Scarce U.S. Model 1880 Trapdoor Rifle by Springfield Armory 30 Attractive U.S. Colt Single Action Army Cavalry Model Revolver serial #156957, 45-70 Govt., 32 5/8" barrel with a mostly bright about serial #31873, 45 Colt, 7 1/2" barrel with a bright very fine bore showing very good bore showing scattered patches of light pitting and oxidation. some scattered small spots of pinprick pitting and oxidation with Approximately 1,014 Model 1880 Trapdoor rifles were produced for field otherwise crisp rifling. The barrel, cylinder and ejector rod housing of this evaluations to determine the suitability of an integral ramrod bayonet 1876-made revolver are mostly toning to a deep gray-brown patina rather than a separate socket bayonet and scabbard. It was hoped this showing some overall old oxidation and scattered pinprick pitting, new rifle would reduce the individual soldier's burden by 10 oz. while retaining streaks of original bright blue in the cylinder flutes and some saving the government \$0.92 each as no scabbard would be necessary. generous bright blue along the ejector rod housing flats and protected The metal surfaces have aged to an overall light-moderately oxidized areas of the barrel. The backstrap and triggerguard are similar retaining brown patina with pinprick pitting throughout and remnants of original stronger bright blue throughout and the frame is a mix of plum-brown blue in a few protected areas, while the rear of the receiver is a smoky and smoky gray with some old oxidation overall and some patches of case-hardened patina and the underside of the breechblock retains lovely vibrant colors in the protected areas, the hammer as well with vibrant case-hardened colors. "U.S. / SPRINGFIELD" on the lockplate is generous vibrant colors. Some of the screw heads show mild slot wear partially obscured while all other markings are clear. The American black and most of them otherwise retain strong brilliant fire blue. All markings walnut rates about fine as lightly cleaned with a touch of added finish, an remain completely intact and strong, the single line barrel address unobtrusive sliver missing from the right wood line beneath the upper flanked by hyphens, crisp "U.S." on the left side frame and Cleveland's band spring and a few scattered light handling marks. The faint "J.T.C." inspector marks on bottom frame, underside barrel and on remnants of an 1881-dated inspection cartouche and circled "P" firing cylinder. The hammer recess shows small "H" stamp and there are proof remain visible. The original sights are intact, the ramrod bayonet appropriate small "P" stamps on the cylinder and barrel. The smooth locks up tightly in both positions and the action remains strong and walnut grip is ink-numbered matching the revolver along the back inlet crisp. By the middle of 1882 reports from the field indicated that the and remains in near excellent condition showing some very light dings slight movement of the ramrod bayonet during firing caused the rifles to mostly along the bottom edges and base retaining otherwise superb fit. be inaccurate and that soldiers could not fix or unfix the bayonets while Grip markings are very fine showing an excellent "1876" date on the left moving. Thus, these experimental rifles were withdrawn from service side over "DAL" cartouche, "JTC" cartouche on right side and smaller and the program dropped, making them today both scarce and "J.T.C." stamp on right base. The proper bullseve elector rod is intact highly-collectable. (23A10460-15) {ANTIQUE} (1000/1500) and all of the serialized parts are matching. The action will require some Est. 1.000 - 1.500 mechanical attention as the full cock notch was obviously recut at some Very Fine U.S. Model 1863 Type I Percussion Rifle-Musket by 28 point and does not hold as far back as it should: the other notches are Reminaton not present, but it otherwise times and locks up well. While possibly .58 cal., 40" barrel with a pristine bore. The barrel, bands, triggerguard having suffered a bit from some poor storage over the last 146 years, and buttplate of this lovely rifle-musket are mostly bright showing some this revolver remains a very handsome and correct example with strong evidence of a previous cleaning with some scattered areas of softened condition and generous original finish. A fine revolver for the Colt or U.S. pinprick pitting and scattered spots and speckles of light oxidation. The martial collector. (13E10730-11) {ANTIQUE} (5000/7000) lockplate and hammer retain vibrant case-hardened colors which fade to Est. 5,000 - 7,000 gray toward the nose of the hammer with some spots of light oxidation. 31 Colt New Service Double Action Revolver All metal markings are crisp with a characteristic large font "1865" on the serial #336749, 44-40, 4 1/2" barrel with a bright excellent bore. This is a top of the breech, "V / P / (Eagle Head)" on the left quarter-flat and rather interesting 1933-made revolver, the barrel of which is an earlier "G.M." inspection mark on the left flat of the breech, while the lockplate production component, no doubt a "parts cleanup" that is finished in the is also dated 1865 behind the hammer, and features a Federal Eagle earlier bright blue while the cylinder and frame are the typical 1930s-40s over "U.S." ahead of the hammer, and "REMINGTON'S / ILION, N.Y." is era duller blue finish. The barrel retains about 95% original bright blue below the unique bolster. The American black walnut stock rates fine with most of the loss due to silvering from muzzle and holster wear with sharp edges to the stock flats, a small moderate dent on the right along with a few minor handling marks. The frame and cylinder retain side of the ramrod channel behind the upper band and a few other about 97-98% original blue showing some faint thinning along the scattered minor handling marks from the years. The stock features backstrap and very mild operational wear. The polished sides of the wonderful crisp markings including "B A / 2284" on the right side of the hammer remain brilliant and the ejector rod head retains bold buttstock and two boxed inspection cartouches and small "G.P" case-hardened colors. All markings are crisp and clear, the barrel with inspection mark on the left stock flat. The original sights are intact, a last patent date of 1905 and showing model and cartridge designation correct cupped tulip-head ramrod with threaded end is included and the on the left side. The black checkered hard rubber grips remain in action is strong and crisp. A total of 40,000 Model 1863 rifle-muskets excellent condition showing a few scattered light dings; their internal scratched numbers have been removed though their fit is excellent. The were delivered by Remington during the closing years of the Civil War. (23C10615-5) {ANTIQUE} (2000/3000) action seems to function well mechanically with solid timing and lock-up. Est. 2,000 - 3,000 A very handsome New Service in the desirable shorter barreled 44-40 29 Smith & Wesson No. 2 Old Model Army Revolver configuration. (13B10729-56) {C&R} (2000/3000) serial #13799, .32 RF, 6" octagon barrel showing a bright bore with Est. 2,000 - 3,000 32 Winchester Model 1886 Lever Action Rifle scattered light pitting and oxidation stains. This three-patent date No. 2 Army remains in excellent condition. The metal surfaces retain perhaps serial #97486, 40-82 WCF, 26" octagon barrel with full magazine and a 92% original dark blue finish, the backstrap is toning to pewter, with mostly bright very good plus bore showing some scattered mild frosting, generally light scattered edge wear, limited oxidation stains, and a few small areas of minor oxidation and otherwise strong rifling handling marks. The trigger, barrel latch, ejector, and most of the throughout. The barrel and magazine of this 1895-made rifle retain hammer have toned to gray with a few strong swirls of case-hardened perhaps 60% original blue appearing strong under ambient light, thinning and toning to plum-brown patina, and showing some patches of colors still on the hammer. The smooth rosewood factory grips are numbered to the gun and rate about very good showing light wear, old oxidation and light pitting mostly scattered along the right side. There flaking finish, and a pair of very small chips in the center edge of the are a few small dings along the left side magazine tube nearer the tip right panels butt, and third larger chip on the heel. All the appropriate that are relatively minor. The action shows generous silvery parts are assembly numbered to the gun, barrel to frame fit is tight, it case-hardened patina throughout with strong smoky colors and some has a crisp action, timing and lockup are excellent, and it features the overall toning to mild gray-brown. There are a few small peculiar areas later three pin topstrap. An excellent example of a No. 2. (8A10704-3) along the bottom metal and edges of the lever that show metal erosion {ANTIQUE} (1500/2000) perhaps from some sort of contaminant but they are rather shallow and Est. 1,500 - 2,000 unobtrusive. The bolt retains about 90% slightly thinning original bright blue, the loading gate shows streaks of fading fire blue and all markings remain intact and strong. The plain walnut shotgun buttstock and forend remain in about very good plus condition showing mostly worn finish, the expected scattered light dings and handling marks. Stock fit remains quite nice overall and the forend shows areas of attractive grain figure throughout. The rifle is sighted with sporting rear sight and an antique replacement medium silver blade front sight and the action seems to function well mechanically. A handsome 1886 rifle. (13C10574-14) {ANTIQUE} (2500/3500)

Stock fit at the hardware serial #444513B. 38 WCF. 20" barrel with full magazine and a fair bore is quite good and the dropper points are strong, the checkering along showing old pitting and exidation throughout with evident rifling. The the butt also with moderate wear and there is a un-engraved German metal surfaces of this 1893-made carbine have mostly toned to a deep silver monogram plate along the toe line. The stock is significantly cast-on almost quasi-crossover, length-of-pull is 15" with drops of about gray and plum-brown patina with some scattered areas of older cleaned light pitting, some smoothed-over dings and handling marks, some of 1 1/2" and 2 1/2". Lock-up is by dual under-bites and doll's head the plum-brown areas perhaps remnants of an older reapplied finish. extension with hidden third fastener and is tight, perhaps showing the The cartridge lifter has been cleaned to goldenrod and no longer has faintest sliver of light at the right breech and the top lever rests slightly any visible marking while the remaining markings have softened left-of-center. The shotgun is sighted with a single silver bead, features somewhat and are otherwise legible. The plain walnut stocks remain in automatic safety and the action seems to function well mechanically with about good condition as cleaned and refinished, the buttstock with strong ejectors. Barrel measurements show minimum thicknesses of streaks of heavy brown finish and showing a number of thin cracks at about 0.024" in the right and 0.025" in the left and shotgun weight is 5 the tangs, heel, and a few at the forend tip. The saddle ring is intact and lbs. 7 oz. A quality and likely very usable British smallbore ejectorgun. the arm is sighted with standard carbine rear and a period modified (13B10636-70) {C&R} (2000/3000) blade front that has a small piece of silver inserted. The action seems to Est. 2,000 - 3,000 function well mechanically. (13A10574-7) {ANTIQUE} (1000/1500) 37 Excellent Browning Superposed Lightning Over Under Shotgun Est. 1,000 - 1,500 serial #P33PM1452, 20 ga., 28" ventilated rib barrels choked modified Lovely Diminutive VL&D Belgian Smallbore Boxlock Double Shotgun and full with bright excellent bores. The metal surfaces of this 35 serial #4159, 410 bore (2 1/2"), 26" barrels choked full in both, with Belgian-produced 1980-vintage shotgun retain about 99% original blue bright excellent bores. This is a very lovely little shotgun and appears and the mechanical single selective trigger retains all its original very much to have seen no use over the years and while otherwise gold-coloring. The frame, top lever and triggerguard features Grade I unmarked, appears very much to be a Francotte. The barrels retain all of loose foliate scroll engraving. The attractive checkered walnut round their original rust blue finish with Von Lengerke and Detmold New York knob pistolgrip stock and forend rate excellent with a couple scattered markings left and right, lovely matted rib and ivory front bead. The very light and unobtrusive handling marks with the buttstock providing a diminutive frame retains all of its original color case-hardening and 14 1/4" length of pull. The barrels are numbered to the frame, the shows light borderline engraving with "Made In Belgium" on the belly, ejectors are robust, the barrels lock up tightly and on-face with the top floral engraving around the plate screws. Top lever, safety and long tang lever right of center and the action appears to function well triggerguard retain all of their original blue and "S" is inlaid in gold, the mechanically. (23A10636-7) {MODERN} (2000/3000) Est. 2,000 - 3,000 triggers with some lovely pale fire blue. The checkered round knob Browning Citori Gran Lightning Over Under Shotgun pistolgrip European walnut buttstock and splinter style forend rate 38 excellent with a rich russet tone and sharp checkering, likely having serial #23588MY131, 16 ga., 28" ventilated rib Invector-choke barrels added finish years ago. The length of pull to the grooved horn buttplate with bright excellent bores. The metal surfaces retain about 97% original is 14 1/2" with drops of 1 3/8" and 2 1/4". Lockup is tight on-face with blue with the lower left edge of the frame thinning to gray patina, speckles of loss toning to gray on the edges and rear of the triggerguard dual underbites and Greener crossbolt and the arm functions well and a few light handling marks. The single selective trigger retains mechanically. Weighing in at just under 4 1/2 pounds this is a handy. fast-swinging little smallbore double. (3C10742-3) {C&R} (3000/5000) nearly all its original gold coloring and the frame is adorned with crisp Est. 3.000 - 5.000 standard scroll engraving. The checkered Grade III walnut round knob pistolgrip buttstock and forend rate very good to very good plus with some scattered light scratches and handing marks, primarily on the left side of the buttstock, which one would associate with a carried field oun and wonderful feather crotch figure seen in both pieces of wood. The safety is non-automatic, the ejectors are robust and the barrels lock up tightly and on-face with the top lever right of center. Included is the original box and manual with the following two Invector choke tubes: improved cylinder, modified. The action appears to function well mechanically. (23B10636-43) {MODERN} (1500/2000)

Lot Title/Description

Scarce & Very Fine British Lee-Enfield MKI Bolt Action Rifle by LSA Sako Finnbear Safari Bolt Action Rifle 57 59 serial #1742, 303 British, 30 1/4" barrel with a bright near excellent bore serial #561513, 375 H&H, 24 1/2" barrel with a bright excellent bore. showing a little mild frosting in the grooves and otherwise crisp rifling. This lovely rifle with AIV action appears very nearly as-new and shows This is a lovely 1896-dated rifle, the barrel retaining about 60% original perhaps a very tiny blemish in the bluing here or there which one must blue, appearing stronger under ambient light, and fading to a mild gray really search for to notice, with a tiny rub mark on the bolt knob; the bolt patina under bright light also with some scattered light freckling and body remains bright with only very light operational wear. The checkered silvering nearer the muzzle. The rear barrel band is a relatively even mix American walnut stock rates excellent with only a few very sparsely of original bright blue and mild gray patina while the front band retains scattered, very tiny dings here or there from careful use afield. It about 90% nice original bright blue. The action and dust cover also features checkered panels front and rear with a nice thumbprint panel retain about 90-92% original blue with mild thinning to a pleasant atop the wrist, flared left side shadowline cheekpiece, contrasting gray-brown patina under bright light. The bolt knob is toning to a smooth rosewood forend tip and a blued steel pistolgrip cap. The rifle is factory gray while the safety and magazine cutoff retain a healthy amount of fitted with dual magnum crossbolts and quick detachable swivel studs, original black enamel finish. All markings remain intact and strong, the the front being a barrel band style. There is a banded sporting ramp gold top barrel shank showing proper "E" stamp. The smooth walnut stocks bead front sight in place with a two leaf express rear atop the factory and short handguard remain in very fine to near excellent condition quarter rib, one standing, one folding. Currently mounted by a set of retaining most of their original oil finish showing just the expected 30mm Sako rings is a very nice Leupold LPS 1.5-6 x 42 telescopic sight scattered light dings and handling marks. The buttstock retains lovely with bright excellent optics and duplex reticle. The scope itself rates crisp markings showing Canadian "M&D" stamp over an official excellent with a couple very superficial ring marks. A very handsome cancellation mark and very nice "LONDON" roundel over "I. / 1". The and very versatile magnum rifle with a perfect scope pairing. brass buttplate is a nice ocher patina, the heel is stamped "11 / 1 / 310" (3A10527-1) {MODERN} (2500/3500) and an original oiler remains housed in the trap. The included original Est. 2,500 - 3,500 60 Arrieta Model 874 Sidelock Double Ejectorgun magazine is no longer chained to the gun, though the link is still present and the bolt is mismatched numbered "2365" but it is a correct original serial #34147, 12 ga., 28" barrels choked improved cylinder in both and bolt. The barrel and rear sight are matching the receiver and all proper so-marked on their undersides, showing bright as-new bores. The hardware is intact including the magazine cutoff, volley sights and barrels retain 98% plus original blue showing scattered light scratches or clearing rod. The swivels are intact with an additional arsenal-added very superficial handling marks here and there, with a lovely swivel ahead of the magazine. The action seems to function well hand-matted concave rib its full-length and G&H marked on the mechanically and a khaki web sling is also included. This is a wonderful undersides beneath the forend. The 874 Model features fine gold wire example for the advanced British or Commonwealth martial collector. inlay over the periphery of nearly all its surfaces, including the breeches (13C10672-7) {ANTIQUE} (2000/3000) of the barrels. The frame and lockplates retain a similar amount of Est. 2,000 - 3,000 original satin blue, also with some very superficial handling marks, again Attractive Mauser Model S Magazine Sporting Rifle 58 most of which do not breech the blue, the exposed ends of the internal serial #79339, 8x57J, 20" barrel with a bright excellent bore. This is an lock pins polished brightly. Otherwise engraved and inlaid identically to attractive Mauser Model S in the factory No. 210 pattern, the barreled all Model 874's, this example also has "Lewis S. White" inlaid in gold on action retaining about 96% original blue showing some sparsely the left lockplate with "LSW" initials inlaid along the toeline. The scattered very mild oxidation speckling and some minor thinning to beautifully figured French walnut stock is straight grip English-style and gray-brown under bright light with the receiver ring nicely matted. The rates excellent with only very light handling marks from careful use bolt retains about 94-95% original blue with mild operational wear and afield, with a 14 1/2" length of pull from the skip line checkered butt to some light oxidation along the knob while the bottom metal is a relatively the articulated front trigger; drops are 1 9/16" and 2 1/2". The splinter forend with Anson-Deely release is similar, its metal hardware also with even mix of original blue and deep gray-brown patina. The bolt release and rear sight parts retain generous bright fire blue throughout and the gold line inlay. The arm locks up tightly, is an assisted opener, with action raceway remains mostly bright. The arm shows German "(Crown) robust ejectors and seems to function properly. Oddly the lockplate's / U / B" proofs, the left barrel shank also with a "8.0N" marking and the screw is a non-Arrieta replacement and is a bit undersized at the left underside of the shank with a series of numeral stamps "7,85.8,10.310." lock, it seems to function properly however as everything works and bore gauge "156.14". Strangely the bolt is mismatched numbered as-designed. Gun comes in a brass corner leather luggage case with "9147" but it is the exact style the rifle ought to have and indeed shows green baize interior with spare firing pins and main springs, a set of corresponding "(Crown) / U / B" proofs. The checkered capped pistolgrip nickeled snap caps and a leather hand protector from Holland & walnut Mannlicher stock with schnabel tip and fish lip ahead of the Holland. A very handsome "funeral grade" Arrieta shotgun awaiting its forend checkering remains in very good plus to very fine condition return to the field. (3B10574-183) {MODERN} (4000/6000) retaining strong oil finish showing some scattered light dings, handling Est. 4,000 - 6,000 marks and some lightly chipped points along the checkering. There 61 J.P. Sauer & Son Royal Grade Scalloped Boxlock Double Ejectorgun appears to be a little spot of added finish near the front swivel and there serial #404301, 16 ga. (2 3/4"), 27 5/8" Special-Gewehr-Lauf-Stahl is also a very tiny tight drying crack forming at the upper tang but these barrels choked full in both with bright excellent bores. The barrels of this are relatively minor and unobtrusive. The wood shows some subtle but handsome 1951 proof-dated shotgun retain about 97% original blue very attractive tiger striping throughout the butt and the steel pistolarip showing some sparsely scattered speckles of mild oxidation staining and cap retains most of its rust blue. The stock also features the familiar some faint subtle thinning under bright light. The action retains about 95% vibrant original case-hardened colors showing just some very mild European left-side cheekpiece and is period import-marked "GERMANY" on the right side butt, the rifle very likely a pre-war import. muting to pewter along the high edges and scattered mild flaking of the The grooved horn buttplate showing a few deep holes from insect protective lacquer. The top lever and triggerguard retain a similar damage but otherwise rates very good and is embossed with a "MW" amount of original bright blue showing some mild flaking and the action monogram, naturally "Mauser Werke", Length-of-pull is 14 3/8" and the is embellished with tasteful light scroll and bordering. The checkered rifle is equipped with double set triggers, European sling swivels and capped pistolgrip walnut buttstock and splinter forend with lever release lever release forend. The rear sight is a standing 100 meter u-notch with remain in very fine condition showing a very tiny insignificant drying folding 200 and 300 leaves and the front is a silver bead on matted crack forming at the upper tang, a few sparse light dings and handling ramp, grooved for a hood that has been lost to the years. The action marks. The stock retains nice edges along the left-side European seems to function well mechanically. This is a very handsome German cheekpiece and stock flats and a piece of walnut has been added to the sporting rifle in classic old world form. (13B10660-5) {C&R} (2500/4000) butt now providing a 15" length-of-pull to the original hard rubber Est. 2,500 - 4,000 buttplate. Drops are 1 5/8" and 2 3/4" and the arm features solid matted barrel rib, European sling swivels, automatic safety, cocking indicator pins, single brass bead front sight, side clips and lock-up by dual under-lugs with Greener crossbolt. Lock-up is tight on-face with the top lever resting about center and the action seems to function well mechanically with strong ejectors; weight is about 6 lbs. 6 oz. A very attractive East German Sauer ejectorgun. (13B10636-97) {C&R} (1200/1800) Est. 1,200 - 1,800

