-era holster from Boyt, and so-marked on its rear. The holster is black and moderately flaked on the flap the "U.S." readable but light. The rear is faded to brown and the maker marking is all but faded but for the Boyt marking, so no date is evident. The brass belt loop is missing from the suspension billet and there is some light mildew present. (3A10723-15)

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
1124	<p>German Late-War Ersatz Walther PP Holster</p> <p>This is an original World War Two late-war brown ersatz holster for the Walther PP pistol constructed from a heavy oilcloth material with faux leather texture, the closure strap being of genuine leather. The holster appears to be unmarked and otherwise remains in very good plus condition showing some scattered high edge wear, a small crack along the leading edge where the front sight would contact and the expected stiffening from the years. (13A9100-735A) [Richard "Stretch" Kennedy Collection]</p>
1125	<p>German P.08 Luger Holster by Auwaerter & Bubeck with Magazine & Tool</p> <p>This 1936-dated holster remains in about very good condition showing moderate finish wear and scuffing throughout the exterior along with a bit of flaking and discoloration. All hardware is otherwise intact with good stitching throughout and the markings along the back have softened somewhat from the years but remain mostly legible showing maker's marking with Stuttgart address, a faded droop wing eagle Waffenam, "7232" police inventory or rack number and the 1936 date. The included blue-bodied aluminum base magazine is numbered "4930" and shows an "(Eagle) / 63" Waffenam and remains in very good condition showing some light dings along the base and fading blue, the spring otherwise seems to be serviceable. The original Luger tool also shows a stamped inventory or rack number "8030" along with what appears to be an "(Eagle) / 63" Waffenam. (13A9100-1268A) [Richard "Stretch" Kennedy Collection]</p>
1126	<p>German Police P.08 Luger Holster by Franz Cobau with Magazine & Tool</p> <p>This brown leather 1929-dated police holster remains in about very good plus condition showing the expected fine crackling and scattered scuffs along the exterior. The stitching where the lid attaches is starting to come loose with perhaps 30% still affixed properly, the closure strap loop is loose on one side while the remaining stitching remains intact and strong. The back surface retains nice markings with maker markings and Berlin address, 1929 date and "(Starburst) K" police property marking. The back surface also shows "L.E. 25" police marking indicating use by the Landjagerei Erfurt rural police. The included magazine is a later extruded variant with 122 code and "(Eagle) / 37" Waffenamts numbered "9891d" and remains in very good condition showing some light dings along the base, strong blue and a good spring. The Luger tool is in very good condition showing some silvering and a very softened faded Third Reich era Waffenam. A solid Police Luger holster. (13A9100-1137A) [Richard "Stretch" Kennedy Collection]</p>
1127	<p>German P.08 Luger Holster by Reichel</p> <p>This dark brown leather 1937-dated holster remains in very good plus condition showing some light scuffs, edge wear and mild creasing along the exterior. All hardware is intact and the stitching remains strong throughout. The exterior of the lid shows a GI's name lightly scratched-in "B.P. SALSANO" while the back surface shows another faded scratched name that is more difficult to discern though "KARL" is visible. The manufacturer markings along the back remain completely intact and strong showing O. Reichel Lengefeld stamp, "(Eagle) / WaA142" Waffenam and 1937 date. The inside of the flap also has the American soldier's name and information written in pen, some of it now faded and rather illegible, but mostly intact reading "S/SGT Bart P. Salsano / 783rd Base Depot Co / 1st MRS / %PM NEW YORK / 32907252". Also included is a nice "(Eagle) / 655" marked Luger tool. Research confirms Mr. Salsano enlisted in 1943 in New York City at age 35. A nice holster with some interesting provenance, taken by a U.S. soldier serving in the Military Rail Service. (13A9100-405A) [Richard "Stretch" Kennedy Collection]</p>
1128	<p>German P.08 Luger Holster by Meier & Abitzsch</p> <p>This brown leather 1914-dated holster remains in about very good condition showing some scattered light flaking and scuffing along the exterior, some light staining and a small hole near the muzzle end of the body. There are some areas of stitching that have come loose along the edge below the buckle and one side of the closure strap on the lid, the strap itself a bit tender but everything is otherwise intact. The main body retains a slightly softened legible maker marking and the exterior lid shows a scratched name that is somewhat difficult to make out though "Clough" is legible. The inside of the lid also shows a period German unit marking "68.A. / B.A. X.I.X. 14." A very respectable First World War Luger holster with unit markings. (13A9100-1131A) [Richard "Stretch" Kennedy Collection]</p>

Lot	Title/Description
1129	<p>German P.08 Luger Holster & Accessory Lot</p> <p>Two holsters, one magazine and a Luger tool. The first black leather holster is a more modern reproduction in police configuration and with a somewhat aged appearance showing some fine crackling and creasing. It is unmarked and contains a reproduction blue-bodied black plastic base magazine and reproduction blued steel Luger tool. The second black leather holster is original and shows evidence of having been repaired or updated during the period of use with areas of removed stitching and reattached hardware. The holster otherwise rates very good showing some scattered fine crackling, scuffs and minor creasing; it appears to be unmarked. (13A9100-1125A) [Richard "Stretch" Kennedy Collection]</p>
