Lot Title/Description

1050 Important American Eaglehead Sword Attributed to Major Jonathan Cass Accompanied by Framed Portrait This is a very nice and complete brass-hilted Eaglehead sword with smooth maple grip, once the property of famed Revolutionary war hero Captain, later Major, Jonathan Cass of Exeter New Hampshire. Jonathan Cass of Exeter New Hampshire was the son of Irish immigrants, some sources stating he was born in Exeter, some in Salisbury Massachusetts. A farmer and blacksmith by trade, he enlisted in the Continental Army the day after the Battle of Lexington, commissioned Ensign in November of 1776 in Scammel's 3rd New Hampshire Regiment of the Continental line. He would be promoted to second Lieutenant in August 1777 and to first lieutenant in May 1778 while in James Gray's company of the 3rd New Hampshire. He was promoted to Captain in the 2nd New Hampshire, although reports differ as to whether it was in 1781 or 1782. He was in the thick of the fighting at the Battle of Bunker Hill and went on to fight at Trenton, Princeton, Germantown, Monmouth, Saratoga and the Siege of Boston. He actually contracted smallpox in January 1778 while at Valley Forge. Post-revolution, in October 1786, he accepted a commission in the army, for the defense of the Western Frontier, serving under General "Mad" Anthony Wayne in the Northwest Indian War, earning the rank of Major in the 3rd Regiment U.S. Army. He took command of Fort Hamilton, in Ohio from General Wayne, it was while commander of Fort Hamilton on a reconnoitering mission, Cass' horse fell while jumping over a fallen tree and the Major's leg broke just below the knee. The wounded leg never healed, and required daily dressing for about 35 years, and contributed to his demise. He actually would settle in Ohio on a 4000 acre tract awarded him as a result of his service in the Continental Army, he is buried there at Dresden, in Cass Township, named for him. By period accounts, Major Cass had a striking and commanding presence: "...he had the look of one born to command, in height he was nearly or quite six feet, of perfect form, without superfluous flesh, black hair and piercing coal black eyes, and commanding brow". A valiant man, having fought through the entire revolution, and defeating even smallpox, an interesting post-war account of the "Great Exeter Mob" during the Paper Money Riot, or the "Exeter Rebellion" involves Capt. Cass, appointed federal marshal for the New Hampshire district, drawing his sword and walking through a mob of armed militia, knocking their bayonets and muzzles upward out of the way with his sword as he strode toward the legislature, rescuing New Hampshire President John Sullivan, escorting him back through the mob in the same manner, knocking muzzles and bayonets out of the way with his sword, returning the president safely to his hotel. The sword itself as a 28 1/4" single-edge blade, 2 3/8" at its widest point, with triple unstopped fullers. It is a pewter gray and plum brown patina showing areas of oxidation and light pitting with evidence of impact marks along its blade, some of which appeared to have been dressed many many years ago. The triple branched crossguard is beaded along the obverse branch with beading up the front of the knuckle guard. The grip is of figured maple and has taken on a nice tobacco-russet patina, showing the expected dings and handling marks from the years. The pommel shows a wonderful folkie, rudimentary Philadelphia-style Eagle head, the knuckle guard fastening just beneath his lower beak. All of the brass hardware has toned to a wonderful dull ocher patina, showing a few minor dings or handling marks here and there. An original brocaded sword knot is attached, its silver thread tarnishing nicely with the years. showing a few older repairs and a bit of fraying in spots, but remaining intact; the twisted braided tassels appearing all present, showing a bit of tattering here and there. The arm is complete with scabbard, showing no throat nor tip chape, and with lightly flaking body, which remains supple and flexible, 30" overall length, accommodating the blade very well. The oil-on-basswood painting accompanying the arm is a very vibrant depiction of Major Jonathan Cass, in his colonial officer's uniform, a right-facing bust of his left side, his stern gaze affixed to right of view. In the background over Cass' right shoulder can be seen British troops and an artillery piece. The depiction remains vibrant with wonderful colors over all and is framed in a period black milk paint soft wood frame. The view measures 29 3/4" x 23 1/2" with the overall frame dimensions measuring 36 3/4" x 30 5/8". There is a small brass plaque affixed to the frame below the view which reads "Major Jonathan Cass/1756-1830". The handle and pommel are a bit loose, no doubt due to shrinkage of the wood from the years, the blade seems to have been tightened within the base ferrule with an older piece of leather or wood, it too no doubt loosening due to shrinkage from the years, neither are obtrusive. A wonderful and important historic American sword, accompanied by a fabulous depiction of the brave and imposing soldier who no doubt wielded it with authority. It should be noted that the attribution of the sword is by internationally reknown and highly respected antiques dealer Peter Tillou, who unfortunately left us before sharing the provenance of its acquisition. (3E10250-78) [Peter Tillou Collection] (10,000/15,000) Est. 10,000 - 15,000

1051	Fine Venetian Schiavona Basket Hilt Broad Sword 36 1/2" broad straight blade with short narrow fuller with an asterisk-shaped swordsmith mark at the end of the fuller on both sides of the blade. This type I sword is one of the earliest patterns used by Dalmatian troops and guards of the Doge. Schiavona is derived from the Italian word Sciavoni which translates to "hired soldiers". The blade has a pleasing soft gray patina with some sparely scattered specks of light freckling and fine pitting, there is the occasional tiny impact mark and nick along the edges. The hilt is comprised of a "cats head" pommel with center boss on either side, barred and trellised basket, flattened guard with flared-end square quillon curved to the outside. The back guards is rather quite simple and are attached to form a thumb ring, covering the riccasso are two pointed bars that are crossing the basket and are attached at their tips, the black leather covered wood grip is grooved and shows no evidence of wire wrapping. The metal surfaces of the hilt have a patina identical to the blade and the retention ring at the pommel is missing, leaving the basket a bi loose, the obverse side of the pommel shows remnants of some sort of proof on the lower rear corner. The leather wrapping remains in excellent condition remaining fully intact showing only some very minor wear, there is no scabbard present. A lovely and interesting circa 1650 sword carried by early mercenaries hired to protect the leaders of the areas of what is present day Italy. (5C10250-111) [Peter Tillou Collection] (2000/3000) Est. 2,000 - 3,000
1052	Philadelphia Style Eaglehead Brass Hilt Infantry Officer's Sword 32" straight single edged unmarked blade with full-length fullers. This is a nice sword, and with exception of the grip, is very similar is design to the F.W. Wildman eagle pommel sword on page 186 of E. Andrew Mowbray's The American Eagle-Pommel Sword, The Early Years - 1794-1830. The blade is etched with white panels of foliate and military panoplies in between gilded tendrils, Federal Eagle and stands of flags on a blue background. The gilded etching retains about 80% original gilt, the outlines remaining bright and the etching clear. The background retains generous amounts of bright fire blue at the end of the forte showing decorative foliate silhouettes. The blade is toning to a silvery gray patina with scattered patches of light oxidation and pinprick pitting. The gilded all-brass hilt is comprised of a "gravestone" collared eagle head pommel, double rope wrapped column knucklebow, barred crossguard with scalloped finial, thumbguard with scroll on stippled background, hanging banner counterguard with Federal Eagle in panel on a stippled background and a reeded grip centered between two thin decorative ferrules. The hilt retains 95% original bright gilt, the exposed brass surfaces a bright goldenrod, with thin oxidation and verdigris forming along some of the edges. There is no scabbard present. An ornate Frederick W. Widman circa 1835 brass-hilted infantry officer's sword. (5B10250-2) [Peter Tillou Collection] (1500/2500) Est. 1,500 - 2,500
1053	List. 1,300 2,300 Early Eaglehead Spadroon Officer's Sword by Thurkle 31 1/2" straight blade with full-length fullers. Although there is no Thurkle touchmark, this eagle pommel hilt is certainly of Francis Thurkle design. The blade is etched with panoplies of arms, outstretched eagle under what appears to be 13 staggered stars and stands of flags on a squared blue background. The blade is a bright silver patina with scattered freckling and light oxidation with areas of more modest oxidation at the ricassos and tip. There is the occasional impact mark and some thin surface scratches in the reverse side of the foible. The blue has toned to dark gray patina with faint traces of bright blue scattered throughout, the etching has lightened through the years but remains visible, etching on the ricasso is lost to oxidation. The gilded brass hilt is comprised of an eagle head pommel with tapered bulbous capstan finial, stirrup knucklebow, crossguard ending in a disc-shaped finial with loop style crossguard and a faceted ferrule. The ivory grip is of the early reeded style and remains in excellent condition having darkened lightly with age. The brass surfaces retain much original gilt, fading to ocher along the edges with light surface marks and small patches of tarnish, the capstan finial shows bite marks from being tightened. There is movement in the hilt, common with swords of this age. The accompanying brass scabbard is decorated with floral and geometric motifs. The scabbard features dual hanging rings, frog stud and an acro style finial. There are two modest dents in the lower rear of the scabbard along with tiny dings toward the tips and a shallow dent in the lower front side, the throat is no longer present. A nice circa 1795-1800 Francis Thurkle sword. (5B10250-105) [Peter Tillou Collection] (1500/2000) Est. 1,500 - 2,000