62	L.C. Smith Featherweight Specialty Grade Sidelock Ejectorgun		65	Very Fine Winchester Model 61 In Original Box

The frame retains all its case-hardened colors and features the Webley & Scott 1moghout. The checkered walnut splinter forend rates as-new while the English-style buttstock rates excellent plus with a fine scratch on the right side of the comb. The elegant walnut buttplate with Webley & Scott "winged clay" logo provides a 14 5/8" length of pull to the single selective trigger with drops of 1 9/16" and 2 5/8". The ejectors are robust, the barrel is sighted with a silver bead and the action appears to function well mechanically. This fine shotgun is consecutively-numbered with the previous lot. (23B10636-54)		68	buttplate retains about 97% added blue with some pinprick pitting beneath the finish. All metal markings are clear and correct. The smooth walnut pistolgrip stock and forend rate very good plus to near excellent with a touch of added finish, "L.P." has been written in small circular indentations on the left side of the buttstock, a fine grain crack in the left side of the forend at the receiver and a few light handling marks. The original sights are intact and the action of this scarce Model 63 with desirable 20" barrel appears to function well mechanically. (23A10483-25) {C&R} [Perry White Collection] (800/1200) Est. 800 - 1,200 Winchester Model 63 Semi-Auto Rifle serial #62668A, 22 LR, 23" barrel with a bright excellent bore. The metal surfaces of this 1947-vintage rifle retain about 98% original blue with some scattered speckles of light oxidation, some very fine scratches on the top of the receiver and some light handing marks along the barrel. All metal markings are crisp. The smooth walnut pistolgrip stock and forend rate near excellent with a couple short hairline cracks at the heel by the buttplate and a few light handling marks. The original sights are intact and the action appears to function well mechanically. (23A10483-24) {C&R} [Perry White Collection] (700/900)

Lot Title/Description

69 Ameria San Giorgio Sideplated Boxlock Over Under Shotgun 72 Belgian Double Hammergun by Francotte serial #02811, 410 Bore, 28" ventilated rib barrels choked cylinder in serial #85602, 12 ga (2 3/4"), 29 5/8" Siemens-Martin steel barrels both with bright excellent bores. The barrels, forend iron, triggerguard, choked full with bright bores showing some scattered very small dents and lever retain about 98% original blue finish with a spot of light and the right barrel with a slight bulge about 1" back from the muzzle thinning visible under direct light on the left and right sides of the breech, The barrels retain about 95% original blue showing some scattered light light silvering on the tip of the lever, and a few minor handling marks. handling marks, tiny dings and a little minor pinprick pitting near the The coin-finished frame rates excellent and is nicely decorated with muzzles. There are two small filler screws along the underside barrel rib, hand engraved foliate scroll and floral motifs, and the trigger retains likely some swivel hardware that was removed, barrels are neatly maker nearly all its gold finish. The checkered pistolgrip walnut stock and marked and the breeches show fine quality foliate scroll. The action and forend are in excellent condition with a few light handling marks, the lockplates retain a similar amount of lovely vibrant case-hardened colors ventilated recoil pad lightly proud at the heel and showing light drving showing some subtle muting along the high edges and generous cracks and small chipping at the heel and toe, and features a rosewood protective lacquer. The top lever retains strong bright blue while the gripcap with a white diamond inlay and robust checkering. The shotgun triggerguard has mostly flaked to pewter gunmetal. The action is locks up tight with the lever coming to rest at center and features a embellished with fine quality tight foliate scrollwork throughout and the single selective trigger, nonautomatic safety, robust ejectors, and a 14 fences are percussion-styled with swirling faux cap deflectors housing 1/4" length of pull. Shotgun is sighted with a red fiber optic front and a the large-headed firing pins. One of the hammer screws appears to be a small steel bead mid rib, and appears to function well mechanically. This replacement but this is relatively unobtrusive. The checkered straight is a very high quality piece. San Giorgio was a small boutique father/son grip walnut buttstock and splinter forend with push button release maker in the Val Trompia region of Italy, obviously capable of very high remain in very fine to near excellent condition as lightly cleaned and quality work. (14A10615-8) {MODERN} (1500/2500) nicely refinished, showing a few tiny filler repairs to a sliver at the upper Est. 1,500 - 2,500 tang and tip of the forend, otherwise with just some scattered minor Handsome Simson Sideplated Two Barrel Set Over Under Shotgun handling marks and strong checkering. The buttstock exhibits wonderful serial #240769, 12 ga., both 28" solid rib Spezial Gewehr Laufstahl hard feathercrotch grain figure throughout. Length-of-pull to the generous chrome barrels, one set choked a light full in both, the other about solid black rubber pad is 14 7/8" with drops of 1 5/8" and 2 1/2". Lock-up is by dual under-bites and Greener crossbolt with side-clips and is solid improved modified and a tight full, all with bright excellent mirror-like bores. The barrels retain about 95-97% original blue, the loss is due on-face with the top lever about dead center. The rebounding hammers really to even fading with just a bit of muzzle wear; each showing are slightly out of time and otherwise seem to function well mechanically perhaps a tiny handling mark here or there. Both ribs are maker marked and weight is 6 lbs. 11 oz. (13B10735-6) {C&R} (1200/1800) and there are wedges of excellent quality scroll at the breeches, the Est. 1.200 - 1.800 Original System Tell Falling Block Target Pistol by Buchel 73 underlug of each barrel engraved "1" and "2" in turn. The frame and sideplates are a lovely silvery-pewter with bold oakleaf engraving on the serial #2157, 22 RF, 13 7/8" Bohler Stahl octagon barrel with a bright bolsters and at front of frame with a bellowing hart and two hind on the excellent bore. The barrel of this attractive target pistol retains about left, a gunning dog with the four pheasants right, and two flying ducks on 97% original rust blue with most of the loss due to a few sparsely the belly of the frame. The top lever retains most of its original blue with scattered small spots of minor oxidation and a few other light handling some very good slightly fading blue on the bow of the triggerguard which marks. The top flat is neatly matted and the front sight blade retains nice features engraved quail. The checkered capped pistolgrip English fire blue. The action retains a similar amount of lovely vibrant walnut buttstock rates very fine to excellent with some lovely grain case-hardened colors with some mild muting and freckling along the figure, left side rounded shadowline cheekpiece, pinched comb and a backstrap and triggerguard, the left side frame also with a thin scratch horn pistolgrip cap. The splinter forend is similar showing perhaps a bit from the disassembly lever. The rear sight also shows some lovely more wear, it and the butt with very nice skip-line checkering, the brilliant fire blue with a little mild oxidation and the disassembly lever uncheckered forend panels affixed to each set of barrels rate near shows nice straw color. The action is embellished with typical fine foliate excellent. The length of pull to the 1" ventilated recoil pad is 14 1/2". The scroll and filigree engraving throughout. The checkered walnut grip and arm locks up tightly on-face with dual underlugs and Kersten crossbolts, schnabel forend remain in very fine to near excellent condition showing the safety is non-automatic, there are dual pin style cocking indicators. a few scattered tiny dings and light handling marks. The grip features a All of the screw heads remain registered and unmaligned, proved in fluted horn grip cap, palm swell and generous rest on the right side and October 1965 and with 2 3/4" chambers, this is a rugged and very generous thumb rest on the left side with large neatly added flare. The handsome East German shotgun. (3C10636-89) {C&R} (4000/6000) action is opened with the familiar backstrap lever. The pistol is sighted Est. 4,000 - 6,000 with adjustable fine u-notch rear with adjustment key present and plain Attractive Belgian Sideplated Double Ejectorgun by Francotte 71 medium blade front and the action with adjustable double set triggers serial #19930, 12 ga (2 1/2"), 29 13/16" damascus barrels choked full seems to function well mechanically. A very fine example of these with bright very fine bores showing a few scattered tiny dents mostly in distinctive German target pistols. (13A10706-6) {C&R} (1000/1500) the left bore, the barrels also possibly shortened very slightly during the Est. 1,000 - 1,500 period of use, based on the chokes probably from 30". Based on the 74 Original System Kommer Falling Block Target Pistol by Meister antique Belgian proof mark, serial number and style this appears to be a serial #5350, 22 RF, 12 7/8" octagon barrel with a bright excellent bore. "medium grade" made around 1892 and shows Von Lengerke & The barrel of this fine target pistol retains about 95% original blue with most of the loss due to some scattered small spots of oxidation and Detmold New York retailer markings. The barrels of this Deelev patent gun retain about 70% thinning original plum-brown finish toning to a staining along the edges and some very mild thinning. The top barrel flat smooth pewter gunmetal and showing some scattered light handling is neatly matted and the front sight retains strong bright fire blue with a marks with strong swirling damascus patterns throughout. The action few spots of light oxidation along the sides. The action retains about and sideplates show wisps of vibrant case-hardened colors in the 98% lovely vibrant case-hardened colors retaining strong protective protected areas with the balance a handsome mix of smoky lacquer with just a few small areas of subtle muting and some mild case-hardening and silvery patina. The bottom metal, triggerguard and freckling along the gripstraps. The action is embellished with typical fine top lever all retain generous original bright blue while the faces of the foliate scroll and filigree engraving throughout and the trigger and its set triggers and push button forend release show pale fire blue. The fences lever show rich straw color. The checkered walnut grip and schnabel show bold acanthus leaves in relief while the balance is engraved with forend remain in very good plus to fine condition showing mostly worn excellent quality fine filigree scroll. The sideplates are both maker finish and some evidence of slight modifications to some of the marked, with "LONDON". The checkered pistolgrip walnut buttstock and contours, along with a few minor handling marks. The grip features a splinter forend remain in very fine to near excellent condition showing a horn grip cap, palm swell, height adjustable rest and trigger finger little bit of period added finish, darkening a bit along the bottom of the groove on the right side and generous thumb rest on the left side with pistolgrip and forend, showing just some sparsely scattered tiny dings neatly added tall flare. The action is opened by pulling down the and minor handling marks, the diamond point checkering with some light triggerguard. The pistol is sighted with adjustable fine u-notch rear sight and fine silver bead on post front with large protective ears and the wear. The stock shows some subtle attractive dark line grain figure and length-of-pull to the nice checkered horn buttplate is 13 7/8" with drops action seems to function well mechanically. The key for adjusting the height of the hand rest is included. A lovely vintage German target of 1 1/2" and 2 1/2". Lock-up is by dual under-bites and Greener pistol. (13A10706-5) {C&R} (1000/1500) crossbolt with side-clips and is solid on-face with the lever resting about dead center. Weight is 7 lbs. and the action seems to function well Est. 1,000 - 1,500 mechanically with strong ejectors. A handsome Francotte ejectorgun. (13C10735-3) {ANTIQUE} (2000/3000) Est. 2,000 - 3,000

Lot Title/Description

Westley Richards Scalloped Boxlock Double Ejectorgun with Extra 75 Barrels serial #15643, 12 ga (2 1/2"), 30" Whitworth compressed fluid steel chopper lump barrels numbered to the gun choked cylinder and improved modified and 30" Whitworth compressed fluid steel barrels numbered "15754" choked full in both. The matching barrels show mostly bright very good plus to very fine bores showing some areas of old light pitting nearer the muzzles while the second set of barrels are also mostly bright and about very good with a bit more noticeable pitting nearer the muzzles and the chambers also showing some patches of moderate pitting. Both sets of barrels retain about 98% excellent quality restored blacking, the crisp markings with 178 New Bond St. London address and Whitworth steel likely also refreshed a bit, and the breeches of both with excellent quality foliate scroll embellishments. There is one small scuff on the right barrel of the mismatched set, the rib along the original set of barrels is smooth while the other set shows nice matting. The action is a pewter gunmetal patina with some scattered areas of cleaned light pitting, a bit more noticeable in some areas along the right side and bottom metal. The nicely chiseled fences feature lovely foliate scroll and the action is embellished with the finest quality English scrollwork that remains guite strong throughout, some endearing bird scenes on either side, bounding hare on the triggerguard and dog on the bottom metal: these game scenes somewhat softened but mostly visible. The straight grip English walnut buttstock and splinter forend 7 with lever release and horn tip insert remain in very fine condition as lightly cleaned and carefully refinished, the forend showing a small repaired crack at the rear and otherwise just some scattered light handling marks. Length-of-pull to the solid red rubber pad is 14 1/2" with drops of 1 5/16" and 2 1/4" and weight is 6 lbs. 8 oz. Lock-up is by dual under-bites with hidden third fastener in the doll's head extension and is solid on-face with both sets of barrels. Minimum wall thicknesses in the matching barrels are about 0.015" right and 0.019" left, and in the mismatched set about 0.019" right and 0.20" left. The shotgun features automatic safety and Westley Richard's single selective trigger and the action seems to function well mechanically with strong ejectors. A more modern leather and green canvas covered luggage case with a Westley Richards label is included showing some light scuffs and mild wear. An attractive Westley Richards ejector gun made circa 1897-98. (13C10735-1) {ANTIQUE} (3000/4000) Est. 3,000 - 4,000 76 Smith & Wesson Model 57 Double Action Revolver 8 serial #N671690, .41 Magnum, 6" pinned barrel with an excellent bore. This nice late-1970s manufactured revolver shows very light use and maintains wonderful condition exhibiting about 99% original blue the only noteworthy wear is a light turn ring to the recessed cylinder. The .500" target hammer and .500" target trigger retain beautiful case-hardened colors with minor operational wear. The checkered goncalo alves factory target grips rate about excellent and feature an extractor relief cut and silver S&W medallions. The revolver features a red insert front sight, white outline micro adjustable rear sight, and it times and locks up as good as the day it left the factory. The revolver includes a factory Luan presentation case with the standard S&W cleaning kit displayed inside. The exterior of the case rates about very good, the wooden surfaces of the cover have scratches and dents, the interior rates poor as all the flocking on the moulded inner trav has flaked off. A fine addition for the collector or a great shooter for the .41 Magnum aficionado. (8A10718-59) {MODERN} (1200/1800) Est. 1.200 - 1.800 77 Smith & Wesson Model 29-2 Double Action Revolver serial #N311261, .44 Magnum, 6 1/2" pinned barrel with an excellent bore. This mid-1970s manufactured revolver remains in superb condition and shows very little use over the years. The metal surfaces retain about 99% original blue with a light turn ring on the recessed cylinder and a few minor handling marks. The .500" target hammer and .500" target trigger retain beautiful case-hardened colors with minor operational wear. The checkered goncalo alves target stocks with silver S&W medallions remain in magnificent condition and feature silver S&W medallions and extractor relief cut. This revolver features a red ramp front sight, white outline micro adjustable rear sight, with excellent timing and lock up. The revolver includes a factory Luan presentation case with the standard S&W cleaning kit displayed inside, plus a manual and paperwork. The exterior of the case rates about very good to excellent with scattered light dings and scratches, the interior remains in about very good condition showing light wear in the outline for the revolver, a hole where the rear sight rubs on the moulded interior, and the flocking remains about very good overall. A very nice addition to your revolver collection or the hunter looking for a classic .44 Magnum. (8A10718-60) {MODERN} (1500/2000) Est. 1,500 - 2,000

