Merwin, Hulbert & Co. Large Frame Open Top Single Action Revolver Very Fine Colt Model 1877 Thunderer Double Action Revolver with 22 24 serial #13770, 44 Merwin Hulbert, 7" round barrel with a partially bright Hartley & Graham Presentation Case about good bore showing a few scattered patches of moderate pitting, serial #42250, 41 Colt, 4 1/2" barrel with a bright excellent bore. The some oxidation and strong rifling throughout. The metal surfaces of this metal surfaces of this lovely 1883-made revolver retain about 96% attractive revolver retain about 85% plus original nickel finish with most of the loss due to scattered flaking, mostly along the barrel, that is toning to a mild gunmetal patina and blending in rather nicely with the surrounding nickel. There are some scattered tiny dings and light handling marks and the muzzle shows some noticeable wear from extensive holster carry that lends plenty of character. The barrel markings remain intact and strong and the hammer and triggerguard retain a healthy amount of strong case-hardened colors, showing a little mild oxidation speckling and areas toning to plum-brown patina. The revolver wears a fine set of smooth antique ivory grips that appear to be factory original in every respect and remain in near excellent condition, the right panel with some wear at the heel, and both showing attractive crackling and age striations throughout with a lovely rich patina. Both panels are stamped on their interiors with a single "6" and the remaining numbered parts are matching by assembly number. The lanyard ring has been lost to the years, barrel-to-frame fit exhibits a hint of minor play and the action seems to function well mechanically with solid timing and lock-up. A lovely big Merwin Hulbert for the antique Western arms collector. (13B10320-22) {ANTIQUE} (2500/3500) Est. 2,500 - 3,500 Lovely & Rare Remington-Beals Second Model Percussion Pocket 23 Revolver with Original Box & Accessories serial #2125, .31 cal, 3" octagon barrel with a bright excellent bore. This is an excellent and somewhat unusual example of the very low-production second model. It appears the nickel finish was refurbished during the period of use, very possibly by Remington themselves and there is also a very neatly brazed plate along the inside of the frame at the breech, again suggesting a factory repair and refurbishment job. The barrel address is no longer present though the serial number on the underside remains crisp and there is also no locator pin in the frame for the stop spring on the left side. The frame shows a matching serial number to the barrel, the final peculiarity, as it 25 is quite a bit outside of the estimated 1000 serial number production. The metal surfaces retain about 98% nickel finish showing one small spot of oxidation on the right side frame, a few thin scratches and a couple tiny pinprick pits. The small parts show lovely brilliant fire blue and the hammer retains vibrant colors with some muting to smoky gray along the nose. The smooth rosewood grips remain in near excellent condition retaining a healthy amount of original varnish that shows some mild flaking along with a few handling marks, the grips appear to be un-numbered though their fit is excellent. The silver cone front sight is intact and the action functions crisply with nice timing and lock-up. The black paper-covered box remains in fine condition and is covered in an old glue-like preservative that does not detract too much from its appearance, also showing some light flaking and handling marks. About 2" of the powder flask partition is missing along the top edge and the original powder flask itself remains in very fine condition showing a few shallow dents. A very fine condition brass dual round ball mould and steel cleaning rod with wide brass handle are also present. An excellent and interesting example for the advanced Remington collector. (13B10320-70) {ANTIQUE} (2500/3500) Est. 2.500 - 3.500

Lot Title/Description

26 Unmarked Morgan James Lightweight Short Range Percussion Sporting 28 Rifle .40 cal, 20" octagon barrel turned for starter with a bright very fine bore showing a few small areas of mild oxidation and otherwise crisp rifling throughout. This is a handsome little compact rifle, unmarked, but classic Morgan James. The barrel retains about 90% original plum-brown finish showing some silvering along the high edges and scattered thinning under bright light, with a little old pinprick pitting scattered about and some minor dings along the edges. The breech features nice swirling cap deflector and shows silvery case-hardened patina: the nipple is a more modern replacement and the hammer shows an old neat repair at the spur and some minor damage along the skirt. The action shows remnants of blue having mostly toned to a pleasant deep gray-brown patina, the crescent buttplate, toe plate and fancy triggerguard a more mild pewter gunmetal. The smooth walnut buttstock remains in very fine condition retaining about 92% original varnish, showing the expected scattered light dings and handling marks. The sides of the butt show some attractive subtle grain figure throughout and there is a right-side German silver pendulum patchbox, the inside of the cover being Remington-marked. The rifle is equipped with a lollipop tang sight, older replacement large silver blade front sight, and a simple hickory ramrod is present. There is some moderate play in the trigger but the lock is otherwise functional and weight is about 7 pounds 4 1/2 ounces. This rifle is pictured and described on page 872 of The New York State Firearms Trade Volume 2 by Swinney & Rowe, A fine little sporting rifle from this prolific and well-regarded New York maker. (13B9670-110) {ANTIQUE} [David & Lore Squier Collection] (2000/3000) Est 2 000 - 3 000 New York Percussion Three Barrel Double Rifle & Shotgun by Hepburn 27 Presented to B.F. Robinson .41 cal & 12 bore, 26 1/2" double rifle barrels and single shotgun barrel with oxidized bores, the rifle barrels with evident rifling. The metal surfaces of this combination gun have mostly toned to a mix of 29 gray-brown and pewter gunmetal patina showing some overall old light pitting and minor dings from the years, the long tailpipes with some evident period repairs. The barrel retains legible maker markings with "L.L. HEPBURN / COLTON N.Y." and the barrel rib also shows a faint but mostly legible script presentation "Presented to B. F. Robinson". The left hammer screw is an old brass replacement and the right hammer is an older gunsmith-made replacement altogether; this side has the swiveling secondary nose affixed to the top for the coupled shotgun and rifle nipples. The back action lockplates show tasteful border embellishments and a nice step down at the centers. Rifle is equipped with crescent buttplate, toe plate and right-side pendulum patchbox and the smooth walnut stock remains in good condition as cleaned showing some thin cracks at the heel and toe, tiny chip below the left lockplate and other light handling marks. The rear sight dovetail has been blanked during the period of use and the arm is sighted with a small aperture tang sight and plain blade front. Simple antique replacement ramrods are present and there is a single adjustable set trigger. The locks seems to function normally. The most notable B.F. Robinson of this period was U.S. Indian Agent Benjamin F. Robinson who worked in the Kansas territory circa 1855-1859, attempting to keep squatters off the Delaware Reserve and enforcing the Kansas-Nebraska Act. This would have corresponded to the first few years of Hepburn's business: the arm certainly appears to have seen some time on the frontier! These three barrel Hepburn guns are quite rare and this remains a very good example. The arm is also pictured and described on page 754 of The New York State Firearms Trade Volume 2 by Swinney & Rowe. (13C9670-108) {ANTIQUE} [David & Lore Squier Collection] (1800/2200)Est. 1,800 - 2.200

.42 cal rifle and 16 ga smoothbore, 29 3/4" barrels with mostly bright very good plus bores showing some scattered mild oxidation, the shotgun bore with some pinprick pitting and the rifle with strong rifling. The barrels of this attractive combination gun retain perhaps 90% thinning original plum-brown finish with areas toning to gray and showing a few scattered light dings and sparse pinprick pitting. The rib and shotgun barrel show attractive subtle damascus patterns; the rib is starting to come up for about 2" at the muzzle. The maker marking with Troy address along the rib remains mostly legible and the patent breech features fancy swirling cap deflectors. The back action lockplates and other remaining parts are a mix of silvery gray and pewter patina, the lockplates with some hints of silvery case-hardened patina and the trigger plate with generous vibrant colors in the protected areas. The gun is nicely appointed with dolphin head hammer and some fine quality embellishments of foliate scrollwork and small endearing game scenes along the lockplates. The triggerguard extension has a finely detailed pineapple finial with foliate finials also coming back from the tailpipe and toe plate. There is a lovely little German silver patchbox on the right side butt with fine foliate scrollwork and pineapple embellishments, the cover with a bear scene. The left-side cheekpiece is rather subtle and much more reserved than those usually seen on Lewis's work and is inlaid with a handsome detailed German silver eagle. The smooth walnut stock remains in very fine condition retaining about 90% original varnish that shows some wear along the forend along with a thin crack along the right-side point of comb and the expected scattered handling marks. There is a vacant rear sight dovetail along the barrel rib and the gun is sighted with a flip-up tang peep sight and target globe with fine post front. An antique brass-tipped ramrod is included and the locks function crisply, though the set function of the rifle trigger will require some attention. A fine example from this respected maker. (13C9670-9) {ANTIQUE} [David & Lore Squier Collection] (2000/3000) Est. 2,000 - 3,000 Interesting New York Percussion Buck and Ball Gun by Morgan James 20 ga smoothbore and .46 cal rifle, 26" barrels with bright very fine bores showing hints of mild oxidation scattered about, the rifle barrel with crisp rifling. The barrels of this combination gun are a relatively even mix of original plum-brown finish and mild gray patina showing some areas of old oxidation staining and minor pitting, mostly scattered along the right shotgun barrel and near the muzzles. The barrel rib shows crisp "M. JAMES / UTICA N.Y." marking along with a "PARKER" stamp adjacent to this. The back action lockplates are marked by lock maker Warren & Steele of Albany and are a mix of dull gray and silvery case-hardened patina embellished with tasteful light foliate flourishes and little game scenes. The fancy triggerguard shows generous smoky case-hardened colors throughout, the remaining stock hardware also with hints of smoky colors. A subtly raised area on the right side of the butt accommodates a somewhat spartan but attractive patchbox and there are additional small compartments on the scant left-side cheekpiece and along the toe plate. The smooth walnut halfstock remains in about very fine condition showing worn remnants of antique varnish with the expected scattered light dings and handling marks from the years. The sides of the butt show some lovely grain figure throughout. The left rifle hammer appears to have suffered an impact long ago and its neck is bent slightly and the nipple is also broken: both locks otherwise seem to function well mechanically. There is a single brass bead on the rib for the shotgun barrel and the rifle has its own sights set onto the barrel with a rear sporting sight with aperture insert and a swing-over small lollipop sight at the tang, sadly the rifle barrel's front sight dovetail is currently vacant. What appears to be the original ramrod is present and this gun is pictured and described on page 866 of The New York State Firearms Trade Volume 2 by Swinney & Rowe. A very attractive buck and ball gun crafted by Morgan James into a very interesting configuration. (13B9670-73) {ANTIQUE} [David & Lore Squier Collection1 (2000/3000) Est. 2,000 - 3,000

Lot Title/Description

30 Fabulous Rare Officers Model 1875 Trapdoor Rifle by Springfield 33 Extremely Rare Remington-Rider Percussion Parlor Pistol .17 cal, 3" barrel with a good bore showing some areas of verdigris Armorv 45-70 Govt, 26" barrel with a beautiful bright excellent bore. This build-up. The all-brass surfaces of this very desirable little pistol have stunning type III Officers Model remains in Museum-grade condition and mostly toned to an attractive pale goldenrod patina showing evidence of according to research, only 100 of these rare rifles were produced in a very light cleaning done long ago along with some scattered tiny dings 1885 from April to June. The barrel and frame retain perhaps 98% lovely and handling marks along the sides and base of the grip. The edges original blue, the barrel just barely drifting toward a plum with some very showing some mild softening and there are some remnants of tarnished light muzzle wear. The breech block, tang and lockplate retain 99% vivid original silver finish lurking about the protected areas. The iron small color case-hardening, the block marked "US/Model/1873" with parts are mostly a mild gunmetal patina showing some minor oxidation appropriate Springfield markings on the lock plate. The barrel band along the hammer and the breech piece and nipple assembly remain retains about 95% original blue which is bright showing rub wear on left intact. The markings along the left side breech remain completely intact and quite crisp showing "RIDERS PT. / SEPT.13.1859" and the original and right, the band spring as well with lovely blue with the bow of the triggerguard having all of its original vibrant color case-hardening, fading sights are intact, the rear being a small dovetailed iron v-notch and the somewhat in the grasping area of the tang. The checkered American front a small German silver bead. The mainspring is perhaps a bit weak walnut buttstock rates excellent and has a crisp 1885 cartouche at left but the hammer otherwise seems to function well mechanically. A very with circled P firing proof to the rear of the checkering pattern. There are handsome example of these peculiar little parlor pistols made in the very sparsely scattered light handling mark here or there but they extremely limited numbers for the advanced Remington collector. are unobtrusive and missed at first glance. The buttplate shows some (13C10320-60) {ANTIQUE} (4000/6000) very nice original blue as well with the engraving and markings on the Est. 4,000 - 6,000 tang crisp showing only light wear at heel and toe. The VP Eaglehead 34 Remington Model 1901 Rolling Block Target Pistol markings remain crisp as does the open scroll engraving atop the barrel serial #3756, 22 LR, 10" part round part octagon barrel with a fair bore showing scattered light pitting and oxidation with otherwise strong rifling band, frame, block and the lock assembly, the thumblatch flat shows an throughout. The barrel of this attractive pistol retains perhaps 40% open spray of engraving while the circular area which fits over the squared protrusion of the latch shaft is unengraved, as-is seen on some original blue appearing strong under ambient light, with overall toning to very late models of Officers Rifle, showing only light tool marks. The a mix of mild grav and grav-brown patina, and showing some scattered Beach combination front sight retains generous original gold wash with light handling marks and a few small areas of old light pitting. The action the appropriate R-marked rear sight in place and vernier tang sight retains about 92% bright blue, restored during factory assembly into neatly inletted atop the wrist. The pewter nosecap is the third type with target configuration, with most of the loss due to thinning to mild the squarish front and what is no doubt the original cleaning rod with gray-brown patina along the high edges and gripstraps, some light brass ferrules is present. The arm seems to function very crisply handling marks and a few small dings along the triggerguard. The small mechanically and the tumbler is two-click. This example has no action parts retain about 95% original blue while the screw heads, detachable checkered pistolgrip and would be extremely difficult to retainer plate and pins show very nice fire blue and straw finishes. All improve upon. A stunning late-made, very rare Officers Model 1875 markings remain intact and strong, the barrel with crisp Remington Arms Rifle. (3E10483-241) {ANTIQUE} [Perry White Collection] Co. address, while the frame retains the original Remingtons Ilion (25.000/35.000)address and martial proofs consistent with a recycled antique military Est. 25,000 - 35,000 frame. The checkered walnut grip and forend are stamp-numbered 31 Very Fine Remington-Smoot New Model No. 3 Centerfire Revolver matching the action and remain in very good plus to very fine condition serial #27790, 38 CF, 3 3/4" ribbed octagon barrel with a bright excellent retaining a healthy amount of original varnish, the checkering showing bore. The metal surfaces of this desirable saw handle-style revolver light wear overall, perhaps more moderate along the forend and a few retain about 97-98% original nickel finish with most of the loss due to a dings along the edges. The barrel is un-numbered and shows "22 LR" few scattered tiny flakes and some mild speckling, more noticeable cartridge designation and the pistol is equipped with its original along the gripstraps, the nickel also with some overall slight clouding checkered trigger, adjustable target rear sight with fine v-notch and tall from the years. The screw heads retain a healthy amount of nice fire Lyman bead front sight (the bead insert has been lost to the years). The blue and the barrel markings were struck a little light but otherwise action seems to function well mechanically. A fine example of these remain intact and legible. The checkered black hard rubber grips with attractive and low-production target pistols. (13B10320-30) {ANTIQUE} fancy "R" monograms remain in excellent condition showing a few light (2000/2500) handling marks and toning to a deep brown patina. The action seems to Est. 2,000 - 2,500 Furr Arms Model 1883 Gatling Gun function well mechanically with a crisp hammer and solid timing and 35 lock-up. A lovely example of the desirable centerfire model. serial #70, 22 Short, 12" barrels with bright excellent bores. This is a (13B10320-44) {ANTIQUE} (1000/1500) faithful 1/3 scale reproduction of the Colt Model 1883 Gatling Gun on a Est. 1,000 - 1,500 field-style carriage with Accles feed drum. All of the brass surfaces are a 32 Remington-Smoot New Model No. 3 Revolver with Interesting Engraved dull goldenrod patina with light ocher-toned oxidation staining and Barrel Markings spotting scattered about the surfaces. The drum magazine is more of a serial #7903, 38 RF, 3 3/4" barrel without rib and a mostly bright about goldenrod patina showing a couple spots of very light pitting and two very good plus bore showing some scattered spots of light oxidation and areas on the edge of the rear face which show impact marks from being dropped, they do not affect the function or rotation of the follower within otherwise strong rifling throughout. This is an interesting revolver that shows very neat period-engraved markings along the left side barrel the body. The carriage is nicely patinated and remains very fine overall. flats "REMINGTON 38-CALB. / NO. 9201899", and it is also wearing a The mahogany wheels remain in very fine to excellent condition and the nice set of factory faux ivory celluloid grips. The metal surfaces retain arm seems to function properly and is complete with the exception of the about 97-98% original nickel finish showing some scattered tiny flakes rear pointing tiller which is not present. (3C10471-44) {MODERN} (5000/7000) and light handling marks mostly along the barrel, along with a few errant Est. 5,000 - 7,000 freckles. All markings remain crisp and clear, the top barrel flat showing the standard address and patent date in addition to the aforementioned engraved markings. The original celluloid grips remain in excellent condition showing a nice "patina" and a few very thin tiny drying cracks, their construction is rather unique as well as the inside surfaces show a

molded-in steel reinforcement plate. The action seems to function well mechanically with a crisp hammer and solid timing and lock-up. A very interesting example for the advanced collector, perhaps owned by some sort of agency, ammo manufacturer or in the reference collection of a competing gun-making firm. (13B10320-43) {ANTIQUE} (1200/1800)

36	Handsome Furr Arms Model 1857 Napoleon Cannon 1 1/4" bore This is a one-quarter scale firing model of the venerable Napoleon Model 1857 twelve-pounder used so much during the American Civil War. The barrel is roughly 22", muzzle rim to cascabel with an 18 3/4" bright excellent bore. All of the brass hardware is a bright goldenrod patina showing a minor oxidation stain here or there which are very unobtrusive. The carriage appears to be English walnut and rates excellent, all of its hardware as well a bright goldenrod. It features a functional elevation mechanism and of course the wheels rotate as-designed and have quick-detach axle pins on each. It comes with a prolong rope, single sponge/rammer and a bucket. While un-serialized it is marked on its underside "Made by/Furr Arms December 1981/Orem Utah". The wheels are 19 1/2" tall and width is roughly 27" axle-tip-to-axle-tip, with an overall length from muzzle face to lunetter ring of about 42". The cannon comes complete with a stand of five replica brass cannonballs for display, they do not fit the bore, their diameter is 1.305" but they do give a very attractive display. Very few of these Furr Arms firing cannon were made, some sources say less than 20. This is a beautiful example which appears un-fired and certainly is worth having a mould made for. [Extra Shipping Will Apply] (3B10082-1) {ANTIQUE}		39	Fine Burnside Rifle Co. Spencer Model 1865 Military Rifle Modified by Springfield Armory serial #15442, 50 RF, 32 1/2" three groove barrel with a bright very fine bore showing a few scattered small spots of old oxidation or light pitting and otherwise strong rifling throughout. This is a very handsome example, one of 1,108 carbines altered by Springfield Armory into infantry rifle configuration. The barrel retains about 90% original blue with most of the loss due to a few areas of old oxidation, and spots thinning to gray-brown patina under bright light, along with some light handling marks. The rear sight retains most of its original blackened finish and the left side breech shows proper stamped serial number. The action retains about 95% strong case-hardened colors under a layer of old hardened preservative along with a few handling marks, the nosecap, barrel bands and buttplate also with generous smoky colors, the buttplate with a small area of moderate oxidation at the heel. All markings remain intact and strong and most of the screw heads and the band springs retain lovely brilliant fire blue. The smooth walnut buttstock and full-length forend remain in very fine to perhaps near excellent condition having darkened rather nicely from the years and showing strong oil finish, the buttstock with a thin sliver missing below the

55	
	Remington Trials or Exposition Rolling Block Carbine with Engraved
	Barrel Markings
	56-50 RF, 19 3/4" round barrel with a mostly bright very fine bore
	showing a few areas of oxidation, mostly nearer the muzzle and in the
	chamber, with otherwise crisp rifling. This is an interesting carbine that is
	something of a departure from the standardized Remington system and,
	with its fancy markings, was perhaps displayed at shows or expositions
	such as the 1867 Paris Expo. The breech pins are screw-retained and
	the hammer and breechblock are also unique, the breechblock having
	no concavity for the hammer nose, the face of the hammer instead
	being contoured to match the curvature of the block. Finally, the barrel is
	very neatly hand-engraved in large flowing script "E. Remington et Sons Ilion New-York U.S.A." (note the use of French "et" for "and"). The barrel
	has mostly toned to a deep mottled plum-brown patina showing a few
	areas of moderate old oxidation and a little pitting mostly along the sides
	nearer the breech, the barrel is also a little loose in the frame but this is
	relatively unobtrusive. The action retains perhaps 85% original
	case-hardened colors, quite lovely and vibrant along the sides, with loss
	due to scattered brown speckling and oxidation, light handling marks
	and old pitting along the tangs. The US-marked buttplate and barrel
	band also retain generous case-hardened colors throughout and the
	band spring retains a hint of brilliant fire blue. The action appears to be
	unmarked and the underside of the barrel shows markings consistent
	with military inspection "C.G.C. / C P". The smooth walnut buttstock and
	forend remain in about very good plus condition having darkened
	somewhat from the years, showing a few tiny slivers along the upper
	tang, some light drying cracks and a small abrasion along the right edge
	toe line. There is a very small repair along the toe line about 4" ahead of
	the buttplate and the buttstock exhibits a hint of minor play. Equipped
	with standard military-style sights and left-side extractor, the action
	seems to function well mechanically. This carbine is pictured and
	described on page 127 of The Guns of Remington by Madaus and
	Goodwin. A very interesting and unique carbine for the advanced
	Remington collector. (13C10320-18) {ANTIQUE} (4000/6000) Est. 4,000 - 6,000
56	Interesting Experimental Remington Rolling Block Auto-Ejecting Carbine
	Formerly of the Remington Arms Co. Factory Collection
	50-45 CF, 20" round barrel with a bright very fine bore showing a few
	small areas of mild old oxidation and strong rifling throughout. This is a
	fascinating experimental carbine which was designed to open the
	breechblock and eject the spent shell automatically upon manual
	cocking of the hammer, the hammer then dropping to half-cock in a way
	similar to the New York contract arms. While offering a much quicker

	manual of arms, this system is evidently not without its drawbacks perhaps explaining why it was not developed further. Most glaring is the fact that if the hammer decides to not catch on the breechblock and open it, there is no other way to get the action open. Indeed this example may require some adjustment as the hammer only operates the entire system about half of the time, otherwise just cocking while the breechblock stays closed. Despite its inherent problems it remains an ingenious system. The carbine actually appears to have seen a fair amount of use perhaps during a military trial, the barrel toning to a medium plum-brown patina with some scattered light dings and old oxidation staining. The action is a pleasant mix of silvery and pewter gunmetal patina and the metal surfaces appear to be unmarked beyond a small "B" on the barrel band and off-stuck "P" on the barrel beneath the band. The smooth walnut buttstock and forend remain in about very good plus condition showing good oil finish with some light chipping around the edges of the buttplate, some scattered light dings and handling marks. There is a small hole in the forend just ahead of the barrel band spring and the buttstock fit exhibits some play. The left side rear of forend is stamped "21" and the brass factory tag numbered "80" is present along the toe line. The carbine is equipped with a single

	I
57	Remington No. 1 Rolling Block Sporting Rifle
	serial #3748, 40-50 Bottlenecked, 26 1/4" octagon barrel with a bright
	very fine to near excellent bore showing a little bit of mild oxidation
	scattered about and otherwise crisp rifling. This is a rather handsome
	and nicely-configured rifle, equipped with special order single set trigger
	and "extra sights" consisting of combination rear sight and Beach front.
	The barrel retains about 90% original blue showing scattered light
	freckling and areas toning to a pleasant plum-brown patina under bright
	light. The barrel shows E. Remington & Sons address, "40 CTG'E" and "S.T. / E.S." beneath the forend. The action shows attractive mottled
	smoky case-hardening throughout with some vibrant colors along the left
	side and scattered mild oxidation speckling. The steel schnabel and
	buttplate also retain generous smoky case-hardening, the trigger shows
	strong straw color and the other small parts retain a healthy amount of
	brilliant fire blue. Two of the action screws show some moderate slot
	wear but this is mostly unobtrusive. The smooth walnut buttstock and
	forend remain in very fine condition retaining a healthy amount of
	original oil finish with the expected scattered light dings and handling
	marks, the buttstock with a few streaks of some older finish along the left
	side; stock fit remains excellent. The set trigger will require a little
	mechanical attention as it only drops the hammer to half cock when set
	and pulled, if the trigger is fired normally it seems to function well. A very
	nice special order No. 1 sporting rifle. (13B9670-204) {ANTIQUE} [David
	& Lore Squier Collection] (2500/3500)

Lot Title/Description

59 Exceptional Paris Second Model LeMat Percussion Revolver serial #1364, .42 cal / 18 bore, 6 3/4" octagon barrel with a bright excellent bore showing just a few sparsely scattered light freckles still retaining most of its internal blue finish, the shotgun bore is similar showing a few small areas of old very mild oxidation staining and otherwise retaining much of its bright blue. This is just a wonderful LeMat revolver, essentially unused and very possibly unfired. The metal surfaces retain about 92-95% original bright blue finish showing some mild high edge wear, a few scattered thin scratches and handling marks and scattered flaking most noticeable along the gripstraps, butt and triggerguard toning to a pleasant gray-brown patina. There are a few small dings at the rear top of barrel and along the barrel pin head that are unobtrusive and normally would not be worth the mention and the metal surfaces do show a few honest small casting flaws from the factory, namely one shallow pit right of the trigger. The hammer and trigger retain much of their rich straw color, a little mild brown speckling present along the trigger face and top of the hammer and the nipples retain essentially all of their subtle fire blue finish remaining in superb as-new condition. Indeed the chambers remain brilliant as well, with just a few scattered spots of brown, still showing their factory polishing marks. The script barrel address "Col Le Mat Bte s.g.d.g. Paris" remains stunning and absolutely crisp, the marking being slightly off-center which is consistent with other examples. Two minor apologies: the tiny retainer spring for the loading lever has been lost to the years (an extremely common occurrence) and the small hooked tab at the back of the hammer nose to acuate the hammer for shotgun firing has broken off. The screw heads and escutcheons show crisp simple line embellishments, all serial numbers remain strong and the right side barrel shows proper "(Star) / L.M" marking. The front face of the cylinder shows small "H" stamp and the left side hammer a small "X". The checkered walnut grips are pencil-numbered to the gun and remain in excellent as-new condition with crisp checkering throughout and perfect fit. Al of the serialized parts are matching including the barrel retainer pin and grip screw, and the action seems to function well mechanically. A spectacular investment quality LeMat revolver suitable for the very finest of American or antique arms collections. (13G10237-1) {ANTIQUE} (25.000/50.000) Est. 25,000 - 50,000 Remington Model 1890 Single Action Revolver 60 serial #1385, 44-40, 5 3/4" barrel with an oxidized bore showing evident rifling. The metal surfaces of this revolver have mostly toned to a medium pewter gunmetal and gray patina showing evidence of an old cleaning with scattered remnants of old light pitting and small dings. The tip of the base pin shows some mild damage, there is one tiny moderate ding along the back edge of the cylinder that has been lightly dressed and the German silver blade front sight is intact. The Remington Arms Co. barrel address remains completely intact and quite strong as does the "44 C.F.W." stamp on the left side frame. The black checkered plastic grips with RAC monograms are more modern reproductions that are rather shy at the top of the frame and otherwise remain in very fine condition. The lanyard ring has been ground flush. The triggerguard and loading gate are matching the frame and the action is functional with good timing and lock-up exhibiting a little bit of play. A good example of these scarce Remington cartridge revolvers that has plenty of character. (13B10320-57) {ANTIQUE} (1800/2200) Est. 1.800 - 2.200 61 Confederate Kerr Patent Single Action Percussion Revolver by London Armourv serial #3506, 54 bore (.44 cal), 5 3/4" octagon barrel with a good bore showing scattered old pitting and oxidation with otherwise strong rifling throughout. The metal surfaces of this revolver have mostly toned a relatively even mix of mild plum-brown and dark gray patina showing old light pitting and remnants of oxidation staining overall. Many of the screws are old replacements and the lanyard ring has been ground off long ago. The lockplate retains a very strong "LONDON ARMOURY" marking, the remaining marks rather softened and obscured from the years with good "LONDON ARMOURY" stamp on the left side frame, faded but legible "KERR'S PATENT" with serial number on the right, "LAC" on left barrel flat and proper period London proof marks. The checkered walnut grip remains in about very good condition showing some slight shrinkage from the years, scattered dings and a drying crack at the toe from the lower tang to the buttcap. The checkering otherwise remains quite strong and the grip retains a very faded but discernible remnant of the "JS / (Anchor)" Confederate inspection stamp. The cylinder is matching the frame and exhibits moderate play though the action is still functional with loose timing and lock-up. A rather salty but respectable example with a lot of character that one would expect to see from a well-used Confederate arm, the distinctive Kerr revolver proved popular with its Southern users. (13C10206-11) {ANTIQUE} (3000/5000) Est. 3,000 - 5,000

52	Confederate Adams Percussion-Converted Model 1836 Pistol .54 cal, 8 1/2" round barrel with an oxidized bore. Converted by Thomas Adams of Richmond, Virginia utilizing an 1837-dated A. Waters lockplate, this pistol has seen honest use and certainly has a lot of character. The metal surfaces are a mix of medium gunmetal gray and pale gray-brown patina showing some overall old pitting, the nipple and hammer skirt showing some minor damage. The lockplate and breech markings remain mostly intact and strong and the smooth walnut stock remains in very good condition having darkened from the years and showing some scattered thin drying cracks, a small chip behind the lockplate and scattered handling marks. There is a very ghostly inspector cartouche on the left flat and conversion code ahead of the triggerguard. The principal components are also stamped with matching conversion code and the lock remains functional. A very good Confederate-converted pistol. (13B10206-13) [ANTIQUE] (1500/2000)
63	Confederate Pattern 1853 Percussion Rifle-Musket by Barnett .577 cal, 39" barrel with a partially bright good bore showing some overall light pitting and old oxidation with otherwise strong rifling throughout. The barrel of this three-band rifle has mostly toned to a pleasant rich plum-brown patina with some good streaks of original blue along the wood line along with some old vise jaw marks along the left side breech and moderate erosion around the nipple bolster from honest use. The lockplate and barrel bands are a medium gray-brown patina, the lockplate retaining very nice markings showing "(Crown) / Tower" at the rear and "BARNETT / LONDON" in the center. The left side breech also retains strong London proof marks. The brass nosecap, triggerguard and buttplate are a pleasant mild ocher patina showing some scattered light handling marks. The smooth walnut stock remains in very fine condition showing an older neatly applied light oil finish with a few small areas along the butt showing evidence of an old minor cleaning along with the expected scattered light dings and handling marks. There is some rather extensive wood flash erosion at either side of the nipple bolster. The inside of the ramrod cutout retains strong markings with "W. JONES" stock maker stamps and "VII" assembly hash marks. The external markings are rather soft but visible, the left flat with circled "JC" view mark adjacent to a "JM" and there is another stamp at the heel associated with Confederate contract-inspected arms that appears to be the "(Crown) / SHC" of supplier Sinclair-Hamilton & Co. The rear sight assembly or at least some of its components and the sling swivels are later replacements and a grooved head ramrod is present, the shank stamped with large "6301". The lockplate and lock screws show matching "VII" assembly marks as the stock and the lock is crisp and seems to function well mechanically. An attractive Confederate contract Barnett rifle-musket. (13B10206-53) {ANTIQUE} (2500/3500)