1130	<p>German Lp.08 Artillery Luger Holster by Grosse</p> <p>This very dark brown or perhaps black leather holster is dated 1917 and remains in fair condition, the closure strap having been lost to the years and showing a small tear and area of loss along the tip of the cleaning rod pouch. The main body stitching is otherwise intact and there are some scattered areas of scuffing, edge wear and handling marks. The exterior of the flap shows a small "S" stamp and the front of the body beneath the flap retains a strong marking "F. GROSSE / DRESDEN-N / 1917". The interior of the flap shows a large black "X" ink stamp. (13A9100-1263A) [Richard "Stretch" Kennedy Collection]</p>
1131	<p>German P.08 Luger Police Holster by Larsen</p> <p>This black leather 1934-dated holster remains in about very good plus condition showing some slight fading of the black finish along the lid, overall light scuffs and minor crackling. The closure strap stitching is coming loose and threatening to detach and the remaining stitching is otherwise intact and strong. The back surface retains an excellent "ROBERT LARSEN / BERLIN / 1934" marking along with a very nice "(Starburst) L" police stamp. The inside of the lid also shows a slightly faded Reichsadler ink-stamped roundel. The included blue-bodied aluminum base 122-coded extruded magazine remains in about very good condition retaining about 50% original blue showing some scattered oxidation and perhaps some fine pinprick pitting; the body retains strong markings and the base is numbered "8411n" with a "+". The included original Luger tool appears to be unmarked and remains in very fine condition. (13B9100-299A) [Richard "Stretch" Kennedy Collection]</p>
1132	<p>German Model 1894 Hebel Flare Pistol by Christoph Funk</p> <p>serial #14907, 26.5mm Flare, 9" barrel with a good bore showing areas of light oxidation scattered about. The metal surfaces of this flare pistol retain about 75% original blue showing areas of overall thinning, freckling, some old dings along the backstrap and patches of old oxidation mostly along the right side. The trigger and hammer are a mix of brown and pewter patina showing scattered old oxidation and all of the markings remain intact and strong. The smooth walnut grips remain in about very good plus condition showing some scattered light dings and handling marks, a few more moderate along the bases. The left panel shows some faded old ink markings nearer the base that are illegible, the lanyard ring is intact and barrel-to-frame fit is solid. The extractor has been lost to the years and the action otherwise seems to function normally. (13A9101-12) (NON-GUN) [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200</p>
1133	<p>German P.38 Holster by Kimmach & Brunn</p> <p>This black leather hard shell holster is dated 1943 and remains in very good condition showing some scattered light flaking and creasing with a small tear forming near where the front sight would be resting. There are a few areas of more moderate crackling along the back side edges, one 2 1/2" long spot with some more evident damage but the stitching otherwise remains mostly strong. The "P.38" marking on the back is very faded, the "h/jg / 1943" also rather soft but legible and the "(Eagle) / WaA204" remains strong. (13A10762-22A)</p>
1134	<p>Walther PP Holster & Magazine</p> <p>This period brown leather flap holster is Akah-marked with logo and "D.R.G.M." on the front flap. The holster rates very good showing a few small tears and minor crackles along with some creasing and mild discoloration. All stitching remains intact and strong. The included original magazine is the flush base variant and shows only the Walther banner on the left side, it remains in very fine condition retaining about 90% original blue showing some mild operational wear, a few oxidation speckles and the spring seems to be serviceable. (13A10762-17A)</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
1135	<p>Italian Militaria & Pouches</p> <p>Five original two-cell ammo pouches and a four-cell cavalry bandolier in the characteristic gray-green leather, all rating very good to very good plus showing some scattered mild staining and crackling, the leather somewhat stiff overall. Next is an Italian World War One era wooden canteen that rates about good, the sheet steel reinforcements are loosening with the crosspieces detached on one end and the wooden body shows a moderate full-length split on one side. The cap and strap are otherwise intact and the bottom shows a visible maker's marking. Next are two oilers, one earlier pattern in conical form made of pewter and the other a later pattern of black Bakelite, both in fine condition. Finally included is a pair of not Italian, but German World War Two green canvas gaiters in very fine condition. (13A8351-7,8)</p>
1136	<p>Italian M33 Helmet</p> <p>This helmet remains in very good plus condition retaining most of its green paint which appears to show a couple reapplied coats exhibiting some light flaking, scuffs and a few small areas of bare metal. The inside shows a written name "SALVA CARACCILO" and the back edge is stamped "P27". The brown leather liner and green leather chin strap are intact showing some small tears, light flaking and moderate darkening from the years. The drawstring is missing and the liner is marked size 58. (13A8351-10D)</p>
1137	<p>Italian M33 Helmet</p> <p>This helmet remains in very good condition and shows a textured desert sand camouflage along the exterior that shows some light scratches and scuffs. The interior shows the original green paint and is stamped along the back edge "P21". Some of the liner attachment points have come undone and it is now rather loose, it is marked size 56 and has darkened from the years showing rather heavy wear. The chinstrap as well is rather dilapidated. (13A8351-10B)</p>