'8	Smith & Wesson Model 27-2 Double Action Revolver
	serial #N610509, .357 Magnum, 5" pinned barrel with an excellent bore.
	This late-1970s manufactured 357 Magnum revolver remains in
	magnificent condition showing very little or no use since it left the factory
	and features the desirable 5" barrel. The revolver retains about 98-99%
	original blue showing a light turn ring and one very small spot of oxidized
	pitting on the left side of the frame at the edge of the grips horns at the
	triggerguard bow junction. This spot is small and partially covered by the
	grip and would not be mentioned if not for the overall superb condition of
	the gun. The .500" target hammer and .500" target trigger feature
	splendid swirls of bright case-hardened colors. The checkered goncalo
	alves factory target grips feature silver S&W medallions and extractor
	relief cut they rate excellent showing a small flake of finish on the butt of
	the left panel. This revolver features a Baughman ramp front sight, black
	blade micro adjustable rear sight, and functions as good as the day it left
	the factory. The revolver includes a factory Luan presentation case with
	the standard S&W cleaning kit displayed inside, plus a manual and
	paperwork. The exterior of the case rates about very good to excellent
	with scattered light dings and scratches, the interior remains in about
	very good condition showing light wear in the outline where the revolver
	rests, and strong flocking overall. The 5" barrel gives the big N-frame the
	best balance, look, and feel, it is a favorite with collectors and shooters
	alike. (8A10718-58) {MODERN} (1000/1500)
	Est. 1,000 - 1,500
9	Smith & Wesson Model 27-2 Double Action Revolver
	serial #N12823, .357 Magnum, 3 1/2" pinned barrel with an excellent
	bore. This 1969-1972 manufactured revolver remains in excellent
	condition showing only light honest use. The revolver retains about 99%
	original blue showing a light turn ring on the recessed cylinder and a few
	very minor handling marks. The service hammer and service trigger
	show stunning case-hardened colors with minor operational wear. The
	checkered walnut factory Magna grips feature silver S&W medallions,
	they are numbered to the gun, and rate excellent. This revolver features
	a Baughman ramp front sight, black blade micro adjustable rear sight,
	and functions as good as the day it left the Springfield. Includes the
	original factory box that is correctly end labeled and numbered to the
	gun, cleaning rod with bore mop, manual, and paperwork. The 3 1/2"
	and 5" barrels garner the most interest from collectors and shooters.

The Tribore HP barrel is proofed to 1630 BAR enabling the use of steel shot through its improved modified and full Exis HP choke tubes which are included along with Exis HP modified, improved cylinder and skeet tubes. The ventilated rib runs all the way to the rear of the receiver for increased sight radius, the charging handle is extended, the barrel is sighted with a white bead at the muzzle and silver bead mid-rib and the action appears to function well mechanically. Included is the factory abs plastic hard case with two optional lockable clasps, adjustment tools, serialized 1630 BAR certificate, shims, manual and paperwork. (23AB10727-1) {MODERN} (1500/2000) Est. 1,500 - 2,000		about 93-95% original blue with some light wear toning to gray on the bolt knob, around the rear sight base and in a couple areas on the barrel, some mild flaking to gray patina around the forward floorplate screw, a few tiny impact marks around the rear sight and overall light handling marks from the years. The body of the bolt is bright and while very faint, it is properly-numbered to the rifle. The walnut capped pistolgrip Super Grade stock with wrap around diamond checkering, early European style left side cheekpiece, recessed swivel bases and contrasting ebony forend tip showing a thin gap in its fit to the forend on the right side, rates very good plus to perhaps near excellent with a tiny and easily-missed repaired chip to the left of the widows peak of the buttplate, a tiny ding on the point-of-comb and a few scattered light handlings marks. The floorplate is likely a replacement as it is not marked "SUPER GRADE", there a few light handing marks in the hard rubber gripcap and a pair of Super Grade swivels are included. The hooded gold-beaded blade front sight is intact, the rear has been blanked, mounted to the receiver is a Lyman 48WH sight missing its bridge, there is an added drilled and tapped hole with filler screw on the rear bridge and the action of this desirable rifle appears to function well mechanically. (23A10724-65) {C&R} (1800/2200)
83	Est. 1,200 - 1,800 As-New Fabarm XLR5 Velocity LR Semi-Auto Competition Shotgun serial #FA024617, 12 ga., 30" Tribore HP long ventilated rib Exis HP-choke barrel with a bright excellent bore. This high-performance competition-centric shotgun is in as-new-in-case condition. It boasts a myriad of features to both custom-fit the gun to the shooter and to ensure that shooter stands on the winners' podium. Customization begins with the checkered walnut Monte Carlo pistolgrip stock with slight right hand palm swell and adjustable comb and shim system for fine tuning the drop, deviation and cast while the trigger is adjustable for length of pull. The shotgun also features a balancing system with three included weights which screw into the front of the magazine cap to alter the weight up to 4 1/2 oz. The Tribore HP barrel is proofed to 1630 BAR enabling the use of steel shot through its improved modified and full Exis HP choke tubes which are included along with Exis HP modified, improved cylinder and skeet tubes. The walnut capped pistolgrip Super Grade stock with wrap around diamond checkering, early European style left side cheekpiece, recessed swivel bases and contrasting ebony forend tip showing a thin gap in its fit to the forend on the right side, rates very good plus to perhaps near excellent with a tiny and easily-missed repaired chip to the left of the widows peak of the buttplate, a tiny ding on the point-of-comb and a few scattered light handlings marks. The floorplate is likely a replacement as it is not marked "SUPER GRADE", there a few light handing marks in the hard rubber gripcap and a pair of Super Grade swivels are included. The hooded gold-beaded blade front sight is intact, the rear has been blanked, mounted to the receiver is a Lyman 48WH sight missing its bridge, there is an added drilled and tapped hole with filler screw on the rear bridge and the action of this desirable rifle appears to function well mechanically. 	Est. 1,200 - 1,800 As-New Fabarm XLR5 Velocity LR Semi-Auto Competition Shotgun serial #FA024617, 12 ga., 30" Tribore HP long ventilated rib Exis HP-choke barrel with a bright excellent bore. This high-performance competition-centric shotgun is in as-new-in-case condition. It boasts a myriad of features to both custom-fit the gun to the shooter and to ensure that shooter stands on the winners' podium. Customization begins with the checkered walnut Monte Carlo pistolgrip stock with slight right hand palm swell and adjustable comb and shim system for fine tuning the drop, deviation and cast while the trigger is adjustable for length of pull. The shotgun also features a balancing system with three included weights which screw into the front of the magazine cap to alter the weight up to 4 1/2 oz. The Tribore HP barrel is proofed to 1630 BAR enabling the use of steel shot through its improved modified and full Exis HP choke tubes which are included along with Exis HP modified, improved cylinder and skeet tubes. The ventilated rib runs all the way to the rear of the receiver for increased sight radius, the charging handle is silver bead mid-rib and the action appears to function well mechanically. Included is the factory abs plastic hard case with two optional lockable clasps, adjustment tools, serialized 1630 BAR certificate, shims, manual and paperwork. (23AB107271) {MODERN} (1500/2000) Est. 1,500 - 2,000 Browning Citori Skeet Over Under Shotgun serial #08793PT1E3, 28 ga, 26" ventilated rib barrels choked skeet in both with bright excellent bores. The metal surfaces retain about 97% original blue with light wear on high edges and contact points, and a very minor handling mark or two; the trigger retains about 80% gold finish with light high edge wear. The checkered pistolgrip walnut stock and forend are in near excellent condition with a light ding on the left side of the forend, a few flattened points of checkering on the forend,		about 93-95% original blue with some light wear toning to gray on the bolt knob, around the rear sight base and in a couple areas on the barrel, some mild flaking to gray patina around the forward floorplate screw, a few tiny impact marks around the rear sight and overall light handling marks from the years. The body of the bolt is bright and while very faint, it is properly-numbered to the rifle. The walnut capped pistolgrip Super Grade stock with wrap around diamond checkering, early European style left side cheekpiece, recessed swivel bases and contrasting ebony forend tip showing a thin gap in its fit to the forend on the right side, rates very good plus to perhaps near excellent with a tiny and easily-missed repaired chip to the left of the widows peak of the buttplate, a tiny ding on the point-of-comb and a few scattered light handlings marks. 168	Rare U.S. Model 1830 Cadet Musket Percussion-Converted by Philo S. Newton serial #146, .57 cal., 40" barrel with a very fine bore. The Model 1830 Cadet musket was the first purpose-built arm for West Point and the various other military academies. According to Moller on page 474 of American Military Shoulder Arms Vol. 2, only 153 muskets were made with 40" barrels while 154 were produced with 36" barrels. This fine example was nicely-converted to percussion using the drum and nipple method by Philo S. Newton of Hartford, CT who, according to Stockel, was active from 1842-1879. The metal surfaces are toning to a gray patina with scattered spots of old light oxidation primarily on the triggerguard and buttplate, along with a few areas of tiny impact marks along the barrel. The remnant of the original brass pan and front sight blade have aged to a warm mustard patina. The lockplate retains about 90% original case-hardening with the colors remaining mostly vibrant, darkening somewhat but still very attractive overall, while the hammer is of excellent quality with fine foliate embellishments and dolphin head		171	what appears to be "114451" on the left side of the buttstock and the stock is otherwise unmarked. The sling swivels and sights are intact, a button-head ramrod with swelled shank from a later model of Trapdoor rifle is included and the action is strong and crisp. (23A10648-58) {ANTIQUE} (500/700) Est. 500 - 700 Excellent Winchester Model 12 Limited Edition Grade IV Slide Action Shotgun serial #WMT0958, 20 ga., 26" ventilated rib barrel choked improved cylinder with a bright excellent bore. The metal surfaces of this lovely Miroku-produced shotgun retain about 99% original blue with a tiny spot of loss toning to gray on the left side of the barrel and the bolt is bright. The receiver features simple gold-filled borders and game scenes with two dogs on point on the left and ducks taking flight on the right. The checkered select walnut capped pistolgrip stock and forend rate as-new with the buttstock displaying particularly attractive grain figure. The barrel is sighted with a white bead, the original box and manual are

According to Moller on page 474 of American Military Shoulder Arms Vol. 2, only 153 muskets were made with 40° barrels while 154 were produced with 36° barrels. This fine example was nicely-converted to percussion using the drum and nipple method by Philo S. Newton of Hartford, CT who, according to Stockel, was active from 1842-1879. The metal surfaces are toning to a gray patina with scattered spots of old light oxidation primarily on the triggerguard and buttplate, along with a few areas of tiny impact marks along the barrel. The remnant of the original brass pan and front sight blade have aged to a warm mustard patina. The lockplate retains about 90% original case-hardening with the colors remaining mostly vibrant, darkening somewhat but still very attractive overall, while the hammer is of excellent quality with fine foliate embellishments and dolphin head nose; no doubt the work of Mr. Newton. The small lock parts retain vibrant fire blue along with clear matching assembly marks while the drum features finely reeded edges. All the various metal markings are crisp with the lockplate properly stamped "SPRING / FIELD / 1830" behind the hammer and with a Federal Eagle over "US" ahead while the barrel tang is also dated 1830. The left side of the breech features a bold raised "P" in sunken oval cartouche with scalloped edges along with "(eagle head) / V" and finally the serial number. "CAY" is stamped on the triggerguard extension and "P.S.NEWTON" is clearly marked on			what appears to be "114451" on the left side of the buttstock and the stock is otherwise unmarked. The sling swivels and sights are intact, a button-head ramrod with swelled shank from a later model of Trapdoor rifle is included and the action is strong and crisp. (23A10648-58) {ANTIQUE} (500/700) Est. 500 - 700 Excellent Winchester Model 12 Limited Edition Grade IV Slide Action Shotgun serial #VWIT0958, 20 ga., 26" ventilated rib barrel choked improved cylinder with a bright excellent bore. The metal surfaces of this lovely Miroku-produced shotgun retain about 99% original blue with a tiny spot of loss toning to gray on the left side of the barrel and the bolt is bright. The receiver features simple gold-filled borders and game scenes with two dogs on point on the left and ducks taking flight on the right. The checkered select walnut capped pistolgrip stock and forend rate as-new with the buttstock displaying particularly attractive grain figure. The barrel is sighted with a white bead, the original box and manual are included and the action appears to function well mechanically. Only 1000 of these fine shotguns were produced between 1993-1995. The barrel is sighted with a white bead, the original box and manual are included and the action appears to function well mechanically. Only 1000 of these fine shotguns were produced between 1993-1995. (23B10636-6) (MODERN) (1200/1800) Est. 1,200 - 1,800 Browning Model 12 Limited Edition Grade V Slide Action Shotgun serial #03396PN932, 20 ga., 26" ventilated rib barrel choked modified with a bright excellent bore. The metal surfaces of this lovely Miroku-produced shotgun retain 99% plus original blue with a very tiny ding on the left edge of the barrel rib and a touch of operational silvering on the action bar and magazine tube. The right side of the receiver is adorned with an etched and gold-plated wetlands scene featuring four flying ducks and the left displays an upland scene of a pair of hunting dogs and a ruffed grouse; each scene bordered by foliate scroll. The bolt and carrier are bright with a couple tiny spots of light oxidation staining on the front of the carrier. The Grade V 22
168	Rare U.S. Model 1830 Cadet Musket Percussion-Converted by Philo S. Newton serial #146, .57 cal., 40° barrel with a very fine bore. The Model 1830 Cadet musket was the first purpose-built arm for West Point and the various other military academies. According to Moller on page 474 of American Military Shoulder Arms Vol. 2, only 153 muskets were made with 40° barrels while 154 were produced with 36° barrels. This fine example was nicely-converted to percussion using the drum and nipple method by Philo S. Newton of Hartford, CT who, according to Stockel, was active from 1842-1879. The metal surfaces are toning to a gray patina with scattered spots of old light oxidation primarily on the triggerguard and buttplate, along with a few areas of tiny impact marks along the barrel. The remnant of the original brass pan and front sight blade have aged to a warm mustard patina. The lockplate retains about 90% original case-hardening with the colors remaining mostly vibrant, darkening somewhat but still very attractive overall, while the hammer is of excellent quality with fine foliate embellishments and dolphin head nose; no doubt the work of Mr. Newton. The small lock parts retain vibrant fire blue along with a Federal Eagle over "US" ahead while the barrel tang is also dated 1830. The left side of the breech features a bold raised "P" in sunken oval cartouche with scalloped edges along with "(eagle head) / V" and finally the serial number. "CAY" is stamped on the triggerguard extension and "P.S.NEWTON" is clearly marked on the top of the breech and on the center of the sideplate. The American black walnut stock rates near fine with a light added coat of finish over the typical scattered dings and light handling marks along with few abrasions on the edges of the ramrod channel. There is a bold "MT" in block letters stamped behind the triggerguard and the stock is otherwise unmarked. The sling swivels and trumpet-head ramrod with threaded end are included and the action is robust and crisp. A very fine example			what appears to be "114451" on the left side of the buttstock and the stock is otherwise unmarked. The sling swivels and sights are intact, a button-head ramrod with swelled shank from a later model of Trapdoor rifle is included and the action is strong and crisp. (23A10648-58) (ANTIQUE) (500/700) Est. 500 - 700 Excellent Winchester Model 12 Limited Edition Grade IV Slide Action Shotgun serial #WMT0958, 20 ga., 26" ventilated rib barrel choked improved cylinder with a bright excellent bore. The metal surfaces of this lovely Miroku-produced shotgun retain about 99% original blue with a tiny spot of loss toning to gray on the left side of the barrel and the bolt is bright. The receiver features simple gold-filled borders and game scenes with two dogs on point on the left and ducks taking flight on the right. The checkered select walnut capped pistolgrip stock and forend rate as-new with the buttstock displaying particularly attractive grain figure. The barrel is sighted with a white bead, the original box and manual are included and the action appears to function well mechanically. Only 1000 of these fine shotguns were produced between 1993-1995. 194	Merkel Model 202 Over Under Double Rifle] [196	L.C. Smith Field Grade Sidelock Double Shotgun
	serial #20120, 7x65R, 25 1/2" Bohler special steel barrels with bright			serial #FW128827, 16 ga., (2 9/16"), 28" armor steel barrels choked a
	excellent bores. The barrels retain about 97% original blue, the loss due			tight full in both, with bright excellent bores. This is a rather nice shotgun
	to some even fading and very light muzzle wear with very light border			remaining in very very fine condition. The barrels retain about 97 to
	engraving at the flared bolsters at rear. The frame retains perhaps 40%			perhaps 98% original blue, the loss is due primarily to even fading and a
	smoky color case-hardening, the belly toned to more of a pewter tone			bit of muzzle wear, showing a very sparse and very light handling mark
	and showing sparse light open scroll and floral engraving with geometric			here and there sprinkled about the surface. The frame and lockplates
	bordering. The checkered capped pistolgrip European walnut stock,			retain a similar amount of original vibrant color case-hardening, toning
	forend and barrel panels all rate excellent as very nicely refinished some			on the sharp edges and contact points with the tiniest bit of oxidation or
	time ago. The stock features a flared left side cheekpiece, blued steel			light freckling on the edges of the fences. The checkered capped
	pistolgrip cap and a neat little chin strap to the rear of the grip. The			pistolgrip American walnut buttstock rates very fine showing some light
	length of pull to the old English pad is 14". The rifle features pin style			scattered dings and handling marks from the years and some case
	cocking indicators, double triggers, the front a single set, nonautomatic			impressions left and right no doubt where a solvent or perhaps a damp
	safety and extractors. Lockup seems tight on face with Greener			gun case affected the finish. The splinter forend rates fine showing
	crossbolt and the arm seems to function properly, the lower extractor			perhaps a few more handling marks and worn finish with some bruises
	with a spring-loaded plunger for better rim engagement. Sighted with a			in the checkering. The length of pull to the grooved hard rubber buttplate
	sourdough style front and simple u-notch standing rear on the quarter rib			is 14" showing drops of 1 1/2" and 2 5/8". The gun locks up tight on-face
	along with quick detach dual claw bases which mount a nice Schmidt &			with the top lever just right of center. Features double triggers, automatic
	Bender 6x42 scope with heavy German crosshair reticle and bright			safety, and extractors, the arm seems to function well mechanically. A
	excellent optics. Scope itself rates very fine with some very light			handsome smaller bore Field Grade that will continue to improve in
	handling marks present. A fine quality double rifle in a versatile			value as the years pass, showing some very lovely color
	chambering, very popular in Europe for big game including Deer,			case-hardening. (3B10636-99) {C&R} (1800/2200) Est. 1,800 - 2,200
	Moose, Bear, and Wild Boar, loaded ammunition is available from Sellier		197	
	and Bellot, Lapua and others. (3A9100-769) {C&R} [Richard "Stretch" Kennedy Collection] (3000/5000)		197	Lovely Unmarked German Bockbuchsflinte Over Under Combination Gun
	Est. 3,000 - 5,000			16 ga. x 9.3x72R, 27" barrels with bright excellent bores, the shotgun
195	Unmarked German Büchsflintendrilling Boxlock Combination Gun			barrel choked about modified. The barrels retain perhaps 80% fading
100	serial #401266, 16 Ga x 8x57JR, 26 1/2" Krupp Flusstahl barrels, the 16			original blue, the loss is due to even toning over all, now more of a plum
	ga. choked full, all with bright about excellent bores which may show			patina. The barrel bolsters at rear show some small wedges of tight
	some very light frosting scattered about here or there. This is a very			scroll engraving of nice quality. The scalloped boxlock frame has
	interesting gun in a very unusual configuration with shotgun barrel right,			interesting teardrops chiseled on the bolsters and actually retains some
	rifle barrel left and rifle barrel under. The barrels retain about 97% fading			nice color case-hardening, perhaps 70%. It shows very nice quality tight
	original blue which is toning primarily to plum and wearing to pewter in			flowing scroll, geometric bordering and a nice depiction right of a
	the area of the breeches, with perhaps a light handling mark here or			bellowing hart and hind and two gunning dogs on point on left. The
	there, a small ding on the left tube beneath the word "Stahl". The			quality of the engraving is actually excellent and it is a shame the arm is
	scalloped boxlock frame is now a dull pewter patina and shows the			not signed. The checkered pistolgrip European walnut stock rates
	expected overall German oakleaf engraving with two running hare left			excellent as refinished many years ago, the checkering likely nicely
	and a doe and fawn right. There are large frame bolsters beneath the			chased at that time, showing only scattered minor handling marks here
	fences, which feature sideclips as well, the breech faces show disc			and there. It features a rounded left side cheekpiece, horn pistolgrip cap
	strikers with engine turning on the standing breech and flats, with			and a four place cartridge trap along the toeline. The splinter style
	vertical machining on the breeches of the barrels. The checkered round			forend is similar showing perhaps a few more handling marks and
	knob pistolgrip European walnut buttstock rates fine, now devoid of			scratches. The length of pull to the 1/2" rifle pad is 14". The arm features
	varnish, showing what appears to be oxidation staining leaching in at the			a nice horn triggerguard, double triggers, the front a single set, pin-style
	heel of the butt. The checkering is rather nice and there is a chinstrap to			cocking indicators, non-automatic safety and extractors. The gun locks
	its rear and a rounded left side shadowline cheekpiece; the splinter			up tight on-face with dual underbites and Greener style crossbolt. A fine
	forend rates very good showing a bit more wear. The length of pull to			Bockbuchsflinte proofed in 1925. (3B9100-1336) {C&R} [Richard
	the grooved horn buttplate is 14 1/4", that plate appearing to be a			"Stretch" Kennedy Collection] (1800/2200)