Confederate Spiller & Burr Percussion Revolver

serial #128, .36 cal, 7" octagon barrel with an about good bore showing

64	Confederate Richmond Armory Type II Rifle-Musket identified to "John	66
	Gunter"	
	.58 cal, 40" barrel with a mostly bright very good bore showing some	
	scattered light pitting and old oxidation with otherwise strong rifling throughout. This is an attractive Type II rifle-musket, scratched with	
	soldier's name in rather folky letters along the right side butt with what	
	appears to be "John Gunter", the "G" slightly ambiguous, but based on	
	soldier records the most likely. Sadly, numerous John Gunter's and "J.	
	Gunter's" are listed as serving with the Confederacy, infantry soldiers	
	listed include service with the 8th Regiment South Carolina Infantry, 1st	
	Regiment Georgia Infantry, Clark's Regiment Missouri Infantry and quite	
	a few others. The metal surfaces show evidence of a very old light	
	cleaning now mostly toned to a pleasant pewter gunmetal patina	
	showing scattered remnants of old light pitting and minor oxidation staining, most of it unobtrusive. The breech markings have softened	
	from the years and remain legible for the most part showing the original	
	Federal "V / P / (Eagle Head)" along with "1862" date. The bolster	
	cleanout screw appears to be an old replacement and the barrel bands	
	show the familiar "U" stamps. The lockplate markings are really quite	
	nice showing "1862" date at the rear and "C.S. / RICHMOND,VA." at the	
	fore. The smooth walnut stock remains in very good plus condition	
	showing a very old light cleaning with some scattered small shallow old	
	chips and minor drying cracks mostly along the ramrod channel. There are the expected scattered dings and some softening of the edges, the	
	wood reacquiring some nice raised grain and the lock cutout showing	
	the proper inletting. In addition to the name on the butt there is a	
	stamped serifed "T" ahead of the triggerguard and what appears to be a	
	small "JJ" behind the triggerguard tang. The stock is equipped with the	
	familiar Confederate brass nosecap and buttplate that are a pale ocher	
	tone showing evidence of an old cleaning with some scattered light	
	dings. The proper sights and swivels are intact and an antique	
	trumpet-shaped ramrod is included along with a chained nipple protector from an Enfield musket and what appears to be an authentic correct	
	linen sling with leather fittings that remains in fine condition showing a	
	few small tears and crackling in the leather and some mild overall	
	discoloration or staining of the linen. The lock seems to function well	
	mechanically. This is a very attractive Confederate rifle-musket for the	
	Civil War collector. (13E10124-12) {ANTIQUE} (5000/7000)	67
65	Est. 5,000 - 7,000 Confederate Griswold & Gunnison First Model Percussion Revolver	
00	serial #766, .36 cal, 7 3/8" round barrel with round breech and a good	
	bore showing moderate pitting and oxidation in the grooves with	
	otherwise strong gain twist rifling. This is a very handsome example, the	
	iron surfaces mostly toned to a mix of mild gray-brown and gunmetal	
	gray patina showing the expected scattered old light pitting, perhaps a	
	bit more moderate in some areas along the cylinder, along with some	
	old dings and tool marks. One nipple shows some chipping and there are remnants of the safety pins still present. The serial number "766"	
	remains completely intact and strong stamped on the rear right side	
	barrel, frame and along the cylinder. The brass frame, backstrap and	
	triggerguard have toned to a lovely rich ocher patina showing the	
	expected scattered light dings and handling marks, those on the base a	
	bit more moderate, and the edges remain quite nice overall. The smooth	
	walnut grip remains in very good plus to very fine condition exhibiting	
	some very slight shrinkage, a few tiny chips along the edges and dents along the base. The wedge is unmarked, the loading lever plunger	
	appears to be an old replacement and the arbor exhibits some play, all	
	of this being relatively minor. The revolver shows the proper assembly	
	numbers and familiar "cryptic" inspector markings, the following areas	
	stamped with backwards "GG": inside back edge of frame, right inside	
	frontstrap, right inside backstrap and underside barrel behind the	
	loading lever retainer. Next the assembly number "16" is found on the	
	trigger, hammer, right inside frontstrap, left inside backstrap and pencil-numbered along the back inlet on the grip. The inside surface of	
	the barrel lug also shows a tiny "11" or "II" and the loading lever is an	
	original mismatched component assembly-numbered "8". This is a very	
	attractive and honest example of these desirable Confederate revolvers.	
	(13E10206-17) {ANTIQUE} (18,000/22,000)	
	Est. 18,000 - 22,000	

scattered old pitting and oxidation with otherwise strong rifling throughout. The iron surfaces of this Macon-assembled revolver show evidence of an old cleaning, some areas with some perhaps more zealous attempts with evident buffing or light grind marks along some edges of the barrel and throughout the cylinder, it is generally unobtrusive and most noticeable upon closer inspection and the cylinder retains some of the subtle twist marks common on these arms. There is the expected scattered old pitting and the barrel, cylinder and hammer have mostly toned to a deep plum-brown patina, the loading lever base pin assembly more of a medium pewter gunmetal. The brass frame and triggerguard are intact and have toned to a pleasant mild ocher patina showing some scattered old dings and areas of light casting pits, the edges remaining quite nice overall. There is a very thin crack forming at the front of the triggerguard and three small notches along the right edge topstrap. The Confederate surcharge on the frame remains completely intact and strong, it is the single period variant found on the left side "C.S". The serial number on the frame also remains strong and shows proper Macon-style font. The smooth walnut grips appear to be un-numbered and unmarked rating about very good plus showing some areas a little shy of the frame, scattered light dings and a small spot of synthetic filler along the bottom edge of the left panel and back edge of the right. The serial number is repeated on the frame on the inside beneath the triggerguard and left inside heel, the left inside of the frame also with a series of three partially struck digits. The inside triggerguard shows visible "1 8", the middle digit lost to some old random grind marks. The top flat of the barrel is unmarked and the bottom flat shows rather faded numbers, the Macon "1" clearly legible, the subsequent two digits difficult to discern but very likely "28" and the barrel is sighted with proper brass cone. The cylinder has no discernible number which is common, the loading lever shows a partial "28" and the base pin is instead numbered "328". The action is a little stiff but generally seems to function well mechanically. A fine example of these low-production Confederate revolvers for the antique arms collector. (13F10206-12) {ANTIQUE} (18,000/22,000) Est. 18,000 - 22,000 British Webley Wedge Frame Double Action Percussion Revolver by J. Adams serial #22885, 54 bore (.44 cal), 6 1/4" octagon barrel with an about good bore showing some scattered patches of light pitting and moderate oxidation along with some bright areas and otherwise strong rifling. This British revolver is of the type imported into the South for use by the Confederate military, though is of rather later production, with accepted Confederate-used guns generally reaching the low 5000 or 6000 serial number range according to revolvers studied in The English Connection by Pritchard & Huey. In any event, this revolver follows the exact form of those guns with Colt-style loading lever and five-shot cylinder. The arm remains in very nice condition with the barrel retaining about 85% original bright blue showing overall thinning under bright light, some flaking to gray-brown patina and a few small spots of old fine pitting. The cylinder retains perhaps 50% bright blue with the balance toned to a mix of pewter gunmetal and mild gray-brown patina and showing a few small areas of old light to perhaps moderate oxidation. The frame and triggerguard have mostly flaked to a pleasant medium grav-brown patina, the frame with light borderline embellishments. Many of the screwheads and the loading lever catch retain strong fire blue and all markings remain intact and strong showing Birmingham proof marks. "LONDON" on the topstrap, "J.ADAMS" on right side frame, "PATENT No 22885" on left and the chambers numbered 1-5. The wedge screw is missing and barrel-to-frame fit shows a little bit of play but this is relatively minor. The checkered walnut grips remain in very fine to perhaps near excellent condition retaining nice diamond point checkering with just a few scattered light dings and handling marks. The trigger requires a little manual assistance to reset and the action

otherwise seems to function well mechanically with generally good timing and lock-up. A fine example for the antique arms collector.

This early .58 cal, 35" octagon barrel turned for starter with a partially bright good bore showing scattered light pitting and oxidation with otherwise strong rifle has wonderful factory engraving in a pattern seen on very few rifles. This first style rifle also shows proper sight dovetail in top of action as rifling throughout. The barrel of this rifle is mostly a dark plum-brown well as top of barrel and the buttplate is the proper early style with patina showing some overall old mild oxidation while the lockplate and rounded heel. The action of the rifle shows full coverage relief floral remaining parts are a mix of dark gray and gray-brown patina showing scroll engraving with beautiful rope pattern borders. The left side of the overall light pitting. The barrel is clearly marked "MADE BY JOHN action shows a wedge with geometric pattern at top of sideplate running WURFFLEIN, PHILADA FOR MAJOR JAMES HENRY CARLETON, down between two large floral scrolls. The right sideplate shows a single U.S. ARMY", the lockplate also maker-marked and showing softened floral spray from the main area of scroll down toward the lever screw. foliate embellishments. The barrel is fitted with a full under-rib and Both of the above-mentioned treatments are also found on Henry #1570 secured to the stock with dual wedges. The smooth walnut buttstock which is illustrated in the Winchester Engraving book. In his Winchester remains in fair condition showing an older repaired break through the Book, George Madis shows Henry #1400 which has identical right-side wrist, some cracks and thin slivers missing along the edges of the forend engraving, the left side is not pictured but he mentions the wedge of and scattered dings. The checkering has been lost to the years and the geometric pattern engraving at the top of the left sideplate, seemingly stock features a right-side pendulum patchbox and left-side shadowline that rifle was engraved in the same pattern as this rifle. Engraving is cheekpiece also showing some rather nice grain figure along the sides present on all of the top surfaces of the frame including the top tang and of the butt, the right in particular with some attractive feathercrotch. the radiused areas to either side of the hammer. The serial number There is a vacant mount for a period sight at the tang, the rear sight is a "1220" appears on the top of the barrel, left side of lower tang, inside top simple fixed v-notch and the front is a German silver blade. A simple tang inlet of stock, inside heel of buttplate as well as all buttplate and replacement hickory ramrod is present, the nipple is a more modern stock screws. The condition of the rifle is wonderful with the barrel replacement and the lock with double set triggers remains functional. retaining a pleasing even smooth brown patina with barrel address Major, and later General, James Henry Carleton was born in Maine in remaining clear and fully legible. The action shows 80% plus original 1814 and first served in the 1st U.S. Dragoons during the Mexican silverplated finish which has tarnished to an almost black color with American War. Later he dealt with the aftermath of the September 1857 visible brass surfaces bearing a lovely untouched patina. The figured Mountain Meadows Massacre, submitting an investigative report to the walnut stock was cleaned and had finish re-applied at some point, it fits U.S. government concluding that Mormons disguised as natives (along well, is original and properly numbered and shows nice figure. Engraved with some legitimate Native American allies) were to blame for the Henry rifles are much sought after in any condition, this particular murder of the Baker-Fancher emigrant train. During the Civil War example retains a high percentage of original silver on the action. An Carleton served as commander of the 1st Regiment California extremely fine and handsome factory engraved Henry rifle for the Volunteers and was responsible for the security of New Mexico after advanced Winchester collector. (1F-10483-154) {ANTIQUE} [Perry Confederate forces were expelled from the territory. Webley WG Army Model Double Action Revolver with Army & Navy CSL Markings serial #13738, 455 Webley, 6" barrel with a mostly bright very good bore showing some scattered light pitting and strong rifling throughout. The metal surfaces of this revolver retain perhaps 60% original bright blue flaking overall to a mix of gray-brown and plum patina along with some scattered light dings and old oxidation staining. The cylinder has mostly flaked to a deep gray-brown patina showing some streaks of bright blue in the flutes. There are some light dings and small tool marks scattered along the breech face but they are relatively unobtrusive and the small parts are a mix of pewter gunmetal and mild grav-brown patina. All markings remain intact and strong showing the original commercial proof marks and flying bullet logo. The revolver is also stamped with slightly later Birmingham nitro-proofs and shows the familiar "ARMY & NAVY C.S.L." marking along the barrel rib and also apparently entered government stores at some point as there is a broad arrow and military inspector stamp on the left side topstrap. The black checkered hard rubber target grips with "WG" monograms remain in very good condition showing some scattered light dings and a few small synthetic repairs along the top edge left panel, and top edge and toe of the right panel. Grip fit remains very good and barrel-to-frame fit is solid. The cylinder is mismatched numbered "518" but remains unmolested in its original 455 chambering and the barrel is matching the frame. The action seems to function well mechanically with very good timing and lock-up. A very respectable example of a desirable model with nice markings, it should be noted that the University of Glasgow currently owns the Army & Navy CSL records and may be able to provide information on the original purchaser of this revolver, for a small fee. Lot Title/Description

80 Very Rare & Important Engraved & Cased Colt Model 1851 Navy Revolver Presented by Sam Colt to U.S. Navy Lt. Charles "Alvarado" Hunter

serial #23479, .36 cal, 7 1/2" octagon barrel with a bright very good plus bore showing a few small areas of light oxidation or fine pitting and otherwise crisp rifling. Charles Hunter began his naval service as a midshipman on November 9, 1824 first serving aboard the USS North Carolina. Something of a firebrand, Hunter's first incident of notoriety occurred on March 21, 1830 when he killed a Mr. William Miller during a duel that resulted from a quarrel between two groups of friends of Hunter and Miller, respectively. He was temporarily dismissed from the Navy as a result, being reinstated in 1833. He was later court-martialed in 1837 while serving in the Mediterranean for apparently offending his commanding commodore during a horse race. Next came the Alvarado affair, from which Hunter gained his sobriquet. In April 1847 during the Mexican-American War, Hunter was ordered to merely keep an eye on the important Port of Alvarado while an operation was being planned. He instead seized the port altogether, encountering only slight resistance. A newspaper at the time commented wryly that they could imagine fleet commander Commodore Perry surveying the preparation of his fleet for the grand assault on Alvarado, oblivious to the fact it had already been taken by Hunter! His honor apparently besmirched, Perry had Hunter court-martialed for disobeving orders and dismissed from command. The country and public however were largely behind Hunter. dinners held in his honor and large cheering crowds attending his return to New York. He was finally given another command, the USS Bainbridge, in 1853 and served in South America. One final incident would put an end to his naval career, as he deserted his squadron altogether as a result of his commanding officer not letting him go address a purely diplomatic issue between the American consul and government of Paraguay. Hunter sailed all the way back to New York and released a statement condemning the wasteful use of naval warships for pointless pursuits. President Pierce personally ordered his name stricken from the naval rolls on January 29, 1855. Hunter did not live much longer beyond his final disgrace and died from illness on February 28, 1856. It appears Hunter was acquainted with Sam Colt for quite some time, one can surely understand these two characters being fast friends. According to the book Samuel Colt: Arms, Art, and Invention by Houze and Kornhauser, on page 75 it is reported that Hunter was one of those few men gifted a special early commercial Colt Walker revolver by the inventor, in 1847 (these revolvers in the serial number range of 1001-1020). The Navy revolver presented here was made in 1853, one can easily see it being presented to Hunter by Colt in congratulations for being reinstated to naval command in that very same year or as a gift before departing aboard the Bainbridge for South America. The revolver remains in fine condition and is masterfully embellished by the unmistakable hand of the Gustave Young shop, the entire frame, gripstraps and breech end of the barrel extensively engraved with the finest quality detailed foliate scrollwork with very fine punch-dot shading. The right side barrel shows the trademark eagle head integrated into the scroll, the left side rear frame with a dogs head, and wolf's head hammer. The backstrap, triggerguard and muzzle also show some attractive geometric bordering. The major components show the familiar small punch dot denoting a special finished arm and the backstrap shows lovely presentation "Chas Alvarado Hunter / U.S.N. / FROM. THE. INVENTOR." The barrel and cylinder have mostly toned to a mild pewter gunmetal patina showing some pale brown undertones and some sparsely scattered remnants of old minor oxidation staining with a few very minor pinprick pits. The barrel retains some faded streaks of original bright blue lurking about with a few small brilliant patches in the protected underside areas and the inside of the loading lever retains streaks of bright colors. All engraving remains crisp and lovely, the cylinder naval engagement scene is largely intact with some slightly obscured areas and the safety pins are mostly intact. The frame and hammer are a pleasant smoky gray case-hardened patina showing a few scattered specks of mild oxidation staining mostly along the hammer and some remnants of an old dark brown protective lacquer. The barrel shows Colts New York address, the cylinder with strong "COLTS PATENT" and Ormsby marking, and the "COLTS PATENT" on the left-side frame hand-engraved. The backstrap and triggerguard retain about 65-70% original silver finish showing some thinning along the high edges and backstrap toning to pale ocher brass and the silver with a pleasant mild patina. The smooth deluxe walnut grip is ink-numbered to the gun and remains in near excellent condition retaining about 97% original varnish with some slight edge wear and a few light dings and handling marks. The grip shows somewhat subtle but attractive grain figure throughout and all of the serialized parts are matching including the wedge. The action seems to function well mechanically with solid timing and lock-up. The revolver rides in an antique case that appears to be Colt in every respect and remains in fine condition retaining strong antique varnish along the exterior that shows some areas of moderate flaking and the expected light handling

marks. The base shows two brands with the name "C.E. FLEMING", Interestingly, Charles Hunter and Charles E. Fleming were midshipmen concurrently, both doing duty aboard U.S.S. Constitution, both while on station in the Mediterranean. It is likely Hunter left the arm to his old shipmate upon his death (Naval Register 1836). The interior is lined in maroon baize rating very fine showing some minor discoloration and scuffs and the case contains a Colts Patent panoply of arms powder flask that appears to have been lightly cleaned some time ago and shows a few scattered dents, a combination tool, single cavity conical bullet mould, partial Eley cap tin and two brass keys. A small assortment of documents further detailing the life of Lt. Hunter is also included. This is a wonderful revolver presented to a colorful and perhaps somewhat tragic naval officer that would make a very fine addition to the most advanced Colt or American arms collection. Lot Title/Description

81 U.S. Springfield Armory Model 1870 First Type Sharps Rifle serial #C,33333, 50-70, 35" barrel with a bright near excellent bore with a little oxidation nearer the muzzle and otherwise crisp rifling. The barrel and bands of this rifle are toning to a mix of pewter gunmetal and mild gray-brown patina showing some very fine pinprick pitting across its length. The action is a darker mottled gray-brown patina showing a few small areas of old light pitting. The original patent markings and sub-inspector stamped along the action remain quite crisp and clear and the upper tang and left side barrel breech show proper matching numbers. The smooth walnut buttstock and forend remain in very good condition showing remnants of oil finish with a small thin crack at the left side where the buttstock meets the frame and the expected overall light dings and handling marks. There is a small boxed cartouche behind the lower tang and the proper "ESA" inspector cartouche on the left side wrist has softened a little but remains intact. Much of the priming system has been removed as-expected, all other proper hardware is intact and the action seems to function well mechanically. A very respectable example of these scarce U.S. martial arms, about 700 of which were produced. (13B10483-203) {ANTIQUE} [Perry White Collection] (2000/3000) Est. 2,000 - 3,000 82 Scarce U.S. Springfield Armory Model 1870 Second Type Sharps Rifle serial #190, 50-70, 35" barrel with a mostly bright very good plus bore showing some scattered light oxidation and strong rifling throughout. The barrel and bands of this rifle remain in-the-white showing evidence of an old careful cleaning with some streaks toning to pale gray-brown patina and scattered very fine pinprick pitting. The rear sight retains almost all of its blackened finish and the action is toning to a pleasant mix of medium grav-brown and silvery case-hardened patina showing a little old minor pitting scattered about. The patent markings along the action have softened somewhat and the upper tang and left side barrel breech show proper matching numbers. The smooth walnut buttstock and forend remain in very good plus condition as very lightly cleaned long ago showing remnants of an old oil finish and the expected scattered light dings and handling marks. The left side wrist shows proper "ESA" inspector cartouche that has softened somewhat but remains legible and the left rear of forend also shows what appears to be a company unit marking. The stamp is difficult to make out but "C Co." is legible. All proper hardware is intact and the action seems to function well mechanically. A very good example of these low production rifles, about 300 of which were produced. (13B10483-202) {ANTIQUE} [Perry White Collection] (2500/3500) Est. 2.500 - 3.500 Winchester Model 1895 N.R.A. Lever Action Musket 83 serial #67542, 30-06, 24" round barrel with a bright very good plus bore showing some scattered fine oxidation and frosting in the grooves with otherwise strong rifling throughout. The barrel of this 1909-made rifle retains about 65% original blue with most of the loss due to some moderate oxidation and light pitting, mostly scattered along the right side, the sight hood and barrel bands similarly showing moderate overall oxidation with streaks of original bright blue. The action retains about 60% original bright blue, the arm apparently having lain in some sort of caustic material long ago as it shows light erosion and moderate oxidation along the sides, predominantly the right. The bolt itself retains about 90% original bright blue, the hammer shows vibrant case-hardened colors throughout and the correct smoot flat buttplate shows some smoky remnants of colors. All markings remain intact and strong, the left side action showing "N.R.A." stamp, the letters somewhat off-struck with weak top edges. The smooth walnut stocks remain in very fine condition retaining strong oil finish showing the expected scattered light dings and handling marks, the right finger groove with a very thin 4 1/2" drying crack present. The proper 1901 Krag rear sight is intact and the action seems to function well mechanically. In this special configuration these rifles were made to comply with military-style target matches, while this example has suffered a bit it remains a very respectable example of a scarce and desirable 1895. The forend is un-numbered, missing its screw escutcheon and is not quite fitted		101	Savage Model 1899 Featherweight Two Barrel Set Rifle Shipped to Carlton L. Wood, Director of Savage Arms Corp. serial #110132, 30-30 Win & 25-35 Win, 20" barrels both with bright excellent bores. The receiver retains about 95-97% bright original blue showing sharp edge and handling wear with some light drifting to plum, with a bit of pewter on the carry point of the belly. The trigger shows good pale fire blue with a spot of light surface oxidation on the frame just ahead of it showing a light steel wooling, the lever showing some nice case colors which are vibrant in the protected areas and left flat, a mottled smoky case-hardening on the radii. Both barrels retain 97-98% original blue, the takedown collar on the forearm with bright original blue flaking to plum, the 25-35 barrel with some very light loss at the muzzle. The smooth walnut straight grip buttstock and Schnabel forend rate very fine to excellent with much original varnish and the expected light dings and handling marks from the years, the buttstock with its nice checkered hard rubber "Savage Quality" trademark plate. The buttstock shows an old repaired chip at the right of upper tang, it is unobtrusive and very well-done, showing perhaps a bit of added finish; there is the very beginning of a light drying crack on the left stock flat. The forend does show a very neatly camouflaged repair to a crack in its right flat, likely having a bit of added finish at that time. Both barrels feature standard Savage sporting rear with silver bead front sights and each have British proofs at left rear in the area of the caliber marking and both are serial numbered to the receiver; the receiver ring with a British proof as well. Were a factory or letter to be ordered, factory records would indicate: "30/30, Barrel Type Round, Takedown, Featherweight. Second Barrel Set: 25/35. Date Accepted August 4, 1910; Date Shipped March 15, 1911; Sold to Carlton L. Wood". It is well-known that Carlton L. Wood was the assistant treasurer and later Director of Savage Arms Corp.
98	bubbling and crazing with some areas appearing brighter and the markings remain intact and legible with Remingtons Ilion address and patent dates on the left side frame, "P / FCW" on the right and anchor stamp at the rear of barrel. The smooth walnut grip and forend remain in good condition as lightly cleaned and refinished long ago with the edges now a little shy of the metal and showing scattered handling marks. The underside barrel beneath the forend and inside upper tang are both stamped "399" and the underside exterior of the barrel also shows a number "5453". The other numbered parts are a mix with the lower tang / triggerguard assembly "4352", grip "89" and forend "163". Equipped with proper Navy-style breechblock, the action seems to function well mechanically. A very interesting example for the advanced Remington or U.S. martial collector. (13B10320-27) {ANTIQUE} (2500/3000) Est. 2,500 - 3,000 Remington Model 1870 Navy Rolling Block Pistol serial #5598, 50 CF, 7" round barrel with a mostly bright very good bore showing some sparsely scattered fine pitting and oxidation with strong rifling throughout. The barrel of this pistol has mostly toned to a deep plum-brown patina showing some sparsely scattered pinprick pits and small dings. The barrel of the solen modified slightly during the period of use into a finer post. The action retains about 94% arsenal refurbished dull blue showing some areas flaking to mild gray patina and other light handling marks also retaining strong markings. The smooth walnut grip and forend remain in very good condition as lightly cleaned showing some scattered light dings and the tangs are a bit shy of the grip. The grip is stamp-numbered matching the frame and shows a faint remnant of an inspector stamp on the left side. The forend is un-numbered, missing its screw escutcheon and is not quite fitted perfectly and the remaining serialized parts are matching. The action		101	Savage Model 1899 Featherweight Two Barrel Set Rifle Shipped to Carlton L. The receiver retains about 95-97% bright original blue showing sharp edge and handling wear with some light drifting to plum, with a bit of pewter on the carry point of the belly. The trigger shows good pale fire blue with a spot of light surface oxidation on the frame just ahead of it showing a light steel wooling, the lever showing some nice case colors which are vibrant in the protected areas and left flat, a mottled smoky case-hardening on the radii. Both barrels retain 97-98% original blue, the takedown collar on the forearm with bright original blue flaking to plum, the 25-35 barrel with some very light loss at the muzzle. The smooth walnut straight grip buttstock and Schnabel forend rate very fine to excellent with much original varnish and the expected light dings and handling marks from the years, the buttstock with its nice checkered hard rubber "Savage Quality" trademark plate. The buttstock shows an old repaired chip at the right of upper tang, it is unobtrusive and very well-done, showing perhaps a bit of added finish; there is the very beginning of a light drying crack on the left stock flat. The forend does show a very neatly camouflaged repair to a crack in its right flat, likely having a bit of added finish at that time. Both barrels feature standard Savage sporting rear with silver bead front sights and each have British proofs at left rear in the area of the caliber marking and both are serial numbered to the receiver; the receiver ring with a British proof as well. Were a factory or letter to be ordered, factory records would indicate: "30/30, Barrel Type Round, Takedown, Featherweight. Second Barrel Set: 25/35. Date Accepted August 4, 1910; Date Shipped March 15, 1911; Sold to Carlton L. Wood". It is well-known that Carlton L. Wood was the assistant treasurer and later Director of Savage Arms Corp.
98	bubbling and crazing with some areas appearing brighter and the markings remain intact and legible with Remingtons Ilion address and patent dates on the left side frame, "P / FCW" on the right and anchor stamp at the rear of barrel. The smooth walnut grip and forend remain in good condition as lightly cleaned and refinished long ago with the edges now a little shy of the metal and showing scattered handling marks. The underside barrel beneath the forend and inside upper tang are both stamped "399" and the underside exterior of the barrel also shows a number "5453". The other numbered parts are a mix with the lower tang / triggerguard assembly "4352", grip "89" and forend "163". Equipped with proper Navy-style breechblock, the action seems to function well mechanically. A very interesting example for the advanced Remington or U.S. martial collector. (13B10320-27) {ANTIQUE} (2500/3000) Est. 2,500 - 3,000 Remington Model 1870 Navy Rolling Block Pistol serial #5598, 50 CF, 7" round barrel with a mostly bright very good bore showing some sparsely scattered fine pitting and oxidation with strong rifling throughout. The barrel of this pistol has mostly tored to a deep plum-brown patina showing some sparsely scattered pinprick pits and small dings. The barrel retains strong markings with "I / H E / (Anchor)" at the rear and the front sight has been modified slightly during the period of use into a finer post. The action retains about 94% arsenal refurbished dull blue showing some areas flaking to mild gray patina and other light handling marks also retaining strong markings. The smooth walnut grip and forend remain in very good condition as lightly cleaned showing some scattered light dings and the tangs are a bit shy of the grip. The grip is stamp-numbered matching the frame and shows a faint remnant of an inspector stamp on the left side. The forend is un-numbered, missing its screw escutcheon and is not quite fitted perfectly and the remaining serialized parts are matching. The action seems to function well mechanic		101	Savage Model 1899 Featherweight Two Barrel Set Rifle Shipped to Carlton L. Wood, Director of Savage Arms Corp. serial #110132, 30-30 Win & 25-35 Win, 20" barrels both with bright excellent bores. The receiver retains about 95-97% bright original blue showing sharp edge and handling wear with some light drifting to plum, with a bit of pewter on the carry point of the belly. The trigger shows good pale fire blue with a spot of light surface oxidation on the frame just ahead of it showing a light steel wooling, the lever showing some nice case colors which are vibrant in the protected areas and left flat, a mottled smoky case-hardening on the radii. 102	Savage Model 99-G Deluxe Takedown Lever Action Rifle		105	Excellent Remington No. 2 Rolling Block Sporting Rifle
-	5			
	serial #324420, 30-30 Win, 22" barrel with some scattered pinprick			serial #38925 / 39188, 38-40, 28 1/2" octagon barrel with a bright
	pitting in an otherwise bright excellent bore. The metal surfaces retain			excellent bore. This is a lovely rifle in a very desirable centerfire
	about 96-97% original blue with some very light wear on high edges,			chambering and also equipped with special order sights. The barrel
	thinning on the grasping area and forend iron, some shallow light pitting			retains about 98% original blue that shows some subtle thinning under
	on the left side of the forend iron, scattered light handling marks on			bright light, a few light freckles and sharp edge wear. The barrel blue is
	barrel, and light toning to plum under direct light. The lever retains 99%			taking on a lovely rich plum-brown patina under bright light as-is
	vibrant casehardened color with slight silvering on the edges and flaking			commonly seen on these rifles. The barrel shows crisp Remington Arms
	clear protective lacquer, and the bolt remains mostly bright with			Co. address and proper "38 W" cartridge designation. The action and
	scattered gray freckling. The checkered capped pistolgrip walnut stock			buttplate retain a similar amount of wonderful vibrant case-hardened
	and forend are in near excellent condition with a spot of finish flaking on			colors showing some scattered mild muting to pleasant silvery gray
	the left side of the butt, a tiny spot of synthetic filler repair at the rear			case-hardened patina and the sides of the action exhibiting some thin
	edge of the forend, and a few minor handling marks; the forend is			striations. The hammer and breechblock retain about 99% original bright
	numbered to the rifle internally and features a schnabel forend, and the			blue and the other small parts show fine fire blue and straw finishes. The
	-			
	serrated steel buttplate shows light wear at the heel and is crisply			smooth walnut buttstock and schnabel forend with ebony tip insert
	marked with the circled "SVG" logo. The factory markings on the			remain in excellent condition retaining almost all of their original varnish
	receiver and barrel remain crisp, and the underside of the barrel is			showing one tiny thin drying crack behind the lower tang and some other
	marked with the last three digits of the serial number. The rifle is sighted			very minor handling marks from the years. Strangely, the lower tang is
	with a ramped bead-on-blade front sight and a Lyman 57SA aperture			serial-numbered "38925", the tangs also showing mismatched assembly
	rear sight, without aperture disc and mounted to the upper tang, the rear			numbers, while the barrel and stocks are all numbered "39188", one
	sight dovetail filled with a Marble's blank. The rifle appears to function			wonders if it was perhaps a factory error as everything fits together
	well mechanically. An attractive 1929-manufactured Savage Model 99.			nicely. The rifle is sighted with a Marbles flip-up white diamond rear
	(14A10483-18) {C&R} [Perry White Collection] (1000/1500)			sight, combination front sight with ivory bead and wide square post and