1138	<p>Italian M16 Helmet</p> <p>This helmet remains in about very good condition retaining about 70-75% dark green paint that shows flaked oxidized areas, a few scuffs and shallow dents. The exterior shows a black stenciled unit marking that is perhaps signals engineers with "12" in a flaming bomb over crossed axes and a lightning bolt. The liner is not present though two sections of the corrugated aluminum spacers are intact, the other two sets of retainers and chinstrap bales are also present. (13A8351-10C)</p>
1139	<p>Italian M16 Helmet</p> <p>This helmet remains in very good condition retaining about 80% of what appears to be the original green paint with areas flaking to an oxidized brown patina mostly along the right side and back edge, also showing a few shallow dents and dings. The liner is not present and the retainer clasps have all broken off and been lost to the years. However the chinstrap bales and a somewhat worn green leather chinstrap are present. (13A8351-10A)</p>
1140	<p>Czech vz.30 Flare Pistol by CZ</p> <p>serial #20558, 26.5mm Flare, 5" barrel with a partially bright bore showing some areas of mild oxidation. The metal surfaces of this 1939-accepted pistol have mostly toned to a deep gray-brown patina showing some scattered original blue in the more protected areas, old oxidation overall and some scratches along the barrel. The hammer retains some faded straw color and the markings remain intact and strong. The dark brown checkered Bakelite grip remains in good condition showing some shallow chips along the edges and overall dings from service. The lanyard ring is intact and the action seems to be functional. (13A10762-32) (100/200) Est. 100 - 200</p>
1141	<p>German World War II Luftwaffe Double Barrel Flare Pistol by Krieghoff</p> <p>serial #25999, 26.5mm Flare, 6 1/2" barrels with mostly bright bores showing a couple minor oxidation speckles. The metal surfaces of this fzs-coded pistol retain about 85% original dark gray phosphate finish showing some edge wear and scattered handling marks, the bright action pins showing some mild oxidation. The other smaller parts retain strong straw colors and all markings remain intact and crisp with 4 bore stamp and eagle proofs on the barrels, "(Eagle) / L2" Luftwaffe Waffenamnt on the left side rear frame and contract number "FI.24483". The mottled dark brown checkered Bakelite grips remain in near excellent condition, the barrels lock up nicely and the action seems to function well mechanically. A nice example for the German martial collector. (13B10762-30) (300/500) Est. 300 - 500</p>
1142	<p>Freedom Arms Belt Buckles</p> <p>Two original Freedom Arms belt buckles with the cutout for their mini revolver. One rates excellent showing a few minor handling marks and measures 5" across and 3 1/8" tall. The other rates very fine showing some areas of verdigris, tarnishing and oxidation along the hardware affixed to the back and measures 4 5/8" across and 3" tall. All BATFE rules apply with these accessory items. (13A9100-79A,941A) [Richard "Stretch" Kennedy Collection]</p>

Lot	Title/Description
1143	<p>German Lp.08 Luger Holster by Ver. Sattlermeister GmbH</p> <p>This original dark brown 1917-dated holster remains in good condition showing moderate creasing along the main body, scuffing and crackling along the lid. The stitching remains mostly intact throughout with a few areas of loosening, the main closure strap is starting to loosen and the small circular cover flaps on the cleaning rod closure strap are hanging on by a thread and threatening to detach. The maker markings on the inside of the lid remain crisp and the holster includes what appears to be an original cleaning rod and a reproduction Luger tool. No other hardware is present. A rather salty example that remains in about good overall condition. (13A9100-1272B) [Richard "Stretch" Kennedy Collection]</p>
1144	<p>Portuguese Luger Holster</p> <p>This original black leather holster remains in very good plus condition showing some scattered fine crackling and mild flaking, and a couple loose threads at the lid attachment, the remaining stitching otherwise intact and strong. The inside body shows "AE" maker stamp and the holster includes the proper cleaning rod/oiler, pin punch and Luger tool. A very good holster rig to accompany your Portuguese Luger. (13A9100-1124A) [Richard "Stretch" Kennedy Collection]</p>
1145	<p>Portuguese Luger Holster</p> <p>This original black leather holster remains in very good condition, the exterior showing a noticeable "wrinkled" appearance with some scattered fine crackling and light scuffing. The back surface of the body and inside leather are brown, the back surface showing "AE" maker stamp and the inside flap with a later pen marking "GNR". The stitching remains intact and mostly strong and the holster includes the proper cleaning rod/oiler, pin punch and Luger tool. (13A9100-1124B) [Richard "Stretch" Kennedy Collection]</p>
1146	<p>German P.08 Luger Holster by Karl Bocker</p> <p>This original black leather holster remains in very good plus condition showing some scattered light scuffing and crackling, more noticeable along the back surface, and the closure strap shows mild wear overall. All stitching and hardware remains intact and strong and the back surface of the body retains nice maker markings with "KARL BOCKER / 1940 / WALDBROL" and "(Eagle) / WaA195". There is another blue ink stamp on the inside flap partially covered by the tool pouch along with an American soldier's name and information written in pen "Sgt. C.B. Holden / Co. C 138th Ord." Also included is an original Luger tool in fine condition showing droop wing "(Eagle) / 63" Waffenamnt. Records show Charles B. Holden from Ohio enlisted in January 1944. A very nice example for the German martial collector. (13A9100-1272A) [Richard "Stretch" Kennedy Collection]</p>