Lot Title/Description

Wonderful Collins Statue Hilt Presentation Saber to Brig. Gen. James W. McMillan From the 160th New York Infantry This is a very ornate and handsome sword, appearing to be an 1850 non-regulation officers sword with straight blade with heavily etched martial panoplies and an extremely ornate chiseled and pierced hilt, with a chiseled-in-relief silver Roman centurion. The blade is 33" long and is straight with a flat center medial, each edge beveled. The obverse etching shows a standing Union infantryman with his rifle-musket, with ornate flowing scroll beneath, above the scroll continues showing a centurion breastplate with shield and fasces, more ornate scroll above this. The reverse showing the Collins & Co. Hartford Connecticut marking with the same scroll, here are Union infantryman bears the Standard of the Union, with more lovely scroll above him and "U.S." in fancy script, more scroll above this. The blade has been lightly cleaned and is now a dull pewter gray patina with moderate pitting from the foible forward on the obverse and about from the point of percussion forward on the reverse. The heavy guard shows ornate intertwining foliate rococo scroll with a single outer branch culminating in oakleaf and acorn decoration of the knuckle bow, ending at the handle proper with a flow of scroll. The backstrap shows thin incise plain and foliate ribs, culminating in a draped pommel with a spread-winged American Eagle at the buttcap, surmounting a Federal Shield. The most striking feature of the hilt is the grip area which shows a standing Roman centurion of silver. his gaze affixed left, left hand on sword and right on shield which is faced with an image of Medusa. The detail remains intact, the breastplate and bicep having softened only slightly from the years. The scabbard shows a light old polishing and retains much original silver plate, starting to drift and tone to an amber hue in places on the front. The throat is rather simple and lightly engraved while each of the collars show open foliate and geometric engraving with punch dot accenting, the top collar showing chiseled-in-relief fasces and torch, the lower with a Federal Eagle surmounting Federal Shield. There is a rather large tip chape about 5" in length showing open intertwining scroll and foliate decoration with a furled blazon of flags tied with tassel. Between the hanger bands we find the presentation "Brevet Maj. Gen./James W McMillan/from the Enlisted Men of the/160th New York Volunteers/As a Token of Respect/April 1865", just below the lower collar we find "Conquer We Must/for Our Cause Is Just". James Winning McMillan, originally a Kentuckian who moved to Illinois, served his country in both the Mexican American and Civil wars. He was appointed Colonel of the 21st Indiana Infantry and was with Butler's forces during the occupation of New Orleans in 1862, being wounded in the chest at Baton Rouge against Breckenridge's forces. He was promoted to Brigadier General in November 1862, which gave him command at the brigade, and at times, divisional levels of the XIX Corps under Brigadier General Emory from March 1863 to May 1864. He was in the Red River campaign and active most notably at the battles of Mansfield and Monett's Ferry, the latter where he and the rest of the 1st division held a steady line rallying on in spite of the near panicked union retreat. After this action XIX Corps joined Gen. Philip Sheridan's army of the Shenandoah, there being wounded during the Battle of Winchester when a shell fragment hit him in the head. Later he would engage in the repulse of Jubal Early's assault on Washington and later his pursuit after the rout of Early's forces. Interestingly, the 160th New York was present at all of these engagements, clearly under the command of McMillan in XIX Corps at one point or other, one very notable historical entry during the Third Battle of Winchester: "Upton sent Colonel Mackenzie and the 2nd Connecticut Heavy Artillery Regiment past the XIX Corps regiments to a rail fence where they fired upon Gordon's right flank. They received unexpected assistance when Brigadier General James W. McMillan from Dwight's 1st Division of the XIX Corps arrived with the 160th New York Infantry Regiment, and deployed on Mackenzie's right flank. This caused Gordon's men to retreat, and Thoburn's men leapt the wall and attacked." McMillan was brevetted Maj. Gen. on March 5 of 1865 in recognition of his Civil War service and resigned from the Army in May of that year, clearly this sword presented by adoring men that he once commanded just after that promotion. There is a very small soldered repair through the thin web at the base of the knuckle guard where the sword knot would attach, and another very small soldered repair midway down that same guard, neither are unobtrusive and are missed at first glance. A very stunning Collins & Co. sword, nearly never seen with such an ornate chiseled-in-relief martial hilt of such quality, presented to a gallant officer by hard-fighting men under his command. (3G10250-61) [Peter Tillou Collection] (5000/7000) Est. 5,000 - 7,000

1060 Exceptional Ornate W.H. Horstmann & Sons U.S. Model 1850 Officers Sword Presented to Lieutenant Heber Thompson 7th Pennsylvania Cavalry

This is an extremely ornate Horstmann presentation sword with beautiful hilt and highly decorated scabbard and deeply etched blade. The 35 1/2" blade features a wide single stopped and a narrow unstopped fuller and remains brilliant its full length with deeply etched martial panoplies on the obverse, with the WH Horstmann & Sons Philadelphia marking at the ricasso with the King's Head Weyersberg trademark impressed, the reverse shows the same brilliant deep etching. There is light foliate etching along the spine, the ricasso marked "iron proof". There are a few very sparsely scattered spots of light oxidation staining here and there and one 1" area of light pitting on the reverse side of the blade at the tip. The hilt itself is nothing short of spectacular, showing a wide cupped guard with spread-winged Federal Eagle with olive branches and acanthus leaf rococo relief decoration, continuing onto the dual branches; the knucklebow similarly embellished. The backstrap has fine floral overlay up its spine with the pommel culminating in a grotesque cap, all this exhibiting nearly all of its original gilt. The shagreen grip rates excellent with a single braided wire wrap flanked on both sides by dual simple gold wire. The scabbard shows a strong plum-browned finish, with simple gilt throat, and brass hanger bands with ornate rococo scroll appliqués with patriotic vignette at the center of each, a Federal Eagle atop shield with "e pluribus unum" in riband at the top hanger, with a standing Columbia with sword and Federal Shield on the lower, she leaning on a column with spiral riband reading "Liberty & Union". Between the two we find an oval presentation plaque affixed "Presented to/Lieut. Heber S. Thompson/by the Members of Co. F/7th P. V. Cavalry August 1st, 1862". The tip chape as well is about 6" long with ornate appliqués showing lady justice with her scales at the center vignette, oakleaf decoration intertwining from the tip proper at-which there is a gilt acorn. The vignettes show a bit of wear as do the collars but the appliqués show a good deal of original gilt present. Included with the sword is what is likely Heber's red officers sash. The sash is coarsely woven and is about 8" wide when laid out flat, measuring roughly 10' end-to-end, showing a few spots of discoloration, a number of which appear to be actual blood staining. The tassels on each end remain very good showing some light wear to the burgundy external thread, exposing a beige-colored textile beneath. Heber Samuel Thompson of Pottsville Pennsylvania enlisted in October 1861 as a First Lieut., commissioned into Co. F of the 7th Pennsylvania Cavalry. He would be promoted to Captain in July 1863 and captured when his horse was shot from under him at the Battle of Lovejoy Station in Georgia during Sherman's Atlanta Campaign in August 1864. He details the action at Lovejoy in his diary: "The ball struck my mare full in the breast, when she reared up on her hind legs and fell over backwards dead. I extricated myself from the saddle and started for the rebel rear. Here, however, I came upon about a dozen rebels. Turning back, I had gone but a few steps before several bullets came whistling close by me. At the same time, three or four Rebels, ordered me to halt. Looking around, I saw I was surrounded by Rebels, and so surrendered at discretion." The 7th Pennsylvania cavalry was in the thick of many fights during the war. detailing them all here would fill pages, this valiant officer was present at all until the time he was captured. Indeed he received accolades for his bravery at the battles of Sparta, McMinnville, Shelbyville, Chickamauga, and Loveiov Station, one regimental account of him sums his character up rather well: "Lieutenant Heber S. Thompson led the first charge of his regiment in his usual gallant style.". Heber was actually offered a promotion to major but declined the promotion and resigned, mustering out January 24, 1865. Postwar he would become an author with a volume entitled "The First Defenders" his regiment being among the first five to arrive at Washington DC, and there is a diary of his listed online detailing his experiences in Confederate captivity, which can be reviewed as well. Back home in Pottsville, Pennsylvania he had a hardware store with his brother for a period of time and then earned a Masters from Yale in 1871 and concentrated on civil and mining engineering, also becoming director and president of the Miners' National Bank of Pottsville and director of the Eastern Pennsylvania Railways Co. An absolutely lovely sword presented to this gallant officer, who served his country and regiment faithfully, luckily being paroled and surviving to prosper. Est. 8,000 - 10,000