123	Sharps New Model 1859 Percussion Rifle with Saber Bayonet	1	125	Handsome Dennis Kies Engraved Colt Single Action Army Revolver
	serial #39720 (bayonet #40302), .52 cal, 30" barrel with a bright near	1		serial #S14189A, 45 Colt, 4 3/4" barrel with an unfired bore. This is a
	excellent bore showing some sparsely scattered minor freckling and	1		masterfully-executed revolver with some stunning engraving and an
	crisp rifling. The barrel of this attractive rifle has mostly toned to a	1		endearing subject matter. The revolver is fully engraved D plus coverage
	pleasant mild gray-brown patina with pewter-gunmetal along the wood	1		by retired Colt master engraver Dennis Kies, indeed the only portions
	line showing some sparsely scattered spots of old mild oxidation	1		un-engraved are the flutes of the cylinder and very edges of the
	staining. The barrel bands and nosecap are a deeper plum-brown tone	1		topstrap. It retains all of its beautiful post-engraving silver plate and is
	and the barrel retains very fine markings with nice Sharps Hartford	1		absolutely unturned, unfired since leaving Mr. Kies hands. There is the
	address, model designation and Lawrence patent on the rear sight. The	1		finest quality Kornbrath-style intertwining open flowing foliate scroll with
	action and lockplate show generous attractive silvery case-hardened	1		painstaking fine background punch-dot stippling setting off the amazing
	patina throughout, mixing with mild gray-brown and mild speckling, the	1		scroll wonderfully. In addition to this full coverage scroll we see on the
	top of breechblock with some old minor pitting. The pellet primer cover	1		left of the frame a Native American Indian peering over the top of a
	retains a hint of subtle fire blue and the patent markings along the action	1		grassy knoll, eagle feathers in his hair, above which on the left recoil
	are intact and strong. The smooth walnut buttstock with iron patchbox	1		shield is a head and shoulders depiction of a grizzly or brown bear. On
	and the full-length forend remain in about very fine condition showing	1		the right of the frame we have a stone tomahawk and a sheathed knife,
	somewhat worn edges and finish with the expected scattered light dings	1		showing beaded decoration and quill work, with an American bison
	and a thin 1" chip and minor splinter along the bottom edge of the	1		above on the loading gate. The frontstrap has fine diamond-pattern
	patchbox cover that is unobtrusive. There is a nice antique 8-pointed	1		engraving with a small dot at the center of each and the heads of the
	German silver plate affixed to the left side butt that remains unengraved.	1		frame screws are engraved on both sides and they, the balance of the
	The proper saber lug is intact along with the original sights and all parts	1		other screws, the base pin, ejector rod head and base pin catch show
	of the pellet primer system, and the patchbox contains a spare nipple	1		exceptional bright niter blue that Kies is known for. The arm wears a
	and two spare pellet primer feed springs. The breechblock operates	1		flawlessly fitted set of two piece ivory Dan Chesiak grips, the left
	smartly and the lock is crisp and seems to function well mechanically.	1		escutcheon blind, with 1930s-style recessed silver Rampant Colt
	The included original saber bayonet by Ames is dated 1861 and remains	1		medallions. Included with the gun is a blue Colt Custom Shop box
	in fine condition measuring 26 3/8" overall with a 21 5/8" blade. The	1		without outer shipping sleeve and Mr. Kies has signed the engraving on
	blade is mostly a mix of pewter gunmetal and dark gray showing	1		the radius of the frame ahead of the serial number flat. As we would
	evidence of a very old light cleaning with light pitting its full-length and	1		expect of Mr. Kies, this is a superb revolver with some of the finest
	the markings are rather soft but mostly legible. The 17-groove brass hilt	1		engraving we have seen, which will continue to improve in value as the
	is a pleasant ocher patina showing scattered light dings, some perhaps	1		years pass, it will be all the more stunning as the silver mellows with the
	a bit more moderate along the edges. The catch spring retainer screw	1		years. (3E10486-1) {MODERN} (5000/7000)
	head is broken but this is relatively minor and the top flat retains nice	1		Est. 5,000 - 7,000
	stamped serial number marking "40302". The bayonet fits the rifle very	1	126	Belgian Cowboy Ranger Colt 1873-Style Double Action Revolver Used
	well. A very attractive ensemble that would make an excellent addition to	1		in Three Important Western Motion Pictures Including "Shane"
	any U.S. martial collection. (13C10338-4) {ANTIQUE} (4000/5000)	1		serial #S225, 38 Long Colt / 38 Special, 5 1/2" barrel with an about very
	Est. 4,000 - 5,000	1		good bore showing scattered light oxidation and otherwise strong rifling
124	Interesting U.S. Navy Springfield Model 1870 Rolling Block Rifle with	1		throughout. This is a fine documented movie gun previously owned by
	1870 Army Experimental Features	1		Stembridge Studios and used in the films "The Plainsman" (1936),
	50 CF, 36" three-groove barrel with a bright excellent bore. The barrel	1		"Union Pacific" (1939) and perhaps most famously "Shane" (1952) in
	and bands of this rifle remain in-the-white rating very fine with some	1		which Van Heflin is seen with the revolver before his fight seen with Alan
	scattered small areas of mild freckling and some very minor gray-brown	1		Ladd. The revolver first appeared in "The Plainsman" starring Gary
	patina. The barrel is completely unmarked while the bands show the	1		Cooper as Wild Bill Hickok and Jean Arthur as Calamity Jane, indeed
	familiar "U" stamps and the navy-style rear sight assembly retains all of	1		the original "CALAMITY" moniker remains carved along the right grip
	its original blackening. The action shows strong vibrant case-hardened	1		panel. In "Union Pacific" the revolver is used by Anthony Quinn,
	colors throughout with some areas of dark plum-brown patina along the	1		portraying the villain Jack Cordray, a number of stills from this movie are
	tangs under what appears to be an old hardened brown preservative,	1		included portraying the revolver. Rather typical of Hollywood films, the
	the small action parts and US-marked buttplate similarly coated. The	1		revolver is rather anachronistic with its double action mechanism and
	right side retains a crisp "(Eagle) / USN / SPRINGFIELD / 1870", the left	1		peculiar Belgian features (namely the hammer block safety button), and
	side is unmarked and the tang shows Remington patent information.	1		it is totally out of place in "Union Pacific" which is set in 1860's! The

The barrel retains about 75-80% original blue which has an overall streaky appearance and fades to a plum-brown patina toward the muzzle with some tiny dings around the muzzle and scattered fine spots of light oxidation staining and pinprick pitting throughout. The 1881-dated breechblock retains a strong case-hardened finish with some brown speckling and nice colors throughout which are particularly vibrant on the underside. The balance of metal surfaces retain about 75-80% original blue which is thinning to a blue-gray patina in areas on the lockplate, along with areas of light oxidation and light pitting toning to a brown patina on the triggerguard and buttplate. The "U.S." marking on the lockplate is partially softened and all markings are otherwise clear and correct with a "2" stamped in the upper right edge denoting the two-position tumbler. The walnut stock rates very good plus as lightly cleaned with an added finish, a couple smoothed-over dings on the left side of the action and some expected			a U.S. Navy-marked slide, retaining the early rounded rear sight and thin blade front, and a frame which has numerous Marine Corps-shipped pistols in the serial numbers surrounding it, and also falls within a serial number batch of 500 which went to the U.S. Navy, Brooklyn Navy Yard. Overall the gun retains perhaps 90% later blued finish, the slide showing muzzle wear and some light flaking to plum, the Rampant Colt at rear slightly light but still present. The frame shows some light impact marks here and there as well as some tool marks from the polishing, the straps now toning to gray. The diamond checkered walnut grips rate very good, the right grip worn fairly smooth, the left a bit smooth but with more prominent diamonds. Included with the gun is a very nice two-tone lanyard loop magazine. 1918 produced, the Eagle head inspectors mark on left of frame remains, and the arm remains a likely very usable, very respectable example piece for the Colt collector wishing a "representative" Navy Model without breaking the pocketbook. (3A10326-10) {C&R} (2000/3000)
141	is strong and crisp and appears to function well mechanically. While many of these sporting rifle saw heavy use afield, this example has been very well cared for and remains in wonderful condition. (23C10483-244) (ANTIQUE) [Perry White Collection] (3500/5000) Est. 3,500 - 5,000 Scarce U.S. Model 1881 Trapdoor Forager by Springfield Armory serial #1275, 20 ga., 26" barrel with a bright fine bore showing some areas of light pitting. Lot Title/Description

150 Fine and Interesting Winchester Model 1876 Express Rifle serial #23384, 50-95, 26" octagon barrel with full magazine and a mostly bright very good bore showing scattered areas of light pitting and otherwise strong rifling. This is a very handsome and interesting second model rifle which made numerous trips back and forth from the factory, originally being an open top, having a screw-on dust cover and rail factory installed, finally ending in its current configuration. According to the included factory letter, the rifle originally shipped in August 1882 as a round barrel express short rifle with checkered stocks and half magazine. It was then returned two months later in October for the addition of factory sling swivel eyes and changing the barrel to octagon configuration, then being returned again just three days later, to once again change the barrel out to round (perhaps the initial barrel change was a factory mistake or perhaps a persnickety special-order customer that cannot make up their mind, or was this some kind of a sales or demonstrator rifle that management had plans for). Finally the rifle was returned one last time in November 1884 and changed yet again to what is listed as "Rifle, Express, Octagon Barrel, Plain Trigger", presumably indicating its current configuration. It then stayed in the warehouse for two years until it shipped out in December 1886, likely resold. The barrel and magazine retain about 95% factory-guality older refurbished rust blue with most of the loss due to some discolored gray-brown speckling scattered along the length of the barrel, mostly noticeable under bright light, a couple small dings and some thinning to gray along the magazine. The receiver and plates retain about 96-97% lovely bright factory-quality bluing, likely before the 1886 resale, showing some sparse gray-brown speckling and light flaking along the tangs with the typical Winchesters striation seen beneath, starting to appear as they do over the years; the loading gate with lovely brilliant fire blue. The hammer, lever and crescent buttplate all show lovely vibrant case-hardened colors, the lever with some muting to smoky gray with perhaps a small fleck of oxidation here or there. The cartridge lifter is a mild ocher patina and retains strong cartridge markings and all other markings remain intact and strong including the two-line express markings on the dust cover. The inside lower tang shows "S385" stamped on the left side. The smooth walnut buttstock and forend remain in very good plus condition showing an old oil finish with some scattered light dings and handling marks, the forend with a more moderate 1 1/4" rectangular abrasion along the right edge behind the nosecap and a faded stamp at the heel "J137". Buttstock fit is a hair shy around the tangs and the wood is quite proud overall in both butt and forend and may be antique replacements but certainly from the period of use, these sling eyes seem to be slightly different than normal factory configuration. The rifle is sighted with standard sporting rear sight, small German silver blade front sight, and the action seems to function well mechanically. A very attractive Second Model Express Rifle with an interesting history. (13E10326-9) {ANTIQUE} (10,000/15,000) Est. 10,000 - 15,000 Colt New Service Double Action Revolver serial #114275, 455 Webley, 4 1/2" barrel with a bright excellent bore. The metal surfaces of this 1916-made commercial revolver retain about 92% original blue showing some overall high edge wear, areas of mild flaking toning to gray-brown and a few small areas of minor pinprick pitting on the left side barrel and right side frame. All markings remain intact and strong and the sides of the hammer remain partially bright showing a little gray speckling. The black checkered hard rubber grips remain in very fine to near excellent condition showing a tiny flake at the heel of the left panel and some other scattered minor dings. The scratched numbers on the insides are very faint but do match the frame, as does the crane, and the action seems to function well mechanically with solid timing and lock-up. The lanvard ring is intact and the chambers are unmolested and remain in their original 455 configuration. An attractive revolver in an interesting configuration. (13B10330-9) {C&R} (1000/1500) Est. 1,000 - 1,500 British Contract Colt New Service Double Action Revolver serial #90785, 455 Webley, 5 1/2" barrel with a bright excellent bore. The metal surfaces of this 1915-made revolver retain about 94% original blue with most of the loss due to some scattered light handling marks, a few tiny dings and some thinning to mild gray-brown patina along the gripstraps and triggerguard. The sides of the hammer remain mostly bright and the ejector rod head and lanyard retain generous case-hardened colors. All markings remain intact and crisp showing proper British military inspection and proof marks on the various components. The black checkered hard rubber grips remain in very fine to near excellent condition showing a few scattered tiny dings and minor handling marks. The left panel is scratch-numbered to a different gun and the right is matching the frame. The action seems to function well mechanically with solid timing and lock-up. A very nice example for the martial collector that has seen only light use. (13B10330-8) {C&R} (1000/1500) Est. 1,000 - 1,500

153	Webley W.S. Army Model Double Action Revolver
	serial #135078, 455 Webley, 4" barrel with a bright excellent bore. The
	barrel and frame of this commercial revolver have mostly toned to a dark plum-brown patina with areas showing a mottled gray-blue tone and
	showing some scattered old oxidation staining and some light handing
	marks. There appears to be an old coating of some hardened
	preservative and the cylinder retains perhaps 40% original blue with the
	balance toned similar to the frame. All markings remain intact and quite
	crisp showing Birmingham nitro-proofs, "450/455" designation on the left
	barrel and Webley flying bullet logo on the frame. The checkered walnut
	grips remain in very good plus condition having darkened somewhat
	from the years and showing slightly worn checkering and scattered light dings. Both panels are stamp-numbered "708", likely a factory error as
	their fit is excellent. Strangely the cylinder is numbered four digits off
	"074" but remains unmolested in its original 455 chambering. The barrel
	is matching the frame, barrel-to-frame fit is solid and the action seems to
	function well mechanically with solid timing and lock-up. The extractor
	does not snap down when the action is opened slowly but seems to
	function normally when opened with purpose. A solid example of these
	desirable British revolvers. (13B10330-11) {C&R} (1000/1500)
154	Est. 1,000 - 1,500 Webley Mark V Double Action Revolver
104	serial #148968, 455 Webley, 4" barrel with a bright near excellent bore
	showing crisp rifling throughout. The metal surfaces of this 1915-dated
	revolver have mostly toned to a mild gray-brown patina showing a little
	bit of old mild oxidation staining and some good remnants of original
	blue in the more protected areas. Some of the small parts show
	remnants of their original black enamel finish and all markings remain
	intact and strong. The face of the recoil shield has been lightly dressed but not in an attempt to alter the chambering and it is otherwise
	relatively unobtrusive. The black checkered horn grips remain in very
	fine condition, the left near excellent, with the right panel just showing a
	few thin drying cracks along the base. All of the serialized parts are
	matching and the cylinder is unmolested and remains in its original 455
	chambering. Barrel-to-frame fit is solid and the action seems to function
	well mechanically with solid timing and lock-up. A fine Mark V in its
	desirable original configuration. (13B10330-12) {C&R} (1000/1500) Est. 1,000 - 1,500
155	Excellent Factory Engraved Denise Thirion Colt Single Action Army
	Revolver
	serial #SA96366, 45 Colt, 4 3/4" barrel with an unfired bore. This
	beautiful revolver left Colt as a nickel gun with factory stag grips in
	September 1992, shipping to RSR Wholesale in Texas in a 2 gun
	shipment. It was returned by Virginia Arms and Supplies in September 1996 for factory expert class C engraving, by Denise Thirion and
	subsequent nickel finishing. The factory expert class C scroll is stunning
	and as-expected, flawlessly executed, with wonderful fine background
	punch-dot shading. The barrel features nice checkerboard adornment
	within the scroll on both sides of the barrel address with a running wavy $% \label{eq:constraint}$
	pattern along the edge of the ejector rod housing. The loading gate and
	left side recoil shield have the same diamond-shaped checker-boarding
	with a nice draped scallop motif on right of frame above the triggerguard. All of the original post-engraving nickel is present and
	brilliant and the gun appears absolutely un-turned since leaving Colt.
	The factory genuine stag grips are in place and rate excellent to as-new.
	The included factory letter verifies the original shipment and current
	metal treatment and engraving by Thirion and the arm comes in blue
	Colt Custom Shop box with outer sleeve, the end label numbered to the
	gun, verifying stag stocks and class-C engraving by Thirion. Very often
	we find guns that have left the factory engraved, this example all the
	more interesting in that it was returned by an FFL (no doubt the dealer who purchased it from RSR), for factory engraving and re-shipped, very
	seldom-encountered with these handsome factory stag grips.

	barrel retains perhaps 60% original blue, the primary loss being along			
	the left side from muzzle into the roll marking with a small spot of bluing			
	removed to the rear of the front sight, the ejector rod housing primarily			
	pewter along its outer edge. The cylinder is a mix of fading original blue			
	and pewter gunmetal with some minor rotational marks. The frame			
	shows some smoky silvery case colors with remnants of color in the			
	pinched area of the frame, with some sparse oxidation staining and a			
	couple sparsely scattered light pinprick pits. The hammer retains some			
	very nice color case-hardening with strong blue in the protected area at			
	the knuckle of backstrap and around the root of the triggerguard. The			

checkered hard rubber Rampant Colt grips rate very good and fine, the right grip showing more wear and smoothed points, the left more crisp, neither is marked however they both fit very well and have been in place a very long time. The gun seems to time well and lock up properly and its backstrap has a rather folky scratch-engraving "Clint Kid Texas", no doubt from the period of use. The included factory letter shows shipment in an 8 gun order to Simmons Hardware Co. of St. Louis in May 1907 in this configuration. While no "Clint Kid" can be located, one would surmise he is perhaps from Clint, Texas, no doubt with a very short career. A fine Frontier Six Shooter that has a great bore and would likely be enjoyable at the range while increasing yearly in value. (3B10206-27)

Title/Description

Important General Officers Pistol and Sword Grouping Belonging to Major General and Legendary Firearms Icon John Bianchi This important grouping consists of John Bianchi's personal Beretta M92F Compact pistol, U.S. Model 1902 Officers Sword, General Officers belt, holster, ammunition pouch rig, and regulation U.S. helmet with two stars, all used and worn by Bianchi while in the service of this country. The world knows John Bianchi as the iconic holster maker and truly a pioneer in the modern gun holster business, being responsible himself for over 200 patents, trademarks and copyrights in his 55 plus years in the gun business. Few however realize he was also in the service of his country for a cumulative 48 years. Beginning his military service with the 40th Infantry Division, California National Guard, in 1953 as an enlisted man at just age 15 (Bianchi persuaded his father to alter his birth certificate so he could appear to be 17 years old), serving in both the guard and active duty military, working his way up through the ranks and retiring for the first time in 1997 as a Major General. He would be called-back post-retirement for a tour of duty from 2001 to 2004, being recalled right after 9/11 by Maj. Gen. Dennis M. Keneally to take command of the California State Military Reserve, Keneally saying in his own words: "Mai, Gen, Bianchi contributed immeasurably to the success of our mobilization and deployment of troops to Afghanistan and Iraq". Indeed it was back in 1981 that the DoD decided to replace the venerable 1911 pistol and, in addition to needing a new gun, decided they needed a completely new carry system for whatever pistol they chose. What we today know as the UM84, or officially the M12 holster system, was completely the brainchild of Mr. Bianchi from design, to materials, to closure and suspension systems, and Bianchi International would produce some 70.000 M12 holsters in their initial run. This grouping of personal military equipment begins with his pistol. Beretta 92F Compact semi-auto pistol serial #D34825Z, 9 mm, 4 1/4" barrel with a bright excellent chrome-lined bore. The pistol remains in remarkable condition for a carried arm, retaining all of its original factory enameled and anodized finishes, showing a couple of very light spots of edge wear from holster carry and a small handful of very superficial handling marks which do not breech the blue nor anodized finishes. The checkered walnut Beretta medallion grips rate excellent to as-new. One original 13 round Beretta 92 Compact magazine is included rating excellent and one full-size Beretta 92/M9 15-round magazine is included, also rating excellent. The pistol rides in its original blue synthetic factory case with silver cardboard outer shipping sleeve, serial numbered to the gun, with full complement of Beretta factory paperwork including manual and warranty cards. A nice included bonus are three spare pairs of Beretta grips. One is a regulation pair of General Officers grips for the Model 92/M9 with the Seal of the United States right and "John E Bianchi" in the brass general officers-style plaque inletted into the left, engraved when he was a Brigadier General. The second pair of walnut grips have an un-engraved brass monogram plate on the left grip, the right featuring the trademark of Bianchi Gun Leather International, neatly inletted into it. The last pair of grips are a set of hard rubber checkered Beretta logo grips for the 92 Compact pistol rating excellent and showing some light wear. The U.S. Model 1902 Officers Sword by WKC is a beautiful example and is as-new with its original scabbard with presentation to the Major General at his retirement. The 30" blade remains as brilliant as the day it left Germany and features the proof star at the obverse ricasso with etched flowing scroll and U.S. Army decoration on the obverse, open scroll, panoplies of arms and "U.S." on the reverse, with the WKC Knights head trademark at the ricasso; the rear spine of the blade neatly etched with light embellishment as well. The triple branch hilt remains brilliant and the black synthetic finger grip rates excellent. The scabbard as well is as-new and is engraved "MG John Bianchi/(scroll flourish)/From the Grateful Men & Women of the SMR/"Commit the Reserve!" ". The sword still has the WKC makers hangtag attached and comes with a regulation leather and nickel plated suspension frog and hanger as well as the flannel WKC over sleeve. Major General Bianchi's M1902 General Officers belt with 24 karat gold plated buckle, M12 holster and ammunition carrier is included as well. It rates excellent and remains supple and flexible, the magazine carrier with one Beretta 13 round model 92F compact magazine and one full-size Beretta 15 round M92/M9 magazine within. The regulation U.S. Army steel helmet with two Major General stars applied above its brow, is complete with synthetic U.S.-marked helmet liner. The helmet retains nearly all its original textured OD Green paint showing only minor scuffs or abrasions here and there, primarily along the folded edge seam. It is size marked "58" and neatly permanent ink penned at the rear nape is "Bianchi", small Velcro adapters fitted inside to provide a tighter friction fit. The interior leather webbing remains in excellent condition with the leather sweatband showing some very minor staining but remaining supple and uncracked, the nape support at the very rear of the helmet shows an additional pebbled leather bolster, no doubt for comfort, no doubt by the holster maker himself, always the innovator and customizer. The web chinstrap is intact and remains in excellent condition and there is a reversible regulation camouflage helmet cover

Title/Description Lot

included with both woodland and sand patterns. The final item in this desirable lot is a nice First Day Cover envelope with four pieces of postage, commemorating the 30th anniversary of the General Patton Memorial Museum, given to Mr. Bianchi when he was asked to speak there. The face of the cover mentions five particular Generals, all of the Coachella Valley, being honored, John Bianchi among them. The postage on the face includes vintage 6 cent Genl. Douglas MacArthur stamp; 4 cent U.S. flag stamp; 3 cent Genl. George Patton stamp, and a contemporary 37 cent Korean War Veterans Memorial stamp. The envelope itself is a bit wrinkled as it was within the helmet liner, but pressing would certainly shape it up in short order. It is no secret that John Bianchi has always had a love for all things old West and many do not know that he made his first holster on the kitchen table at age 12, emulating the cowboy holsters he had seen in the movies. From those humble beginnings he made holsters for fellow officers during his service with the Monrovia Police Department, eventually starting a full-time holster-making business that would become the venerable Bianchi International, Mr. Bianchi would sell his company in 1988. Serving his country for the better part of a lifetime, becoming a peace officer, starting the largest and most successful holster company in the world, founding the Bianchi cup, holding numerous patents and trademarks, authoring numerous books, starting his own museum, which would become the foundation for the Autry Museum of the West in LA. John Bianchi is not a man to rest on his laurels. Always true to his roots. Mr. Bianchi would return to his love of holster making, we are happy to report, hand making bespoke holster rigs one-at-a-time in his Rancho Mirage shop, "Frontier Gunleather". A very rare opportunity to own some very personal equipment from this talented and modest icon in the American firearms industry, the venerable John Bianchi. 179	New York Heavy Bench Rest Percussion Target Rifle by G.H. Ferriss			Est. 1,200 - 1,800
	.56 cal, 38" Remington octagon barrel drilled for a false muzzle			
	measuring just under 1 1/2" at the muzzle and 1 5/8" at the breech with			
	8-groove rifling and a partially bright good bore showing scattered			
	patches of moderate oxidation and otherwise strong rifling throughout.			
	The barrel has mostly toned to a mix of mild plum-brown and gray patina			
	showing light handling marks and some old minor oxidation staining with			
	nice reeded edge at the muzzle and cleanout hole at the breech. The			
	barrel retains good maker marking with Utica address along with			
	"REMINGTON" stamp near the breech. The top flat shows three drilled			
	and tapped holes ahead of the breech and another pair of holes at 9"			
	and 9 1/2" ahead of the breech, two holes also present along the bottom			
	flat behind the muzzle. The back action lockplate is unadorned and the			
	fancy triggerguard and crescent buttplate with toe plate show some			
	remnants of silvery case-hardened patina mixed with plum-brown. There			
	is another small drilled and tapped hole at the upper tang and one larger			
	hole for mounting a tang sight. The smooth walnut stock remains in			
	about very good condition showing a very thin 2" crack left of the upper			
	tang, a few streaks of mild discoloration along the left butt and some thin			
	slivers and cracks against the lockplate. The rifle is currently sighted			
	only with a target globe fine post front sight and the lock remains			
	functional. A respectable example from the well-regarded George			
	Ferriss of Utica. (13A9670-72) {ANTIQUE} [David & Lore Squier

	dings and mild freckling. The bolster cleanout screw shows moderate damage and the bolster and lockplate show remnants of silvery case-hardened patina mixing with brown. The upper tang and protected areas of the fancy spur triggerguard show some good wisps of colors, the crescent buttplate and pendulum patchbox also with remnants of silver case-hardening. The smooth walnut buttstock with pewter nosecap remains in very good plus condition retaining about 90% original varnish showing a few thin slivers and cracks along the edges near the breech, and scattered light handling marks. The stock shows some attractive subtle tiger stripe grain figure along the sides of the butt and the rifle is sighted with lollipop tang sight, semi-buckhorn rear sporting sight missing its elevator and target globe with medium post front sight. A simple older replacement ramrod is present and the lock with single set trigger seems to function well mechanically. A very respectable example from this prolific maker. (13A9670-121)		serial #1962, 45-70, 26" part round part octagon barrel with a bright excellent bore. This special order rifle has a beautiful checkered pistolgrip stock of highly figured walnut with horn Schnabel tip and pistolgrip insert. The condition of the rifle is wonderful with the metal surfaces retaining 95% original blue finish with loss due to just a little even light thinning. The stock rates very good plus to excellent with 95% original finish remaining and with just a little light wear to the checkering The stock shows the ever-so-common crack from right rear of tang to magazine cutoff and then disappearing into the grain ahead of the cutoff. The bolt shows a light gray patina, a bit darker on the handle and smooth all over. The triggerguard shows about 85% original blue. The toeline of the stock bears a silver oval monogram plate which is engraved with the initials "JBM". The smooth steel shotgun butplate is mostly a brown patina overall with some patches of light oxidation along