The rifle is sighted with a white beaded blade front and Lyman 66A receiver sight which is missing its aperture and the original rear sight has been filled with a slot blank. The upper tang screw shows light slot wear and the action appears to function well mechanically. (23B10483-51) {C&R} [Perry White Collection] (1500/2000) Est. 1,500 - 2,000 Winchester Model 94 Lever Action Rifle serial #919702, 32-40, 26" octagon barrel with full magazine and a bright excellent bore. The barrel, magazine tube and forend cap retain about 87-90% original blue with light flaking to pleasant gray patina on	229	about 90% original blue with pinprick flaking and thin wear along the edges. The left side of the barrel is marked "22 SHORT" along with the other standard markings. The smooth pistolgrip walnut buttstock and small 11-groove forend remain in very good plus condition with light dents, handling marks and minor flaking along the checkered steel buttplate. The triggerguard matches the frame and the rifle is sighted with standard open sights. A solid very good plus early octagon barrel Model 61 in seldom encountered chambering. (5C10483-23) {C&R} [Perry White Collection] (1500/2500) Est. 1,500 - 2,500 Weatherby Custom Mark V Bolt Action Rifle serial #H73647, 300 Weatherby Magnum, 24" barrel with a bright excellent bore. The metal surfaces on this Japanese made rifle retain 95-97% original blue with a couple insignificant storage marks along the edges, loss due to a small area of wear about 4" from the muzzle where the top of the barrel rubbed against another surface. The action has toned to plum, and the floorplate is marked with "WEATHERBY CUSTOM" in riband surrounded by light floral scroll engraving. The checkered Monte Carlo walnut stock features a left-side cheekpiece, rosewood forend tip, white diamond inlay gripcap and #16 laurel leaf carving with abalone inlays on both sides; there is some light water staining on the right side of the buttstock. Rifle features a nice, light Canjar single set trigger and the flued bolt is numbered "647". Original
	serial #291636, 38-55, 26" round barrel with full magazine and a bright excellent bore. The barrel and magazine of this 1905-vintage rifle retain about 95% original blue with a thin streak of loss on the top of the breech, light silvering at the muzzle and an about 1 1/2" area on the right side of the muzzle toning to gray patina with fine speckles of light oxidation staining and light handling marks. The lever is toning to a pewter-gray case-hardened patina with some remnants of case-hardened colors on the left side while the crescent buttplate is toning to gray. The balance of metal surfaces retain about 85-90% original blue with the high edges and carry point of the receiver toning to gray and overall light handing marks. All metal markings are correct and crisp. The smooth walnut stocks rate near excellent with a light coat of added finish and a few scattered very light handling marks. The rifle is sighted with a white beaded blade front and Lyman 66A receiver sight which is missing its aperture and the original rear sight has been filled with a slot blank. The upper tang screw shows light slot wear and the action appears to function well mechanically. Lot Title/Description

263 Cased Pair Winchester / Colt Commemorative Single Action Army 265 AH Fox A Grade Boxlock Double Shotgun serial #28221, 12 ga., (2 1/2"), 28" barrels choked a light full in both, with Revolvers serial #2716WC & 2717WC, both are .44-40 W.C.F., 7 1/2" barrels with bright very fine to perhaps near excellent bores, the right tube showing a near excellent bores showing slight frosting in each. These ornate small ding and an old raised dent, the left with three or four old raised revolvers commemorate the collaboration between the two companies dents along their bottom edge which seem to have been well done, making one of the most legendary combinations in firearms history, the leaving the steel a bit wavy. The barrels retain perhaps 90-92% original Model 1873, and the Frontier Six-Shooter in .44 W.C.F. They are further fading gray-blue, the loss due primarily to the even fading, some muzzle enhanced with the addition of beautiful one-piece ivory grips. The metal wear and with scattered light scratches and handling marks, a few more surfaces of both retain about 99% original blue finish and prominent on the left tube. The bold A-engraved frame and top lever are case-hardened colors with perhaps a few very minor handling marks. a silvery pewter patina and are primarily smooth with some very light The case-hardened colors are a mixture of beautiful blues, purples, and oxidation staining on the rounded portion. The checkered capped straw. The right side of the barrels have an embossed gold image of the pistolgrip American walnut buttstock rates very good, now devoid of Colt factory flanked by gold foliate scroll; the left side has gold "COLT [in finish, with worn checkering and the expected light dings and handling an oval]" also flanked by gold foliate scroll. The unfluted cylinders are marks from use afield; the splinter forend is similar showing a bit more adorned with embossed foliate scroll and has "WC [in an oval]" on one wear. The length of pull to the grooved hard rubber buttplate is 14 3/16 side and "[Rampant Colt on a globe]" on the other side, the backstrap with drops of 1 5/8" and 2 7/8". The gun locks up tightly on-face with the has the likeness of Sam Colt's signature in gold leaf. The smooth top lever still right of center and features automatic safety, double two-piece walnut grips are provided with the gun and are assembly triggers and extractors. There is no barrel thickness noted below .030", numbered to the individual gun and both rate excellent. Only one of the most being well over. A worn but no doubt eminently usable A-grade grip pins are provided but should be an easy replacement. The provided Fox for fall birds. (3A10574-76) {C&R} (1000/1500) grips are beautiful one-piece ivory with Scrimshawed figures on both Est. 1,000 - 1,500 266 Savage Fox Sterlingworth Boxlock Double Shotgun sides and remain in excellent condition. The left side of the grips has the serial #373680, 16 ga., 28" barrels choked a tight modified and full, with head of a Bald Eagle in an oval and is signed "M. CARINO", the right side of the grip features a Native American chief with full war bonnet bright excellent bores. The barrels are an overall toned dark and light holding a Bald Eagle feathered object, probably a pipe, in an oval also gray patina with some plum tones mixing in, with more drifting at the signed by "M. CARINO". This set includes the factory Colt Custom Shop breeches and the muzzles. They are indeed Savage-marked and walnut presentation case with cut outs for both revolvers, red velvet special alloy forged steel. The frame is marked "Fox Sterlingworth" and lined with a prominent oval "COLT" embroidered patch on the inside of retains perhaps 30% original color case-hardening, prominent beneath the cover. The interior rates excellent while the exterior is about very the lever, behind the fences and in the area of the triggerguard. There good to excellent showing light handling marks and flaking of the finish are scattered spots of light oxidation here and there, a few on the belly on the cover. Overall, a gorgeous set of revolvers enhanced with which have left pinprick pitting. The checkered pistolgrip American beautifully executed ivory grips and displayed in a solid display case. walnut buttstock and Savage-style splinter forend rate very good, the (8A9100-1406A,1406B) {MODERN} [Richard "Stretch" Kennedy buttstock primarily devoid of varnish and showing a repaired crack at the Collection] (4000/6000) right head of the stock adjacent to the top lever. The length of pull to the Est. 4,000 - 6,000 grooved hard rubber butt is 14 3/8" with drops of 1 1/2" and 2 1/2". The Franz Kettner Scalloped Boxlock Over Under Shotgun Two Barrel Set buttplate is cracked and missing a portion from the top screw to the 264 serial #2721, 12 ga, 25 3/4" ventilated rib barrels choked modified and heel. The gun locks up Fox-tight with the top lever still right of center improved modified with bright excellent bores, and 30" ventilated rib and features double triggers, automatic safety and extractors. An barrels choked full in both with bright near excellent bores with a few excellent candidate for upland birds this October. (3A10636-56) {C&R} small spots of light pitting. The 30" barrels retain about 90% restored (1000/1500) rust blue thinning and toning to gray at the muzzle and with streaks Est. 1,000 - 1,500 toning to brown along the length when viewed under direct light, but 267 British Improved Revolving Percussion Pepperbox Pistol by Benjamin appearing much stronger in ambient light, and a few small spots of Coaswell previous light pitting beneath the finish. The 25 3/4" barrels retain about .45 cal, 3 1/2" six-barrel cluster with lightly oxidized smooth bores. The 95% of what appears to be original blue with light wear at the muzzles, barrels and other iron surfaces of this attractive pistol have mostly toned some light thinning and toning to plum-brown, a spot of light pitting on to a nice rich plum-brown patina showing some scattered old oxidation the underside of the lower barrel, and a few minor handling marks. The staining and a few pinprick pits, the front edge of one barrel with a casehardened frame has toned to a pleasant gray patina, spots moderate but small ding. The barrel cluster features nice raised flutes retaining a silvery casehardened patina, with some very light oxidation that show softened but visible period London proof marks and the round staining, and strong case colors present beneath the lever; the lever portions of the barrels are individually numbered. The attractive German retains strong blue finish with light toning to plum under direct light and silver frame is extensively embellished with fine quality English silvering at the tip. The horn triggerguard is in very good condition with a scrollwork, handsomely executed with fine line detailing and light few light handling marks and a light crack at the front of the bow, to the geometric borders. The frame with integral nipple shield has taken on a very nice mellow patina overall, with some areas thinning to the left side of the screw. The checkered capped pistolgrip walnut stock and forend are in very good condition as lightly period refinish with a neatly underlying ocher brass along with a few light dings and handling marks. repaired crack through the wrist, easily missed unless one is looking for The left side of the frame is neatly marked "B. COGSWELL / 224.STRAND.LONDON" (the number obscured slightly by a small scuff) it, a short hairline crack at the rear of the upper tang, and a few light and the right side "IMPROVED / REVOLVING PISTOL". The smooth dings and spots of flattened checkering; the 1" grooved horn buttplate is in very good plus condition with a small chip at the toe and a few of the walnut grips remain in very fine condition retaining a healthy amount of typical drying checks. The stock features a heart and diamond inlay at original varnish showing some scattered light dings, handling marks and the tip of the stock flats, nicely scroll engraved steel gripcap and forend some very minor warping along the top edges. The pistol is equipped iron, sling swivels on the toeline and lower barrel, a shadowline left-side with a sliding safety device, the barrels rotate counter-clockwise and the cheekpiece, and an about 14 1/8" length of pull. The frame and breech action generally seems to function well mechanically with good timing of the barrels show lovely foliate scroll engraving and floral motifs on the and lock-up on most of the barrels, though it overtimes and spins freely screw and bolt heads, both barrels are marked "FRANZ KETTNER", on one of them. This is a fine and interesting example from a respected "-SPECIAL-GEWEHR-LAUF- / -STAHL-", and British firm likely made between 1857 and 1863, just before Harrison "-FRIED.KRUPP.AG.-/ -ESSEN-", and both sets of barrels and joined in partnership. (13B10639-1) {ANTIQUE} (1000/1500) the forend are numbered to the shotgun. The shotgun locks up tight with Est. 1,000 - 1,500 the lever coming to rest at center and features double triggers, a nonautomatic safety, ejectors, is sighted with a one brass bead, and appears to function well mechanically. An attractive two-barrel set with some lovely engraving. (14B9100-933) {C&R} [Richard "Stretch"