1061	Mounted Artillery Officer's Saber 31 1/2" unmarked curved blade with broad unstopped fullers. The blade is etched with tendrils, military panoplies and floral motifs on a blue background. The blue background retains about 70% original vibrant fire blue toning to brown with scattered fine oxidation and spots of light pitting primarily on the ricasso while the etching retains about 75% thinning original gilt with the majority of lost on the ricassos. The remainder of the blade shows an even balance of bright shiny finish and pale gray patina with scattered fine staining and spots of light vidation. The plated brass hit has an eagle head pommel, inverted P-shaped guard ending in a disc-shaped finial with dual plain langets, plain ferrule and a partially checkered ivory grip with geometric band. The brass surfaces have muted to a pleasing tarnished ocher patina with good traces of original nickel plate. The black leather scabbard has three plated brass mounts equipped with a simple narrow band drag, two hanging rings and frog stud. The leather body remains in very good condition with intact seam showing modest crackling and crazing with a period adhesive repair about 6" from the tip chape. The mounts retain about 85% original nickel plate toning to goldenrod. A very nice and decorative mounted officer's saber. (5B10250-84) [Peter Tillou	106	31" curved blade is maker marked on obverse ricasso beneath langet, difficult to decipher fully, but we believe it is "BERGER". The hilt appears to be silver plated with eaglehead pommel, deeply cast floral decoration on backstrap and "P" shaped knuckle bow. The reverse langet is deeply cast with an American eagle. The blade is finished in blue with gold etched decoration consisting of floral scrolls and panoplies of arms. The reverse ricasso is etched "Warranted" within the gold gilt decoration. The scabbard is deeply engraved with floral scroll, panoplies of arms and a wonderful large American eagle with shield. The condition of the sword is quite nice with the blade showing nearly all of its original bright blue and gold gilt. The cutting edge of the blade shows numerous light nicks, many of which could likely be polished out. The hilt and scabbard retain 80% or more of their original silverplated finish, the bone grip is somewhat bulbous and likely a replacement and the scabbard showing scattered dents. The scabbard may be married as it is a smidge long and its curve is slightly sharper than the blade. This sword has lots of eye appeal with its bright blued and gold gilt blade and its patriotic decorated scabbard. (10250-35) [Peter Tillou Collection] (1000/1500) Est. 1,000 - 1,500
	Collection] (1500/2000)	106	6 Exquisite 18th Century Chiseled Steel Hilt French Small Sword
1062	Est. 1,500 - 2,000 Eaglehead "George Washington" Artillery Officer's Sword 30" straight blade with wide 15" fuller beginning 1" from hilt. The brass hilt shows a finely detailed eaglehead pommel with fancy guard and with a profile of George Washington at center of counterguard. Each upswept edge of counterguard shows a "W" within a wreath and the quillon terminates in another eaglehead. The German blade is maker-marked on reverse side, this marking is difficult to see beneath the counterguard, visible are "P D" (we attribute the blade to P.D. Peres who was active in Solingen from 1801-1835), the obverse shows "a Solingen". The blade has taken on a rich, dark gray patina with traces of original blue with lightly engraved panoplies of arms and light floral work, there are only faint traces of gold gilt remaining but the engraving is still visible. The blade shows some old light scattered surface oxidation and staining. The hilt retains perhaps 75% gold wash, the mother-of-pearl grip panels remain excellent but their wrap is missing. There is no scabbard included. A handsome 19th century sword commemorating the father of our country. (10250-92) [Peter Tillou Collection] (600/800)		33" tapered hollow triangular blade. The decorative work on the hilt of this sword is extremely intricate and superbly executed. The blade is marked "LIGER / FOURBISSEUR / DE LAURS / A: S: MSRS / LE DUC DE / CHARTRE" on obverse and "ET COMTE / DE / CLERMONT / RUE / COQUILLERE / A PARIS" on reverse. The hilt is chiseled in relief with gold gilt background, the spherical pommel, knuckle bow and quillon are hollow and show multiple piercings. These piercings also appear in the counterguard as well as the ricasso. The hilt shows ten different relief panels on pommel, knuckle bow, ricasso and counterguard which depict various panoplies with bugles, cannon, shields, helmets, boars head and pole arms. All of these panels are surrounded by floral and geometric treatments, the counterguard in an almost fish-scale motif, again, all in relief. The entire surface of the hilt including the Pas d'ane rings are heavily embellished. The grip has Turks head ferrules with alternating fancy wire wrap and silver washers with concave outer edges with decorative gold dots. The exposed steel surfaces that are not finished in gold are blued, with bright fire blue visible in the more protected areas and with the more exposed areas showing a pleasing gray patina. The gold remains 95% intact, the grip retains all of its wire each demand the more heavily it is deviced access that are not finished in gold remains 95% intact, the grip retains all of its wire each demand the more heavily it is deviced access heavily a pleasing gray patina. The gold remains 95% intact, the grip retains all of its wire
	Est. 600 - 800		and remains tight. The sword comes with its original shagreen scabbard
1063	Fine Eaglehead Artillery Officer's Sword 31 1/4" blade is finished in blue and gold gilt. The gold washed hilt shows a nice eaglehead pommel with smooth backstrap, subtle "P" shaped guard and plain rounded langets. The grip is of checkered and reeded bone with brass wrap and the ferrule shows finely beaded double medial border. The blade shows no makers mark but is marked "Warranted" and shows six sections of gold etching including floral sprays, Federal Eagle with national motto and panoply of arms. There are four bright sections with etching which include floral scroll, panoply	106	 with steel mounts showing the same wonderful treatment as the hilt with relief decoration finished in gold and blue and pierced. The scabbard has a curve in it and a break near the tip but it is all present. The sword no longer will enter the scabbard fully as it is too tight. A magnificent example of the 18th century French sword maker's art, worthy of the finest private or institutional collection. (10250-133) [Peter Tillou Collection] (3000/5000) Est. 3,000 - 5,000 French Chiseled Steel Hilt Small Sword
	of arms and a liberty cap motif. The blade remains in very nice condition retaining perhaps 70% original blue finish, most loss nearer to hilt, gold wash remains at about 80%. Blade is otherwise smooth with just a little light scattered oxidation staining. The hilt shows about 40% original gold wash with the balance showing a pleasing mellow patina. The checkerd bone grip shows two aging cracks but remains sound and tight. The original leather scabbard is brass mounted with mounts retaining about half of their original gold wash. Leather shows light crazing in the surface but remains quite supple. A very good eaglehead with attractive grip. (10250-100) [Peter Tillou Collection] (1000/1500)		34 3/4" Colichemarde blade is etched with blue and gold gilt. The blade of this sword is marked "Manuf / Royale du / Klingenthal" on obverse and "Coulaux" and "Freres" on the two remaining surfaces on the reverse side. These markings date this piece to the first quarter of the 19th century. The hilt features an olive shaped pommel with single knuckle bow with rounded quillon, pas d'ane and opposing kidney shaped guard. All surfaces of the hilt show relief chiseled decoration with a gold gilt on a finely punch dot shaded background. The relief scenes depict military trophies on either side of the pommel and human figures on either side of the knuckle bow and ricasso. The guard shows four panoplies of crossed flags, cannon, pole arms, bugles, swords and
1064	Fine Eaglehead Mounted Infantry Officer's Sword 31 1/2" curved blade finished in blue and gold gilt. The blade is etched and gold gilt in six separate areas separated by four open white etched scroll panels. The gold gilt etch includes floral sprays, panoplies of arms and "Porter" in lower panel just above ricasso. The hilt is silverplated with open beak eaglehead pommel, the knucklebow shows three large smooth balls separated by three other smaller engraved round balls. The langets show lovely deep relief floral and dot patterns. The grips shows nice flutes along top and bottom surfaces with coarsely checkered panels on either side. The condition of the blade is very good with perhaps 80% original bright blue remaining with most loss being on obverse side near guard. The gold shows a similar amount remaining, perhaps a touch more, however the brightly finished front end of blade shows heavy areas of surface oxidation. The hilt retains about 95% original silverplated finish which is tarnished and has a very nice		human figures. All of these panels are surrounded in wonderful relief floral scroll with a finely punch dot shaded background with gold gilt. The grip is copper wire wrapped separated by silverplated copper washers with concave outer surfaces. The blade is finished in blue and gold etch with the etching showing floral sprays and military trophies. The blade is an overall gray patina, darker on wider section that was blued, although most blue is no longer present and metal has a darker gray appearance. The etching is still mostly visible with a good deal of gold remaining in the actual lines of the etching. The pommel is slightly loose (it will rotate somewhat) but hilt remains complete and fully intact. There is no scabbard present. A handsome French small sword by these well-regarded makers. (10250-132) [Peter Tillou Collection] (1000/2000) Est. 1,000 - 2,000
	appearance. The scabbard is of leather with silverplated throat and center band, the tip is missing. The scabbard may or may no be original to the blade. (10250-77) [Peter Tillou Collection] (700/900) Est. 700 - 900

The American black walnut stock and handguard rate excellent as perhaps very lightly cleaned with a touch of added finish and a few scattered light handling marks. Though softened, a 1900-dated inspection cartouche, circled "P" firing proof and "9" inspection mark are visible and the stock and handguard display some rather nice grain		bore showing light pitting throughout the otherwise strong rifling. The barrel, bands, and triggerguard retain about 85% original blue with a fe small areas of cleaned light pitting toning to gray along the barrel, an area of gray wear on the bow of the triggerguard, and overall light handling marks toning to a dark gray patina. The receiver, sideplate, an loading gate are a smoky case-hardened patina showing some small spots of light oxidation, pinprick pitting, and flaking toning to brown whi the bolt is mostly bright with light oxidation on the handle and extractor which retains a nice amount of original fire blue which is brilliant on the claw. The American black walnut stock and handguard rate near fine with a small chip between the loading gate and bolt showing a little added finish and a few scattered light handling marks. There is a crisp 1900-dated cartouche on the left side of the action and a "21" inspectio mark and circled "P" firing proof behind the triggerguard. The rifle features a blade front sight with brass muzzle/sight protector, Model 1902 rear sight with flip-up aperture, a three-piece cleaning rod and oil are stored within the trap buttplate, and a leather Rock Island