207 Very Rare Documented Winchester Model 70 Van Orden Sniper Rifle 210 Unmarked Browning Model 1919A4 Semi-Auto Rifle With Tripod serial #254514, 30-06, 24" varmint weight barrel with a fine bore with serial #82752, 7.62mm NATO, 24" barrel dated "2-61" with an excellent light frosting in the grooves and some sparsely scattered very light bore. This is an excellent quality 1919A4 built on an Israeli 7.62mm pinprick pitting. The barreled action retains about 98% original blue parts kit and using facsimile Browning semi-auto only sideplates which seem to be marked identically to Ohio Rapid Fire plates we have found. showing some very light sharp edge wear. The bottom metal is similar showing perhaps a slight bit more wear, the floorplate with three drilled The metal surfaces retain about 90% original and arsenal gray parkerized finish that has the usual wear around the bearing and and tapped holes for a no-longer-present palm rest. The bolt body working surfaces. The markings remain visible, the right sideplate is remains bright with only very light operational wear with excellent blue on the extractor and shroud, the bolt knob toning slightly to pewter; it is marked "BROWNING MACHINE GUN / U.S. CAL. 30 M1919A4 / MAN'FD SAGINAW STEERING GEAR DIV / GENERAL MOTORS electric pencil numbered to the gun. The smooth walnut pistolgrip stock rates excellent with a handful of very light handling marks sparsely CORPORATION". The parts are mixed with some having U.S. ordnance scattered about its surface. The original sling swivels are intact and the bombs and most having the Israeli 7.62 markings. Features include the length of pull to the Stoeger Arms rifle pad is 13 1/4". The famous Van perforated jacket barrel shroud, adjustable rear sight, wood gripped Orden sniper rifles were the brainchild of Marine Captain George Van carry handle, and the spade style grip assembly with black composite Orden and Chief Gunnery Sergeant Calvin Lloyd, or more aptly, the grips. This exceptional belt-fed, crew-served weapon is mounted to a combination of rifle and telescopic sight that the two men deemed to be WWII vintage U.S. GI issue mount tripod dated "1942" that has the pintle the most suitable combination for use by United States Marine Corps and T&E for the 1919 rifle. The tripod's finish is a faded OD green-tan snipers, being specifically the Winchester Model 70 mounted with an enamel paint that has some moderate flaking and some areas of light Unertl 8X target scope. Due to wartime constraints, the adoption of the surface oxidation. Included are operation manuals and two cloth belts combination was never made and the 1903 rifle served in its role for loading and firing. This is an impressive and highly desirable semi-auto version of Browning's faithful U.S. machine gun that has been throughout the Second World War and Korea. Post-war however Col. Van Orden would open his own gun shop, Evaluators Limited, in in service in many nations across the globe for over 100 years. We can Triangle Virginia, just outside of Quantico, where he specialized in find O.R.F sideplates marked as this example, and others which are unmarked, the markings on this example appear pantographed. There furnishing quality equipment, not only to the general public, but more specifically to police and military personnel. He built a number of these are currently not many opportunities to obtain one of these civilian legal special rifles dubbed "Van Orden Snipers" to his own exacting 1919's, this one has the added benefit of being chambered in the more specifications as recommended at the beginning of the Second World economical 7.62 NATO. (4B10518-17) {MODERN} (4000/6000) War. While never officially adopted by Army or Marine Corps, it was a Est. 4.000 - 6.000 211 U.S. M-40 Sniper Rifle with Vietnam Connection Published in Death Van Orden sniper used by Marine Col. Walter Walsh to win the 1952 National Rifle Matches at Camp Perry and the U.S. Army in fact From Afar III purchased many of the Van Orden rifles for use by their shooting teams. serial #224361, 308 Win (7.62 NATO) 24" varmint weight barrel, This example is fitted with a Lyman Super Targetspot 15X telescopic date-coded September 1966, with a bright about excellent bore which sight with adjustable objective with crosshair reticle and bright excellent shows a few spots of very light, very sparsely scattered light oxidation or optics. The scope itself rates very good with much original blue but perhaps a light pit or two. The barreled action retains about 97% original showing remnants of light surface oxidation which has left some pinprick phosphate finish with a few minor handling marks and some scattered pitting in the area of the Lyman factory marking. Van Orden kept fairly spots of oxidation staining here and there. The hinged floorplate bottom detailed shipping records and this example shipped to a Mr. John W metal is similar with light edge wear and a few scuffs here and there. Bennett of Hempstead, Long Island, New York in January 1954, listed The underside of the blued-body bolt is correctly electric pencil by serial number in the book Death From Afar. There is a nice Lyman numbered to the gun. The smooth American walnut Monte Carlo stock rates fine with its original military oil finish and the expected minor dings No. 77 front sight on the target block at the muzzle and the rear of the receiver wears a Lyman 48 WH target sight with single aperture; a and handling marks that come from a field-used gun, more prominent in quality 1 1/4" military rifle sling is included as well, the sling a bit dry with the area of the forearm where one would naturally rest the arm while it is some crackling through a few of the rows of dual holes. Very rarely do being fired. The original checkered metal Remington buttplate is in place these rifles come up for sale, this is a documented example that likely and the butt shows some dark brown-russet staining, primarily at right, shoots much better than it looks, and it looks very nearly as-new. A which is purported to be blood staining. The arm has a correct Redfield handsome and sought-after Van Orden sniper. (3C10473-3) {C&R} one-piece base affixed which is electric pencil numbered to the receiver (6000/8000) and a Redfield 3X-9X O.D. green-anodized telescopic sight, with the Est. 6,000 - 8,000 Accu-range range-finding stadia reticle, is mounted, rating about Les Baer Custom Ultimate AR 223 M4 Civilian Semi-Auto Rifle 208 excellent with bright optics. A U.S. military Garand-style 1 1/4" green serial #LBR005311, 223 Rem, 18" LBC bench rest 416 stainless steel, web sling is attached and has black electrical tape holding the rear Dupont S coated heavy barrel with a 1:8" rate of twist and a like new, quick-detach swivel in place, so it does not detach when in use afield. unfired bore. This top-of-the-line AR platform factory custom rifle is in The receiver shows the appropriate "U.S." marking above the serial new-in-the-box condition. Features include machined LBC upper and number, the trigger has interestingly been modified, no doubt by some lower receivers with the Dupont S coating finish, LBC chromed bolt and Marine armorer, in that it has been curved more acutely to affect a better extractor, LBC chromed carrier, Geissele two-stage trigger, LBC a and more comfortable finger position, possibly to accommodate a smaller-statured operator. The factory Remington 700 trigger is the picatinny top rail and four-way rail free-float handquard with lock ring. LBC Ultimate pistolgrip and aluminum gas block. The rifle is equipped earlier style that retains the two-piece sear and is correct for the period. with A2 style fixed buttstock and a factory Versa-Pod mount is installed As-mentioned the rifle is pictured in Death From Afar III © 1994 on the forend. Included are the original box, soft case, magazine, Chandler, on page 123, pictured with serial number and showing the manual, test target and papers. This is a top-guality AR platform rifle that serial numbered scope mount and barrel code, and mentions the owner has a 1/2" MOA factory guarantee and would cover many shooting as advanced martial collector Harlan Reinfeld, now deceased (pictured styles and disciplines. (4A10339-14) {MODERN} (2000/2500) in the book), from-whom Mr. Coniglio purchased the rifle. When Est. 2,000 - 2,500 purchased from Mr. Reinfeld the arm had quite a history and papers, 209 Les Baer Custom Ultimate AR 6.5 Grendel M4 Semi-Auto Carbine with the name of the man who used the arm in Vietnam. That sniper was serial #LBR002216, 6.5 Grendel, 16" LBC bench rest 416 stainless steel killed and the NVA gained the gun, it being re-captured later in a firefight medium weight barrel with a 1:8" rate of twist and a like new, unfired and was brought back home as a "captured war trophy" by the man bore. This top-of-the-line AR platform factory custom carbine is in from-whom Mr. Reinfeld purchased it. Mr. Coniglio had a flood in his new-in-the-box condition. Features include machined LBC upper and basement many years ago and all of his capture paperwork for his many lower receivers with Dupont S coating finish, LBC chromed bolt and fine arms (that this house sold last year), including the paperwork for this extractor, LBC chromed carrier, Jewell two-stage trigger, and picatinny arm was destroyed, sadly leaving us only a really good story. When one top rail and gas block. This model also features the Thunder Ranch looks at the arm there is no doubt about what it is and it is a true United four-way rail free-float vented handguard with factory Versa-Pod mount States-issued M40 sniping rifle, with some field modifications, no doubt and lock ring, LBC Ultimate pistolgrip and A2 fixed buttstock. Included made by the man who carried and used the rifle. Very rarely do these are the original box, soft case, two magazines, manual, test target and arms come up for public purchase, this example having the bonus of papers. This is a top-quality AR platform rifle that has a 1/2" MOA being published in one of the authoritative works on the subject, it is a factory guarantee and would cover many shooting types and rare opportunity for the advanced military or collector of sniper rifles. opportunities. Lot Title/Description

230 Interesting Winchester Model 1895 Lever Action Rifle with Special Long Forend serial #45632, 30-40 Krag, 26" round barrel with a very good bore showing some scattered mild oxidation and pinprick pitting with otherwise strong rifling throughout. This is an interesting 1904-made rifle equipped with extra-length schnabel forend and period-threaded muzzle likely for a Maxim silencer. The barrel retains nearly 90% original blue showing overall thinning and toning to a pleasant gray-brown patina under bright light along with some very fine scattered pinprick pitting and a few inexplicable light tool or vise marks nearer the breech. The action retains perhaps 60-65% original bright blue showing overall flaking to a pleasant gray-brown patina and showing a few tiny spots of mild oxidation staining and light handling marks. The bolt retains about 90% original bright blue and the hammer and lever link show wisps of vibrant case-hardened colors muting to a pleasant smoky patina. All markings remain intact and strong, the barrel and action stamped with Winchester oval "WP" factory proofs, likely indicative of some later work at the factory as these proofs were introduced a year after the rifle was made. The smooth walnut buttstock and forend with ebony tip insert remain in about very good plus condition, the forend with worn finish and the buttstock showing generous period varnish, along with the expected scattered dings and handling marks, some perhaps more moderate. There is a small chip and some minor cracks at the toe and a repaired thin 5" crack at the left nose of the forend. The forend is affixed with dual screws which attach to a pair of dovetailed mounts along the underside barrel. The rifle is equipped with factory sling eyes, Climbin' Lyman receiver sight, factory-blanked rear seat and small ivory bead front sight. The action seems to function well mechanically. This rifle is pictured and described on page 272 of Winchester Model 1895 Last of the Classic Lever Actions by Kassab and Dunbar. The authors note that factory records indicate the arm shipped in 1904 as a 30 caliber rifle, 26" barrel with Lyman receiver and front sights and blanked rear. There was no note of the shotgun buttplate or extra length forend but they believe it to be original factory work, indeed the workmanship, placement of the front swivel, and honest consistent wear are indicative of this. A fine rifle in a unique configuration for the advanced Winchester collector. (13C10337-1) {C&R} (8,000/10,000) Est. 8.000 - 10.000 231 Lot is Withdrawn Lot is Withdrawn 232 Lot is Withdrawn Lot is Withdrawn 233 Lot is Withdrawn Lot is Withdrawn 234 British Contract Colt New Service Double Action Revolver serial #133005, 455 Webley, 5 1/2" barrel with a bright excellent bore. The metal surfaces of this 1917-made revolver retain about 85% original blue with thinning to pewter gunmetal and mild gray patina from honest use and some other scattered light handling marks. The polished sides of the hammer remain brilliant and the ejector rod head and lanyard ring retain good smoky case-hardened colors. All markings remain crisp and clear and the revolver shows typical British military inspector stamps. There is a very discreet "DEAC" import mark on the underside of the barrel and no British export proofs are present. The black checkered hard rubber grips are scratch-numbered to the gun and remain in verv fine condition showing some scattered light handling marks, the right panel with a very small neatly repaired chip at the toe and the left panel with a neatly repaired 1 1/4" thin chip at the heel. The lanvard ring is intact and the chambers are unmolested and remain in their original 455 configuration. The action seems to function well mechanically with excellent timing and lock-up. A very respectable example in a desirable original configuration. (13A10470-27) {C&R} (1000/1500) Est. 1.000 - 1.500

235	Winchester Model 1886 Lightweight Takedown Rifle
	Description Update 3/10/22: There is a shallow about 5/8" relieved area
	along the bottom edge of the comb, no doubt done very long ago, to
	accomodate the tang sight when it is folded down.serial #139144, 45-70
	cal., 22" round barrel with full magazine and a bright minty bore. This is
	a fabulous little rifle. The barrel and magazine retain 98% plus strong
	original blue finish overall. The action shows 97% bright original blue
	finish with light striations running through either side of action which just adds to the honest nature of the rifle. The hammer and lever show very
	strong original color case-hardened finish while the takedown collar and
	nosecap show 98% of their original blue. The plain walnut buttstock and
	forend rate excellent with 95% original finish with loss due to a little light
	peeling on the butt. There is a repair to a chip at the toe, it is the original
	piece of wood, period repaired with two brass screws which are flush
	with the surface of the wood. This is well-done, guite unobtrusive and
	the checkered hard rubber shotgun buttplate remains intact. The rifle is
	equipped with factory sling eyes and is sigthed with a beaded blade
	front, flattop rear (possibly a modified semi-buckhorn) and a Lyman
	folding tang mounted peepsight. A simply wonderful little lightweight
	takedown in a very desirable chambering. (110483-186) {C&R} [Perry
	White Collection] (5000/7000)
	Est. 5,000 - 7,000
236	Scarce German "S28" Gew.98b Bolt Action Rifle
	serial #4944a, 8mm Mauser, 29" barrel with a mostly bright bore
	showing strong rifling and a slight bulge about 1" back from the muzzle.
	The metal surfaces of this intriguing interwar rifle show generous arsenal
	rust blue with overall toning to a mild gray-brown patina along with some
	sparse minor pinprick pitting and light handling marks scattered about.
	All markings remain intact and strong, the receiver ring on this example
	scrubbed as-is typical, the ring now with a small punch mark. The right
	side receiver ring shows three "(Crown) / O" Imperial-style inspector
	marks while the left side ring and barrel shows imperial eagle proof
	marks. The rear sight has been updated, the right side base showing
	three "(Eagle) / 6" Waffenamts while the top edge of the left side also
	shows another Imperial-style "(Crown) / O". Disassembly also reveals
	the characteristic "S28" stamp on the underside of the receiver. The
	walnut stock and handguard remain in very good plus condition
	maintaining a nice honest appearance showing the expected overall
	light dents and dings from military service, the fingergrooves and sling
	cutout retaining nice edges. The stock has a very neatly executed
	repaired duffel cut beneath the rear band and is stamp-numbered matching the receiver along the toe line, the handguard is mismatched
	numbered "938". The stock shows the now-familiar "(Crown) / O" stamps
	along the pistolgrip and right sides. Strangely, there is the faintest hint of
	a Third Reich Waffenamt on the pistolgrip as well though the exact code
	is difficult to make out, perhaps "M910". All of the remaining serialized
	parts are matching except for the rear barrel band which is from a
	different S28 rifle numbered "6882" and shows S28 stamp, the bolt
	release (74), bolt body, and extractor (the other bolt parts are matching
	"44"). The bolt body is numbered "3531b" and shows a very faded Third
	Reich eagle proof and what appears to be a "(Eagle) / WaA21"
	Waffenamt. An original muzzle cover with "(Crown) / O" and "S30"
	stamps is included along with an original brown leather sling in fine
	condition showing some light crackling and flaking. A small packet of
	research regarding these rifles is also included and it is believed they
	were manufactured by DWM Karlsruhe in the early to mid-1920's. A fine
	example for the advanced German martial collector. (13B10443-6)

	Est. 1,500 - 2,000
237	Swedish AG-42B Ljungman Semi-Auto Rifle by Carl Gustafs
	serial #1117, 6.5x55mm Swedish, 25" barrel with a bright excellent bore
	showing a touch of faint frosting in the grooves and otherwise crisp
	rifling. The metal surfaces of this 1943-dated rifle retain about 90% arsenal refurbished blue finish with the loss due to some overall fading
	to mild gray patina under bright light and a little mild oxidation speckling
1	along some of the small parts. The bolt is taking on a slight plum patina
	while the cover retains about 95% black enamel finish. All markings
	remain intact and strong and there is a discreet Sarco import mark on
	the barrel. The smooth birch stock and handguard remain in very good
1	condition as lightly cleaned showing a couple of small thin cracks on
1	either side behind the finger grooves, thin 2" crack behind the front band
1	spring, and one behind the rear swivel. The stock shows two strong
1	crown stamps on the pistolgrip and the brass disc on the right side is
	intact. The bolt is electro-penciled matching, the buttplate is
	stamp-numbered matching and the action seems to function well
	mechanically. A very nice example of these increasingly desirable and
	interesting Swedish rifles. (13A10327-38) {C&R} (1000/1500)

		·	
238	German Gew.98b Bolt Action Rifle by Simson	240	Excellent Winchester Model 1894 Lever Action Rifle
	serial #4017a, 8mm Mauser, 29" barrel with a bright very good plus bore		serial #44240, 30 WCF, 26" octagon barrel with shorter than standard
	showing some fine light pitting in the grooves and otherwise strong rifling		magazine and a bright excellent bore showing just a few tiny
	throughout. The metal surfaces of this interwar rifle retain about 90%		insignificant pinprick pits and otherwise crisp rifling. This is a really lovely
	arsenal refurbished rust blue with most of the loss along the triggerguard		antique 1898-made rifle, the barrel and magazine tube retaining about
	and floorplate toning to plum-brown patina, thinning along the high		98% original blue showing just some subtle high edge wear, slight
	edges and muzzle and scattered light pitting beneath the finish. All		thinning under bright light and a few tiny specks of mild oxidation
	markings remain intact and strong, the receiver ring showing a single "S"		staining along the underside barrel. The magazine tube end cap has
	stamp and the left side receiver and barrel with interwar eagle firing		taken on an attractive smooth gray case-hardened patina. The action
	proofs. There is a series of three small punch marks after the serial		retains about 96% original bright blue showing some very fine flaking to
	number on the barrel and on the rear sight leaf and the majority of the		a pleasant gray-brown patina along the high edges and some fine minor
	components show Simson "(Eagle) / 6" Waffenamts, the right side		freckling. The upper tang shows a thin streak of older applied cold blue
	receiver also with an "(Eagle) / 14". The smooth beech stock and		over a little bit of fine pinprick pitting, likely the result of a grasping palm
	handguard remain in about very good plus condition showing the		long ago, it is very minor and missed at first glance. The bolt retains
	expected overall dings and dents from military service, a small abrasion		about 98% bright blue while the extractor and loading gate show nice
	near the forend tip and some darkened areas near the buttplate, the		pale fire blue. The hammer and lever retain lovely vibrant
	buttplate metal also a little proud of the stock overall. There is a 1"		case-hardened colors throughout, the lever with some strong protective
	arsenal repair of the bottom of the pistolgrip and the sling swivel inlet		lacquer present also showing some mild muting along the exterior. The
	behind the pistolgrip shows an arsenal plug. The right side butt shows		nosecap and crescent buttplate retain strong blue with some thinning
	softened Imperial-style inspector stamps along the right side butt and on		along the edges and all markings remain intact and strong. The plain
	the pistolgrip, the stock is stamp-numbered matching along the toe line		walnut stocks remain in excellent condition showing nice raised grain
	and there are some faintly scratched letters and numbers along the left		and retaining essentially all of their original varnish with just a few
	side butt. The handguard is also stamp-numbered matching on the		sparsely scattered tiny dents and minor handling marks. The rifle is
	inside and all of the remaining numbered parts are matching, some of		equipped with standard sporting rear sight, an excellent condition Beach
	the smaller components likely arsenal-renumbered. The action seems to		combination front sight retaining 95% original gold wash, and the action
	function well mechanically and the rifle also includes a cleaning rod,		seems to function well mechanically. A wonderful rifle that would make
	milled muzzle cover numbered "N4031" and an original brown leather		an excellent addition to the finest Winchester or American arms
	sling in good condition showing some scuffs, mild crackling and the tab		collection. (13D10483-8) {ANTIQUE} [Perry White Collection]
	loop is torn. A solid example for the martial collector. (13B10443-5)		(7000/9000)

249	
1	Extremely Rare Winchester Model 1876 Deluxe Express Short Rifle with
	Factory "Damascus" Receiver
	serial #10087, 50-95, 22" round matted barrel with button magazine and
	a bright bore showing shallow rifling. This is a straight grip deluxe 1876
	with notation in the factory record which reads "Damascus receiver".
	The rifle features the correct 8 3/8" forend which was typically used on
	the short rifle and the standard factory checkering pattern used on
	straight grip deluxe rifles. Additional special order features include the
	smooth steel shotgun buttplate, fancy checkered stocks and matted
	barrel. The barrel markings are interesting appearing on two lines, one
	on either side of the matting, the caliber is the same with "50 Cal." On
	right side of matting and "95 Grs." on left side of matting. The barrel
	retains about 75% evenly thinning original blue finish overall blending
	with a smooth brown patina. The action is a very smooth gray brown with faint traces of the original Damascus pattern showing, more
	prominent on the left sideplate and to rear of sideplate on both sides of
	the frame. The damascus pattern is visible on the dust cover and
	stronger in protected areas on either side of the dust cover rail. The
	hammer and lever show a good deal of original color case-hardened
	finish and the loading gate shows 90% original blue. The checkered
	buttstock and forend are of highly figured American black walnut and
	rate about excellent with about 95% original finish remaining and with
	strong clean checkering. The smooth steel shotgun buttplate shows a
	brown patina overall with some old scattered light oxidation. The rifle
	comes with a copy of a 1970 Winchester Gun Museum letter which lists
	the guns as follows: rifle, 22" round barrel, plain trigger, shotgun butt,
	checked stock, barrel matted on top, Damascus receiver, shipped April
	7, 1881. A subsequent records inquiry at Cody confirms all of the above
	information and notes that the record "definitely reads as Damascus".
	The lower left tang of rifle is hand engraved with large capital letters "D
	C F" along with stamped "1010 S" with the top tang inlet of stock
	showing matching "1010". The "DCF" marking is interesting in that it
	could very well be "Damascus Finish". Perhaps the "C" stands for
	"charcoal" or "color"? Many of these express short rifles went to India via
	England and show British proofs, this example does not bear British
	proofs. The rifle is sighted with a German silver Rocky Mountain front
	sight and interesting, non-adjustable semi-buckhorn rear. An extremely
	rare and very likely unique Winchester model 1876 deluxe express rifle
	for the advanced Winchester collector. (1E10483-170) {ANTIQUE}

This 1919-made rifle was apparently factory-refurbished, showing re-struck oval "WP" proof marks and assembly number "343" stamped on the major components. The barrel retains about 98% excellent quality factory refurbished rust blue showing a few light handling marks and some small areas of faint thinning under bright light. The action retains about 94% fine quality refurbished bright blue showing some scattered areas flaking to a pleasant gray-brown patina, light handling marks and a few small areas of light pinprick pitting along the edges, some areas on the left that are finished-over. All appropriate markings otherwise remain intact and crisp, the aforementioned "343" assembly number is found on the inside lower tang, front edge of frame beneath forend, inside lever link and left side bolt and the underside of the barrel is stamped "177462/9061". The checkered deluxe walnut straight grip buttstock and schnabel forend with ebony tip insert remain in very fine condition showing somewhat worn finish and light wear to the checkering with the expected scattered light dings and handling marks. Buttstock fit is very good while the forend shows a slightly gap at the takedown boss and the wood shows attractive feathercrotch grain figure along the sides of the butt and forend. The buttstock shows a mismatched assembly number "173" stamped along the inletting, the tang stamped only with the previously mentioned "343". The rifle is equipped with period sling swivel eyes, flattop sporting rear sight and plain blade front sight. The action seems to function well mechanically. While reworked, this rifle remains an attractive example in a desirable configuration. (13B10483-114) {C&R} [Perry White Collection]
250	Winchester Model 1895 Deluxe Takedown Rifle serial #404244, 30-06, 24" round barrel with a bright excellent bore. This 1919-made rifle was apparently factory-refurbished, showing re-struck oval "WP" proof marks and assembly number "343" stamped on the major components. The barrel retains about 98% excellent quality factory refurbished rust blue showing a few light handling marks and some small areas of faint thinning under bright light. The action retains about 94% fine quality refurbished bright blue showing some scattered areas flaking to a pleasant gray-brown patina, light handling marks and a few small areas of light pinprick pitting along the edges, some areas on the left that are finished-over. All appropriate markings otherwise remain intact and crisp, the aforementioned "343" assembly number is found on the inside lower tang, front edge of frame beneath forend, inside lever link and left side bolt and the underside of the barrel is stamped "177462/9061". 251	British Flintlock Snap Bayonet Blunderbuss by Wheeler
	About .60 cal flaring to 1 1/2" at the muzzle, 15 1/4" cannon-belled barrel
	with octagonal breech and an about very good lightly oxidized bore. The
	barrel of this handsome blunderbuss retains a healthy amount of antique
	plum-brown finish thinning to a deep gray patina and showing some
	scattered old fine pitting and remnants of minor oxidation staining. There
	are some light border motifs at the breech and upper tang and the left
	breech flat shows a pair of period proofs with an impressed "(Crown) / P"
	and "(Crown) / V". The lockplate is more of a pewter gunmetal patina
	showing a simple borderline with pronounced teat at the rear. The
	lockplate is neatly marked in script "Wheeler" and is of rather early
	simpler construction with waterproof pan, unbridled frizzen and nice
	lightly chiseled frizzen spring. The bayonet features a 12" blade and
	remains partially bright showing some areas of gray-brown and old
	oxidation staining mostly along the exposed surfaces and the bayonet
	catch at the muzzle exhibits a little play in its dovetail but remains
	affixed. The remaining hardware is of brass including the ramrod
	thimble, tailpipe, long tang triggerguard, buttplate and sideplate, toning
	to a mix of goldenrod and pale ocher patina with scattered handling
	marks. The brass hardware is embellished with tasteful light bordering
	, , , , , , , , , , , , , , , , , , ,
	and small foliate motifs, the triggerguard with a very nice little acorn
	extension. The smooth walnut buttstock remains in very fine condition
	retaining generous oil finish showing the expected scattered light dings,
	minor handling marks and areas of minor oxidation leaching along the
	left forend. There is a small sliver missing and a 4 1/2" very thin crack at
	the left tip of the stock that is relatively unobtrusive. The bayonet spring
	remains strong, what appears to be the original brass-tipped ramrod is
	present and the lock seems to function well mechanically. A fine
	example of the classic British blunderbuss in the original flint by Wheeler
	of London, with desirable snap bayonet. (13C10531-1) {ANTIQUE}
	(2500/3500)
	Est. 2,500 - 3,500
252	Fine British Pattern 1853 Percussion Rifle-Musket by London Armoury
	Co.
	577 cal, 39" barrel with a bright excellent bore. The barrel of this
	handsome rifle retains perhaps 85% original blue showing some overall
	thinning and toning to a pleasant gray-brown patina, a few scattered
	patches of light pitting and freckling. The two forward barrel bands retain
	a generous amount of original bright blue showing overall flaking while
	the rear band has toned to gray-brown. The lockplate has mostly toned
	to a smoky gray case-hardened patina showing a few small remnants of
	old minor oxidation staining, while the triggerguard and buttplate have
	taken on a lovely rich ocher patina. All markings remain intact and crisp,
	the lockplate with 1861 date and "L.A. Co." in the center and "(Crown) /
	V.R" Royal Cypher at the rear. The breech shows a "(Crown) / 3" and
	"(Crown) / TP" and with what appear to be two British martial proofs that
	have been over-struck with "L.A.C." The checkered walnut stock
	remains in very fine condition retaining a healthy amount of original
	finish and showing just the expected overall light dings and handling
	marks from the years. Hardware fit and edges are excellent throughout,
	the checkering with mullered borders remains crisp and the right side
	butt shows a nice 1862-dated London Armoury roundel. The original
	sights, ramrod and chained nipple protector remain intact and the lock
	functions crisply. A very attractive P.1853 for the antique arms collector.

	cylinder and modified with bright fine bores with a tiny ding visible in the		sliver of light visible at the breech and the action appears to function well
	bore of the upper barrel near the left-side muzzle which is not visible on		mechanically. Included with the shotgun are choke wrenches and a pair
	the exterior. This is a very beautiful custom pre-war Superposed whose		of skeet choke tubes for all four calibers as well as the following choke
	provenance and history of upgrades is detailed in an included factory		tubes: 12 ga. improved cylinder, modified, full 20 ga. and 28 ga. two
	letter and an advertisement from the consignor who is a dealer in fine		improved modified and .410 bore modified and full. Also included is a
	sporting shotguns. The factory letter indicates that the shotgun left		durable aluminum luggage-style lockable case by Nasco Aluminum Co
	Belgium as a Standard Grade 12 ga. with 30" barrels choked improved		with a black velvet interior marked with the Kolar Arms logo on the inside
	cylinder and modified, field stock, double triggers and an optional choke		of the lid and fitted for all the components of the gun including the six
	combination and sold to The Kramer Howe, Co. of Dayton OH in 1936		tubes and the included plastic mallet, knock-out driver and Kolar barrel
f	for \$59.46. In 1984 the shotgun was purchased by Thomas Grogg, an		weight. This is a very versatile skeet set in wonderful condition that
	engraver, who engraved the action, breech, triggerguard and forend iron		should be ideal for any number of shotgun disciplines. (23B10318-37)
	and adorned the gun with 18K gold inlays and borders. Grogg had the		{MODERN} (2500/3500)
	metal surfaces professionally refinished by the former head of		Est. 2,500 - 3,500
	Browning's refinishing shop and the wood finish was restored by Klaus	290	Rare Winchester Model 1895 Flatside Deluxe Rifle
	Himpmayer who also refreshed the engraving. As such, the metal	230	serial #3663, 30 U.S., 28" round barrel with a very good bore showing
	surfaces retain about 98% professionally-restored blue with the triggers		deep rifling and some light frosting in the grooves. These early 1895
	retaining most of their restored gold finish which is lightly worn on the		rifles in deluxe or special order form of any type are very rare and
	faces. The frame features Midas-style gold inlays of a duck on the left		desirable. This example remains in very nice condition. The factory
	and a goose on the right, both stand out against a finely stippled		records list the rifle as: 30 caliber, Checkered stock, pistol grip, shotgun
	background surrounded by nicely-done filigree scroll engraving signed		butt, oil finish received in the warehouse on May 26, 1897 and shipped
	"T. GROGG" on the lower right side of the action and to the rear of the		the following day; there is a second ship date (which may be a repair) on
1	forend lever and "BROWNING" and the oval around the bust of Mr.		July 17, 1897. There were also return and repairs on May 10, 1900 and
	Browning on the underside of the frame are inlayed with gold. The		September 8, 1897. The rifle was subsequently returned to the factory
	quality of the work is exceptional and the contrast is stunning. The		after 1905 as the barrel and action show Winchester proofs. The barrel
	checkered walnut straight grip stock and forend with "horseshoe"		retains 80% evenly thinning original blue finish which is blending with a
	nosecap rate excellent with a few flattened points in the checkering and		smooth and even brown patina. The action is drilled for a Lyman 21
	the restored finish accentuating the attractive grain figure on both sides		receiver sight which is no longer present and holes are properly filled
	of the stock. The fit of the wood to the metal is shy at the tangs and		with filler screws and the left side of the action shows light surface
	there is a small gap between the frame and the lower edge of the right		abrasions, likely from that sight being used. The action retains 85%
	stock cheek. The shotgun includes two pads, a Pachmayr Old English		strong original blue finish overall with the previously mentioned
	and the installed Browning ventilated pad which provides a 14" length of pull with drapp of 1.2/8" and 1.1/2". The obstaup is activity and with an		abrasions and with the balance of the loss being on the high edges,
	pull with drops of 1 3/8" and 1 1/2". The shotgun is equipped with an		magazine and lever. The checkered pistolgrip buttstock and forend are
	ivory-colored bead at the muzzle and a silver bead mid rib, double		of highly figured American black walnut and rate very good plus with its
	triggers and a non-automatic safety and the barrels lock up tightly with		original oil finish thinning and with the checkering remaining strong
	some light visible at the breech and the action appears to function well		showing just the slightest wear on the forend. The stock has a capped
	mechanically. The consignor purchased this shotgun from Grogg and		pistolgrip, checkered hard rubber shotgun buttplate, both of which
	has lovingly cared for it since and states that only about 200 rounds		remain excellent and the ebony insert in the tip of the Schnabel forend is
	have been fired since 1984. Included is a beautiful russet leather		present. Factory records list the rifle as: rifle, 30 caliber, checkered pistol
	luggage-style lockable case in excellent condition with green canvas		grip stock, shotgun butt, oil finish and shipped on May 27, 1897. The
	outer cover with leather edge reinforcements. The padded red felt		rifle was subsequently returned in July and September of 1897 and
	interior of the case features a Browning St. Louis leather logo and is		again in May of 1900. A very nice and very honest example of these
	fitted for the gun and its accessories which include a lovely rosewood		rare and most handsome Winchester lever guns. (1E10483-116)
	cleaning rod, brass cleaning accessories stored within a matching		{ANTIQUE} [Perry White Collection] (8,000/12,000)