273	British Double Hammergun by G. E. Lewis & Sons	276	German Army C96 Semi-Auto Pistol by Mauser Oberndorf
	serial #12084, 12 ga (2 1/2"), 30" barrels choked improved cylinder and		serial #314598, 30 Mauser, 5 1/2" barrel with a bright excellent bore.
	full with bright near excellent bores showing a little bit of stubborn fouling		The metal surfaces of this Imperial German military-accepted pistol
	and the right barrel with one tiny raised ding on the underside about 9		retain about 85-90% original blue showing high edge and operational
	1/4" back from the muzzle. This shotgun shows later Birmingham nitro		wear along with some sparsely scattered small areas of minor oxidation.
	proofs for 2 1/2" shells at 850 bar 1 1/8 oz load. The barrels retain about		There are a number of dings or tool marks scattered along the barrel
	95% nice quality re-blacking showing some sparsely scattered small		and sides of the frame at the rear, some perhaps a bit moderate
	areas of mild oxidation, light handling marks and a few areas of partially		particularly the left side frame, and also some dings at the muzzle that
	smoothed-over pitting beneath the finish mostly nearer the breeches		do not impinge upon the very nice bore. The bolt remains mostly bright
	and muzzles. There is a splotchy area on either barrel above the forend		and the hammer and fire control group are the familiar mild gray
	that is a darker tone than the balance of the barrel finish but it is		case-hardened patina. The remaining small parts retain particularly
	unobtrusive and only noticeable under direct light. The barrel markings		brilliant and lovely fire blue just showing some muting to gray along the
	remain legible showing 32 & 33 Lower Loveday St. Birmingham		sharp edges and a few tiny oxidation speckles and the right side breech
	address. The action and lockplates are mostly a pleasant silvery		flat shows a crisp military acceptance stamp. The 33-groove walnut
	gunmetal patina showing remnants of silvery case-hardened patina and		grips are stamp-numbered matching the pistol and remain in very fine
	some sparse oxidation staining, both lockplates neatly maker-marked		condition showing some light edge wear and handling marks, the inside
	and showing tasteful light border embellishments and small foliate		of the right grip also with the name of a former owner written in pencil.
	flourishes. The hammers, top lever and triggerguard also show restored		The lanyard ring is missing, all of the serialized parts are otherwise
	blue finish, the bow of the guard with some light pitting and the left		matching and the action seems to function well mechanically. This is a
	hammer spur reattached some time ago. The checkered walnut straight		very attractive and desirable military broomhandle pistol for the German
	grip buttstock and splinter forend with horn tip insert remain in very good		martial collector. (13B10712-2) {C&R} (1200/1800)
	plus condition showing the expected overall light dings and handling		Est. 1,200 - 1,800
		277	Scarce Hopkins & Allen Dictator Cartridge-Converted Single Action
	marks, the upper tang a little bit proud of the wood but the fit otherwise	211	
	very nice overall and the flattop diamond checkering with mullered		Revolver
	borders remaining strong. Length-of-pull to the grooved horn buttplate is		serial #4900, 38 RF, 4" round barrel with a partially bright very good
	14 1/2" with drops of 1 5/8" and 2 1/4". The rebounding hammers are		bore showing a few scattered patches of moderate oxidation and pitting
	perhaps a little bit out of time but the locks otherwise seem to function		with otherwise strong rifling. This is a fine example of the unmarked
	well mechanically. Barrel lock-up exhibits very slight play but it is		variant Dictator, factory converted for cartridges. The barrel and cylinder
	relatively minor and the action is otherwise quite sturdy featuring dual		retain generous streaks of original bright blue, with strong blue on the
	under-bites, Greener crossbolt and side clips, the top lever resting about		breech flats, and the balance taking on an attractive flaked gray-brown
	center. Minimum wall thicknesses measured about 0.020" in a few small		patina, along with a little sparse oxidation staining and minor handling
	areas of the right barrel and 0.023" in the left and weight is a little bit		marks. The cylinder vignettes with bear, dog, and eagle heads, panoply
	over 6 1/2 lbs. (13A10698-1) {C&R} (1000/1500)		of arms, and Indian head remain completely intact and mostly strong.
	Est. 1,000 - 1,500		
074			The frame, triggerguard and trigger retain about 90-92% original nickel
274	Winchester Model 71 Deluxe Lever Action Rifle		finish with most of the loss due to a flaked area on the left side frame
	serial #24020, 348 WCF, 24" round barrel with a bright excellent bore.		that shows some old light pitting, and some other sparsely scattered
	The barrel and magazine tube of this 1947-made rifle retain about 94%		more mild flaking and freckling. The hammer retains vibrant
	original blue with most of the loss due to some scattered light handling		case-hardened colors and the smooth walnut grips remain in near
	marks, subtle thinning and the blue taking on a slight plum tone under		excellent condition retaining strong original oil finish showing a couple of
	bright light. The action retains about 90-92% original blue showing high		tiny flakes and dings mostly along the bases. The left panel is
	edge wear and handling marks, the bottom metal toning to gray with		stamp-numbered matching the gun and all of the other numbered parts
	some mild oxidation speckling. There is a series of thin scratches along		are matching as well by either the serial number and or the conversion
	the top rear corner of the left side action and a previous owner has also		number (1184). The action seems to function well mechanically. A fine
	lightly scratched their name and address along the left side (they		example of a scarce gun with an estimated 500-750 produced.

The rear sight aperture insert is an old ad-hoc replacement and the action seems to function well mechanically. A very respectable example of these potent Winchester lever guns. (13B10630-2) {C&R} (1800/2200) Est. 1,800 - 2,200 German P.08 Luger Pistol by DWM serial #5855a, 9mm, 4" barrel with a fair bore showing dark grooves and old pitting throughout and worn evident rifling. The metal surfaces of this 1921-dated pistol retain about 80-85% original blue showing overall edge wear and areas thinning to gray-brown patina under bright light along with some mild oxidation along the gripstraps and barrel. The small parts retain good straw color with the expected muting from the years and some mild gray-brown speckling while the sear spring retains good fire blue. The correct Weimar "dove" proof and inspector stamps are very soft as is commonly seen and the other markings remain intact and strong. The checkered beech grips remain in very good condition showing some lightly chipped points and edge wear, the grips are un-numbered though no doubt the originals as their fit is excellent. All of	278	Est. 1,500 - 2,000 Scarce H&R-Imported Heckler & Koch Hk4 Semi-Auto Pistol Four Barrel Set serial #10655, 22 LR, 25 ACP, 32 ACP and 380 ACP, 3 1/2" barrels all with bright excellent bores. The metal surfaces retain about 99% original blue and matte black finishes with the only real loss due to a few sparse freckles and minor handling marks mostly along the sides of the slide, which are also taking on a slight plum tone under bright light. All barrels remain bright and brilliant and the markings are crisp. This example is 1967 proof-dated and the gun itself not specifically marked by H&R. The checkered dark brown plastic grips remain in excellent condition and the action seems to function well mechanically. The pistol is currently set up for 380 ACP and has a proper 380 magazine. The original black plastic case with red felted interior and blue and gold H&R lid insert is included remaining in very fine condition, the interior lining showing some staining and light wear. The other black plastic case also includes the blue and gold H&R lid insert and holds the three remaining extra barrels and recoil springs, four magazines (one for each chambering) and all four factory test targets each numbered to both the gun and their respective barrel numbers. The interior lining of the case does show some cracking and minor damage along the edges of the barrel cutouts but this is relatively minor. A very fine ensemble for the modern pistol or H&K collector. (13B10729-43) (C&R) [The Richard Littlefield H&R Collection] (2500/3000)
275	clear. The checkered capped pistolgrip walnut buttstock and forend remain in good condition retaining a healthy amount of original varnish that shows more wear and flaking along the forend. There is a crack running the length of the left side wrist between the two tangs that appears to show an old repair, a few other smaller minor cracks present around the upper tang along with the expected scattered light dings and handling marks. The end of the butt does show some areas of attractive grain figure, the hard rubber pistolgrip cap remains in very fine condition and the original checkered stele buttplate is present. The rear sight dovetail has been blanked and the rifle is sighted with a Lyman riding bolt peep sight and plain bead front sight with hood. The rear sight aperture insert is an old ad-hoc replacement and the action seems to function well mechanically. A very respectable example of these potent Winchester lever guns. (13B10630-2) {C&R} (1800/2200) Est. 1,800 - 2,200 German P.08 Luger Pistol by DWM serial #5855a, 9mm, 4" barrel with a fair bore showing dark grooves and old pitting throughout and worn evident rifling. 		1		
279	German System Kneifel Drilling by Bruno Haeussner		281	Winchester Model 1887 Lever Action Shotgun
	serial #4147, 16 ga (2 3/4") over 9.3x72R Sauer, 27 1/4" Kruppstahl			serial #24122, 10 ga, 30" barrel with a partially bright about good bore
	barrels, the shotgun bores choked improved modified and rating about			showing light pitting its full-length. The barrel and magazine of this
	very good showing some fine pitting their full-length and a few small			1889-made shotgun have mostly toned to a rich plum-brown patina
	raised dents otherwise mostly bright. The rifle barrel is also about very			showing some sparsely scattered old minor oxidation staining and
	good with some light oxidation in the groves and strong rifling though the			handling marks with generous original blue in the protected areas
	muzzle is slightly out-of-round and will need to be addressed by a			particularly along the magazine, the hanger also retaining some streaks
	competent gunsmith. The barrels of this interesting September 1931			of original bright blue. The action shows nice silvery case-hardened
	proof-dated drilling retain about 96-97% excellent quality restored rust			patina with some hints of smoky colors and scattered oxidation, the right
	blue showing some mild thinning to gray-brown patina under bright light			side flaking to plum-brown patina and the top of the breechblock and
	and a few small oxidation speckles. The arm appears to have seen			hammer retaining some hints of vibrant colors. The internal areas of the
	some more modern gunsmith work as the chamberings have been later			breechblock show excellent vibrant colors throughout. All markings
	engraved along the rib and there are a number of filled in dovetails also			remain intact and strong with nice Winchester monogram on the left side
	along the top rib, the attachment of the ribs between the barrels also			action. The round knob pistolgrip buttstock and forend panels have beer
	possibly having seen some restoration work. The scalloped action is			very neatly checkered very long ago during the period of use, the
	rather interesting featuring wide flaring clamshell bolsters around the			buttstock rating very good plus retaining some strong original varnish
	fences which support a pair of auxiliary side locking lugs. The action is			particularly along the left side butt showing a tiny crack at the heel and
	mostly a nice pewter gray case-hardened patina showing a few small			scattered light dings to be expected with otherwise excellent fit at the
	areas of minor oxidation staining mostly along the left side and is			tangs. The forend panels are very good showing light handling marks
	extensively engraved with fine quality tight foliate scrollwork and			and the left panel with a few thin chips along the edges and a repaired
	geometric bordering. The bolsters are both maker-marked and marked			crack through the forward escutcheon. The original hard rubber buttplate
	with "SYSTEM KNEIFEL" inlaid with silver, a few areas of the inlay			is intact and the action seems to function well mechanically. An
	having been lost to the years. The checkered capped pistolgrip walnut			attractive 1887 for the Winchester collector. (13B10574-43) {ANTIQUE}
	buttstock and schnabel forend remain in very good condition as cleaned			(1000/1500)
	and refinished, the checkering having been recut as their borders are			Est. 1,000 - 1,500
	rather amateurishly executed. The stocks otherwise show just some		282	Winchester Special Order Model 1894 Lever Action Rifle

Lot Title/Description

323 Weatherby Mark V Deluxe Left Hand Bolt Action Rifle 326 Czech Underlever Double Hammergun by Pasler serial #H197715, 300 WBY Mag, 24" ported barrel with a bright, 12 ga, 30" Wootz-style steel barrels choked about modified with excellent bore. The metal surfaces on this South Gate production rifle moderately oxidized bores showing a couple small dents and scattered retain about 95-97% original polished blue that has some light wear patches of moderate pitting. The barrels of this shotgun are a pleasant showing some light tool marks along the sides of the barrel. The bolt mix of pewter gunmetal and mild gray-brown patina showing a few small body is softly graying and is numbered to the receiver. The checkered areas of old minor oxidation staining and handling marks retaining fine walnut Monte Carlo stock rates near excellent and has some light attractive Wootz pattern throughout. There are gold bands at the breeches with maker's name inlaid in gold "JOH. / PASLER / IN / handling marks. The stock features the classic Weatherby skip-line checkering, a rosewood forend tip and gripcap, swivel studs and a PILSEN". The frame and back action lockplates are mostly a nice pewter factory ventilated recoil pad. The pistolgrip cap has some light patina showing some scattered light handling marks and show extensive abrasions, crackling, and chipping to the lacquer finish. There are no embellishments with contrasting gold and silver filigree inlays and provisions for sights, a set of Buehler bases and 1" scope rings are Germanic style foliate engraving. The right side frame shows a pair of included. This is an excellent example overall ready for a set of quality game birds, the lockplate with a hunting dog, while the left side shows a optics. (4A10224-4) {MODERN} (1000/1500) hare on the frame and lockplate with a fox. There is a gold-inlaid "W" Est. 1,000 - 1,500 along the upper tang and the action features graceful swirling Unmarked Imported Iron Guard Model 1860 Cavalry Saber 324 percussion-style cap deflectors and high spur hammers. The horn 40 1/2" overall length, 34 1/2" curved single-edged blade with wide and underlever and fancy finger rest remain in fine condition, the underlever narrow fullers, rounded spine, 7 1/2" false edge and trailing point. with some moderate insect damage along the left edge and the finger Except for the "1861" date on the obverse ricasso, the blade is rest near excellent. The walnut buttstock and forend remain in very good unmarked. The steel blade has been cleaned bright and retains a plus condition showing an old semi-gloss varnish with a few small very nicely repaired chips, a few cracks at the upper tang, the most speckled smoky gray patina throughout as well as unmistakable watery black splashes of blood corrosion along the primary bevel and at the tip. noticeable a 1" u-shaped crack to the left, and light handling marks. The This weapon was no doubt used in battle and, for whatever reason, not buttstock features a generous left-side cheekpiece and fine Germanic fully cleaned until well after the fact. The edge appears to have been foliate carving with dogs head integrated into the left and right wrist and re-honed while in service and remains cutting-sharp, particularly in the quite a bit of cast-off. Equipped with European sling swivels, double triggers and non-rebounding locks. The barrels are off-face and exhibit last quarter of the blade and along the false edge, and the few minute nicks have been mostly dressed out. The hilt is a half-basket comprising some side-to-side play and the locks otherwise seem to function well a knucklebow and two branches extending to a plain Phrygian pommel. mechanically. An attractive shotgun, information on Herr Pasler appears to be rather scant. (13B10492-61) {C&R} (1000/1500) Though the design is clearly based off of the federal pattern, the guard and pommel are iron rather than brass. The black leather grip is wound Est. 1,000 - 1,500 by 17 strands of twisted steel wire. The guard and pommel are in fine 327 Lovely Ben Shostle Engraved Cased Bowie condition as cleaned, with moderate smoothed pitting across the surface This attractive bowie measures 14 1/4" overall with an 8 3/4" stainless and wide areas of dark brown patina through-which the silvery-gray tone steel California Clip style blade equipped with a double pointed choil. of the base iron occasionally peeks. The grip rates near excellent with The blade remains unsharpened and retains all its satin finish with a tiny some light scuffing along the spine and the wire strands rate excellent. speck of oxidation on the main edge approximately 1" from the tip. The The included steel scabbard bears a deep brown and ochre patina and spine and rear half of the blade are nicely engraved with bordered deep moderate pitting across the surface through-which areas of gold-toned cut floral scroll on a black background by master engraver Ben Shostle. original nickel finish are still visible. A rare example of what is likely a The obverse side of the blade has Federal shield and eagle emerging Confederate cavalry saber, this "fought" weapon wears its grim history from the scroll and is signed by the artist along the rear edge of the on its face. (12C9373-12) (1000/1500) ricasso. The oval guard shows loose scroll on a black Nitex background with filework style engraving along its periphery. The handle is a lovely Est. 1,000 - 1,500 325 Fine American Heavy Flintlock Long Fowler with Harpers Ferry Lock eight sided faceted dark rosewood in excellent condition with only a About .82 cal, 48 1/2" octagon barrel with a moderately oxidized bore. small blemish or two and a capstan style pommel with thin floral scroll This impressive fowler has been neatly reconverted to flint utilizing along its edges and alternating star and leaf engraving on the facets. antique lock parts. The barrel appears to be unmarked and retains a The knife rests in a purple baize lined walnut presentation case with light healthy amount of an antique plum-brown finish showing some scattered handling marks. A stunning example Shostle crafted bowie. old oxidation staining and mild pitting. The Model 1795 lockplate is more (5B10064-4B) (1200/1800) of a medium gray patina showing an old cleaning with scattered light Est. 1,200 - 1,800 pitting and some old grind marks, the Federal Eagle in the center 328 Gil Hibben Classic 12" Dagger obscured slightly but mostly visible and the rear marked "HARPERS / This massive bowie measures 17" overall with a 12" double edge high FERRY / 1812". The edges of the lock inletting are not perfect but the carbon steel blade. The blade remains unsharpened, retains all its bright lockplate generally fits guite well. Brass hardware consists of dual mirror polish and has familiar serpentine maker mark on the obverse ramrod thimbles and a long tang triggerguard with acorn extension, the ricasso. The brass double lug guard and tub shaped pommel is a rich brass toned to an attractive ocher patina and a small flower is engraved goldenrod decorated with floral leaf and scroll engraving. The swell along the bow of the guard. The fullstock is of simple but very robust center rosewood handle remains in excellent condition centered construction and appears to be cherry showing an antique red-russet between brass and black spacers. There is no sheath present. A stain. The stock rates fine showing a fair amount of older repaired fabulous and decorative Hibben dagger that is closer in appearance to a short sword than that of a knife. (5A10064-3BJ) (1000/1500) cracks and chips along the forend, mostly ahead of the rear thimble, with a thin sliver missing along the left edge. There are some cracks Est. 1,000 - 1,500 along the left stock flat and other scattered old dings that are 329 Japanese Type 97 Naval Officer's Kai-Gunto This Kai-Gunto measures 36 1/2" overall with a 25 3/4" blade with a unobtrusive, the stock maintaining a very attractive appearance overall. Owing to the spartan utilitarian nature of the arm there are no lock single ridged spine. The blade remains bright with scattered light pitting, escutcheons, buttplate or tailpipe. There is a fine v-notch three-leaf rear more prominent the first 12" from the tip. The hamon line has a soft sight fitted atop the breech and a small bead front sight, the rear sight is rolling wave and the tang is signed, markings remain crisp and clean. a little loose and the first leaf is bent forward. The forward barrel pin is The copper habaki retains much silver plate and the brass fuchi, seppas missing, what is no doubt the original trumpet-shaped iron ramrod is and kashira are lightly stained and tarnished brass, the sunburst present and the lock seems to function well mechanically. Overall length dai-seppas and faces of the plain tsuba are black lacquered brass and is about 63 1/2" and weight is a little under 15 pounds. This is a all the parts are numbered "19". The grip is wood bound in traditional wonderful heavy fullstock fowler that would make an excellent addition black same (rayskin) and wrapped in brown cloth tape. The rayskin to any early American arms collection and would look quite imposing covering remains fully intact and the cloth wrapping shows modest wear over the mantel. (13C10608-4) {ANTIQUE} (1200/1800) and staining. Attached to the sarute is a matching brown tassel, the Est. 1,200 - 1,800 mekugi is loose fitting and likely a later replacement. The sharkskin covered wood scabbard is equipped with brass double hangers and decorative mounts. The scabbard is in very good condition as well with a small hole in the bottom edge and what appears to be a hairline repair between the collar and first hanger. The mounts show light staining and tarnish and have loosened with age, the retention spring does not engage the scabbard properly. A very good Naval sword. (5C10460-56A) (1500/2500) Est. 1,500 - 2,500