Lot Title/Description

1291	U.S. Model 1903-A3 Bolt Action Rifle by Smith Corona	1294	, ,
	serial #4739284, 30-06, 24" 7-43 dated Smith Corona barrel with a		serial #7339, 12 ga, 30" crown steel barrels choked modified and a
	bright excellent bore. The metal surfaces retain about 98% arsenal		loose full, with bright very good plus bores with scattered spots of light
	reapplied parkerized finish with touches of operational wear, some light		pitting and a very light small raised ding in each, both a few inches from
	oxidation on the bottom metal, spots of previous pinprick to light pitting		the muzzle. The barrels retain about 65-70% thinning original blue with
	beneath the finish, and a few light handling marks. The straight grip		light wear at the muzzle and along the sides of the barrels, light handling
	walnut stock is in very good condition as lightly cleaned with a hairline		marks, and toning lightly to brown. The frame has a smoky gray
	crack at the rear of the receiver, an about 3" hairline crack at the rear of		casehardened patina with muted casehardened color throughout,
	the handguard, and some scattered light handling marks. A faint		scattered spots of oxidation staining on the belly, and is nicely decorated
	Ordnance Wheel and boxed "FJA" inspector's cartouche are visible on		with loose foliate scroll engraving around a woodcock on the right and a
	the left side of the stock, a partial circled "P" proof is clearly stamped		quail on the left, and "L.C. SMITH" on each lockplate; the long-tang
	behind the triggerguard, and softened manufacturer proofs are present		triggerguard retains 40% blue finish with light to moderate wear on the
	ahead of the bottom metal. The receiver markings are slightly soft but		triggerguard bow, and the tang has worn to a pewter patina. The matted
	remain easily legible, as are the barrel markings, and the major bolt		rib is marked "HUNTER ARMS. CO. FULTON. N.Y.", and the barrels
	parts are "R" marked. The rifle retains the standard open sights, the		and forend are numbered to the shotgun. The checkered straight grip
	adjustments for which function smoothly, and the front sight is fit with a		walnut stock and splinter-style forend are in very good plus condition as
	circled "P" marked front sight hood. The rifle appears to function well		very lightly cleaned with a tiny crack on the right side of the lower tang, a
	mechanically. A nicely arsenal refurbished rifle from a desirable		rudimentary repair to a natural flaw on the right side of the comb, and
	manufacturer. (14A10464-6) {C&R} (800/1200)		some scattered light handling marks; the stock is fit with a 1/2" solid
	Est. 800 - 1,200		Pachmayr recoil pad with black plastic spacer, giving an about 14 1/2"
1292	U.S. Model 1922 MII Bolt Action Rifle by Springfield Armory	1	length of pull with drops of about 1 1/2" and 2 1/4". The shotgun locks up
	serial #4402B, 22 LR, 24 1/2" 11-26 dated Springfield Armory barrel with		tightly with the barrels on face, the lever comes to rest at center, and the
	a bright excellent bore. The metal surfaces retain about 96-97% arsenal		shotgun features double triggers, a nonautomatic safety, ejectors, and is
	parkerized finish with light wear on high edges and contact points,		sighted with a lone brass bead. (14B10453-42) {C&R} [Sherwood "Skip"
	perhaps more moderate on the bottom metal, and a few minor handling		Chapman Collection] (800/1200)
	marks. The bolt body remains bright with some minor operational wear,		Est. 800 - 1,200
		1295	
	the parkerized shroud showing some spots of oxidation staining, and the	1290	
	Lyman receiver sight and the magazine cutoff retain strong blue with		serial #1948930, 12 ga, 30" ventilated rib barrel choked full with a bright
	small spots of oxidation on the receiver sight. The pistolgrip walnut stock		excellent bore. The metal surfaces retain about 98-99% original blue
	is in excellent condition as lightly cleaned with a few minor handling		finish with a few light dings on the right forward edge of the receiver, a
	marks, and the left side of the stock shows the faded remnants of a		few scattered specks of oxidation staining, and the barrel is toning lightly
	boxed "SA" cartouche; the checkered steel buttplate shows some light		to brown under direct light; the bolt and carrier remain bright with
	silvering along the edges. The receiver markings are crisp and show the		scattered gray oxidation staining. The checkered pistolgrip Hydro-Coil
	correct added "I" and the "B" suffix to the serial number, the barrel		stock and forend have a walnut color and are in very good plus condition
	markings are crisp, the nickel steel bolt is properly marked "M2" on the		with a few small scuffs, handling marks, and a small spot of slight
	handle and body, and the underside of the bolt is electro-pencil		bubbling on the right side of the stock; the signature recoil reducing
	numbered to a different rifle. The bolt features a second type		feature of the Hydro-Coil stock appears nonfunctional, the stock
	squared-off locking lug with the early headspace adjusting screw, and		remaining in the collapsed position with a 13 1/4" length of pull, and the
	the rifle is sighted with the standard blade front sight and Lyman 48		fit is slightly loose. The factory markings remain crisp, the shotgun is
	aperture rear sight, with a brass ringed aperture. Included with the rifle is		sighted with an orange fiber optic front sight and a steel bead mid rib,
	a single unmarked 5-round magazine. An attractive training rifle that		and appears to function well mechanically. A solid Winchester trap gun
	should still perform well today. (14A10470-41) {C&R} (800/1200)		with a seldom seen Hydro-Coil stock. (14A10455-488) {C&R} (700/900)

1293		1206	
1293	Federal Ordnance M1 Garand "Tanker" Rifle	1296	
	serial #T50660, 30-06, 18 3/8" shortened barrel with a bright excellent		serial #106990, 30-40 Krag, 30" barrel with a bright near excellent bore
	bore. The metal surfaces retain about 95% maker applied parkerized		with a few scattered specks of light oxidation and pinprick pitting, but
	finish with light wear on high edges and contact points, some scattered		strong rifling throughout. The barrel retains about 97% original blue
	spots of light oxidation, and some previous light pitting beneath the		toning lightly to gray under direct light, with light muzzle wear, a small
	finish on the receiver. The pistolgrip walnut stock is in near excellent		scattered spot or two of wear along the barrel, and some small spots of
	condition as lightly cleaned with an arsenal quality repair on the left side		oxidation staining. The barrel bands, swivels, and triggerguard retain
	of the toe, a small arsenal quality repair at the front of the bottom metal,		about 92% original blue with light wear, oxidation staining, and scattered
	scattered light handling marks, and the steel buttplate is proud at the		light handling marks. The sideplate and loading gate show an attractive
	heel and toe; the reduced section of forward handguard is absent,		smoky oil-quenched casehardened patina with some light wear on the
	revealing the operating rod. The factory markings on the receiver remain		high edges and some minor handling marks, and the receiver retains
	easily legible, the barrel is lightly marked "CAL 30-06", and the parts are		about 60% thinning blue with light wear and the area below the striker
	a mix of commercial production and Springfield Armory surplus The rifle		toned to a brown patina. The bolt body remains bright with light
	retains the standard open sights with "lock-bar" rear sight drums, has a		oxidation staining on the handle, oil-guenched casehardening on the
	stamped triggerguard, and appears to function mechanically. A solid		striker, and the extractor retains about 90% vibrant fire blue. The smooth
	representation of the proposed shortened M1 rifles. (14A10482-1)		
			straight grip walnut stock and handguard are in excellent condition with
	{MODERN} (800/1200)		a few light handling marks, and the stock is marked with a crisp boxed
	Est. 800 - 1,200		"JSA / 1901" cartouche and circled "P" proof behind the triggerguard; the
			steel buttplate has worn to a silvery patina with a few spots of old
			oxidation. The standard markings on the receiver are crisp. The stacking
			and sling swivels are intact, the rifle retains the standard open sights,
			and the smooth action appears to function well mechanically. A nice
			example of America's first smokeless powder service rifle, with a later
			replacement stock. (14A10483-272) {ANTIQUE} [Perry White Collection]

