#### Title/Description Lot

Lot Title/Description

505 Magnificent Ivory-Mounted Wakizashi This beautifully mounted shortsword measures 26" long and bears a steeply curved 18" single-edged blade with single unstopped fullers and an undulating acid-etched temper line. Bright and near excellent, the blade shows areas of roughness along the edge and some fine sharpening marks visible at the tip. Hints of smoky patina or light oxidation remnants can also be seen here or there but otherwise the blade shows few blemishes. The true highlights of this piece are the carved ivory mounts: the hilt and scabbard feature a beautiful carved relief in four panels (one on the hilt, three on the scabbard) bordered by clouds, waves and foliate scroll. The panels depict expertly detailed scenes of Japanese lords and their attendants practicing Takagari, the Japanese tradition of falconry, in pastoral Japanese landscapes. The hilt depicts a band of hunters in hot pursuit of their falcon as it pins a struggling crane in the water. The scabbard shows the falconers erecting portable perch stands, caring for the birds, and preparing hunted game including the aforementioned crane carried on a pole between two men. The lowermost panel shows a samurai in formal dress attire, complete with a Daisho sword pair tucked into his sash, with his falcon perched upon his left glove. The tip depicts a winged gargoyle-like creature surrounded by rolling clouds. The relief is exquisitely rendered in the finest detail, from the bark of the trees to the shading on the individual feathers of the birds, varied in depth throughout to show volume and dimensionality from any angle. Transporting the viewer to the beautiful countryside of feudal Japan. these mounts could only be the work of a master craftsman. The ivory is toned to a pleasing yellow-tinged cream color. Several very thin cracks, including some following the lines of the carving, can be seen sparsely scattered here and there on the body. The tip segment has been reattached by a careful adhesive repair, traces of which are visible only under close inspection of the seam. These blemishes are largely negligible and do little to nothing to detract from the beauty of this marvelous carving. Truly an imitable piece of Japanese artwork and a splendid prize for any collector. (129718-14) [Deaccessioned New Britain Youth Museum] (2000/3000) Est. 2,000 - 3,000

506	U.S. General Officer's Sword & Two-Scabbard Set Belonging to	
	Massachusetts Surgeon General Edward J. Forster	
	36 1/2" overall, 30" double-edged diamond-shaped blade marked "G.M. Simmons & Co. / Boston Mass." on the reverse face of the ricasso. The	
	bright excellent blade is beautifully frost-etched on either face with crisp	
	panels depicting foliate scroll and panoplies of arms, centered by a	
	Federal Eagle on the obverse and U.S. lettering on the reverse. Some	
	barely visible scabbard marks can be seen on the faces of the foible and	
	specks of gray patina are present near the tip and over the maker's	
	mark, otherwise the blade shows few blemishes. The hilt is cast brass in	
	gilt relief with a folding reverse counterguard showing U.S. Shield &	
	panoply of arms in an oak & laurel wreath and a silvered grip inlaid with	
	a gilt spiral band. Aside from a fleck or two of verdigris, the hilt shows no blemishes of note and rates excellent with generous gilt in the relief. A	
	correct regulation two-scabbard set is included, the first nickel-plated	
	with a single Brigadier General's silvered brass star for dress wear and	
	the second service-browned for field use, both mounted in gilt brass.	
	Some handling marks are visible under light and instances of verdigris	
	can be seen on the drag of the nickel scabbard but otherwise both are in	
	excellent condition. Also included is one buff kidskin cover marked "Brig.	
	General / Lieut. Colonel (struck through) / E.J. Forster. / Surgeon	
	General / Mass" on the front face. The cover is in good condition overall:	
	the last few inches of the tip have been lost and the surface shows light age yellowing, a few small perforations and occasional stains. The	
	lettering is a bit faded but remains legible. Contact wear at the side is	
	perfectly consistent with this sword, leaving little doubt that this is the	
	correct sleeve for that arm. According to information from the	
	Massachusetts National Guard Museum & Archives, Edward Jacob	
	Forster "enlisted in the 26th Unattached Infantry Company, Mass.	
	Volunteer Militia in Sep 1864; discharged in Oct 1866. He did not serve	
	on active duty during the Civil War. He received his MD from Harvard in	
	1868 and was commissioned as surgeon with the rank of major, 5th	
	Infantry in 1871. Discharged in 1892. Commissioned as lieutenant colonel in 1894 and assigned as medical director, 1st Brigade,	
	appointed Surgeon General with rank of brigadier general by Gov.	
	Frederic T. Greenhalge on 23 Apr 1895. Died in office 15 May 1896."	
	Presented with this lot is a dossier of research pertaining to the General	
	including the above statement, excerpts from period publications such	
	as Adjutant General's annual reports and obituaries for Dr. Forster, an	
	excerpt from A History of the Massachusetts Medical Society 1781-1922	
	by Walter L. Burrage, A.M., M.D. and a 25-page printout of The	
	Pedigree and Descendants of Jacob Forster, Sen. of Charlestown,	
	Mass. by none other than Dr. Edward J. Forster himself. This excellent attributed Massachusetts General's sword presents a rare and enticing	
	opportunity for the collector. (12A9838-6) [Bruce Schroyer Collection]	
	(1200/1800)	
	Est. 1,200 - 1,800	
507	Beautiful U.S. Model 1860 Officer's Cavalry Saber Retailed by Tiffany &	
	Co.	
	This high-end officer's weapon measures 41" overall and bears a 35" single-edged trailing point blade with wide stopped and narrow	
	unstopped fullers. Either face of the blade is etched with intricate frosted	
	panels depicting assorted complex floral and foliate sprays, panoplies of	
	arms, the Federal Eagle, a uniformed Union soldier, U.S. lettering and	
	the Tiffany & Co. logo. The ricasso is stamped "Collins & Co. / Hartford /	
	Conn" on the reverse face and dated "1861" on the obverse. The	
	etching is in marvelous condition, only showing the barest flecks of	
	smoky patina under light. Similarly tiny flecks and minute handling marks	
	can be seen on the bright foible. The few blemishes are negligible and	
	overall the blade is excellent. The hilt is gilt brass crisply engraved with foliate designs and a U.S. shield on the back of the pommel; a Federal	
	Eagle is embossed on the underside of the rear quillon. The grip is black	
	shagreen wound by twisted brass wire. A few instances of finish wear	
	expose bright brass, otherwise the guard retains strong original brass;	
	the grip is unblemished and the hilt rates excellent as a whole. The	
	scabbard is steel with gilt brass mounts, finely decorated with foliate	
	engraving, a pierced foliate relief at the throat and a gilt brass	
	escutcheon of Federal Eagle on U.S. Shield affixed to the drag. The	
	steel has been strongly polished, showing remnants areas of cleaned pinprick pitting and cloudy spots of light burnished pewter patina; the	
	body has been restored to very fine bright condition, the blemishes	
	negligible until viewed closely. The mounts are excellent with slight wear	
	to bright brass at the edges, retaining strong beautiful gilt finish	
	particularly in the intricate detailing. The reverse face of the upper collar	
	is inscribed to "Capt. John W. Haaren". The 1872 Annual Report of the	
	Adjutant General of the State of New York lists a Capt. John W. Haaren	
	of the 3rd Cavalry Regiment of the New York National Guard; Capt.	
	Haaren's resignation from the service was accepted September 30th of that year. A wonderful Civil War-era sword exemplifying Tiffany & Co.'s	
	high standards of excellence. (12C9838-15) [Bruce Schroyer Collection]

	Kilgore		Rochat
	37" overall, 31 1/2" single-edged slightly curved spear point blade with		.50 cal., 9 1/4" octagon barrels with fine 16-groove rifling and bright very
	wide single fullers turning to double narrow fullers at the foible. Either		fine to near excellent bores which show just a bit of very light oxidation
	face of the blade is etched with 18" frosted panels depicting foliate		in the grooves. The barrels are lovely showing exceptional two tone
	sprays, panoplies of arms, "United States Marines" riband on either face and the name "Fred D. Kilgore" on the reverse face. The blade is bright		pewter gray and gray-blue damascus pattern their full lengths with a fev scattered areas of extremely light oxidation present which does not
	and excellent, showing few blemishes except traces of unobtrusive		detract from the lovely pattern. The breeches and tangs show some nic
	patina near the guard and some very fine-grained bubbling on the		smoky blue-gray color case-hardening, toning on the rear of each tang.
	obverse face which does little to detract from the clarity and beauty of		There are lovely fire blued fine bead front sights with fire blued u-notch
	the etching. The brass surfaces of the grip are lightly mottled with		rears mounted atop each tang. The top flat is maker marked "Vannod &
	cleaned tarnish and tones of verdigris staining. The ivory grips each		Rochat a Lausanne" surrounded by light borderline engraving. There is
	show several non-flexing cracks, one of which has been expertly		some excellent quality scroll on each tang and "1" and "2" are inlaid in
	filler-repaired. A leather sword knot hangs from the pommel and shows		gold on each tang and breech. The back action locks and hammers are
	a bit of light wear. The scabbard is nickeled steel in brass mounts, rating		a smoky case-hardened patina, the tops of each hammer with some
	near excellent with a bit of cloudiness in the finish and few handling		smoky blue-gray colors evident. Both show excellent quality open
	marks or blemishes of note. The ensemble comes in a soft leather		flowing scroll, the skirt of the hammer on gun No. 1 is chipped out. The
	carrying case in excellent condition with only a few handling scuffs from		triggerplate's front extensions show excellent quality open flowing scroll
	the years. According to the included research dossier compiled by a		as do the single spur triggerguards. The arms are stocked in a lovely
	previous owner, this sword belonged consecutively to no fewer than		grade of French walnut showing exquisite grain figure throughout with
	three distinguished United States Marines The sword was made for the		fabulous wraparound checkering patterns at the grip with tiny mullered
	inscribed Fred D. Kilgore, commissioned 2nd Lieutenant in the U.S.		borders. Barrels are keyed through German silver escutcheons to the
	Marine Corps on Oct. 23, 1903. Kilgore served in France during World		rear of the neat little schnabel tips and there are nice scalloped
	War I, then as Aide to then-Secretary of the Navy Franklin Delano		rosewood gripcaps with silver inserts at their centers. Each arm is
	Roosevelt himself. Kilgore was appointed Commanding Officer of the		equipped with a single set trigger and the guns seem to function well
	4th Marine Regiment in Shanghai, where he died of illness on May 15th,		mechanically. These come cased in a European walnut case with
	1933, having achieved the rank of Colonel. Kilgore's widow gifted the		French fitted green baize lining rating very fine overall. On the interior is
	sword to Lt. Col. Emile P. Moses, then serving as Executive Officer of		a very nice single cavity bullet mould, patch cutter with nice sunken "VR
	that regiment. Moses was eventually promoted to Brigadier General on		touchmark, a horn handled turn screw, loading rods, rod ends, horn
	Feb. 1, 1939 and acted as President of the Marine Corps Equipment		"spares" bottles (one with patches, the other nipples), small powder
	Board from May 1939-Sep 1941, during which time he oversaw such		flask, loading/disassembly mallet, a selection of cast projectiles and the
	projects as the Amtrak and Higgins boat; Moses retired as a Major General on May 1, 1944. Emile P. Moses Jr. was given the sword by his		key to the case. Vannod & Rochat were partners in Lausanne Switzerland from roughly 1839-1850 and were purveyors of very fine
	father upon his commission as 2nd Lt. in the U.S.M.C. on Sep. 5, 1941.		quality arms. This pair of pistols is certainly no exception and exhibit
	Moses Jr. participated in the Marshalls and Okinawa campaigns during		quality of craftsmanship throughout. (3D9654-13) {ANTIQUE}
	WWII, later made the landing at Inchon during the Korean War and		(3500/5000)
	stayed in Korea until August 1951. He assumed command of the		Est. 3,500 - 5,000
	Pioneer Bn. in Okinawa on Aug. 1st, 1958 until his retirement as Lt. Col.	511	German Model 640(b) High Power Semi-Auto Pistol by Fabrique
	on Jul. 1, 1962. Lt. Col. Moses Jr. took the sword with him for this		Nationale
	command, evidenced by the aircraft cabin tag still affixed to the leather		serial #92094a, 9mm, 4 11/16" WWII replacement barrel with a lightly
	case. Colonel Kilgore's sword was given to a (here unnamed) friend of		frosted bore. This barrel is serial numbered 59230 with "[Eagle] /
	Lt. Col. Moses, Jr. upon his death in 1988. Having accompanied three		WaA613" Waffenamt marks. The pistol displays the typical wartime
	remarkable Marines over 59 years of service and two World Wars, this		coarse finish with about 92% original blue remaining on the metal
	marvelous storied sword is an exquisite artifact of Marine Corps history,		surfaces showing light handling marks. The pistol also shows high edge
	not to be ignored. (12B9838-30). [Bruce Schroyer Collection]		wear, thinning finish on the grip frame and scattered light pitting with a
	(1500/2500)		few oxidation blemishes. The checkered walnut factory grips rate very
	Est. 1,500 - 2,500		good with light handling marks and slight darkening from oil soaking.
509	Unmarked Confederate Artillery Short Sword		The pistol features an internal extractor, ring hammer, round blade front
	This artillery footman's arm measures 23 1 /2" overall and features a 17		sight, drift adjustable standard rear sight and thumb print. It includes a
	3/4" double-edged spear point blade with an oval cross-section. The hilt		single factory magazine. The pistol's frame, slide and magazine are
	is cast brass with a 8 pattern grip and block letters "C" and "S" on the		marked with "[Eagle] / WaA140" Waffenamt marks. The markings
	side faces of the quillons. While the specific maker of this unmarked		remain crisp and the gun appears to function mechanically. The pistol
	sword remains unknown, the materials and features all appear correct and authentic to Confederate production. The years have toned the		includes a brown calf skin Browning High Power break away soft shell flap holster with "jkh / 43" stamped on the back (Carl Busse, Frabrik fue
	blade to an overall black mottled with dark ocher-brown patina		Ausruestungen aus Stoff u. Leder Manz, Kurfuerstenstr, 11). The holste
	throughout. Previous light cleanings have smoothed the surface so that		rates about fair with moderate wear on the high edges, limited crazing,
	only occasional remnants of oxidation texture remain visible under light.		several small holes and the stitching is generally strong with the bottom
	A few subtle polishing and maintenance marks can be seen beneath the		of the breakaway flap starting to fail and the belt loop completely
	age patina from a long-previous sharpening, as can several shallow		separated from the holster on the bottom rows of stitching. This gun has
	impact nicks in the otherwise fine sharp appleseed edges. The		seen some use over the years but remains in very good condition and a
	crossguard shows a tobacco patina on the faces with areas of coppery		fine wartime collectible. (8A9855-2) {C&R} (1500/2000)
	ocher at the quillons and hints of green verdigris in the lettering. The grip		Est. 1,500 - 2,000
	is worn bright from handling and the scales have somewhat softened but		
	still show the characteristic imperfections of the sand-casting process		
	common to Confederate arsenals. Numerous tiny handling marks can be		
	seen across the pommel, otherwise the hilt shows no major blemishes.		
	A well-kept Southern-made weapon in quite fine honest condition.		
	(12B9718-8). [Deaccessioned New Britain Youth Museum] (2000/3000)		
	Est. 2,000 - 3,000		

	.50 cal., 9 1/4" octagon barrels with fine 16-groove rifling and bright very fine to near excellent bores which show just a bit of very light oxidation in the grooves. (3B9606-66){C&R} (1800/2200) Est. 1,800 - 2,200 scattered light handling marks. The checkering remains intact and the stock displays some rather nice grain figure throughout. All visibly numbered parts are matching, barrel lock-up is solid on-face and the locks seem to function well mechanically. A very handsomely restored Remington Whitmore for the antique arms collector. (13C9362-99) {ANTIQUE} [Edward W. Marron, Jr. Collection] (1800/2200)		pewter patina, the ejector rod housing toned primarily to pewter along its outer edge with strong blue in the flutes. The cylinder is an even mix of fading original blue and a gun metal gray patina with a few light operational turn rings, the primary ring a bit more moderate. The frame retains about 95% original color case-hardening which is silvery in spots with some strong colors in others, with a bit of light freckling on the loading gate; a bit on the right rear flat as well. The grip frame is an even mix of pewter and fading gray-blue. The checkered hard rubber Rampant Colt grips rate very fine with good points and crisp images, the right grip with a prominent flake from its lower rear edge; they are stamp-numbered to the gun. The arm still times well and locks up properly, the front sight has been neatly removed and a dovetail professionally cut, many years ago, now holding a bead-style front sight which gives a nice sight picture. The included factory letter shows shipment in September of 1906 to the George Tritch Hardware Co in Denver along with 5 other guns, and verifies the configuration (except	523	on their interior. The gun locks up well and functions as it should mechanically. Really a beautiful 1902-manufactured 1877 Lightning that appears to have seen no use since leaving the blue dome, only a victim of light flaking, primarily on its frame. (39908-26) {C&R} (1500/2500) Est. 1,500 - 2,500 Fine Remington Whitmore Model 1876 Grade 3 Double Hammergun serial #615, 10 ga, 32" damascus barrels with bright near excellent bores. This shotgun has been very professionally restored, the barrels showing wonderful swirling damascus patterns throughout with just some minor thinning along the sides and some sparsely scattered pinprick pits. The frame and remaining small parts retain about 97% restored vibrant case-hardened colors, the lever toning slightly to a pleasant mild gray patina. The factory embellishments remain completely intact with nice foliate scrollwork and geometric border motifs, the E. Remington & Sons barrel address also remains intact and legible. Lot Title/Description