1147	<p>German P.08 Luger Holster</p> <p>This World War One era brown leather holster remains in about good condition showing some scattered scuffing and areas of slight darkening with the stitching remaining intact and mostly strong. The belt loops are older replacements and the top portion of the body has been cut-down under the lid to allow easier access to a holstered pistol's grip. The pull strap has also been cut and the inside lid shows a very faded maker's roundel stamp that appears to be dated 1915 though there is another faded "BA" ink stamp that is actually dated 1914. The name "HURLEY" is also written on the inside. An unmarked Luger tool that appears to be a later Portuguese example is included. (13A9100-1139) [Richard "Stretch" Kennedy Collection]</p>
1148	<p>Period Holster Lot</p> <p>This lot consists of a single item. It contains an unmarked period style right-hand brown leather flap holster with light geometric designed borders. The holster shows honest use but remains in very good condition with strong stitching, final style flap closure, and an approximately 2 1/2" belt loop. The holster is sized for a Colt Police Positive or similar sized revolvers. A great addition to your period revolver collection. (8A10740-31A)</p>
1149	<p>Desirable Smith & Wesson Model 41 Barrel</p> <p>This lot includes a single barrel with sights and optics. Included is a Smith & Wesson Model 41 barrel in 22 LR with an excellent bore. The barrel retains about 95% original blue showing light edge wear, and handling marks. This is a 5" lightweight field barrel featuring a Baughman ramp front sight, black blade adjustable rear sight, and has been non-factory drilled and tapped for a scope mount. The barrel has a Weaver style base mounted with an Aimpoint "Electronic MK III" red dot sight attached with clear optics. It is not known if the sight functions as the batteries need replacing (RM1N size). (8A9100-1365C)</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
1150	<p>Smith & Wesson Model 41 Barrel</p> <p>This lot includes a single barrel with sights and optics. Included is a Smith & Wesson Model 41 barrel in 22 LR with an excellent bore. The barrel retains about 97% original blue showing light edge wear, and handling marks. This is a 7 3/8" heavy target barrel featuring a Patridge front sight, black blade adjustable rear sight, and has been non-factory drilled and tapped for a scope mount. Additionally, there is a later added threaded muzzle adapter. The barrel has a Weaver style base mounted with an Aimpoint 3000 red dot sight attached featuring clear optics plus a removable and adjustable filter. It is not known if the sight functions as the batteries need replacing (DL1/3N size according to manual). (8A9100-1365D)</p>
1151	<p>Vintage Animal Trap Lot</p> <p>This lot consists of a total of eight traps. One distinctive feature of all the traps in this lot are the later applied identification number on the pans or treadle (many states and provinces require the trapper to mark their traps with their name or unique identification number, in this case "J587"). Included in this lot are (6) #1 Blake & Lamb single under spring jump traps that have strong remaining trap dye and remnants of old wax. They feature the distinctive lock link chain used by that company (until the Animal Trap Company purchased them) and most are end swiveled. All six of these traps have the ring on the end of the chain and four of these rings have the factory supplied spike. One of the traps is swiveled off the cross piece but the pan writing is too faded to verify if it is a Blake & Lamb although all the other parts appear correct. The last (2) traps are #1 Oneida single under spring jump traps with double loop chains and the distinctive "V" cut out on each pan for Victor traps (part of the Animal Trap Company). One trap has a full length chain with the ring on the end, the other has the chain but is missing the ring. Both traps show limited light oxidation with remnants of the trap dye. A nice find for the trap collector or must have decoration for your cabin or sportsman's den. (8A6519-491C)</p>
1152	<p>Smith & Wesson Model 1891 Single Shot Barrel Assembly</p> <p>This lot consists of a single barrel. This is a Smith & Wesson Model 1891 Single Shot Target Pistol, 22 LR, 6" barrel with a bright excellent bore. The barrel includes a pinned blade front sight, adjustable rear sight/top latch assembly, extractor/ejector assembly, and crisp marking. The metal surfaces retain about 97-98% original blue the loss to high edge wear and handling marks. This barrel will fit the First and Second Model single shot pistols. (8A9100-971B) (NON-GUN)</p>
1153	<p>Vintage Smith & Wesson Box</p> <p>This lot consists of a single box. The box is an unlabeled dark purple cloth covered Smith & Wesson patent or display box for hand ejector revolvers from the 1920 - 1930's era. The box rates very good, the right front corner of the cover is torn but the rest is in good condition showing limited edge wear, bubbling of the lids covering, and a few other storage marks. The bottom of the box has handwritten notes referring to a "S&W / S.A. Target / 6" .38 S&W Cal. / followed by two illegible words" and it appears to indicate what may have been stored in the box. A nice box for the dedicated collector. (8A9100-971A)</p>