	Est. 1,200 - 1,800	York Infantry. Also known as the 2d Militia or the 2nd Regiment N
299	Winchester Model 1885 High Wall Take-Down Musket	York State Light Infantry, the regiment was organized in New Yor
	serial #110887, 22 Long R., 28" barrel with an excellent bore that is	under special authority from the War Department as a regiment o
	mostly bright and has some areas of light freckling. The barrel retains	volunteers under Col. G. W. B. Tompkins and received its numeri
	about 95% original blue with light edge wear, primarily on the bands,	volunteer designation in December 1861. Interestingly, Company
	and some loss along the top of the barrel due to four neatly filled holes,	howitzer company of the regiment, served mostly detached from
	no doubt where scope blocks were mounted. The frame retains perhaps	it was finally converted into the 3d Battery of Light Artillery, and in
	98% bright original blue with nice colors on the breechblock and just a	September, 1861, was replaced by a new company. There is no o
	tiny bit of flaking around the Winchester tang marking. The lever retains	that this gun belonged to that howitzer company, with the good
	some rather nice smoky muting case colors, the rear toned to a pewtery	Colonel's name engraved thereon, being a State Militia Regiment
	case-hardened patina, with very nice colors on the upper tang and	being mustered into federal service it clearly had no federal "U.S.
	center of the carbine butt, the heel and toe toned to gunmetal. The	acceptance markings. A very handsome and very honest 12-pour
	walnut stock and musket-length forend rate excellent with perhaps a	mountain howitzer that is certainly worth the expense of construct
	very minor handling mark here or there one must really search for,	quality carriage for. [Extra Crating and Shipping Will Apply] (3E89
	showing perhaps a handful. The barrel is equipped with original blade	{ANTIQUE} (25,000/50,000)
	front sight and has a military style adjustable rear sight. Equipped with a	Est. 25,000 - 50,000
	factory single-set trigger, all markings remain crisp, the action appears	
	to function correctly, and the take-down function operates without effort.	
	A classic military-style rifle with two barrel bands which would make a	
	terrific addition to any small bore or fine Winchester collection.	
	(4B10483-113) {C&R} [Perry White Collection] (1500/2500)	
	Est. 1,500 - 2,500	
300	Norden Bomb Sight	
500		
	serial #4311. This vintage bomb sight head used by Navy and Army Air	
	Corps during WWII and the Korean War, before finally being retired from	
	service during the Vietnam War. A Swiss inventor by the name Carl L.	
	Norden (1880-1965) was the brains behind the X-1 Reflex Sight. He	
	worked for Sperry Gyroscope Company where he helped design the first	
	gyrostabilizer for large ships before starting his own business. The sight

Use in the early years of this sight led to spotty results at best, but with a combination of tactical changes and technological improvements, the unit became less complicated to operate and accuracy rose dramatically. The pinnacle of its Second World War use culminated with its most historic "drop" happening with "Little Boy" out of the iconic B-29 the "Enola Gay" on Hiroshima, followed by "Fat Man" at Nagasaki. It was used heavily during the Korean War with its final drops happened during the Vietnam conflict, along the Ho Chi Minh Trail during Operation Igloo White, at which time advancements in radar targeting reached new platforms of success, making this device obsolete. The sight remains in very good condition overall showing scattered minor chips in its black enamel finish and some minor handling marks, a dent in the index window frame, the drift knob shaft is bent slightly but it seems to function. Obviously, the base and power components are missing, as well as the "auto-pilot" linkage, it is unclear if all parts are present, it is highly likely some are not. The sight was manufactured with components from both W.L. Maxson Corp	
	gyrostabilizer for large ships before starting his own business. The sight consists of two pieces, one being the sight head and the second a stabilization unit and in theory it allowed for faster calibrations and more accurate dropping on targets. It is stated Norden wished to "lower the suffering and death toll that was associated with war" by having a more precise targeting system. At the time of its development, it saw the same level of government protection as the Manhattan Project due to its anticipated accuracy and the fear of it being used against the Allies. This sight was installed in a variety of aircraft with the earliest version being extremely difficult to use, it did however create more accurate chances of directly hitting a target from higher altitudes and by the time X-5 variant came out it was supposed to be able to drop a bomb in a 100' radius from 4 miles up. Use in the early years of this sight led to spotty results at best, but with a combination of tactical changes and technological improvements, the unit became less complicated to operate and accuracy rose dramatically. Lot Title/Description

302 Unique Confederate Breechloading Boat Gun Captured by Lieutenant Commander George Hamilton Perkins in Action on the Mississippi River 2" bore, 43" overall length barrel. This is one of two cannon captured in action on the Mississippi River in April 1863 by then Lieutenant Commander George Hamilton Perkins, which were sent north to his family in Concord New Hampshire. Fast-forward to Webster New Hampshire. In the cellar of an antique Yankee barn, sits a forgotten cannon languishing on an iron carriage with wooden wheels, slowly succumbing to the ravages of time and the whims of the Connecticut Valley Yankee farmer. The consignor of this cannon knew of its existence for years and tried in vain, until recently, to purchase it from the family. Commodore George Hamilton Perkins of New Hampshire, spent his post-war years largely in Webster, where he owned several farms and bred fine cattle and race horses. A native of Contoocook, N.H. he graduated the U.S. Naval Academy and was an executive officer in the Western blocking squadron, later taking the USS Cayuga up river during Adm. Farragut's assault on New Orleans, he himself at the helm "....through the storm of shot and shell " and was the first U.S. warship to pass forts Jackson and St. Phillip. He found himself alone upstream outnumbered, being pursued by 11 Confederate gunboats yet he persevered the onslaught. His later service in 1863-65 was on the Mississippi River and in the Gulf of Mexico, it was during action on the Mississippi in April 1863 when then Lieutenant Commander Perkins captured two guns. A detailed perusal of his papers and correspondence in Letters of Capt. George Hamilton Perkins U.S. Navy Edited and Arranged © 1901 Rumford Press, we find a letter dated April 21, 1863 which reads: "I have sent to Frank by the last steamer two guns. The six pounder is a fine gun, and was captured after a desperate fight. The other is a rifle gun, and is quite a curiosity; it will throw a ball a long way." Frank was the youngest of Perkins' brothers and he thought quite a bit of him. While master of the union monitor Chickasaw, Perkins' aggressive and effective tactics during the Battle of Mobile Bay in 1864, was a major factor in the capture of the Confederate ironclad Tennessee. Indeed Admiral Farragut said of him: "..... No braver man ever trod a ship's deck; his work in the Chickasaw did more to capture the Tennessee than all the guns of the fleet put together". The gun itself has a black iron tube with a transverse-sliding breechblock, secured by a small key, attached by short chains so they do not become lost during action. The iron carriage has a flaking battleship gray paint and is constructed very much like the carriages of boat guns with a very S-shaped trail as-is seen on Naval Gatlings as well. The wooden wheels are no doubt original and still functional, rotating along their axle, however a number of the spokes and fellos have deteriorated with the years and will need restoration, they only add to the honest-character of this interesting and unique cannon. The trail has two iron rods which support it against the axle itself, a 29" section of one of those rods has gone missing from the years, no doubt becoming a piece of farm implement at some point. Both of the wheel retaining washer-pintles are no longer present, no doubt being needed elsewhere on the farm, two simple oxidized bolts now retaining the wheels to the axle itself. The breechblock is frozen in place however no doubt could be freed up by an intelligent individual who knew their business and methodically worked to free it, the bore itself is moderately and heavily oxidized its full length. The best part of the cannon is the silver plate affixed to it, doubtless when it returned to Concord via rail and affixed by the family. The plague reads "Captured by the Union Forces April 1863/in a skirmish up the/Mississippi River In Louisiana/and Presented to Lieutenant Commander/George Hamilton Perkins USN/in gratitude for assistance rendered/by his Gunboat the New London", Perkins indeed being Lieutenant Commander at the time of the action as master of New London. Two of the screws or rivets which have attached the plate are no longer present, two remain, one is slightly damaged, the plaque showing minor scratches and dings from the years, it is however still fully readable. The overall length muzzle to end of the trace is 94", the wheels are 38" high and the maximum width axle-tip-to-axle -tip is 58 1/2". While they rotate and do convey the cannon, the wheels are very tender and in need of restoration, the pivoting pin upon-which the cannon's mounting flange fastens to the carriage has been lost to the years and a common iron replacement pin is in place, again no doubt the original pin was needed someplace on the farm for some implement, after the gun was relegated to the cellar of the barn. There is a U-shaped elevation screw midway down the trace which elevates or lowers the gun as necessary, it is functional. An absolutely wonderful find, with fabulous provenance, actually mentioned in his letters, by the man who liberated it from the Confederacy, definitely worthy of a full-bore competent and comprehensive restoration. [Extra Shipping and Packing Will Apply] (3G10101) {ANTIQUE} (50,000/100,000) Est. 50.000 - 100.000

303	Extremely Fine State of New York Six-Pounder of Old Pattern Gun
	3 7/8" bore, 45" deep, which is lightly pitted its full length. This is a very
	nice 6-pounder old pattern field gun, identical to the styles cast by Byers
	for the state of New York, and marked nearly identically. The barrel is
	roughly 57 1/2" long from muzzle face to cascabel and is a mix of
	goldenrod and a deep ocher patina. There is a widely flaring muzzle with
	unmarked muzzle face showing some very light and some more
	moderate dings. The first chase has astragals and fillets at each end
	and an incise-chiseled "6" surrounded by a beaded border. The
	reinforce has a chiseled-in-relief Seal of the State of New York which
	appears to be part of the original casting and not applied. Behind this we
	have neatly engraved and chiseled open script "SNY" also with a
	beaded border. The trunnions are 3 3/8" in diameter and roughly 3 1/2"
	long, the left is unmarked while the right trunnion is marked "TTS/PP"
	with a circle geometric decoration beneath; there are no rim base
	numbers. Behind the State of New York engraving we find the serial
	number "No. 11", with the tubes weight marked 5-3-2, signifying a weight
	of roughly 646 pounds. There is a small groove in the breech reinforce,
	with no other markings on the breech proper and the area around the
	touchole shows evidence of having been drilled for a later-period lock of
	some style for firing the gun. The gun itself is lovely over all and really
	deserves to have a proper carriage made. It does have runs overall of
	what looks like old varnish. Any conservator should be able to remove it
	in short order while restoring the tube. There are 1/2 dozen near
	identical guns that can be found with these same "6" and "SNY"
	markings, this is the only example we have encountered with the Seal of
	the State of New York chiseled in-relief upon it. A fabulous antique
	cannon likely dating from the late 1790s. (3G10103-1) {ANTIQUE}
	(20,000/40,000)
204	Est. 20,000 - 40,000
304	Winchester Model 1895 Lever Action Carbine serial #405739, 30-40 Krag, 22" round barrel with a bright excellent
	bore. The barrel of this nice 1920-made carbine retains about 95%
	original blue showing some scattered light handling marks and some
	thinning to gray under bright light. The action retains about 60% original
	bright blue with the balance flaked to a pleasant silvery pewter patina,
	more so along the right side. The bolt retains 95% original bright blue
	and all markings remain intact and strong. The smooth walnut stocks
	remain in very fine to perhaps near excellent condition retaining most of
	their oil finish and with excellent fit throughout with just the expected
	scattered light dings and handling marks. The carbine is equipped with
	Lyman No. 21 "Climbing Lyman" receiver sight, original carbine rear
	sight and a generous brass bead front sight. The action is smooth and
	seems to function well mechanically. A very handsome 1895 carbine
	that has seen only careful light use. (13B10492-60) {C&R} (2000/3000)
	Est. 2,000 - 3,000
305	Fine Winchester Model 1866 Saddle Ring Carbine
	serial #169591, 44 Henry RF, 20" round barrel with full magazine and a
	fair-good bore showing overall oxidation and pitting with otherwise good
	rifling throughout. The barrel and magazine tube of this very late
	production 1898-made carbine are toning to a nice gray-brown patina
	showing some scattered light oxidation staining and old light pitting, a
	few small areas perhaps a bit more moderate along the underside
	magazine tube. There are generous streaks of original blue throughout
	the protected areas and the front barrel band also retains much of its
	original bright blue. All barrel markings remain intact and strong showing
	"44 R.F." cartridge designation. The action has toned to a handsome
	mild ocher patina showing a few thin areas of slight discoloration along
	the top, a few tiny dings and minor handling marks. The edges remain
	very nice overall with fine sideplate fit as well, the caliber marking on the
	lifter remaining strong. The loading gate screw on the right side action is
	a later replacement which is relatively minor and the loading gate itself
	retains wonderful bright fire blue. The lever is toning to a medium gray-brown patina while the hammer shows generous wisps of strong
	case-hardened colors throughout. The smooth walnut buttstock and forend remain in very fine to near excellent condition having darkened
	rather nicely from the years and otherwise maintaining a very attractive
	honest appearance showing just some sparsely scattered very light
	dings and handling marks. There is a very slight gap at the buttplate
	heel, the fit otherwise excellent overall. The lower tang and stock inlet
	show matching assembly number "955". All appropriate hardware is
	intact, the carbine is sighted with 1873-marked carbine rear sight, plain
	blade front mounted on the barrel, and the action seems to function well
	mechanically. This is a very attractive 1866 carbine for the Winchester
	collector, made in the final year of production. (13D10483-151)

Lot Title/Description

306 Custom George Schoyen Stevens No. 49 Walnut Hill Target Rifle 308 Winchester Pre '64 Model 70 Super Grade Bolt Action Rifle serial #1002, 22 LR, 27" octagon George Schoyen barrel with a bright serial #432111, 300 H&H, 25 1/2" barrel with a bright excellent bore. very fine bore which is mostly bright which shows a bit of very slight This is a desirable Pre '64 Super Grade in the sought-after 300 H&H, frosting nearer the throat. The barrel is a very pleasing deep gray-blue, with a very nicely-added Griffin & Howe quick-detach scope mount. The toning in spots to plum. It was made without provision for open sights barreled action retains about 97 to perhaps 98% original blue, the loss is and has two steel target blocks mounted on its top flat flanking the due to some even fading on the receiver and a bit of light surface maker marking "George C Schoyen Denver Colo". The open flowing oxidation scattered in the areas above the forearm. The bolt body and factory scroll engraved 44 1/2 frame is now a silvery gunmetal patina extractor remain mostly bright with all of their original jewelling, the and is smooth in character, as-is the finger lever, showing some very extractor showing some light oxidation staining, with a bit on the bolt light oxidation staining on the belly. The breechblock and hammer show itself, it is appropriately DC pencil numbered on its underside to the gun. strong original blue with the double set triggers toning to pewter. The The shroud retains very good blue while the bolt knob is toning to checkered American walnut Schuetzen-style stock rates very fine as pewter, the bottom metal with perhaps 92% original blue, the loss due to refinished many years ago, showing a repaired crack to the right of tang sharp edge wear. The checkered walnut pistolgrip Monte Carlo stock and a bit of bedding compound to its very rear, with two small lightly rates very good to near fine with few handling marks, but a bit of flaking engraved triangular inlays on the bottom of the pistolgrip. The checkered varnish over its surface, more prevalent at the butt at the Winchester Schnabel forend rates very good with two small chips missing at rear left rifle pad. The rifle is sighted with a copper bead front sight, the folding and right, the forend tip slightly flat and two filled holes just ahead of the leaf Lyman is in place on the rear sight boss and the G&H mount now frame where there was no doubt once a palm rest installed. The rear supports a Lyman All-American Perma-center 2 1/4X telescopic sight face of the buttstock and face of the Swiss butt are both numbered with post and crosshair reticle and bright optics. The scope itself rates "002", the butt showing some flaking nickel along its edges and at the excellent with no discernible handling marks, the rings with a couple of light scuffs and or scratches. This is a very attractive, versatile and prongs, with some light oxidation here and there. The barrel mounts sought-after Super Grade rifle that remains very usable while solidly to the frame and lockup is tight and the arm seems to function properly mechanically. Mounted to the steel target blocks is an maintaining solid investment potential. (3A10511-7) {C&R} (2500/4000) unmarked blued 8-X telescopic sight with fine crosshair reticle and bright Est. 2,500 - 4,000 309 Winchester Pre '64 Model 70 Featherweight Bolt Action Rifle excellent optics. An attractive No. 49 that would be even more-so with the checkering chased a bit, that likely still shoots one hole groups. serial #525141. 30-06. 22" featherweight barrel with what is likely an (3B10530-12) {C&R} (2500/4500) unfired, bright excellent bore. This lovely rifle really appears very nearly Est. 2.500 - 4.500 as-new with only a couple very minor apologies. The barreled action 307 Scarce Marlin Ballard 6 1/2 Rigby Offhand Target Rifle retains 99% original blue with one tiny spot of a very light surface serial #2652, 40-65, 26" round barrel with Rigby flats and a bright very oxidation which has resulted in a tiny pinprick pit about 5" from the fine to excellent bore showing a few very sparsely scattered, very light muzzle, the muzzle also with some very small spots of oxidation. The pits here and there, primarily near the throat, the balance of the rifling bolt body remains mostly bright with just a light bit of staining, the wonderful. The barrel is a pewter gray and plum patina and has a nice extractor with all of its original blue, it is appropriately numbered to the band of acanthus leaf engraving at the muzzle with some nice scroll on gun. The knob shows the tiniest bit of drifting to pewter, also with a bit of the top Rigby flat, it is numbered to the frame on its underside. The surface oxidation and the bottom metal remains brilliant retaining frame is a mottled silvery and pewter case-hardened patina showing perhaps 98% original blue showing some small flakes on the floorplate with a rub mark on the bow of the guard. The checkered walnut exquisite quality open flowing intertwining scroll with very fine background punch dot shading, a small engraved band at the rear of pistolgrip Monte Carlo stock rates excellent to very nearly as-new with a frame with scroll on each of the top flats. The checkered straight grip few very light handling marks one must really search for to find. The original front sight is in place sans its hood and the Lyman folding leaf American walnut buttstock shows lovely fiddleback figure and features a flared left side cheekpiece. It rates very good with much original varnish rear is in its dovetail. The breech face retains all of its original blue with and overall light dings and handling marks and is fitted with a nice Swiss absolutely no brass wear, the in-the-white beveled edge of the extractor butt which retains most of its original nickel, the sharp edges wearing to still shows hardening factory oil, the face of the feed ramp showing no the brass beneath. The stock and buttplate are numbered to the frame evidence of ever having had a bullet drag across it. A very handsome and there are the very beginnings of very slight cracks at the top featherweight needing only a box. (3A10499-2) {C&R} (1200/1800) junction with the frame just to the rear of the sight, but they are slight. Est. 1.200 - 1.800 The forend rates very good showing a bit more wear, its checkering 310 Fine Custom NRA Sporter Magazine Rifle worn to flat-top, with the horn tip intact, showing a couple very minor serial #1408420, 30-06, 24" 1-32 dated Springfield Armory, star-gauged chips along its edge, it is appropriately numbered to the gun. The arm is barrel, with a bright excellent bore. This is a fine Sporter (whether NRA sighted with a globe style front which is adjustable for windage, no rear style or Service style is truly not known), sold through the DCM. converted very professionally into a magazine sporting rifle with nice seat and a mid range vernier peepsight on the rear of the frame. amenities, by some early rifle-builder of the Howe-Niedner-Owen era, Equipped with a single trigger, the arm functions well mechanically and the breechblock is properly numbered to the gun. A lovely rifle, its only but unsigned. The barreled action retains 98% arsenal blue with the body remaining bright, with nice random pattern burnishing on both the apologies are some light slot wear in the lever screw and the addition of body and the extractor, the bottom of the bolt numbered "1408420", light a dovetail through the top Rigby flat, which now shows a hand-fitted blank which is age-appropriate and patinated with the gun. Obviously if beneath the burnishing, but still discernible with magnification. The one wished said dovetail could be professionally filled and the area of bottom metal has faded a bit more to a plum and gray with some light loss be re-engraved, in truth it is very unobtrusive. A handsome 6 1/2 handling marks and the expected scratches that come from a field-used Riaby that no doubt would shoot wonderfully with its nice bore. arm. The American walnut stock is classic-style without a cheekpiece (3B10530-14) {ANTIQUE} (4000/6000) and features checkered panels at grip and forearm. It rates very fine Est. 4.000 - 6.000 with only light handling marks from the years, the service style swivel in place along the toeline and a barrel band swivel at front of forearm. There is a simple blued steel pistolgrip cap and grooved steel buttplate with a nice horn forend tip; the length of pull is 13 1/2". The arm retains its original military front sight with the right side of the rear receiver ring drilled and tapped for receiver sight which is no longer present, the stock was neatly inletted for it, that inletting has been filled with a very nicely camouflaged plug. The receiver has been professionally drilled and tapped for a one-piece Redfield base which now mounts an Lyman Alaskan telescopic sight with crosshair reticle and bright very fine optics. This necessitated forging and bending of the bolt handle for clearance, which was rather nicely done, it is mounted far enough forward that the safety is still functional. There is the beginning of a thin 3/4" crack at the rear of the tang, it doubtless could be arrested and made to go away easily by any good riflesmith. While unsigned, the random pattern burnishing matches examples by Owens, Griffin, Niedner and others. The serial number is listed as a "Sporter" in the Summary of DCM Rifle Sales 1922-1942 © Frank Mallory. A finely executed sporter, no doubt

Mike Petrov would've been able to tell us straight-away who the craftsman was, sadly his identity is now lost to the years, yet this fine

rifle remains. (3B10339-21) {C&R} (2000/3000)

Lot Title/Description

326 Rare Winchester Model 1894 Saddle Ring Carbine 328 Winchester Model 1894 Lever Action Takedown Rifle serial #426886, 38-55, 20" barrel with a bright excellent bore. This is a serial #282082, 32 Winchester Special, 26" octagon barrel with full rare saddle ring Carbine in an extremely fine state of condition, with the magazine and a bright near excellent bore showing a little subtle frosting desirable caliber and rifle-style buttplate combination. The barrel and in the grooves and crisp rifling. The barrel and magazine tube of this magazine tube retain about 98% original blue, the loss due only to some 1905-made rifle retain about 96% original blue showing some scattered very light fading with a bit of light rub wear on the bands. The receiver edge wear, a few small dings and some subtle thinning to pleasant retains about 92% original blue, the loss due to some fading on the belly gray-brown patina under bright light. The action retains perhaps 90% original blue with edge wear and fine flaking to gray-brown patina, the and front left of frame where there is some flaking and wear to pewter. The loading gate retains some lovely pale fire blue with nice fading left side with some light dings and some of the screw holes exhibiting colors on both the lever and the hammer, quite strong on the lever flats circumferential wear. The bolt retains about 98% original bright blue and and the hammer's spine. The smooth walnut rifle-style buttstock rates the loading gate shows brilliant fire blue throughout. The hammer and about excellent with a few very light dings and handling marks here and lever show generous vibrant case-hardened colors throughout, the there, its fit to the metal is precise and is clearly original to the gun. The crescent buttplate with nice smoky gray case-hardening as well and all forend is similar showing a few more dings with much original varnish. markings remain crisp and clear. The smooth walnut buttstock and The rifle style crescent buttplate has strong original case colors with forend remain in very good plus to very fine condition retaining generous some toning to plum at the toe and the top of the tang. The arm is original varnish and very nice fit throughout. The rear right edge of the sighted with its original German silver front sight, carbine ladder style forend shows a thin 1 3/4" drying crack and the stocks show the rear, the saddlering is intact and the mechanism functions well. An expected scattered light dings and handling marks. The stocks appear absolutely stellar example in a desirable caliber and rare configuration. to be Winchester's "extra finish" grade wood commonly seen on special (3B10483-43) {C&R} [Perry White Collection] (3000/5000) order guns that do not otherwise meet "deluxe", the left side butt and Est. 3,000 - 5,000 forend in particular exhibiting some rather subtle but attractive grain 327 Winchester Model 1894 Lever Action Rifle Belonging to Lester Scott of figure. The rifle is equipped with Winchester's 32 Special rear sight and the Phantom Valley Ranch Colorado small German silver blade front and the action seems to function well serial #370216, 30 WCF, 26" octagon barrel with a very good bore which mechanically. An attractive rifle in a desirable configuration. (13B10492-59) {C&R} (2000/3000) shows crisp rifling but slight darkening and some minor frosting in the grooves. This is an honest and well-used rifle yet was well cared-for, Est. 2.000 - 3.000 and shows period carving on both forearm and buttstock. The barrel is 329 Shiloh Rifle Mfg. Model 1874 Sharps Sporter #1 Rifle now primarily a smooth pewter and dark gray patina showing remnants serial #B3693, 40 2 1/2" (40-70), 30" heavy half-round, half-octagon of some light oxidation here and there and some light spots of scattered barrel with a bright, excellent bore. This rifle was custom ordered in pending, primarily near the muzzle. The magazine tube shows some 1992 by the consignor and remains in almost as-new condition with very strong remnants of deep original gray blue and some smoky soot few if any signs of use and wear and only a few light handling marks on residue on the magazine tube ahead of the hanger, perhaps from a the buttstock. Features include a matte blue finish on the barrel, factory campfire or other source. The nose Is faded to a silvery case-hardened case color on the frame and remaining steel parts, a Hartford style patina with the receiver a silver and gunmetal gray showing some trace checkered walnut forearm with pewter forend tip, a checkered walnut blue in the protected areas. The smooth walnut buttstock rates very pistolgrip buttstock with left side cheekrest and a standard shotgun style good and is honest with remnants of original varnish and exposure to checkered steel buttplate, dual set triggers, and a 14 1/4" length of pull the elements from the years. It shows a light drying crack at the toe and from the forward trigger to the butt. The frame has an added silver a few scuff marks there but they add to the honest character. The left buffalo mounted to the right side, constructed from an Indian head nickel side of the butt shows a folky incise-carved horsehead while the right that has been skeletonized. The wood has some exceptional figure that is typical with the quality seen in Shiloh's stock selection. Rifle is sighted shows a small incise-carved flower at the grasping point of the wrist. The most interesting part of the arm is the forearm, which rates very good, with a globe front sight with spirit level, a full-buckhorn rear sight and with darkening wood and the expected handling marks. It shows incise has a factory mounted Montana Arms mid-range vernier sight with carving, clearly very old and from the period of use which reads "L Allen adjustable aperture mounted to the upper tang. The build notes indicate Scott/Phantom Valley Ranch". Lester Scott, or Lester Allen Scott, that the chamber is head spaced for Bertram brass and that the barrel bought the "Hotel de Hardscrable", Camp Wheeler, from its founder weight was configured for NRA match shooting. The rifle is housed is a Squeaky Bob Wheeler in 1926 and named it the Phantom Valley Ranch. lovely, custom made fitted hard case that has a pale green canvas The 160 acre ranch on both sides of the Colorado River was just outside exterior and has leather reinforced corners and accents. The case has a of Grand Lake Colorado and was quite an operation for many years. green felt lining and storage for accessories. Also included is a dossier The resort first gained fame when Teddy Roosevelt stayed there in 1905 of documents from Shiloh including the original build statements, on a hunting expedition, Bob Wheeler or "squeaky Bob" actually having catalog, final check cards and correspondence from Shiloh to the served with Roosevelt and his Rough Riders during the previous owner. This is a lovely #1 Sporter that was purpose-built and would be a top performer in its field. (4A10329-1) {MODERN} Spanish-American war. Lester Scott improved what was ostensibly a tent-camping dude ranch, renovated and enlarged the main lodge and (2000/2500) "Phantom Valley Ranch" was born. "Scotty" said that the name was a Est. 2,000 - 2,500 nod to past inhabitants of the Never Summer Range and in addition to the main lodge, put up cabins for quests where 15 cabins would accommodate 60 quests and 40 horses were stabled. The entertainment included Sunday evening buffets, talks from local Rangers, square dances, there was a children's playground and half and full day trail rides to places such as Lake of the Clouds. Hells Hip Pocket, and Thunder Pass. As the roads and travel improved, there was

a trading post and gas station established and the operation continued into the late 50s when in 1960 the Park Service purchased it and tore everything down in an attempt to re-establish the natural fauna of the region. An honest and interesting 94 rifle from what was touted as the first dude ranch in the western United States. (3B10305-2) (C&R)