524 Excellent German Kar.88 Bolt Action Carbine by Erfurt 527 Hungarian 52M Mosin Nagant Bolt Action Sniper Rifle by FEG serial #7909f, 8mm Mauser, 17 1/2" barrel with a bright excellent bore. serial #BC4580, 7.62x54mmR, 29" barrel with a bright very good plus The blued surfaces of this wonderful 1893-dated carbine retain about bore showing some light oxidation and frosting in the grooves with 97-98% original blue showing some mild high edge wear along the otherwise strong rifling throughout. The metal surfaces of this triggerguard, a few errant light freckles and minor handling marks. The 1953-dated rifle retain about 97-98% original blue showing some small magazine cover plate shows some light oxidation staining and, along areas of light oxidation staining along the recesses of the scope mount, with the barrel band, has mostly toned to deep gray patina while the the mount and some smaller areas taking on a deep plum-brown tone nosecap retains about 95% original bright blue showing some light under bright light and some other minor handling marks. The bolt flaking and a little minor circumferential wear around the screw head. remains bright showing a few mild gray freckles. The scope is Hungarian-made of the Soviet PU style and retains about 95% original The receiver, bolt and buttplate remain in-the-white showing some very mild grav-brown freckling scattered about, a couple very tiny pinprick black enamel finish showing a few tiny flakes and handling marks. The pits and a few minor dings along the upper tang. The bolt release and a scope body is marked "41 / 1953 / 525811" with "4578" adjacent and number of screw heads show nice thinning fire blue and all markings "419760" on the bottom. The scope features a German style reticle and remain crisp and clear with the left side receiver wall stamped with somewhat cloudy but quite serviceable optics showing a few mild "n.m." designation, "S" chamber and "7,93" bore measurement on the occlusions. All other markings remain intact and crisp, the barrel shank left rear sight base. The walnut stock remains in near excellent condition stamped with "02" factory code, date, serial number and Rakosi-era retaining most of its arsenal oil finish and showing some scattered very acceptance stamp. The hardwood stock and handguard remain in very light dings and handling marks, concentrated a little more along the good plus condition showing a small 1" area of moderate scratches forend but very unobtrusive overall. The stock is un-numbered and behind the right side wrist, an area of light abrasions on either side of shows wonderful crisp cartouches along the toe line and right side. The the wrist and otherwise just some scattered lighter dings and handling bolt head is numbered "10" and the barrel band "69" but all other marks. The left side of the butt shows a series of what appear to be numbered parts are matching. This example is equipped with the some sort of Middle Eastern numerals lightly scratched in and the right spring-loaded clip ejector and the action seems to function well side butt shows a crisp arsenal circled "B" and "02" stamp. All of the mechanically. Really an extremely fine Kar.88, very rarely seen with serialized parts are matching and all components are stamped with the such strong condition, it would make an excellent addition to any appropriate "02" factory code including the mount. There do not appear advanced martial collection. (13C9807-179) {ANTIQUE} [Vincent to be any import marks, the action seems to function well mechanically Coniglio Collection] (1800/2200) and a set of leather scope covers and canvas sling with leather collars Est. 1.800 - 2.200 are included. A very fine example of these nicely-made Hungarian 525 Romanian SSG-97 Semi-Auto Sniper Rifle sniper rifles not often seen in this country. (13B9807-98) {C&R} [Vincent serial #F-0572, 7.62x54mmR, 24 1/2" barrel (26 1/2" overall including Coniglio Collection] (1800/2200) compensator) with a bright excellent bore. The metal surfaces of this Est. 1,800 - 2,200 528 Scarce Remington Model 1867 Navy Cadet Rolling Block Rifle PSL-style rifle retain about 97% original Parkerized finish showing a little minor operational wear, light handling marks and a few sparsely 50-45, 32 1/2" barrel with a mostly bright very good bore plus showing scattered specks of minor oxidation staining here and there. All some light pitting and frosting in the grooves and strong rifling markings remain intact and strong, the left side rear sight base showing throughout. The barrel of this rifle retains about 95% of an arsenal Inter-Ordnance import markings. The laminated hardwood pistolgrip quality reapplied dull blue-gray finish showing thinning to the underlying buttstock with Bakelite pistolgrip cap and the solid hardwood forend and deep plum-brown, a few scattered light dings and handling marks. The handguard remain in very good plus to very fine condition, the buttstock hammer, breechblock, action pins and nosecap are similar while the showing moderate overall crazing and light flaking of the factory varnish barrel bands and buttplate show flaking bright blue and the action pin along with a few light dings and handling marks. The magazine is retainer plate retains much of its brilliant fire blue. The action retains scratch-numbered to the gun and the action seems to function well about 90-92% lovely dark case-hardened colors mostly composed of mechanically. An original factory scope with stamp-numbered matching attractive deep purples and blues showing some scattered light handling mount is included along with a rubber eyepiece and cover. The screw marks, a little mild gray freckling and some muting along the tangs and heads on the mount show some light slot wear and there is a small plate right side. The receiver shows a crisp small anchor on the right edge, "P affixed to the rear arm marked "81100 / 00363 / 91-610". The scope / F.C.W." on the left and strong Remington's Ilion tang address, rates very fine showing some light handling marks and features strangely these frame markings are on reversed sides compared to range-finding reticle and the optics with moderate yellowing that other examples. The buttplate tang shows strong "US" along with a large otherwise remain completely serviceable. A solid example for the crisp "H / 168". The smooth walnut buttstock remains in about very good modern martial arms enthusiast. (13B9807-57) {MODERN} [Vincent plus condition as lightly cleaned long ago showing worn finish overall, Coniglio Collection] (1200/1800) some scattered light dings and mild wear at the toe. The forend is similar Est. 1,200 - 1,800 showing some light dings along the bottom and a tiny shallow chip along 526 German Gewehr 98 Bolt Action Rifle with Trench Cover by Mauser the left edge between the bands. An original cleaning rod that shows an Oberndorf arsenal-reapplied blue finish is included, the original sights are intact serial #3075c, 8mm Mauser, 29" barrel with a partially bright good bore and the action seems to function well mechanically. A very attractive showing a scattered light pitting, a few small areas a bit more moderate example of these desirable cadet rifles, only 498 of which were and otherwise strong rifling. This is a solid and honest all-matching produced, (13C9670-439) (ANTIQUE) [David & Lore Squier Collection] (1500/2000) 1917-dated Gew.98. The barrel has mostly toned to a deep brown patina showing some overall light oxidation staining and some scattered Est. 1.500 - 2.000 fine pinprick pitting. The action and bottom metal are similar showing bright areas mixed with brown freckling, light oxidation staining and some overall minor pinprick pitting. There is a moderate scuff along the right edge of the triggerguard and the screw heads show some slot wear but this is very unobtrusive. All markings remain intact and quite crisp. The trench cover has mostly toned to a dark gray patina showing areas of light oxidation staining and strong remnants of black enamel finish. The locking tab is bent slightly upwards and does not snap completely closed but this is to be expected. Both the cover and its base are maker-marked "W / CO / DRP" and both bear clear imperial inspector stamps. The smooth pistolgrip walnut stock and handguard remain in about very good condition showing a very thin 2" hairline crack at the upper tang, overall scattered light to perhaps moderate dings and abrasions. The stock actually shows some subtle and rather attractive tiger stripe grain figure through the butt, the buttstock is stamp-numbered matching and also retains very good imperial inspector stamps. An original cleaning rod is present and the action seems to function well mechanically. Also included is an original rather tired brown leather sling with quick detach swivel and a very good W. Kober & Co. Suhl muzzle cover. A solid Gew.98 with a scarce original trench cover that would make a fine addition to any martial collection. (13B9807-155) {C&R} [Vincent Coniglio Collection] (1200/1800) Est. 1,200 - 1,800

569	German K98k Bolt Action Rifle by Gustloff Werke	5	571	German K98k Bolt Action Rifle by Mauser Borsigwalde with Luftwaffe
	serial #1765t, 8mm Mauser, 24" barrel with a bright near excellent bore			Markings
	with a few scattered pinprick pits. The metal surfaces of this "bcd / 43"			serial #9753w, 8mm Mauser, 24" barrel with a very good bore with
	coded rifle retain about 50% original blue with the barrel, rear sight			scattered light pitting but strong rifling. The metal surfaces of this "243 /
	base, and receiver ring a gray patina with hints of original blue on the			1939" coded rifle are a gunmetal gray patina with generous remnants of
	receiver and remnants of blue in the protected areas and light overall			blue on the barrel bands, rear sight base, and barrel by the bayonet
	oxidation staining. The cupped buttplate has a smoky gray patina with			mount, intermittent light oxidation staining, and scattered light handling
	scattered light pitting, and the lower barrel band is reblued with			marks; the receiver ring is gunmetal gray but the rest of the receiver
	scattered pinprick pitting beneath the finish. The laminated hardwood			retains about 75% original blue with light wear on the high edges and
	stock is in very good plus condition as lightly cleaned with a duffle cut			contact points, scattered spots of light oxidation, and a spot perhaps
	beneath the lower handguard and scattered remnants of light handling			lightly cleaned. The bolt shows moderate operational wear, light wear on
	marks. The stock and handguard are unmarked. The receiver markings			the high edges, and the bolt handle and safety and are a gunmetal gray
	remain largely crisp and the barrel is marked with a lightly softened			patina. The laminated hardwood stock is in very good plus condition with
	Eagle firing proof and an "avk" subcontractor mark. The bolt assembly,			a few light dings, two small 1/2" to 3/4" cracks in the nose of the handguard, old remnants of an abrasion on the underside of the forend.
	rear sight, upper barrel band, triggerguard, and magazine floorplate are			
	serialized and matching to the rifle, the rear sight base is marked with a "18" waffenamt, and the remain parts appear to largely have the proper			and a few light impact marks. The stock is marked with a faint "(Eagle) / L" Luftwaffe mark on the right side, the "L" of which appears deeper
	"d", "e", and "1" markings; the follower is unmarked, and the bolt shroud is "ghn" subcontractor marked. The lower barrel band is a stamped			struck, above faint "WaA26" and "26" waffenamts, the inside of the pistolgrip is marked with faint "WaA26" and "26" waffenamts, a "P" is
ĺ	replacement, and is unmarked. The rifle is sighted with the standard			stamped behind the pistolgrip, and both stock and handguard are
1	barleycorn front sight and leaf rear sight, and appears to function well			serialized and matching to the rifle; the buttplate is marked with a small
	mechanically. Included with the rifle is a front sight hood and cleaning			"26" waffenamt and is serialized to the rifle, but the digits on the toe are
	rod. A nice piece of WWI history that would fit well in a collection.			mostly obscured. All parts are correct serialized and marked with
	(14A9736-23) {C&R} (1000/1500)			"WaA26" and "26" waffenamts, the majority remaining clear with some

Lot Title/Description

Marlin Special Order Model 1894 Deluxe Takedown Rifle serial #185116, 25-20, 26" octagon barrel with half magazine and a fair bore showing moderate oxidation and pitting throughout still with good rifling. The barrel and magazine of this rifle has mostly toned to a dark plum-brown patina showing a few areas of old light pitting and some scattered minor dings, a few more noticeable at the muzzle edges. The action is similar showing some generous silvery case-hardened patina throughout and wisps of vibrant colors in the protected areas. The bolt retains about 75% original bright blue flaking to dark brown and the loading gate retains strong fire blue around the edges. The screw heads show light slot wear and some of the markings have softened very slightly but otherwise remain completely intact and legible. The checkered pistolgrip walnut buttstock and forend remain in about very good plus condition retaining about 80-85% original varnish showing moderate flaking along the forend, a small hairline crack at the upper tang, scattered light dings and handling marks. The checkering shows moderate wear overall, there is a small crack along the tang inletting and the right side stock tab on the interior has broken off but remains retained when installed. Strangely, the buttplate has been replaced with a grooved steel Savage Model 1899 plate that actually fits very well and the buttstock is stamp-numbered matching the receiver. The rifle is sighted with a Marble's Sheard brass bead front that has been modified during the period of use and thinned out along the sides and a flattop sporting rear with replacement elevation slider. The trigger is a little stiff and the action otherwise seems to function well mechanically. An interesting special order rifle made around 1899. (13B9746-37) {C&R} (1000/1500)Est. 1,000 - 1,500

590	Smith Civil War Percussion Carbine by American Machine Works ID'd
	To The 2nd West Virginia Volunteer Cavalry
	serial #3788, .50 cal, 21 1/2" part octagon, part round barrel with a bright
	excellent bore showing some light oxidation near the breech. The barrel
	retains about 97% original blue, toning and fading evenly, with some
	scattered light oxidation, the left and lower side of the barrel showing
	some splotchy brown loss about 2" ahead of the forend, the rear left with
	"LFR" inspectors stamp. The frame and the barrel frame are a mottled
	smoky gray-blue original case-hardening mixing with some light
	oxidation staining and perhaps a couple very minor pinprick pits. The
	buttstock frame shows some excellent original pale fire temper blue, as
	does the triggerguard and the top spring, the top spring with a bit of light
	surface oxidation. The American walnut buttstock and forend both rate
	about excellent showing perhaps a few minor dings at the front edge of
	the forend and some scattered handling marks on the buttstock with a
	very good left side cartouche. Many of the screws show some good pale
	fire temper blue, the saddle ring is present and all of the numbers are
	matching on frame, barrel frame and the barrel. Barrel-to-frame lockup is
	tight and the lock functions very well mechanically. Springfield Research
	Service records show issue in 1863 to Co.H, 2nd West Virginia
	-
	Volunteer Cavalry, during the period that this carbine would have been
	in use they were very active in West Virginia and later Virginia itself and
	are important in Sheridan's Shenandoah Campaign. The original open
	sights are intact and this remains a very fine example of a Smith Civil
	War carbine, with what could actually be considered a shootable bore!

504	Est. 1,800 - 2,200
591	Unmarked Flintlock Halfstock Sporting Rifle With Spies Lock
	.54 cal, 36" heavy octagon barrel with an oxidized bore which shows
	some scattered light pitting and evident rifling. This is a rather heavy,
	late flintlock rifle, likely one that would've been destined for the Western
	plains during the time period. The barrel is primarily a warm plum tone
	with scattered light oxidation and the expected light dings and handling
	marks that come from a heavy duty field-used gun. It is sighted with a
	simple brass blade front sight and flattop v-notch rear, showing a bit of
	geometric border embellishment. There are light open sprays of
	engraving at the breech with a small band of geometric engraving and
	the tang shows simple relief open foliate engraving, its tang screw with a
	floral petal motif. The Spies lock shows some strong remnants of original
	bright blue and is stepped at its rear with the same open flowing foliate
	engraving, it is maker marked, features a waterproof pan and a bridled
	roller frizzen. Thimbles and tailpipes are simple, triggerguard has an
	engraved pineapple front extension and the square back bow shows
	very light engraving. The smooth iron buttstock shows a bit of floral and
	geometric engraving on its long upper tang. The gun is stocked in a very
	nice grade of American walnut showing some crotch figure in the butt,
	the expected overall light dings and handling marks and a number of
	drying cracks scattered about the surface through the highly figured
	wood. It has a nice horn forend tip and sprinkles of inlaid silver wire
	foliate decoration with the initials "TP" or perhaps "JP" inlaid on the right
	side rear of butt. The left stock flat shows three German silver inlays,
	one shield-shaped, one "food chopper" style and one circular, with
	another shield-shaped monogram plate atop the wrist, all are
	un-engraved. The lock is crisp and mechanically functional and there is
	an antique bone tipped ramrod included; there is no wedge present, the
	barrel retained only by a piece of flat steel. A quality-made, very
	heavy-duty rifle, strangely unsigned, that no doubt was destined for the
	Western frontier given its caliber. (3C9670-33) {ANTIQUE} [David &
	Lore Squier Collection] (1500/2000)

Lot Title/Description

594 Interesting Cased Pair of Belgian Double Action Percussion Target Pistols by J. J. Herman serial #19 & 22, .32 cal, 7 1/4" swamped octagon smoothbore barrels with oxidized bores. The barrel and cylinder of revolver No. 19 retain about 95% wonderful period restored brilliant bright blue with most of the loss due to some small flaked areas along the left side toning to mild brown patina, light handling marks and a little old oxidation staining along the rear of the cylinder. The frame and barrel catch have mostly toned to pewter gunmetal patina showing some remnants of cleaned light pitting along the edges near the cylinder and the inside of the triggerguard with faint smoky case-hardened colors. The frame is embellished in near full coverage with fine quality foliate scrollwork, a lovely sunburst motif at the top forward edge and is marked in a small oval "J. J. HERMAN / BREVETE". Some of the screw heads show light slot wear and the trigger retains a healthy amount of fire blue. The mounting point for the barrel catch is an older nice quality replacement. The smooth rosewood grip remains in very fine condition as nicely refinished long ago showing a few small gaps where is meets the metal, some light handling marks and a 2" ovoid area on the left side that has been expertly repaired and patched with a separate piece of rosewood. The large lever on the underside has a small locator peg which secures the barrel to the frame, depressing it allows the barrel to rotate up for removal of the six-shot cylinder, the double action only mechanism utilizes an internal hammer and the cylinder revolves along a rotating arbor. The action is a little bit stiff but otherwise seems to function well mechanically and the pistol is sighted with a small blade front sight and shallow u-notch rear. The barrel and cylinder of revolver No. 22 retain about 92% brilliant bright blue with light flaking to gray-brown patina along the top and muzzle of the barrel and the cylinder showing some light scratches and a few small areas of moderate oxidation staining along the back edge. The frame is similar to the first pistol showing a little scattered pinprick pitting and some smoky case-hardening and silvery patina in the protected areas. There is a small chip at the forward right corner and another small u-shaped chip atop the frame where the rear sight has broken away. The frame embellishments are a little bit different, composed entirely of lovely foliate scrollwork and lacking the sunburst motif. The top of the frame is identically marked and the trigger retains strong fire blue. The mounting point for the barrel catch is also of a different design and no doubt the original equipment, the lever locks into the frame with a square peg rather than round like the first pistol, the front sight design is slightly different as well and the cylinders are different lengths (1 7/16" on No. 19 and 1 5/8" on No. 22). The smooth rosewood grip is similar to the first pistol showing a couple thin repaired drying cracks and a small patch on the left side near the base. The action seems to function well mechanically. Each revolver includes a spare numbered cylinder retaining about 95% bright blue showing some light operational wear and sparsely scattered pinprick pits. Also included are two steel cylindrical tools measuring 4 1/4" and numbered "03" whose purpose is unknown and a more modern-made custom mahogany case that rates very fine showing some light dings along the exterior and the interior green baize with some light wear. The bottom of the case is fitted with three brass lion paw stands, one having been lost. A very handsome and interesting pair of Belgian percussion pistols. (13C9899-28) {ANTIQUE} (1800/2200) Est. 1.800 - 2.200 595 Colt Model 1849 Pocket Percussion Revolver serial #130194, .31 cal, 4" octagon barrel with a partially bright good bore showing scattered light pitting and oxidation with strong rifling throughout. The barrel of this 1857-made revolver retains about 85% original bright blue flaking to a mild gray-brown patina showing a little minor pinprick pitting along the edges and scattered light dings. The two-line New York barrel address remains crisp and clear. The five-shot cylinder has mostly flaked to a mild gray patina showing some scattered pinprick pits, some light dings and remnants of original bright blue, the cylinder scene is very nice remaining almost entirely intact and quite crisp. The frame and loading lever are toning to a pleasant silvery gray case-hardened patina showing some mild gray-brown speckling and a few patches of vibrant colors in the protected areas. Some of the screw heads show light slot wear and a number of them retain good fire blue along their edges, the wedge and trigger also with some good remnants of fire blue. The triggerguard and backstrap show evidence of an old light cleaning and retain about 90% of a period reapplied silver finish that remains mostly bright showing some thinning to mild ocher brass. The smooth walnut grip is ink-numbered to the gun and remains in very good plus condition as lightly refinished long ago showing two small filled notches at the edge of the right side, some scattered light dings and mild edge wear. All of the serialized parts are matching including the wedge and the action seems to function well mechanically with solid timing and lock-up. A very respectable 1849 Pocket. (13B9833-79) {ANTIQUE} (1200/1800) Est. 1,200 - 1,800