This handsome rifle is in as-new-in-box condition and features a single set trigger, express sights, hinged floorplate magazine capable of holding three rounds, a cold hammer-forged barrel and a lovely checkered Turkish walnut stock with classic lines and a left side cheekpiece and schnabel tip. The rifle includes the original box, test target and paperwork. The action appears to function well mechanically. (23A10630-10) {MODERN}		50-70, 32 1/2" barrel with a mostly bright about good bore showing a few patches of moderate pitting and otherwise strong rifling. The metal surfaces have aged to a lightly-mottled gray patina with overall spots of old light oxidation. All markings are clear with the lockplate dated 1863. The American black walnut stock rates about fine with a strong original finish and mostly crisp edges along with the typical overall dings and handling marks from service. The left stock flat features two crisp inspection cartouches, the original sights and cleaning rod are intact and the action is strong and crisp. Also included is an original Rock Island Arsenal brown leather sling with brass double hook in near excellent condition with some overall minor crazing. (23A10483-290) {ANTIQUE} [Perry White Collection] (800/1200) Est. 800 - 1,200 Excellent U.S. Model 1884 Trapdoor Cadet Rifle by Springfield Armory serial #566184, 45-70 Govt., 29 1/2" barrel with a pristine bore. The barrel, bands, triggerguard and buttplate of this Type II Cadet rifle retain about 90% original blue which is lightly thinning on the one-piece triggerguard with some light wear to gray on the toe and heel of the buttplate, some narrow streaks of silvering around the muzzle and some overall scattered light handling marks. The breechblock and tang retain nearly all their original case-hardened finish with attractive case-hardened colors throughout and the receiver, lockplate, hammer and thumbpiece retain about 98% original oil-quenched blackened finish with a few spots of high edge wear. All metal markings are correct and
	appears to function well mechanically. Included is the factory box and two unmarked extended MobilChoke tubes as follows: full, improved modified. (23A10636-10) {MODERN} (800/1200) Est. 800 - 1,200 Winchester Model SX3 Magnum Field Semi-Auto Shotgun serial #11HZM09464, 20 ga., 28" ventilated rib Invector Plus-choke barrel with a bright excellent bore. This FN-Belgium produced shotgun appears to be in as-new-in-box condition retaining 99% plus metallic gray Perma-Cote Ultra Tough finish while the checkered walnut pistolgrip stock and forend rate as-new. The stock features a Inflex Technology recoil pad and is adjustable for length of pull with two included spacers. The barrel is sighted with a white bead and the action appears to function well mechanically. Included is the original box, cable lock with keys and the following three Invector Plus choke tubes: full, modified, improved cylinder. (23A10630-10) {MODERN} (800/1200)		50-70, 32 1/2" barrel with a mostly bright about good bore showing a few patches of moderate pitting and otherwise strong rifling. The metal surfaces have aged to a lightly-mottled gray patina with overall spots of old light oxidation. All markings are clear with the lockplate dated 1863. The American black walnut stock rates about fine with a strong original finish and mostly crisp edges along with the typical overall dings and handling marks from service. The left stock flat features two crisp inspection cartouches, the original sights and cleaning rod are intact and the action is strong and crisp. Also included is an original Rock Island Arsenal brown leather sling with brass double hook in near excellent condition with some overall minor crazing. (23A10483-290) {ANTIQUE} [Perry White Collection] (800/1200) Est. 800 - 1,200 Excellent U.S. Model 1884 Trapdoor Cadet Rifle by Springfield Armory serial #566184, 45-70 Govt., 29 1/2" barrel with a pristine bore. The barrel, bands, triggerguard and buttplate of this Type II Cadet rifle retain about 90% original blue which is lightly thinning on the one-piece triggerguard with some light wear to gray on the toe and heel of the buttplate, some narrow streaks of silvering around the muzzle and some overall scattered light handling marks. The breechblock and tang retain nearly all their original case-hardened finish with attractive case-hardened colors throughout and the receiver, lockplate, hammer and thumbpiece retain about 98% original oil-quenched blackened finish with a few spots of high edge wear. All metal markings are correct and crisp. The American black walnut stock rates very fine as perhaps lightly cleaned with a touch of period added finish along with a small dent on the left side of the point-of-comb, a tight 3" crack in the left side of the forend running from the rear of the nosecap to the rear of the upper band and a few scattered light handling marks. The markings are slightly softened but clear and include an 1883-dated boxed inspection
	appears to function well mechanically. Included is the factory box and two unmarked extended MobilChoke tubes as follows: full, improved modified. (23A10636-10) {MODERN} (800/1200) Est. 800 - 1,200 Winchester Model SX3 Magnum Field Semi-Auto Shotgun serial #11HZM09464, 20 ga., 28" ventilated rib Invector Plus-choke barrel with a bright excellent bore. This FN-Belgium produced shotgun appears to be in as-new-in-box condition retaining 99% plus metallic gray Perma-Cote Ultra Tough finish while the checkered walnut pistolgrip stock and forend rate as-new. The stock features a Inflex Technology recoil pad and is adjustable for length of pull with two included spacers. The barrel is sighted with a white bead and the action appears to function well mechanically. Included is the original box, cable lock with keys and the following three Invector Plus choke tubes: full, modified, improved cylinder. The high-wood l-cut walnut stock and 2-rivet handguard are in excellent condition with a minor handling mark or two, and appears to be a more modern replacement showing no markings or signs of cleaning,		412	pistolgrip walnut stock and forend are in very good to very good plus condition with a hairline about 3/4" crack at the rear of the upper tang, scattered light flaking of the finish, and a few light handling marks. The stock features a rosewood gripcap, an adjustable semi-rollover comb, a KICK-EEZ recoil pad giving an about 14 1/8" length of pull, and shows some attractive grain figure. The metal markings are softened lightly with the sides of the frame correctly factory engraved with hunting dogs on point, the belly marked "SKEET" below the serial number, the barrels are date coded for April 1941, and the forend and barrels are numbered to the shotgun. The shotgun locks up tightly with the lever coming to rest just right of center and features an automatic safety, single selective trigger, robust ejectors, and is sighted with a white bead front and small steel bead mid rib; the shotgun appears to function well mechanically. An attractive custom Model 32 Skeet from about mid-way through production. (14A10453-10) {C&R} [Sherwood "Skip" Chapman Collection] (800/1000) Est. 800 - 1,000 Remington Model 32 Over Under Shotgun serial #5435, 12 ga, 32" ventilated rib barrels choked full in both, with very good, frosted bores. The metal surfaces retain about 97% original blue with some light wear on high edges and some scattered light pitting on the last 9" towards the muzzle; the sides and face of the breech show spots of light pitting. The checkered pistolgrip walnut stock and forend are in very good to very good plus condition with a small about 1/4" crack at rear of the triggerguard, light softening of the checkering, and some scattered light handling marks. The stock features a Browning
408	gold-colored finishes. The checkered AA grade European walnut schnabel-tipped forend rates excellent plus while the Prince of Wales-style pistolgrip stock rates near excellent with a few small storage dings along the toeline and a light handling mark or two. The recoil pad provides a 14 1/2" length of pull to the single selective mechanical trigger with drops of 1 3/8" and 2". The frame is adorned with an upland game scene with gold-filled pheasants on the right side and a lowland scene on the left with two ducks coming in for a landing along with splashes of loose folate scroll along the upper tang leading to the lightly-pierced top lever. The gun features robust ejectors, automatic safety with selector, a red fiber optic bead at the muzzle and the action appears to function well mechanically. Included is the factory plastic hard case, barrel and action sleeves, manual and paperwork, choke wrench and the following two extended Benelli Mobilchoke tubes: modified, improved cylinder. This elegant shotgun appears to have seen little if any use. (23B10681-7) (MODERN) (800/1200) Est. 800 - 1,200 U.S. M1 Carbine by Inland Division serial #848821, 30 Carbine, 18" barrel with a bright very good plus bore with some scattered pinprick pitting but strong rifling throughout. The metal surfaces retain about 75% arsenal parkerized finish with a smooth brown patina on the major parts, light wear on the high edges and contact points, and a series of linear very light tool markings on the barrel. The high-wood l-cut walnut stock and 2-rivet handguard are in excellent condition with a minor handling mark or two, and appears to be a more modern replacement showing no markings or signs of cleaning, the barrel channel pencil-marked "213". The receiver is "S.G." marked		412	pistolgrip walnut stock and forend are in very good to very good plus condition with a hairline about 3/4" crack at the rear of the upper tang, scattered light flaking of the finish, and a few light handling marks. Lot Title/Description

498 Rare Merwin & Hulbert Tip Up Single Action Revolver by O.S 502 Harrington & Richardson Prototype Combination Gun serial #HR39, 22 cal over 20 ga, 23 1/2" barrels with bright very fine Cumminas serial #125/M18, 22 RF, 3 1/8" ribbed round barrel with a fair bore bores, the shotgun barrel with one small area of mild oxidation and the showing softened rifling. Believed to be made by O.S Cummings, these rifle barrel with strong rifling throughout. This circa 1963 prototype over revolvers were essentially copies of the Smith & Wesson and they were under combination gun is built on a Topper Model 158 frame and is made in very limited numbers before being shut down by S&W. Indeed essentially a proof-of-concept as the breech section for the rifle barrel is some examples known are S&W marked though this example is only unfinished leaving the chamber exposed and the extractors are marked "MERWIN HULBERT & CO. N.Y." in rather large font along the non-functional. The barrels retain about 85% original blue with loss due barrel rib. The metal surfaces retain about 85% original nickel finish with to overall patchy oxidation and freckling toning to plum-brown. The flaking to gray-brown mostly along the cylinder and left side frame and frame retains a similar amount of original cyanide case-hardened colors barrel, mild oxidation staining and some dings that are a bit more again showing some overall light oxidation and toning to plum-brown. prominent along the edges of the barrel rib and ejector rod. The hammer the black plastic triggerguard rates excellent and the hammer retains and trigger are a mild gray-brown patina and the barrel markings remain 98% original blue. The right side frame shows an internal serial or crisp. The smooth rosewood grips are stamp-numbered to the gun and experimental number "HR39" while the left side shows standard Topper remain in very fine condition retaining about 90% original varnish markings, address and "Z" 1963 code. The smooth pistolgrip walnut showing some light handling marks and one more noticeable ding along buttstock and forend remain in very fine condition showing some the left panel, otherwise retaining excellent fit. The serialized parts are scattered light handling marks and the original red rubber pad is intact. matching and barrel-to-frame fit is solid. The action will require a little There are no provisions for a rear sight and the ramped front sight base mechanical attention as lock-up is loose though it generally times well. dovetail is vacant. The hammer seems to function well mechanically. An (13A10729-9) {ANTIQUE} (600/800) interesting prototype from H&R. (13A10729-47) {C&R} [The Richard Est. 600 - 800 Littlefield H&R Collection] (600/800) 499 Reising Arms Co. Semi-Auto Target Pistol with Box Est. 600 - 800 503 L.C. Smith Grade 2E Sidelock Ejectorgun serial #3540, 22 LR, 6 3/4" barrel with a good bore showing scattered mild frosting and strong rifling throughout. The metal surfaces of this serial #210657, 12 ga, 32" Crown steel barrels choked full in both with pistol retain about 96% original bright blue with most of the loss due to partially bright about good bores showing some thin scratches and light some scattered mild flaking and freckling mostly along the high edges pitting their full-length, the left barrel with some small raised dents about and backstrap. The original checkered brown "IT'S A BEAR" grips 7 1/2" back from the muzzle. The barrels of this circa 1909-made remain in near excellent condition, the right panel with a tiny crack near shotgun retain about 65-70% original blue with overall thinning and the bottom screw and the left with a neatly repaired small thin chip along toning to gray-brown patina, an area of light pitting along the left side the top edge. One original magazine is included and the action seems to barrels and scattered handling marks. There is a small filled hole at the function well mechanically. The included original green paper-covered rear rib no doubt form a bead that was removed. The action and box is pencil-numbered "10951" along the bottom and remains in very lockplates retain about 75% case-hardening with vibrant colors along fine condition showing some light edge wear, scuffs and some minor the plates and more protected areas, the balance muting to a silvery tape reinforcements along the corners. The interior lid instructions pewter case-hardened patina and showing some mild gray-brown remain completely intact and legible. A very fine example of these speckling. The light filigree scrollwork remains intact and strong and interesting target pistols with very seldom seen original box. each lockplate is engraved with maker's name and a quail. The (13A10729-38) {C&R} (700/900) checkered capped pistolgrip walnut buttstock and forend with hard Est. 700 - 900 rubber tip insert remain in about very good plus condition, the forend 500 Early Harrington & Richardson Prototype Model 4A Folding Shotgun with a couple of repaired cracks at the tip, showing some overall light serial #1, 12 ga, 26" barrel choked full with a bright excellent bore. The dings and handling marks to be expected, the buttstock with some older barrel of this interesting factory prototype retains about 90% original added finish. The grooved black plastic buttplate appears to be a more modern reproduction, length-of-pull is 14" and drops are 1 3/4" and 2 blue appearing stronger under ambient light, toning and thinning to a deep plum-brown patina under bright light showing some scattered mild 3/4". There is a bit of light between the breeches and standing breech, freckling. The action retains about 92% original cyanide case-hardened more noticeable at the left barrel, and lock-up is otherwise solid with the colors that shows some scattered mild oxidation freckling and toning to top lever right of center. The shotgun is sighted with a large white bead plum-brown patina. The triggerguard and top lever retain strong original front and the action seems to function well mechanically with good blue and the left side frame retains strong markings with large ejectors. (13A10636-93) {C&R} (700/900) "FOLDING", H&R address and hand-stamped factory prototype Est. 700 - 900 504 Remington Model 1894 Grade BE Double Ejectorgun markings "R+D - 3 MODEL - 4A". The lower tang and barrel are both serial-numbered "1". The smooth pistolgrip walnut buttstock and forend serial #P138724, 12 ga, 30" damascus barrels choked full with bright remain in about very fine condition retaining strong original oil finish bores, the right very fine and the left barrel about good with some light showing a few small thin cracks forming around the upper tang, a couple pitting just ahead of the chamber and showing a rather prominent dent scattered light dings and minor handling marks. The black checkered at 6 o'clock about 3" back from the muzzle. The barrels retain about hard rubber buttplate with monogram remains in excellent condition, the 92-94% nice dark plum and gray original swirling damascus showing barrel locks up well and the action seems to function well mechanically some scattered mild thinning and handling marks, a few small areas on and is equipped with an elector though, perhaps owing to its prototype either barrel showing some more noticeable thin scratches. The action has mostly toned to a mild gray smoky case-hardened patina showing a nature, there is no firing pin present. An interesting shotgun for the American arms or H&R collector, standard production shotgun serial #2 little bit of mild gray-brown speckling and some generous colors in the follows this lot. (13B10729-50) {C&R} [The Richard Littlefield H&R more protected areas. The action shows "REMINGTON ARMS CO" on Collection1 (600/800) both sides and is embellished with the light tasteful Grade B engraving Est. 600 - 800 consisting of simple bordering and a few small foliate flourishes. The top Early Harrington & Richardson Model 4A Folding Shotgun 501 lever and triggerguard show thinning original blue mostly toning to serial #2, 12 ga, 26" barrel choked full with a bright excellent bore. plum-brown. The checkered round knob pistolgrip walnut buttstock and Following the prototype gun is the first finished production gun, the forend remain in very fine condition showing a very light cleaning and barrel retaining about 97% original blue showing some scattered very added finish long ago and some scattered light dings and handling fine flaking and speckling. The frame retains a similar amount of original marks. Length of pull to the added black basketweave Pachmayr pad is cyanide case-hardened colors showing just some sparse oxidation about 13 5/8" with drops of 1 3/4" and 2 3/4". The shotgun is equipped speckling. The triggerguard and top lever retain about 98% original blue with an automatic safety and silver bead front sight and lock-up is solid and all markings remain crisp and clear, the left side frame with large on-face with the top lever well right of center. The action seems to "FOLDING", H&R address and the lower tang and barrel function well mechanically with strong ejectors. A rather nice BE grade serial-numbered "2". The smooth pistolgrip walnut buttstock and forend Remington hammerless shotgun. (13A10574-91) {C&R} (700/900) remain in very fine condition retaining about 95% original oil finish Est. 700 - 900 showing two very thin 1" cracks forming at the upper tang along with a few other light dings. The black checkered hard rubber buttplate with monogram remains in excellent condition, the barrel locks up well, the action is equipped with an ejector and seems to function well mechanically. A very fine and very early H&R folding shotgun. (13B10729-51) {C&R} [The Richard Littlefield H&R Collection] (600/800) Est. 600 - 800