The straight grip European walnut buttstock rates excellent with nice checkering, some lovely grain figure, a gold monogram plate along the toeline which is un-engraved and a neatly fitted KickEez recoil pad giving a 14 1/2" length of pull. The checkered forend rates excellent as do the other four forend panels, showing perhaps a light scratch here or there. A very interesting and quality-made arm, it came to us without any Scholberg barrels, however both sets of barrels are from quality makers, the forearm needs a bit of persuasion to seat on the Springer barrels. The arm seems to function properly for the most part, however the upper tube trips each time the gun is open, doubtless needing a bit of professional help. The arm seems in a modern hard sided lockable carry case. Paul Scholberg is a Belgian maker who has made some very fine side-by-side shotguns as well as a side-breaking over-under gun, this is the first example of a
	York label and replaced red felt lining, the interior dividers currently are loose and were not reaffixed post-lining. The gun locks up tightly on face and features automatic safety, double triggers and ejectors, the right ejector needing some mechanical attention as it does not reliably trip, or trips late. While the elder Mr. Schlesinger was a prominent businessman on the boards of many large companies, it would appear as though the younger lad spent his time traveling and very much enjoyed good hunting dogs, doubtless employing this, and other shotguns in his pursuits. A handsome little smallbore that a no doubt saw its time over a brace or more of very good dogs. (3C10327-54) {C&R} (4000/6000)			the rear of the rib and on the barrel bolsters with a simple silver bead front sight. The longer tubes are inlaid in gold "J Holecek" on right of upper tube with "Hradec-Kral" on left of upper tube, sighted with the Bradley front & silver midrib beads. The frame and the sidelocks retain 98-99% what is likely original blue and feature full coverage of tight and open scroll and floral design with foliate designs up the bolsters left and right, the maker name in riband left with Liege in riband right, with nice engraving on the long tang triggerguard. The straight grip European walnut buttstock rates excellent with nice checkering, some lovely grain figure, a gold monogram plate along the toeline which is un-engraved and a neatly fitted KickEez recoil pad giving a 14 1/2" length of pull. 	Caesar Guerini Maxum Impact Sporting Sidelock Over Under Shotgun	347	Parker SC Grade Single Barrel Trap Shotgun
	serial #167918, 12 ga., 32" adjustable ventilated Impact rib Maxischoke		serial #189623, 12 ga, 30" ventilated rib barrel choked modified with a
	barrels with bright excellent bores. The Maxum Impact Sporting is		bright very good plus bore with some pinprick pitting, a spot or two of
	designed to meet the demanding needs of competition shooters as well		light oxidation, and stubborn wad residue near the muzzle. The barrel
	as being highly-configurable to allow for heads-up skeet, sporting clays		retains about 98% professionally reapplied blue, thinning in spots, with
	and trap shooting. The barrels of this as-new dealer-stock shotgun		touch of light wear at the muzzle and a few small spots of light pitting
	retain 99% plus original blue while the balance of metal parts retain all		just above the woodline of the forend on the right side. The frame
	their attractive original coin finish. The monobloc features Guerini's		retains about 97% restored color casehardening showing attractive
	unique damascus finish while the frame, sideplates, triggerguard and		iridescent color throughout with some light wear on high edges, light
	top lever are embellished in almost full coverage with lovely flowing		wear and oxidation staining on the upper tang, and scattered pinprick
	foliate engraving carved in relief with "MAXUM" proudly displayed on the		perhaps light pitting; the upper and lower tangs are proud of the wrist,
	underside of the frame. The checkered Turkish walnut rounded forend		and the triggerguard retains about 50% blue finish with light wear on t
	and Monte Carlo pistolgrip stock with adjustable comb and right hand		edges, turning moderate on the tang, and light oxidation staining on the
	palm swell rate as-new with both displaying fine straight grain so prized		inside of the bow. The frame features excellent C-grade open flowing
	for its strength. The inertial single selective DTS trigger is adjustable for		scroll with background stippled accents, "PARKER BROS" on the left
	over travel, take up and length of pull from 14 3/4"-15 1/8", and features		and right, and a flying pigeon on the belly. The checkered pistolgrip
	two selectable pull weights. The rib is adjustable from 50/50-90/10, the		walnut stock is in very good condition as lightly cleaned with a repaired
	barrels are sighted with a white Bradley-style bead at the muzzle and		1" hairline crack traveling from the lower tang to the left side checkeri
	silver bead mid-rib, the safety is non-automatic and the action appears		on the wrist, an about 3 1/2" repaired hairline crack traveling from the
	to function well mechanically. This stunning competition shotgun		edge of the receiver to the checkering on the wrist with an interruption
	includes the original plastic hard case, various adjustment tools, manual		by the checkering on the stock flat, a short crack at the base of the
	and paperwork, velvet-textured action and barrel sleeves, original box,		forend and another 1 1/4" crack in the side of the stock nose, a few
	combination choke wrench/thread cleaner and the following Maxis		flattened points of checkering, and a later added high gloss finish; the
	Competition extended chokes: modified, light modified, (2) improved		stock shows attractive grain figure and is fit with a Pachmayr ventilate
	cylinder, cylinder, skeet. A fine Italian-produced competition shotgun		recoil pad giving an about 13 7/8" length of pull. The shotgun locks up

355 Caesar Guerini Invictus VII Sporting Sidelock Over Under Shotgun 358 Winchester Model 1892 Lever Action Rifle serial #162167, 12 ga., 32" ventilated Maxischoke barrels with pristine serial #704832, 32 W.C.F., 24" octagon barrel with a very good bore that bores. This as-new dealer-stock sporting shotgun is the top of the has strong rifling with some light pitting along the grooves. The barrel aptly-named Invictus line, Invictus being "unconquerable" in Latin. and magazine tube, the bolt, and the crescent buttplate retain about Designed to be the most durable over under shotgun in the world, the 95-97% original blue that is lightly flaking and toning to brown and has Invictus System changes the way the barrels and action lock together by some light handling and impact marks and a few areas of very light making all the bearing surfaces modular. This modularity, according to pitting. The area around the front sight has some more moderate impact Guerini, extends the life of the shotgun 200-300% thus making its marks, likely due to an errant attempt to adjust or change the front sight. lifetime guarantee somewhat of a formality. The barrels retain 99% plus The receiver and remaining metal parts retain closer to 85-90% blue that original blue, the trigger retains all its gold plating, and the balance of is flaking more heavily to brown and blending with areas of mottled gray parts retain all their handsome coin finish. The frame and borders are and brown patina. The factory markings remain mostly crisp, the embellished with loose foliate scroll offset by punch-dot shading while Winchester proof on the bridge of the receiver is soft along one edge. the sideplates, triggerguard, top lever and bottom of the frame feature The smooth walnut stocks rate very good and have the usual dings and upland game scenes with engraved golden grouse and pheasants in handling marks as seen on a 100 plus year-old sporting rifle. The stocks flight. The beautifully-figured checkered deluxe Turkish walnut pistolgrip show some light added finish with areas of minor to moderate fading stock and forend rate as new with the stock providing a 14 3/4" length of and loss to both the forend and buttstock, but more concentrated to the pull which is adjustable thanks to the sliding DPS trigger system along forearm. The rifle is sighted with a simple front blade and has the with drops of 1 1/2" and 2 1/4" and is 1/8" cast off for a right handed sporting semi-buckhorn rear. Made in 1913 this is a handsome 1892 that has seen some honest use and would likely continue to provide shooter. As this shotgun is built to withstand high volume shooting, its 8 lbs. 11 1/2 oz. weight will help absorb recoil so you can shoot all day. many years of enjoyment for the right shooter or collector. (4A10465-1) {C&R} (2500/3000) The shotgun features an inertial single selective trigger, non-automatic Est. 2,500 - 3,000 safety, white Bradley-style front sight and a silver bead mid-rib and 359 Winchester Model 1894 Lever Action Rifle includes the factory padded hard case, original box, T-handle Allen serial #425618, 32 W.S., 26" octagon barrel with a good to about very wrenches, velvet barrels and action sleeves, manual and paperwork. good bore that has visible rifling that is softening along the edges of the combination choke wrench/thread cleaner and the following Maxis lands and is lightly pitted throughout. The barrel, magazine tube, Competition extended chokes: skeet, cylinder, (2) improved cylinder, light modified and modified. Available only through Caesar Guerini Elite receiver, loading gate, bolt and forend cap retain about 90% original dealers, this is the perfect opportunity to add this top-of-the-line shotgun blue that is flaking and toning to brown, has some light handling marks to your collection, (23C10318-14) {MODERN} (8.000/12.000) and is fading to mottled gray along the edges and bearing surfaces. The Est. 8,000 - 12,000 hammer, trigger, lever, and the crescent steel buttplate are an overall 356 L.C. Smith Specialty Grade Single Barrel Trap Shotgun mottled gray and brown with only slight traces of case coloring still serial #1889-S, 12 ga, 34" ventilated rib barrel choked full, with a bright visible. The smooth walnut stocks rate very good and have added finish near excellent bore with some light frosting ahead of the chamber. The over light dings and other light handling marks seen with sporting rifles barrel retains about 80% original thinning blue with light wear at the of this age. The wood does not appear to have any cracks or major muzzle, light to perhaps more moderate wear along the sides, a few issues save a small divot on the left side of the buttstock. Rifle is sighted scattered minor handling marks, and the barrel is toning lightly to brown; with a two-toned silver tipped blade front and factory .32 Winchester the triggerguard retains 98% bright blue with a few light handling marks Special rear sight. The action appears to function correctly and this is a and specks of oxidation staining. The frame retains about 80% vibrant solid 1908-vintage sporting rifle that has seen honest use but may make case-hardened color with the high edges, edges of the belly, and the a decent shooter. (4A10249-21) {C&R} (2000/3000) upper tang toned to gray and some intermittent light oxidation staining. Est. 2,000 - 3,000 The checkered capped pistolgrip walnut stock and forend are very good 360 Fine Factory Inscribed Winchester Model 1886 Deluxe Lever Action plus to near excellent condition with a few light dings at the end of the Rifle triggerguard tang, some softening of the checkering in spots and two serial #109313, 45-70, 26" part round part octagon barrel with 2/3 small dings on the right side of the wrist. The stock shows attractive magazine and a very good bright bore. This is a completely honest 1886 grain figure traveling up from the toeline, and is fit with a Hawkins 1/2" rifle with many special order features. The most interesting of the special ventilated recoil pad giving an about 14 1/8" length of pull. The frame is features is the factory engraving on the left side of the action "A.J. loose foliate scroll engraved with a setter pointing on the left and a quail Lynch". The rifle also features fancy checkered pistolgrip stocks, part on the right, matching engraving on the triggerguard, forend iron, and octagon barrel, shorter than standard magazine and checkered hard lever, the barrel is marked "L.C. SMITH Specialty TRAP", and the forend rubber shotgun buttplate. The rifle remains in very nice condition with and barrel are numbered to the gun. The shotgun locks up tightly with the barrel and magazine retaining about 95% original blue finish overall. the lever coming to rest right of center, the ejector remains strong, and is The action shows about 60% original color case-hardened finish being sighted with dual white beads. A fine specialty grade single barrel trap stronger on the left side with most loss on right front and belly of action shotgun for the sporting enthusiast. (14B10453-68) {C&R} [Sherwood where someone would grip the gun to carry with one hand. The areas of "Skip" Chapman Collection] (1500/2000) loss have a flaked appearance with a mellow gray patina that blends Est. 1.500 - 2.000 well with the faded color. The bolt shows about 95% original blue while 357 L.C. Smith Ideal Grade Sidelock Double Shotoun the loading gate retains about 60% original blue. The hammer and lever serial #FW181590, 20 ga. 26" London steel barrels choked improved show a good deal of original color case-hardened finish overall. The cylinder and improved modified with bright very good plus bores with a checkered pistolgrip buttstock and forend are of wonderfully figured few scattered light pits near the muzzle of the right bore and some walnut and show crisp checkering with perhaps 95% original finish stubborn wad residue. The barrels and triggerguard retain about 99% remaining with just the normal light handling marks from the years. The lower left tang is stamped with assembly code "1048 XX RB" with the professionally reapplied blue finish with a touch of light wear at the muzzles and traces of previous pinprick pitting beneath the finish. The top tang inlet of the stock showing matching "1048". This is the later frame retains about 75% muted case-hardened color with the grasping style pistolgrip with hard rubber gripcap. The factory records list the rifle area worn to a silvery casehardened patina and scattered gray freckling, as: 45/70, 1/2 octagon, plain trigger, checkered stock, pistol grip, Lyman and is nicely decorated with Ideal grade floral pattern engraving on the jack, 2/3 magazine, shotgun butt, rubber buttplate, engraved on left side sideplates, touches on the frame, triggerguard, and lever. The of receiver "A.J. Lynch", it was received in the warehouse and shipped checkered straight grip walnut stock and splinter-style forend are in near on May 9, 1896. The Lyman "jack" is referring to the front sight which is excellent condition with a few checks in the middle of the butt on the left presently a combination ivory beaded Beach style sight. Winchester side, the upper and lower tangs a hair proud of the stock, and a minor rifles with factory engraved inscriptions are quite scarce. A handsome handling mark or two; the stock and forend display attractive grain figure Winchester Model 1886 deluxe rifle. (1D10483-87) {ANTIQUE} [Perry and the forend features an ebony forend tip, traces of glue appearing at White Collection] (10,000/15,000) its edges. The factory markings on the barrels are clear and legible, the Est. 10,000 - 15,000 "L.C. SMITH" on each sideplate remaining crisp, and the forend and barrels are numbered to the gun. The shotgun locks up tight, the lever comes to rest right of center, and the shotgun features double triggers, a non-automatic safety, extractors, a 13 7/8" length of pull with drops of about 1 1/2" and 2 1/4", and is sighted with dual white beads. A handy 20 ga double shotgun that should still perform well today. (14B10453-45) {C&R} [Sherwood "Skip" Chapman Collection]

367 Desirable U.S. Colt New York Militia Single Action Army Cavalry Model 370 Early Sharps Arms Co. Prototype Falling Block Rifle serial #005, 375 H&H Magnum, 30" round Ackley barrel with a bright Revolver serial #19298, 45 Colt, 7 1/2" barrel with a bright very fine to near near excellent bore. This is one of the first six prototypes assembled at excellent bore showing a few tiny freckles and minor pinprick pits with EMDEKO with Bellmore-Johnson actions, Canjar triggers, Ackley barrels otherwise crisp rifling throughout. This is a handsome revolver and Wysowski Brothers stocks. Originally intended to be showcased at manufactured in 1875 and refurbished by Colt in 1895 that is listed by the National Sporting Goods Association show held in Houston in serial number on page 43 of Colt Cavalry & Artillery Revolvers by Kopec January 1969, only serial #006 was ready in time. The metal surfaces and Fenn as a New York militia gun. The metal surfaces retain about retain about 96-97% original polished blue showing some thinning along 25% period-refurbished Colt bright blue present along the protected the high edges of the lever and a little mild oxidation speckling scattered areas of the barrel and ejector rod housing, triggerguard, top edge of along the barrel. The rifle is unmarked beyond the serial number and the backstrap and some of the cylinder flutes. The balance has toned mostly interior of the breechblock remains brilliant showing nice jeweling. The to a pleasant gunmetal and mild gray-brown patina showing some checkered pistolgrip deluxe walnut buttstock and forend remain in near scattered light handling marks, some sparse pinprick pitting and a very excellent condition retaining about 95% original varnish showing a few small area on the left side of the barrel nearer the breech that shows light dings and some mild handling marks. The checkering remains some subtle old tool marks, missed at first glance and very unobtrusive. strong and the wood shows some lovely grain figure throughout. The The inside protected surface of the hammer shows a patch of vibrant butt is fitted with a Pachmayr black basketweave rubber pad and a fine colors and the loading gate is a pleasant silvery case-hardened patina. condition Redfield 1 3/4-5X Widefield scope is mounted to the barrel. All principal markings remain intact and strong, the single line barrel The action features Canjar adjustable trigger, automatic safety and address with hyphens at either end and the frame with the familiar dual seems to function well mechanically. A fine prototype Sharps Arms Co. patent dates and "U.S." stamp. The underside barrel shows "C / P" rifle. (13B10187-34) {C&R} (3500/5000) proof, the cylinder also with a "C" and "P" and a "C" on the inside frame Est. 3,500 - 5,000 371 Fabulous Caesar Guerini Essex Gold Limited Edition Left Hand Over beneath the hammer and on the triggerguard below serial number. The forward triggerguard screw is a slightly more modern replacement, the Under Shotaun backstrap has been re-numbered in Colt-style font and the loading gate serial #161009, 12 ga., 32" ventilated rib Maxischoke barrels with bright excellent bores. This beautiful shotgun was part of a limited run shows "1379" assembly number. The smooth walnut grip remains in available only through Guerini Elite dealers and is no longer catalogued very good plus to very fine condition showing worn finish, light handling marks and edge wear. There are no evident cartouches on the exterior making it both a stunning sporting arm and a fine collectable. The and the internal ink number appears to be "60 4": the fit is otherwise barrels, triggerguard, top-lever and forend iron of this as-new Essex very nice. Equipped with proper bullseye ejector rod head, the barrel, Gold Sporting retain 99% plus original blue, the jeweled monobloc is cylinder and triggerguard are matching the frame and the action seems bright and the trigger retains all its original gold-coloring. The frame and to function well mechanically with a crisp hammer and solid timing and sideplates display all their vibrant case-hardened colors and together lock-up. A fine example of these low production refurbished revolvers, with the other parts of the action are engraved with gorgeous tight 800 of which were made for New York. (13D10524-14) {ANTIQUE} English scroll complimented by small gold highlights and inlayed rose, (7000/9000) white and yellow gold rosettes. The checkered extra deluxe Turkish Est. 7.000 - 9.000 walnut pistolgrip stock with left-hand palm swell and rounded forend rate Smith & Wesson No. 3 Second Model American Revolver Cut For as-new and are highly-figured with lovely swirled chocolate, toffee and 368 cream tones throughout. The length of pull, thanks to the DTS trigger, is Shoulder Stock serial #15020, 44 S&W American, 8" barrel with a bright excellent bore. adjustable between 14 3/4"-15 1/8" and the stock is cast-on for a This revolver is cut for a shoulder stock with a rectangular hole milled left-handed shooter with drops of 1 3/8" and 2 1/4". The shotgun features a non-automatic safety, single selective trigger, Bradley-style through the top of the backstrap and a single milled cut in the rear of the buttstrap. The butt still retains its lanyard swivel and the serial number, white bead sight at the muzzle and silver bead mid-rib and the action which appears ahead of the swivel, is unobscured and fully legible appears to function well mechanically. Included is the original padded Exactly which type of stock will fit this revolver is not known, most No. 3 hard case, factory box, action and barrels sleeves, manual and American stocks cover the whole butt requiring removal of the swivel. paperwork, assorted adjustment tools, choke wrench/thread cleaner and The gun shows matching serial number on butt and inside of right grip the following six Maxis Competition extended choke tubes: modified, panel. The revolver additionally shows matching assembly number "052' light modified, (2) improved cylinder, cylinder, skeet. This beautiful on right side of gripframe, back of cylinder, rear surface of barrel and as-new dealer-stock limited edition shotgun offers a great opportunity for underside of the barrel latch. The revolver remains in fabulous condition. fine shotgun enthusiasts to own an exclusive left-hand Caesar Guerini. The barrel and frame retain over 90% bright original blue finish overall (23C10318-12) {MODERN} (7000/8000) with loss due to strap thinning and a few small blemishes on the right Est. 7,000 - 8,000 372 Early Sharps Arms Co. Falling Block Rifle side of the frame. The cylinder shows about 70% original blue with loss due mostly to flaking and with those areas showing a pleasing smooth serial #007, 30-06, 30" round, likely Ackley-production, barrel with a brown patina. The hammer and triggerguard show strong original color bright near excellent bore. Evidently the very next rifle to be made after case hardened finish which has just softened slightly over time. The the initial 1969 prototypes numbered 001-006, and arguably a prototype two-piece walnut grips rate excellent with over 80% original oil finish and rifle itself, the metal surfaces retain about 97-98% original high polished with just a couple light handling marks. This is a very interesting. blue showing some scattered light handling marks and a few errant handsome and high condition No. 3 American revolver. (1D10000-22) freckles, the muzzle showing an area of silvering from some sort of {ANTIQUE} [Roy Jinks Family Collection] (4000/6000) solvent. The rifle is unmarked beyond the serial number and is equipped Est. 4,000 - 6,000 with an experimental long lever with rounded tip that has concentric 369 Scarce Smith & Wesson No. 3 Australian Contract Shoulder Stock milled sides. The checkered pistolgrip deluxe walnut buttstock and serial #23297. The hardware retains about 85-90% original nickel finish forend remain in very fine to near excellent condition retaining about showing some scattered fine flaking and mild oxidation staining. The 94% original varnish showing some light dings along the toe line and a lower tang shows proper serial number and broad arrow stamp. The few scattered mild handling marks. The checkering remains strong and walnut stock proper remains in very fine condition retaining strong the wood exhibits wonderful grain figure throughout. The tip of the original oil finish showing a very thin 4 1/4" drying crack along the left forend is plugged where the earlier style long nose screw was once side butt, very thin small drying crack at the toe and some scattered mild affixed, the forend now retained by a single screw along the underside handling marks. The checkered black hard rubber buttplate with S&W and the stock is equipped with a Pachmayr black rubber basketweave monogram remains in very fine condition showing an expertly repaired pad and no cheekpiece. The action is equipped with Canjar trigger, small chip at the toe. (13B9952-8B) (1000/1500) non-automatic safety and seems to function well mechanically. There Est. 1,000 - 1,500 are four vacant drilled and tapped holes along the rear barrel for scope bases and the barrel is otherwise devoid of sights. A fine early example for the modern arms collector. (13B10187-35) {C&R} (3500/5000) Est. 3,500 - 5,000

Lot Title/Description

383 Scarce Smith & Wesson Japanese Contract New Model No. 3 Single 386 Very Fine Winchester Model 1894 Deluxe Lever Action Takedown Rifle serial #524767, 30 WCF, 26" octagon barrel with half magazine and a Action Revolver serial #22900, 44 S&W Russian, 6 1/2" ribbed round barrel with a bright bright excellent bore. The barrel and magazine tube of this lovely excellent bore. This is an interesting revolver that appears to be devoid 1911-made rifle retain about 98% original blue showing just some very of Japanese military stamps but is confirmed by factory letter to have light sharp edge wear and a few subtle marks on the underside from been shipped to Japan, perhaps for purely commercial sale or the taking down. The nosecap, takedown collar and crescent buttplate retain military stamp was simply overlooked. The metal surfaces retain about a similar amount of original bright blue showing just a little scattered mild 92% original nickel finish showing some very fine flaking toning to flaking. The action retains about 95% original bright blue with most of gunmetal and blending in nicely with the nickel, mostly along the sides the loss due to light flaking along the right side forward edge, bottom of the barrel and cylinder, the cylinder also with a few small spots of old forward edge and upper tang, to an attractive gray-brown patina, one minor pitting. There are some light to perhaps moderate dings and very small light ding evident on the lower right edge. There is a little very scratches scattered along the edges of the barrel and frame but most fine speckling along the rear right side action and some scattered very are quite small and unobtrusive. The barrel catch retains about 95% light handling marks that are unobtrusive and all markings remain crisp original bright blue while the hammer retains most of its vibrant and clear. The checkered capped pistolgrip deluxe walnut buttstock and case-hardened colors and the triggerguard is an attractive smoky gray forend remain in excellent condition retaining about 92-94% original case-hardened patina. The sides of the trigger show hints of original varnish showing some light finish loss along the forend and the right straw color and the breech face is almost pristine showing no evidence side butt showing some subtle patterning where it perhaps laid on an old of firing. The black checkered hard rubber grips remain in very good contaminated rag long ago, but it is very unobtrusive, mostly noticeable condition, the left panel with a few light scuffs and the right showing a upon close inspection. The stocks otherwise show just some sparsely repaired 1" chip through the monogram; the right panel is appropriately scattered light handling marks with the varnish exhibiting an attractive scratch-numbered matching. There is what appears to be a social fine craquelure and the fit remaining excellent. The stock shows security number and some other long number scratched on the inside of somewhat subtle but very handsome grain figure along either side of the the grip frame on the left side and the barrel address and patent dates butt and the hard rubber pistolorip cap is excellent. The lower tang shows assembly number and wood grade "10509 X" and the buttplate remain intact and crisp. This example shows a Japanese arsenal-added and end grain of the stock are stamped with matching assembly lanvard ring assembly obscuring some of the serial number which was then re-stamped at the heel. As is commonly seen, the cylinder is number. The rifle is equipped with factory sling eyes, standard sporting mismatched but rather close "23271" and the barrel and latch are rear sight and Lyman ivory bead front. The action seems to function well matching the frame. Barrel-to-frame fit is excellent and the action seems mechanically. An excellent deluxe '94 for the Winchester or American arms collector, (13D10483-46) {C&R} [Perry White Collection] to function well mechanically with solid timing and lock-up. The included factory letter confirms the described features (sans lanyard ring) and (6000/8000) indicates shipment to Takata & Co. of Yokohama, Japan on December Est. 6,000 - 8,000 387 Colt New Service Double Action Revolver 29, 1894. This attractive revolver would make an excellent addition to any advanced Smith & Wesson or Japanese arms collection. serial #321875, 38 WCF, 5 1/2" barrel with a very good bore showing (13C9898-45) {ANTIQUE} (2500/3500) some scattered fine pitting in the grooves and otherwise strong rifling Est. 2.500 - 3.500 throughout. The metal surfaces of this 1924-made revolver retain about Desirable Smith & Wesson Ammunition Box 50% original blue strongest along the sides of the frame with the 384 The marble pattern box with black label and gold colored lettering once balance toned to a mix of gray and plum-brown patina along with some contained 25, No.3 (44/100) rifle cartridges. The box has overall light sparse light pitting, old oxidation staining and handling marks. All scuffing along its edges, spots of flaking along the sides leaving a markings remain intact and strong. The black checkered hard rubber couple of the seams exposed. The right side of the box is missing a grips appear to be un-numbered and remain in very good condition moderate section of the marble covering that has taken a small portion showing some mild overall smoothing, handling marks and a thin 1/2" of the cardboard below with it and otherwise remains structurally sound. chip forming at the heel of the left panel. Timing is just a hair off on a The top label has faded gold lettering that remains clear and legible with couple chambers in single action but this is relatively minor and the a very small section worn at the top. The label reads "Twenty-Five No.3 action otherwise seems to function well mechanically with solid lock-up. or 44/100 / Rifle Cartridges, / Manufactured by Smith & Wesson, This honest Colt has a lot of character and will probably still be a fine Springfield Mass. / for / B. Kittredge & CO. . . . Cincinnati, Ohio. / shooter. (13A10470-28) {C&R} (1000/1500) Patented April 17, 1860" with smaller text along the bottom that reads Est. 1,000 - 1,500 French No. 3 Gaulois Palm Pistol "These Balls are greased to insure accurate shooting. Care should be 388 taken to keep them so. N.B.- None genuine without the signature of serial #13367, 8mm CF, 2 1/4" ribbed round barrel with a fair bore Smith & Wesson upon both ends of the box". This is a fine example of showing oxidation and faint rifling. The metal surfaces of this interesting these early and highly sought-after boxes. (1010001-1AI) [Roy Jinks little Manufrance palm pistol are a relatively even mix of original bright Family Collection] (2000/3000) blue and mild gray-brown patina showing a few areas of old light pitting Est. 2,000 - 3,000 along the high edges. The barrel and frame are embellished in near full 385 Smith & Wesson 455 Hand Ejector Double Action Revolver coverage with a light etched foliate motif and all markings remain intact serial #36740, 455 Webley, 6 1/2" barrel with a bright excellent bore. and crisp. The squeeze bar is similar to the frame retaining some faded The metal surfaces of this revolver retain about 92% original blue with smoky case-hardening and the mottled black and red hard rubber most of the loss due to some scattered fine oxidation staining and backstrap remains in near excellent condition. The peculiar mechanism freckling, thinning along the gripstraps and a small area of tiny dings or appears to be in full working order with strong springs, intact dust cover tool marks on the right side barrel. The hammer shows vibrant and magazine system. A fine example of these interesting French pistols case-hardened colors throughout while the trigger and lanyard ring for the collector of arms curiosa. (13B10470-19) {ANTIQUE} (1000/1500) retain generous colors with some mild freckling. All markings remain crisp and clear and the toe of the base is stamped with a single "(Crown) Est. 1,000 - 1,500 / O", which is no doubt a Canadian inspector stamp. The checkered walnut grips with recessed gold medallions remain in very fine condition showing some scattered light handling marks and the base of the right panel lightly engraved with "A.A.S." The right panel and all other appropriately numbered parts are matching. The chambers are unmolested and remain in their original 455 configuration and the action

seems to function well mechanically with solid timing and lock-up. A handsome example likely purchased by our Canadian allies.