1154	<p>Walther Model LP3 Single Shot Match Air Pistol</p> <p>serial #34948, .177 caliber, 9 7/16" barrel with a bright excellent bore. This lovely pistol appears as-new-in-the-box and retains 99% plus original blue, anodizing, and crackle paint covering the barrel, cocking lever, and frame in that order. The match style right hand feature a textured palm swell, finger cut, and adjustable palm rest. This gun features a semi-Patridge front sight, adjustable black blade rear sight with interchangeable blades, break action barrel, and single cocking lever in the front of the grip frame. It includes the original Styrofoam box correctly end labeled and numbered to the pistol with a pair of extra sliders for the rear sight, combination tool, what appears to be a full box of Beeman .177 cal. felt cleaning pellets (100 pack), and what appears to be a full tin of Benjamin .177 cal. pellets (250 pack). A fine precision air pistol for practice or competition. (8A9101-13) (NON-GUN) [Richard "Stretch" Kennedy Collection] (400/600) Est. 400 - 600</p>
1155	<p>As-New Webley & Scott Tempest Model Air Pistol</p> <p>serial #013651, .177 pellet, 6 7/8" barrel with a bright excellent bore. This scarce single-shot spring piston air pistol remains in as-new-in-box condition and includes a sealed 500-count tin of Beeman Silver Sting pellets, manual and paperwork and the original large black box with factory logo. It features the Beeman San Rafael, CA importation mark and the action appears to function well mechanically though AAC does not guarantee the function of air guns. (23A9101-29) (NON-GUN) [Richard "Stretch" Kennedy Collection] (100/200) Est. 100 - 200</p>

Lot	Title/Description
1156	<p>Reproduction Vintage Smith & Wesson Advertisements</p> <p>Two excellent condition Smith & Wesson aluminum signs as follows: One sepia-colored S&W revolvers sign (item #1466) highlighting their "Superior Automatic Shell Extracting Revolvers. One S&W "Hostile" aluminum sign (item #1876) depicting a revolver-armed rider defending himself against an American Indian crossing a lake; there is a small bend and tiny scuff in the lower right corner of this sign. Both signs measure 16" x 12 1/2" and feature holes in each corner for easy hanging. (23A10902-1)</p>
1157	<p>Reproduction Vintage Remington Advertisements</p> <p>Two as-new Remington aluminum signs as follows: One Remington "Right of Way" sign (item #927) depicting a frontiersman armed with an autoloading rifle confronted by a Grizzly Bear; this sign measures 16" x 11". One Remington "Game Load" sign (item #1169) illustrating 34 various species of game animals; this sign measures 16" x 12 1/2". Both signs feature holes in each corner for easy hanging. (23A10902-1A)</p>
1158	<p>Reproduction Vintage Winchester Advertisements</p> <p>Two as-new Winchester aluminum signs as follows: One Winchester "Logo" sign depicting the famous horse and rider as painted by Philip R. Goodwin (item #1421). One Winchester "A Drummer" sign (item #1007) depicting a drumming grouse and advertising Winchester's factory loaded shotgun shells. Both signs measure 16" x 12 1/2" and feature holes in each corner for easy hanging. (23A10902-1B)</p>
1159	<p>Daisy Model 130A Air Rifle</p> <p>serial #1636071, .177 cal. pellet, 17 7/8 barrel with an excellent bore. The metal surfaces of this Spanish-made break-barrel-cocking piston-powered air rifle retain about 93-95% original blue with overall speckles of light oxidation. The walnut-stained smooth European hardwood Monte Carlo pistolgrip stock with left side cheekpiece rates about very good plus with a few scattered light handling marks. The air rifle features a hooded blade front sight and micrometer rear sight and the action appears to function well mechanically though AAC does not guarantee the function of air guns. (23A10769-27) (NON-GUN)</p>
1160	<p>Crosman Model 38T Target CO2 Powered Double Action Revolver</p> <p>serial #177087873, .177 cal. pellet, 6" barrel with an about excellent bore. The metal surfaces of this second variant air pistol retain about 97% original black enamel finish with some speckles of light oxidation along the barrel. The diamond checkered faux wood synthetic grips rate excellent. The air pistol features a fully adjustable rear sight and includes the original box, factory hang tags, manual, two packages of .177 cal. pellets and five Crosman Copperhead CO2 powerlets. The action appears to function well mechanically though AAC does not guarantee the function of air guns. (23A8106-11) (NON-GUN)</p>
1161	<p>Crosman Nitro Venom Hardwood Air Rifle</p> <p>serial #713X29569, .177 cal., pellet, 18 1/2" barrel with a bright excellent bore. The metal surfaces of this break-barrel-cocking, Nitro-Piston powered Chinese-made air rifle retain about 93-95% original blue with speckles of light oxidation along the barrel. The checkered Asian hardwood Monte Carlo pistolgrip stock with ambidextrous cheekpieces and rubber rifle pad rates about very good plus with a small impact mark on the toe of the grip, a light handling mark or two and some minor ingrained soiling in the grooves of the rubber pad. The rifle includes a factory-mounted Center Point 3-9x32 scope with bright excellent optics. The action appears to function well mechanically though AAC does not guarantee the function of air guns. (23A10858-13B) (NON-GUN)</p>
1162	<p>Wischo Model K.G./55 Air Rifle</p> <p>serial #5286, .177 cal. pellet, 16" barrel with a bright excellent bore. The metal surfaces of this West German-produced break-barrel-cocking piston-powered air rifle retain about 97% original blue with a few speckles of light oxidation along the barrel and some tool marks toning to gray around the front of the grooved scope mount. The checkered European pistolgrip stock rates near excellent with a few light handling marks. The front sight blade appears to be a later replacement, the original rear sight is intact, there is no safety and the action appears to function well mechanically though AAC does not guarantee the function of air guns. (23A10858-7E) (NON-GUN)</p>