Still a very nice antique example with a seldom-seen box. (13A10524-3) (ANTIQUE) (700/900) Est. 700 - 900 Colt Model 1903 Pocket Hammer Semi-Auto Pistol serial #27312, 38 ACP, 4 1/2" barrel with a bright excellent bore. The metal surfaces of this 1911-made pistol retain perhaps 70-75% of an old
340	original bright blue showing some flaking along the barrel and triggerguard to a pleasant gray-brown patina, a few thin scratches along the sides of the frame, and a few a small areas of old light pitting mostly along the sideplate and rear edge of frame. The small parts retain most of their brilliant fire blue with some thinning to gray along the high edges and all markings remain crisp and clear, showing proper Imperial acceptance stamp at the rear right frame. The checkered walnut grips remain in very fine condition showing a few lightly chipped points and some minor dings. This revolver remains in its completely original configuration with no import marks or refurbishment, all of the serialized parts are matching, and the action seems to function well mechanically. A fine and desirable Imperial revolver for the martial collector. (13A10520-16) {C&R} (700/900) Est. 700 - 900 French Model 1892 Double Action Revolver by St. Etienne serial #F22106, 8mm French Ordnance, 4 5/8" barrel with a bright very fine bore showing a few small pinprick pits scattered about and otherwise crisp rifling. The metal surfaces of this early 1893-dated revolver retain about 95% excellent quality areanal refurbished rust blue showing some mild high edge wear, a few small areas of fine pinprick	1:	344	essentially all of their brilliant fire blue, and the polished sides of the hammer remaining brilliant. All markings remain intact and strong. The black checkered hard rubber grips are pencil-numbered to the gun and remain in excellent condition, the left panel unscathed, showing just a few scattered light handling marks. The action seems to function well mechanically with solid timing and lock-up. The included original purple paper-covered box is grease-pencil-numbered along the base to a different gun "14009" but is otherwise correct for the configuration. The box rates very fine showing some flaking and scuffs along the exterior, the deep blue end label almost entirely intact showing a period ink stamp "7322B". The "Not For Smokeless Powder" lid label is also present, the interior lid label is excellent, and a slightly later Shooting Suggestion pamphlet is also present in the box. Still a very nice antique example with a seldom-seen box. (13A10520-16) (C&R) (700/900) Est. 700 - 900 French Model 1892 Double Action Revolver by St. Etienne serial #F22106, 8mm French Ordnance, 4 5/8" barrel with a bright very fine bore showing a few small piprick pits scattered about and otherwise crisp rifling. The metal surfaces of this early 1893-dated revolver retain about 95% excellent quality arsenal refurbished rust blue showing some mild high edge wear, a few small areas of fine piprick piting along some of the high edges, and slight toning to plum under bright light. The small parts retain a healthy amount of original straw finish with the edges toning to gray and showing some mild oxidation speckling. The ejector star was apparently blued during the refurbishment as this component is usually strawed. All markings remain unmolested and crisp, and the checkered walnut grips remain in excellent condition showing a few light handling marks. The action seems to function well mechanically with solid timing and lock-up. A fine and desirable antique French revolver. (13A10520-13) (ANTIQUE) (700/900)	1:	344	essentially all of their brilliant fire blue, and the polished sides of the hammer remaining brilliant. All markings remain intact and strong. The black checkered hard rubber grips are pencil-numbered to the gun and remain in excellent condition, the left panel unscathed, showing just a few scattered light handling marks. The action seems to function well mechanically with solid timing and lock-up. The included original purple paper-covered box is grease-pencil-numbered along the base to a different gun "14009" but is otherwise correct for the configuration. The box rates very fine showing some flaking and scuffs along the exterior, the deep blue end label almost entirely intact showing a period ink stamp "7332B". The "Not For Smokeless Powder" lid label is also present, the interior lid label is excellent, and a slightly later Shooting Suggestion pamphlet is also present in the box. Still a very nice antique example with a seldom-seen box. (13A10524-3) (ANTIQUE) (700/900) Est. 700 - 900 Colt Model 1903 Pocket Hammer Semi-Auto Pistol serial #27312, 38 ACP, 4 1/2" barrel with a bright excellent bore. The metal surfaces of this 1911-made pistol retain perhaps 70-75% of an our period factory-quality refurbished bright blue showing moderate edge wear, scattered flaking to gray-brown patina, the gripstraps toned to pewter, and some scattered old mild oxidation staining. The barrel retains all of its bright blue and the spur hammer retains about 90% vibrant original case-hardened colors. The slide markings show some areas of slight softening around the edges while the frame markings are unmolested and crisp. The black checkered hard rubber grips remain in near excellent condition showing a few scattered tiny dings and some toning to deep brown patina. The included original magazine with
340	original bright blue showing some flaking along the barrel and triggerguard to a pleasant gray-brown patina, a few thin scratches along the sides of the frame, and a few a small areas of old light pitting mostly along the sideplate and rear edge of frame. The small parts retain most of their brilliant fire blue with some thinning to gray along the high edges and all markings remain crisp and clear, showing proper Imperial acceptance stamp at the rear right frame. The checkered walnut grips remain in very fine condition showing a few lightly chipped points and some minor dings. This revolver remains in its completely original configuration with no import marks or refurbishment, all of the serialized parts are matching, and the action seems to function well mechanically. A fine and desirable Imperial revolver for the martial collector. (13A10520-16) {C&R} (700/900) Est. 700 - 900 French Model 1892 Double Action Revolver by St. Etienne serial #F22106, 8mm French Ordnance, 4 5/8" barrel with a bright very fine bore showing a few small pinprick pits scattered about and otherwise crisp rifling. The metal surfaces of this early 1893-dated revolver retain about 95% excellent quality arsenal refurbished rust blue showing some mild high edge wear, a few small areas of fine pinprick pitting along some of the high edges, and slight toning to plum under bright light. The small parts retain a healthy amount of original straw finish with the edges toning to gray and showing some mild oxidation speckling. The ejector star was apparently blued during the refurbishment as this component is usually strawed. All markings remain unmolested and crisp, and the checkered walnut grips remain in excellent condition showing a few light thandling marks. The action	1:	344	essentially all of their brilliant fire blue, and the polished sides of the hammer remaining brilliant. All markings remain intact and strong. The black checkered hard rubber grips are pencil-numbered to the gun and remain in excellent condition, the left panel unscathed, showing just a few scattered light handling marks. (4A10329-19) {MODERN} (800/1200)		1408	Collection] (800/1200) Est. 800 - 1,200 Charleville-Pattern Flintlock "Musketoon" with State of New Hampshire Markings .69 cal., shortened 34 1/2" barrel with an oxidized bore. This shortened reconverted flint musket has had various period modifications and parts replacements and, interestingly, the left side breech of the barrel is clearly marked "NH 1 B No.312" over what appears to be a "C" and a clear "C5". The metal surfaces have aged to an overall light-moderately oxidized plum brown patina, the oxidation on the lock closer to heavy, with some expected light pitting around the breech, a nick in the right side of the barrel above the brass ramrod thimble and a couple grooves in the barrel closer towards the breech. The lock and triggerguard are from a French Charleville-pattern musket with the lock being loosely functional. The lock is secured to the stock with only the rear lock screw as the forward lock screw does not engage with the lockplate and is likely a replacement. The walnut stock rates about good as-shortened with multiple chips and cracks around the action, an added piece of
	gray and blue case color, fading to pewter and silvering along the edges. The smooth walnut stocks rate excellent and feature some fantastic figure. Rifle has a combination front sight, the rear sight has been removed and its dovetail filled with a slot blank. Mounted to the upper tang is a Marbles combination rear sight with aperture. The action functions correctly. Imported for only two short years the mid 2000's this is an excellent quality reproduction of the original Winchester '76 chambered in the classic 45-75 caliber. (4A10329-19) {MODERN} (800/1200)		1408	Collection] (800/1200) Est. 800 - 1,200 Charleville-Pattern Flintlock "Musketoon" with State of New Hampshire Markings .69 cal., shortened 34 1/2" barrel with an oxidized bore. The solid Winchester recoil pad provides a 14 1/2" length of pull. The extended semi-beavertail style forend rates fine showing a bit of added finish but with good checkering and a small crack at its nose. The barrel mounts solidly and the gun seems to function well properly, the buttstock a bit loose. (3A10455-125) {C&R} (700/900)
1413	serial #305387, 30-30 Win, 22" barrel with a bright very fine bore with some light oxidation. The metal surfaces retain perhaps 50% original blue, faded to pewter on the barrel with some brilliant areas on the receiver, the lever with very good color case hardening. The checkered walnut buttstock rates very good showing much original varnish with a repaired crack through the left side at rear of tang. The forend rates very good showing a bit more wear. The original sights are intact, the gun has been drilled and tapped for telescopic sight bases, and sling swivels have been added. There is an auxiliary 22". 410 bore shotgun barrel with a bright very fine bore retaining perhaps 70% original blue. A fine caliber combination suitable for most hunting scenarios. (10A10471-53) (C&R) (800/1200) Est. 800 - 1,200 Winchester Model 1886 Lever Action Rifle serial #112967, 45-70 Govt, 24" octagon barrel with an about good bore with light oxidation and scattered pinprick pitting. The metal surfaces are a tarnished pewter and plum patina with scattered oxidation staining, the magazine tube showing remnants of a light cleaning. The exerciser shows the typical Winchester length-wise striations and it is sighted with small German blade front and standard ladder rear sight. The walnut buttstock rates very good with a chip at left of upper tang, the expected overall light dings and handling marks, and a lengthy crack at left rear of upper tang. The forearm rates very good with a 11/2" sliver missing at its leading upper right edge and repaired 4" crack at rear. (10A10471-27) (ANTIQUE) (800/1200) Est. 800 - 1,200 Browning Auto-5 Light Twenty Semi-Auto Shotgun serial #9226887, 20 ga., 27 1/2" matted barrel choked full with a bright excellent bore. The metal surfaces retain 95% original blue with some scattered bight handling marks, spots of freckling, and minor silvering along the high edges. The 70's dated barrel is numbered to a different gun and the color is slightly off from the receiver. The shot gun is	1418	gun case in the finish. Fitted with silver beads and a trigger shoe, the barrel mounts solidly to the frame and the arm seems to function well. Barrel and receiver exhibit correct offset proofs, the factory roll marking is a bit light in spots however the barrel does not appear to have been refinished at any point as there is good raised metal around the factory proof. (3A10455-448) {C&R} (700/900) Est. 700 - 900 Winchester Model 12 Trap Slide Action Shotgun serial #1902933, 12 ga., 30" ventilated rib barrel choked full with an otherwise bright excellent bore showing a couple spots of very light pitting. The barrel retains perhaps 90% later reblued finish showing areas of light, and some moderate, pitting beneath, the left side regaining some light oxidation. The magazine tube and barrel support appear original blue showing light high edge wear with some surface oxidation across the top matted radius and a few light oxidation stains on the left flat. The bolt remains bright while the shell lifter shows some light oxidation staining, the triggerguard drifted to plum. The checkered American walnut capped pistolgrip cap in place. The solid Winchester recoil pad provides a 14 1/2" length of pull. The extended semi-beavertail style forend rates fine showing a bit of added finish but with good checkering and a small crack at its nose. The barrel mounts solidly and the gun seems to function well properly, the buttstock a bit loose. (3A10455-125) {C&R} (700/900)

1419	Custom Winchester Model 12 Trap Slide Action Shotgun		1423	C.S. Pettengill Belt Model Percussion Revolver
	serial #Y2012947, 12 ga., 30" factory ventilated rib barrel choked a light			serial #148, .34 cal, 4 1/2" octagon barrel with a moderately oxidized
	full with a bright excellent bore. This custom Model 12 started off as a			bore showing good rifling. The metal surfaces of this early variation
	factory ventilated rib gun with correct offset proofs and has had a			revolver show evidence of an old cleaning and refinishing, now mostly
	polychoke high rib added to the factory rib with Bradley target beads,			toned to a dark gray and pewter gunmetal patina with remnants of old
	and the barrel has been ported. Metal surfaces retain 99% factory blue			light pitting and dings that are partially smoothed-over, the left edge of
	with some sparsely scattered light oxidation on the receiver. The bolt			the triggerguard bow showing a thin chip. The action is embellished with
	shows some light operational wear but both it and the lifter retain all of			light foliate scrollwork that has softened somewhat but remains mostly
	their factory engine turning. The custom checkered American walnut			intact and there are no longer any evident patent markings visible. The
	Monte Carlo stock rates very fine with light dings and handling marks			smooth walnut grips remain in very good plus condition showing some
	and a large rosewood grip cap set off with a maple spacer, the length of			scattered minor dings and light handling marks, they are un-numbered
	pull to the curved trap pad 14 3/8". The checkered semi-beavertail			but fit quite well though the screw is a replacement. The side of the
	extended forend rates very fine with some light handling marks and a			cylinder is numbered "13", the barrel is matching the frame, and the
	crack at right front and left rear. Barrel mounts solidly and the gun			revolver retains its correct split loading lever assembly. The action is
	seems to function properly. (3A10455-262) {MODERN} (700/900)			somewhat loose but generally seems to function normally. An about very
	Est. 700 - 900			good example of the scarce early model, only about 250 of which were