(13A10574-26) {C&R} (700/900) Est. 700 - 900		511	Contemporary Fullstock Flintlock Sporting Rifle by Jack Garner .48 cal, 42" octagon barrel with a bright near excellent bore. The barrel of this rifle has mostly toned to a medium gray-brown patina showing some old oxidation its full-length. The lockplate is more of a gunmetal gray patina with a lightly pitted aged appearance and features a pronounced step at the rear, faceted pan and bridled frizzen. The top barrel flat is neatly marked in script "J. Garner" and brass fittings include a generous nosecap, two faceted thimbles and faceted tailpipe, spur triggerguard, buttplate with toe plate and solid sideplate all taking on a pale ocher patina. The front branch of the triggerguard shows an old repair, there are some light foliate scroll flourishes along the fittings and the sideplate is engraved in script with the name "W. Sonnett". The curly maple stock remains in very good condition showing a bit of added dark finish masking a neatly repaired break through the wrist, the stock otherwise just showing a few minor handling marks. The wood shows lovely grain figure throughout and features wide dropper points, squared-off left-side cheekpiece, some light foliate carving with a nice more detailed area along the left butt and a generous sliding wooden patchbox on the right. The rifle is equipped with fine v-notch rear sight,
partially bright good bores showing some scattered small areas of light Manufacturing. (13A10735-7) {ANTIQUE} (600/800) pitting and oxidation, the right barrel with one shallow dent about 10 1/2" back from the muzzle. The barrels retain about 92% original blue with most of the loss due to some scattered patches of old oxidation and some light pitting mostly nearer the muzzles and toning to a pleasant plum-brown patina under bright light. The action retains about 95% strong original case-hardened colors with mild muting to a smoky gray patina and a few small areas of light oxidation speckling. The checkered round knob pistolgrip walnut buttstock and splinter forend remain in very fine condition as very light cleaned and carefully refinished showing some sparsely scattered light dings and minor handling marks, the checkering softened somewhat. Length-of-pull to the fine condition original hard rubber buttplate is about 14" with drops of 17/8" and 3 1/4". Lock-up is solid on-face with top lever right of center and the action seems to function well mechanically with strong ejectors. An attractive Remington ejectorgun. (13A10574-92) {C&R} (700/900) C&R (700/900)		Est. 700 - 900 Winchester Special Order Model 1894 Lever Action Rifle serial #196580, 30 WCF, 26° part round part octagon barrel with button magazine and a good bore showing oxidation and light pitting in the grooves with otherwise strong rifling. The barrel of this 1903-made rifle retains about 80% original blue thinning and toning to a mild gray patina under bright light with some scattered light handling marks and freckles. The action is mostly a smooth medium gray-brown patina showing some light handling marks, striations and generous blue in the more protected areas. The lever is a similar patina, the bolt shows thinning bright blue and the hammer retains some smoky case-hardened colors. All markings remain intact and strong and the edges of the loading gate retain hints of fire blue. The plain walnut stocks remain in very good plus condition as very lightly cleaned and carefully refinished showing some scattered light dings and handling marks. The rifle is sighted with a Lyman aperture tang sight, Winchester's express rear sight and a Lyman front that has lost its bead insert. The leaves of the express sight have all been modified and regulated and the action seems to function well mechanically. Lock-up is solid on-face with top lever right of center and the action seems to function well mechanically with strong ejectors. An attractive Remington ejectorgun. (13A10574-92) {C&R} (700/900)		Est. 700 - 900 Winchester Special Order Model 1894 Lever Action Rifle serial #196580, 30 WCF, 26" part round part octagon barrel with button magazine and a good bore showing oxidation and light pitting in the grooves with otherwise strong rifling. The barrel of this 1903-made rifle retains about 80% original blue thinning and toning to a mild gray patina under bright light with some scattered light handling marks and freckles. The action is mostly a smooth medium gray-brown patina showing some light handling marks, striations and generous blue in the more protected areas. The lever is a similar patina, the bolt shows thinning bright blue and the hammer retains some smoky case-hardened colors. All markings remain intact and strong and the edges of the loading gate retain hints of fire blue. The plain walnut stocks remain in very good plus condition as very lightly cleaned and carefully refinished showing some scattered light dings and handling marks. The rifle is sighted with a Lyman aperture tang sight, Winchester's express rear sight and a Lyman front that has lost its bead insert. The leaves of the express sight have all been modified and regulated and the action seems to function well mechanically. (13A10574-26) {C&R} (700/900) Est. 700 - 900 Remington Model 1900 Grade KE Double Ejectorgun serial #Q368089, 12 ga, 30" Remington Steel barrels choked full with partially bright good bores showing some scattered small areas of light pitting and oxidation, the right barrel with one shallow dent about 10 1/2" back from the muzzle. The barrels retain about 92% original blue with most of the loss due to some scattered patches of old oxidation and some light pitting mostly nearer the muzzles and toning to a pleasant plum-brown patina under bright light. The action retains about 95%		511	Contemporary Fullstock Flintlock Sporting Rifle by Jack Garner .48 cal, 42" octagon barrel with a bright near excellent bore. The barrel of this rifle has mostly toned to a medium gray-brown patina showing some old oxidation its full-length. The lockplate is more of a gunmetal gray patina with a lightly pitted aged appearance and features a pronounced step at the rear, faceted pan and bridled frizzen. The top barrel flat is neatly marked in script "J. Garner" and brass fittings include a generous nosecap, two faceted thimbles and faceted tailpipe, spur triggerguard, buttplate with toe plate and solid sideplate all taking on a pale ocher patina. The front branch of the triggerguard shows an old repair, there are some light foliate scroll flourishes along the fittings and the sideplate is engraved in script with the name "W. Sonnett". The curly maple stock remains in very good condition showing a bit of added dark finish masking a neatly repaired break through the wrist, the stock otherwise just showing a few minor handling marks. The wood shows lovely grain figure throughout and features wide dropper points, squared-off left-side cheekpiece, some light foliate carving with a nice more detailed area along the left butt and a generous sliding wooden patchbox on the right. The rifle is equipped with fine v-notch rear sight, large silver blade front and double set triggers. The lock seems to function well mechanically and a slightly long brass-tipped ramrod is included. A nice rifle from Mr. Garner of Tennessee Valley Manufacturing. (13A10735-7) {ANTIQUE} (600/800)
fine condition as very light cleaned and carefully refinished showing some sparsely scattered light dings and minor handling marks, the checkering softened somewhat. Length-of-pull to the fine condition original hard rubber buttplate is about 14" with drops of 1 7/8" and 3 1/4". Lock-up is solid on-face with top lever right of center and the action seems to function well mechanically with strong ejectors. An attractive Remington ejectorgun. (13A10574-92) {C&R} (700/900)		Est. 700 - 900 Winchester Special Order Model 1894 Lever Action Rifle serial #196580, 30 WCF, 26" part round part octagon barrel with button magazine and a good bore showing oxidation and light pitting in the grooves with otherwise strong rifling. The barrel of this rifle has mostly toned to a medium gray-brown patina showing some old oxidation its full-length. The lockplate is more of a gunmetal gray patina with a lightly pitted aged appearance and features a pronounced step at the rear, faceted pan and bridled frizzen. The top barrel flat is neatly marked in script "J. Garner" and brass fittings include a generous nosecap, two faceted thimbles and faceted tailpipe, spur triggerguard, buttplate with toe plate and solid sideplate all taking on a pale ocher patina. The front branch of the triggerguard shows an old repair, there are some light foliate scroll flourishes along the fittings and the sideplate is engraved in script with the name "W. Sonnett". The curly maple stock remains in very good condition showing a bit of added dark finish masking a neatly repaired break through the wrist, the stock otherwise just showing a few minor handling marks. The wood shows lovely grain figure throughout and features wide dropper points, squared-off left-side cheekpiece, some light foliate carving with a nice more detailed area along the left butt and a generous sliding wooden patchbox on the right. The rifle is equipped with fine v-notch rear sight, large silver blade front and double set triggers. The lock seems to function well mechanically and a slightly long brass-tipped ramrod is included. A nice rifle from Mr. Garner of Tennessee Valley Manufacturing. (13A10735-7) {ANTIQUE} (600/800)
		Est. 700 - 900 Winchester Special Order Model 1894 Lever Action Rifle serial #196580, 30 WCF, 26° part round part octagon barrel with button magazine and a good bore showing oxidation and light pitting in the grooves with otherwise strong rifling. The barrel of this 1903-made rifle retains about 80% original blue thinning and toning to a mild gray patina under bright light with some scattered light handling marks and freckles. The action is mostly a smooth medium gray-brown patina showing some light handling marks, striations and generous blue in the more protected areas. The lever is a similar patina, the bolt shows thinning bright blue and the hammer retains some smoky case-hardened colors. All markings remain intact and strong and the edges of the loading gate retain hints of fire blue. The plain walnut stocks remain in very good plus condition as very lightly cleaned and carefully refinished showing some scattered light dings and handling marks. The rifle is sighted with a Lyman aperture tang sight, Winchester's express rear sight and a Lyman front that has lost its bead insert. The leaves of the express sight have all been modified and regulated and the action seems to function well mechanically. 	magazine and a mostly bright about very good plus bore showing some frosting and fine oxidation in the grooves with otherwise strong rifling throughout. The barrel of this 1910-made rifle retains generous original blue in the protected areas appearing stronger under ambient light and toning to a pleasant mix of blue-gray and gray-brown patina with a little minor oxidation speckling. The action is a medium gunmetal gray patina showing some mild oxidation staining along the bottom metal, the bolt with flaking bright blue and the loading gate retaining strong bright blue. All markings remain intact and mostly strong and the plain walnut stocks remain in very good condition as cleaned and refinished with a semi-gloss varnish that now shows overall crackling and some light flaking, the stocks otherwise just with some scattered light handling marks. The rifle is sighted with Winchester's 32 Special rear sight and a replacement Marble's 45W tall brass bead front. The action seems to function well mechanically. (13A10574-30) {C&R} (700/900) Est. 700 - 900 Winchester Model 1892 Lever Action Rifle serial #147862, 32 WCF, 24" round barrel with full magazine and a partially bright bore that is fair to perhaps good showing light pitting its full length, some areas a bit more moderate, and otherwise strong rifling. The barrel and magazine of this 1900-made rifle retain about 80-85% original blue with some overall thinning to gray-brown patina, some light freckling and handling marks. There are some light dings or tool marks along the sides of the barrel and the magazine tube shows a series of			good bore showing dark grooves, moderate frosting and somewhat worn but good rifling. The metal surfaces of this salty revolver retain about 85% reapplied nickel finish with most of the loss due to flaking along the underside barrel, triggerguard and gripstraps toning to a dark oxidized brown along with some smaller flakes, buff marks and remnants of pitting beneath the finish. There is a weld repair to the topstrap above the breech and the left side frame hinge, the work executed before the refinishing. The barrel address and patent dates remain completely intact and quite strong and the backstrap shows coarse period-added checkering. The smooth replacement rosewood grips remain in about very good condition showing a repaired lengthwise crack along the left panel and some other minor handling marks. The assembly number on the frame is not legible and the latch is mismatched from the barrel. The hinge screws and front sight blade are old replacements, there is a peculiar vacant screw hole along the right side topstrap and the latch spring and ejector catch hardware are missing. The ejector no longer snaps down due to the missing hardware, barrel-to-frame fit is quite good and the half cock notch is worn though the action is otherwise functional at full cock with timing and lock-up a little off. (13A10574-159) {ANTIQUE} (700/900)

	magazine and a mostly bright about very good plus bore showing some frosting and fine oxidation in the grooves with otherwise strong rifling throughout. The barrel of this 1910-made rifle retains generous original blue in the protected areas appearing stronger under ambient light and toning to a pleasant mix of blue-gray and gray-brown patina with a little minor oxidation speckling. The action is a medium gunmetal gray patina showing some mild oxidation staining along the bottom metal, the bolt with flaking bright blue and the loading gate retaining strong bright blue. All markings remain intact and mostly strong and the plain walnut stocks remain in very good condition as cleaned and refinished with a seemi-gloss varnish that now shows overall crackling and some light flaking, the stocks otherwise just with some scattered light handling marks. The rifle is sighted with Winchester's 32 Special rear sight and a replacement Marble's 45W tall brass bead front. The action seems to function well mechanically. (13A10574-30) {C&R} (700/900) Est. 700 - 900 Winchester Model 1892 Lever Action Rifle serial #147862, 32 WCF, 24" round barrel with full magazine and a partially bright bore that is fair to perhaps good showing light pitting its full length, some areas a bit more moderate, and otherwise strong rifling. The barrel and magazine of this 1900-made rifle retain about 80-85% original blue with some overall thinning to gray-brown patina, some light freckling and handling marks. There are some light dings or tool marks along the sides of the barrel and the magazine tube shows a series of zig-zagging scratches along its length, the hanger and its dovetail also with some evident tool marks. The rifle shows Winchester factory "WP" proof marks indicating it went back at some point after 1905. The action retains perhaps 40% original bright blue with the balance flaked and faded to pewter gunmetal and gray-brown patina showing some scattered old handling marks. The lever and hammer are similar with the protected areas of the			good bore showing dark grooves, moderate frosting and somewhat worn but good rifling. The metal surfaces of this salty revolver retain about 85% reapplied nickel finish with most of the loss due to flaking along the underside barrel, triggerguard and gripstraps toning to a dark oxidized brown along with some smaller flakes, buff marks and remnants of pitting beneath the finish. There is a weld repair to the topstrap above the breech and the left side frame hinge, the work executed before the refinishing. The barrel address and patent dates remain completely intact and quite strong and the backstrap shows coarse period-added checkering. The smooth replacement rosewood grips remain in about very good condition showing a repaired lengthwise crack along the left panel and some other minor handling marks. The assembly number on the frame is not legible and the latch is mismatched from the barrel. The hinge screws and front sight blade are old replacements, there is a peculiar vacant screw hole along the right side topstrap and the latch spring and ejector catch hardware are missing. The ejector no longer snaps down due to the missing hardware, barrel-to-frame fit is quite good and the half cock notch is worn though the action is otherwise functional at full cock with timing and lock-up a little off. (13A10574-159) {ANTIQUE} (700/900)