1163	<p>Gamo Shadow 1000 Air Rifle</p> <p>serial #04-1C-150637-04, .177 cal. pellet, 18" barrel with a bright excellent bore. The metal surfaces of this Spanish-made break-barrel-cocking piston-powered air rifle retain about 97% original blue with a few scattered spots of light oxidation and a few light handling marks. The pebble-textured gray synthetic Monte Carlo pistolgrip stock with ambidextrous cheekpiece rates excellent. There is a rudimentary trigger shoe installed, the front sight blade is missing, the fully-adjustable green fiber optic two dot rear sight is intact and the action appears to function well mechanically though AAC does not guarantee the function of air guns. (23A10858-7) (NON-GUN)</p>

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
1164	Beeman Sportsman RS2 Series Air Rifle serial #80124429, .177 cal. pellet, 18 1/4" barrel with a bright excellent bore. The metal surfaces of this Chinese-produced break-barrel-cocking piston-powered air rifle retains about 93% original blue with loss due to spots of moderate oxidation primarily along the "receiver". The trigger retains all its original silver coloring and the smooth Asian hardwood Monte Carlo pistolgrip stock rates about excellent. The rear of the red fiber optic front sight blade is cracked causing the bead to be off-center, the fully-adjustable green fiber-optic two dot rear sight is intact and the action appears to function well mechanically though AAC does not guarantee the function of air guns. (23A10858-7A) (NON-GUN)
1165	Gamo Shadow Sport Air Rifle with Scope serial #04-1C-106833-08, .177 cal. pellet, 18" fluted polymer-shrouded barrel with a mostly bright about excellent bore showing some light fouling. The metal surfaces of this Spanish-produced break-barrel-cocking piston-powered air rifle retain about 99% original blue while the polymer barrel shroud rates very good plus with a couple dings on the right barrel flute. The textured synthetic Monte Carlo pistolgrip stock with ambidextrous cheekpiece rates excellent. The Gamo Sporter 3-9x40 scope with duplex reticle has bright excellent optics and retains about 99% original black anodized finish. The action appears to function well mechanically though AAC does not guarantee the function of air guns. (23A10858-7D) (NON-GUN)
1166	Beeman RX Air Rifle serial #1212133, .177 cal. pellet, 19 3/4" barrel with a bright excellent bore. The metal surfaces of this German-produced break-barrel-cocking Theoben gas-spring powered air rifle retain about 95% original blue with some scattered speckles of light oxidation while the triggerguard retains 99% original black anodized finish. The checkered European walnut Monte Carlo capped pistolgrip stock with right hand cheekpiece rates about excellent. The rifle features a globe style front sight with post insert, fully-adjustable rear sight and mounted to the "receiver" is a Beeman Blue Ribbon Model 66R 2-7x32 adjustable objective scope with duplex reticle and bright excellent optics. The scope retains about 99% original black anodized finish with a touch of light oxidation on the steel turret screws. The action appears to function well mechanically though AAC does not guarantee the function of air guns. (23A10858-13C) (NON-GUN)
1167	Hammerli Titan Air Rifle with Scope serial #07G0032, .177 cal. pellet, 18 1/2" barrel with a bright excellent bore. The metal surfaces of this Chinese-produced break-barrel-cocking spring piston air rifle retain about 99% original blue and black anodized finishes and the black polymer triggerguard rates excellent. The cherry-stained smooth Asian hardwood Monte Carlo pistolgrip stock with left side cheekpiece rates excellent with a light handling mark or two. The original sights are intact and mounted to the "receiver" is a Hammerli 4x32 scope with duplex reticle and bright excellent optics. The scope retains about 99% black anodized finish. The action appears to function well mechanically though AAC does not guarantee the function of air rifles. (23A10858-13) (NON-GUN)
1168	Webley Osprey Air Rifle serial #24171, .177 cal., 19" barrel with a bright excellent bore. The metal surfaces of this Beeman-imported side-lever spring piston air rifle retain about 97% original blue with scattered speckles of light oxidation. The smooth European walnut Monte Carlo pistolgrip stock with left side cheekpiece rates about very good plus with a narrow bruise in the walnut-stained finish on the right side of the toeline exposing the wood beneath and the Webley-marked recoil pad displays some light crazing around the edges. The original sights are intact, a trigger shoe is installed and the action appears to function well mechanically though AAC does not guarantee the function of air rifles. (23A10858-7B) (NON-GUN)
1169	Industry Brand Model B3-1 Air Rifle serial #F415024, .177 cal., 17 3/4" barrel with a bright excellent bore. The metal surfaces of this Shanghai China-produced SKS-styled air rifle retain about 90% original blue with loss due to overall spots of light oxidation and there are a few light handling marks on the polymer end cap at the rear of the "receiver". The smooth Asian hardwood pistolgrip stock rates perhaps very good with a few sizable chips in the heavy shellac finish around the grooved butt which is devoid of finish. The original sights are intact and the action appears to function well mechanically though AAC does not guarantee the function of air guns. (23A10858-7C) (NON-GUN)

Lot	Title/Description