(13B10470-16) {C&R} (1000/1500)

393 Attractive Unsigned Lehigh County Style Fullstock Flintlock Sporting 395 As-New Syren Tempio Trap Shotgun Two Barrel Set by Caesar Guerini Rifle with Desirable Wooden Patchbox serial #164452, 12 ga., 30" over under ventilated Maxischoke barrels .58 cal, 40 3/4" octagon barrel with a mostly bright very good bore and 32" unsingle ventilated rib Maxischoke barrel all with bright excellent showing some light oxidation and pitting in the grooves with otherwise bores. The barrels of this new dealer-stock trap combination set retain strong rifling, strangely the muzzle has been slightly counter-bored for 99% plus original blue, the single non-selective trigger retains all its about 3". This rifle has been neatly reconverted to flint utilizing a proper original gold coloring and the balance of metal surfaces retain all their antique "LONDON /WARRANTED" lockplate, the touchhole exhibiting a factory coin finish. The sides of the frame are decorated with bouquets slight halo with some tiny dings and pits evident. The arm is otherwise of gold roses surrounded by tight filigree scroll that also grace the forend quite attractive in the classic Lehigh form, the barrel showing strong iron, triggerguard and top lever. The checkered deluxe Turkish walnut antique plum-brown finish throughout with a little bit of fine pinprick Monte Carlo pistolgrip stock with four-way adjustable comb and right pitting and mild oxidation staining. The lockplate is a mottled gray tone, hand palm swell and the finger-grooved forend rate as-new; the stock is the frizzen bridled with an old repair and some of the screws more cast-off for a right handed person. This competition trap gun is designed modern replacements, thin gaps also present around its inletting. The for smaller-statured shooters and as such the pistolgrip is smaller, the stock features brass hardware consisting of a generous nosecap, dual length of pull is adjustable between 13 7/8"-14 1/8", the pitch of the faceted thimbles with faceted tailpipe, triggerguard with small spur at the stock was increased and both the comb and rib are adjustable. The rear, buttplate with toe plate and solid sideplate. The brass has mostly trigger is adjustable for take-up and over-travel, the safety is toned to a mild ocher patina showing some scattered old dings and light non-automatic, the barrels are sighted with white Bradley-style sights at handling marks. The cherry stock is very attractive showing a nice patina the muzzles and silver beads mid-rib and the action appears to function and some darkened areas around the edges retaining much of an well mechanically. Included is the original plastic hard case with room for antique varnish that shows areas of fine craquelure. There are some old both sets of barrels, stock adjustment tools, choke wrench/thread thin repairs around the triggerguard that are easily missed at first glance cleaner, manual and paperwork, the factory box, velvet sleeves for both sets of barrels and the action and the following Maxischoke Competition and the stock shows a few thin drying cracks and the expected light dings scattered about. The left-side butt features a scant rectangular Extended tubes: full, light full, improved modified, modified, light cheekpiece, the edges remaining quite good, and the sliding wooden modified. This full-featured shotgun's Dynamic Tuning System is patchbox cover is secured with a small spring tab. A simple antique designed to tailor the gun to the shooter's individual style and with its hickory ramrod is present and the rifle is sighted with a rather blocky fine two sets of barrels is ready for any number of trap shooting scenarios. v-notch rear sight and scant brass blade front. There is some slight play (23C10318-32) {MODERN} (8,000/10,000) in the lock fit and the action otherwise seems to function normally. A fine Est. 8.000 - 10.000 396 As-New Caesar Guerini Summit Sporting Over Under Shotgun rifle that has seen a little bit of work in more modern times otherwise maintaining a very attractive appearance overall. (13C10466-18) serial #168502, 12 ga., 30" ventilated rib Maxischoke barrels with bright {ANTIQUE} (3000/5000) excellent bores. The barrels of this as-new dealer-stock shotgun retain Est. 3,000 - 5,000 99% plus original blue while the trigger retains all its original gold plate. 394 Pennsylvania Flintlock Fullstock Long Rifle by C. Gumpf The boxlock frame, triggerguard, and top lever retain all their original .52 cal, 44 1/8" octagon barrel with an oxidized bore. This attractive long coin finish and feature attractive wedges of foliate scroll neo-modern rifle has been neatly reconverted to flint utilizing an antique lockplate by engraving with punch dot shading and gold-filled "CÆSAR GUERINI" on Drepert; the frizzen, frizzen spring and lock screws being more modern each side. The monobloc displays Guerini's unique damascus replacements. The barrel is a nice dark plum-brown patina showing old engraving. The beautiful checkered European walnut pistolgrip stock fine pitting and remnants of oxidation staining its full-length with a with right hand palm swell and adjustable comb along with the graceful scattering of tiny dings and tool marks around the touch hole area. The schnabel forend rate as-new and both display attractive grain figure with top barrel flat shows some light wavy line embellishments and Gumpf's the stock providing 1/8" cast-off for a right handed shooter and the DTS name in script has softened a bit but remains mostly legible. The top jaw trigger is adjustable for a 14 3/4"-15 1/8" length of pull. The single and jaw screw also appear to be replacements and the cock itself is selective trigger is inertial, the selective safety is non-automatic, the somewhat loose but appears to be original to the lockplate, slight gaps barrels are sighted with a white bead at the muzzle and silver bead evident in the lockplate fit. The rifle is fitted with both brass and silver mid-rib and the action of this robust shotgun appears to function well hardware, the brass components consisting of the nosecap, two ramrod mechanically. Included is the original plastic hard case, velvet-textured thimbles, tailpipe, decorative plate on underside forend, triggerguard, barrels and action bags, manual and paperwork, adjustment tools, fancy pierced patchbox, buttplate with heel and toe plates, and choke wrench/thread cleaner, original box and the following six Maxis sideplate. Some of the brass shows evidence of an old cleaning with Competition extended choke tubes: skeet, cylinder, (2) improved scattered light handling marks and toning to a mild ocher patina. One cylinder, light modified and modified. Per the manufacturer, the Summit Sporting is purpose built for high-round-count competition shooting and patchbox screw is a replacement and the toe plate is bent out somewhat at the toe. The barrel is secured with four wedges, each supported by a in the unlikely event that they wear out, the trunnions and locking lugs pair of handsome silver crescent moon escutcheons that have toned to can be easily replaced. (23B10318-20) {MODERN} (3000/5000) a pleasant mild patina. There is a pair of geometric silver inlays flanking Est. 3,000 - 5,000 the wrist and an unengraved monogram plate atop the wrist, also of 397 As-New Caesar Guerini Summit Impact Over Under Competition silver, and finally a slightly larger German silver crescent moon set into Shotgun serial #169628, 12 ga., 30" adjustable ventilated Impact rib Maxischoke the cheekpiece. The fancy curly maple stock rates good to about very good showing a number of older repairs, namely to a break in the wrist, barrels with pristine bores. The Summit Impact is designed to be the some chips around the upper tang and some moderate cracks near the most versatile clay target gun in the world with all the critical tailpipe, all of these repairs being competently executed and most specifications adjustable to the user's preferences including: noticeable only upon close inspection. There is a drving crack at the left point-of-impact, overall weight, stock fit, trigger system, recoil side toe and some other expected light dings. The stock otherwise characteristics and balance. The metal surfaces retain 99% plus original maintains a very attractive appearance featuring a scant shallow comb blue and gloss black enamel finishes while the trigger retains all its and left-side cheekpiece with wonderful tiger stripe grain figure its full original gold coloring. The robust boxlock frame features a gold-filled length. A simple hickory ramrod is present and the rifle is equipped with "SUMMIT" on the bottom and maker's name on the sides and is fixed sporting rear sight, scant silver blade front and double set triggers. embellished with tasteful wedges of foliate scroll engraving while the The set triggers are functional and, although the lock is not crisp, it sides of the monobloc display a unique damascus pattern. The remains functional. Still a very handsome long rifle that measures just highly-figured checkered deluxe Turkish walnut Monte Carlo pistolgrip shy of 60" overall and would be perfect over the mantel. Gumpf and stock with right hand palm swell and adjustable comb height and forend Drepert were both active in Lancaster from the late 1700's into the mid of this dealer-stock shotgun rate-as new. The inertial single selective 1800's. (13B10531-2) {ANTIQUE} (1800/2200) DTS trigger is adjustable for length of pull, take up, over travel, and Est. 1,800 - 2,200 features two selectable pull weights. The safety is non-automatic, the barrels are sighted with white and silver beads and the action appears to function well mechanically. Included are the following six Maxis Competition extended chokes: skeet, cylinder, (2) improved cylinder, light modified, modified. Also included is the original plastic hard case, choke wrench/thread cleaner, t-handle adjustment tools, velvet-textured action and barrel sleeves, manual and paperwork and original box. A beautiful and versatile shotgun purpose-built to meet the demands of the world's best competition shooters. (23B10318-29) {MODERN} (4000/6000) Est. 4,000 - 6,000

404	New York Percussion Halfstock Sporting Rifle by Morgan James	407	Cased Remington-Beals First Model Percussion Pocket Revolver
	.38 cal, 33" octagon barrel turned for starter with a bright very fine bore		serial #229, .31 cal, 3" octagon barrel with a partially bright very good
	showing a little scattered mild oxidation and otherwise crisp rifling. The		bore showing some scattered small areas of old oxidation and otherwise
	barrel of this rifle retains about 90% of a dark antique plum-brown finish		strong rifling throughout. The metal surfaces of this "fourth issue"
	showing some silvering along the high edges, light handling marks and		revolver have mostly toned to a mottled gray patina, some areas a
	some old minor pitting near the breech. The barrel marking is a little soft		darker blue-gray tone, showing one or two tiny pits and a few light
	but legible "M. JAMES / UTICA.N.Y." The breech has a simple drum and		handling marks scattered about. The hammer is a smoky gray patina
	nipple and the commercial lockplate shows attractive smoky		while the German silver cone front sight and triggerguard are a pleasant
	case-hardened colors throughout, embellished with some light foliate		mellow pewter. The Beals patent information along the barrel and
	scrollwork and the hammer spur showing some old light pitting. The		Remingtons Ilion address along the topstrap remain completely intact
	inside of the lockplate is marked "B.F.A. Co." The forward ramrod		and strong. The smooth black gutta-percha grip remains in excellent
	thimble has been lost to the years and the rifle features a pewter		condition and is clearly stamp-numbered matching along the base, the
	nosecap, German silver wedge escutcheons, brass triggerguard,		bottom also showing some painted collection inventory numbers "1'-4 /
	buttplate, toe plate and lobed lock screw escutcheon. The smooth		14". The action times and the cylinder locks up well though the hammer
	walnut stock has no cheekpiece and remains in about very fine condition		does not hold at full cock. The original mahogany case remains in very
	as lightly refinished showing a few scattered very thin drying cracks and		fine condition retaining most of its exterior varnish and showing a few
	some other light handling marks. The sides of the butt show some subtle		thin drying cracks and some slight warping along one corner of the lid.
	attractive grain figure, there is a vacant hole at the upper tang for		The interior is lined in green baize that shows some very mild staining
	mounting a sight and the sporting rear sight and brass blade front are		and scuffing and holds some nice period accessories including a fine
	intact. A simple replacement antique ramrod and an antique brass ball		correct Remingtons Ilion address-marked eagle powder flask that shows
	starter with wooden cover are included and the lock remains functional.		moderate tarnishing and some oxidation along the spring, an unmarked
	An attractive, if rather spartan, percussion sporting rifle. (13A9670-78)		dual cavity bullet mould with round ball and conical cavities that has
	{ANTIQUE} [David & Lore Squier Collection] (1000/1500)		toned to gunmetal, nearly empty tin of UMC percussion caps retaining a

Title/Description Lot

410	Durand John Dishu & Company Deet Quality Sidelaal Double Figeter
410	Rugged John Rigby & Company Best Quality Sidelock Double Ejector
	Rifle Stocked by Master Stockmaker Monty Kennedy
	serial #17729, .470 express (3 1/2"), 25 1/2" barrels with bright excellent
	bores. This is a very handsome John Rigby sidelock double rifle,
	restocked by none other than master stockmaker Monty Kennedy whose work needs no introduction here. The barrels retain 98% excellent
	London-quality re-blacking, with the hand file-cut rib reading "John Rigby
	& Co. 46 Sackville St., London" with each tube engraved in turn "Special
	470 Bore Big Game Rifle" and "For Special Cordite Cartridges Bullet 500
	Grs". There are light bands of engraving at the breeches with light scroll
	around the rib extension which engages the Rigby-Bissell rising bite
	fastener. The frame and lockplates show overall tight English scroll and
	borderline engraving in full coverage with chiseled fences showing nice
	acanthus leaf flares onto top of action. Each plate is maker-engraved
	"Jno Rigby & Co." and there remains perhaps 60% original color
	case-hardening which is a lovely mottled blue and gray patina, the
	colors sharpest on each of the side plates and on the triggerplate. "Safe"
	is inlaid in gold and the safety features Rigby's spring-actuated locking
	device, the small square detent must be depressed before sliding the
	safety forward. The water table shows Rigby's intertwined "R" trademark, the standing breech with bushed pins and the barrel flats are
	Nitro proved with a 75 grain cordite, 500 grain bullet maximum load, also
	showing the dual Rigby "R" trademark. The arm is stocked Monte Carlo
	style in a beautiful piece of Circassian walnut by master stock maker
	and author Monty Kennedy. It features a nice rosewood pistolgrip cap
	with relief-carved diamond, the borderless checkered panels left and
	right are flawless and there is a flared left side shadowline cheekpiece.
	The semi-beavertail style forend shows some lovely grain figure as well
	and shows borderless checkered panels left and right with an inlaid
	German silver diamond ahead of the Rigby patent forend release, an
	oval plate along the toeline at the butt; the forend is neatly stamped
	"Kennedy/55" within, with his intertwining "MK". Both rate excellent to
	near-new and the length of pull to the hardened leather covered 1" recoil
	pad is 14 5/8", the addition of a nice leather covered rounded English
	style pad would be most welcome. Sighted with a hooded brass bead
	front with flip-up lowlight white bead, two leaf express rear regulated for
	150 and 300 yards and a nice flip-up aperture sight at the rearmost
	portion of the rib just ahead of the extension. The barrels do show some
	sparse very light freckles of surface oxidation but they are sparse and
	very unobtrusive. The arm locks up tightly on-face with the top lever just
	right of center and seems to function well mechanically. The rifle rides in
	a nice quality leather luggage case with the John Rigby & Co. makers
	label on the interior which shows like foxing. It has a re-lined burgundy-colored interior, the face of the case marked "Made in
	England", it is lockable and the key is present, the carry handle however
	is detached, it likely could be rectified by a competent saddler. An
	extremely fine British double ejector rifle weighing in at 11 lbs even,
	suitable for the most dangerous game, neatly restocked by one of the
	pioneers in the field, here on these shores. (3F10237-2) {C&R}
	(20,000/35,000)
	Est. 20,000 - 35,000

411	serial #4996, 8x57J, 24" octagon barrel with a partially bright about good bore showing somewhat worn rifling and light pitting along the grooves.
	This is a very handsome Haenel rifle built on the "Commission rifle" action utilizing the enbloc clip and equipped with the magazine cover
	plate with integrated clip ejector. The barrel has mostly toned to a
	pleasant gray-brown patina showing some scattered light handling
	marks and old mild oxidation staining or freckling, the top flat being
	neatly maker-marked. The action is similar showing some generous
	attractive silvery case-hardened patina throughout along with some strong colors in the protected areas. The triggerguard and magazine
	assembly are a relatively even mix of original blue and plum-brown
	patina and the bolt with turned-down checkered butterknife handle is
	mostly bright showing some fine oxidation staining. The left side of the
	action shows "2,75g GBP" and the back surface of the wide cocking
	piece shows a "DRGMS / No. 17652" patent marking. The top rear surface of the bolt shows lovely fine matting and the bolt release shows
	strong original bright blue and features an integral mounting point for a period sight. The walnut stock is in classic Germanic styling featuring
	checkered round knob pistolgrip, Oberndorf side panels, schnabel tip
	and nicely shaped left-side cheekpiece. The stock remains in very fine condition as very lightly and carefully cleaned long ago perhaps with a touch of old added finish showing the expected scattered light dings and
	handling marks. The checkering remains mostly intact and there is a
	small vacant hole ahead of the toe. The rifle is equipped with smooth
	steel buttplate and sighted with a standing v-notch rear sight with single
	flip-up leaf and plain bead on a smooth ramp front. The magazine assembly is numbered "9062" and the bolt is matching the barrel and
	receiver. Equipped with single traditional trigger, the extractor is missing
	though the action otherwise seems to function well mechanically. A
	classic German sporting rifle from this prolific maker. (13A10216-26)
	{ANTIQUE} (700/900) Est. 700 - 900
412	Walther PPK Semi-Auto Pistol with Police Markings
	serial #337387k, 32 ACP, 3 1/4" barrel with a bright excellent bore. The
	metal surfaces of this pistol retain about 92% original bright blue with most of the loss due to some muzzle wear and light handling marks
	scattered along the slide, the left side muzzle also with a few tiny
	pinprick pits that are unobtrusive. All markings remain crisp and clear
	showing "(Eagle) / N" commercial proof marks and "(Eagle) c" police
	property stamp. The original checkered mottled brown synthetic grip with
	Walther banners remains in very fine condition showing just a couple of
	very tiny cracks forming and the typical mild warping along the top edges, otherwise it is in well above-average condition. One original flush
	edges, otherwise it is in well above-average condition. One original flush base magazine is included, the slide is matching the frame and the action seems to function well mechanically. A very fine example of these

414	German P.08 Luger Pistol by Mauser	417	U.S. Model 1871 Ward Burton Bolt Action Rifle by Springfield Armory
	÷ ,		
	serial #3421o, 9mm, 4" barrel with a very good bore with light oxidation		50 CF, 32 5/8" barrel with a bright excellent bore. The in-the-white
	but strong rifling throughout. The metal surfaces retain about 85-90%		surfaces of the barrel remain partially bright around the muzzle and
	arsenal quality reapplied blue finish with thinning on the frame and in		woodline with the majority toned to gray-brown patina showing some
	spots on the upper assembly, light wear on the high edges and contact		remnants of old minor oxidation staining. The barrel bands and
			÷
	points, and some scattered light oxidation staining. The ejector has		triggerguard are similar to the barrel and the action and bolt handle
	toned to plum and the trigger shows strong remnants of straw color with		retain about 95% original attractive dark gray oil-quenched
	scattered spots of oxidation staining. The checkered walnut grips are in		case-hardening, the knob and two small areas along the action showing
	very good plus condition with a few broken points of checkering,		old oxidation. The bolt body is a gray-brown patina retaining strong
	primarily along the left panel, and the grips are unnumbered. The "S/42"		Ward Burton patent marks and the left side action retains nice arsenal
	coding and "1939" date remain crisp, the "(eagle) / 63" waffenamts and		markings with 1871 date. The smooth walnut stock remains in very good
	firing proofs on the right side are softened but still legible, the sideplate		plus to perhaps very fine condition retaining strong original oil finish with
	and trigger are numbered to a different pistol, and all remaining		some scattered light dings and handling marks, a few a bit more
	numbered parts are matching to the pistol, including the grooved firing		noticeable along the right side forend. The stock retains very good
	pin. The action appears to function well mechanically. Included is an		cartouches with one behind the triggerguard and two on the left side that
	aluminum base blued magazine numbered to a different pistol, and a		exhibit a little mild softening but remain completely legible. All original
	period altered leather holster. A solid pistol for the martial collector.		hardware is intact and the action seems to function well mechanically.
	(14A10484-17) {C&R} (1000/1500)		About 1000 of these interesting rifles were produced, and this remains a
	Est. 1,000 - 1,500		nice example for the U.S. martial collector. (13C10483-210) {ANTIQUE}
415	U.S. Colt Single Action Army Cavalry Model Revolver		[Perry White Collection] (2000/4000)
415			
	serial #119563, 45 Colt, 7 1/2" barrel with an about very good bore		Est. 2,000 - 4,000
	which shows strong rifling and bright spots with pitting its full length. This	418	Rare U.S. Model 1871 Ward Burton Bolt Action Carbine by Springfield
	is a very honest and mechanically crisp David Clark-inspected revolver		Armory
	that retains good markings and some smoky condition. The barrel has		
			50 CF, 22" barrel with a mostly bright very fine bore showing some
	toned primarily to a warm plum brown with original blue in the protected		scattered very light pitting and oxidation with otherwise strong rifling
	areas surrounding the front sight and at the root of the ejector rod		throughout. The metal surfaces of this carbine are mostly a pewter
	housing. The left side and muzzle show some very light pinprick pitting		gunmetal patina showing evidence of a very old light cleaning, the barrel
	but the markings all remain crisp. The cylinder is an overall plum and		with some areas of light oxidation staining nearer the muzzle, along with
	pewter with some light pinprick pitting at its leading edge and within the		some sparse remnants of minor pinprick pitting. All markings remain
	flutes, the chambers actually retaining some good original blue. The		unmolested and strong showing Ward Burton patent information along
	frame has toned to a plum and silvery speckled case-hardened patina		the top of the bolt and arsenal markings and 1871 date along the left
	with generous trace colors in the sighting groove and the deeper		side action. There are also three partially struck letters "WOG" along the
	pinched areas of the frame; the right of topstrap shows remnants of		left rear of action. The smooth walnut stock remains in very good
	some light pinprick pitting which was cleaned, now showing some light		condition showing remnants of oil finish, scattered light dings and
	scratches. The hammer shows some colors on its spine and a few of the		handling marks. There are a few abrasions mostly along the left side
	-		
	screw heads show some nice fire blue. The straps as well have toned to		that are perhaps more moderate and the inspector cartouches remain
	a gray and plum with some trace colors on the butt and in the root of the		partially visible. A small "43" is stamped at the heel along with "W.O.G."
	triggerguard. The one piece walnut grip shows a bit of a light cleaning		stamped again at the left side butt, perhaps some sort of inventory or
	with some scratches and light dings along the sharp edges of the butt,		property marking. All proper hardware is intact and the action seems to
	the Clark right side cartouche still visible, the left-side Butler marking is		function well mechanically. A little over 300 of these carbines were
	faded but still present, the left sharp edge with two "kill" notches cut. The		produced. While arguably quite advanced over their existing
	ink pen marking on the interior is faint and largely unreadable, the last		competition, they were not well-received by the trials boards. This
	number "3" can indeed be made out and it is likely original to the gun.		example appears to have seen some honest use and would make a nice

Lot Title/Description

462 Japanese Tanegashima Matchlock Musket with Fine Silver Inlay 464 Remington Rolling Block No. 1 Long Range Creedmoor Rifle .55 cal, 41 7/8" barrel with cannon belled muzzle and an oxidized bore serial #4819, 44-90 Remington Special, 34 1/2" round barrel with This is a lovely tanegashima no doubt constructed for somebody of high unusual semi-scalloped octagonal breech and a bright near excellent social standing and features some lovely silver inlays along the barrel. bore. The barrel of this Grade A rifle retains about 65% original blue The barrel has mostly toned to an attractive deep plum-brown patina showing overall thinning and toning to mild gray-brown patina, a few showing some scattered remnants of old oxidation staining. The small areas of light pitting that show fine scratches, and an area of light octagonal cannon belled muzzle is accented with silver wedding band pitting on the left side above the nosecap. The top breech flat shows and teardrop inlays along the edges. Behind the front band there is a strong E. Remington & Sons address and the underside barrel shows mythical phoenix (hou-ou) and on either side of the rear band there is a "44S" cartridge designation. The action retains generous strong fine mountainous scene with another phoenix amidst maple branches. case-hardened colors throughout with a little pinprick pitting on the left Finally there is what is very likely a familial kamon emblem behind the side and some sparse old oxidation staining overall, otherwise mostly rear sight; all of these silver inlays have taken on a wonderful dark muting to a nice silvery patina. The steel schnabel and flat buttplate tarnish and there is just one small strip missing through the rearmost have likewise toned to a mix of smoky gray and silvery case-hardened mountain. There are a few more silver inlays along the stock consisting patina. The small action parts retain strong bright fire blue thinning to of cherry blossoms, chrysanthemums and a monogram plate at the toe mild gray. The checkered pistolgrip walnut buttstock and smooth forend no doubt engraved with an individual's name. The remaining brass remain in near excellent condition retaining strong oil finish and showing hardware has taken on a pleasant mild ocher patina overall, some of the some scattered small dings and handling marks and retaining excellent chrysanthemum inlays with somewhat softened details and there is a fit. The horn pistolgrip insert is intact, the attractive diamond point tiger inlay on the right side butt that also shows some softened details checkering remains mostly strong and the butt shows some attractive and is somewhat loose, as six of its pins are missing. There are a couple grain figure particularly throughout the left side. The rifle is sighted with of other tiny inlays and small pins missing, and the rear barrel band is factory Vernier tang sight graduated from 0 to 3 and windgauge front sight with spirit level and matching assembly numbers. The serialized broken, but these are relatively minor apologies. The hardwood stock remains in very fine condition showing some thin drying cracks along the parts are matching the frame and the action seems to function well butt and edges of the forend, the forend also with some slivers missing mechanically. This rifle is pictured and described on page 165 of Marcot's Remington Rolling Block Rifle book, with special mention of the along the edges, one more noticeable along the right side that shows a period repair. The original wooden ramrod is present, the pan cover has octagonal breech. An interesting example of these fine long range been lost to the years and the mainspring is very weak though the cock Rollina Block rifles for the Remington collector. (13D9670-160) does hold. This is a wonderful example of these interesting Japanese {ANTIQUE} [David & Lore Squier Collection] (4000/6000) muskets for the advanced antique arms collector, (139670-590) Est 4 000 - 6 000 465 Henry Deringer Percussion Pocket Pistol {ANTIQUE} [David & Lore Squier Collection] (2000/3000) Est. 2,000 - 3,000 .44 cal, 2 3/4" barrel with a very fine bore showing some light oxidation 463 Early Remington No. 1 Round Top Rolling Block Sporting Rifle and strong rifling throughout. The barrel of this pistol retains about 95% serial #1387, 38 RF Extra Long, 26" octagon barrel with a bright very of a nice older restored brilliant fire blue finish showing some high edge fine bore showing a little mild oxidation and some sparsely scattered pits wear and some errant freckles. There are dual gold bands at the breech with otherwise crisp rifling throughout. This is an interesting early series with a light zigzag border and the markings remaining quite strong with 1870 rifle equipped with a rather short barrel, factory sling swivels and "DERINGER / PHILADELA" and "P" proof. The back action lockplate has single set trigger. The barrel retains perhaps 60-70% original blue, been nickel-plated retaining almost all of its finish showing a few faint appearing stronger under ambient light, that is toning overall to a buff marks under the finish and light handling marks, the foliate scroll pleasant plum-brown patina, also with remnants of moderate oxidation embellishments and maker markings otherwise very strong. The trigger staining or freckling and a small ding at the left edge at the muzzle. The and buttcap cover show fading fire blue and the buttcap itself is German rear sight retains good flaking bright blue and the barrel is marked "38" silver. The remaining hardware shows a handsome tarnished silver on the underside with matching serial number beneath the forend. The finish including the petit nosecap, fancy foliate wedge escutcheons, action retains about 85% original case-hardened colors, quite vibrant triggerguard with pineapple finial, splash plate beneath bolster, throughout, with toning to gray and showing some moderate gray-brown un-engraved shield monogram plate atop the wrist and nice foliate lock speckling along the sides. The small action parts show lovely brilliant fire screw escutcheon. All embellishments along the silver hardware remain blue throughout and the action is marked only along the upper tang with excellent and crisp. The checkered walnut stock remains in very fine Remingtons Ilion address and two patent dates. The smooth walnut condition retaining about 95% original varnish showing a small drying buttstock and forend with steel schnabel remain in very fine condition crack above the left wedge escutcheon and some scattered light retaining most of their original varnish showing the scattered light dings handling marks, the checkering remaining quite crisp overall. The and mild abrasions that come from honest use. There are a couple very original sights are intact, the hammer exhibits a little bit of play but the tine drying cracks at the tangs that are unobtrusive and the buttstock lock otherwise seems to function well mechanically. An attractive exhibits some attractive grain figure throughout. The rifle is sighted with example of these iconic pocket pistols. (13B9670-494) {ANTIQUE} Remington's combination rear sporting sight and Beach front sight (the [David & Lore Squier Collection] (1200/1800) globe having broken off) and the action seems to function well Est. 1,200 - 1,800 466 German Navy 1914 Variation Luger Pistol by DWM mechanically. This rifle is also pictured and described on page 40 of Marcot's Remington Rolling Block Rifles book. A very attractive and serial #1727, 9mm, 6" barrel with a very good bore showing some fine seldom seen Remington sporting rifle with some interesting features for pinprick pitting and frosting in the grooves with otherwise strong rifling the advanced collector. (13C9670-159) {ANTIQUE} [David & Lore throughout. This desirable 1917-dated pistol unfortunately has some Squier Collection1 (2000/4000) extensive damage along the right rear receiver, perhaps from an Est 2 000 - 4 000 overloaded cartridge. The last 1 1/8" section of the right rear ear of the receiver has broken off completely though the piece is still present. retained by the rear toggle pin which is itself a replacement (likely the original pin broke as well). The pistol is otherwise quite nice retaining about 90% plus original blue showing some moderate high edge wear with the gripstraps thinning to gray and some mild brown oxidation speckles along some of the edges. The small parts retain very good straw color with typical thinning to gray and the sear spring and middle toggle pin retain nice fire blue. All markings remain intact and strong showing 1917 date along the receiver ring, left edge frame and front sight base and proper "(Crown) / M" naval inspector stamps. The checkered walnut grips are un-numbered and appear to be unmarked on their interiors otherwise rating very fine showing just a few lightly chipped points and minor handling marks. The original sights are intact and the firing pin is un-numbered and its tip has been ground off. The remaining numbered parts are matching and the pistol includes one unmarked bright-bodied concentric circle wood base magazine that retains about 85% original nickel finish flaking to gray-brown patina. Under no circumstances should this pistol be made to fire in its current state. Cosmetically still a quite attractive example of these rare naval pistols that would make a fine display gun. It is absolutely as-new and unfired retaining all of its beautiful deep rich blue and vibrant color case-hardened finishes. The one-piece walnut grip is as-new. These lovely modern recreations of the Colt classic feature a blackpowder frame with screw retaining the base pin, bull's-eye ejector rod and longleaf elevation adjustable rear sight within the topstrap. This example is absolutely as-new and unfired since leaving Connecticut, the forcing cone is brilliant, there are no flash marks on the face of the cylinder and the face of the recoil shield is immaculate. Normally found with the U.S. Firearms Manufacturing barrel address, this example reads "Colts PT. F. A. MFG Co Hartford CT USA" and is a facsimile of the actual Colt barrel address, no doubt made on special order for a friend of the factory or of Mr. Donnelly's. The case-hardening on the right side of the hammer is slightly splotchy, looking as though it did not completely "take" but the gun is completely as-new, un-turned, un-fired since leaving the blue dome. A very scarce, very lovely example overall. (3B10450-2) (MODERN) (2000/4000)
	mix of pewter gunmetal and mild gray-brown patina showing a few small areas of old minor oxidation staining and handling marks retaining fine attractive Wootz pattern throughout. There are gold bands at the breeches with maker's name inlaid in gold "JOH. / PASLER / IN / PILSEN". The frame and back action lockplates are mostly a nice pewter patina showing some scattered light handling marks and show extensive embellishments with contrasting gold and silver filigree inlays and Germanic style foliate engraving. The right side frame shows a pair of game birds, the lockplate with a hunting dog, while the left side shows a hare on the frame and lockplate with a fox. There is a gold-inlaid "W" along the upper tang and the action features graceful swirling percussion-style cap deflectors and high spur hammers. The horn underlever and fancy finger rest remain in fine condition, the underlever with some moderate insect damage along the left edge and the finger rest near excellent. The walnut buttstock and forend remain in very good plus condition showing an old semi-gloss varnish with a few small very nicely repaired chips, a few cracks at the upper tang, the most noticeable a 1" u-shaped crack to the left, and light handling marks. The buttstock features a generous left-side cheekpiece and fine Germanic foliate carving with dogs head integrated into the left and right wrist and		Company under the blue dome used. The stock features the rosewood forend tip and gripcap, swivel studs, and has a factory ventilated recoil pad. There are no provisions for sights but included is a one-piece Redfield mount with a set of 1" rings. An excellent South Gate, CA vintage rifle that is in a very desirable Weatherby caliber.	481	crosshair reticle and has clear optics. This is an excellent condition example that is chambered in the 224 Weatherby cartridge, a rare offering for this model. (4A10496-1) {MODERN} (1800/2200) Est. 1,800 - 2,200 Winchester Model 1895 Lever Action Carbine serial #398059, 30-06, 22" nickel steel barrel with a near excellent, lightly frosted bore. The barrel retains about 85% original blue that is toning to brown and has some light wear along the sides toward the muzzle and some light specks of oxidation and handling marks throughout. The remaining metal surfaces retain about 50-60% origins blue the balance being a mottled gray with some areas of oxidation staining. Some of the screws have minor oxidation and moderate pitting at th heel. The buttplate features sliding trapdoor and contains a pull-throug cleaning tool. The walnut stocks rate very good and have a satin oil finish and some small dings and light handling marks. The buttstock h a few light, non-structural drying cracks toward the butt on the left side as well as a small abrasion near the comb. The wood remains slightly proud of the metal, but finish appears to have been added at some point. The carbine is equipped with a correct Lyman brass bead front sight and has the correct 50A factory carbine stepped rear sight. The saddle ring also remains intact and this carbine appears to be otherwin