The gun features crisp locks, a single folding rear sight, bead front sight, double triggers, and attached swiveling ramrod. It includes the factory box that is correctly end labeled and numbered to the gun. The Howdahs are substantial pistols generating considerable power and are sure to draw attention at your next range session. (8A10681-6) {ANTIQUE} (600/800) Est. 600 - 800 Colt Peacemaker .22 Scout Single Action Revolver serial #G163559, .22 LR, 6" barrel with an excellent bore. This lovely 1976-manufactured G-series revolver has seen little if any use and remains in grand condition. The metal surfaces retain 99% original blue and anodized finishes with no perceptible turn ring on the cylinder and the frame has beautiful swirts of case-hardened colors. The smooth factory rosewood grips with gold Rampant Colt medallions, gold colored screw and escutcheon rate excellent. There is some light denting along a portion of the left grips backstrap edge, but close examination indicates this is a factory defect from when they cut or finished the panel. This style grip was offered on these guns but are rare, the synthetic Eagle style most used. The cylinder is marked ".22 L.R.", the barrel is marked "PEACEMAKER .22", and the action is crisp with
625	surfaces very lightly. The revolver features a factory red insert front sight, replacement Millett white outline adjustable rear sight, timing and lock up are excellent, and it functions mechanically. A great gun for hunting, shooting, or as an upstart collectible. (8A10647-3) {MODERN} (700/900) Est. 700 - 900 Browning BDA-380 Semi-Auto Pistol serial #425PT03866, .380 ACP, 3 7/8" barrel with an excellent bore. The metal surfaces of this 1986-manufactured pistol retain about 98% original blue and anodized finishes showing limited high edge wear, a couple of spots with some tiny pinprick pitting., and handling marks. The smooth walnut factory grips are missing both medallions but rate about excellent otherwise. The pistol features fixed sights, ambidextrous slide mounted de-cockers / safeties, and functions mechanically. The pistol includes a single thirteen-round magazine. It should make a fine concealed carry or home defense gun. (8A10647-10) {MODERN} (600/800)	629	triggerguard, straps, buttcap, and wedge escutcheons remain in excellent condition. The sideplates, top tang, and hammers have light scroll engraving, the left lock features a stalking leopard, the right a running warthog. The one-piece checkered walnut stock rates excellent. The gun features crisp locks, a single folding rear sight, bead front sight, double triggers, and attached swiveling ramrod. It includes the factory box that is correctly end labeled and numbered to the gun. The Howdahs are substantial pistols generating considerable power and are sure to draw attention at your next range session. The silver finished boxlock frame is in very good condition with scattered specks of light oxidation and possible tiny flaking of the silver plate, more concentrated on the right side of the frame, and some light tarnishing in the recessed areas; the trigger retains nearly all its gold finish, with only light freckling showing. The frame is nicely decorated with factory foliate scroll engraving and embellishments on the bolsters. The checkered capped pistolgrip walnut stock and forend are in very good condition with a few light dings and abrasions, the majority concentrated on the right side of the buttstock, and the factory ventilated recoil pad remains supple with minor wear at the heel and toe. The shotgun locks up tight with the lever coming to rest right of center and features a single selective trigger, nonautomatic safety, robust ejectors, is sighted with a white bead front and small steel bead midrib, and appears to function
	surfaces on this KTG of Japan made rifle retain 97-98% original blue with sparsely scattered specks of fine oxidation, the engine turned bolt remains bright. The high-gloss Monte Carlo walnut stock rates near excellent with a handful of light marks and blemishes, stock features skip-line checkering and a left side cheekpiece. The original sights minus the sight hood remain in place along with a single magazine. Mounted atop the receiver is a Weatherby Mark XXII 4x50 scope with crosshair reticle and clear optics. An excellent early Japanese Mark XXII rifle. (5A9949-93) {C&R} [Dr. James D. Morgan Collection] (700/900) Est. 700 - 900 Weatherby Custom FN Mauser High Power Bolt Action Rifle serial #10954, 300 Weatherby Magnum, 24" barrel with an excellent bright bore. The metal surfaces on this 1961 Southgate, CA made rifle retain about 90% original blue with minor wear atop the barrel and along the muzzle and edges, majority of loss due to gripping wear on the floorplate. The bolt retains much original blue and is unnumbered. The cheek piece, rosewood forend tip and white diamond inlay gripcap. The stock remains in good to very good condition with scattered handling marks and modest edge wear along the forend, the buttstock shows		96% original blue finish with specks of light oxidation scattered the length of the barrels and rib, a touch of silvering at the muzzles, and some light thinning on the forward half of the barrels; the breech faces show overall light oxidation staining, and the jeweled sides of the breech show light operational wear and a few spots of oxidation. The silver finished boxlock frame is in very good condition with scattered specks of light oxidation and possible tiny flaking of the silver plate, more concentrated on the right side of the frame, and some light tarnishing in the recessed areas; the trigger retains nearly all its gold finish, with only light freckling showing. The original sights minus the sight hood remain in place along with a single magazine. Mounted atop the receiver is a Weatherby Mark XXII 4x50 scope with crosshair reticle and clear optics. An excellent early Japanese Mark XXII rifle. (5A9949-93) {C&R} [Dr. James D. Morgan Collection] (700/900) Est. 700 - 900 Weatherby Custom FN Mauser High Power Bolt Action Rifle serial #10954, 300 Weatherby Magnum, 24" barrel with an excellent bright bore. The metal surfaces on this 1961 Southgate, CA made rifle retain about 90% original blue with minor wear atop the barrel and along the muzzle and edges, majority of loss due to gripping wear on the floorplate. The bolt retains much original blue and is unnumbered. The checkered left hand Monte Carlo walnut stock features a right side cheek piece, rosewood forend tip and white diamond inlay gripcap. The stock remains in good to very good condition with scattered handling marks and modest edge wear along the forend, the buttstock shows areas of water staining and light crazing and flaking on the cheekpiece. A solid, early Southgate rifle that has served it previous owners well. (5A9949-126) {C&R} [Dr. James D/ Morgan Collection] (600/800) Est. 600 - 800 High Standard Model H-D Military Semi-Auto Pistol serial #145619, 22 LR, 4 1/2' barrel with a bright excellent bore. The metal surfaces retain 97-98% original blue with some very light wear along the muzzle, high edges and gripping areas on the frontstrap. The		96% original blue finish with specks of light oxidation scattered the length of the barrels and rib, a touch of silvering at the muzzles, and some light thinning on the forward half of the barrels; the breech faces show overall light oxidation staining, and the jeweled sides of the breech show light operational wear and a few spots of oxidation. The silver finished boxlock frame is in very good condition with scattered specks of light oxidation and possible tiny flaking of the silver plate, more concentrated on the right side of the frame, and some light tarnishing in the recessed areas; the trigger retains nearly all its gold finish, with only light freckling showing. The frame is nicely decorated with factory foliate scroll engraving and embellishments on the bolsters. The checkered capped pistolgrip walnut stock and forend are in very good condition with a few light dings and abrasions, the majority concentrated on the right side of the buttstock, and the factory ventilated recoil pad remains supple with minor wear at the heel and toe. The shotgun locks up tight with the lever coming to rest right of center and features a single selective trigger, nonautomatic safety, robust ejectors, is sighted with a white bead front and small steel bead midrib, and appears to function well mechanically. (14A10680-2) (MODERN) (600/800)
686	surfaces on this KTG of Japan made rifle retain 97-98% original blue with sparsely scattered specks of fine oxidation, the engine turned bolt remains bright. The high-gloss Monte Carlo walnut stock rates near excellent with a handful of light marks and blemishes, stock features skip-line checkering and a left side cheekpiece. The original sights minus the sight hood remain in place along with a single magazine. Mounted atop the receiver is a Weatherby Mark XXII 4x50 scope with crosshair reticle and clear optics. Lot Title/Description

701 Brown Manufacturing Co. Southerner Deringer 705 Austrian Boxlock Double Shotgun by Franz Sodia serial #4056, 41 RF, 2 1/2" octagon barrel with a moderately oxidized serial #1159, 20 ga (2 1/2"), 29" Krupp Prima Gewehrlaufstahl barrels bore showing otherwise strong rifling. The barrel of this pistol has mostly choked modified in both, the left barrel mostly bright and very good toned to a mild gunmetal patina showing some scattered minor pinprick showing some spots of minor oxidation and a few tiny dings, and the pitting or oxidation staining, the markings otherwise remaining mostly right barrel similar but showing an evident bulge about mid-bore. The strong and completely legible with just a few softened letters. The frame barrels of this 1924 proof-dated shotgun retain about 90% of an older is a very nice deep ocher patina showing some scattered light handling restored rust blue finish thinning and toning to a mild plum-brown patina marks, the hammer a smoky gray with a wisp of case-hardened color with scattered light handling marks and some small areas of old light along the back surface and the edges of the barrel screw with some pitting. The action is mostly a pewter gunmetal patina showing some faint fire blue. The smooth rosewood grips remain in very fine to near areas of light pitting along the fences and is embellished in near full excellent condition showing somewhat worn finish and just a few minor coverage in typical Germanic-style relief with oak leaves, acorns and handling marks, retaining excellent fit. All numbered parts are matching, game scenes with a pair of duck on the right side, hare on the left and barrel-to-frame fit is very good and the hammer seems to function well buck on the bottom. There are a few hints of original case-hardened mechanically. A handsome Southerner deringer for the antique arms colors in the very protected areas. The checkered capped pistolgrip collector. (13A10729-2) {ANTIQUE] (500/700) walnut buttstock and forend remain in very good condition showing a Est. 500 - 700 tiny crack at the toe and some scattered light dings and handling marks. 702 Harrington & Richardson Model 999 Sportsman Double Action Revolver There is a filled sling swivel hole along the toe line and the left side butt serial #78973, 22 LR, 6" barrel with a bright very fine bore showing a shows typical European cheekpiece. The replacement Old English black little stubborn fouling and strong rifling. This revolver shows H&R solid rubber pad provides a 14 1/2" length-of-pull. The shotgun features Gardner address but still with earlier style Rice frame and No. 4 target cocking indicator pins, automatic safety, double triggers, extractors and grip. The metal surfaces retain 98% original blue showing a little bit of a pair of rather large replacement silver bead sights, the front somewhat mild oxidation staining at the muzzle and breech along with a few minor loose. Lock-up is by dual under-bites and hidden Greener crossbolt with handling marks. There are a few tiny pits at the muzzle that appear to be side clips. Lock-up is solid showing a sliver of light along the top edge of the breeches and the top lever is a bit left of center. The action from some slight metal flaws and are unobtrusive. The hammer shows otherwise seems to function normally. (13A10636-35) {C&R} (500/700) remnants of smoky case-hardening along with a few minor pinprick pits Est. 500 - 700 and all markings are crisp and clear. The checkered walnut grip remains in very good plus condition showing some scattered lightly chipped 706 Beretta AL390 Sport Semi-Auto Shotgun points and slight darkening from the years. Equipped with standard serial #X01457E, 12 ga., 30" ventilated rib custom-ported Mobilchoke adjustable sights, barrel-to-frame fit is solid and the action seems to barrel with a bright excellent bore. The barrel was ported by Seminole function well mechanically with solid timing and lock-up. (13A10729-39) Gunworks and retains about 99% original blue, the receiver retains {MODERN} [The Richard Littlefield H&R Collection] (400/600) 97-98% original black anodized finish with a few light scratches on the Est. 400 - 600 left side and a touch of wear behind the loading port, the bolt retains 703 Harrington & Richardson Model 922 Double Action Revolver with 99% original chrome-plate with some light handling marks on the front of Original Box the charging handle and the trigger retains all its original gold coloring. serial #L36041, 22 RF, 6" lightweight round barrel with a bright near The checkered walnut forend rates about excellent while the pistolgrip excellent bore showing a few small factory imperfections in the rifling. stock rates very good plus with a tiny ding in the toe of the grip and The metal surfaces of this 1951-made revolver retain about 96% original some scattered light handling marks. The Beretta Trident-logoed recoil blue showing some scattered fine flaking to a deep gray-brown patina pad shows some light wear to the texturing on the toe and heel and some sparse minor freckling and minor operational wear along the provides a 14 1/2" length of pull. The barrel is sighted with a white bead cylinder. The polished sides of the hammer remain mostly bright at the muzzle and a gold bead mid-rib, one improved modified showing a little mild gray speckling while its back surface shows strong Mobilchoke tube is included and the action appears to function well case-hardened colors. The barrel retains crisp markings and the mechanically. (23A10574-71) {MODERN} (500/700) checkered mottled brown rubber grip remains in very fine condition Est. 500 - 700 Century Arms Centurion 39 Sporter Semi-Auto Carbine showing some light handling marks and some small holes along the 707 bottom edges possibly from insect damage. The action seems to serial #39NC08509, 7.62x39mm, 16 1/4" chrome lined barrel with a function well mechanically with very good timing and lock-up. The bright excellent bore. The metal surfaces of this US-produced carbine included gold and brown box is grease pencil-numbered to the gun retain about 99% original Parkerized finish with a few scattered light along the base and remains in very good condition showing a couple handling marks while the quad rail aluminum handguards retain about small tears and flaking mostly along the sides and edges of the lid, all 95% black anodized finish with the forward edge of the upper rail lettering otherwise intact and legible. The interior holds an original appearing to have been sanded exposing the natural alloy beneath simple hardwood cleaning rod. (13A10729-49) {C&R} [The Richard along with a few spots of high edge silvering. The textured black Littlefield H&R Collection] (500/700) polymer pistolgrip and fixed "NATO length" buttstock rate excellent. Est. 500 - 700 There is a slight bend in the rear sight and the carbine features a milled 704 American Arms Silver I Over Under Shotgun receiver, ambidextrous charging handles, enlarged magazine release, serial #FSA11187, 28 ga., 26" ventilated rib barrels choked improved A1style flash hider, combination gas block and front sight, Tapco G2 modified and full with bright about excellent bores. The barrels, top lever trigger group and the action appears to function well mechanically. and triggerguard of this Italian-produced shotgun retain about 98% (23A10634-108) {MODERN} (500/700) original blue with a hint of high edge silvering on the triggerguard, a spot Est. 500 - 700 of light oxidation on the right side of the ventilated mid-rib at the muzzles 708 Colt .22 Frontier Scout Single Action Revolver and a few very light handling marks. There is a tiny factory flaw in the serial #151379F. .22 LR. 4 3/4" barrel with an excellent bore. This lovely face of the right side of the mid-rib that does not affect the muzzles of little Scout revolver has seen light honest use since leaving the factory. the barrels. The frame remains bright and features attractive foliate The metal surfaces retain about 98% original blue and anodized finishes scroll engraving and the single selective trigger retains all its original showing light edge wear, and scattered handling marks. The checkered gold coloring. The checkered European walnut pistolgrip stock and plastic factory grips with Rampant Colt monograms rate excellent. This forend with schnabel tip rate about excellent with a very tiny and little revolver features light scroll roll mark on the butt (first year applied unobtrusive flake in the high gloss finish on the underside of the forend on this model), flat muzzle, and it correctly times and locks up. The near the frame and perhaps a very light handling mark or two. The revolver includes a factory two-piece woodgrain box that is correctly end buttstock provides a 14 1/4" length of pull with drops of 1 1/4" and 2". labeled to the gun, the grease pencil serial number is no longer visible, The shotgun features extractors, a gold bead at the muzzle, a and paperwork. The box rates fair to poor with numerous cellophane non-automatic safety and the action appears to function well tape repairs, moderate edge wear, and handling marks. The gun also mechanically. (23A10699-29) {MODERN} (500/700) has a factory letter indicating it shipped from the factory as described on Est. 500 - 700 October 28, 1961, it was sent to Sandrose Merchandise Co. 5th & Weiler St., Chester Pennsylvania in a two-gun shipment. This gun saw only occasional use and remains in excellent condition. (8A10206-36) {C&R} (500/700) Est. 500 - 700

The metal surfaces of this push feed rifle retain 97-98% original blue with a few handling marks and small areas of light brown patina visible under bright light. The checkered walnut stock rates excellent with a few scattered handling marks, the impressed checkering points remaining sharp. The rifle features a jeweled bolt, knurled bolt knob, sling swivel studs with no provisions for sights. The rifle is sighted with a Utralux 6x42mm scope with clear optics mounted in Weaver style rings and bases. A nice New Haven produced handy carbine in a versatile caliber,
737	Est. 500 - 700 Very Fine Harrington & Richardson Self-Loading Pistol with Original Box serial #3917, 25 ACP, 2 1/8" barrel with a bright near excellent bore. The metal surfaces of this attractive little pistol retain about 96% original bright blue showing scattered very tiny flakes and freckles with a few small areas of mild oxidation staining along the backstrap and top of slide that are mostly unobtrusive. The triggerguard and extractor remain mostly bright showing a little gray speckling and the safety retains brilliant fire blue. All markings are crisp and clear and the black checkered hard rubber grips remain in excellent condition. One original nickel-plated magazine is included and the action seems to function well mechanically. The included original blue paper-covered box is ink-stamp-numbered on the base "3907", perhaps a factory error, and remains in perhaps good condition. The box shows one missing end flap along the label side of the lid, moderate flaking overall and old glue and tape repairs along the edges and corners. The green end label is intact along the base as is the interior lid label and there are some old pencil scribbles along the lid that humorously read "Loaded Look Out". A very nice example seldom seen with its box. (13A10683-4) {C&R} (500/700) Est. 500 - 700 Winchester Model 101 Trap Single Barrel Shotgun			serial #150821, 22 S, L, LR, 24" barrel with a bright excellent bore. The metal surfaces retain about 93-95% original blue with some scattered spots of light oxidation, a few scratches and impact marks along the barrel and magazine tube, an area of fine scratches on the upper tang and some operational silvering. All metal markings are crisp. The smooth walnut pistolgrip stock and grooved forend rate about very good plus with a coat of added finish and some overall light handling marks. The front sight is missing its bead and the action appears to function well mechanically. (23A10528-8) {C&R} (500/700) Est. 500 - 700 Winchester Model 70 Carbine Bolt Action Rifle serial #G1696999, 308 Win, 20" barrel with a bright excellent bore. (13A10683-4) {C&R} (500/700) Est. 500 - 700 Winchester Model 101 Trap Single Barrel Shotgun serial #104122, 12 ga. 32" ventilated rib barrel choked improved modified with a bright excellent bore. The metal surfaces of this 1967-vintage shotgun retain about 93-95% original blue with some mild flaking to brown patina on the top lever and triggerguard, some fine speckles of light oxidation on the lower edges of the frame and a few scattered light handling marks. All metal markings are crisp, the forend and barrel properly-numbered to the frame and the frame, top lever and triggerguard are adorned with splashes of loose foliate scroll engraving.		742	serial #150821, 22 S, L, LR, 24" barrel with a bright excellent bore. The metal surfaces retain about 93-95% original blue with some scattered spots of light oxidation, a few scratches and impact marks along the barrel and magazine tube, an area of fine scratches on the upper tang and some operational silvering. All metal markings are crisp. The smooth walnut pistolgrip stock and grooved forend rate about very good plus with a coat of added finish and some overall light handling marks. The front sight is missing its bead and the action appears to function well mechanically. (23A10528-8) {C&R} (500/700) Est. 500 - 700 Winchester Model 70 Carbine Bolt Action Rifle serial #G1696999, 308 Win, 20" barrel with a bright excellent bore. The metal surfaces of this push feed rifle retain 97-98% original blue with a few handling marks, the impressed checkering points remaining sharp. The rifle features a jeweled bolt, knurled bolt knob, sling swivel studs with no provisions for sights. The rifle is sighted with a Ultralux 6x42mm scope with clear optics mounted in Weaver style rings and bases. A nice New Haven produced handy carbine in a versatile caliber, ready for the Fall hunting season. (25A10593-73) {MODERN} (500/700) Est. 500 - 700
	Est. 500 - 700 Very Fine Harrington & Richardson Self-Loading Pistol with Original Box serial #3917, 25 ACP, 2 1/8" barrel with a bright near excellent bore. The metal surfaces of this attractive little pistol retain about 96% original bright blue showing scattered very tiny flakes and freckles with a few small areas of mild oxidation staining along the backstrap and top of slide that are mostly unobtrusive. The triggerguard and extractor remain mostly bright showing a little gray speckling and the safety retains brilliant fire blue. All markings are crisp and clear and the black checkered hard rubber grips remain in excellent condition. One original nickel-plated magazine is included and the action seems to function well mechanically. The included original blue paper-covered box is ink-stamp-numbered on the base "3907", perhaps a factory error, and remains in perhaps good condition. The box shows one missing end flap along the label side of the lid, moderate flaking overall and old glue and tape repairs along the edges and corners. The green end label is intact along the base as is the interior lid label and there are some old pencil scribbles along the lid that humorously read "Loaded Look Out". A very nice example seldom seen with its box.