1170	AR-15 Complete Upper Receiver Group 5.56 NATO, 16" Olympic Arms Stainless Ultra Match barrel with a 1:8" twist and a bright excellent bore. The metal surfaces retain about 97-98% original black oxide, anodized and Parkerized finishes with a few scattered light handling marks including a tiny ding in the knurling on the 7" aluminum free float tube and the grooves on the included carry handle cantilever optics rail have been widened a touch exposing the natural alloy. The A2 upper receiver bears the Alcoa Forge marking, the barrel is equipped with an A2 flash hider, a complete Yankee Hill Machine bolt carrier group is included along with an unmarked charging handle with oversized latch. The sling swivel has been removed from the front sight base and the windage drum is toning to a dark plum patina. Olympic Arms Stainless Ultra Match barrels are well respected for their accuracy. (23A10784-2)
1171	Lot of 4 Assorted Books Detailing the topics of self-defense, Gil Hebard Guns, Metallic Silhouette Shooting, and Legendary Sporting Rifles. This set includes 4 soft cover books that as a collection rate good to particularly good condition, with some cover creases and yellowing on two of the books. (2X226519-2880)
1172	Stock Blank This synthetic metallic flake green stock is inletted with barrel groove only. The stock has a wide flat bench rest style forend and has not been cut for a trigger group, magazine well, or bolt. It is a straight pistol grip style sporting stock that has several light storage marks scattered about and a small chip missing from the left top corner of the forend. The stock blank remains about very good unfinished condition and would make a fine starting point for a custom build. (10B8774-2)
1173	Fajen Stock This right hand, green laminated, Monte Carlo style stock with ventilated forend is likely for a Remington Model 700 short action. The stock shows a few scattered light handling marks likely from storage and remains in near excellent condition. (10A8774-1)
1174	Remington Rand Deluxe Model 5 Portable Typewriter This mid 1940's era compact typewriter is serial #B1247779, and appears complete with all working parts functioning smoothly. The machine retains nearly all of its original finishes aside from a few light handling and storage marks. There is no longer an ink ribbon present, however a quick Google search showed that ribbons can still be obtained at reasonable pricing. This is a fine example of these iconic machines that would be a wonderful addition to any collection. (10C8214-1) (200/400) Est. 200 - 400
1175	Aftermarket Large Frame Revolver Grips 18 sets total. This lot consists of an assortment of mostly Pachmayr and Hogue soft rubber grips for various large frame Ruger, Dan Wesson, and Smith & Wesson revolvers. They range in condition from good to excellent with different texture patterns. A fine assortment of grips overall. (10Z9850-3A)
1176	Aftermarket Colt Grips 3 sets total. First is a set of Hogue wrap-around textured rubber grips for an Officers Model pistol that show very light wear and remain in about excellent condition. Second is a set of textured rubber Hogue grips for a full size 1911 frame pistol with virtually no wear in excellent condition. Third is an as-new-in-box set of Timber Smith U.S.A 1911 grips with skull pattern carvings. These grips are still in their original plastic packaging. (10Z9850-3B)
1177	High Standard Target Grips These right hand checkered walnut grips are for a 106/107 series High Standard pistol. The checkering is crisp and the grips show some light handling and storage marks and remain in near excellent condition. (10A9850-3C)
1178	High Standard Target Grips These left hand checkered walnut grips are for a 106/107 series High Standard pistol. The checkering is crisp and the grips show some light handling and storage marks and remain in near excellent condition. (10A9850-3D)
1179	M68 Training Claymore Kit This M68 kit is comprised of an M33 inert anti-personnel Claymore, two shipping plug-priming adapters, M10 simulated blasting cap wire, M57 "clacker", and M40 test set contained in a dark green canvas pouch. The plastic surfaces of this training kit show expected light stains, scuff marks, and handling marks from training usage. The dark green canvas pouch rates about good to very good with overall light staining, numerous small tears, and the instructions have been torn loose from the inside flap. A quick functions check reveals the light on the M40 test set no longer lights up as it should when attached to the M57 clacker and the handle is depressed. An interesting addition to any military collection. (27A10876-1)

Auction - Amoskeag Timed - January 2023 01/22/2023 1:45 PM EST

Lot	Title/Description
1180	<p>Vanguard Shotgun Case</p> <p>This aluminum hardcase is designed for a double barrel shotgun, however, it should work well for any needs. The case measures approximately 32" x 13" x 5" with locking clasps. The grooved rubber exterior of the case rates about very good with minor scuffs, handling marks, and light impact marks not uncommon for a used hardcase. The interior is lined with black foam on the top and bottom and rates excellent overall. A high quality hardcase for your sporting needs. (27Z10803-47A)</p>
1181	<p>Carbine Conversion Unit</p> <p>This Carbine Conversion Unit fits a 1911 pistol and features an 18" stainless steel barrel with muzzle brake and an excellent bore. The metal surfaces retain 95-97% black anodized finish with light wear along the edges. The hardwood buttstock and grip remain in excellent condition, the forend shows a professionally repaired crack along the lower left and right sides. Unit is equipped with an aluminum Weaver style sight mount and an instruction sheet is included. (5,2610887-2) (200/300) Est. 200 - 300</p>
1182	<p>U.S. World War Two Printing Plate Set</p> <p>Included are four copper printing plates by the Vandercook Company depicting a U.S. Army sergeant of the 104th Infantry standing proudly with field gear and M1917A1 helmet. The plates are individually stamped for the intended color including: black, blue, red and yellow and the etched image is obviously rendered differently in each plate to account for the coloring. The black and blue plates are perhaps the sharpest images and the black is marked "PHOTO BY CORP. LLOYD E. FARBBER, 104TH INFANTRY". All four remain in very good plus to near excellent condition showing some light scratches, minor scuffs and a few spots of verdigris scattered about, more prevalent on the black plate. The 104th Infantry Division saw extensive service during the war seeing almost 200 days of fighting. This is a great collectible for the Second World War enthusiast. (3X138992-8)</p>