596	Colt Pocket Model of Navy Caliber Percussion Revolver serial #10114, .36 cal, 4 1/2" octagon barrel with a bright very good bore showing some scattered light pitting and mild oxidation with strong rifling throughout. The barrel, cylinder and loading lever of this 1862-made revolver are toning to a mottled gray-brown patina showing evidence of an old light cleaning with some remnants of smoothed-over pinprick pitting, a few light dings and handling marks. The frame is a similar dark gray tone showing some scattered old pitting and some faint case-hardened colors along the right side. The triggerguard and backstrap have toned to a nice ocher patina showing some scattered light handling marks and some remnants of tarnished silver finish around the triggerguard. The New York barrel address and "COLTS PATENT" on the frame and cylinder are soft but mostly legible, the cylinder scene is still quite nice and the triggerguard shows strong caliber designation. The smooth walnut grip is ink-numbered to the gun and remains in about very fine condition retaining about 90% original varnish showing some mild flaking, edge wear and light handling marks with excellent fit to the frame. The loading lever is un-numbered and all of the serialized parts are matching including the wedge. The action seems to function well mechanically with excellent timing and lock-up. A solid example of these interesting and somewhat obscure Colt revolvers. (13B9833-85) {ANTIQUE} (1000/1500)
597	Attractive Pair of Belgian Percussion Muff Pistols by Francotte with
	Original Case .47 cal, 2 14" damascus octagon barrels with near excellent bores showing fine straight rifling. The barrels of these little pistols retain strong remnants of swirling blue-gray damascus patterns toning overall to a mild gray gunmetal patina along with some mild brown speckling and light handling marks. The hammers and frames retain a healthy amount of vibrant case-hardened colors toning to a pleasant gray case-hardened patina. The frame screw heads show light slot wear and the side of one hammer shows a small buff mark but this is unobtrusive. The nipple bolsters are nicely sculpted and the arms feature lovely finely detailed foliate scrollwork in near full coverage along the frames, the buttcaps also with a nice foliate motif. The breeches show a crisp antique Belgian proof mark, matching assembly number "4" on the bottom along with "(Crown) / AF" Auguste Francotte maker mark. The pistols are fitted with a set of handsome smooth antique ivory grips that rate about good showing moderate cracks along the sides, some light chips where they meet the frames and other more minor handling marks. They otherwise show attractive age striations and a nice mellow patina. The pistols are housed in their scarce original fitted case that shows a lovely textured red Moroccan kidskin outer covering that remains mostly intact showing some edge wear, light flaking and a few small areas of staining. The lid has detached from the base, now held on by a maroon piece of tape, and the catches are missing. The base retains almost all of its dark green paper covering and the lid shows some very fine gold filigree along the edge. The interior base is lined in a nice blue velvet while the lid is lined in fine silk showing some mild fraying and minor staining, the periphery also with a nice blue and white textured paper border. Also included is a wonderful original multi-tool matching the guns by assembly number "4" and retaining about 90% attractive case-hardened colors showing some very light
598	Cased Blunt & Syms Underhammer Percussion Pepperbox Pistol
	serial #32, .31 cal, 4 1/2" ribbed six-barrel cluster with lightly oxidized smoothbores. The barrel cluster of this pistol has mostly toned to a mottled deep gray and gray-brown patina showing a few light handling marks and some very minor pinprick pitting. The muzzle of the cluster is stamped "R-C" along with matching serial number. The frame has toned to a pewter gunmetal patina showing some remnants of smoothed-over old pitting and the factory foliate scrollwork embellishments remain intact and strong. The smooth walnut grips remain in very fine condition showing on older added varnish and some scattered light dings, otherwise retaining excellent fit to the frame. The included period mahogany case rates about very good plus retaining strong antique varnish and showing some scattered light dings and a few moderate full-length splits across the lid. The interior is lined with maroon baize that has faded to a pale brown tone showing some light staining and scuffs. The case holds a key, single cavity round ball mould with integral cleaning jag, a simple brass flask, attractive ebony handle nipple wrench with screw-in nipple pick and a partial japanned tin of Eley caps, the
	accessories all rating very good plus to very fine. A very attractive

ensemble for the antique arms collector. (13A9833-71) {ANTIQUE}

Lot Title/Description

599 Rare Savage Model 1899-A Lever Action Rifle with Utica Bureau of Police Markings serial #18.350, 30-30, 26" round barrel with a bright near excellent bore showing a hint of mild frosting in the grooves and strong rifling throughout. The barrel of this rifle retains perhaps 60-65% original blue thinning and toning to a mild gray patina overall showing some scattered light handling marks, mild freckling and some light pitting along the sides nearer the muzzle. The action has mostly toned to pewter gunmetal patina showing some scattered fine scratches and evidence of an old light cleaning with remnants of pinprick pitting here and there. The rear protected edges of the frame show good original bright blue with the lower tang also retaining almost all of its original bright blue. The bolt, exterior of the lever and buttplate are similar to the frame, the left side and protected areas of the lever retaining a healthy amount of vibrant case-hardened colors. All marking remain intact and strong with the barrel showing proper address and patent dates with "CAL. 30" and "SAV 30" near the breech. The left side of the action shows a wonderful and quite elaborate police marking "DEP'T - PUBLIC - SAFETY / BUREAU / OF POLICE / UTICA, N.Y." along with small rack number "50". The smooth walnut buttstock and schnabel forend remain in about good-very good condition showing a little bit of older added varnish and the buttstock showing a number of lengthy thin repaired cracks along either flat and at the upper tang, thin u-shaped crack along the toe line. a thin sliver missing along the right edge of the forend and some overall light dings. The buttplate, buttstock and forend are all stamp-numbered matching the frame and both sides of the butt are also police-marked with large "DPS / UTICA, N. Y." on the right side and a monogram of "DPS / BOP" on the left. The rifle is sighted with a flattop sporting rear sight, large German silver blade and the action seems to function well mechanically. A solid rifle with extremely rare police markings, like many police guns it certainly has a lot of character but appears to have been fired very little. Included is a photocopy of a Savage factory letter confirming the configuration and showing shipment in 1900 to Clark Horrocks & Co. of Utica. New York: it was later returned to the factory in December of 1921 by A.W. Pickard for unknown work, work order number 7190. "Captain" Arthur Picard was elected sheriff in 1919 and served in both 1920 and 1921 as the sheriff of Utica, New York and presided over the Oneida County Jail, Utica being the county seat. One might imagine there was a bit of hometown pride to equip the local police with the new and improved Model 1899 rifle made in their very own city. This rifle would make an excellent addition to any advanced Savage or police arms collection. (13C9808-18) {C&R} (1200/1800) Est. 1.200 - 1.800 Winchester Model 1873 Special Order Lever Action Rifle 600 serial #218475B, 44 WCF, 24" round barrel with button magazine and a bright very good plus bore showing a little minor frosting and a few scattered pinprick pits with otherwise strong rifling throughout. The barrel of this 1886-made rifle has mostly toned a mild gunmetal patina showing some scattered smaller areas of plum-brown, some light dings around the front sight dovetail, specks of old oxidation staining and some original blue around the rear sight. There is a small but moderate ding along the bottom outside edge near the muzzle that does not impinge on the bore. The action retains a generous amount of attractive silvery case-hardened patina throughout flaking to gunmetal gray and showing a few scattered small dings, some fine scratches and other handling marks. There are some hints of smoky colors lurking about the protected edges around the sideplates, the hammer also retaining some faint colors. A couple of screw heads show some very light slot wear and the loading gate retains a healthy amount of bright fire blue. All markings remain intact and strong, the cartridge lifter toning to a pale ocher patina and retaining a clear caliber marking. The plain walnut stocks remain in very good condition as lightly cleaned and refinished showing a very tiny drying crack on the right side where the buttstock meets the frame, some scattered light dings and mild handling marks. The rifle is sighted with standard sporting rear sight, a more modern replacement German silver blade and the action seems to function well mechanically. A very good 1873 with a nice bore. (13B9746-53) {ANTIQUE} (1800/2200) Est. 1,800 - 2,200

1000	Smith & Wesson Fourth Model Single Shot Straight Line Target Pistol
	serial #1558, 22 LR, 10" side swing barrel with a bright excellent bore.
	This pistol remains in beautiful condition with about 99% original rich
	blue finish showing a very tiny scratch at the muzzle. The smooth walnut
	factory grips feature silver S&W medallions and remain in excellent condition. The front sight was customized to an interesting small round
	"peep" with serrated edge neatly attached to the original front sight
	blade and pinned to the base. The adjustable rear sight is present but
	the slider (blade) is not, a very minor part. The barrel and grips are
	correctly numbered to the gun, barrel to frame fit is as tight as the day it
	left Smith & Wesson and the action remains crisp. The pistol includes
	the blued steel case with crisp embossed S&W logo on the cover that
	rates excellent on the exterior retaining about 99% original finish
	showing a few light storage marks and dents. The cover has later added
	thin foam inside but the French fit bottom retains the original felt lining
	showing light storage wear. Accessories include the sight adjustment
	tool and a replacement two-piece cleaning rod. A beautiful Fourth Model
	for the serious Smith & Wesson collector. (8B9908-19) {C&R} (2200/2800)
	Est. 2,200 - 2,800
1001	Harrington & Richardson U.S.R.A. Model Single Shot Target Pistol
	serial #2393, 22 LR, 7" barrel with an excellent bore. This later variation
	pistol remains in very good to excellent condition with the metal surfaces
	retaining about 95% original blue, the grooved frontstrap starting to thin
	from handling, sparse handling marks and a splatter of freckling on the
	sides and top of the barrel. The straight grooved trigger and hammer are
	bright with a few stains from oxidation. The checkered one-piece
	wrap-around walnut factory grips rate near excellent with light handling
	marks and robust diamond points. This gun features a flat barrel latch,
	flat plate ejector, elevation adjustable undercut Patridge front sight,
	elevation adjustable rear sight and trigger adjustment in the front bow of the triggerguard. Barrel to frame fit is tight, the barrel is correctly
	numbered to the gun and the action seems to function well
	mechanically. The designation of later variations of this pistol where
	changed and simply marked "U.S.R.A. Model" on the barrel flat, the
	Model 195 designation omitted. This gun is very collectible but could still
	enjoy careful use at the range. (8A9887-17) {C&R} (1000/1500)

Title/Description Lot

1031	Extremely Rare and Consecutively Numbered Browning Collectors Association Medalist Renaissance Pistol serial #655PT00024, 22 LR, 6 3/4" ventilated rib barrel with an excellent	1036
	bore. This pistol is Consecutively numbered with the previous lot, only	
	60 pistols were produced in a limited edition run in 1986. These pistols	
	were exclusively offered to BCA members and were full-coverage Renaissance-engraved by different masters at the FN Custom Shop in	
	Liege, Belgium. The metal surfaces retain 99% plus original satin nickel	
	and display intricate flowing scroll and black ink shading throughout with	
	"24/60" on the underside of the triggerguard. The work was done by	
	"R.WILMOTTE", their signature is just behind the top of the grip on the left-side frame. While each of these special edition pistols is engraved in	1037
	the Renaissance style and pattern, each engraver put their own unique	
	touches to their respective gun, making them "the same but different".	
	The checkered and carved walnut target stocks and forend are excellent	
	plus with their own small flares of flowing scroll and punch-dot shading with a left-side thumb rest and flared extended mag well. The pistol	
	comes with a single nickel-plated factory magazine, original hard case	
	with matching end label, an excellent condition fitted burgundy	
	luggage-style case and a letter from Browning detailing this pistol's	
	rarity. An overall excellent plus rare and functional piece of art that would look even better if coupled with its sequentially-numbered mate	
	from the previous lot. (22D9821-3) {C&R} (5000/7000)	
	Est. 5,000 - 7,000	1038
1032	Rare Browning Gold Classic Hi Power Pistol	
	serial #245GC437, 9mm, 4 5/8" barrel with an excellent bore. This Hi Power is one of 500 pistols produced, the left-side of frame is marked	
	"437 OF FIVE HUNDRED", the right "BROWNING GOLD CLASSIC".	
	The metal surfaces retain 99% plus original satin nickel and have been	
	intricately engraved and signed by "J.M.BOULANGER" with loose	
	flowing scroll with black background. There are also several gold accents, forward-facing eagle heads are found on each side of the slide	
	near the muzzle, John Browning's visage just in front of the rear sight	
	and a bald eagle and lynx engaged in mortal combat to the front of the	
	ejection port. There is some very light and unobtrusive gold loss on the	
	forward eagles and the gold trigger retains all its original finish. The checkered walnut grip panels are excellent with a line and circle border	
	and a small sprays of scroll with a stippled punch-dot background on the	
	bottom third of each panel. The standard sights are fixed and a single	
	near excellent condition nickel-plated magazine is included. Included is the original fitted oak display case with slightly-tattered outer sleeve	1039
	showing a full-color eagle and lynx battle scene in a small oval.	1059

1033	Scarce Browning Challenger Gold Line Semi-Auto Pistol serial #23439U3, 22 LR, 6 3/4" barrel with an excellent bore. The metal	
	surfaces retain 99% plus original blue with fine gold line embellishments	
	throughout the frame, along the slide and around the triggerguard, the	
	serrated trigger is also gold and retains all its original finish. The	
	wraparound checkered walnut factory grips are excellent with a lovely floral scroll pattern and punch-dot shading at the top, small circle and	
	fine line border and some nicely-contrasting figure. The pistol is	1040
	equipped with an adjustable rear sight, a tall blade front sight and comes	
	with a single factory magazine. Only 146 guns were produced with 6	
	3/4" barrels, a rare opportunity to own one of these scarce Browning pistols. (22B9821-5) {C&R} (2000/3000)	
	Est. 2,000 - 3,000	
1034	Rare Browning Challenger Renaissance Semi-Auto Pistol	
	serial #40549U71, 22 LR, 4 1/2" barrel with an excellent bore. Only 437	
	of these Challenger Renaissance pistols were produced, with just 121 having 4 1/2" barrels. The metal surfaces retain 99% plus original satin	
	nickel and the serrated trigger still has all its original gold plate. The	
	Renaissance engraving consists of foliate scroll and punch-dot shading	
	found on the frame and slide and fine line engraving running along the	
	bottom of the undercut serrated front sight base. The checkered walnut one piece grip is excellent with the foliate scroll pattern continued at the	
	top, the checkering with circle pattern border wrapping around the back	
	and the smooth sections having a deep rich gloss finish. The pistol is	1041
	any inpaduith a standard Challenger adjustable year sight and some	
	equipped with a standard Challenger adjustable rear sight and comes

1036	Browning Hi Power Renaissance Semi-Auto Pistol serial #T240784, 9mm, 4 5/8" barrel with an excellent bore. The engraved metal surfaces of this 1968-made ring hammer pistol retain 99% plus original satin nickel and have been expertly-embellished with crisp floral scroll patterns throughout. The trigger retains all its original gold plate. The smooth mother-of-pearl grips are excellent with a mild yellow tinge at the top of each panel. Included are an excellent condition satin nickel factory magazine and a factory leather zipper pouch. John Browning's most popular 9mm pistol transformed into a wonderful piece of art. (22B9821-7) {C&R} (3000/4000) Est. 3,000 - 4,000
1037	Browning Citori Lightning Grade I Over Under Shotgun serial #17010PP783, 410 Bore, 28" ventilated rib barrels choked modified (**) and full (*) with excellent bores. The metal surfaces retain 99% original blue with crisp standard Grade I scroll engraving on the frame and the gold trigger showing some slight wear to silver on its right-side. The checkered walnut round-knob pistolgrip buttstock and forend are excellent, a series of very shallow and mostly-unobtrusive drag marks on the left-side but being the only notable blemishes. The trigger is single selective, the ejectors are strong and the safety is non-automatic. A nice, light smallbore in overall near excellent condition. (22A9740-4) {MODERN} (1000/1500) Est. 1,000 - 1,500
1038	Scarce Browning Superposed Superlight Grade I Over Under Shotgun serial #223PX02458, 20 ga., 26 1/2" ventilated rib barrels choked improved cylinder (**-) and modified (**) with excellent bores. The metal surfaces retain 99% original blue, the frame features better-than-typical Grade I engraving with crisp flowing scroll and pattern borders. The checkered select walnut straight grip buttstock with hard rubber buttplate and schnabel-style forend are excellent, there are just a couple very small handling marks and a couple miniscule blemishes in the lacquer. The wood figure is fantastic with iridescent fiddleback grain pattern running perpendicular to the more prominent grain coming down from the comb. This 1983-manufactured shotgun features a non-automatic safety, 2 3/4" chambers, a 14 1/4" length-of-pull with drops of 1 1/4" and 2 1/4" and a single selective trigger retaining all its original gold plate. This 'revival" of the Grade I Superposed only lasted for three years, 1983-86, this is an overall excellent and relatively scarce example from the first year of production. (22B9821-11) {MODERN} (3500/5000) Est. 3,500 - 5,000
1039	Winchester Model 61 Slide Action Rifle serial #250250, 22 S, L, LR, 24" barrel with an excellent bore. The metal surfaces retain 99% strong original blue with some very minor blemishes and faint freckles, the bolt body is mostly-bright. The smooth walnut buttstock with checkered steel buttplate and 17-groove forend are excellent with some sparse, tiny handling marks, this rifle is in pristine condition. This Winchester was manufactured in 1957, the receiver is grooved for rings, the rear sight is a 32B sporting, the front is a small silver bead. A very nice later-production rifle with a neat serial number. (22B9789-52) (C&R) (1000/1500) Est. 1,000 - 1,500
1040	Vonderful Colt Factory Engraved Diamondback Revolver serial #R53484, 22 LR, 6" ventilated rib barrel with an excellent likely unfired bore. The metal surfaces have been nicely Class D engraved with near 100% coverage classic American scroll and attractive accents inside the flutes and along the rib. The metal surfaces retain 99% plus deep original royal blue with a Journeyman "COLT ENG" stamp visible on the interior left-side grip frame at the heel. This 1979-manufactured Diamondback is equipped with a pinned ramp-style front sight and an Accro adjustable blade rear. The checkered walnut Custom Shop diamond stocks with gold Rampant Colt medallions are excellent plus, they are numbered to an earlier R-Series revolver but only serve to compliment the look and feel of the revolver with their custom checkering pattern and slightly-rounded butt. An exceptional mint-condition factory-engraved Colt with serious investment potential. (22D9821-6) {MODERN} (6000/8000) Est. 6,000 - 8,000
1041	Excellent Colt Python Double Action Revolver serial #E57890, 357 Magnum, 4" ventilated rib barrel with an excellent bore. This 1973-manufactured revolver's metal surfaces, including the trigger and hammer, retain 99% plus original bright nickel. The factory second-style checkered walnut grips with gold Rampant Colt medallions are excellent. This Python is outfitted with a two-pin serrated ramp front sight and an adjustable Accro "humpback" rear square-notch blade. These bright nickel Pythons are extremely desirable and attractive, this revolver is a high-condition firearm collector's dream-come-true. (22B9901-1) {MODERN} (2500/4000) Est. 2,500 - 4,000