(13A10221-23) (ANTIQUE) [David Rose Collection] (700/900) Est. 700 - 900 Frank Wesson Transitional Two Trigger Sporting Rifle serial #7921, 44 RF, 26 1/2" octagon barrel with a good bore showing scattered light pitting and oxidation with strong rifling throughout. This appears to be a transitional model with mainly third type features,		moderately oxidized bore. The barrel of this handsome tanegashima has mostly toned to a deep plum-brown patina showing old overall oxidation that is mostly unobtrusive. The rear barrel flat shows a handsome tarnished silver inlay of the crossed hawk feathers kamon of the Takanoha family. There is also a series of stamped kanji characters along the left side breech, perhaps period registration markings. The brass lock hardware has toned to an attractive ocher patina showing some light handling marks., the lockplate with what appears to be an old inventory sticker interestingly with a Cyrillic "P" prefix and the number "331". The forward edge of the lockplate also shows a small Japanese character stamp. The smooth Asian hardwood stock remains in very good plus to very fine condition showing some scattered thin drying cracks, a couple tiny chips and the expected light dings and handling marks, the wood with nice raised grain throughout. This example is rather plain in its ornamentation with simple bronze circular escutcheons and a small buttcap. The buttcap is rather loose as four of the pins are missing and strangely all of the barrel pins are missing as well, a piece
1430	gray patina with some old oxidation mostly along the left side, and the buttplate and hammer are a smoky gray patina. Barrel markings remain intact and the smooth walnut buttstock remains in very good plus condition showing slightly thinning antique varnish, a small crack at the upper tang, repaired chip at the toe, and light handling marks. The stock otherwise retains nice fit and shows attractive grain figure throughout. The full complement of original sights is present with tang peep sight, fine v-notch sporting rear and Beach combination front (the globe post either broken off or shortened during the period). Barrel-to-frame fit is solid and the action seems to function well mechanically. (13A10221-23) (ANTIQUE) [David Rose Collection] (700/900) Est. 700 - 900 Frank Wesson Transitional Two Trigger Sporting Rifle serial #7921, 44 RF, 26 1/2" octagon barrel with a good bore showing scattered light pitting and oxidation with strong rifling throughout. Barrel-to-frame fit is solid and the action seems to function well mechanically. (13A10221-23) (ANTIQUE) [David Rose Collection] (700/900) Est. 700 - 900 Frank Wesson Transitional Two Trigger Sporting Rifle serial #7921, 44 RF, 26 1/2" octagon barrel with a good bore showing scattered light pitting and oxidation with strong rifling throughout. This appears to be a transitional model with mainly third type features, though the frame has been modified with an integral firing pin and the face of the hammer is smooth, obviously having original been a rimfire hammer with the nose removed. The barrel retains streaks of original blue throughout, mostly toning to gray-brown patina and showing old oxidation that shows cleaning attempts with scattered thin scratches. The frame is similar and the triggerguard retains perhaps 50% original nickel finish. The sides of the hammer show good case-hardened colors and the barrel markings remain strong. The smooth walnut buttstock remains in very good plus condition retaining generous original varnish showing the expected scattered light dings and handling marks, the sides of the butt showing attractive grain figure throughout. The rifle is		moderately oxidized bore. The barrel of this handsome tanegashima has mostly toned to a deep plum-brown patina showing old overall oxidation that is mostly unobtrusive. The rear barrel flat shows a handsome tarnished silver inlay of the crossed hawk feathers kamon of the Takanoha family. There is also a series of stamped kanji characters along the left side breech, perhaps period registration markings. The brass lock hardware has toned to an attractive ocher patina showing some light handling marks., the lockplate with what appears to be an old inventory sticker interestingly with a Cyrillic "P" prefix and the number "331". The forward edge of the lockplate also shows a small Japanese character stamp. The smooth Asian hardwood stock remains in very good plus to very fine condition showing some scattered thin drying cracks, a couple tiny chips and the expected light dings and handling marks, the wood with nice raised grain throughout. This example is rather plain in its ornamentation with simple bronze circular escutcheons and a small buttcap. The buttcap is rather loose as four of the pins are missing and strangely all of the barrel pins are missing as well, a piece of wire having been wrapped through the forward escutcheon. The trigger is rather interesting as it is hinged and can be folded forwards and there is no ramrod present. The lock will require some mechanical attention as the cock does not hold and the mainspring is missing A nice example of these interesting antique Japanese arms. (13B10237-12) {ANTIQUE} (1000/1500)
1430	gray patina with some old oxidation mostly along the left side, and the buttplate and hammer are a smoky gray patina. Barrel markings remain intact and the smooth walnut buttstock remains in very good plus condition showing slightly thinning antique varnish, a small crack at the upper tang, repaired chip at the toe, and light handling marks. The stock otherwise retains nice fit and shows attractive grain figure throughout. The full complement of original sights is present with tang peep sight, fine v-notch sporting rear and Beach combination front (the globe post either broken off or shortened during the period). Barrel-to-frame fit is solid and the action seems to function well mechanically. (13A10221-23) (ANTIQUE) [David Rose Collection] (700/900) Est. 700 - 900 Frank Wesson Transitional Two Trigger Sporting Rifle serial #7921, 44 RF, 26 1/2" octagon barrel with a good bore showing scattered light pitting and oxidation with strong rifling throughout. 451	Colt Model 1908 Pocket Hammerless Semi-Auto Pistol serial #27321, 380 ACP, 3 3/4" barrel with a lightly frosted bore. This lovely type III Pocket Hammerless rolled out of the factory in 1915 and remains in excellent condition as quality refurbished by an unknown artisan. There are no factory rework marks found. The metal surfaces retain about 98% factory-quality reapplied blue with a few minor scratches and the only notable blemish a lightly cleaned small patch of pitting on the front curve of the triggerguard. The fully checkered walnut factory grips with silver Rampant Colt medallions rate excellent. No serial numbers were found under the slide, and all the markings remain very strong. The pistol functions mechanically and includes a single factory marked seven-round magazine. An excellent example of a skillfully refurbished Model 1908. (8A10499-34) {C&R} (700/900) Est. 700 - 900
452	Manhattan Firearms Navy Model Percussion Revolver serial #162, .36 cal., 5" octagon barrel with an oxidized and pitted bore. This first model Navy has toned to a brown patina on the barrel and cylinder, the frame is a dull blue-gray color, the barrel shows moderate period cleaning and has light scattered pitting and a few handling marks. The brass grip frame is mostly ochre with a nice wedge of original silver plate around the apron and ears. The one-piece walnut grip is the early fat round style sometimes referred to as "Miss America" grips. They rate very good to excellent showing light wear around edges of the butt and a few light dents. All the appropriate parts of the gun, including the grips, are numbered to the gun, it has a crisp action that times and locks up correctly. The five vignettes on the five-shot, ten-slot cylinder have softened. This is a very nice first model with very good condition. (8A10492-49) (ANTIQUE} (800/1200) Est. 800 - 1,200
453	Early Lile Signature Big 7 Drop Point Hunter This Jimmy Lile creation measures 8 1/2" overall with a 3 3/4" tapered full tang drop point blade. The blade remains unsharpened, retains all its satin finish with clear "Hand Made by / James B. Lile" signature mark along the rear top obverse edge. The yellow paper micarta scales remain in excellent condition darkening to a wonderful tobacco color with age and are each fastened by two polished brass rivets and are equipped with a brass lined thong hole. The scales are separated with dark red liners and feature black scroll and star scrimshaw. The single guard and rivets have a pleasing brass patina. Included is a maker marked ambidextrous wet-formed leather sheath showing only minor age staining. Mr. Lile used his signature mark from 1971-1975, this is fine example from the "Arkansas Knifesmith". (5B10120-26) (800/1200) Est. 800 - 1,200
454	Remington Model 1871 Army Rolling Block Pistol serial #3215, 50 CF (lengthened chamber), 8" round barrel with a fair bore showing some scattered light pitting and machining marks leaving the rifling somewhat worn. The chamber has been lengthened long ago and now measures about 2 1/4", with rim cutout at the breech measuring about 0.69". The top of the hammer has also been very neatly relieved to enable loading of whatever longer cartridge this has been converted to. The barrel retains about 40% original blue thinning and toning to gunmetal gray and showing a little old oxidation staining and some minor pitting. The action retains about 60-70% original case-hardened colors quite strong along the left side with toning to smoky gray also showing a little fine pitting and oxidation speckling. The hammer and breechblock retain about 90% original bright blue and all markings remain intact and strong. The smooth walnut grip and forend remain in very fine condition showing somewhat worn finish and darkening from the years along with some scattered light handling marks otherwise retaining nice fit overall. The action seems to function well mechanically. (13A10320-28) (ANTIQUE} (600/800)