1183	<p>Assorted Gamebird Prints</p> <p>Four nice-looking full-color prints total. Three prints, each 17" x 13" including white border, are by renowned wildlife artist David A. Maass, five time Ducks Unlimited Artist of the Year, two time Pheasants Forever Artist of the Year and winner of numerous other accolades. The first depicts a pair of Ruffed Grouse in flight through a stand of birch on a crisp autumn morning. The second features a flock of Redhead ducks gliding down to a flooded field highlighted by an overcast sky, and the third shows Mallard hens rapidly ascending from a reed covered lake. Les Kouba, artist of the fourth print, was also Ducks Unlimited Artist of the Year twice as well as two-time Federal Duck Stamp Contest winner amongst other notable achievements. The print, Bills Past Due, is the 1989 Ducks Unlimited Atlantic Flyway Print of The Year and shows 13 Greater Scaup or "Bluebills" coming in for a landing and measures 17 1/4" x 13 1/2" including white border. Kouba famously depicts 13 of his subjects in each of his paintings. Prints are unframed and each is sure to liven up any sportsman's home. (3X23A7240-6H)</p>
1184	<p>Lot of Arms & Armor Books</p> <p>Four items. First one hardcover "Arms And Armour" by Vesey Norman copyright 1964, 96 pages. Second one small hardcover "Arms and Armor" by Stephen V. Grancsay copyright 1964, 45 pages. Third one soft cover booklet "Armour" by J.F. Hayward, published 1951 for the Victoria & Albert Museum. Finally one soft cover booklet from the Museum of Historical Arms of Miami Beach Florida dated 1960 which details antique arms and armor for sale by this company at the time. The books rate very good to very good plus showing some slight tears along some of the edges and mild wear overall. (13Z10916-1)</p>
1185	<p>Lot of Firearms Reference Material</p> <p>Five books total. First hardcover "The Greenhill Dictionary of Guns and Gunmakers" by John Walter copyright 2001, 576 pages. Second softcover the "Gun Digest Treasury Deluxe 4th Edition" edited by John T. Amber copyright 1972, 352 pages. Third softcover the "Official Guide to Gunmarks Third Edition" by Robert H. Balderson copyright 1996, 367 pages. Fourth, softcover of the Seventh Edition of Flayderman's Famous Guide to Antique American Firearms And Their Values and fifth a softcover of the Eighth Edition of Flayderman's Guide. All of these books remain in very good plus to very fine condition showing only light use and wear form the years. (13Z10916-1A)</p>
1186	<p>U.S. Model of 1917 Rifle Handbook</p> <p>This is an original 1918-dated softcover booklet published by the Government Printing Office entitled "Soldier's Handbook of the Rifle and Score Book for Special Course C Arranged For the United Stated Rifle Model of 1917". This 132-page booklet details the use, operation and statistics of the 1917 rifle for the U.S. soldier including photographs of firing positions, diagrams and data tables. The score pages for the courses of fire are blank and the booklet remains in about very good condition overall showing dogeared corners and some small tears along the pages, the oilcloth cover with some slight fraying and discoloration. A nice little booklet to accompany your 1917 rifle. (13A10916-1B)</p>

Lot	Title/Description
1187	<p>German World War Two Militaria Books</p> <p>Two total. First the softcover "World War II German Military Collectibles" by Robert McCarthy copyright 1980, 80 pages. Second the softcover "Nazi Regalia" by Jack Pia copyright 1971. Both rate very good plus showing some light scuffing along the exteriors. (13Z10916-1C)</p>
1188	<p>Two Books on Antique Firearms</p> <p>First is the hardcover "American, British & Continental Pepperbox Firearms" by Jack Dunlap copyright 1964, 279 pages. Second is the hardcover "The Flintlock: Its Origin and Development" by Torsten Lenk copyright 1967, 188 pages. The books rate very good showing some moderate scuffing and small tears along the dust jackets. (13Z10916-1D)</p>
1189	<p>Two Books on the American Revolution and Civil War</p> <p>First is the hardcover "Swords & Blades of the American Revolution" by George Neumann copyright 1973, 288 pages. Second is the hardcover "Singing Soldiers: A History of the Civil War in Song" by Glass & Singer copyright 1968, 300 pages. The books rate very good, the first with some sort of inventory number in black sharpie on the first page and both showing some moderate scuffing, light discoloration and a few tears along the dust jackets. (13Z10916-1E)</p>
1190	<p>Assorted Small Books and Manual on Firearms</p> <p>9 items total. First is the hardcover "The Rifle and How To Use It" eighth edition by Hans Busk copyright 1862, 255 pages. This antique book rates about good, the covers are loose and their spine is threatening to break off entirely, the pages are otherwise quite nice. This period book details many interesting arms, bullets and rifling styles and should be an interesting read for the antique arms enthusiast. Next are two hardcovers, "Comprehensive Small Arms Manual by Charles T. Haven copyright 1943, 159 pages and "The Earliest Hand Firearms" by Clephan copyright 1906, 66 pages facsimile reproduction. The balance of the items are softcovers including: "Scouting and Patrolling: The Infantry Journal" copyright 1943, 126 pages; the April 1948 edition of "The Collector" detailing the Frank R.