1047 Colt John Wayne "The Duke" Commemorative Single Action Revolver 1050 Barrett Manufacturing M82A1 Semi-Auto Rifle serial #4069, 50 BMG, 29" fluted barrel with factory muzzlebrake and an Set serial #CJWC0306 & G210469, 45 Colt & 22 LR, 4 3/4" & 4 3/8" barrels excellent bore. For all 50 cal shooters and those who desire to be, this is with bright excellent bores. The first revolver is a lovely third generation the one. When it comes to 50 cal service rifles one name stands above Single Action Army that retains about 98% full royal blue finish showing the rest, Barrett. Whether its intended use is for military long range a few very small areas of pinprick pitting on the ejector rod housing and defense or casual civilian target shooting Barrett is widely known for cylinder plus tiny handling marks on the left recoil shield. The gun has putting the same quality and workmanship to all products bearing their name. The semi-automatic M82A1 with its detachable magazine is beautiful two-piece factory ivory grips that are in excellent condition with a coffee-cream color, the right panel is slightly darker and has streaks of certainly no exception and is perhaps the most desired of these big-bore services rifles. Known in the U.S. Military as the M107, this civilian red highlights running through it. The gun has wedges of loose scroll engraving on the both sides of the rear frame and right side of the version of the "Light 50" is identical to the military issued models, only barrel. Gold leaf embellishments adorn the gun with a prominent Federal the model name is different. The metal surfaces retain between 95-97% Eagle with outstretched wings holding a banner with "JOHN WAYNE" original parkerized finish that has some light handling marks and has inside it, both ends of the unfluted cylinder are edged with gold leaf wire areas of light oxidation and some light fouling that is noticeable in the rope, John Wayne's bust is on one side of the cylinder and he is riding corners of the muzzlebrake. A very simple yet incredibly rugged design his horse on the opposite side. The backstrap has Mr. Wayne's the rifle features an AR style Ergo black polymer textured grip and has a signature with his iconic Red River D brand on the knuckle. The second solid rubber buttplate with single point height adjustment. An integral gun is a Colt New Frontier 22 Scout revolver that retains about 99% folding bipod is installed to the underside of the forend and the factory original blue, nickel plate and case-hardened colors. The base pin, folding sights remain intact. The original carry handle is not present but hammer, trigger and ejector rod are high polish nickel plate to accent the should be a quick and easy item to replace. Mounted is a factory-marked Swarovski 10X42 Habicht riflescope, one of the few rich blue colors and coordinate with the silver leaf markings. The checkered synthetic factory grips feature a Rampant Colt in an oval with optics that are capable of handling the function of this large caliber rifle. a Federal Eagle at the butt of each panel and they rate excellent. The Made specifically for this arm, the scope features a 50 cal rangefinding left side of the barrel has a silver leaf banner with "JOHN WAYNE" reticle and has bright, excellent optics. Two factory detachable above the banner and "THE DUKE" inside the banner. The right side of magazines are included. If you have been holding out on buying a big the barrel is marked "NEW FRONTIER .22". This commemorative has a 50, waiting for the right time to own one on the best and most desirable different twist from the normal New Frontier, the front sight is the round rifles of this caliber, stop waiting. This is your chance to own one of blade Peacemaker style in lieu of the serrated ramp normally found but it these classic examples of pure might. 1162	Smith & Wesson Model 25-3 125th Anniversary Heavy Target Revolver	
	Identified to Herb Belin Smith & Wesson Manager of Product Innovation	
	serial #S&W0033, 45 Colt, 6 1/2" pinned heavy barrel with an excellent	
	bore. This lovely revolver was produced in 1977 to commemorate 125	
	years of Smith & Wesson and initially sold to Mr. Herb Belin Manager of Product Innovation at Smith & Wesson with an assigned serial number	
	of 33. It remains in excellent unfired condition and retains about 99%	
	original blue finish with a few minor handling marks. The .500" target	-
	hammer and .500" target trigger retain beautiful case-hardened colors	
	with light operational wear. The revolver features smooth goncalo alves	
	target grips with silver S&W medallions that rate excellent. The revolver	
	features a red ramp front sight, white outline micro adjustable rear sight, the right side of the barrel is marked "SMITH & WESSON / 125TH	
	ANNIVERSARY", the sideplate has the S&W logo with "SMITH &	
	WESSON / 1852-1977" across the top of the logo with "125 YEARS [in a	
	banner]" across the bottom plus the sideplate and barrel markings are	
	gold filled. The revolver includes a walnut presentation case with a brass	
	plaque on the cover marked with the anniversary model information, the	
	case shows minor exterior storage marks but rate excellent overall. The interior is blue velvet lined, the bottom French fitted for the revolver and	
	an anniversary coin (not included). The cardboard backings for the book	
	recess is loose and falls out if not handled carefully but should be an	
	easy fix. The book 125 Years with Smith & Wesson by Roy Jinks is	Ī
	included, the inside cover has a personal message written to Herb Belin	
	and remains in excellent condition. This is a lovely commemorative	
	revolver with some interesting provenance. (8A9864-4) {C&R}	
	(1000/1500) Est. 1,000 - 1,500	
1163	U.S. Historical Society Sam Houston Commemorative Walker	
	Percussion Revolver	
	serial #234, .44 cal., 9" barrel with an excellent bore. This stunning	
	revolver is a reproduction of the Colt Model 1847 Walker revolver with	
	beautiful embellishments to celebrate Sam Houston. The metal surfaces	
	retain about 99% blue and gold plate finishes and the high polish brass grip frame rates excellent. The smooth walnut grip rates excellent and	
	features a single gold medallion on the left side with the bust of Sam	
	Houston. The sides of the barrel, top of the barrel and loading lever	
	have wedges of gold leaf scroll. Both sides of the frame have identical	
	gold leaf outlines of the State of Texas with a Texas star in addition to	
	light scroll, quiver of arrows and a tomahawk. The gold plate cylinder	
	has a blackened background with gold leaf figures of Sam Houston's bust, the Alamo, seal of the State of Texas and a Texan at San Jacinto	
	in 1836. The walnut presentation case rates excellent and features a	
	leather insert with the bust of Sam Houston on the cover and folding	
	brass handles on the sides. The interior is French fitted for the revolver	
	and accessories with two small compartments, all red velvet lined and in	
	excellent condition. Also included are a Walker style brass flask, nipple	
	wrench, cap tin, brass conical ball mould, white cotton examination	

1104	Coli r2sti Athityersary Single Action Army Revolver serial #4917AM, 45 Colt, 7 1/2" barrel with an excellent bore. This attractive revolver retains about 99% royal blue and gold plate with a few minor handling marks. The grip frame, hammer, trigger, ejector rod head, grip screw and base pin have lovely gold plate to highlight the rich royal blue finish. The smooth walnut factory grips with gold Rampant Colt medallions are numbered to the gun and remain in excellent condition. The left side of the barrel is marked "-125th ANNIVERSARY S.A.A. MODEL .45 CAL" with patent dates and Rampant Colt on the frame. The revolver is displayed in a hardwood presentation case with French fitted red crushed velvet lining. The case rates excellent on the exterior with light storage marks and a paint transfer scuff on the right side. The interior rates about excellent. The gun also includes a single two-sided Colt coin celebrating the 125th anniversary on one side and Colt logos on the other with the dates "1836 / 1961". A tastefully adorned Second Generation Single Action Army in excellent unfired condition. (8A9795-2) {C&R} (1000/1500) Est. 1,000 - 1,500
1165	Colt Python Double Action Revolver
1166	serial #74160E, 357 Magnum, 6" ventilated rib full lug barrel with an excellent bore. This lovely Python has seen light use and remains in excellent condition. The metal surfaces retain about 98% original Colt royal blue finish showing light feathered scuffing on the bottom of the barrel lug, frame forward of the triggerguard and bow of guard. The service trigger and target hammer retain full factory blue with bright sides on the hammer showing light operational wear. The checkered walnut factory target grips with gold Rampant Colt medallions rate excellent. The revolver features a serrated ramp front sight, black blade adjustable Colt Accro rear sight and it still times and locks up as good as the day it left Colt in 1977. An excellent example of Colt's famous snake gun. (8A9871-5) {MODERN} (2000/3000) Est. 2,000 - 3,000
1166	Colt Python Double Action Revolver serial #K90245, 357 Magnum, 4" ventilated rib full lug barrel with an
	excellent bore. This fine revolver remains in excellent condition. The metal surfaces retain about 98% original Colt royal blue finish with light high edge wear most prominent at the muzzle and remnants of some fine surface oxidation on the rear of the sideplate formerly covered by the factory grip. The service trigger and hammer retain full blue, the bright sides of the hammer have slight staining and operational marks. The replacement checkered rubber Pachmayr Gripper grips with Pachmayr medallions rate excellent. This revolver features a serrated ramp front sight, black blade Colt Accro rear sight and it still times and locks up as good as the day it left Colt in 1982. This gun has seen some light use but remains in great condition. (8A9882-15) {MODERN} (2000/3000) Est. 2.000 - 3.000
1167	Colt Third Generation Single Action Army Revolver
1169	serial #98644SA, 44 Special, 7 1/2" barrel with a bright excellent bore. This beautiful revolver remains in great condition and has only seen light use. The metal surfaces retain about 98-99% original blue and case-hardened finishes showing light handling marks and edge wear. The frame retains the beautiful case-hardened colors Colt is known for. The checkered synthetic factory grips are in excellent condition and feature a Rampant Colt in an oval with a Federal Eagle at the butt of each panel. The grips and all appropriate parts are correctly numbered to the gun and it still times and locks up as good as the day it left Colt in 1978. The Single Action Army is one of those timeless collectibles that always bring strong interest. (8A9854-6) {MODERN} (1200/1800) Est. 1,200 - 1,800
1168	Colt Third Generation Single Action Army Revolver serial #SA44650, 44 Special, 7 1/2" barrel with a bright excellent bore.
	This fine revolver retains about 96% original blue and case-hardened finishes, the greatest loss is to the front strap which was lightly cleaned to pewter in addition to scattered light high edge wear and handling marks. The frame retains a beautiful mottled mix of blue, purple and straw case-hardened colors with a small blemish on the frame near the knuckle. The checkered synthetic factory grips are in excellent condition and feature a Rampant Colt in an oval with a Federal Eagle at the butt of each panel. The grips and all appropriate parts are correctly numbered to the gun and it still times and locks up correctly. A fine gun for the budding Colt collector or a competition gun for the S.A.S.S. competitor. (8A9877-1) (MODERN) (1000/1500)

1261	French P.38 Semi-Auto Pistol by Mauser	1265	Scarce German Depot-Marked French Model 1886/R35 Lebel Bolt
	serial #9128g, 9mm, 5" barrel with a mostly bright very good plus bore		Action Carbine by St. Etienne
	showing some light frosting in the grooves and strong rifling throughout.		serial #168, 8mm Lebel, 18" Chatellerault barrel dated 1938 with a bright
	The metal surfaces of this svw 45-coded pistol retain about 95% of an		near excellent bore showing a little minor frosting in the grooves and
	arsenal-quality rust blue showing some thinning along the high edges		strong rifling throughout. The metal surfaces of this carbine retain about
	and toning to gray along the distinctive grooved sheet metal grips along		92% arsenal black enamel over Parkerization showing scattered overall
	with some scattered light handling marks. All makings remain intact and		light flaking and fine scratches one would expect. The bolt shows
	strong with French inspection star stamped on the right side slide and		moderate silvering from operation with strong dark gray Parkerized finish
	on the barrel below the chamber. The left side barrel rail is also stamped		and the rear sight and its spring show strong fire blue. The original
	with a "(Eagle) / WaA135" and the locking block is unmarked and		maker markings on the receiver are rather soft from various arsenal
	un-numbered. The serialized parts are matching and one original "P.38v		overhauls but the barrel shank markings remain crisp. The smooth
	/ U" magazine is included. The hammer must be pulled back slightly to		walnut stock and forend remain in very good condition showing the
	allow the decocker to function properly but the action otherwise seems		overall light dings one would expect, a few perhaps a bit more
	to function well mechanically. A French tan leather flap holster is		moderate, along with some smaller handling marks and a neat arsenal
	included that rates very good plus showing some mild overall staining		patch repair at the left rear edge of the forend. The buttstock actually
	and handling marks. A very nice example of these interesting variant		shows some rather nice straight grain figure along its right side and is
	P.38s produced by France during their occupation of the Mauser factory		stamp-numbered matching on the left side along with two strong
	at the end of the war. (13A9807-307) {C&R} [Vincent Coniglio		"(Eagle) / Kru1" German depot stamp behind the lower tang. The bolt is
	Collection] (700/900)		numbered "I5850" and the bolt head "50", an original leather sling in fair
	Est. 700 - 900		condition showing moderate staining and light crackling is included and
1262	Walther PPK Semi-Auto Pistol		the action seems to function well mechanically. A solid example of these
	serial #248499k, 32 ACP, 3 1/4" barrel with a bright near excellent bore.		desirable French carbines, even more sought-after with its German
	The metal surfaces of this pistol retain about 96-97% original bright blue		markings. (13B9807-219) {C&R} [Vincent Coniglio Collection]
	showing some minor high edge wear, a little freckling at the muzzle and		(800/1200)
	a few scattered handling marks. The 60-degree safety lever shows		Est. 800 - 1,200
	strong fire blue with some minor silvering, likewise along the extractor	1266	French Model 1936 Bolt Action Rifle by St. Etienne
	which has some minor oxidation staining and the barrel shows some		serial #K16305, 7.5 French, 23" barrel with a bright excellent bore. The
	mild gray discoloration. All markings remain crisp and clear and the		metal surfaces of this 1940 acceptance-dated rifle retain about 95%
	pistol is stamped with "(Crown) / N" commercial proofs. The checkered		original black enamel over Parkerization showing some light high edge
	mottled brown synthetic grip with Walther banners remains in about very		wear, a few scattered small flakes and minor handling marks. The bolt
	good condition showing a tiny crack forming at the back top edge and		retains a similar amount of original Parkerized finish showing overall
	moderate warping along the top edges on either side that does impede		silvering and light operational wear. All markings remain crisp and clear.
	operation of the otherwise functional safety lever somewhat. One		The smooth walnut stocks remain in very fine condition showing
	original magazine with mottled brown extension in excellent condition is		scattered light dings, some fine scratches and other light handling
	included along with an unmarked period brown leather flap holster that		marks. There are a few very small more moderate dings along the
	rates very good plus showing some light crackling and minor edge wear.		forend and a small "X" scratched along the left side behind the front
	(13A9807-318) {C&R} [Vincent Coniglio Collection] (700/900)		band but these are unobtrusive. The butt actually shows some rather
	Est. 700 - 900		attractive straight grain figure throughout and is crisply stamped on the
1263	Chinese Type 54 Tokarev Semi-Auto Pistol		left side with matching serial number and on the right side with a nice
	serial #28028055, 7.62x25mm Tokarev, 4 1/2" barrel with a bright		June 1940 acceptance cartouche. The forend and remaining numbered
	excellent bore. The metal surfaces of this pistol retain about 99%		parts including the bayonet are also matching, the rifle is equipped with
	original blue showing a few scattered light handling marks and some		all of the appropriate early features and the action seems to function
	areas taking on a pleasant deep plum-brown tone under bright light. All		well mechanically. An original French brown leather sling is included that
	markings remain intact and crisp and there are no import markings or		shows light staining and crackling. A very fine desirable example for the
	importer-added safeties. The grooved black plastic grips with star logo		martial collector, accepted during the month of the French surrender.
	remain in excellent condition. All of the serialized parts are matching, the		(13B9807-207) {C&R} [Vincent Coniglio Collection] (700/900)
	pistol includes two matching magazines and the action seems to		Est. 700 - 900
	function well mechanically. Based on other known serial numbers this	1267	French Model 1886/93 Lebel Bolt Action Rifle by Tulle
	pistol was likely made in 1981. Also included is an original Chinese		serial #FH82064, 8mm Lebel, 31 1/2" Delaunay-Belleville barrel dated
	leather flap holster with blue corduroy lining, shoulder strap, double		1915 with a mostly bright very good plus bore showing some fine
	ammo pouch and cleaning rod that rate very good plus showing some		oxidation in the grooves and strong rifling throughout. The metal
	light staining, scuffs and minor handling marks. An excellent Chinese		surfaces of this N-marked rifle retain about 94% arsenal refurbished rust
	Tokarev pistol in desirable original configuration. (13A9807-311)		blue showing some high edge wear, light freckling, areas of silvering
	{MODERN} [Vincent Coniglio Collection] (700/900)		along the left side receiver and some light to perhaps moderate pitting
	Est. 700 - 900		scattered about beneath the finish. The bolt and triggerguard are a
1264	French Model 1907-15 M34 Berthier Bolt Action Rifle by St. Etienne		pewter gunmetal patina showing some areas of old oxidation staining
	serial #F58312, 7.5 French, 22" Tulle barrel dated 1939 with a bright		and minor pinprick pitting. The markings have softened from the years of
	very good plus bore showing a little minor oxidation and pinprick pitting		various arsenal overhauls but remain mostly intact and legible overall.
	nearer the muzzle and otherwise strong rifling throughout. The metal		The smooth walnut stocks remain in good condition showing overall
	surfaces of this rifle retain about 90% arsenal black enamel finish over		darkening from the years, a small repaired drying crack along the left
	Parkerization showing some scattered light flaking, minor dings and		side where the stock meets the frame, a smoothed-over light chip at the
	handling marks. The floorplate shows some remnants of a protective		heel and some overall light dings and mild abrasions. The buttstock and
	lacquer and the bolt shows moderate operational wear and thinning		forend are both matching the barrel though the numbers are rather soft
	Parkerized finish. All markings remain intact and strong. The smooth		and there is no visible cartouche. The cartridge lifter plate has been
	walnut stock and handguard remain in about good condition showing		arsenal re-numbered to match, the bolt and bolt head are numbered
	mostly worn finish, scattered light to perhaps a few moderate dings, a		"BC38070" and "70", respectively and the action seems to function well
	couple small spots of filler and a repaired thin 4" drying crack along the		mechanically. A rather salty old warhorse, updated during the inter-war
	right side ahead of the finger groove. The handguard shows some		period, that may make for a fine shooter or entry level example.
	added finish masking a number of extensive repaired cracks and light		(13A9807-161) {C&R} [Vincent Coniglio Collection] (700/900)
	chips, the work being well-executed overall. The stock appears to be		Est. 700 - 900
	numbered "E3792" which is outside the range for M34 rifles and the		
	remaining serialized parts are matching. A thin leather sling with brass		
	studs that appears to be original equipment is included showing some		
	moderate stiffening and crackling. Strangely the trigger seems to be a		
	little shorter than one would expect to find on a French rifle but the		
	action seems to function well mechanically. A very good example of		
1	these desirable rifles, about 40,000 of which were converted to the new