1592	Est. 500 - 700 Harrington & Richardson Model 732 Side-Kick / Guardsman Double Action Revolver with Original Box serial #U14853, 32 S&W Long, 4" barrel with a bright excellent bore. This is a rather interesting example branded "Guardsman" on the box but stamped "Side-Kick" on the actual barrel, also fitted with the safety locking feature and retaining the original H&R-branded key. The metal surfaces retain about 97% original blue showing a couple tiny speckles of oxidation along the cylinder and a spot of oxidation along the right edge of the triggerguard from contact with some sort of contaminant. The jeweled sides of the hammer remain bright, the back surfaces with mottled gray case-hardening. All markings remain crisp and clear and the checkered pearlite grips remain in excellent condition. Single action currently does not hold, the sear being somewhat sluggish likely just requiring a thorough cleaning. The action otherwise seems to function		serial #113178, 22 RF, 4 1/2" round barrel with a mostly bright very good bore showing some scattered mild oxidation and strong rifling throughout. This is a very rare revolver, made by H&R sometime between 1925-1930, for an unknown retailer who requested the revolvers be unmarked; only 275 were produced. This example has the added bonus of a longer barrel and target grips. The metal surfaces retain about 92% original blue showing some scattered light flaking, handling marks and specks of mild oxidation staining. The left side barrel shows a 1/2" area of old light pitting and the hammer retains smoky case-hardening throughout. The checkered black hard rubber extended target grips remain in very fine condition showing a few scattered tiny dings and are taking on a pale brown patina under bright light. The action seems to function well mechanically with solid timing and lock-up. (13A10492-16) {C&R} [The Richard Littlefield H&R Collection] (400/500)

The original gold and dark brown textured box remains in near excellent condition showing some light edge wear. The base is grease pencil-numbered matching the revolver and the original manual is also present. This style box was only used for a short time. (13A10492-31) {C&R} [The Richard Littlefield H&R Collection] (400/500) Excellent Harrington & Richardson Forty Niner Model 949 Double Action Revolver serial #AB9035, 22 LR, 5 1/2" round barrel with a bright excellent bore. This is a lovely deluxe "Forty Niner" made in 1965 and retained by the factory as a display piece. The barrel and cylinder retain about 99% original bright blue showing a hint of wear at the muzzle. The frame,	1597	 serial #113178, 22 RF, 4 1/2" round barrel with a mostly bright very good bore showing some scattered mild oxidation and strong rifling throughout. This is a very rare revolver, made by H&R sometime between 1925-1930, for an unknown retailer who requested the revolvers be unmarked; only 275 were produced. This example has the added bonus of a longer barrel and target grips. The metal surfaces retain about 92% original blue showing some scattered light flaking, handling marks and specks of mild oxidation staining. The left side barrel shows a 1/2" area of old light pitting and the hammer retains smoky case-hardening throughout. The checkered black hard rubber extended target grips remain in very fine condition showing a few scattered tiny dings and are taking on a pale brown patina under bright light. The action seems to function well mechanically with solid timing and lock-up. (13A10492-16) {C&R} [The Richard Littlefield H&R Collection] (400/500) Est. 400 - 500 Rare Early Harrington & Richardson American Double Action Revolver serial #758, 44 CF, 2 1/2" round barrel with a bright near excellent bore. The metal surfaces of this early variant retain about 95-96% original full nickel finish showing just some scattered very fine flaking to gray-brown patina and some other minor handling marks. The hammer retains essentially all of its nice vibrant case-hardened colors and the topstrap markings remain crisp. The black checkered hard rubber grips remain in excellent condition, the base of the left panel with a very small faint "H" scratched on. The action seems to function well mechanically with solid timing and lock-up. These revolvers were popular hideout guns and generally saw hard use, this is an excellent early example in the
	Est. 500 - 700 Harrington & Richardson Model 732 Side-Kick / Guardsman Double Action Revolver with Original Box serial #U14853, 32 S&W Long, 4" barrel with a bright excellent bore. This is a rather interesting example branded "Guardsman" on the box but stamped "Side-Kick" on the actual barrel, also fitted with the safety locking feature and retaining the original H&R-branded key. The metal surfaces retain about 97% original blue showing a couple tiny speckles of oxidation along the cylinder and a spot of oxidation along the right edge of the triggerguard from contact with some sort of contaminant. The jeweled sides of the hammer remain bright, the back surfaces with mottled gray case-hardening. All markings remain crisp and clear and the checkered pearlite grips remain in excellent condition. Single action currently does not hold, the sear being somewhat sluggish likely just requiring a thorough cleaning. The action otherwise seems to function well in double action. The original gold and dark brown textured box remains in near excellent condition showing some light edge wear. The base is grease pencil-numbered matching the revolver and the original manual is also present. This style box was only used for a short time. 	Est. 500 - 700 Harrington & Richardson Model 732 Side-Kick / Guardsman Double Action Revolver with Original Box serial #U14853, 32 S&W Long, 4" barrel with a bright excellent bore. This is a rather interesting example branded "Guardsman" on the box but stamped "Side-Kick" on the actual barrel, also fitted with the safety locking feature and retaining the original H&R-branded key. The metal surfaces retain about 97% original blue showing a couple tiny speckles of oxidation along the cylinder and a spot of oxidation along the right edge of the triggerguard from contact with some sort of contaminant. The jeweled sides of the hammer remain bright, the back surfaces with mottled gray case-hardening. All markings remain crisp and clear and the checkered pearlite grips remain in excellent condition. Single action currently does not hold, the sear being somewhat sluggish likely just requiring a thorough cleaning. The action otherwise seems to function well in double action. The original gold and dark brown textured box remains in near excellent condition showing some light edge wear. The base is grease pencil-numbered matching the revolver and the original manual is also present. This style box was only used for a short time. (13A10492-31) {C&R} [The Richard Littlefield H&R Collection] (400/500) Est. 400 - 500 Excellent Harrington & Richardson Forty Niner Model 949 Double Action Revolver serial #AB9035, 22 LR, 5 1/2" round barrel with a bright excellent bore. This is a lovely deluxe "Forty Niner" made in 1965 and retained by the factory as a display piece. The barrel and cylinder retain about 99% original dark cyanide case-hardened colors, the frontstrap and ejector housing with just a few mild freckles. Both hammer and trigger show fancy jeweling and the barrel markings remain crisp. The checkered deluxe walnut grip remains in near excellent condition showing a tiny flake at the heel and a few minor dings. The checkering remains crisp and there is some fine tiger stripe grain figure along the backstrap. The action	1597	 serial #113178, 22 RF, 4 1/2" round barrel with a mostly bright very good bore showing some scattered mild oxidation and strong rifling throughout. This is a very rare revolver, made by H&R sometime between 1925-1930, for an unknown retailer who requested the revolvers be unmarked; only 275 were produced. This example has the added bonus of a longer barrel and target grips. The metal surfaces retain about 92% original blue showing some scattered light flaking, handling marks and specks of mild oxidation staining. The left side barrel shows a 1/2" area of old light pitting and the hammer retains smoky case-hardening throughout. The checkered black hard rubber extended target grips remain in very fine condition showing a few scattered tiny dings and are taking on a pale brown patina under bright light. The action seems to function well mechanically with solid timing and lock-up. The metal surfaces of this attractive gun are in fine condition with about 98% plus original blue finish showing a very small spot of pinprick pitting on the right side of the barrel and a few spots of oxidation on the backstrap. The checkered brown synthetic grips with High Standard monograms rate excellent. This lever series High Standard features a serrated Patridge front sight, drift adjustable rear sight, manual safety, and lever takedown. The pistol includes the original brown factory hinged box that is correctly end labeled and numbered to the gun, and a single two-tone factory ten-round magazine. The box rates about very good, the original strip of tape securing the cover to the base has separated, the four corners of the cover are split, however the surfaces show only light storage wear. This gun has not seen much use over the years and is an excellent example of the G series guns. (8A10481-2) {C&R} (500/700) Est. 500 - 700 Ruger Old Model Super Blackhawk Revolver serial #80-27846, 44 Magnum, 7 1/2" barrel with an excellent bore. This 1971-manufactured revolver remains in excellent condition showing only light use. The metal surfaces retain about 98-99% original blue finish showing light edge wear, plus scattered operational and handling marks. The smooth walnut factory gips with black Ruger Phoenix medallions rate excellent. The revolver has the standard features found on a Super			Est. 500 - 700 U.S. Contract High Standard Supermatic Citation Semi-Auto Pistol serial #1130045, 22 LR, 6 3/4" tapered barrel with an excellent bore. This Model 103 shows honest use over the years and retains about 96% original blue finish, the grip frame thinning with scattered light edge wear, handling marks, and operational marks on the barrel from mounting accessories. The target trigger and thumb safety have toned to gray with freckling on trigger although the magazine catch has robust case-hardened colors. The checkered synthetic factory grips with gold High Standard medallion rate about excellent with a few light handling marks. This gun has the proper cuts for a muzzle stabilizer, barrel weights (not included), Patridge front sight, and an adjustable rear sight mounted on the slide. The muzzle stabilizer is included but the lock screws are missing and will need to be replaced, and the rear sight assembly is slightly loose in its dovetail. The left side of the receiver is boldly stamped "US". It includes a single factory ten-round magazine. A nice example of a military contract Supermatic Citation. 1637	Early Sig Sauer P220 Semi-Auto Pistol serial #G129475, 45 ACP, 4 3/8" barrel with a bright excellent bore. The metal surfaces of this West German 1983-production pistol retain about 97-98% original matte blue and black anodized finishes with silvering on the bearing surfaces of the barrel and a touch of holster wear. The checkered black synthetic grips rate as-new. The pistol features a European-style heel magazine release and Von Stavenhagen sights; the slide is import-marked by Interarms and features two German proofs and the date code on the underside of the muzzle and, strangely is numbered G129479. Included is one factory 7-round magazine and the action appears to function well mechanically. (23A10339-33) {MODERN} (500/700) Est. 500 - 700 Scarce S. Coon Patent Percussion Alarm Gun .22 cal, 2 1/2" barrel with a lightly oxidized bore. The metal surfaces of
	1.1.2 Gai, 2 M2 barror Mart angung owner gunmetal and gray-brown patina showing some scattered light oxidation and a little bit of fine pinprick pitting. The body retains a very nice "S. COON / PATENT / SEP.22.1857" marking. The mainspring acts as the hammer and all components are intact. A fine little antique alarm gun. (13A10160-13) (ANTIQUE) (500/700) Est. 500 - 700
1639	Fine Reiff & McDowell Alarm Gun 22 RF Blank The bore of this alarm gun shows some mild verdigris and the exterior retains about 95% original nickel finish showing some light flaking and tiny handling marks, most of the flaking evident along the striking arm which is toning to gray-brown patina but otherwise retains strong maker markings and patent date. The attachment screw and cartridge compartment cover are intact. A fine burglar alarm gun. (13A10160-32) (ANTIQUE) (500/700) Est. 500 - 700
1640	Smith & Wesson Model 10-8 Double Action Revolver serial #4D01091, 38 Special, 4" pinned heavy barrel with a bright excellent bore. The metal surfaces retain about 99% original blue with a tiny spot of pinprick pitting while the service hammer and trigger retain nearly all their original case-hardened finish with some rather vibrant colors on the sides of the hammer. The checkered walnut magna grips with gold S&W medallions rate very good plus with a tiny ding at the heel of the left panel and the gold coloring largely worn away from the medallion on the right panel which is properly numbered to the frame. Timing and lockup are excellent. Included is the original blue metal-cornered box, manual and paperwork. (23A10339-31) {MODERN} (500/700) Est. 500 - 700
1641	Savage Model 1917 Semi-Auto Pistol serial #251517, 32 ACP, 4 1/4" barrel with a bright very good bore showing light pitting in the otherwise strong rifling. The metal surfaces retain about 98% original blue with some mild flaking to gray patina on the lower left edge of the front strap, a hint of high edge silvering at the muzzle and some scattered speckles of light oxidation. The barrel remains bright, the trigger shows remnants of original case-hardened colors in the protected areas and all markings are strong including the model designation on the left side of the frame. The checkered hard rubber grips rate very good plus each showing a short hairline crack at the base. The pistol includes one original two-tone magazine and the action appears to function well mechanically. (23A10339-34) {C&R} (500/700) Est. 500 - 700
1642	Ruger No. 1-B Falling Block Rifle serial #133-82750, 300 Weatherby Mag, 28" barrel including custom muzzle brake with a bright excellent bore. The metal surfaces retain 99% plus professionally-applied blue with an unobtrusive spot of softened light pitting on the right side of the barrel only worth mentioning due to the excellent condition of this handsome rifle and the machine-turned breech block is bright. The checkered walnut capped pistolgrip stock and semi-beavertail forend rate very good plus to near excellent with a few scattered light handling marks including a shallow dent on the underside of the forend. The metal markings have been slightly softened but are all fully legible, a custom muzzle brake has been professionally installed and the action appears to function well mechanically. All that is needed is a pair of Ruger rings and an optic and this handsome rifle in a potent caliber will be ready for your next hunt. (23A10518-28) (MODERN) (500/700) Est. 500 - 700
1643	Colt Cobra Double Action Revolver serial #53879-LW, 38 Special, 2" barrel with a very fine lightly oxidized bore. The metal surfaces retain 85–90% original blue and anodized finishes showing light wear from carry overall. The smooth deluxe walnut finger rest grips are aftermarket replacements and rate excellent. The action seems to function well mechanically with solid timing and lockup. (10A10471-2) {MODERN} (500/700) Est. 500 - 700