489	Excellent Swiss K31 Bolt Action Target Rifle by Bern serial #596145, 7.5 Swiss, 25 1/2" barrel with a bright excellent bore. The metal surfaces of this handsome rifle retain about 99% arsenal-refurbished blue with some slight thinning of the finish on the bottom of the magazine and scattered small spots of pinprick pitting beneath the finish throughout. The bolt remains bright and is, along with the barrel and magazine, properly numbered to the rifle. All metal markings are crisp and the rifle is not import-marked. The European walnut stock and forend rates very fine with some scattered light	493		Winchester Model 64 Deluxe Lever Action Rifle serial #1990459, 30-30, 24" round barrel with half magazine and a bright excellent bore. The barrel and magazine tube of this rifle retain about 95% original blue showing a few small spots of mild oxidation staining and light handling marks. The action retains about 92% original blue with wear toning to gray along the carry points, some sparsely scattered mild oxidation staining and perhaps a couple tiny pits that are unobtrusive. The bolt retains all of its original blue, the checkered steel buttplate with generous blue as well and all markings remain intact and
	handling marks and a shallow dent on the comb near the buttplate and a strong arsenal finish which is thankfully not worn around the buttplate like so many other Swiss rifles. There is a partially-softened but visible Swiss cross cartouche on the right side of the buttstock. The rifle is equipped with a nice set of W.F. Bern target sights, both the globe front			crisp. The checkered capped pistolgrip walnut buttstock and forend remain in about very good plus condition retaining about 85% original varnish that shows some mild flaking, a bit more evident along the forend, along with some scattered dings and a few light abrasions. There is one tiny flake forming at the heel. The rear sight has been
	with post insert and diopter rear are in excellent condition and are removeable if one chooses to bring the rifle back to standard military configuration. Also included is an excellent condition brown leather sling with spring clip clearly maker-marked by J. Campiche of Le Grand-Saconnex in the Canton of Geneva. An excellent condition			neatly blanked and the rifle is sighted with a Lyman 66A receiver sight and Lyman bead front sight on matted ramp front. The small bead insert of the front sight has been lost to the years and the hood is not present. The super grade sling swivels are present and the action seems to function well mechanically. (13A10316-6) {C&R}
	example of these famously-accurate rifles, this one upgraded with fine target sights. (23A10339-11) {C&R} (1200/1400) Est. 1,200 - 1,400	494	4	Est. 1,200 - 1,800 Burnside Rifle Co. Fifth Model Civil War Carbine ID'd to Lt. Ansyl West 4th Wisconsin Cavalry
490	Excellent Vector Arms RPD-SA Semi-Auto Rifle serial #00663, 7.62x39mm, 20" barrel with a bright excellent bore. This is a semi-automatic copy of the famous Soviet RPD (Ruchnoy Pulemet Degtyaryov) light machinegun built on a U.S. manufactured receiver along with Soviet/Warsaw Pact parts and the correct number of U.S. parts to make it 922r compliant. The metal surfaces retain 99% maker blue with a touch of light operational wear and a few light handling marks. Many parts bear Soviet inspection marks and the top cover is stamped "CA 310 / C / 1953r". The hardwood clubfoot buttstock, ribbed pistolgrip and handguards rate excellent with a few scattered light handling marks. This belt-fed rifle is equipped with two drum magazines each of which can hold two 50-round belts (two belts are included), original folding bipod, original sights, cleaning rod, cleaning kit stored within the buttstock, and a plethora of spare parts including but not limited to: surplus top cover, firing pin, striker spring, spring set, return spring, complete bolt, surplus bolt, top cover latch and spring, recoil buffer, spare charging handles. This gorgeous RPD clone appears to have seen little if any use and is sure to be the center of attention at the range. (23C10518-4) {MODERN} (2000/4000) Est. 2,000 - 4,000			serial #17124, .54 cal, 21" round barrel with a good bore showing light pitting and old oxidation its full-length with otherwise strong rifling throughout. The metal surfaces of this carbine have toned to a mottled gray and plum-brown patina, the action showing some remnants of old applied cold blue that is now mostly a dark plum tone, along with remnants of fine pitting and oxidation staining. The patent markings atop the action have softened somewhat while the Burnside Rifle Co. markings on the lockplate remain strong. The smooth walnut buttstock remains in very good condition as very lightly cleaned long ago now darkened from the years and showing scattered light dings and handling marks, the forend is about good showing a heavier cleaning with a reapplied gray-brown finish and its fit is rather shy of the metal components. The buttstock retains a visible remnants of a cartouche on the left side wrist and an old scratched name along the right side that was rather neatly applied in script. The first initials "A. A.W." are clearly discernible, the sumame unfortunately a bit muddled. All appropriate hardware is intact, the serialized parts are matching and the action seems to function well mechanically. Springfield Research shows a very closely numbered carbine "17122" issued to Company K 4th Wisconsin Volunteer Cavalry. Study of the regimental roster reveals only one
491	Winchester Model 90 Slide Action Rifle serial #684427, 22 WRF, 24" octagon barrel with a fine to near excellent bore which shows only a few very sparsely scattered spots of light oxidation or frosting. The barrel retains about 97% original blue, showing even fading and some light sharp edge wear, the right side with scattered light oxidation. The magazine tube has toned to a plum and			definitive "A. A.", Second Lieutenant Ansyl A. West of Company I who enlisted April 20, 1861 but apparently resigned at the end of that same year, December 6, 1861. The surname on the buttstock indeed does appear to be a stylized "West" upon very close scrutiny. An interesting carbine with a lot of character. (13B10466-1) {ANTIQUE} (1200/1800) Est. 1,200 - 1,800
	pewter, with speckled oxidation but is generally smooth. The frame retains perhaps 92% original blue, strong on the left and flaked to a plum and pewter on the right. The straight grip walnut buttstock and grooved forend rate very fine with nearly all their original varnish and scattered light handling marks. The buttplate retains strong original blue with wear on the high edges and some very light oxidation. The original bead front sight and sporting rear are in place and the mechanism seems to function well mechanically. One screw is missing from the top of the bolt but they are easily had. A very attractive Model 90 in a scarce chambering. (310470-32) {C&R} (1000/1500) Est. 1,000 - 1,500	495		Winchester Model 1886 Lever Action Rifle serial #127707, 45-70, 26" round barrel with full magazine and a partially bright good bore showing light pitting and oxidation its full-length but otherwise strong rifling throughout. The metal surfaces of this 1902-made rifle show scattered remnants of some older reapplied blue toning to a mix of dark gray and gunmetal patina with scattered remnants of smoothed-over light pitting and handling marks. The magazine hanger pin is missing and the upper tang screw is an old replacement. The plain walnut stocks remain in good condition as cleaned and refinished long ago showing some fabric impressions and scattered light dings. There is a small crack at the nose of the forend
492	Winchester Model 1885 Special Order Single Shot Rifle serial #86673, 25-20 Single Shot, 32" extra-length No. 3 weight octagon barrel with a fair bore showing pitting its full length. This extra-length, heavy barrel single shot target rifle features a factory single set trigger and a very nice Swiss butt. The barrel retains perhaps 90% original deep gray-blue finish, drifting to plum with toning to pewter on the sharp			and left of the upper tang. The rifle is sighted with Lyman two-leaf flip-up rear sight and a Lyman bead insert front sight that has been modified slightly, the blade thinned and the bead not present. The action seems to function well mechanically. A very good '86 that may make for a good shooter. (13A10330-17) {C&R} (1200/1800) Est. 1,200 - 1,800
	edges. The finish appears stronger under normal ambient light and there are scattered spots of light oxidation here and there and some light pitting at the muzzle. The high wall frame shows perhaps 50% original blue, the balance a smooth plum patina with a sparse freckle of light surface oxidation here or there, the lever is a nice mottled silvery and gray case-hardened patina. The straight grip smooth walnut stock rates very fine with much original varnish and only light dings and handling marks, showing some light drying cracks at the rear of both tangs, it is fitted with a brass Swiss style butt with the remnants of original nickel plate, which fits very nearly precisely. The splinter forearm rates very good showing a bit more wear with a few more handling marks, its ebony tip insert is intact. The original silver blade front sight is in place as is the Rocky Mountain rear, the front tang sight hole on the tang now vacant. The gun seems to function well mechanically and would be an excellent candidate for a professional relining. (3A10499-58) {C&R}

	apron and portions of the ears, a nice wedge under the triggerguard,			
	and streaks on the side of strap above the rear bow. The smooth			
	one-piece walnut grip rates about fair to good as lightly cleaned and			
	re-varnished showing a 1/2" long chip on the right heel and smaller chip			
	on the left heel in addition to handling marks. No penciled serial number			
	is visible having long since faded from handling and cleaning. The serial			
	number on the frame is no longer visible but the straps and barrel have			
	matching numbers. The number on the cylinder matches but the digits			
	were restamped into the pock marked surface. The "U.S." stamp on the			
	frame has been restruck, the "Colts Patent" has only remnants			
	remaining, the barrel address is soft, and there is a dovetail cut in the			
	barrel through the address with no sight installed. The gun functions			
	mechanically but the mainspring feels soft, lockup will need attention,			
	and one nipple is broken off. This revolver has seen hard use over the			
	years and survives in respectable condition. (8A10206-32) {ANTIQUE}

Colt Single Action Army Bisley Model Revolver

503 Winchester Model 94 Lever Action Carbine / Colt Third Generation Single Action Army Revolver Commemorative Set serial #1333WC (same for rifle and handgun), 44-40 W.C.F., 20" barrel with an excellent bore and 7 1/2" barrel with an excellent bore showing very faint partial frosting. The carbine retains about 99% original high polish blue. The lever has been nicely accented with robust case-hardened colors. The straight grip buttstock has beautiful feathercrotch walnut, the wrist is beautifully checkered with fleur-de-lis accents. The curved carbine buttplate retains full rich high polish blue. The forend stock has a plainer grain but bears the same wonderful, checkered fleur-de-lis pattern. The right side of the receiver has a gold border with foliate scroll surrounding the loading gate and gold bust of Oliver Winchester, his gold filled signature is found on the upper tang. The left side has the same format with iconic Winchester Horse and Rider on the left and an oval window with a "W C" monogram in the center. The left side of the barrel has a bold "WINCHESTER" flanked by foliate scroll and the right side follows the same layout utilizing a gold image of the Winchester factory. This gun features a buckhorn rear sight with white diamond insert and gold blade carbine style front sight. The revolver utilizes the early black powder style frame and retains 99% original finishes with Colt Royal blue on the barrel, unfluted cylinder, and grip frame. The frame is finished with beautiful swirls of case-hardened colors. The grips are two piece walnut in excellent condition. The cylinder has four wedges of gold foliate scroll with an oval window showing the iconic Rampant Colt standing on a partial globe and a second oval window with "W C" monogram as found on the rifle. Sam Colt's gold filled signature is recreated on the backstrap, the left side of the barrel has an "COLT" flanked by foliate scroll, the right side follows the same basic layout except the Colt factory is featured in the center. The pair are housed in a beautiful oak case with light handling marks, but the case cover does not properly close and the "teeth" on the upper latch are partially sheared off. The hinge and latches will need attention as the lid is warped. The inside is red velvet lined with a small, covered compartment in the lower left corner, and includes a pair of 3" diameter brass medallions, one features the Rampant Colt the other is Winchester's Horse and Rider, both have the "W C" monogram in an oval with the serial number below it. Also included are a pair of keys for the locks. Only 2300 sets were delivered, the remaining sold as individual guns. [Extra Shipping Will Apply] (8B10446-3,4) {C&R} (3000/5000) Est. 3,000 - 5,000 504 Ruger No. 1 Lyman Centennial Edition Falling Block Rifle serial #132-08106 / Lyman #L-78-0178, 45-70 Government, 28" heavy barrel with an excellent bore. This lovely Grade II commemorative is built around a Ruger No. 1 to honor and highlight one hundred years of Lyman products. The metal surfaces retain about 99% original blue showing a few minor stains from oxidation. Both sides of the receiver are adorned in a tight foliate scroll engraving, the center of the left side has a 1 1/4" round window engraved "Lyman / 1878-1978 / Centennial / Edition II", the right side has the same window with their iconic jumping deer logo with "Lyman" above the deer and "1878-1978". The checkered pistolarip buttstock rates about excellent showing some minor clouding of the finish, crisp checkering, black Sturm Ruger pistolgrip cap with gold Ruger Phoenix medallion and is equipped with thin red Ruger rubber buttpad with black spacer in excellent condition. The checkered Alexander Henry forend remains in excellent condition with a few small blemishes on the right rear side. This gun features a barrel band sling swivel stud, sling swivel stud on the buttstock, set of scope blocks for the provided optics, and it functions mechanically. The rifle includes a Lyman Centennial Model 4X scope with clear optics and fine crosshairs. It features knurled screw on lens covers and external adjustments. The steel tube of the scope retains about 97-98% original blue showing scattered light oxidation stains. The rifle and scope are displayed in a walnut presentation case with a piano hinge cover and features three hasps, the center hasp locks. This Centennial also includes a 45-70 Government Lyman three die set showing light oxidation on the exterior of several of them, Lyman single cavity bullet mould #457193 (approximately .459" 405 grain flat nose plain base bullet) equipped with handles, both are marked honoring the Centennial. Also included are (1) box of 20 unprimed nickel plated Lyman headstamped 45-70 Government cartridge cases, and (1) 30 1/2" long steel cleaning rod with walnut handle, brass .45 caliber jag, and brass bore guide. The handle has a medallion on the end featuring founder William Lyman with a ladder sight to his left and the Lyman plant in the background. Other accessories include quick detachable sling swivels, key for lock, a 3" diameter brass medallion configured to match the medallion on the cleaning rod handle, manual, and paperwork. A nicely crafted Centennial that should be a nice collectible and a great shooter for black powder cartridge matches. [Extra Shipping Will Apply] (8A10469-8) {MODERN} (1000/1500) Est. 1,000 - 1,500

	serial #299692, 38-40 WCF, 5 1/2" barrel with an excellent bore showing faint frosting. While this revolver has seen honest use in the last century it retains a respectable amount of condition. The barrel retains perhaps 60% original blue mixed with smoky gray and pewter, the ejector rod housing is worn to an even gunmetal gray while the cylinder is about 50-60% mix of blue and pewter gunmetal patina with strong wedges of blue in ends of each flute. The grip frame has worn to a mix of pewter and brown with strong wedges on the sides of the apron, triggerguard bows and front of the triggerguard strap. The frame and hammer are mostly gray with wisps of faded case-hardened colors. The face of the trigger is pewter with strong fire blue on the sides. The checkered hard rubber Bisley grips with Rampant Colt in an oval are numbered to the gun and rate near excellent showing almost no wear save for a small scuff on the toe of the right panel that is worn smooth. All the appropriate parts are either serial numbered, or assembly numbered to the gun, it functions mechanically with one issue and correctly times and locks up. The safety notch is worn and non-functional and will need attention. The barrel on this 1907-made gun is marked "(BISLEY MODEL) .38 W.C.F." and all markings remains crisp. A fine Bisley revolver. (8A10293-3) {C&R} (2500/3000)
506	Smith & Wesson Model 1905 Hand Ejector Target Model Revolver
	serial #696268, 38 Special, 6" barrel with an excellent bore. This superb Military & Police 4th Change Target retains wonderful condition. The metal surfaces retain about 97% original blue, the muzzle has light silvering with edge wear on the heel of the backstrap, a wisp of thinning on the barrel and sideplate, in addition to a few handling marks. The service trigger and hammer retain the beautiful swirls of case-hardened colors found on the early guns, with light operational wear. The diamond checkered walnut factory grips feature a S&W silver medallions and rate excellent. This gun features a Patridge front sight, black blade adjustable rear sight, all applicable parts and the grips are correctly numbered to the gun, and it times and locks up properly. The rear sight notch was opened up during the period of use. The gun includes a maroon factory box that is correctly end labeled and numbered to the gun with a small surcharge stamp on the bottom indicating a target model. The box rates about poor to fair, the hinge along the back is disconnected, it shows several repaired tears in addition to edge wear. The gun also includes a factory letter indicating it shipped as described on October 11, 1940, to Town of Douglas, Douglas, Massachusetts, Attention: Chief Carl Howe. Mr. Jink's added an aside in the letter stating it was ordered by phone on October 7, 1940, in a two-gun order, shipped express, and invoiced on October 15, 1940. This gun cost \$27.64 at the time. An excellent example of a pre-war Target. (8A10476-1) {C&R} (1000/1500)
507	Est. 1,000 - 1,500 German Weatherby Mark V Deluxe Rifle
	Serial #P23874, 7mm WBY Mag, 24" barrel with a bright, excellent bore. The metal surfaces retain about 97-98% original blue with minor handling marks along the barrel and some light wear around the top of the receiver. The underside of the bolt handle is numbered to the receiver. The underside of the bolt handle is numbered to the receiver. The checkered walnut deluxe Monte Carlo stock rates near excellent and has a few small dings and overall light crazing and crackling to the lacquer finish. The stock features the rosewood forend tip and gripcap, and factory ventilated recoil pad. There are no provisions for sights, a Redfield one-piece mount with a set of 1" rings is included. The mount screws have minor to moderate slot damage and should probably be replaced before mounting your choice of quality optics. A great West German made South Gate, CA vintage rifle. 537	U.S. Model 1898 Krag Bolt Action Rifle by Springfield Armory serial #143986, 30-40 Krag, 30" barrel with a bright excellent bore. The barrel, bands, swivels, and triggerguard retain about 95% original blue with light wear at the muzzle, scattered light oxidation staining. The receiver, sideplate, and loading gate retain about 75% smoky oil-quenched case-hardening with moderate wear to gunmetal on the flat of the loading gate, light toning to gray on the sideplate and receiver, and some light silvering on high edges. The bolt body remains bright with light oxidation staining on the handle, the extractor retains excellent vibrant fire blue with scattered specks of oxidation staining, and the remaining bolt parts have a strong smoky oil-quenched case-hardened patina with light operational wear and handling marks. The smooth straight grip walnut stock is in excellent condition with a linear series of very light impact marks across the bottom of the forend due to contact with sligh ardware and a few other minor handling marks, and is marked with a clear boxed "JSA / 1898" cartouche and a circled "P" proof behind the triggerguard. The rifle is correctly sighted with a blade front sight and the Model 1896 rear sight, which were used on the early run of Model 1898 Krag rifles, and the rifle appears to function selling designed for use in tropic environments showing some minor discoloration. A fine example of the early Model 1898 Krag rifle. (14A10483-326) {ANTIQUE} [Perry White Collection] (1000/1500)	540	Winchester Model 1873 Saddle Ring Carbine serial #234469B, 38 WCF, 20" round barrel with full magazine and an oxidized bore showing very faint rifling and a few spots of moderate pitting. The metal surfaces of this 1888-manufactured carbine have a mixed pewter and brown patina with light pitting, spots of darker oxidation staining, and a few light handling marks; the cartridge lifter has toned to an ochre patina with a few minor handling marks, the caliber marking no longer present. The smooth straight grip walnut stock and forend are in very good condition as lightly cleaned with light abrasions on the right side of the buttstock and at the rear of the forend, filler-repaired cracks at the nose and rear of the forend on the left side, and light dings and handling marks consistent with a carbine of this age; the upper tang and steel buttplate are proud in spots, and the left side of the stock appears to be marked "NT" with the "N" carved in reverse. The two-line barrel address and caliber marking on the barrel are light but still legible, the "Model 1873" on the upper tang remaining clear as well. The saddle ring, carbine rear sight, and plain blade front sight are intact and the action seems to function well mechanically. This carbine shows a lot of honest use and tons of character. (14B10249-88) {ANTIQUE} (1200/1800) Est. 1,200 - 1,800 Winchester Model 1873 Lever Action Rifle serial #76363, 44-40, 24" round barrel with a full magazine and an about very good bore with scattered spots of light oxidation, light pitting, but
	Est. 1,000 - 1,500		evident rifling throughout. The metal surfaces of this second model rifle
538	Springfield Armory Inc. M1 Garand Rifle serial #7105949, 30-06, 24" barrel showing some scattered freckling and a few pinprick pits in an otherwise bright excellent bore. The metal surfaces retain about 95% maker reapplied parkerized finish with scattered previous light pitting beneath the finish, high edge wear and some light oxidation staining. The walnut stock is in very good plus condition as lightly cleaned with three light dings on the left side of the forend, a few minor handling marks, and a few tiny chips at the heel; the handguard is in very good to very good plus condition with a 1 5/8" crack at the rear. The stock is marked with a very small Ordnance Wheel on the bottom of the pistolgrip and is otherwise unmarked. The receiver markings are crisp, the small parts are military surplus in origin with all but the triggerguard (which is Winchester marked) being marked for Springfield Armory. Interestingly, the underside of the receiver is marked "ADI AUSTRALIA", ADI was contracted to manufacture receivers for Springfield Armory Inc. The rifle features a milled triggerguard, single slot gas screw, uncut operating rod, and lock-bar rear sight drums; the		have toned largely to a brown patina with gray undertones, the sides of the receiver remaining more gray with light oxidation staining, some light pitting, and a few light handling marks; the cartridge lifter has a goldenrod patina with a light handling mark or two. The smooth straight grip walnut stock and forend are in very good condition with a small old abrasion on the wood line of the forend and the expected light dings and handling marks for a rifle of this age. The two-line barrel address and Winchester trademark on the upper tang are soft but legible, and no caliber markings appear on the barrel or cartridge lifter. A few of the screws show light slot damage, and the left side of the receiver shows two holes for a saddle ring stud, neatly filled with filler screws. The rifle is sighted with a standard sporting-style rear sight and a Marble's "tunnel sight" front, the dust cover has some lateral play when in the closed position, and the rifle appears to function well mechanically. A solid 1881-manufactured rifle in a desirable caliber. (14A10249-3) {ANTIQUE} (1200/1800) Est. 1,200 - 1,800
	upper sling swivel and stacking swivel are absent. Included are seven enbloc clips, showing some scattered light oxidation. The rifle appears to function well mechanically and should make a fine range rifle.	542	Browning B-27 Deluxe Over Under Shotgun serial #L13PZ02406, 12 ga, 28" ventilated rib barrels choked modified and full, with bright excellent bores. The barrels retain about 99%
539	(14A10326-15) {MODERN} (1000/1500) Est. 1,000 - 1,500 Desirable Molot Vepr Semi-Auto Carbine		original blue with a minor handling mark or two, and the satin finished frame is in near excellent condition with some fine freckling on the belly and is nicely engraved with tight foliate scroll and floral patterns over
	serial #15VPP5715, 7.62x39mm, 16 1/2" chrome-lined RPK-profile barrel with a bright excellent bore. Built by Molot-Oruzhie, the same arsenal that manufactures RPK light machineguns for the Russian military and other militaries around the world, Vepr rifles are synonymous with quality and are very collectible as they have been banned from importation since 2017. The metal surfaces retain about 98% original black enamel finish with some scattered light high edge wear and a few light handling marks. The factory-stippled European walnut forend and Monte Carlo thumbhole stock with right side cheekpiece and rubber recoil pad rate about excellent with a few scattered light handling marks. Imported by FIME group, this heavy-duty carbine features a 1.5mm RPK style receiver, a heavier profile barrel and RPK windage-adjustable rear sight, side mount rail and all the correct parts are serialized to the receiver. The carbine is further equipped with an ALG AKT trigger group providing an excellent trigger	542	90% of frame, triggerguard, and lever; the breech face, ejectors, and tip of the ventilated rib show freckled oxidation staining. The checkered pistolgrip walnut stock and forend with subtle schnabel tip are in excellent condition with only a minor handling mark or two and is factory fitted with a "BROWNING" marked plastic buttplate. The shotgun locks up tight with the lever coming to rest right of center, and features a single selective trigger, nonautomatic safety, and is sighted with a lone steel bead. The shotgun requires mechanical attention as the trigger is frozen and will not fire; by extension, the functioning of the ejectors could not be verified. Included with the shotgun is a fitted leather luggage-style case in good condition with light oxidation and tarnishing on the fittings, mildew staining, and light handling marks, and has a yellow faux fur lining. A lovely shotgun for the Browning collector that just needs a little work. (14A10469-7) {MODERN} (1000/1500) Est. 1,000 - 1,500
	pull and reset and one SGM Tactical 30-round polymer magazine is included. The action of this excellent condition Vepr appears to function well mechanically. (23A10246-3) {MODERN} (1200/1800) Est. 1,200 - 1,800	543	Fine Remington Rider Magazine Pistol 32 RF Extra Short, 3" octagon barrel with a good bore showing a patch of moderate oxidation about mid-bore with bright areas and otherwise strong rifling throughout. The barrel and magazine tube of this scarce un-engraved example retain about 97% original nickel finish showing a few tiny flakes and light handling marks while the trigger and hammer retain about 95% original nickel finish. The frame itself appears to have
			lost most of its nickel finish and is now a pleasant smooth pewter gunmetal patina showing some sparsely scattered mild oxidation speckling and handling marks. The barrel markings remain crisp and the breechblock is a smoky gray case-hardened patina. The pistol wears a set of nice smooth antique ivory grips that remain in very fine to near excellent condition exhibiting some very slight shrinkage from the years and a few scattered light dings. The grips show a pleasant mild patina and subtle striations. The ejector has been lost but the action otherwise seems to function well mechanically. A very handsome example of these mechanically interesting and desirable little pistols. (13B10320-41) (ANTIQUE) (1500/2000) Est. 1,500 - 2,000

The blade is etched with gilded floral motifs, military trophies and "W.H. Horstmann / & Sons / Philadelphia" in riband on a blue background. The blade has toned a		years 1794-1830 when it was part of the Norm Flayderman Collection. Mr. Mowbray calls it possibly unique and suggests it may well have been made in Philadelphia. The hilt is of brass (Mowbray did not personally inspect the sword and wondered if it may be iron) with a simple eaglehead pommel with double punched eye and faceted edge to lower beak. The sword features a simple stirrup shaped knuckle bow and guard which terminates in a flat round quillon. The guard shows a period repair consisting of a small brass strap on either side of blade pinned on either side of the broken guard. The repair is very effective and the guard remains sound. While this repair is visible in the photograph in the book it is much more difficult to see at the angle it is photographed. The grip is of grooved wood and was originally wire wrapped and fitted with plain brass ferrules at each end. The grip shows considerable period chipping on the reverse side, the obverse side is significantly smoother and bears a rich dark color. The blade is unfullered and shows scattered even light pitting overall with a rich, untouched dark brown patina. The hilt likewise shows a deep undisturbed patina. A very endearing and early American eagle pommel sword that is published and has a strong
1007	panoply of arms and with etched panel either side. The scabbard is engraved on upper section with floral designs and American eagle with shield at center. The lower section shows another area of floral engraving with thin subtle drag. The hilt retains nearly all of its gold wash, the grip is excellent with no chips and the hilt is slightly loose. The blade remains in wonderful condition showing nearly all of its bright original blue and gold gilt. The etched panel remains excellent with vivid detail. The scabbard shows nearly all of its original gold gilt with scattered very light surface abrasions and a few scattered shallow dents which are cosmetic only. An identical sword can be found in American Swords from the Philip Medicus Collection listed as item "38e". Close inspection of the grip reveals that this may indeed be the sword in the book, it should be noted that Mr. Tillou had done much business with Mr. Flayderman over the years. A lovely, high condition Artillery Officer's sword. (10250-14) [Peter Tillou Collection] (2000/3000) Est. 2,000 - 3,000 Philadelphia Eaglehead Mounted Artillery Officer's Sword By Horstmann 31" curved blade with single unstopped fuller. The lower section shows another area of floral engraving with thin subtle drag. The hilt retains nearly all of its gold wash, the grip is excellent with no chips and the hilt is slightly loose. The blade remains in wonderful condition showing nearly all of its bright original blue and gold gilt. The etched panel remains excellent with vivid detail. The scabbard shows nearly all of its original gold gilt with scattered very light surface abrasions and a few scattered shallow dents which are cosmetic only. An identical sword can be found in American Swords from the Philip Medicus Collection listed as item "38e". Close inspection of the grip reveals that this may indeed be the sword in the book, it should be noted that Mr. Tillou had done much business with Mr. Flayderman over the years. A lovely, high condition Artillery Officer's sword. (10250-14) [Peter Tillou Collection] (2000/3000) Est. 2,000 - 3,000 Philadelphia Eaglehead Mounted Artillery Officer's Sword By Horstmann 31" curved blade with single unstopped fuller. The blade is etched with gilded floral motifs, military trophies and "W.H. Horstmann / & Sons / Philadelphia" in riband on a blue background. The blade has toned a smoky gray and brown patina with overall fine oxidation, sparse light pitting, and chips along the main edge. The etching retains 60% original gilt with generous amounts of bright fire blue, loss due to oxidation. The brass hilt has an eagle head pommel with plain crossguard, dual langets with a disc-shaped finial ferrule and a black leather covered wood grip wrapped in braided brass wire. The brass has a nicely tarnished dark patina and the grip shows moderately flaking leather with loose but intact wire wrapping. The underside of the guard is marked "W.H. HORSTMANN / & SONS / MAKER". The brass scabbard is equipped with decorative bead bordered foliate bands with dual hanging rings,		years 1794-1830 when it was part of the Norm Flayderman Collection. Mr. Mowbray calls it possibly unique and suggests it may well have been made in Philadelphia. The hilt is of brass (Mowbray did not personally inspect the sword and wondered if it may be iron) with a simple eaglehead pommel with double punched eye and faceted edge to lower beak. The sword features a simple stirrup shaped knuckle bow and guard which terminates in a flat round quillon. The guard shows a period repair consisting of a small brass strap on either side of blade pinned on either side of the broken guard. The repair is very effective and the guard remains sound. While this repair is visible in the photograph in the book it is much more difficult to see at the angle it is photographed. The grip is of grooved wood and was originally wire wrapped and fitted with plain brass ferrules at each end. The grip shows considerable period chipping on the reverse side, the obverse side is significantly smoother and bears a rich dark color. The blade is unfullered and shows scattered even light pitting overall with a rich, untouched dark brown patina. The hilt likewise shows a deep undisturbed patina. A very endearing and early American eagle pommel sword that is published and has a strong pedigree. (10250-8) [Peter Tillou Collection] (4000/8000)
1007	panoply of arms and with etched panel either side. The scabbard is engraved on upper section with floral designs and American eagle with shield at center. The lower section shows another area of floral engraving with thin subtle drag. The hilt retains nearly all of its gold wash, the grip is excellent with no chips and the hilt is slightly loose. The blade remains in wonderful condition showing nearly all of its bright original blue and gold gilt. The etched panel remains excellent with vivid detail.