Collection] (700/900) Est. 700 - 900 Lot Title/Description

1312 Excellent U.S. Model 1879 Trapdoor Rifle by Springfield Armory 1315 U.S. Model 1863 Massachusetts Contract Percussion Rifle-Musket by serial #198699, 45-70 Govt., 32 5/8" barrel with a bright excellent bore. Norris & Clement The barrel, correct two-piece triggerguard and buttplate retain about .58 cal., 40" barrel with a mostly bright very good bore showing some 97% original blue with some minor silvering at the muzzle and heel of areas of minor pitting near the muzzle. In 1863 Samuel Norris and the buttplate, some light fading ahead of the forend cap and around the William T. Clement of Springfield MA received a contract from the breech toning to plum-blue under bright light and some scattered Commonwealth to manufacture 13,000 Model 1863 Rifle-Muskets for speckles and a couple tiny spots of old oxidation overall. The bands the state militia. The barrel of this Type I rifle-musket is toning to a retain much original blue with some areas of wear toning to gray while mottled brown-gray patina as cleaned long ago with areas of softened the band springs display nearly all their original fire blue. The receiver, pinprick pitting, particularly around the breech, and light oxidation staining throughout, a 1" vise "bite" mark on the left barrel flat and a few lockplate and hammer show excellent oil-quenched blackening with light fading to gray on the top of the hammer spur and some very faint tiny tool marks on the right flat, and some scattered spots of dried freckling while the breech tang and 1873-dated breechblock retain preservative overall. The mountings have aged to a plum brown patina nearly all their wonderful case-hardened colors on both the exterior and from old light oxidation also showing a worn coat of added protective interior surfaces. The barrel features a very crisp "V / P / (eagle head) / finish. The lockplate, hammer and bolster are toning to a dark P" proof at the breech and the lockplate is properly marked with a gray-brown patina with some light oxidation staining and some light Federal Eagle ahead of the hammer and "U.S. / SPRINGFIELD" below pitting around the nipple while the hammer retains a modest amount of the thumbpiece. The smooth American black walnut straight grip stock its original case-hardened colors. The small spread eagle on the bolster rates very fine retaining most of its original oil finish with some scattered and the last two numbers of the barrel date are obscured by light pitting minor dings and handling marks, showing some unobtrusive tiny but all other markings remain crisp including the "V / P / (eagle head)' abrasions at the toe of the buttstock. The stock displays a crisp "SWP / proof on the left quarter flat of the breech, "L.F.R." on the left breech flat, 1882" inspector's cartouche on the left flat along with an equally strong "1864" behind the hammer, "(Federal Eagle) / U.S." ahead of the hammer and "S.N. & W.T.C. / FOR / MASSACHUSETTS" below the circled "P" firing proof behind the triggerguard. The rifle is sighted with the original blade front and R-marked Model 1879 "buckhorn" rear, the bolster. The smooth black walnut straight grip stock is structurally stacking and sling swivels are intact and a swelled-shank tulip-head excellent and rates very good overall as cleaned with a later added finish, the head of a tiny finishing nail is visible in the right side of the cleaning rod is in-place below the barrel. A period leather sling, likely for a U.S. Krag rifle is included and the three-position lock and tumbler are buttstock, along with the scattered light dings and handling marks typical robust and crisp. This beautiful 1879 Trapdoor is in a wonderful state of of a Civil War service rifle. The faint remnants of an oval inspector's condition and is probably the nicest example of this model the writer has cartouche can be seen on the left stock flat, a few of the screw heads seen. (23A9807-268A) {ANTIQUE} [Vincent Coniglio Collection] show some minor slot damage, and the forward lockplate screw is (1000/1500) shorter than standard but still engages the threads of the lockplate. A Est. 1,000 - 1,500 correct cupped tulip-head ramrod is included, the original sights and 1313 Sako Model 75 Finnlight Bolt Action Rifle sling swivels are intact and the lock remains crisp and strong. A very good overall example of a Model 1863 rifle-musket produced at the serial #247558, 6.5x55mm Swedish, 20 7/8" fluted stainless steel barrel with a bright excellent bore. The matte stainless steel surfaces of this height of the war. (23A9853-11) {ANTIQUE} (800/1200) light and handy rifle built on the IV action rate excellent including the Est. 800 - 1,200 inside components of the action. The alloy bottom metal retains 99% 1316 U.S. Model 1816 Percussion Converted Rifled Musket by Frankford original matte "stainless" anodized finish with a faint handling mark on Arsenal the bow of the triggerguard. The injection-molded black synthetic Monte .69 cal., shortened 41 1/2" barrel with an about good bore showing Carlo stock with left side cheekpiece rates excellent with a few scattered minor pitting throughout the rifling. This Model 1816 Type II musket was light handling marks primarily on the gray soft rubber forearm and grip rifled, sighted and converted to percussion using Remington-produced over-moldings. The rifle features an adjustable single-stage trigger, a Maynard-patent locks and priming systems by Frankford Arsenal in the detachable 5-round magazine, and Key Concept lockable bolt system late-1850s. The metal surfaces are toning to an overall plum brown-gray and mounted to the factory dovetailed receiver is a pair of matching patina as lightly cleaned with the remnants of reapplied blue around the matte stainless steel 30mm rings needing only your choice of breech, softened pitting around the bolster along with a few vise "bite" high-quality optic to maximize the potential of this versatile chambering. marks above the left wood line around the breech, and scattered spots Also included with the rifle is a pair of 1" scope ring adapters, a pair of of old light oxidation and light freckling overall. The brass front sight matching matte silver aluminum quick-detach sling swivels and the blade on the Model 1816 double band has aged to mustard patina. The original factory box. The action appears to function well mechanically breech tang is clearly stamped "1857 / J" and "REMINGTON'S / and this all-weather rifle appears to have seen little if any use. ILION.N.Y. / 1858 / U.S." is on the lockplate behind the hammer. The (23A9808-56) {MODERN} (800/1000) smooth American black walnut straight grip stock rates about very good Est. 800 - 1,000 with a 3/4" crack behind the lockplate, a narrow 1" chip missing at the 1314 Benelli Super Black Eagle Semi-Auto Shotgun left side of the breech tang and the typical scattered dings and handling serial #U161377, 12 ga., 24" ventilated rib screw-choke barrel with a marks to be expected of a Civil War shoulder arm. The left stock flat is bright excellent bore. The metal surfaces and checkered synthetic clearly stamped "39" along with a softened inspector's cartouche and pistolgrip stock and forend retain 98% original Realtree camouflage there are various small inspection marks overall. The barrel of this rifled musket has been shortened 1/2" and the bayonet lug has been hydro-dipped finish with some light muzzle and high edge wear, a couple unobtrusive handling marks on the barrel, and the bolt and removed, and the double band retains the previously mentioned brass charging handle show a little minor operational wear exposing the black blade sight which was typically replaced with an iron sight during the metal beneath. The barrel is sighted with the original red fiber optic front rifling and sighting conversion. The 1855-style long range rear sight is bead and silver bead mid-rib and this inertia-operated shotgun includes intact along with the sling swivels, the Maynard priming mechanism an optional larger orange fiber optic bead that attaches to the rib via appears to function well mechanically and the lock is very strong and magnets along with a yellow fiber optic pipe and optional orange fiber crisp. An uncapped button-head ramrod is included along with a small optic two-dot rear sight with elevator. The shotgun features a 3 1/2" roll of Maynard tape primers. (23A9853-2) {ANTIQUE} (700/900) chamber and the stock is adjustable for drop with two included metal Est. 700 - 900 stock plates and two plastic adjustment shims. The original gray factory hardcase is included which contains a magazine limiter, choke wrench, factory manual and the following six Benelli choke tubes: cylinder, improved cylinder, modified, improved modified, full, extra full turkey. The action of this excellent condition Italian shotgun appears to function well mechanically. (23A9830-14) {MODERN} [Dr. William C. Nugent

The box includes a sight adjustment tool, unused cleaning kit and factory paperwork. (22A9809-3) {C&R} (700/900) Est. 700 - 900 Smith & Wesson Post-War K-22 Masterpiece Revolver serial #K153796, 22 LR, 6" pinned barrel with an excellent bore. The metal surfaces of this five-screw Pre-Model 17 revolver retain about 96-97% original blue, there is wear at the muzzle and on the frame with some faint freckling and high edge wear. All markings remain crisp with the trigger and ejector rod wearing to silver and the hammer showing nice remnants of case color. The diamond checkered walnut factory grips are likely from an earlier gun and rate very good with the S&W medallions being slightly-tarnished and showing some scattered handling marks. The rear sight is a micro-adjustable blade and the front is a Patridge blade. A nice 1952 Third Model with a little bit of character.
1335	and hammer retain all their original hard chrome. The checkered black rubber Pachmayr presentation grips are excellent. This early-80s revolver is sighted with a serrated blade red insert front sight and a micro-adjustable square-notch blade rear. (22A9790-4) {MODERN} [Bob Borcherdt Collection] (700/900) Est. 700 - 900 Colt Woodsman Sport Semi-Auto Pistol serial #92834, 22 LR, 4 1/2" straight-tapered barrel with an excellent bore. The metal surfaces retain perhaps 96-97% original blue with scattered freckles and a couple small curious stains on the slide, there is some slight thinning at the muzzle and light edge wear one would associate with an occasionally-holstered gun. These straight-taper barrel First Series Woodsman pistols are equipped with a fixed blade front sight and an adjustable rear with the two fire-blued screws showing minor slot wear. The fully-checkered factory grips are very good plus bordering on excellent, the points show some very slight wear and the	1341	in near very good condition with some minor oxidation on the metal parts. The box includes a sight adjustment tool, unused cleaning kit and factory paperwork. (22A9809-3) {C&R} (700/900) Est. 700 - 900 Smith & Wesson Post-War K-22 Masterpiece Revolver serial #K153796, 22 LR, 6" pinned barrel with an excellent bore. The metal surfaces of this five-screw Pre-Model 17 revolver retain about 96-97% original blue, there is wear at the muzzle and on the frame with some faint freckling and high edge wear. All markings remain crisp with the trigger and ejector rod wearing to silver and the hammer showing nice remnants of case color. The diamond checkered walnut factory grips are likely from an earlier gun and rate very good with the S&W medallions being slightly-tarnished and showing some scattered handling marks. The rear sight is a micro-adjustable blade and the front is a Patridge blade. A nice 1952 Third Model with a little bit of character. (22A9830-56) {MODERN} [Dr. William C. Nugent Collection] (700/900) Est. 700 - 900 Beretta Silver Hawk Featherweight Boxlock Double Shotgun serial #C33832, 12 ga, 28" barrels marked improved modified (**) and full (*) with both measuring tight modified and having excellent bores. The barrels retain perhaps 97-98% original blue, there are scattered light scratches and handing marks associated with time spent afield. The triggerguard and lever show some similar amounts of wear on the high edges. The engraved coin-finished frame is excellent, there are splashes of foliate scroll, a floral motif on the fences and geometric patterns and borders. The checkered walnut beavertail forend and
	and hammer retain all their original hard chrome. The checkered black rubber Pachmayr presentation grips are excellent. This early-80s revolver is sighted with a serrated blade red insert front sight and a micro-adjustable square-notch blade rear. (22A9790-4) {MODERN} [Bob Borcherdt Collection] (700/900) Est. 700 - 900 Colt Woodsman Sport Semi-Auto Pistol serial #92834, 22 LR, 4 1/2" straight-tapered barrel with an excellent bore. The metal surfaces retain perhaps 96-97% original blue with scattered freckles and a couple small curious stains on the slide, there is some slight thinning at the muzzle and light edge wear one would associate with an occasionally-holstered gun. These straight-taper barrel First Series Woodsman pistols are equipped with a fixed blade front sight and an adjustable rear with the two fire-blued screws showing minor slot wear. The fully-checkered factory grips are very good plus bordering on excellent, the points show some very slight wear and the wood has darkened from the years. Included is a correct and near excellent condition two tone factory magazine. (22A9786-3) {C&R} [Frank Grzasko Collection] (800/1200) Est. 800 - 1,200 Smith & Wesson Special Order Model 34-1 22/32 Kit Gun Revolver serial #133219, 22 LR, 2" pinned barrel with an excellent bore. The metal surfaces retain 99% strong original blue with a few very light and unobtrusive freckles and the service hammer and trigger show wonderful case-hardened color. The checkered walnut factory round		in near very good condition with some minor oxidation on the metal parts. The box includes a sight adjustment tool, unused cleaning kit and factory paperwork. (22A9809-3) {C&R} (700/900) Est. 700 - 900 Smith & Wesson Post-War K-22 Masterpiece Revolver serial #K153796, 22 LR, 6" pinned barrel with an excellent bore. The metal surfaces of this five-screw Pre-Model 17 revolver retain about 96-97% original blue, there is wear at the muzzle and on the frame with some faint freckling and high edge wear. 	and hammer retain all their original hard chrome. The checkered black rubber Pachmayr presentation grips are excellent. This early-80s revolver is sighted with a serrated blade red insert front sight and a micro-adjustable square-notch blade rear. (22A9790-4) {MODERN} [Bob Borcherdt Collection] (700/900) Est. 700 - 900 Colt Woodsman Sport Semi-Auto Pistol serial #92834, 22 LR, 4 1/2" straight-tapered barrel with an excellent bore. The metal surfaces retain perhaps 96-97% original blue with scattered freckles and a couple small curious stains on the slide, there is some slight thinning at the muzzle and light edge wear one would associate with an occasionally-holstered gun. These straight-taper barrel First Series Woodsman pistols are equipped with a fixed blade front sight and an adjustable rear with the two fire-blued screws showing minor slot wear. The fully-checkered factory grips are very good plus bordering on excellent, the points show some very slight wear and the wood has darkened from the years. Included is a correct and near excellent condition two tone factory magazine. (22A9786-3) {C&R} [Frank Grzasko Collection] (800/1200) Est. 800 - 1,200 Smith & Wesson Special Order Model 34-1 22/32 Kit Gun Revolver serial #133219, 22 LR, 2" pinned barrel with an excellent bore. The metal surfaces retain 99% strong original blue with a few very light and unobtrusive freckles and the service hammer and trigger show wonderful case-hardened color. The checkered walnut factory round butt target grips with S&W medallions are very good, there are some small impact marks at the butt and a couple tiny chips. The rear sight is an adjustable blade with vertically-serrated base, the front is a serrated ramp. This is a very fine late-60s Kit Gun revolver, it comes with the original very good condition metal corner blue two-piece box correctly numbered to the gun. The end label also indicates "Spl Ige. grips" under Special Features, indicating that the round butt target stocks came		in near very good condition with some minor oxidation on the metal parts. The box includes a sight adjustment tool, unused cleaning kit and factory paperwork. (22A9809-3) {C&R} (700/900) Est. 700 - 900 Smith & Wesson Post-War K-22 Masterpiece Revolver serial #K153796, 22 LR, 6" pinned barrel with an excellent bore. The metal surfaces of this five-screw Pre-Model 17 revolver retain about 96-97% original blue, there is wear at the muzzle and on the frame with some faint freckling and high edge wear. All markings remain crisp with the trigger and ejector rod wearing to silver and the hammer showing nice remnants of case color. The diamond checkered walnut factory grips are likely from an earlier gun and rate very good with the S&W medallions being slightly-tarnished and showing some scattered handling marks. The rear sight is a micro-adjustable blade and the front is a Patridge blade. A nice 1952 Third Model with a little bit of character. (22A9830-56) {MODERN} [Dr. William C. Nugent Collection] (700/900) Est. 700 - 900 Beretta Silver Hawk Featherweight Boxlock Double Shotgun serial #C33832, 12 ga, 28" barrels marked improved modified (**) and full (*) with both measuring tight modified and having excellent bores. The barrels retain perhaps 97-98% original blue, there are scattered light scratches and handing marks associated with time spent afield. The triggerguard and lever show some similar amounts of wear on the high edges. The engraved coin-finished frame is excellent, there are splashes of foliate scroll, a floral motif on the fences and geometric patterns and borders. The checkered walnut beavertail forend and capped pistolgrip buttstock are near very good with the checkering mostly flat-top with flaking finish, a couple tiny chips and handing marks throughout, this shotgun clearly put in significant work in the field but was still well-cared-for. The safety is automatic, the single trigger is non-selective, the closure features a Greener-style crossbolt and the 3" chambers feature extractors. The length-of

	Est. 800 - 1,200		

1401	Smith & Wesson Second Model .44 Hand Ejector Revolver serial #31483, 44 Special, 5" scarce barrel with an excellent bore. This 1929-manufactured revolver has been non-factory refurbished with added F.D.L. sight. The metal surfaces retain about 99% reapplied blue finish showing light muzzle wear, cylinder toned to plum, old pitting under the new finish and other handling marks. The service trigger and hammer retain bold case-hardened colors with light operational wear and the trigger face worn to pewter. The checkered goncalo alves factory target grips with silver S&W medallions feature the later speed loader cut on the left panel and remain excellent condition. The numbered parts are correct to the revolver, the 5" barrels are considered scarce and the action times and locks up correctly. The most obvious change to this gun is the addition of a F.D.L. fully adjustable rear sight. The change is not permanent as it uses the top sideplate "bug" screw to mount it and also provides the elevation adjustments. The sight could be removed and a new sideplate screw reinstalled (not provided) reverting back to the factory fixed rear sight. It utilizes the original factory half-moon front sight and adds versatility to the revolver. An interesting .44 hand ejector that should make a good shooter. (8A9897-49) (MODERN) (700/900) Est. 700 - 900 Smith & Wesson Model 629-6 Classic Revolver serial #CFT3322, 44 Magnum, 8 3/8" full lug barrel with an excellent bore. The stainless steel surfaces remain in excellent condition with a few scant handling marks. The gun is equipped with M.I.M.'s .400" smooth semi-target trigger and .500" target hammer with strong but unremarkable case-hardened colors and light operational wear. The pebble grain rubber factory Hogue Monogrips with S&W logo rate excellent. This gun features a red ramp front sight, topstrap drilled and tapped for scope mount and it still times and locks up correctly. A			Colt Custom Shop Giuseppe Garibaldi Commemorative Second Generation Third Model Dragoon Percussion Revolver serial #GCA1066, .44 cal., 7 1/2" barrel with an excellent bore. Giuseppe Maria Garibaldi's (1807-1882) popularity, skill at rousing the common man and his military exploits are all credited with making the unification of Italy possible. He was well known around the world as an exemplar of revolutionary nationalism and liberalism. He is considered one of Italy's "fathers of the fatherland". Colt reportedly only assembled 106 of these beautiful commemoratives honoring his achievements. This gun is as-new in-the-box with the metal surfaces retaining about 99% original blue and case-hardened colors with light operational marks on the hammer. The brass grip frame rates excellent. The smooth walnut factory grips also rate excellent. The numbered parts are correct to the gun and it still times and locks up correctly. The cylinder has a gold etched bust of the Giuseppe Garibaldi and one of Colonel Coli with a third etching of the two shaking hands. The left side of the barrel is gold etched with tight scroll surrounding the Italian "boot" on the flats and is marked "Garibaldi Special Edition" on the barrel surrounded with a gold etched border and tight scrolls. The right side of the barrel is etched with tight scroll surrounding the continent of South America on the flats and is marked with the date and location of his birth and death on the barrel surrounded with a gold etched border and tight scrolls. The revolver includes a French fitted wooden display case that is red velvet lined. The cover has clear glass etched with a figure of Garibaldi on a rampant horse with serpentine banner next to it marked "Giuseppe Garibaldi (the sword) / Camillo Cavour (the brain) / Giuseppe Mazzini (the soul)". Also included with the gun are the original shipping box, factory "F" series revolver box that is correctly end labeled and numbered to the gun, key for the display case, manual and paperwork. (8B9896-50) {ANTIQUE}
1403	Weaver style scope base is installed in lieu of the factory rear sight (not provided) and a Smith & Wesson 26mm red dot sight is mounted. It features clear optics with eleven intensity settings for the red dot and still functions. This gun will make a fine hunting, silhouette or range gun. (8A9896-29) (MODERN) (700/900) Est. 700 - 900 Custom Colt Woodsman Sport Model Semi-Auto Pistol serial #136401, 22 LR, 4 1/2" factory barrel with an excellent bore. This lovely little first series Sport Model has been factory quality refurbished but shows no factory rework marks and has a unique trigger adjustment screw. The refinish was expertly done and the metal surfaces retain about 99% quality reapplied blue finish showing a few very mild old pits under the new finish. The fully checkered walnut factory grips rate excellent. This pistol features an elevation adjustable Patridge front sight, windage adjustable rear sight, there is no barrel address on the side of the barrel but it is of correct style for the era of production and the address was likely removed when it was refinished with the rest of the gun. The front of the frame above the front triggerguard bow has a trigger adjustment screw. This exterior slotted screw merely covers a spanner screw with what appears to be a pin that acts on the tigger. It is possible this is an A.E. Berdon was a renowned gunsmith active from the 1930s to 1950s credited with a number of innovative modifications he used over the years to enhance accuracy such as this one. The pistol includes a correct single Colt Woodsman solid blue magazine. Whether you are an old target pistol aficionado or just want a really nice handy vintage shooter, this gun will fill the bill. (8A9897-17) {C&R} (700/900) Est. 700 - 900		105	Est. 700 - 900 Custom Colt Mustang Semi-Auto Pistol serial #MU05859, 380 ACP, 2 3/4" barrel with an excellent bore. This tiny pocket pistol has been professionally refinished in industrial hard chrome by an unknown vendor, the metal surfaces retaining about 99% of the new finish. The checkered synthetic factory grips with silver Rampant Colt medallions rate excellent. The pistol features a serrated ramp front sight, drift adjustable rear sight and thumb safety (works in condition one or two). The pistol includes the original woodgrain factory box with Styrofoam insert correctly end labeled (before refinishing) and numbered to the gun, (3) factory magazines also refinished with hard chrome, manual and paperwork. The hard chrome finish increases the corrosion resistance of this excellent little concealed carry gun in high humidity areas. (8A9899-2) {MODERN} (700/900) Est. 700 - 900 U.S. Model 1879 Trapdoor Rifle by Springfield Armory serial #239706, 45-70 Govt., 32 5/8' barrel with an excellent bright bore. The barrel and bands are toning to a pleasing brown patina with strong amounts of original blue visible under bright light. There is some sparsely scattered fine oxidation, the occasional nick or impact mark and gray toning at the end of the barrel from light bayonet wear. The frame, lock and triggerguard retain about 85% original blue toning to brown and gray with some sparse spots of light oxidation and dried added varnish, loss primarily on the trigger bow, the interior showing perhaps a little more oxidation. The 1878 dated breechblock and upper tang are muting to pale brown with some very fine oxidation with strong mottled case-hardened colors still present. The walnut stock remains very good plus with a 1/2" shallow indentation in left side of the buttstock along with the expected handling marks of a carried arm under an added light finish that is previous mentioned on some of the metal. There is a crisp 1883 dated inspector cartouche, circle P firing proof and remnants of r