1644	Sig Sauer P220 Semi-Auto Pistol serial #G319545, 45 ACP, 4 3/8" barrel with a bright excellent bore. The metal surfaces retain 95% original blue and anodized finishes with scattered light handling marks, holster wear and some spots of silvering along the high edges. The pistol is sighted with Tru Dot night sights that no longer illuminate and the two-piece textured black plastic logo grips rate excellent. Included with this DA/SA pistol is a single 8 round factory magazine. (10A10218-24) {MODERN} (500/700) Est. 500 - 700
1645	Sig Sauer P226 Semi-Auto Pistol serial #U533120, 9mm, 4 3/8" barrel with a bright excellent bore. The slide retains 98% original blue with minor holster wear and the frame retains nearly all of its anodized finish. This double / single action pistol is '95 date coded with West German proof markings and has the Exeter, N.H. address. The pistol is equipped with Von Stavenhagen fixed sights, left side frame mounted decocker and the checkered wraparound black synthetic grips rate very good overall with some minor light handling marks. Included is a single 15 round factory magazine and the pistol remains in fine condition. (10A10218-8) {MODERN} (600/800) Est. 600 - 800
1646	Smith & Wesson 38 Safety Hammerless Revolver serial #125379, 38 S&W, 3 1/4" ribbed round barrel with mostly bright very good bore that shows spots of light pitting scattered throughout the grooves. The metal surfaces of this fourth model revolver retain 85% plus original nickel finish with spots of flaking and scattered oxidation staining. The trigger shows mottled case-hardened color along its sides with the front worn more to a pewter patina. The cylinder is not numbered to the gun and all other numbered parts are matching including the grips. The checkered hard rubber grips have faded to brown with overall worn points and light handling marks and the revolver times well and lock up remains tight. (10A10293-20) {C&R} (500/700) Est. 500 - 700
1647	Parker VH Boxlock Double Shotgun serial #231938, 12 ga., 30" matted rib barrels choked modified and full with bright excellent bores. The barrels are mostly a mix of brown and gray patina with overall light fine oxidation staining and remnants of blue in protected areas. The No. 1 1/2 frame has toned mostly to a silvery gray patina with traces of case hardened colors in protected areas and has geometric pattern engraving along its borders. The checkered pistolgrip stock and splinter style forend rate good plus with overall light handling marks, minor bruises, and some added finish. The hard rubber dogs head buttplate is complete providing a length of pull of 14 1/2" with drops of 1 1/2" to 2 1/2". Features dual triggers, automatic safety and extractors. Lockup remains tight and the lever sits just left of center. (10A10200-1) {C&R} (500/700) Est. 500 - 700
1648	Est. 500-700 Browning Auto-5 Magnum Semi-Auto Shotgun serial #8V5102, 12 ga., 31 1/2" matted rib barrel choked full with a bright excellent bore. The metal surfaces retain 90% evenly thinning blue with scattered light oxidation staining, silvering along the high edges and wear at the loading port. The bolt remains mostly bright with light oxidation staining and the 1975-vintage barrel is numbered to a different gun. The round knob checkered pistolgrip stock and forend rate good to perhaps about very good with light handling marks, a small crack along the right side wrist and the coloring and checkering patterns do not match. The ventilated Browning recoil pad is hardened and crackling and this 1958 Belgian made shotgun should make a good field gun. (10A10194-11) {C&R} (500/700) Est. 500 - 700
1649	Sig Sauer P232 SL Semi-Auto Pistol Sig Sauer P232 SL Semi-Auto Pistol serial #S245689, 380 ACP, 3 3/4" barrel with a bright excellent bore. The stainless steel surfaces rate near excellent with scattered handling marks, a few light scratches and freckles. The frame has German proofs and the pistol features Siglite night sights that still have a faint glow, factory Hogue wraparound pebble grain fingergroove grips, and decocker. Included is a single 7 round factory magazine. (10A10499-40) (MODERN) (500/700) Est. 500 - 700

		1657	Savage Model 99-E Lever Action Carbine
		1007	serial #A725706, 243 Win, 20" barrel with an excellent bore. The barrel
			and receiver retain about 95-97% original blue that is flaking and fading
			to brown and mixing with areas of light wear and specks of light surface
			oxidation. The lever retains most of its factory case color which has
			muted and is toning to gray with some areas of light surface oxidation as
			well. The checkered hardwood stocks rate very good as-cleaned with a
			satin oil type finish. The wood has some light handling marks and small
			dings, the pressed checkering is soft but still tactile. Carbine is equipped
			with the original factory sights, and mounted to the receiver is a Weaver
			Classic 400 4X riflescope. The scope is mounted via set of Weaver
			bases and rings and features a post and crossbair type reticle with very

bases and rings and features a post and crosshair type reticle with very good, clear optics. This is a solid hunting carbine in a great medium weight cartridge, ideal for November whitetails. (4A10216-33) (MODERN) (500/700) Est. 500 - 700

1658	Smith & Wesson No. 2 Old Model Single Action Revolver
	serial #58287, 32 RF Long, 6" octagon barrel with an oxidized bore. This
	revolver remains in very good condition with about 30-35% original blue,
	the barrel has toned predominately to pewter with some strong original
	blue in the flutes, traces on the flats, and in the protected areas. There
	are scattered light impact marks on both sides of the barrel flats forward
	of the window in addition to light handling marks, stains from oxidation,
	and pitting. The smooth unfluted cylinder is gray with scattered pitting.
	The frame has the greatest amount of original rich dark blue finish on
	the sides with evidence of light cleaning; the straps, bottom of the frame
	and topstrap have toned to pewter. The smooth rosewood grips are
	numbered to the gun and rate good to very good showing flaking finish,
	a tiny chip on the left toe, and scuffing on the edge of the right butt. The
	barrel is assembly numbered to the gun and the number on the cylinder
	is not legible. The action remains crisp with proper timing and lockup,
	the topstrap features three pins found on the later guns and the barrel to
	frame fit shows light movement. This gun includes a factory letter that
	indicates it shipped from the factory as described above on May 16,
	1868, to J.W. Storrs of New York, New York in a shipment of 100 guns.
	As an aside, Smith & Wesson historian Roy Jinks mentions in this letter
	that J.W. Storrs was the company's sole agent between 1857 and 1869.