1432	U.S. M1 Carbine by Standard Products serial #2018592, 30 Carbine, 18" 8-43 dated Underwood barrel with a bright very good plus bore with a few scattered spots of light pitting. The metal surfaces retain about 90% arsenal parkerized finish with light wear on the high edges and contact points, some areas toning to brown and a patch of light pitting on the underside of the barrel. The low-wood oval-cut walnut stock and 2-rivet handguard are in very good condition as lightly cleaned with a few scattered light dings and abrasions on the forend near the nose, an old light abrasion on the right side by the receiver, three small added holes on the underside of the pistolgrip, and scattered light handling marks; the buttplate shows light wear on the edges. The buttstock is marked with a very light boxed "RMC" above ordnance wheel on the right side, a second "RMC" stamped in the sling cut on the left side denoting Rock-Ola manufacture, a crisp "P" inside the pistolgrip; the handguard is "R.S.G." marked, signifying Saginaw production. The receiver and barrel markings remain clearly marked, the trigger housing is "ROCK-OLA" marked, the operating slide is produced by Underwood, the harmer is a Brunner/Ritter post-WWII production, and the marking on the bolt is illegible. The carbine features a rotary safety, flat bolt, a stamped adjustable rear sight, and appears to function well mechanically. Included with the carbine is a "IU" marked 15-round magazine, sling, and oiler. A solid arsenal reworked M1 Carbine from one of the smaller manufacturers. (14A9833-28) {C&R} (800/1200) Est. 800 - 1.200	1436	French Model 1800/1801 Flintlock Musketoon .67 cal., 29 7/8" barrel with a moderately oxidized bore. This Napoleonic era musketoon manufactured in the year IX of the Republican calendar appears to be in original flint with its iron surfaces toning to a speckled pewtery patina as cleaned with a few tool marks on the top of the barrel, scattered softened pinprick pitting and light oxidation staining. The lockplate bears a "(crown) / G / 13" proof mark and a script "Liege" ahead of the cock and the lock parts including the detachable brass pan appear original. The correct brass double band, triggerguard, pan and sideplate have aged to a mellow ochre patina and display various marks such as "(crown) / G". The smooth French walnut straight grip stock rates good as lightly cleaned with an older added finish, a couple minor cracks and a small chip around the sideplate and lock and some moderate wear around the brass buttplate to be expected from an arm that may have served in any number of famous battles for the Emperor. The stock retains multiple softened markings including an arsenal refurbishment cartouche dated 1828 and stowed below the barrel is a correct conical-tipped iron ramrod with threaded end. The lock remains strong and crisp and this handsome musketoon should make an excellent addition to the collection of any European military history enthusiast. (23A9654-45) {ANTIQUE} (800/1200) Est. 800 - 1,200 Colt Cobra Double Action Revolver serial #113601LW, 38 Special, 2" barrel with an excellent bore. The metal surfaces retain 98-99% anodized and blue finish, there are a few
1433	U.S. M1 Garand Rifle by Springfield Armory serial #3320660, 30-06, 24" 6-65 dated Springfield Armory barrel with a bright excellent bore. The metal surfaces of this 1944-dated rifle retain about 98% arsenal parkerized finish with light operational wear on the bolt, some light high edge wear and some minor light pitting beneath the finish. The walnut stock is in near excellent condition with some light		micro handling marks, a small cleaned area on the latch and some light edge wear. The frame is drilled and tapped at the knuckle and frame for a previously-mounted shroud. The fully-checkered walnut grips with silver Rampant Colt medallions are excellent. This is a very nice First Issue manufactured in 1961. (22A9650-11) {C&R} (800/1200) Est. 800 - 1,200
	chipping on the front of the handguard as it meets the metal, the remnants of old light abrasions, and a few light handling marks; the stock is marked with a partially boxed "P" proof on the inside of the pistolgrip and is otherwise unmarked. The receiver markings are soft but largely legible, all marked parts are of Springfield Armory manufacture, with all but the "-7" marked trigger housing being post WWII production. The rifle features a 2-slot gas plug, milled triggerguard, T105 rear sight, and appears to function well mechanically. Included with the rifle is a M3 combination tool. An attractive arsenal reworked M1 rifle that should shoot well. (14A9833-31) {C&R} (800/1200)	1438	Navy Arms LeMat "Grapeshot" Percussion Revolver by Pietta serial #2452, .44 cal./20 gauge, 6 3/4" octagon rifled and plain smooth bore barrels with excellent bores. This lovely reproduction of a Second Model LeMat remains in excellent condition with about 99% original blue, the frame drifting slightly to plum. The case-hardened colors on the hammer and trigger remain robust and vivid with minor operational wear. The checkered walnut factory grips rate excellent. The revolver features a lanyard hole on the butt, rounded triggerguard and selector on the hammer nose to fire the shotgun barrel. This Pietta offers an affordable and shootable LeMat revolver for the black powder buff or Civil War
1434	Est. 800 - 1,200 Polytech M14S Semi-Auto Rifle serial #07607, 308 Win, 22" barrel with 3" flash hider and a bright excellent bore. The metal surfaces retain about 98% factory parkerized finish with specks of light oxidation on the barrel, light wear on the bolt, and scattered light handling marks. The walnut stock is in very good condition a few small chips on the right side of the triggerguard, a light impact mark on the right side of the forend, and scattered light dings and handling marks; the synthetic handguard is in near excellent condition with a few light handling marks. The left side of the receiver is crisply stamped "M-14S .308 / IDE USA SFLD MICH. / POLYTECH CHINA", with the serial number and "MADE IN CHINA" lightly inscribed next to right. The rifle retains the expected winged blade front sight and aperture rear sight, and a Springfield Armory side-mounted picatinny scope base is fitted to the rifle; the open sights are still usable with the mount in place. Included with the rifle is the original stripper clip guide, which was removed to fit the scope base. A solid Chinese clone of a classic American rifle. (14A9871-14) {MODERN} {800/1200}	1439	historian and remains as-new. (8A9650-33) {ANTIQUE} (750/900) Est. 750 - 900 Scarce Early Winchester Pre '64 Model 70 Bolt Action Rifle serial #238, 30-06, 24" barrel with a very good to very good plus bore with scattered light pitting throughout but strong rifling. The receiver and barrel of the rifle retain about 90% original blue with spots of thinning on the barrel including an about 7" narrow area, lightly cleaned of light oxidation long in the past, light silvering on the high edges, and scattered light handling marks. The bottom metal retains about 99% professionally applied blue and the bolt handle was very lightly, neatly relieved for scope clearance. The checkered pistolgrip walnut stock is in very good condition with a small shallow chip behind the bolt handle, scattered light handling marks, a spot of light finish flaking on the left side of the buttstock, and a few minor dings. The sling swivels have been replaced with studs and the stock is inlet on the left side for a Lyman aperture sight; the checkered steel widow's peak buttplate remains in very good condition with light oxidation. The barrel and receiver markings remain mainly crisp, with only a few characters in the beans of dense bavies actioned The acting marker are barrel and receiver markings remain the profession of the profesion of the profession of the profession of the profession o
1435	Est. 800 - 1,200 British East India Company Flintlock Holster Pistol .67 cal, 9" round barrel with a very fine bore. The metal surfaces of this pistol have mostly toned to a mottled pewter-gunmetal patina showing scattered small spots of old light pitting, areas of silvery patina along the lock and plum-brown along the barrel. The pistol is equipped with a Baker pattern lock featuring the East India Company's Rampant Lion emblem as well as a crisp "(Crown) / 3" inspector proof. The cock may be a period replacement as it is a bit smaller than those seen on other examples but has obviously been with this pistol for some time. The breech proofs remain mostly intact and visible. The arm is equipped with a swiveling ramrod assembly with long retainer spring, heavy steel lanyard ring and the remaining hardware is of brass showing some light dings and toning to a mild ocher patina. The right side of the buttcap is stamped with a large "40". The walnut stock remains in about very good plus condition showing perhaps a touch of older added finish, the typical thin crack at the lock screw and scattered light dings. The arm remains in the original flint, the lock shows excellent fit to the stock and seems to function well mechanically. A handsome example for the antique arms collector. (13B9654-14) {ANTIQUE} (800/1200) Est. 800 - 1,200		barrel address having softened. The original rear sight has been removed and a dovetail blank inserted, and the rifle is sighted with ramped gold bead front sight and a Lyman receiver-mounted aperture rear sight, with one screw-in aperture; the rear receiver ring of the rifle has been drilled and tapped. A solid Model 70 from the first year of production, and while refinished, remains a very scarce low-numbered example. (14B9100-658) [Richard "Stretch" Kennedy Collection] {C&R} (800/1000) Est. 800 - 1,000

The engraved silver-finished frame with gold inlays is excellent, there is tight scroll with floral motifs throughout. The gold accents are a mallard left, a pheasant right and roses found on the triggerguard and lever, all retain full original finish and compliment the silver nicely. The checkered AA walnut round-knob pistolgrip buttstock and finger-groove forend are excellent plus and display very nicely-contrasting figure. The butt is factory-fitted with a Technogel insert to cope with those hard-hitting 3" shells. The pierced lever is sculpted to mimic the floral scroll, the safety is automatic and the trigger is single selective. The shotgun comes with a fitted factory hard case with the following choke tubes: steel full, steel improved modified, lead cylinder and lead full. (22B9730-27) {MODERN} [Frank Grzasko Collection] (800/1200) Est. 800 - 1,200	1446	Est. 800 - 1,200 Japanese Type 94 / Pattern 1934 Officer's Shin-Gunto This officer's "New Military Sword" measures 36" overall and bears a 26" shinogi-zukuri blade with a brass habaki and a crisp hamon line composed of even undulating peaks. The tang is signed on the reverse face. The blade is bright and near excellent with a few polishing marks here and there on the face. The hilt features standard officer's mounts: the tsuba is gilt brass with a scabbard catch cutout (no catch is present) cast in sakura blossom relief, worn to dull goldenrod at the edges and retaining much original gilt in the protected areas; the wooden grip is bound in white shagreen, decorated by brass triple sakura menuki and traditionally wrapped in brown cloth tape; the fuchi and kabuto-gane are stipple-patterned brass in ocher-brown lacquer paint with areas of the finish worn to brass mostly on the kabuto-gane. The wooden mekugi retention pin is worn thin and is a bit loose, otherwise the hilt is unblemished save the aforementioned finish wear. The scabbard is a traditional black-lacquered wooden saya with brass mounts. No tip cap is present and an 8 1/2" flexing split is present on either side of the

(12B9807-21) [Vincent Coniglio Collection] (800/1200) Est. 800 - 1,200 Signed WWII Japanese Officer's Sword in Shirasaya Mounts This oil-quenched sword measures 34 1/4" overall and bears a 25 3/4" shinogi-zukuri blade with a subtle tight wood-grain hada and a soft
	Est. 700 - 900 Franchi Renaissance Elite Over Under Shotgun serial #9009720, 12 ga, 26" screw-choke ventilated rib barrels with excellent bores. The barrels retain 99% original blue and the gold trigger retains all original finish. The engraved silver-finished frame with gold inlays is excellent, there is tight scroll with floral motifs throughout. The gold accents are a mallard left, a pheasant right and roses found on the triggerguard and lever, all retain full original finish and compliment the silver nicely. The checkered AA walnut round-knob pistolgrip buttstock and finger-groove forend are excellent plus and display very nicely-contrasting figure. The butt is factory-fitted with a Technogel insert to cope with those hard-hitting 3" shells. The pierced lever is sculpted to mimic the floral scroll, the safety is automatic and the trigger is single selective. The shotgun comes with a fitted factory hard case with the following choke tubes: steel full, steel improved modified, lead cylinder and lead full. (22B9730-27) (MODERN) [Frank Grzasko Collection] (800/1200) Est. 800 - 1,200 Fine U.S. Model 1842 Percussion Pistol by Aston .54 cal, 8 1/2" round barrel with a bright excellent bore. The barrel, lock and ramrod assembly remain mostly armory bright showing some scattered mild freckling and light handling marks. The breech markings remain crisp with "U.S. / NWP / P", "P" on the bolster, nice lockplate markings and the tang and lockplate both dated 1848. The brass hardware is a mild goldenrod patina showing just a few minor handling marks and strong sub-inspector stamps. The trigger still retains much of its fire blue. The smooth walnut stock remains in near excellent condition showing some scattered light dings and handling marks, concentrated more along the left side. The stock retains strong oil finish and fine		Est. 800 - 1,200 Japanese Type 94 / Pattern 1934 Officer's Shin-Gunto This officer's "New Military Sword" measures 36" overall and bears a 26" shinogi-zukuri blade with a brass habaki and a crisp hamon line composed of even undulating peaks. The tang is signed on the reverse face. The blade is bright and near excellent with a few polishing marks here and there on the face. The hilt features standard officer's mounts: the tsuba is gilt brass with a scabbard catch cutout (no catch is present) cast in sakura blossom relief, worn to dull goldenrod at the edges and retaining much original gilt in the protected areas; the wooden grip is bound in white shagreen, decorated by brass triple sakura menuki and traditionally wrapped in brown cloth tape; the fuchi and kabuto-gane are stipple-patterned brass in ocher-brown lacquer paint with areas of the finish worn to brass mostly on the kabuto-gane. The wooden mekugi retention pin is worn thin and is a bit loose, otherwise the hilt is unblemished save the aforementioned finish wear. The scabbard is a traditional black-lacquered wooden saya with brass mounts. No tip cap is present and an 8 1/2" flexing split is present on either side of the seam at the rear edge; the seam itself is partially separated at the forward edge. Despite the separations, the saya is held securely by the brass suspension ring and a canvas tape binding just above the tip, otherwise showing no more than superficial handling marks and rating very good as a whole. Despite the separations, the saya is held securely by the brass suspension ring and a carvas tape binding just above the tip, otherwise showing no more than superficial handling marks and rating very good as a whole. A fine officer's weapon in a traditional scabbard. (12B9807-21) [Vincent Coniglio Collection] (800/1200) Est. 800 - 1,200 Signed WWII Japanese Officer's Sword in Shirasaya Mounts This oil-quenched sword measures 34 1/4" overall and bears a 25 3/4" shinogi-zukuri blade with a subtle tight wood-grain hada and a soft undulating hamon line. The tang is signed on either face: information from the consigner identifies the smith's signature to one Showta Kanetake and dates the blade to 1945. The blade is in excellent condition with an unblemished razo
	Est. 700 - 900 Franchi Renaissance Elite Over Under Shotgun serial #9009720, 12 ga, 26" screw-choke ventilated rib barrels with excellent bores. The barrels retain 99% original blue and the gold trigger retains all original finish. The engraved silver-finished frame with gold inlays is excellent, there is tight scroll with floral motifs throughout. The gold accents are a mallard left, a pheasant right and roses found on the triggerguard and lever, all retain full original finish and compliment the silver nicely. The checkered AA walnut round-knob pistolgrip buttstock and finger-groove forend are excellent plus and display very nicely-contrasting figure. The butt is factory-fitted with a Technogel insert to cope with those hard-hitting 3" shells. The pierced lever is sculpted to mimic the floral scroll, the safety is automatic and the trigger is single selective. The shotgun comes with a fitted factory hard case with the following choke tubes: steel full, steel improved modified, lead cylinder and lead full. (22B9730-27) {MODERN} [Frank Grzasko Collection] (800/1200) Est. 800 - 1,200 Fine U.S. Model 1842 Percussion Pistol by Aston .54 cal, 8 1/2" round barrel with a bright excellent bore. The barrel, lock and ramrod assembly remain mostly armory bright showing some scattered mild freckling and light handjing marks. The breech markings remain crisp with "U.S. / NWP / P", "P" on the bolster, nice lockplate markings and the tang and lockplate both dated 1848. The brass hardware is a mild goldenrod patina showing just a few minor handling marks and strong sub-inspector stamps. The trigger still retains much of its fire blue. The smooth walnut stock remains in near excellent condition showing some scattered light dings and handling marks, concentrated more along the left side. The stock retains strong oil finish and fine inspector cartouches on the left side. The ramrod assembly is intact and the lock functions crisply. A very handsome example for the U.S. martial collector. (13B9606-62		Est. 800 - 1,200 Japanese Type 94 / Pattern 1934 Officer's Shin-Gunto This officer's "New Military Sword" measures 36" overall and bears a 26" shinogi-zukuri blade with a brass habaki and a crisp hamon line composed of even undulating peaks. The tang is signed on the reverse face. The blade is bright and near excellent with a few polishing marks here and there on the face. The hilt features standard officer's mounts: the tsuba is gilt brass with a scabbard catch cutout (no catch is present) cast in sakura blossom relief, worn to dull goldenrod at the edges and retaining much original gilt in the protected areas; the wooden grip is bound in white shagreen, decorated by brass triple sakura menuki and traditionally wrapped in brown cloth tape; the fuchi and kabuto-gane are stipple-patterned brass in ocher-brown lacquer paint with areas of the finish worn to brass mostly on the kabuto-gane. The wooden mekugi retention pin is worn thin and is a bit loose, otherwise the hilt is unblemished save the aforementioned finish wear. The scabbard is a traditional black-lacquered wooden saya with brass mounts. No tip cap is present and an 8 1/2" flexing split is present on either side of the seam at the rear edge; the seam itself is partially separated at the forward edge. Despite the separations, the saya is held securely by the brass suspension ring and a carvas tape binding just above the tip, otherwise showing no more than superficial handling marks and rating very good as a whole. The majority of the surfaces have toned to a silver and gunmetal gray patina and have been nicely-engraved with Arabesque scroll and geometric patterns on the screw heads and hinge pin. The checkered walnut straight-grip buttstock with later-added and slightly-proud checkered hard rubber Herter's buttplate and the splinter-style forend are very good plus with some scattered blemishes and handling marks. The length-of-pull is 14" with drops of 1 3/4" and 3" and the gun has 2 3/4" chambers, extractor, slightly-tarnished double triggers, pin-style cocking indicators on both sides of the frame and the Greener-style crossbotl closure keeps the barrels tight and on-face. (22A9803-15) {C&R} (700/900) Est. 700 - 900 U.S. Repeating Arms Co. Model 1886 Lever Action Rifle serial #ES1074, 45-70, 26" octagon barrel with an excellent bore. The metal surfaces retain 99% plus original blue with some slight wear on the toe of the smooth buttplate. The smooth capped pistolgrip walnut buttstock and metal-capped forend are very good plus to near excellent, there are a couple light impact marks and some other light handing marks. This 1997 Miroku rifle has no tang safety and is sighted with a tang-mounted adjustable peep sight and a bead front sight. (22A9897-82) (MODERN) (800/1200)	-	1469	often see first issue Agents with this much condition sporting a factory installed hammer shroud and a box. The metal surfaces retain about 99% original blue and anodized finishes. The hammer sides are hidden by the shroud but the top has full blue finish as does the standard trigger. The fully checkered walnut factory extension grips with silver Rampant Colt medallions rate excellent and are numbered to the gun. The gun still times and locks up correctly and shows little or no use since it left the factory in 1971. The gun includes the original factory two-piece woodgrain box that is correctly end labeled and numbered to the gun. There is a printed surcharge added to the label to indicate the shroud. The box rates excellent but the end label is starting to peel at one corner and a small piece of it is torn off. It also includes a manual and paperwork. A truly fine example of a shrouded Colt Agent. (8A9899-12) {MODERN} (700/900) Est. 700 - 900 Scarce Smith & Wesson Model 66-3 Combat Magnum Revolver serial #BEA5147, 357 Magnum, 3" barrel with an excellent bore. Rifle is equipped with target blocks, the front showing light wear		U.S. M1 Garand Rifle By Springfield Armory serial #1135252, 24" 1-43 dated Springfield Armory barrel with an excellent bore. The metal surfaces retain about 98% arsenal reapplied parkerized finish, loss due to light wear along the edges and contact points. The bolt retains about 95% original blue loss due primarily to operational edge wear. "AH / 4-65" has been written on the interior right side of the frame. The walnut stock and handguard remain in very good condition as lightly cleaned with remnants of light scratches and handling marks. The only visible marking is an un-circled large "P" on the front of the pistolgrip. Rifle features a two-slot gas plug, T-105 rear sight, a five section cleaning rod, loop oiler and combination tool are located in the butt and a khaki web sling is included. A solid arsenal reworked M1 rifle. (5A9896-129) {C&R} (700/900)

1493 U.S. Model 1898/99 Krag Bolt Action Carbine by Springfield Armory 1496 Large Bore British Double Hammergun by Hemenway serial #120102, 30-40 Krag, 22" barrel with a very good plus, lightly serial #1227, 8 ga., 32" barrels showing about very good bores with light frosted bore with strong rifling. This gorgeous carbine is a Model 1898 pitting their full length, a few spots which are a bit more moderate. The carbine updated to Model 1899 specifications. The barrel, band, barrels show a plum brown and gray damascus pattern their full length, triggerguard and trap buttplate retain about 90% original blue which is with interspersed very light oxidation staining here and there, perhaps lightly fading towards the muzzle with a few light handling marks and a the oddly scattered light handling mark as well. The concave rib features spot of loss on each side of the barrel below the front sight toning to a simple brass front blade and is marked "G Hemenway London gunmetal gray, light silvering at the muzzle, light flaking on the bow of Damascus Steel" and there are very light engraved bands at the the triggerguard, and the toe and heel of the buttplate toning to gray. breeches and scalloping on the dolls head extension. The frame is The receiver is toning to a blue-gray patina while the sideplate and gate primarily a soft plum brown patina with some remnants of retain strong smoky oil-guenched case-hardening with a small area of case-hardening on the flat between the two raised bolsters, with good pinprick pitting and some thinning to brown on the gate. The bolt is quality tight flowing English scroll in perhaps 50% coverage. The mostly bright with the handle toning to gray with some light freckling lockplates are more of a blue-gray case-hardened patina, each maker while the extractor claw retains strong original fire blue. The Model 1898 marked and showing strong traces of original case colors beneath smooth walnut handguard rates excellent save for a crack bisecting it hammers, with the same sparse loose scroll. The triggerguard and behind the rear sight and a hairline crack ahead of the rear sight. The forend metal have toned to a plum brown patina with softening gorgeous Model 1899 smooth walnut straight grip stock rates excellent engraving, the bow of the guard with a couple dings. The checkered with a few faint handling marks on the underside of the forend and is English walnut capped pistolgrip buttstock rates about very good, likely a field replacement as there is no cartouche. There is a very crisp showing nice grain figure beneath the darkening original varnish, with circled "P" firing proof and "N" inspection mark behind the triggerguard. the expected light dings and handling marks throughout. It shows the The stock is equipped with a lower sling swivel which is a recognized beginnings of cracks left and right emanating from the lockplates and a field modification while the original barrel band has been replaced with a small chip to the rear of the upper tang, they are however tight and will rifle band with swivel, also a field modification. The barrel is sighted with not flex and may have been successfully arrested. There is a nice the original blade front and a C-marked Model 1902 rear with swing-up scalloped pistolorip cap of horn, it shows a few chips at its leading edge. aperture, a three piece cleaning rod is stored within the trap buttplate and the length of pull to the checkered horn buttplate is 14 3/4". The and the smooth action appears to function well mechanically. A beautiful forend rates perhaps very good, the checkering worn nearly smooth and example of the Model 1898 carbine retrofitted to 1899 specifications. the horn tip insert lost to the years, with a minor chip here or there. The (23A9807-68) {ANTIQUE} [Vincent Coniglio Collection] (800/1200) rebounding locks seem to function well mechanically, they are in-time. Est. 800 - 1.200 the right hammer showing a repair to its spur. The barrels are off-face Colt Official Police Double Action Revolver 1494 currently and exhibit lateral and vertical play; two unmarked brass 8 ga. serial #13697, 22 LR, 6" barrel with an excellent bore. This unloaded holes are included with the arm. The shield-shaped monogram 1939-manufactured revolver retains about 95% original blue, the grip plate along the toeline is un-engraved and the underside of the barrels frame starting to thin to gray along with high edge wear and a few exhibit British proofs. The arm has an overall length of 48 3/4" and sparsely scattered spots of light pinprick pitting mostly along the cylinder weighs in at 14 pounds. An honest, and still attractive, behemoth from that show marks from a light cleaning. The face of the checkered trigger the days of market wild fowling, that may be worth the tightening after a and hammer spur are toning to gray with strong blue on the remaining close inspection of the tubes. (3B9795-7) {ANTIQUE} (800/1200) appropriate surfaces. The un-numbered checkered walnut factory Est. 800 - 1,200 Unmarked Large Bore European Percussion Double Fowler service grips with silver Rampant Colt medallions rate about excellent 1/107 with light handling marks on the butt. This pre-war gun features a round 7 ga., 35" barrels with lightly oxidized bores. The barrels on this big half-moon front sight and it still times and locks up correctly with a crisp British-looking fowler show Belgian proofs on the underside and appear action. A fine example of a rimfire Official Police. (8A9645-33) {C&R} to be 7 bore (roughly .887 at the muzzles) and show a fading deep [Larry J. Cummings Collection] (700/900) brown and gray damascus pattern with overall light oxidation speckling Est. 700 - 900 and some areas which when cleaned will leave light pitting behind. The 1495 Ithaca Flues Model Grade 3E Ejectorgun concave rib shows a brass front bead and is marked only "Fine Twi serial #312600, 20 ga., 28" barrels choked modified and full with bright with a bit of very light engraving on the rib extension, both of the excellent bores, the right tube showing some extremely light remnants of breeches a dull pewtery gray case-hardened patina. Each of the bar very light oxidation. The barrels retain about 98% excellent quality under lockplates is a pewter gray case-hardened patina and shows light restored blue with very light bands of engraving at the breeches, with sprays of loose and tight scroll with light borderline engraving, this silver bead front and midrib white bead sights. The frame retains continuing onto the long upper tang as well. The balance of the iron hardware is all a dull gray and soft brown lightly oxidized patina, perhaps 20% original color case-hardening, primarily behind the fences and beneath the lever, the balance a smoky pewter and plum patina. showing sprays of light good quality scroll here and there, the bow of the The frame shows typical loose open flowing Ithaca Gun scroll with game guard showing a bit more oxidation and some light pitting. The birds the left and right and a flying waterfowl on the belly of the frame. European walnut stock rates very good, perhaps showing an old light The triggerguard shows nice restored blue as well, with original blue on cleaning many years ago but with excellent wood-to-metal fit, only the the top lever and safety. The checkered walnut pistolorip buttstock rates toe of the butt hanging guite a bit proud, and nice coarse checkering in otherwise excellent with some lovely grain figure throughout, showing the area of the grip and forend. The edges remain crisp and the arm remnants of a repaired crack through the wrist in the area of the tang, it retains the light dings and handling marks that come from field-use. The appears to have been well-done and is solid and most of the repair right tumbler-hammer will not hold on half cock but does hold at full, the neatly camouflaged within the checkering, the triggerguard showing a left lock works well mechanically and at full cock the hammers are in slight ripple which could doubtless be easily rectified. The length of pull time. The barrels on this heavy gun are retained by dual wedges to the Ithaca Gun Co. "rising sun" recoil pad is 14 1/4" with drops of 1 through German silver escutcheons, the rear wedge has one edge of its 5/8" and 2 3/4". The splinter forend rates very fine with a large ebony tip head broken off, and an antique brass-tip ramrod with a wad pull end is insert and the beginning of a small crack at the left side at stock iron, the included. Overall length of this big fowler is 51 1/2", weighing in at a checkering somewhat finish-filled. The flat of the iron shows what mere 14 pounds. A very respectable representative example of a large appears to be a factory re-numbering to this frame, the original number bore market fowler of yesteryear that would be very impressive over the beneath is not readily discernible but clearly the forend fit this gun mantel or above the bar. (39795-4) {ANTIQUE} (800/1200) perfectly. The gun locks up tight on face with the top lever just slightly Est. 800 - 1,200 right of center and seems to function well mechanically with robust ejectors. A very attractive grade 3 ejectorgun, the silver shield-shaped monogram plate along the wrist engraved "PRK". (3B9771-16) {C&R} (800/1200) Est. 800 - 1,200

### Title/Description

Lot Title/Description

1498 Rare New Orleans Double Barrel Percussion Combination Gun by Allen & Hille .46 cal by 10 ga., 35" barrels showing oxidized bores. New Orleans-made arms are rather rare in their own right, this is a fairly rare combination rifle-shotgun percussion arm, once in the collection of prominent Southern cotton merchant, James Lyman Crump. The barrels are an overall soft plum brown patina with scattered oxidation and perhaps a few spots of scattered light pitting, most prominent near the breeches. The shotgun barrel shows some remnants of a damascus pattern and the rib features an inlaid silver blade front sight and flattop u-notch rear with chiseled front, it is marked "Allen & Hille New Orleans", the rib extension with dual inlaid silver lines. The bar under locks and upper tang are a similar plum and brown patina, each of the lockplates neatly maker marked with plates and hammers showing only light borderline engraving, with some scattered light pitting. The spur has broken off the left hammer and there is some more moderate pitting at the rear of its lock, it would likely be a fairly easy repair for a good metal man. The arm is appointed with German silver furniture in the form of a nosecap tailpipe with lightly chiseled extension, simple dual wedge escutcheons, lightly engraved German silver triggerguard with rear grip flourish, a neat pendulum shaped patchbox and German silver buttplate showing light borderline engraving on its tang. The iron triggerplate front extension shows light chiseling as well and the arm is equipped with a single set trigger for the rifle barrel, the door of the patchbox neatly engraved in fancy script "Pocahontas" with a bit of light engraving surrounding. The English walnut buttstock rates very good as cleaned many years ago regaining some light dings and handling marks and showing some very lovely grain figure beneath the added varnish. There is a nice flared left side shadowline cheekpiece and the checkered wrist has worn nearly smooth, the checkering along its top edge sanded away. There are small cracks to the rear of each of the stock flats behind the lock, and the left and right of tang to the rear of the nipples flares shows some erosion from percussion cap splash. The left lock functions mechanically, the right lock does not always hold well at full cock, however the set trigger works as-designed, there is an antique replacement ramrod included, the rear ramrod thimble is not present but this is unobtrusive. Joseph Allen & Charles Hille wear active in New Orleans from 1842 to roughly 1859, it is highly likely this arm could've seen use in the American Civil War by some Southern fellow who used it to put meat on the table prior to the hostilities. Consigned directly from the Crump family, James Lyman Crump of Georgia made his fortune exporting cotton from Georgia to Italy. He later resided in New Orleans and purchased a 3,600-acre estate in Mississippi where he built a hunting lodge with extensive gardens on the Jourdan River, named Holly Bluff Gardens at Bay St. Louis, this arm hung over the fireplace there for many years. (3B9829-2) {ANTIQUE} (800/1200) Est. 800 - 1,200 Large Bore Moore & Harris Percussion Double Fowler 1499 serial #2168, 8 ga., 38" barrels with a mostly bright very fine bores, which likely would rate excellent for most of their lengths, their first third near the muzzles showing light oxidation and perhaps some light pits. The barrels themselves are a pleasing mostly smooth mix of deep plum brown and a pewter gray patina with scattered light oxidation staining and perhaps a spot here and there of light pitting, with perhaps a light ding or handling mark here and there. The concave rib features remnants of a silver bead and is maker marked "Moore & Harris (Roval Warrant) London"; the Spartan breeches a dull gray case-hardened patina, the left showing some oxidation. The lockplates retain some trace case colors and are primarily a gray and pewter mottled case-hardened patina and are unadorned, as are the hammers, each plate maker marked "Moore & Harris". The balance of the furniture is Spartan and unadorned and is very utilitarian as one would expect on one of these large bore fowlers designed for market hunting; the flared heads of both wedges show chips left and right but this is of no real consequence to the arm. The furniture is primarily a pewter gray or plum brown in character, showing a few the very sparsely scattered spots of light oxidation or pitting here and there, the bow of the guard neatly engraved "No. 2168". The length of pull to the smooth steel buttplate is 14 1/4", the monogram plate along the toeline remains un-engraved. The English walnut stock shows coarse checkering at the wrist and rates very good with much original varnish and the overall light dings and handling marks that come from a field-used arm. The locks are crisp and mechanically functional and the hammers remain in time, what is likely the original ramrod is present with screw-off wad pull end . Moore & Harris make some very fine shotguns, this example, Spartan as it is, is no exception and quality made throughout. Barrels, stock and guard are all numbered alike. (3A9795-5) {ANTIQUE} (750/950) Est. 750 - 950

1500	Unmarked Large Bore Belgian Percussion Double Fowler 8 ga., 34" barrels showing oxidized bores. The barrels show a scant gray and brown damascus twist pattern their full length, with scattered oxidation staining here and there and perhaps a few spots of very light pitting. The concave rib has a simple brass bead front sight and is marked "London Fine Twist" showing some very rudimentary engraving at the rib extension. Both of the breeches are a dull gray-brown case-hardened patina and each features an inlaid sliver band, dual inlaid bands on rib extension. The back action lockplates, heavy tang, triggerguard and nosecap / tailpipe are a pewter and brown patina showing light open flowing scroll throughout, with the front extension lightly chiseled. There is a very heavy and large smooth steel buttplate with a tiny bit of engraving atop its tang, providing a 14 1/4" length of pull. The European walnut stock rates very good as lightly cleaned years ago, retaining the expected light dings and handling marks beneath the finish. It shows some lovely grain figure in the butt, some fading coarse checkering at the wrist and seems sound overall with two very tiny cracks at the rear of the lockplates. The locks are crisp and mechanically functional and the hammers are in-time and a later ramrod is included. The overall length of this dainty little Belgian fowler is nearly 51 inches and weighs in at a mere 15 1/4 pounds (the width of the butt alone is almost 6" heel to toe). An impressive large bore fowler from yesteryear that would look great above the mantel or bar. (3A9795-6) (ANTIQUE} (700/900) Est. 700 - 900 Winchester Model 1897 Slide Action Shotgun serial #871892, 12 ga., 20" plain professionally shortened barrel,
	un-choked with a bright excellent bore; it is marked "full" near the
	breech. The metal surfaces retain about 95-97% original blue, the loss
	due to some fading and flaking on the magazine tube, action bar and some light handling marks and scratches, primarily on the barrel ahead
	of the band; there are also some light and moderate circumferential
	scratches in this area, consistent with someone removing a bayonet lug-handguard adapter which may have been present years ago; the
	set-back of the front bead is such that it looks the correct distance back
	for bead placement on a bayonet-lugged handguard. The smooth pistolgrip walnut buttstock rates very fine with nearly all its original varnish and the expected light flakes and handling marks from the years and a light crack at the toe. The grooved forend is similar with light
	handling marks and a very light hairline crack at its nosecap. The
	barrel-to-frame lockup is excellent and the gun is tight and functions well mechanically. Overall a very nicely-shortened 97, still in a fine state of
	condition, that would be great on the cowboy action range, perhaps
	once used as a guards gun, having the evidence of having had handguard installed. (39908-5) {MODERN} (700/900)
1502	Est. 700 - 900 British Pattern 1759 Light Dragoon Pistol by Tower
	.72 cal, 9" round barrel with an oxidized bore. This pistol has been
	neatly reconverted to flint and fitted with an antique martial lock. The barrel and lock show evidence of an old cleaning and have mostly toned
	to a mild gunmetal patina showing some scattered darker gray areas of old light nitting a bit more moderate along some areas of the lockplate
	old light pitting, a bit more moderate along some areas of the lockplate along with a few light dings. The top of the barrel shows a spurious
	later-engraved regimental marking "17 - L - D" suggesting the infamous 17th Light Dragoons. The lockplate retains good markings with
	"TOWER" at the rear and "(Crown) / GR" Royal Cypher in the center
	with no date visible. The brass hardware has toned to a mild ocher patina showing some scattered light dings and handling marks. The
	triggerguard and buttcap show what appear to be honest regimental
	markings "C / 17" on the triggerguard and "E / 54" on the buttcap. The smooth walnut stock remains in good condition as refinished long ago,
	about 6" of the forend having been neatly reattached, a few of the pin holes show neatly-executed repairs and there are a few scattered thin
	cracks and light dings. The edges of the raised border around the upper
	tang remain quite nice and there is a small indecipherable marking carved into the left flat. A few small screws are replacements, a correct
	style brass-tipped hickory ramrod is included and the lock functions
	loosely. (13A9833-60) {ANTIQUE} (800/1200)

There are no U.S. markings on the lock or butt, the lock has early "E.WHITNEY / N.HAVEN" markings in front of hammer and the only other markings are "U" on the right side of the barrel bands and a small "U / 51" atop the barrel between the front sight and barrel band. The metal surfaces have toned to a brown and gray patina with scattered fine oxidation, a few light dings and impact marks, the buttplate showing a little more oxidation and some fine pitting, the forend tip is a pale gray with light impact marks. The walnut stock remains very good with lightly rounded edges, a fingernail sized chip in the front of the left stock flat and a small thin crack at the rear of the lockplate. There are small thin drying cracks at the edge of the buttplate, gaps at the heel and toe, "KM" incised carved in the rear left side of the buttstock along with light dents and handling marks from the years. The musket is equipped with a proper front sight, Whitney pierced aperture rear sight and a brass tipped iron rarmod. The lock remains crisp and functions mechanically. A solid state contract Whitney musket. (5A9896-92) {ANTIQUE} (700/900)	1545	U.S. M1 Garand Rifle by Springfield Armory serial #3649100, 30-06, 24" 4-45 dated Springfield Armory barrel with a bright excellent bore. The metal surfaces retain about 97% arsenal parkerized finish with light wear on the high edges, some scattered specks of light oxidation staining and minor pinprick pits. The walnut stock is in very good plus condition as lightly cleaned with an about 1" linear impact mark and small shallow chip on the right side of the buttstock, two small impact marks on the handguard, and some scattered light handling marks; the forward half of the handguard appears to be a replacement and is loose between the lower band and handguard ferrule. The left side of the stock is faintly marked with a DoD acceptance stamp on the left side below the receiver, a soft circled "P" proof behind the triggerguard, and the barrel channel is crisply stamped "3144". The receiver markings remain crisp and the barrel markings have softened. All parts are of Springfield Armory manufacture with the trigger housing marked "-12", the hammer marked "-5", the relief cut operating rod is "9" marked, and the bolt is marked "-12". The rifle features a stamped triggerguard, 2-slot gas plug, and a lockbar rear
	1545	Whitney Connecticut Contract 1861 Percussion Rifle-Musket .58 cal., 40" barrel with a bright excellent bore equipped with seven groove rifling and some light staining closest to the muzzle. There are no U.S. markings on the lock or butt, the lock has early "E.WHITNEY / N.HAVEN" markings in front of hammer and the only other markings are "U" on the right side of the barrel bands and a small "U / 51" atop the barrel between the front sight and barrel band. 	German Police-Marked J. P. Sauer 38H Semi-Auto Pistol	1625	Custom Remington Rolling Block Pistol
	serial #451606, 32 ACP, 3 1/2" barrel with a bright excellent bore. The		44 S&W Russian, 10" part round part octagon barrel with a bright
	metal surfaces of this pistol retain about 90-92% original blue with most		excellent bore. The metal surfaces of this interesting custom pistol retain
	of the loss due to the gripstraps thinning to gray patina, some high edge		about 96% fine quality period reapplied rust blue showing some mild
	wear and mild thinning and a bit of mild freckling along the slide. The		high edge wear, a few tiny handling marks and the gripstraps toning
	alloy trigger is a pale gray tone and all markings remain crisp and clear		slightly to plum-brown patina. The barrel shows a slightly softened
	with proper "(Eagle) / N" commercial proofs and "(Eagle) C" police		
			double-struck Remington Arms Co. address, the underside with "44
	acceptance stamp. The original black checkered Bakelite grips with		S&W R." cartridge designation and the left side frame with just a few
	"SuS" logo on the left panel remain in excellent condition showing a		letters legible, one of them being the "S" from the original military proof
	couple mild handling marks. One original magazine is included and the		mark. The action pins show fine restored straw colors and the remaining
	serialized parts are matching. This example is equipped with the		small parts show a nice quality blue finish with some mild high edge
	slide-mounted safety lever and the action seems to function well		wear. The smooth walnut grip and forend remain in very good plus
	mechanically. A very nice Police contract 38H. (13A9807-335) {C&R}		condition showing a heavy added varnish that shows some moderate
	[Vincent Coniglio Collection] (600/800)		crazing along the left sides, a little more mild on the right side grip and a
	Est. 600 - 800		few other light handling marks. The grip is of rather generous
1622	Remington Model 95 Double Deringer	1	proportions with a flared base. The pistol is sighted with an elevation
	serial #551, 41 RF, 3" barrels with partially bright good bores showing		adjustable v-notch rear sporting sight, large silver bead front and there is
	light pitting their full-lengths and strong rifling throughout. The metal		a small dovetail and screw hole for a tang sight at the top back edge of
	surfaces of this Type III pistol retain about 92% original nickel finish		the frame. The action seems to function well mechanically. Really a
	showing some scattered very fine flaking to a pale gray-brown patina		nicely-constructed pistol that may make for a fine shooter.
	along either side of the frame and right side barrels, a few scattered light		(13B9670-468) {ANTIQUE} [David & Lore Squier Collection] (600/800) Est. 600 - 800
	dings and minor handling marks. The trigger and latch retain faint pale	4000	
	fire blue and the hammer also retains strong fading original blue. The	1626	
	screw heads show some very minor slot wear and the barrel address		.54 cal, 8 1/2" round barrel with a moderately oxidized bore. The metal
1	remains crisp. The black checkered hard rubber grips remain in very		surfaces of this pistol have mostly toned to a pewter gunmetal patina
	good plus condition showing some areas of mild smoothing and		showing partially smoothed-over heavy erosion at the breech and some
	handling marks, more noticeable along the left panel, and both fit the		overall remnants of light pitting. The breech shows visible "JH / P" proofs
	frame very well. The barrels are matching the frame, the hinge shows no		and the lockplate markings remain crisp with 1847 date at the rear. The
	cracks and lock-up shows a little minor play. The hammer functions		brass hardware has mostly toned to a pale goldenrod patina showing
	crisply with properly pivoting firing pin. (13A9362-74) {C&R} [Edward W.		some scattered mild dings and handing marks. The trigger actually
	Marron, Jr. Collection] (600/800)		retains a generous amount of brilliant fire blue along the sides. The
	Est. 600 - 800		smooth walnut stock remains in very good plus condition showing some
1623	Remington Model 95 Double Deringer		old fine scratches along the right side, scattered light dings and handling
	serial #1841, 41 RF, 3" barrels with bright near excellent bores showing		marks. The stock fit remains very nice overall and the left flat shows two
	a little minor frosting in the grooves and strong rifling throughout. The		very strong cartouches. The swiveling ramrod assembly is intact albeit
	barrels of this December 1924 date-coded Type III pistol retain about		rather loose and the lock functions crisply. (13A9739-15) {ANTIQUE}
	95% original bright blue showing some scattered light flaking to pleasant		(500/700)
	gray-brown patina and a spot of tiny dings at the left side forward edge		Est. 500 - 700
	of the top barrel that are very unobtrusive. The frame has mostly toned	1627	, , , , , , , , , , , , , , , , , , , ,
	to a deep gray-brown patina showing strong remnants of blue in the		serial #416990, 45-70 Govt., 32 5/8" barrel with a bright perhaps very
	protected areas that has been touched up long ago along the backstrap		good bore showing a few areas of light oxidation in the otherwise strong
	which shows some very fine pinprick pits. The latch shows some		rifling. The barrel retains about 85-90% lightly-thinning arsenal blue
	remnants of pale fire blue while the hammer retains most of its original		
1			which is toning to a blue-brown patina around the muzzle with scattered
	blue. The hinge screw hole and screw slot show some light wear and		light handling marks and fine spots of freckling toning to brown overall.

The bands and triggerguard have some small areas of wear toning to a gray-brown patina with some light freckling, fine handling marks, a couple tiny dings in the rear edge of the front band and good amounts of arsenal blue in the protected areas. The heel and toe of the buttplate are toning to a gray-brown patina with some old light oxidation and the 1873-dated breechblock, lockplate and breech tang have aged to an overall dark gray patina with some small freckles toning to brown and traces of original case-hardened colors on the hammer and breech tang. The lockplate is properly marked with a Federal Eagle ahead of the hammer and "U.S. / SPRINGFIELD" below the thumbpiece and the breech of the barrel displays a crisp "V / P / (eagle head)" proof. The black walnut stock rates very good plus as lightly cleaned with a touch of
1624	tool marks but the hinge is otherwise intact and un-cracked and the barrel markings remain crisp. The black checkered hard rubber grips remain in very fine condition showing some scattered light handling marks, mild discoloration and the right panel is a little proud at the toe. The barrels are matching the frame, lock-up shows a hint of minor play and the hammer functions crisply with properly pivoting firing pin. (13A9362-69) {C&R} [Edward W. Marron, Jr. Collection] (600/800) Est. 600 - 800 Belgian Large Bore Rolling Block Sporting Pistol by Francotte serial #1563, 500 CF (likely 500 Tranter), 8" part round part octagon barrel with a bright very good plus bore showing some scattered small		light handling marks and fine spots of freckling toning to brown overall. The bands and triggerguard have some small areas of wear toning to a gray-brown patina with some light freckling, fine handling marks, a couple tiny dings in the rear edge of the front band and good amounts of arsenal blue in the protected areas. The barrel of this interesting pistol has mostly toned to a pleasant mottled gray patina showing some scattered remnants of old light pitting and minor freckling. The left barrel flat shows a crisp Belgian inspector stamp and antique proof mark. The action retains perhaps 75% vibrant case-hardened colors showing some overall light oxidation staining, a few areas of mild pinprick pitting and toning to silvery gray patina. Some of the frame screws show moderate slot wear and the left side of the frame is marked with Francotte's "(Crown) / AF" stamp and "500" calliber designation. The action partial grign on either side. The breechblock and graceful hammer remain partially bright showing remnants of old oxidation. The checkered walnut grips and forend remain in about very good plus condition having darkened somewhat		light handling marks and fine spots of freckling toning to brown overall. The bands and triggerguard have some small areas of wear toning to a gray-brown patina with some light freckling, fine handling marks, a couple tiny dings in the rear edge of the front band and good amounts of arsenal blue in the protected areas. The heel and toe of the buttplate are toning to a gray-brown patina with some old light oxidation and the 1873-dated breechblock, lockplate and breech tang have aged to an overall dark gray patina with some small freckles toning to brown and traces of original case-hardened colors on the hammer and breech tang. The lockplate is properly marked with a Federal Eagle ahead of the hammer and "U.S. / SPRINGFIELD" below the thumbpiece and the breech of the barrel displays a crisp "V / P / (eagle head)" proof. The black walnut stock rates very good plus as lightly cleaned with a touch of added finish, a repaired crack in the left side of the cleaning rod channel behind the upper band and some scattered light handling marks. The remnants of a "SWP / 1879" inspector's cartouche is on the left stock flat and the faint remnants of a circled "P" firing proof is behind the triggerguard. The stacking swivel and upper sling swivel are a little bent, the barrel is sighted with a blade front and a R-marked Model 1879 buckhorn rear, a slotted button-head ramrod with retaining swell is included and the three position lock and tumbler are strong and crisp. A very handsome example of a Model 1884 Trapdoor rifle. (23A9840-7) {ANTIQUE} (600/800)
1624	tool marks but the hinge is otherwise intact and un-cracked and the barrel markings remain crisp. The black checkered hard rubber grips remain in very fine condition showing some scattered light handling marks, mild discoloration and the right panel is a little proud at the toe. The barrels are matching the frame, lock-up shows a hint of minor play and the hammer functions crisply with properly pivoting firing pin. (13A9362-69) {C&R} [Edward W. Marron, Jr. Collection] (600/800) Est. 600 - 800 Belgian Large Bore Rolling Block Sporting Pistol by Francotte serial #1563, 500 CF (likely 500 Tranter), 8" part round part octagon barrel with a bright very good plus bore showing some scattered small patches of light oxidation and minor pinprick pitting with strong rifling throughout. The walnut stock is in about very good condition with multiple light and one about moderate ding on the left side of the stock below the receiver, an about 1/2" chip below the safety, and scattered light handling marks. The stock is marked with an eagle head proof in front of the magazine floorplate, "3N / (Eagle Head)" crisply stamped behind the triggerguard, and the stock is serialized and matching to the rifle on the toe line, with one digit partially obscured. The receiver and barrel markings remain crisp, the barrel is neatly import marked on the underside between the front sight base and nosecap, the bolt is serialized to another rifle, and the nosecap, handguard, bolt stop, rear sight, safety, and bolt are all "E" for Eddystone marked. The rifle retains		points, thinning blue on the receiver and rear sight, some scattered li pitting and light oxidation. The laminated hardwood stock is in about good condition as lightly cleaned with two thin 2" and 3 1/2" cracks traveling rearward from either side of the triggerguard, a neatly repair break at the wrist that goes unnoticed at first glance with a touch of fi behind the receiver, a few light impact marks between the barrel ban an old 1 1/2" narrow divot on the underside of the forend, scattered li dings and handling marks, and an added finish; the stock and handguard are numbered to different rifles, a remnant of an "(Eagle) is stamped on the right side of the buttstock, and "dot" is stamped on toe line. The receiver and barrel are correctly marked with exception the serial number being stamped on the barrel rather than the receiver

The rifle retains the correct open sights, and appears to function well mechanically. A nice example of an arsenal-refurbished Model 1917 Enfield that appears to have all Eddystone parts. (14A9816-5) {C&R} (500/700)		points, thinning blue on the receiver and rear sight, some scattered lip pitting and light oxidation. The laminated hardwood stock is in about good condition as lightly cleaned with two thin 2" and 3 1/2" cracks traveling rearward from either side of the triggerguard, a neatly repair break at the wrist that goes unnoticed at first glance with a touch of fi behind the receiver, a few light impact marks between the barrel bann an old 1 1/2" narrow divot on the underside of the forend, scattered li dings and handling marks, and an added finish; the stock and handguard are numbered to different rifles, a remnant of an "(Eagle) is stamped on the right side of the buttstock, and "dot" is stamped on toe line. The receiver and barrel are correctly marked with exception the serial number being stamped on the barrel rather than the receiver ring, the bolt assembly is numbered to the rifle, stamped with soft "65 waffenamts on the safety and shroud, and a correct "140" waffenamt the underside of the bolt handle above a small stamped "x". The rear sight base is marked with a softened "135" waffenamt, with a second illegible waffenamt next to it, and the rear sight leaf is numbered to a different rifle; the bayonet mount is also numbered to a different rifle. The triggerguard is correctly "byf" and "135" waffenamt marked, the floorplate also correctly stamped "byf". The barrel bands are unmarkk with the lower barrel band a later stamped replacement; the buttplate correctly subcontractor marked "gqm / 44". The rifle is sighted with the
	marks. The walnut stock is in about very good condition with multiple light and one about moderate ding on the left side of the stock below the receiver, an about 1/2" chip below the safety, and scattered light handling marks. The stock is marked with an eagle head proof in front of the magazine floorplate, "3N / (Eagle Head)" crisply stamped behind the triggerguard, and the stock is serialized and matching to the rifle on the toe line, with one digit partially obscured. The receiver and barrel markings remain crisp, the barrel is neatly import marked on the underside between the front sight base and nosecap, the bolt is serialized to another rifle, and the nosecap, handguard, bolt stop, rear sight, safety, and bolt are all "E" for Eddystone marked. The rifle retains the correct open sights, and appears to function well mechanically. A nice example of an arsenal-refurbished Model 1917 Enfield that appears to have all Eddystone parts. (14A9816-5) {C&R} (500/700)		points, thinning blue on the receiver and rear sight, some scattered lip pitting and light oxidation. The laminated hardwood stock is in about good condition as lightly cleaned with two thin 2" and 3 1/2" cracks traveling rearward from either side of the triggerguard, a neatly repair break at the wrist that goes unnoticed at first glance with a touch of fi behind the receiver, a few light impact marks between the barrel barn an old 1 1/2" narrow divot on the underside of the forend, scattered li dings and handling marks, and an added finish; the stock and handguard are numbered to different rifles, a remnant of an "(Eagle) is stamped on the right side of the buttstock, and "dot" is stamped on toe line. The receiver and barrel are correctly marked with exception the serial number being stamped on the barrel rather than the receiver ring, the bolt assembly is numbered to the rifle, stamped with soft "65 waffenamts on the safety and shroud, and a correct "140" waffenamt the underside of the bolt handle above a small stamped "x". The rear sight base is marked with a softend "135" waffenamt, with a second illegible waffenamt next to it, and the rear sight leaf is numbered to a different rifle; the bayonet mount is also numbered to a different rifle. The triggerguard is correctly "byf" and "135" waffenamt marked, the floorplate also correctly stamped "byf". The barrel bands are unmarked, with the lower barrel band a later stamped replacement; the buttplate correctly subcontractor marked "gqm / 44". The rifle is sighted with the standard barleycorn front sight and leaf rear, the front sight hood is absent, and the rifle appears to function well mechanically. Included of

(25A9899-45) {C&R} (600/800) Est. 600 - 800 Japanese Type 14 Semi-Auto Pistol by Nagoya Kokubunji serial #10906, 8mm Nambu, 4 1/2" barrel with a bright very good plus bore showing some light pitting near the muzzle and otherwise strong rifling throughout. The metal surfaces of this March 1935 date-coded pistol retain about 95% original blue showing some mild high edge wear, a little light pitting. The small parts show good straw color with mild silvering along the trigger face and the safety toned to gunmetal and showing some mild pinprick pitting and a few small dings. All markings remain intact and crisp. The grooved hardwood grips are pencil-numbered to the gun and remain in very fine condition showing an operational mark along the left panel. Included is one nickel-plated aluminum base magazine in near excellent condition that is matching the pistol, the firing pin and its extension are un-numbered and the remaining serialized parts are matching. A very nice Nambu pistol for the martial collector. (13A9788-13) {C&R} (600/800)

Title/Description Lot

1746	Unmarked Smith Patent Civil War Percussion Carbine
	.50 Cal, 21 5/8" part round, part octagon barrel with an excellent bore. The barrel and buttplate retain about 97% original blue that has some
	light handling and tool marks present along with a few areas of very light surface oxidation and staining. The top catch, triggerguard and barrel
	band are a brighter copper brown with light edge wear and some light staining. The action is overall a mottled gray with brown patina and has
	some light tool marks and a few areas of light surface oxidation as well.
	The barrel bolster and some of the internal parts have modern Allen
	head machine screws, some of the other screws have some minor slot
	damage. The walnut stocks rate very good and have some small dings
	and other handling marks. The forearm has a small hole drilled in its center, the buttstock has bilateral cracks at the top of the wrist. Carbine
	is equipped with sling swivels and has a square blade replacement front
	sight blade and carbine rear sight. The sights sit at a slight rightward angle and the rear sight has been crudely fit to its dovetail with small
	impact marks on either side. The action appears to function correctly.

1747	Soviet M91/30 Mosin Nagant Bolt Action Rifle with PU Scope by Tula
	serial #PA4849, 7.62x54r, 29" barrel with a bright very good plus bore
	with a few spots of frosting but strong rifling. The metal surfaces retain about 99% arsenal blue finish with a few light handling marks, and the
	in-the-white bolt shows a few specks of oxidation. The hardwood stock
	is in very good plus condition with a few light dings on the pistolgrip and
	some scattered light handling marks, and is marked with a light rework
	mark on the right side of the buttstock. The "1944r" receiver date is
	partially faded, with the remaining Soviet proofs also light, the bolt is
	serialized and matching, and the floorplate and buttplate are numbered to a different rifle. The rifle retains standard open sights, and has also
	been fitted with a reproduction side base, the mounting screws for which
	are all absent, and an original scope and mount. The scope is serialized
	"No.26795", dated 1941, and appears to have been manufactured by
	Plant NKAP No. 296 Kharkov. The mount and scope retain 98% blue
	finish with light toning to brown, a few light handling marks, a few specks
	of oxidation, and features clear glass and a German No. 1 style reticle. Included with the rifle is the canvas sling, leather scope covers, canvas
	scope cover, and formula card indicating the scope was refurbed in
	1961. A solid facsimile sniper with a genuine PU scope. (14A9794-13)

4740	Est. 600 - 800
1748	Rare and Interesting Dixon Arrow Line-Throwing Gun serial #11503, 12 ga, 17" barrel with a good lightly pitted bore. The
	barrel and triggerguard of this modified Belgian "Zulu" shotgun are
	toning to a mottled gray patina as lightly cleaned during the period of
	use with some scattered areas of softened pinprick pitting, small spots of
	old light oxidation and light oxidation staining overall. The brass Snider
	conversion breechblock has aged to a mildly-tarnished dark mustard
	patina while the lock and buttplate are toning to an oxidized brown patina. The shortened smooth French walnut straight grip stock rates
	very good as cleaned long ago with a small wood filled repair by the lock
	screw escutcheon, a small drying crack in the left side of the buttstock, a
	flexing hairline crack in the right side of the forend and some scattered
	light handling marks. The barrel is sighted with a silver bead and the
	action remains strong and crisp with the Snider conversion appearing to
	function well mechanically. Included is an original line-throwing projectile with a brass head marked with a softened "DIXON ARROW" and a
	patent date which is illegible beyond "PAT" and with a suede leather gas
	seal on the other end. An interesting and very good condition antique
	piece of life-saving equipment whose brass breechblocks were,
	according to Flayderman, made under siege conditions from French
	church bells during the Franco-Prussian War. (23A9785-1) {ANTIQUE}

1749	U.S. Model 1840 Percussion Converted Musket by D. Nippes
	.69 cal., 41" barrel with an oxidized bore. The musket was converted to
	percussion using the "bolster-type" method. The metal surfaces have
	aged to an overall dull gray patina as cleaned with light pitting at the
	breech and scattered spots of finer pinprick pitting and old light oxidation
	overall along with some scattered light tool and handling marks on the
	barrel. The lockplate is marked "D. NIPPES / U.S." ahead of the
	hammer and "MILL / CREEK / PA / 1844" behind while a rather
	spurious-looking "C. S." has been stamped on the lockplate ahead of
	the hammer, on the breech of the barrel, and stamped over the "U.S."
	on the buttplate tang which is also numbered "7". The smooth black
	walnut straight grip stock rates good as lightly cleaned with some light
	added finish on the buttstock, a crack ahead of the upper lockplate
	screw, a couple hairline cracks around the lockplate, a small chip at the
	rear point of the lockplate and some scattered light handling marks
	overall from the years. The remnants of two oval inspectors' cartouches
	are on the left stock flat, "7" is on the comb, and the same spurious "C.
	S." is deeply stamped on the left side of the buttstock. The stud on the
	upper band spring is missing so that the upper band is not retained, the
	sling swivels and bayonet lug are intact, a correct trumpet-head ramrod
	with threaded end is included. (23A9735-18) {ANTIQUE} (600/800)
